

IOTA DIRECTORY – QSL COLLECTION Last Update: 22 February 2009

DISCLAIMER: The IOTA list is copyrighted to the Radio Society of Great Britain. To allow us to maintain an up-to-date QSL reference file and to fill gaps in that file the Society's IOTA Committee, a Sponsor Member of QSL COLLECTION, has kindly allowed us to show the list of qualifying islands for each IOTA group on our web-site. To discourage unauthorized use an essential part of the listing, namely the geographical coordinates, has been omitted and some minor but significant alterations have also been made to the list. No part of this list may be reproduced, stored in a retrieval system or transmitted in any form or by any means, electronic, mechanical, photocopying, recording or otherwise. A shortened version of the IOTA list is available on the IOTA web-site at <http://www.rsgbiota.org> - there are no restrictions on its use.

Islands documented with QSLs in our IOTA Collection are highlighted in **bold letters**. Cards from all other Islands are wanted. Sometimes call letters indicate which operators/operations are filed. All other QSLs of these operations are needed.

AN-004 3Y PETER 1. ISLAND
a. **PETER 1. ISLAND**

NOTE Given the physical and logistical problems of activating new islands in Antarctica, it has not been considered a worthwhile use of time to check and list all the possible qualifying islands in the same way as for the main continents. Any proposal for an operation from an unlisted island should be referred to the IOTA Committee together with a recent large scale marine map, showing in particular the location of the targeted island vis-a-vis any nearby Ice Shelf. See note on the Antarctica entry.
