#####

ALBANIA 7389.971 odd frequency of RTirana Albanian service with S=7-8 signal on Dec 28 at 0825 UT.

Fillake Albania MW on Dec 26 at 2130-2145 UT with TWR programmes on 1394.852 kHz, and CRI Polish relay on 1457.852 kHz too.

And mornings Radio Tirana Shijak on non-dir antenna on 7389.984 kHz, folk music at 0845 UT. Scheduled 0730-1000 UT.

Adjustment trim check to latest 1 Hertz accuracy on Perseus rx always managed with low band time signal station DCF Germany 77.500 kHz, and 9996.000 kHz CW signal from Moscow Taldom standard frequency site. (wb, wwdxc BC-DX TopNews Dec 26/28)

ALGERIA Noted RASD Tindouf from Algeria on Dec 26 at 2125 UT on 6297.121 kHz, and Dec 27 at 2043 UT on 6297.121 too. On the mornings RASD differs a little bit on 6297.183 kHz at 0705 UT Dec 27 and 30.

(wb, wwdxc BC-DX TopNews Dec 26-27/30)

666 R. Algerienne / R. Tindouf, Tindouf, 1846-1955 & around 2230 UT, 27 Dec, ch1 relay (\\ 549 [reactivated] for instance), Arabic, talks, local prgr 1900 UT, news in English till 1915 UT, then talks in both Arabic & Engl., ..., Arabic again, ..., news in Castilian 2230, ID in French "R. Algerie International" prior to news in this language at 2235 UT; 32441.

QRM de POR local (10 kW; 38 58 49.16 N 08 57 25.38 W, i.e. at some 30 km to the north of me). I was unable to find any internet data on this, and don't remember having heard them [Tindouf] with such prgrs, v.g. newscasts in foreign langs., but then if one has followed the recent news about We.Sahara, maybe this makes sense as Tindouf is Algeria's outpost in the east of the country, with the border just some 220 km away from the Atlantic ... and, frankly, just between you and me, one of the good reasons for backing Polisario (stn located at 27 33 13.47 N 08 05 56.29 W).  
(Carlos Goncalves-POR, wwdxc BC-DX TopNews Dec 28)

ARGENTINA 15345v off air at present.

Unbestaetigten Branchengeruechten zufolge soll der Sender derzeit wieder mal defekt sein. Via Internet laeufts aber.

Der Livestream laeuft in der Tat:  
<mms:\\rae.telecomdatacenter.com.ar/rae>

Zur Zeit mit einem Programm in Portugiesisch. Sendezeiten und Frequenzen sind recht anschaulich auf der Website von RAE aufgefuehrt (die Zeitangaben aber leider nur in argentinischer Zeit):  
<<http://www.radionacional.com.ar/programacion/rae.html>>  
(Wolfgang Thiele-D and Markus Weidner-D, A-DX Dec 31)

AUSTRALIA A traditional company in the studio of Radio Australia with glasses (no Whiskey In the Jar with Thin Lizzy) and campaign sound "pook' was at 1310 UT after ALS and nx 1305-1310 UT all with very poor signal on 9590 kHz, 9580 with ANO, 9560 with ETH 9561 kHz on Dec 31st.  
(Rumen Pankov-BUL, wwdxc BC-DX TopNews Dec 31)

AZERBAIJAN 9677.6 Heute war von \*0559-0635\* UTC auf 9677.6 kHz ein starker Brumm mit S=9+10dB hoerbar. Hat das irgendwas mit "Aedaelaen Sesi Radio" zu tun, oder war's einfach nur Zufall ?  
(Patrick Robic-AUT, A-DX Dec 30)

BANGLADESH will shift its clock back by one hour from midnight of 31st December 2009. It means 11.59 hrs Bangladesh time will become 10.59 Hrs on 31st December 2009. This will continue till 31st March 2010 when it will shift forward by one hour again.

<<http://www.thedailystar.net/newDesign/news-details.php?nid=119573>>

BBC Bangla had earlier shifted its time to match the changed Bangladesh time and VOA Bengali service recently announced that it will shifts its evening service by one hour from December 31st to match the Bangladesh time. However, the VOA announcement was made before this announcement of shifting back of Bangladesh timings was announced on 25th December 2009.

It will be interesting to watch the international broadcasters match this twice a year change and also manage the A and B frequency change seasons. (Supratik Sanatani-IND, dxld Dec 29)

BELARUS 1170 Golos Rossii px. noted at 1835 UT, instead of Hungarian, listed in Herman Boel's EMWG, via Sasnovy-BLR. QRM de Radio Capodistria-SVN. 34432 at 2009, Dec 27. (Jose Turner-POR, hcdx Dec 27)

I guess Voice of Russia ceased some east European language services on SW + MW on March 28, 2009 already.

Only website services remained:

<<http://hungarian.ruvr.ru/>>

<<http://czech.ruvr.ru/>>

<<http://slovak.ruvr.ru/?lng=slo>>

Only Polish and Serbian remained on MW/SW.

So, this entry in EMWG seemingly outdated, no VoRUS Hungarian, Czech and Slovak transmissions on Sasnovy 1170 kHz anymore. (wb, hcdx Dec 30)

BRAZIL 4845.236v on Dec 29 at 0140 UT Radio Cultura, Manaus, Brazil, nice songs, weak.

4985 on Dec 29 at 0147 UT Radio Brasil Central, Brazil, songs, weak. (Giampiero Bernardini-ITA, dxld Dec 30)

CANADA 9609.949 RCI, Sackville at 1658-1728 UT Dec 27. One of their failing transmitters, at least the audio level was OK with mailbag in which the host butchered names, cities etc. Oscar Peterson cover of "Jingle Bells" then canned ID mentioning this is "RCI Viva" a multi-language Internet stream [RCI Plus] and on Sirius [Sirius Canada?] channel 95. News summary, into Canadacentric music, the only thing allowed I suppose, beginning with "Cripple Creek" by The Band. Barry Haig (sp?), the host, claimed The Band is still together and touring despite some member deaths (ouch, how musically- uninformed he is). Apparently a repeat show, too, as he referenced the Kopenhagen Klimate Konference as being in progress and "... as Christmas approaches..." (Terry L Krueger-FL-USA, dxld Dec 30)

CHILE 11920 HCJB via CVC, Calera de Tango, is \*still\* accompanied by spurs we and others first reported weeks ago; is no one paying attention at Quito, Calera de Tango, Colorado Springs or West Bromwich? Dec 24 at 2352 UT, tho 11920 in Portuguese sounded OK, it was flanked by distorted, motorboating, mushy spurs with matching audio centered at approximately 11902 and 11938 kHz, the latter too close to a legitimate transmission on 11935 kHz, presumably CRI in Cantonese via Kunming. (Glenn Hauser-OK-USA, dxld Dec 30)

CHINA 4330 PBS Xinjiang, Urumqui. Dec 20, Kazakh (listed) 0206-0220 UT, two male and female talks, string instrumental music selections alternating short female talks, 0218 UT Chinese style music. When talks, some distorted, overloaded audio, 35233. (Lucio Otavio Bobrowiec-BRA, JPNpremium Dec 25)

15220 at 0740 UT, S=9+20dB. Urumchi CRI in French has an extremely wide signal of 11 kHz, from 15214.5 to 15225.5 kHz, I set the filter to 20 kHz and had an extremely good sound on the various Chinese songs, reminds me like sound on the valve rx sets in the 50ties !  
(wb, wwdxc BC-DX TopNews Dec 27)

CHINA/TAIWAN Beijing Pressures Asian Countries to Silence Independent Radio Network.

As the Chinese regime negotiates free-trade deals with Taiwan, it is also extending its long arm to restrict freedom of the press on the neighboring island.

Sound of Hope (SOH), an independent radio network headquartered in the United States, has been warned by its carrier in Taiwan that its contract could be terminated.

SOH contracted with Taiwan's Central Broadcasting System (CBS) in 2004. "It is because of Taiwan's democratic system that SOH chose to work with CBS," SOH President Zeng Yong said, adding that the station has been getting more and more popular among mainland Chinese because of its unbiased news reports on current political and social problems in China.

The station has worked with CBS in a mutually successful relationship for nearly six years. Daily air time has increased by two hours every year since 2004.

Madam Ke of SOH said, "According to a source, since the second half of 2008, the Beijing regime has been using various means to pressure CBS to cut off the shortwave broadcasts by SOH."

"CBS President Wang Tan-ping told us that it was difficult to continue the relationship because of the pressure from Beijing. After the contract expires on Jan. 11, 2010, we have been told that it will need to be reviewed and adjusted," Ke continued.

Zeng said that he believes the problem is caused by issues of economic gain. According to Zeng, the Canadian Prime Minister Harper demonstrated that it is not necessary to sacrifice one's principles in exchange for economic interests on a recent visit to China.

"This is not just interference [directed] to SOH, but a challenge to freedom of the press in democratic Taiwan," Zeng said.

"We believe the decision to adjust the contract did not come from Taiwan's government as a whole, but rather from a few individuals. We hope to rectify the situation through communication with the Taiwanese government," he said.

Similar Interference in Indonesia SOH's branch in Indonesia, Batam-based Era Baru Radio Network, encountered similar interference from Beijing. Era Baru started its Chinese and Indonesian language broadcasts in March 2005. Its signal also covers neighboring countries, such as Singapore and Malaysia.

In 2007, the Chinese Embassy sent a threatening letter to the Indonesian government's Communications Ministry and the Indonesian Broadcasting

Committee, demanding termination of Era Baru's license because its programs on media cover-ups and human rights issues in China were influencing Chinese people living within the broadcast area.

Currently, Era Baru is arguing the case with the Indonesian Broadcasting Committee in the Indonesian Supreme Court.  
(The Epoch\_Times, via DXplorer Dec 26)

The only jamming against a sect/church by China mainland at present happens annoying against Falun Gong sect / Sound of Hope broadcasts. Is the greatest antagonist of the PRCHN government.

Look behind <[http://en.wikipedia.org/wiki/Sound\\_of\\_Hope](http://en.wikipedia.org/wiki/Sound_of_Hope)>

Most of ham radio operators worldwide will be happy in future, when Taiwanese shut down the shortwave outlets of Sound of Hope, due of SOH intruding into ham radio bands often.  
(wb df5sx, DXplorer Dec 26)

What a difference 14 hours earlier makes! Heard these Firedrake on Dec 26 from 2345 to 0000\* (usual 5 minutes off at ToH) \\ 8400, 11300, 11350, 13970, 14430, 14780, 14970, 15140 and 16700. SOH is still emphasizing their broadcasts to China during their local mornings. Also a non-parallel FD on 14520, against who and is it new?  
(Ron Howard-CA-USA, dxld Dec 30)

CUBA 11760 "Surreal" powerful signal of RHC Quivivan broadcast in Spanish at 0810 Dec 31. S=9+25dB. Speech on Cuban revolution, like "extraordinarias ... heroicas ...". Often noted around 2100 UT on 11770 kHz too.  
(wb, wwdxc BC-DX TopNews Dec 31)

RHC check at 0421 Dec 24: only one frequency in English, 6000, and it is only fair; meanwhile there are plenty in Spanish, 6060, 6110, 6120, 6140, 9600, with a variety of strengths and modulations. Also scheduled in Spanish until 0500 are [6150? wb] 11690, 11760, 13770, 13790, the higher ones seldom propagating here.  
(Glenn Hauser-OK-USA, dxld Dec 30)

Si, amigos, this is the weekend edition of DXers Unlimited, with more radio hobby related information, amigos. Our 11760 kiloHertz frequency, running 100 kiloWatts into a phased array of dipoles that provide 6 db of omni-directional gain, continues to be heard by many listeners in North America who have sent very nice reports via e-mail, making our transmitter engineers very happy.

Likewise we have received many reports of our Spanish language morning local time broadcasts on 6110 kiloHertz, that is heard not only in North America, but also all around the Caribbean and Central America, on 6110 kiloHertz we are using a similar omnidirectional antenna, but with a 250 kiloWatt transmitter.  
(Prof. Arnie Coro Antich-CUB CO2KK, RHC DXers Unlimited Dec 19 via dxld)

DRM as always once a year on Christmas time, I connect the PERSEUS, AOR AR7030 and PC/Dream software together, as toy train like Maerklin. QTH is southern Germany. Here is DRM mode log of Dec 26, 0930 UT, signal SNR in dB.

6085 D BR Munich Ismaning 17.1 dB, alternate 5 sec reception, 5 sec silent, tinny switchover sound. But AM mode reception from Ismaning has been never better in the past, due of dead zone from Weissbierland.

6095 LUX Junglinster, 23.5 dB, KBS morning relay about Makoli - Korean rice wine, and Kimchi food. Dream display window shows "RTL English", ID: E17190.

7325 RUS Sovetsk Bolshakovo in Kaliningrad Oblast, Russian, 20.8 dB, surprisingly strong powerful signal, stood out positively in this little check.

9610 POR BBC-DWL Sines, English, Theme on Nigeria. 20.3 dB.

9870 NZL negative, RNZi Rangitaiki, but also AM 9765 kHz sound like Polar zone Aurora sound at same time. Only 3 diodes shined on Sony ICF2010.

11900 BUL R Bulgaria Sofia, but Dream software scan caught nothing. DRM flank block visible, but signal level 40dB below AM stations nearby.

and TOP DOG on all DRM outlets at 0930 UT in southern Germany in 22 mb, 13810 POR BBC-DWL Sines, SNR 29.7 dB, twists the needle at S=9+45 dB

And more DRM mode log of Dec 27, 0705-0820 UT, signal SNR in dB

3995 UK BBC-DWL Skelton, only 8.4 dB jump to 14 dB peak, deep fades at 0720 UT.

6025 ROU RRI Tiganesti, German program til 0726 UT, ID: 1001, 11.6 to 18.1 dB at peak.

6130 POR BBC-DWL Sines, English, deep fades, suffered signal, alternate 5 sec reception, 5 sec silent, tinny switchover sound. From down 9 to 17.4dB level jumped at 0710 UT.

9610 POR BBC-DWL Sines, English, ID: E1C248, revolucionizer Rudi Dutschke theme at 0814 UT, 24.1 dB.

9780 ESP REE Noblejas, in Spanish, Report from Berlin Alemania, powerhouse 28.1 dB at 0726 UT, ID: 4711.

11635 RUS VoRussia Moscow Taldom, ID: E07002, 26.6 dB, Andean music "El Condor Pasa", nx in brief at 0730 UT, S=9+30dB, and at 0805 UT SNR 24.4dB.

11900 BUL R Bulgaria Sofia, but Dream software scan caught nothing at 0735 UT.

5895 NOR RRI Bucharest via VTC Kvitsoe relay, English nx at 1805 UT Dec 27, SNR 21.6 dB, signal level S=9+35dB, ID: E2F198.

6095 LUX Junglinster, 24.6 dB, S=9+25dB, KBS World, Radio Korea International program in German 0900-0930 UT, positive sound of the female announcer. Audio scratches like so far, like satellite misstuned dish feed. Heavy fading of the DRM signal on scanning. Dream software screen display

shows "RTL English", ID: E17190.

7325 RUS Sovetsk Bolshakovo on Kaliningrad Oblast, Russian at 0905 UT, 26.2 dB, S=9+15dB, ID: FF0010.

9610 POR BBC-DWL Sines, English, Tehran clashes, 26.1 dB, S=9+30dB.

9780 ESP REE Noblejas, in Spanish, cl-down annmt of Pacific/Australia target program at 08.58 UT, announced all frequencies at this hour. 27.7dB, S=9+35dB, ID: 4711.

11635 RUS VoRussia Moskau Taldom, outstanding 30.5 dB, S=9+40dB, ID: E07002. 'Cambridge' like VoRUS English program female announcer with all target and meter bands[!] ID, even for four German Telekom mediumwave relays, like 50 years ago. No frequencies given. cl-down of Moscow Taldom sender at 09.00:50 UT.

13810 POR BBC-DWL Sines, SNR 33.7 dB, at 09.07 UT moved the needle to S=9+40dB and beyond. ID: E1C248.

6030 ROU RRI ID Tiganesti[wrongly scheduled Galbeni site, wb.], SNR 21.8dB, S=9+30dB, at 21.28 UT, 30 Dec. ID "Transradio Bln." [Transradio Berlin delivered the DRM modulation gear, wb.], ID: 1001.

6065 RRI Bucharest at 1835 UT in English, ID: SNR Tiganesti E1, ID:1001. Started SNR at 10.5dB with sound fragmentation, up to 16.4 dB. Signal strength S=9+10dB. Then I'd to narrow the bandwidth filter to 9 kHz, due of very strong VoRussia St. Petersburg on adjacent 6060 kHz, which interfered DRM decoding.

6145 Voice of Russia in Italian at 1800-1900 UT Dec 31, via Sovetsk Bolshakovo. SNR 29.5 dB, S=9+30dB. ID: VoRussia, Russian, ID: FF0010 (wb qth Stuttgart JN48OR, wwdxc BC-DX TopNews Dec 26/27/28/30/31)

EGYPT 6290.091 ERTV Radio Cairo from Abis, Arabic at 0455 UT, Dec 30. S=9+10dB.

6290.082 ERTV Radio Cairo from Abis, Arabic at 2138 UT, Dec 30. (wb, wwdxc BC-DX TopNews Dec 30)

ETHIOPIA 7165 R. Ethiopia, Geja Jawe, 1607-... UT, 26 Dec, English, talks, music, blocked by a jammer like noise signal for some mins. after 1629 UT, then in the clear again, and aired the French prgr at 1700 UT; 25332. This is usually worse than R. Ethiopia's home sce. on 7110 kHz. (Carlos Goncalves-POR, wwdxc BC-DX TopNews Dec 28)

GERMANY [to Sri Lanka] 6045 Voice of Tigers, via Nauen[but via WER instead, wb.], with non-stop songs, heard from 0038 onwards. 34443, Dec 17. (Jose Turner-POR, dxld Dec 21)

6045 via Wertachtal, Germany, 6045, IBC, Tamil Radio, at 0025-0100\* UT, Dec 20, tentative with continuous Tamil music. Abrupt sign off. Poor to fair with occasional adjacent channel splatter. (Brian Alexander-PA-USA, dxld Dec 20)

Hessischer Rundfunk: Meldung vom 28.12.2009

hr schaltet Mittelwelle 594 kHz zum Jahresende ab.

Bis zum Jahr 2012 muss der hr ueber 64 Millionen Euro einsparen.

Bereits im April hat der Hessische Rundfunk (hr) ein umfangreiches Sparpaket in Hoehe von 64 Millionen Euro bis 2012 beschlossen. Teil dieses Sparpakets ist auch die Beendigung der aeusserst stromintensiven Mittelwellenverbreitung im hr-Sendegebiet. Am 31. Dezember 2009 wird die Mittelwellenfrequenz 594 kHz deshalb endgueltig eingestellt. Damit entfallen auch die auf diesem Uebertragungsweg verbreiteten Sendungen, etwa Bundestags- und Landtagsdebatten oder die Sendungen in Fremdsprachen.

Weitere Informationen und alle Angaben zu den Frequenzen des hr in Hessen finden Sie unter <[www.frequenzen.hr-online.de](http://www.frequenzen.hr-online.de)>  
Hessischer Rundfunk Pressestelle  
<[http://www.hr-online.de/website/derhr/home/presse\\_meldung\\_einzel.jsp?rubrik=4820&key=presse\\_lang\\_38504513](http://www.hr-online.de/website/derhr/home/presse_meldung_einzel.jsp?rubrik=4820&key=presse_lang_38504513)>  
(HR, Dec 28)

[A-DX] Hinter den Kulissen, Funkhaus Euskirchen. (Dec 27)

Hallo Liste,  
da die letzten Tage und Wochen immer mal ein paar Anfragen kamen (auch von ListenteilnehmerInnen), ob man mal Fotos aus dem Studio / von der Technik bei uns sehen koennte, hab ich mal gerade die Kamera bemueht und unkommentiert den Hauptschaltraum abgelichtet:

<<http://www.youtube.com/watch?v=DjsnE1Zq3YU>>

Ueber die filmischen Qualitaeten kann man sich sicher streiten, aber wir machen Hoerfunk, kein Fernseh'n, Wowereit! Viel Spass  
({gefuehlte} 73 {so alt muss ich erst mal werden}, Christian Milling)

INDONESIA 9525.972v odd Behind strong CRI transmission in English on even 9525 kHz I see VoINS Jakarta at 1530 UT Dec 24, S=8-9 level. Checked the PC twice for adjustment, on Standard&Time Signal DCF 77.5 kHz and Moscow 9996 kHz.

Habe heute mal wieder die Saechelchen zusammen gesteckt. Dann sieht man auch schoen, dass vor allen anderen bei den russischen Stationen, der IBB in Biblis und Lampertheim, sowie auch bei den Rumaenen mit ihren neuen Continental Sendern sehr korrekt fast aufs letzte Hertz geschafft wird. Dagegen liegen die VTC-VT group und auch RFI Sender schon etwas daneben. Gut macht sich der 59 Jahre alte RIAS/DLF Sender Berlin Britz 6190 mit 10 Hertz Abweichung heute Vormittag.

...9525.977 kHz on Dec 31 at 1400 UT, weak under threshold !  
(wb, wwdxc BC-DX TopNews Dec 24/31)

9525.98 Voice of Indonesia, at 1015-1055 UT on Dec 26, English programming. Local pop music. IDs. Fair level but weak modulation. Improved somewhat by 1050 UT.  
(Brian Alexander-PA-USA, DXplorer Dec 27)

9526 Voice of Indonesia, Cimanggis, at 1614-1709 UT on 25 Dec, Indonesian, talks, ..., ID + announcements in both BI & English for Arabic

prgr at 1700 UT, prayer; 33442, then rated 54444 at 1700 UT to deteriorate later. The following foreign lang. prgrs, in Spanish & German, were aired as the times matching those on the WRTH 2010.

(Carlos Goncalves-POR, wwdxc BC-DX TopNews Dec 26)

7289.804 RRI Nabire, at 0810 UT. Nice local vocals with Indonesian woman announcer. Plug pulled at 0825 UT. Very irregular. Last log here was 12 December. Thanks Clark tip.

(David Sharp-NSW-AUS, dxld Dec 30)

IRAN 13789.965 VoIRIB Kamalabad, in Arabic at 0805 UT Dec 30. S=8-9 fluttery. And \ nearby 13800.008 kHz from Zahedan site.

15085.032 IRIB's German service at 0820 UT Dec 30, about Palestine and occupied real estate by Israeli conquistators in east Jerusalem. S=9+20dB, and \ 17590.015 at S=9 level [16 mb freq is too high, wb.], til 0827 UT cl-down.

(wb, wwdxc BC-DX TopNews Dec 30)

KOREA D.P.R. 15245v [wandered 15244.929 to 15245.070 kHz and back within a single minute]

Der grosse Fuehrer sitzt wohl heute frueh selbst auf dem Fahrradgenerator. Voice of Korea Pyongyang in Russisch heute am 30. Dez. um 0815 UT mit nur S=8-9 Signal.

Der Traeger wanderte innert einer Minute um 140 Hertz von 15244.929 bis 15245.070 kHz und wieder zurueck, so schnell kommt man mit dem Mausrad gar nicht hinterher. Da hilft auch die Stabilisierung in den guten schweizerischen BBC 250 kW Sender nichts mehr. Letztere wurden in den 90ziger Jahren von der SwissPTT uebernommen.

(wb, wwdxc BC-DX TopNews Dec 30)

3970.548 KCBS Wonsan, at 1312 UT. Weak, but obviously the one, with 'trademark' (near hysterical) delivery by male announcer. UTE low side, best in USB. Parallel to much stronger 2850.046 kHz.

(David Sharp-NSW-AUS, dxld Dec 30)

MADAGASCAR Picture and frequency schedule see

<<http://blogs.rnw.nl/medianetwork/fire-puts-rnw-madagascar-relay-station-off-the-air>>

<<http://www.rnw.nl/data/files/images/DSC05928.JPG>>

<<http://www.rnw.nl/data/files/images/DSC05927.JPG>>

<<http://www.rnw.nl/english/article/fire-radio-netherlands-broadcasting-station>>

<<http://www.rnw.nl/es/espaol/article/incendio-en-el-equipo-transmisor-de-rnw-en-madagascar>>

Fire puts RNW Madagascar relay station off the air. There has been a fire in the high voltage room of the external mains power supply at Radio Netherlands Worldwide's relay station in Madagascar. Firefighters from the Madagascar capital Antananarivo managed to bring the blaze under control within hours. The fire destroyed the high voltage circuit breaker equipment, so broadcasts from Madagascar will be suspended for at least three days and possibly up to a week. Some transmissions have already been moved to other sites, but because of the Christmas holidays this has taken longer than usual to organise. Additional changes are pending and will be published when confirmed.

Here details of temporary replacement services from Dec 25 & 28:

#### Radio Sweden International

0200-0300 11550 HBY 350 kW 055 deg to SEAs in Swedish/English

2000-2100 9490 HBY 350 kW 055 deg to SEAs in Swedish/English

2100-2200 7425 HBY 350 kW 190 deg to SoAf in Swedish/English

#### Vatican Radio

0300-0430 9660 SMG 250 kW 145 deg to EaAf in English/Swahili/Amharic

0330-0400 7360 SMG 250 kW 130 deg to EaAf in Swahili

0430-0500 9660 SMG 250 kW 170 deg to WeAf in French

0500-0530 9660 SMG 250 kW 170 deg to SoAf in English

1600-1630 13765 SMG 250 kW 169 deg to CeAf in Swahili

#### Voice of America

(R BULGARIA DX MIX News, Ivo Ivanov, via wwdxc BC-DX TopNews Dec 28)

Transmissions through RNW station slowly resumes.

A team of ten people are employed to repair two of the four damaged Radio Netherlands transmitters. Broadcasts through these transmitters may be resumed later today. It is hoped the other two transmitters will be repaired by the end of this week.

(RNW, dxld Dec 30)

Transmissions through RNW station slowly resumes.

That news item was written by someone with no technical knowledge and is inaccurate. The correct information, which we received direct from the station, will be in the Media Network Weblog shortly. I am not sure where this information came from, but the email from Madagascar was sent after the news item was published. The news item is only on our African site, not the main English site. I apologise on behalf of whoever wrote the story.

(Andy Sennitt-HOL, dxld Dec 30)

[later] I have now updated the Media Network blog as follows:

On 30th December, our Station Manager in Madagascar reported that the two Philips transmitters are in working order, and have been tested using generator power. Technicians are still working on restoring the mains supply and will finish tomorrow (31st December). A temporary schedule will then be put into effect on 1st January using these two Philips transmitters.

The other two transmitters (one 250 kW and one 50 kW) are also thought to be OK, but still have to be tested at the weekend. New switches also have to be installed to connect these two transmitters to the antenna system.

We hope to bring them back on the air in the course of next week.

Tomorrow (31st December) I will publish details of the interim schedule which has been worked out for next week using two transmitters at Madagascar.

(Andy Sennitt-HOL, dxld Dec 30)

**MALAYSIA** Extreme speedy/urgent QSL card arrived from K-L.

Da sage noch jemand der Versand von QSL-Karten ist fuer Rundfunkstationen nicht wichtig. Heute kam per DHL Express Flyer und Kurier ("extremely urgent") in einem Riesen-Kuvert eine QSL-Karte der Voice of Malaysia / Vo Islam fuer einen Bericht vom 28.11.2009.

**NORWAY/SWEDEN** Arctic Radio Morokulien RSL on 1584 kHz starts tonight at 2300 UT.  
[The time of the first transmission is given as 0000 Swedish time on 28 December i.e. Sunday night 27 December at 2300 UTC - Dave Kenny-UK]

From mediumwave.info

"MW-Broadcasting from Morokulien, SJ9WL/LG5LG.  
A 50th anniversary-broadcast will start from Morokulien on the 28 of December at 00.00 SNT. (Swedish lokal time is UTC +1hr) The name of the station will be "ARCTIC RADIO MOROKULIEN".

The broadcasting will be on 1584 kHz and for the most in Swedish. The broadcasting will be done to celebrate the 50th anniversary of Morokulien and the Arctic Radio Club."

Their licence runs till 10 January 2010.  
vy73 Harald Kuhl, Germany (16/12-2009; via BrDXC-UK)

Mail vom 18. Dezember mail von Olle Alm, dem Arctic DX Club in Schweden zum 50. Gruendungstag des Klubs. Gruss Wolfgang

#### ARCTIC RADIO MOROKULIEN

The Peace Kingdom Morokulien, located right on the border between Norway and Sweden, just northwest of Charlottenberg, ARCTIC RADIO CLUB starts a new radio station (RSL-restricted special license) on mediumwave on December 28, 2009 thanks to good cooperation with the chairman of Arima, Amateur Radiooperators in Morokulien.

Arctic Radio Club of Sweden and the Peace Kingdom Morokulien jointly celebrate their 50th anniversaries by these broadcasts.

The radio station's main frequency is 1584 kHz, but some test broadcasts will also be carried out on 1602 kHz. The power is approximately 400 watts.

The coordinates of the transmitting station is:  
N 59 degrees, 56min, 15sec. E 12 degrees, 12min, 30sec. All information on transmissions, frequencies and possible additional test transmissions will be announced at ARC News Flash:  
<[www.radioenthusiasts.blogspot.com](http://www.radioenthusiasts.blogspot.com)>

Official broadcast schedule:  
28.12.2009 0000-0100 All times are Swedish Standard Time.  
28.12.2009 1400-1500 (UTC + 1 hour)  
30.12.2009 0900-1000  
06.01.2010 0900-1000  
10.01.2010 1400-1530  
10.01.2010 2100-2300

Transmission will be in Swedish, but some small part in English occurs. Station Identification will be in both languages.

ARC concludes its celebration with broadcasts on Sunday 10 January, 2010.

For those interested, a unique QSL card will be printed. This is of course, a QSL card for the first mediumwavetransmission from the Peace Kingdom Morokulien.

See more on the Peace Kingdom Morokulien:  
a movie made by Swedish TV this year

<[www.morokulieninfocenter.com](http://www.morokulieninfocenter.com)>  
<[www.fredsmonumentet.com/index.html](http://www.fredsmonumentet.com/index.html)>

Please contact the ARCTIC RADIO, P.O.Box 5050, SE-350 05 Vaexjoe, Sweden.  
Email: <[arctic.radio.morokulien @ telia.com](mailto:arctic.radio.morokulien@telia.com)>

Reception reports are welcome to the above addresses and if you request a printed QSL-card for the correct reception report, please include 2 stamps for Swedish domestic postage.

By letter correspondence please enter your email address and we can notify you of further commemorative broadcasts in 2010.

(also via Olle Alm-SWE, wwdxc BC-DX TopNews Dec 18)

PAKISTAN 7535 Radio Pakistan, (pres) Rewat, in Urdu, at 1720 UT with live speech excerpts. Seems to have some modulation problems, together with strong hum. Improving with time. 34432 on Dec 27.

(Jose Turner-POR, dxld Dec 27)

Since the recent change of frequency for English news at 1600-1610 UT from 7510 to 7535 kHz. Radio Pakistan has also begun to use 7535 kHz instead of 7530 kHz for Urdu to WeEurope at 1700-1900 UT. I thought it might be a mis-tune, but obviously not so, as it is heard daily.

And the old Rewat transmitters are still in use with no sign of anything from the new installation at Karachi Landhi.

(Noel R. Green-UK, dxld Dec 28)

PALAU Re PALAU, trying to find T8WH broadcast center area.

Hello, I think you now have the precise information about the location, to know exactly where to go on another attempt?

Reminds me of IBB's Lampertheim plant. It is located in a forest and just invisible. One has to know the access road and go to the gate, or to know the location of the antenna field and walk through the forest. It should be almost impossible to find the site by chance.

The former 100 kW mediumwave site of SFB/RBB in Berlin was literally invisible, too; even immediately at the fence it was difficult to find a place where more than the tip of the mast was visible.

And as I said, my experience is that locals just know nothing about transmission facilities in their neighbourhood. Of course they are aware of prominently visible antennas, but even then they not necessarily know what they are good for. As an example, ask a local about the Wertachtal transmitter plant. No doubt they know this mysterious installation but have no clue what it is, rather associate it with spy activities than broadcasting.

(Kai Ludwig-D, to Larry Fields, via dxld Dec 30)

9965, unusually something between WRMI and WWCR, Dec 25 at 1517 UT, strong signal with American preacher, "there is a mighty God". I consulted the B-09 Broadcasts in English booklet from the British DX Club I keep next to the radio instead of defunct PWBR, and hunting thru the 1500 UT listings, soon found T8WH in vernacular/English. At 1535 UT recheck it had changed to Korean.

Once the computer was on, today's Aoki agrees it is T8WH, daily in English until 1530 UT, then daily in Korean from 1530 UT with Nippon no Kaze clandestine; the azimuth switches from 318 to 345 degrees but I did not notice much difference here.

Merchant marine Larry Fields is visiting Palau and tried to find T8WH. The

locals had never heard of it, and he did not find it, despite driving toward where it was supposed to be, racking up \$75 in taxi fare. Google Earth mapping researched by Wolfgang Bueschel shows it on the opposite side of the island from Koror, and Kai Ludwig suggests the antennas may be obscured by trees until you are right upon them. Larry is still on the island for another week and is going to try again.  
(Glenn Hauser-OK-USA, dx1 Dec 30)

Hello Glenn, I had a meeting with a local Ham George T88GN and as I was leaving I met another person who told me the station is here but in a different location from where we went. I think my driver didn't know much and kept asking the wrong people.  
(from Larry on Palau till Jan 2; Dec 27, dxld)

Palau island update ... Hello again, ran into a local ham here named is George, T88GN and we spent about 20 minutes talking about ham licensing here. I have plans to obtain one for future, but in the meantime, I ran into a friend of his who told me that the Palau site is still in use and he knew some people who worked there. My plan is to see it still before I leave for our next Port of Guam, so will see what happens there. Will post it in my Bloggers site and also my other site <<http://qrv.me/n6hpx>>  
(Larry, n6hpx/mm, Fields, <n6hpx1 @ hotmail.com> USNS Kiska, Dec 28, swl at qth.net via dxld)

PHILIPPINES FEBC Philippines 1395 kHz?

I have been listening to old SDR-files. One of them is 1395 kHz on Nov 19, 2007, at 1258 UT. Heard in Posio, Finland, with 55 deg 900 m Beverage-antenna. A clear id in English can be heard: "This is the Far East Broadcasting Company, Philippines." However, no call or location. WRTH, MW-list or the febc.ph-website don't know such station. Any idea? DZVT is a catholic stn. DWMG solano?  
(Jorma Mantyla-FIN, mwdx Dec 30)

History: DWRF / Far East Broadcasting Corporation (FEBC) was always on 1458 kHz, on high power 250 kW in 1975 til cl-down/dismanteled in 1990.

Previously single MW antenna mast located at  
15 21 30.44 N 119 57 11.71 E still a bunker pole is visible at this point.

Now at present Alan's Asiawaves show 1458 kHz 10 kW only. Asiawaves mentioned 15 21 18 N 119 57 24 E  
but acc to Uwe Volk, who visited the FEBC Iba TX site in December 2007:

"... From the beach side you see a fifth antenna tower, which is a FM repeater of Radio Veritas. No wonder that the local people indentify the four SW masts behind the FM aerial also as Radio Veritas, no wonder at all ...

Iba transmitter site consists of two SW and one MW transmitter:  
1x Continental 100 kW SW tx (ca. 1980),  
1x Harris[rather General Electric brand label visible] 50 kW SW tx (ca. 1945!) and another 5 kW MW tx transfered from Saipan. There was a highpower MW tx several years ago in use, however FEBC decided that it was not efficient enough and it has been shut down several years ago. The existing 5 kW tx is still of that time era and was used as a stand-by tx."

(wb, mwdx Dec 30)

PORTUGAL RDPi spurs.

I spoke to the RDPi HF site chief, Dipl. Engineer Luis Abrantes, and he explained the spurs were caused by one of the old reserve 100 kW units, and when they noted the malfunction, the tx was changed in the middle of the b/cast.

They've got four 100 kW Continental txs that are kept as reserves and put to work regularly during the time when the Sao Gabriel site is manned, i.e. not just Mon-Fri as I may have reported, but Sat/Sun included, albeit 0900-1700 only though. That clearly means some of the supposedly 300 kW power levels may, at some point, be just 100 or even a bit less depending on the state of the txs mainly because what one's pickig up is a signal from the good old Continental units.

So the recent problems with fq change on the Africa/144degr beam after 1700 arise because no one is there to switch a reserve tx thus "bypassing" the still ongoing automation fault (tx memory & software) which is partly due to Thales itself and a bit of customs bureaucracy on both countries, i.e. Portugal and Switzerland. The other playing part in this dragged process stands with the RTP top bosses, i.e. administration, much to the despair of RDPi and its HF site.

The 2000-2400 extra b/cast on 11825 Afr 144degr for instance is simply off for months on end due to what I reported, an obvious demonstration that HF is no longer considered as important for the RTP-Radio e Televisao de Portugal administration as it was in the recent past when the radio branch (RDP) & the tv (RTP) branch were completely separated.  
(Carlos Goncalves-POR, dxld Dec 30)

ROMANIA Radio Bucharest on Ceaucescu's overthrow.

On December 25, 1989 Nicolae Ceaucescu and his wife were executed by firing squad. Shortwave listeners followed the events in Romania at that time via Radio Bucharest.

A 4 minute recording of Radio Bucharest on December 23 1989 can be downloaded here, also one of WNYW 1972 on the same webpage, lots of other recordings and memorabilia on the site:

<[http://193.63.162.100/audio\\_other\\_recordings.html](http://193.63.162.100/audio_other_recordings.html)>

The two 28k Real player links on this 1999 BBC report, including a 1 minute Radio Bucharest English report on Ceaucescu being overthrown, are still active. The John Simpson and Alexandra Razvan reports are not:

<<http://news.bbc.co.uk/1/hi/world/europe/574200.stm>>

(Mike Barraclough-UK, BrDXC-UK dxld Dec 26)

And people in Romania did on their TV screens...

Some examples:

<<http://www.youtube.com/watch?v=DftuaT7anko>>

20 Dec 1989, Ceausescu speaks on TV about the events in Timisoara. (On the sidebar you should get a link to a long version in even poorer quality.)

<<http://www.youtube.com/watch?v=CQmzpnjkXR4>>

Ceausescu's last public appearance on 21 Dec 1989. Suddenly the rally gets into panic, for still unknown reasons. This is the video tape from the OB van or its feed, the live transmission on TV had been interrupted until Ceausescu resumed his speech.

<[http://www.youtube.com/watch?v=aPDF5\\_vWCXI](http://www.youtube.com/watch?v=aPDF5_vWCXI)>

22 Dec 1989, about 40 minutes after Nicolae und Elena Ceausescu left Bucharest by helicopter: A crowd gets into studio 4 of TVR, a set for newscasts with bluebox graphics. Heavy dispute with TV staff because the crowd suspects the TV people to fool them. Command from the director in the control room and ...

<<http://www.youtube.com/watch?v=JdlIIPvqLHc>>  
... on they are.

<<http://www.youtube.com/watch?v=nUQ0aLOB5qU>>  
First appearance of Ion Iliescu.

<[http://www.youtube.com/watch?v=m9KVQEK\\_OVE](http://www.youtube.com/watch?v=m9KVQEK_OVE)>  
Securitate officer supports the revolution.

<<http://www.youtube.com/watch?v=Ka8NnmkWsRY>>  
Emotional address by Casimir Ionescu, now a politician.

<<http://www.youtube.com/watch?v=LzQxgUNoZqw>>  
Police officer.

<<http://www.youtube.com/watch?v=6OgULszqanU>>  
Army officer.

<<http://www.youtube.com/watch?v=HsBdO42qgrk>>  
Nico Ceausescu brought forward, reportedly after being seriously injured.

<<http://www.youtube.com/watch?v=06a9MImc97s>>

Detailed address by Ion Iliescu, super "Free TV of Romania" which just did not fulfil since Iliescu later, as president of Romania, kept TVR as a propaganda mouthpiece.

<<http://www.youtube.com/watch?v=9QuK1UPcn1k>>

Alleged "terrorist" brought forward on 23 Dec. In the evening of 22 Dec 1989 shootings started, most of the victims have been killed at a point when the Ceausescu government had already been overthrown. "Terrorists" have been blamed for this. Basically the whole matter is still a mystery.

If you want to see more: A good amount of the TVR afternoon/evening broadcasts from 22 Dec 1989 is on Youtube, in 20 parts, under the title "Revolutia Romana la TV". In the last ones one can see how the shootings and fire-raising took place in front of TVR's live cameras, too.

And from now you have 18 hours left to officially view the documentary "Videogramme einer Revolution" online:

<<http://plus7.arte.tv/de/1697660,CmC=2988306,scheduleId=2960750.html>>

It's the version with German subtitles. An English one ("Videograms of a revolution") exists as well. The production consists of original footage, including but not limited to the taped TVR live broadcasts. This documentary is a staple of media critic.  
(Kai Ludwig-D, dxld Dec 27)

SLOVAK REP Radio Slovakia International gets five year funding.

Edwin Southwell-UK wrote to me advising that he'd heard on-air that Radio Slovakia International had got future funding. I found the item, dated December 21, on the RSI website:

Slovak Television and Slovak Radio Seal Subsidy Deals With State.

Representatives of the state-run Slovak Television and Slovak Radio signed framework agreements with the Culture Ministry on Monday. The two media organisations will receive funds towards making programmes in the public interest. The deals were signed by Culture Minister Marek Madaric and the general directors of Slovak Television and Slovak Radio, Ivan Niznansky and Miloslava Zemkova for a period of five years.

At least 10 million Euros per year will flow into Slovak Television, while Slovak Radio will receive 4 million Euros annually. The allocated funds will cover expenditures incurred by Slovak Television in the production of almost 400 programmes such as fairy tales, documentaries and films.

Slovak Radio, in turn, will put the money towards making over 8000 programmes related to music, religion, education and documentary work. Support for broadcasting in six foreign languages via Radio Slovakia International is also included in the subsidy. Dec 21., 2009.  
(Mike Barraclough-UK, dxld Dec 30)

SOLOMON ISLS 5019.964 on Dec 24 at 1340 UT, SIBC with a strength seldom heard. Their own magnificent Christmas show with among others greetings from the government to all citizens on the Islands and lots of Christmas carols. \_ The station has been heard almost all autumn and has been extremely frequency stable on 5019.964 kHz. This day the station was so stable so it could be measured to 5019.9644 kHz.

Zur Zeit laeuft ein weihnachtliches Programm, gestaltet von einer Baptistengemeinde in Colombo.  
(Wolfgang Thiele-D, NET-RADIO Dec 26)

SUDAN Research shows that Darfuri listen en masse to radio broadcasts via the short-wave band. 95% of the population over the age of 15 listen to the radio at least once a week. Over 70% of the people in Darfur listen at least once a week to Radio Dabanga, the Darfuri name for Radio Darfur. Mytton: 'This research shows that short-wave radio is a very powerful medium in Darfur.'

After the state Radio Omdurman \_ which broadcasts the entire day \_ Radio Darfur is the most popular radio station in terms of listeners. Asked which station people tune into to listen to the news, 39% states Radio Dabanga. Furthermore, it turns out that the questioned Darfuri primarily listen to the radio at times when Radio Dabanga transmits its broadcasts, from 7.30 a.m. to 8.30 a.m. and from 6.30 p.m. to 8.30 p.m.

Graham Mytton, formerly head of Media Research at the BBC and presently working as an independent media researcher, was commissioned by Press Now to conduct research into the listening behaviour of the Darfuri. The survey was held immediately after Ramadan, from September to the end of November 2009. The first results came in three days ago. The survey was held among 1,582 respondents over the age of 18 from all over Darfur, both men and women. The remarkable thing is that men and women listen in equal measure to the radio. 'I have never seen that, nowhere in Africa - it's usually a male affair,' says Mytton, who has led numerous media studies in Africa. 'The preliminary results are very good for Radio Dabanga.'

Graham Mytton presented these provisional survey results yesterday evening in Desmet Studios, Amsterdam, during the celebration of Radio Darfur's first anniversary. The data presented by Mytton concerned provisional results that will still be supplemented further. The full research report will be rounded off around 1 January 2010.

U.K. <<http://blogs.rnw.nl/medianetwork/bbc-persian-television-broadcasting-despite-interference-from-iran>>

It appears that BBC Persian has left the Hot Bird 6 satellite this afternoon, 28th Dec 2009, around 3pm GMT, replaced by an info card instructing viewers to turn to Telstar 12. The jamming has also thankfully stopped (which was affecting all unfortunate channels on the transponder, with R1 and Yes Italia also constantly suffering the same picture breakup and sound drop-outs, rendering them unwatchable).

## WJHR TESTING FOUR MONTHS BEFORE REGULAR SHORTWAVE BROADCASTS.

A new Christian shortwave station has begun test transmissions in Milton, Florida. WJHR started test broadcasts in mid-November, and will continue testing daily on 15550 kilohertz on the 19 meter band. Tests are conducted at different times between the timeframe of 1500-2300 UT (from 9 a.m. to 5 p.m. Central time), says station owner Scott Mock in an interview with DXing.info. Mock hopes to be able to begin regular broadcasts in March or April 2010, when frequency may be changed to somewhere around 13.8 MHz. Even during regular operation, WJHR will continue to broadcast only during local daytime hours.

WJHR is a Christian radio station and plans to air programming by fundamentalist Baptist churches. "Right now I am financing it myself, but eventually churches will be donating money to keep it on the air," Mock explains. Unused airtime will be available for others as well. "If people want to buy airtime, we'll certainly sell it," Mock says.

A 50-kilowatt transmitter and an antenna directed north are located in Milton, close to Pensacola in the Florida Panhandle. Mock says he has had some antenna problems, and is currently in the process of getting the antenna replaced. Transmitter power is now around 10 kW, but will increase to the maximum 50 kW by the time regular broadcasts begin. There is no studio, and all programming is pre-recorded. "It's not a fancy operation, but it gets the job done", Mock describes to DXing.info.

Unlike nearly all other shortwave broadcast stations, WJHR plans to transmit only on SSB. Current tests can be heard on the upper side band (USB). SSB is used because "it is far more economical and almost everyone can receive SSB", Mock explains.

Mock says he really wants to hear from DXers how well the signal is getting out, and he will be printing QSL cards next year. Reception reports are welcome by email to

<[wjhr@usa.com](mailto:wjhr@usa.com)>

or by writing to Radio Station WJHR, 5920 Oak Manor Drive, Milton, FL

32570, USA.

DXer Glenn Hauser in the U.S. was the first to report hearing WJHR on Dec 8.  
(DXing.info, Dec 12, edited on Dec 16 via dxld)

URUGUAY 6045usb R Sarandi, Montevideo. Info provided by Fernando Egopar, station technician, via tlc to the transmitter site located at L. Batlle Berres 6061, Montevideo, Uruguay.

Nominal frequency is 6045 kHz. It was bcsting on 6043.22 kHz these days after they fixed the adjustment. While I was talking to him he retuned the xter (!) to go to the nominal 6045 kHz and thus avoid hets from other broadcasters. Power is 300 W, antenna is an Inverted V, but which deserves improvement for causing some SWR due to minor impedance mismatch. Sked is 24h. He welcome reception reports to his E-mail address:  
<fgopar34 @ gmail.com>  
(Horacio A. Nigro-URG, DXplorer Dec 29)

#####

### 2009 Clandestine Activity Survey.

During the year 2009 the activity of political clandestine stations broadcasting on shortwave has decreased by 13.4 % to 1088 Weekly Broadcasting Hours (WBHs). This is the lowest level of activity ever recorded since this survey has been introduced in the year 1986 (so far the low had been 1116 WBHs in the year 1999).

The activity of clandestine stations broadcasting to target areas on the Asian continent has dropped by 18.7 % to 744 WBHs. On the American continent the activity has decreased by 8.4 % to 197 WBHs. However, on the African continent the activity has even increased (although from a very low level) by 21.5 % to 147 WBHs.

For the second year in a row the most active target area worldwide is North Korea with 252 WBHs (+7 when compared with last year), followed by China P.R. with 226 WBHs (+2). On the third place is Cuba with 197 WBHs (-18).

The number of different target areas active worldwide has remained unchanged at 17, although some changes have occurred. While Laos and Iran are no longer thought to be active, Madagascar and Sudan have emerged as new/reactivated target areas.  
(Mathias Kropf-D wdx-UK / wwdxc Dec 31)

### 2010 SWL FEST

Registration form, new website, and online registration are now available.

Greetings! The 2010 Winter SWL Fest registration form is now available, along with a completely new website and new, online Fest registration option. The URL remains the same:

<<http://www.swlfest.com>>

The new website is the handiwork of NASWA webmaster Ralph Brandi, who has created a site that is easy for John and Richard to keep up to date with the latest info.

As part of Ralph's efforts, we have added the capability to submit your Fest registration electronically, complete with online registration payment through PayPal. Links to online registration are available through the main Fest website.

You can also still register the old-fashioned way by filling out the paper form and sending in a check but we suspect many will find the online registration to be easy and convenient.

Doing our part to Whip Inflation Now, we have kept the registration fees the same as last year. The Best Western hotel has also kept its room rates the same as well. As usual, the registration rates are cheaper if you get your registration in to us early; for 2010, the magic date is February 19th.

That postal address to receive a registration form which requires an SASE or \$1 US if requesting from abroad is

Winter SWL Festival, P.O.Box 4153, Clifton Park, NY 12065 USA.

On-site registration is also possible, to avoid the hassles of international currency and postage.

We'll also keep the Fest blog active, with its URL of  
<<http://swlfest.blogspot.com>>

Please let either John or Richard know if you have any questions. As a reminder, the dates for the 23rd annual Fest are March 5th and 6th, 2010. Hope to see many of you there! Best wishes for a happy holiday season, Richard Cuff and John Figliozzi, co-Festmeisters.  
(Richard Cuff / Allentown, PA-USA, dxld Dec 30)

THOMSON. Thomson's newest rotatable curtain antenna.

**AFRICAN BROADCASTERS GEARING UP FOR FUTURE MAJOR INVESTMENTS IN BROADCAST ANTENNA INFRASTRUCTURE.**

(from Thomson Radio Broadcast via Dec NASB Newsletter direct and via dxld)

**INCREASING THE REACH OF SHORTWAVE BROADCAST SYSTEMS.**  
Small-footprint Antenna System with Unlimited Flexibility.

Shortwave broadcast systems can reach millions of people anywhere, anytime from a single transmission site. The possibilities are theoretically unlimited. On the other hand, shortwave infrastructure is a notorious power consumer and stations require a lot of land to accommodate adequate antenna systems. Thomson's newest rotatable curtain antenna helps broadcasters with limited space and budget to make important power savings while increasing considerably their coverage flexibility. The Thomson HP-

RCA 2/2 (High Performance Rotatable Curtain Antenna) is a highly interesting alternative system solution for broadband fixed curtain antenna configurations.

HP-RCA 2/2 services similar coverage areas as the classical LPD (Log Periodic Dipole Antenna) with up to 45% higher efficiency of the radiated power into a defined target area. Additional comparative figures of merit include

- Higher gain (up to 19 dBi, or 3 to 6 dB more than typical LPD)
- Higher front-to-back ratio (6 to 10 dB more than typical LPD)
- Better power capability (up to 500 kW, as compared to the LPD with an absolute maximum of only 250 kW)

In addition, the HP-RCA 2/2 has a better overall efficiency, requires less land, is easier to maintain and affords better reliability with regard to storms and electrostatic effects. The footprint of this powerful and highly flexible system is surprisingly small. With dimensions of 51m x 51m, the foundation surface needs less than 12m x 12m. The covered area has a radius of approximately 50m.

With an overall weight of 80t, the antenna has a maximum survival wind speed of 240 km and a maximum operational wind speed of 120 km. It takes less than 3 minutes for a 180 rotation. Based on a rigid array and a tubular shaft, the HP-RCA 2/2 is a back-to-back arrangement of a low band and a high band curtain antenna equipped with a reflector screen. The 2/2 configuration gives a good radiation pattern performance with moderate structural effort.

Whereas the classical HR 2/2 curtain antenna solution is based on a fix structure with phasing system limited to less than 20 azimuthal slewing with considerable sidelobes, the new rotatable structure with a central shaft has 360 azimuthal performance radiation patterns without sidelobes. (from Thomson Radio Broadcast via Dec NASB Newsletter, direct and via dxld)

ALBANIA Hinweis fuer die Radio Tirana Fangemeinde und andere ...

Film im MDR TV als Albanien Bericht:  
repeat Friday 08. Jan. 2010. Time 0845-0930 CET (UT+1hrs)  
MDR Leipzig TV.

TV program, pictures from Albania tonight in MDR TV, 45 minutes.  
Dear Drita, tonight Jan 3rd at 2200-2245 hrs local time we saw an interesting TV report from Albania on MDR Leipzig German TV program.

<<http://www1.ard-digital.de/beta/Programm/Sender?sendung=1145618739357#top>>

<[http://www.mdr.de/tv/programm/prog\\_detail+43209000310673.html](http://www.mdr.de/tv/programm/prog_detail+43209000310673.html)>

Very interesting stories, pictures and interviews of various Albanian people.  
<[http://img.tvmovie.de/imageTransfer/F1\\_2499275.jpg](http://img.tvmovie.de/imageTransfer/F1_2499275.jpg)>

The movie showed some 4 kilometers strand promenade at Saranda.

The very popular female TV actor Fiodora Vora showed us the TV studio as

well as their "relaxing" place at ALCORA Bar together with her pretty Albanian girl friends.

Some of the 600.000 bunkers of the Enver Hodsha era was visible.

The movie showed us the "Theth" village people in the upper mountains north of Skoder.

<<http://www.free-blog.in/uploads/j/junker/132087.jpg>>

<<http://www.free-blog.in/uploads/j/junker/132085.jpg>>

Also oil pumps were seen at Balsh north of Girokastra, and a lot of car washing places like "LAVAZH".

<<http://www.free-blog.in/uploads/j/junker/133122.jpg>>

<<http://www.free-blog.in/uploads/j/junker/133121.jpg>>

The popular painter Ali Oseko - now a University professor - showed his colourful paintings of the past 30 years.

<<http://www.free-blog.in/uploads/j/junker/132478.jpg>>

And the rich millionaire on the truckage and logistic sped company, which produces also textile suits and special work clothes for the German market. The millionarie owns 25 very expensive dressage horses, imported from western Europe as his toy.

(wb, wwdxc BC-DX TopNews Jan 3)

ARGENTINA 11710 & 15345 kHz, General Electric transmitter is off the air by technical problems. Unfortunately our transmissions on SW are not functioning. But, in November 2009 the purchase of a new transmitter was approved, and now, we are waiting for the new equipment. Meanwhile, our transmissions are only via Internet.

(Gabriel Ivan Barrera-ARG, wwdxc BC-DX TopNews Jan 6)

6060 Radio Nacional Argentina, at 2325-2335 UT, Briefly noted a male in Spanish language comments which were immediately followed with Tango type music. Here's a tidbit about me, I like true Argentinian Tango Music. On the half hour, time ticks heard. At about 2333 UT, the male returns in Sp comments again. "... en programma Argentina" heard during comments. More music follows. At about 2341 UT, I start getting strong interference from Radio Marti on this freq. It sounds like they are just tuning up because the signal is fading to nil and then coming back strong. I can still hear Argentina on the freq but with difficulty. So Argentina begins being a good signal and ends with a poor signal. At 2349 UT Marti takes over the frequency.

(Chuck Bolland-FL-USA, hcdx Jan 6)

AUSTRALIA Good News from Tazzy Tiger OHR in Tasmania.

Dear fellow intruder busters,

I hope that you have all started the new year well. Here in Tuebingen, southern Germany (30 km south of Stuttgart), today we have abt 5 cm of powdery snow with a lot of ice under the snow. Traffic is rather hazardous. So you have to be careful.

IARU-MS ALSO has been very careful in the end of 2009 spotting and removing the Bruny-"Tazzy"-Tiger radar from Tasmania. If you want to learn more about this "Successful Action" just hit

<[www.iarums-r1.org/iarums/actions.pdf](http://www.iarums-r1.org/iarums/actions.pdf)>

You will also find this report on the "new" homepage of IARU-R1,  
<[www.iaru-r1.org](http://www.iaru-r1.org)>

Big thanks to all hams who have helped in this case, especially to Glenn VK4DU, Peter VK3MV, Brett VR2BG, and Arasu VU2UR. Keep up your good work!  
(Uli Bihlmayer-DJ9KR, INTRUDERALERT mailing list Jan 2)

IARU-MS was only concerned with keeping TIGER out of the 10100-10150 kHz 30m hamband, but where else might it be? pdf link below includes this:

On a real time data display on internet you are able to read the transmission frequency of the different TIGER radars. You can also see a picture with the "fan" in different colours showing the structures of the ionosphere. Please hit  
<<http://www.tiger.latrobe.edu.au/>>

And the above link includes this, rather unspecific info:

"TIGER is controlled remotely from La Trobe University in Melbourne, Australia. It uses HF radio waves in the 8 to 20 MHz range. It consumes only 2 kW of power, the same as some electric kettles and transmits an average of 200W - the same as two bright light globes.

"TIGER typically operates near 14 MHz during day-time and 12 MHz at night but this changes with the level of solar activity. It is also capable of swept-frequency operation meaning that when irregularities are widespread throughout the ionosphere, the radar detects ionospheric and sea scatter over much of its range window and over a broad band of frequencies"

Altho obviously doing valuable ionospheric research, which might even be applicable to SWL/DXing, it seems it could also interfere with many other transmissions unless it is disallowed e.g. from broadcast bands. I have enquired about its actual frequency usage.  
(Glenn Hauser-OK-USA, dxld Jan 4)

AUSTRALIA [and non] CVC - John Wright Jan 03 to Ian Baxter-AUS "The Cox Peninsula was under a ten year lease to CVC, the government will hand it back to the traditional owners. Kendari people so that's the end of that...  
(SW TXsite ng, via Ian Baxter-AUS, Jan 6)

So indeed shortwave appears to be a done deal for Christian Vision. And yes, the governmental body that operated the Australian broadcasting transmitters at this time closed the Darwin/Cox site in 1997, following budget cuts for foreign broadcasting. It is also correct that in 2000 the site had been leased to Christian Vision for ten years, and probably (although not necessarily) they simply let the lease run out now instead of renewing it. Now the question is if Broadcast Australia or another operator will step in. It could happen, but I would not count on it.

Concerning the transmission equipment: At present it consists of one of the original Collins transmitters from 1968 (three such rigs are still in use at Sackville, too) which can now be manually tuned only, requiring about 15 minutes. Otherwise there are three rather modern Thomson

transmitters, two originally delivered to the Cox site in 1994, the third one moved in from Carnarvon after this site had been closed in 1996. Reportedly Christian Vision brought in two Continental 100 kW transmitters from somewhere, replacing the two other old Collins rigs. Perhaps they are not in use at all, or is there a time when more than four frequencies are on air simultaneously?

Next question: How about CVC Spanish and the Calera de Tango transmitters? I would not count on Christian Vision keeping their shortwave activities in Chile either.

(Kai Ludwig-D, dxld Dec 11)

BOTSWANA/ANGUILLA [and non] 11775 ... The Africans must be rejoicing over the absence of Anguilla. Recheck 1758 UT, VOA Portuguese in the clear on 11775 kHz, which is Sao Tome, 100 kW, 138 degrees toward Mocambique at 17-18, about to switch to Botswana 1800-1830 [Mon-Fri only], 100 kW, 350 degrees.

Strange: there are no Portuguese-speaking areas at that angle from Botswana; can't be for Angola or Mocambique, but maybe Cabo Verde, Guine-Bissau? However, Aoki shows the angle as 10 degrees, even further from former Portuguese colonies, and extended M-F only for that semi-hour. (Glenn Hauser-OK-USA, dxld Jan 5)

Botswana may have only one curtain array. Aoki shows only 3 different azimuths, 350 degrees, 10 degrees and 20 degrees. There may be sidelobes that are favorable for Mozambique. (Jerry Lenamon-TX-USA, dxld Jan 5)

Yes, Google Earth show two 350deg curtains on the left side of the TX building at Botswana. Mainlobe approx. +/-30 deg each side, real above-average on 320 to 020 degrees angle.

Sao Tome 316 deg  
Luanda 312 deg  
easternmost tip of AGL 343 deg  
Dundo in northern AGL 335 deg

EGYPT ERTU launches a live stream of different networks on <[ertu.org](http://ertu.org)>

Checking the website of ERTU <[www.ertu.org](http://www.ertu.org)> I noticed that there's a new window with live stream for the following networks (in the same order as on the site):

1- Holly Quran Radio (ID Idhaat al quraan alkareem min al qahira)

2- General Program (ID Idhaat albarnamaj al aam)

3- Middle east radio (ID Idhaat alsharq al awasat)

4- Voice of the Arabs (ID Idhaat sout al arab)

5- Youth and sports (ID Idhaat alshabab wal reayada)

the quality is not really good but at least Egyptians living abroad can tune in to voices from home from time to time now. it's all in Arabic, but hopefully they will add more networks like the European local service which broadcasts in english, french, italian, greek and armenian.

(Tarek Zeidan-DEN, dxld Jan 5)

ETHIOPIA 6030 Radio Oromiya, at 0407-0504 UT on Dec 28, news by a man announcer in presumed Oromo language. Instrumental music at 0414 UT with another man talking over the music ending the news. ID followed by Horn of Africa vocals. Mix of talks and HoA music until ID at 0500 UT followed by a talk by another man announcer. Fair to good at tune in but beginning to fade around 0450 UT. This is becoming a Sunday night/Monday morning regular after the Cuban jammer leaves the airwaves.

(Rich D'Angelo-PA-USA, NASWA Flashsheet via dxld)

GERMANY 6190 SW Berlin Britz transmission lost audio feed, only carrier noted at 1100-1200 UT, though usual DLF winter signal of steep angle antenna S=9+20dB some 750 kilometers away in southern Germany. Old

RIAS/VOA unit of 1951 with 17 kW of power, - to enthuse about this "ripe performance".

(wb, wwdxc BC-DX TopNews Jan 2)

594 HR Frankfurt.

593 / 594 kHz. After the news and followed by announcement of night concert relay at 00.05:33 CET on Jan 1st, 2010 Hessische Rundfunk Frankfurt's mediumwave stations at Weiskirchen and Hoher Meissner switched off for ever.

So a mixture of Bulgarian, Moroccan and Portuguese programmes remain on our ears here in southern Germany.

(wb, wwdxc BC-DX TopNews Jan 1, 2010)

Attachment from Kai Ludwig included below - on dxld:

If it works you should hereby get access to a recording of the HR Rodgau-Weiskirchen 594 kHz transmitter leaving the air, during the opening of the ARD-Nachtkonzert programme as explained in the separate message.

<<http://groups.yahoo.com/group/dxld/attachments/folder/963083332/item/list>>

click HR\_594\_Abschaltung.mp3

Concerning the closure of 594 kHz: It appears that the Hoher Meissner synchro transmitter left the air a few seconds before local midnight. The main transmitter at Rodgau-Weiskirchen (near Frankfurt) stayed on air for another five minutes of last news, then the carrier had been killed at 23:05:33 UT during the opening announcement of ARD-Nachtkonzert. I suspect this has been done by engineers on-site, not by timer or remote control.

This relay of ARD-Nachtkonzert replaces as of today the former overnight relay of MDR Info. It's absolutely crazy: Now the all-news station relays overnight the same programme of classical music than hr2. And to my knowledge this saves not even money. No idea why they did this (there are even conspiracy theories), the announcement of the "changed overnight programming" does not mention any reasons:

<[http://www.hr-online.de/website/radio/hr-info/index.jsp?rubrik=20772&key=standard\\_document\\_38515355](http://www.hr-online.de/website/radio/hr-info/index.jsp?rubrik=20772&key=standard_document_38515355)>

Now 594 kHz is here in Germany dominated by Bulgaria and the BBC relay in the Ukraine. In the case of Bulgaria it is ironical that this is a transmission site which looks like a clone of GDR sites, simply because in fact it is one. Only the original Funkwerk Koepenick transmitter has at some point (1995 acc. to this source; the old one was a 250 kW, too) been replaced by a Russian rig:

<<http://www.predavatel.com/bg/8/pleven.htm#rrts>>  
(Kai Ludwig-D, dxld Jan 1, 2010)

Personally heard this program often in past 58 years.

History.

Radio Frankfurt started after WW II on Aug 23, 1947 at Heiligenstock site[by Reichspost in 1935y] via movable mediumwave "Martha" transmitter,

which carried on 14 trucks and was one of numerous movable transmitter units by former "Reichspost" and used by special technical forces from places all over Europe, like Soldatensender Belgrade, in Sowjetunion, Netherlands, Norway and Karelia Finland. Four towers at 121 m height. Was screened towards 16 and 121 degrees at Sundsvall-SWE and Plevan-BUL.

Address was Friedberger Landstrasse 525, Frankfurt/Main suburb at  
50 09 16.59 N 08 42 56.62 E

<[http://maps.google.de/maps?f=q&source=s\\_q&hl=de&geocode=&q=Friedberger+Landstrasse+525,+Frankfurt&sll=51.151786,10.415039&sspn=20.808164,57.084961&ie=UTF8&hq=&hnear=Friedberger+Landstra%C3%9Fe+525,+Seckbach+60389+Frankfurt+am+Main,+Hessen&t=h&z=16](http://maps.google.de/maps?f=q&source=s_q&hl=de&geocode=&q=Friedberger+Landstrasse+525,+Frankfurt&sll=51.151786,10.415039&sspn=20.808164,57.084961&ie=UTF8&hq=&hnear=Friedberger+Landstra%C3%9Fe+525,+Seckbach+60389+Frankfurt+am+Main,+Hessen&t=h&z=16)>

Replaced on Oct 16, 1967 to new Weiskirchen site. Maximal 950 kW ERP, screened towards Sundsvall-SWE and Sofia-BUL at  
50 03 21.82 N 08 51 45.42 E

<[http://maps.google.de/maps?f=q&source=s\\_q&hl=de&geocode=&q=50%C2%B003%2721.82%22N++08%C2%B051%2745.42%22E&sll=51.151786,10.415039&sspn=0.010135,0.027874&ie=UTF8&ll=50.056061,8.862617&spn=0.005187,0.013937&t=h&z=17](http://maps.google.de/maps?f=q&source=s_q&hl=de&geocode=&q=50%C2%B003%2721.82%22N++08%C2%B051%2745.42%22E&sll=51.151786,10.415039&sspn=0.010135,0.027874&ie=UTF8&ll=50.056061,8.862617&spn=0.005187,0.013937&t=h&z=17)>

To cover Northern Hesse due to the screening towards Sweden, Hessischer Rundfunk erected a smaller relay station at Hoher Meissner (Hausen Lichtenau) on June 1, 1952. Started with 20 kW, was increased later to 100 and then maximal 250 kW of power during cold war time. Two towers of 110 and 160 m height. Signals were also screened at 17 and 127 degra.

This caused a heavy buzz on daytime, because exact synchronization between the two MW locations was not very sufficient these days in 1952, 1953 ...

The station was also well heard up to 300 kilometers into communist GDR (Soviet Occupied Zone of Germany) area.

Location at  
51 12 29.60 N 09 50 48.82 E

<[http://maps.google.de/maps?f=q&source=s\\_q&hl=de&geocode=&q=51%C2%B012%2729.60%22N++09%C2%B050%2748.82%22E&sll=51.151786,10.415039&sspn=20.808164,57.084961&ie=UTF8&t=h&ll=51.208281,9.845853&spn=0.005061,0.013937&z=17](http://maps.google.de/maps?f=q&source=s_q&hl=de&geocode=&q=51%C2%B012%2729.60%22N++09%C2%B050%2748.82%22E&sll=51.151786,10.415039&sspn=20.808164,57.084961&ie=UTF8&t=h&ll=51.208281,9.845853&spn=0.005061,0.013937&z=17)>  
(wb, wwdxc BC-DX TopNews Jan 1, 2010)

594 About close down of HR Frankfurt 594 kHz MW:

In the early 70s the only one station of Hessischer Rundfunk heard here was on 593 kHz at night time only. I received a QSL card despite of the warning of secret communist services which opened all letters sent to the West Germany. I sent my reception report in envelope with sign:

Hessischer Rundfunk, ... , Frankfurt a.M., DDR  
and I received the QSL ! By similar way I had already QSLs from Bayerischer Rundfunk Munich, Sender Freies Berlin etc.  
(Rumen Pankov-BUL, wwdxc BC-DX TopNews Jan 2)

Freud und Leid ... MW HR 594 kHz - der Stecker ist gezogen.  
Aus England, gehoert heute morgen: VOXM St. John's 590 kHz was much more clear of QRM.  
(Noel R. Green-UK, wwdxc BC-DX TopNews Jan 1)

Aber hr-info sollte doch landesweit abgedeckt sein. (dann koennte ich auf UKW auch dran knabbern, ohne erst ueber PC, Satellit oder Kabel irgendwo im Haus gehen zu muessen).

Nach dem Verlust der Fruehnachrichten aus der Schweiz auf 531 kHz, ist's nun auch hr-info auf 594 kHz, und moeglicherweise ORF 6155 kHz tot, ... Rentners schlafen halt laenger als 0711 UT, wenn der Riemen in Moosbrunn runter faellt. Jetzt verbleiben mir noch SWR contRa, DLF, DLR und DWL 6075 kHz ... das war's dann.

(wb, wwdxc BC-DX TopNews Jan 1)

Aus Schweden: Hessicher Rundfunk 594 kHz also left the air as scheduled. BBCWS (via UKR I guess) in the clear at 0900 UT.

No DRM on 729 kHz [from Putbus Ruegen isl] this night when I checked after 2300 UT, but this may be a temporary event.

(Olle Alm-SWE, wwdxc BC-DX TopNews Jan 1)

GREECE 15630 Seldom heard so powerful in 19 mb, VoGreece in Greek at 0805 UT Jan 2. // 9420 kHz. B u t 12105 kHz channel is off today 0600-1000 UT.

From 1100 UT, 9420 kHz is OFF today. Only ERA-5 VoGRC 15650 kHz and ERT-3 Thessaloniki regional relay on 9935 kHz on air. 15650 kHz at 1120 UT S=9+20dB. Scheduled 1100-1650 UT.  
(wb, wwdxc BC-DX TopNews Jan 2)

9420 - no signal from ERA-5, Avlis, Jan 2 at 1520 UT check, tho there was a poor signal on 15650 kHz. Constant VOG monitor John Babbis in Maryland says 9420 kHz has been missing since Dec 28 when he checks every evening. One of the transmitters is definitely down. Wolfgang Bueschel, however, says 9420 kHz was on and 12105 kHz missing until 1000 UT Jan 2, then 9420 kHz missing from 1100 UT.  
(Glenn Hauser-OK-USA, dxld Jan 2)

And now at 2000-2300 UT segment - see schedule below -, 9420 kHz is missed again, only ERA-5 at 7475 and ERT-3 on 7450 kHz heard at 2030 UT, Jan 2nd.

They use three TX units only in past decade. Also HFCC registration entries of VoGRC on many SW channels are wooden and far of reality.

So, one of three txs is out of service at present, and two remaining units work on a emergency schedule. As always in past years when similar broke down appeared at Avlis.

Except ERT-3 Radiophonikos Stathmos Makedonias (Thessaloniki) program which has always priority.

THE VOICE OF GREECE (ERA-5) B-09 Short-wave Transmission Schedule  
(Effective October 25, 2009 to March 28, 2010)

	Avlis 1	Avlis 2	Avlis 3
UT	(100 kW)	(100 kW)	(170 kW, decreased of nominal 250 kW)
0000-0100	12105/226	7475/285	9420/323&
0100-0200	12105/226	7475/285	9420/323&
0200-0300	*12105/226	7475/285	9420/323&
0300-0400	7450/226	7475/285	9420/323&
0400-0500	7450/226	7475/285	9420/323&
0500-0600	*7450/226	7475/285	9420/323&

Each time in the past decade (rather since the Collins 35 kW units in Thessaloniki dismantled) when Avlis was short of tx units due of various failures, the station was only on air with limited two TXs.

The only exact information about Voice of Greece we've got in various ways in past two years was via John in the US, who has close ties with some staff in Greece. Thank you John.  
(wb, dxld Jan 3)

I think that the Greeks have a bunch of VOA-Portugal 250 kW transmitters sitting around either at Avlis or Kavala, plus the ones at Kavala when they shut down that facility. As Glenn Hauser calls it "wooden" frequencies, perhaps being held if needed, of which there are two chances, slim and none.

Re: Greek SW txs; as you say, there may be more which are not actively used. [,,] The transmitter listing is different from actual usage: the whole transmitter potential with nominal powers are listed and the actual situation has less transmitters and run on lower powers (of which details are very hard to get, especially about final dismantling). ...  
(Mauno Ritola-FIN, dxld Jan 3)

Avlis 2 x 100 and 1 x 250 kW. This "potential" cannot be listed for Thessaloniki programming separately, because all three transmitters are in use for Voice of Greece outside the 1100-2300 UT period. All other listed transmitters are ghosts or must rot away in whatever storage area, they are certainly not connected to anything and setting them up should be impossible since no suitable antennas exist.  
(Kai Ludwig-D, dxld Jan 4)

From what I can determine, there are 2 Marconi[of 1972year] 100 kW. and 1 Continental[of 1988year, moved to GRC in 1996, wb] 250 kW. transmitters at Avlis being used for ERA 5 (VOG) and ERT 3 (Thessaloniki) programming and 4 Continental 250 kW transmitters from Portugal which are exposed to the elements in containers (possibly being used for parts).

The 4 x 35 kW. transmitters in Thessaloniki are probably stored in containers. The 2 Continental 250 kW. transmitters from Portugal are probably stored in containers at Kavala. At least, that is the way it looks to me.

[later]  
I looked into my files and came up with the following items about.

In an e-mail dated Febr 27, 2004  
"Dear John: In Avlis is 2 transmitters 100 kW and 1 x 250 kW where it works 70 kW. Babis."

In an e-mail dated Dec 22, 2004  
"In passed photograph look at some containers includes 3 HF transmitters 250 kW! They are in Avlis area above 6 years[thats since 1998, wb.] exposed in the sun, rain, snow, etc., what do you say! It is related to studio 3? (figuratively)."

In an e-mail dated Dec 9, 2005  
"Dear John: Upgrading is on air in Avlis 3 transmitter, includes power

increase 200 kW and super modulation upgrade. The transmitter function is on 9420 kHz, 323 deg.

This is the news from here, I hope the (UPGRADING) and the (TRANSMITTER) 2 for 15630 kHz & 7475 kHz not in (POWER) but (MODULATION). Babis".

I sent the below web sites to Babis Charalampopoulos a few years ago and he agreed that these are the types of transmitters presently being used by The Voice of Greece. Click the below to see.

<<http://www.transmitter.be/mar-b6123.html>>

<<http://www.transmitter.be/con-419f2.html>>

(John Babbis-USA, dxld Jan 4)

Thank you John for the info. So the 'incorrect' 4 x 250 kW mentioned in the WRTH should not be counted to the 'potential', because they will only be used as spare parts, but I could easily imagine that it wasn't the only possibility for the transmitters from the beginning and there could have been other alternatives, so they remained in the count for too long.

Generally speaking, I don't really see the transmitter count per site a matter of being totally correct or totally incorrect. I don't think any part can get 100 % reliable and current information from each SW transmitter site in the world, whether the txs not used actively are maintained properly, possibly to be used later on or to be sold or the decision has just been done that they will be used as spare parts or are simply scrapped. And what is the difference from the point of actual broadcasting operation if a transmitter is run once a year just to see if it works or it is used as spare parts? Both are outside the operation. It would be good if the transmitter operators would send updates to WRTH, but as far as I know they very seldom do that. Does anyone know if tdp.info is updated at all any more?

(Mauno Ritola-FIN, dxld Jan 4)

GUAM 11590 KTWR Guam in Mandarin Chinese, carry a very bad BUZZ audio, like satellite dish feed alignment failure. 1125 UT Dec 2 at signal level S=9+10dB. Registered at 1015-1100 UT.

INDIA Sendeende von WorldSpace Satellite Radio fuer Indien.

Sehr zum Aerger der aktuellen Kunden hat WorldSpace India am 31. Dez. 2009 den Betrieb eingestellt. Die US-amerikanische Muttergesellschaft WorldSpace, Inc., hat seit Okt. 2008 unter Insolvenzrecht gearbeitet, aber bisher keine neuen Investoren gefunden. Indien machte mit 450.000 Abonnenten 95 Prozent der WorldSpace-Kundschaft aus, wobei etwa die Haelfte die Programme ueber das Pay-TV-Bouquet von Airtel DTH bezog. Bei Airtel DTH zahlten die Abonnenten fuer 10 Programme von WorldSpace Rs120 im Jahr, bei WorldSpace Rs2,000 fuer 40 Programme. Insofern war der Deal fuer WorldSpace nicht profitabel, half aber, im Markt zu bleiben. Worldspace India hat bis zuletzt Kunden geworben bzw. Kunden in die proprietraeren Satellitenradios investieren lassen.

Waehrend die Radios jetzt nutzlos sind, koennen die Abonnenten immerhin versuchen, etwas von ihren Abo-Gebuehren zurueckzubekommen. Airtel DTH, das als Alleinstellungsmerkmal gegenueber anderen Anbietern auch Programme von WorldSpace ausstrahlte, wird kuenftig zehn Satellitenprogramme von All

India Radio uebernehmen (FM Gold, FM Rainbow, AIR Punjabi, FM Rainbow-Bangalore, AIR Tamil, AIR Ragam, AIR Telugu, AIR Bengali, AIR Gujarati, AIR Urdu).

Die Kundschaft betrauert nicht nur das Geschaeftsgebaren, sondern auch den Verlust zahlreicher spezialisierter Musikangebote, wie man sie so weder bei All India Radio noch bei den UKW-Privatsendern bekommen konnte, geschweige denn werbefrei und rund um die Uhr. Es ist noch unklar, wie Liberty Media Corp, das juengst die Schulden von WorldSpace gekauft hat und schon vorher durch einen Kredit in Nordamerika Sirius XM vor dem Bankrott rettete, mit WorldSpace anfangen will. Als moegliche neue Zielgebiete werden Europa und Laterinamerika gehandelt.

0800-1000 7250

Englisch

1800-2100 11990

(Ulrich Wicke, Dec 1, via Dr. Hansjoerg Biener-D, ntt Jan 1)

11630, Jan 6 at 1450 UT. Arabic talk and then Qur'an recitation, fair signal but slightly off frequency to the hi side, causing het with something else. Per EiBi and WRTH, the other station here at this hour is VOR in Urdu via Tajikistan. Kuwait is aimed 230 degrees, so they may hope there is no collision in targets. Non-Qur'an Kuwait also heard on non- // 15110 kHz in Arabic at 1505 UT.

(Glenn Hauser-OK-USA, dxld Jan 6)

MADAGASCAR [c.f. BC-DX TopNews #945] We now have three transmitters back on the air following the fire at the RNW Madagascar relay station.

The 50 kW transmitter was activated today. The fourth transmitter, a 250 kW ABB rig, has suffered some heat damage and must be repaired, which will take up to a week. Our Head of Distribution Jan Willem Drexhage says that the Dutch word for the damaged components is "hoogspanningsschakelaarbeveiligingselectronica" which he suggests would be a good word for Scrabble, at least if you're playing it in Dutch :-)

There have also been some changes to which broadcasts are assigned to which of the Philips transmitters. A revised schedule for all three transmitters, effectively immediately, is in the Media Network Weblog.

<<http://blogs.rnw.nl/medianetwork/>>

(Andy Sennitt-HOL, hcdx Jan 2)

MEXICO 6184.95 XEPPM Radio Educacion, Mexico DF. at 1131-1149\* UT Jan 3. Excellent with fantastic electric violin solo covers of mostly 30's standards and 30's/40's movie show tunes nonstop. Around 1146 UT, into female Portuguese vocal sounded like Astrud Gilberto as I flipped to 1060 kHz to look for the parallel. Indeed 1060 kHz was there at 1148 UT with the same vocal, but when I flipped back to 6185 kHz, they had just pulled the plug! Too bad, as 1060 kHz is mostly all Cuba here (Radio Veintiseis). (Terry L Krueger-FL-USA, DXplorer Jan 3)

Hallo allerseits, auf dieser Internetseite:

<<http://www.mexico-radio.com>>

findet sich eine ziemlich umfassende Aufstellung von Radiostationen aus Mexiko, mit Links zu den jeweiligen Livestreams.

Die Zusammenstellung ist nach mexikanischen Bundesstaaten gegliedert, und unterhalb dieser Ebene nochmal nach (groesseren) Staedten.

Eine kursorische Ueberpruefung zeigt, dass einige der Stationen nicht bei vTuner, Reciva und Co. gelistet sind. Es gibt also einiges zu entdecken.

(Wolfgang Thiele-D, A-DX Jan 3)

MYANMAR 5769.993v on Jan 5 at 0030 UT. Myanma Army Radio, Burma, Start of program with trumpet and talks by woman, then slow music, frequency slowly drifting, fair.

(Giampiero Bernardini-ITA, hcdx Jan 6)

NETH ANTILLES [Bonaire] Frequency change of Deutsche Welle in German from Jan 1:

0800-1000 NF 9785 BON 250 kW 230 deg to AUS/NZ, ex 9885\*

\*to avoid Voice of Islamic Republic of Iran in Arabic from 0830 UT.

(R BULGARIA DX MIX News, Ivo Ivanov, via wwdxc BC-DX TopNews Jan 4)

[\* rather interference by CNR CRI Beijing in Mandarin on adjacent 9880 kHz at 0800-0900 UT, according of mail from downunder New Zealand.

And 9785 channel suffer by severe interference of DRM mode REE Noblejas, and CNR Xining-CHN next door 9780 kHz too. wb, wwdxc BC-DX TopNews Jan 4]

9785 -- The reason DW changed from 9885 to 9785 kHz is that 9885 kHz was suffering severe interference from China National Radio on 9880 kHz in the period 0800-0900 UT. At times DW could not be heard. It was not providing stable and good reception in some of the primary reception zones, that's why it was changed.

Unfortunately the move to 9785 kHz appears not to be a good one as the DRM transmission of REE Spain on 9780 kHz is causing QRM from 0800 UT, at least in New Zealand, which is the antipodes of Spain. Every transmission from REE ends up here. We used to get good reception during the Cold War of RFE and Radio Liberty from Spain and Portugal for that reason. The DRM transmission is scheduled to end at 0900 UT, but yesterday (2 Jan) it had finished before 0900 UT, I'm not sure exactly when. The move from 9885 kHz to 9785 kHz was initiated by DW Frequency Management, not RNW who operate on the frequencies specified by their client.

So that's the background to the DW move!  
(Gordon Brown-NZL, NWDXC Jan 3)

NEW ZEALAND [and non] Recent DX from Northland, New Zealand.

FM DX has been my focus in recent weeks with best catches being CRI Vanuatu relay on 102.0 MHz, stations from Emerald Queensland and some new stations from New Caledonia and Fiji. But shortwave has also produced some good catches.

Glenn Hauser wrote: "I suppose some manufacturer long ago was making SW transmitters of this power, and also sold a couple to Radio New Zealand, which was their rating until the 50 / 100 kW units at Rangitaiki went in."

The 2 x 7.5 kW transmitters that were the foundation of Radio New Zealand's shortwave voice from 1948 until 1990 were built by Amalgamated Wireless (Australasia) Ltd in 1945-46, and I believe were originally intended to be used by the US Forces bases here during World War 2.

A 1976 leaflet from RNZ said "they are manually tuned and capable of operating on any frequency from 6 MHz to 22 MHz. Each transmitter has an operating power of 7.5 kW. High level modulation is employed, the modulated amplifier and the modulator each using two BR170 valves."  
(Bryan Clark, Mangawhai-NZL, dxld Jan 4)

Such 7.5 kW units were still visible on Ekala site at Ceylon in 1972 and at my Malaysia, Indonesia, Bali tour in 1977, at Tebrau (BBC Far East relay) close to new site now at Singapore Kranji, were they moved in 1979?

Tebrau tx site was located only some 10 kms across the frontier between SNG and Johor Bahru. A lot of tall Indian/Nepalese Sikh national soldiers (tall up to 1.90 meters and weared turbans) protected that installation as security patrol.  
(wb, Jan 4)

The two 7.5 kW transmitters of Radio New Zealand at Titahi Bay were built towards the end of WW2 and were built for the U.S. military. They were to be installed somewhere in the Pacific as communications units.

However the war ended before they were delivered to the Americans and they ended up being bought by the New Zealand Broadcasting Service for a new shortwave service called "Radio New Zealand" which began in 1948. Both were capable of running either CW or AM modes but of course only ever were used in the AM mode.

They were very large physically, probably as big as a current 500 kW transmitter would be. They were built by Amalgamated Wireless (Australia) Pty in Sydney on a "cost plus" contract, which meant that the more that they cost, the bigger the profit was for AWA! They were made of heavy duty steel cabinets and were built like the proverbial battleship.

7.5 kW was the most power they would deliver. I tried getting a few more watts out of them by tuning them precisely, but 7.5 kW was the limit! I have fond memories of them. One of them has been kept at Titahi Bay as a museum piece.

I remember often hearing one of the BBC Tebrau 7.5 kW transmitters in the mid 1960's when I worked at the Quartz Hill Receiving Station. We used to relay the 1100 UTC BBC News on RNZ and Tebrau was normally used, 9725 kHz with 100 kW. The 7.5 kW unit was (I think) on 7230 kHz, but was never good enough to use for rebroadcasting. I also heard Greece with 7.5 and 5 kW, VOA Munich 3980 kHz 8 kW, Norway 21730 kHz with 5 kW and 25900 kHz with 1.3 kW which boomed in like 100 kW at times. Those were the days!

I think it is time to clear up a misapprehension about the power currently used by Radio New Zealand International. At no time is transmitter power reduced to 50 kW, it is always 100 kW. The output of the transmitter is split between two antennas for a lot of the day, with 50 kW beamed at 35 degrees and the other 50 kW going to a 325 degrees antenna. The ITU/HFCC schedules confirm that. For instance look at this entry for 6170 kHz:

```
6170 1300-1600 51,56,64S,65S RAN 50 325 0 148 ENG NZL RNZ
6170 1300-1600 61S,62,63W RAN 50 35 0 148 Eng NZL RNZ
6170 1545-1900 61S,62,63W RAN 100 35 0 148 Eng NZL RNZ
```

It clearly shows the pattern.

The BBC Singapore Relay does the same thing. Look as this entry for 9740 kHz which is a 250 kW transmitter split between two antennas:

```
9740 0900-1600 49 SNG 125 13 146 English G BBC VTC
9740 0900-1600 51W,54 SNG 125 135 547 English G BBC VTC
```

So the power used by RNZI is always 100 kW. Whenever someone quotes 50 kW, they are only getting half the story!  
(Gordon Brown-NZL, NWDXC Jan 5)

PAKISTAN Frequency change of Radio Pakistan in Urdu WS to WeEUR:

(R BULGARIA DX MIX News, Ivo Ivanov, via wwdxc BC-DX TopNews Jan 4)

PORTUGAL I visited the RDPi HF centre, CEOC, at Sao Gabriel on 31st December.

The antenna farm is bigger than I thought it was after the installation of four new curtain or Sterba arrays, the smallest of them being the one at 45deg/Europe but which acc. to the CEOC Director enables Euro-coverage in a wide angle and better than with the still existing vertical log-periodics. I had last visited them back in 1996.

The old antennae were not dismantled, so the total number at their disposal is 20, ranging from the curtain arrays to the rhombics and the above mentioned LPs. A former curtain array (year 1989) for 144deg is still in place, but not used.

As to the old 100 kW tx units, just 3 of the 4 Continental are being used while the 4th acts as a components/parts supplier. Also installed, but not operational for quite some time, is a 100 kW Brown Boveri Co. It is almost self evident why the administration chose to keep it there: it means extra expenses just to take it off.

The remainder consist of 3 x 300 kW THALES and 1 x 300 kW AEG (from 1989).

The antenna matrix is in a wide new building next to the old tower, at the back of the tx building.

The control shack in the tx hall houses modern equipment, most of which was designed and built by the RTP itself. Like the CEOC director pointed out: there was one item they didn't make, and that was the table.

The inside of the nearly 60 year old site blends state of the art equipment and old pieces, from txs to the buildings themselves which clearly denote the state-defined architectural lines of that era also common in several other [MF] tx sites around the country.

I was confirmed that the pathetically imposed 09AM - 05PM working time determined by the administration is \*the\* major source of problems whenever there's need of using the reserve units, make a last minute repair... or even activate a mere protection relay beyond the working hours. The automation does not "cure" power failures or voltage fluctuations that make the system simply shut the txs off for protection... so if no one is there, then no HF signals. Much to the despair of who's working there and is often compelled to improvise so as to keep things running, the top bosses for RTP surely show without doubt they don't care much about HF - the sole means of communication that is national and not dependent of satellite misfortunes or internet.

In other words, if a tx is off for some reason, well, so much the better because the electricity bill is thus alleviated.

(Carlos Goncalves-POR, wwdxc BC-DX TopNews Dec 31)

RUSSIA Opening procedure of VoR Novosibirsk Spanish at 2050-2056 UT on

7340 kHz showed great check tone appearance some minus/plus 860.00 Hertz apart on Perseus/Fujitsu Notebook.

DX report from Masset B.C. - The fun continues!

Wow, all I can say is that I've never experienced anything like these past several days here in Masset, on Haida Gwaii (formally the Queen Charlotte Islands, south of Alaska). I've heard stations that I've only dreamed of, and I'm sure that I've just scratched the surface. With several TB of Perseus SDR recordings, I think that I could be happy for the rest of my life just perusing these exotic treasures!

First, a summary of what I've used. Receiver-wise I have 2 Perseus SDR receivers on 2 separate laptops, and an AOR 7030+, and a JRC NRD 535D to complete the list. A third laptop carries my databases: primarily the PAL

from Oct 2009, and a EMWG from Apr 2009, as well as some older databases (DBS, WRTH, and the 2008-2009 NRC AM Radio Log). For antennae, I have a number to choose from: ALA 100, oriented NE/SW, mostly for spotting, and SW (although it's my only LW capable antenna), a permanent N/S mini-Beverage of about 450 feet terminated into the surf of the north Pacific, a 750' Bog to the NW, and finally a spanking new QDFA constructed by my very good friend Guy Atkins and designed by Dallas Lankford. This new antenna has been my star performer with excellent gain. I've yet to tweak the null, though, as things have been so hot of late. I erected it over several days in a N/S direction, with the null to the south. I had to bushwack and clear the thick salal, and alder to fit the 4 large delta loops, but it was well worth it! I'll likely abandon some of the other antennae in favour of this very high tech antenna in the future!

Normally, I DX from early morning to perhaps 10:00 am local before the Asians start to fade, and then again in the latter afternoon, from about 4:00 pm onwards for the Europeans. The past 48 hours, however, has turned everything on it's head with the same morning start, but continuing right through to the evening as there hasn't been a let up. The Pacific basically fades to Asia, then central Asia and India, and then to Europe. One good thing about the winter here, is that there's no need for the 4:00 am rise to get the dawn enhancement with dawn being closer to 9:00 am this time of the year! Instead, I've arisen between 6:00 am and 7:15 am ... much more civilized!

Now onto the loggings:

2368.485 AUSTRALIA Radio Symban, Jan 2 1618 - Fair reception with Greek (almost Arabic sounding) music. Best I've heard them on this trip and equals the reception from last August. Thanks John Wright for my 'special' QSL received a few weeks ago! Note slightly low on the frequency. Nothing at all from 2355 or 3210 for the other new Aussie SW station. A good morning as there was audio on a number of the X-band Aussies.

4319 DIEGO GARCIA AFN, Jan 2 1619 - Good reception this morning with a call in show (Hannel on the Line, or something like that). Best I've heard them this trip.

11980 AUSTRALIA Radio Australia, Jan 2 1603 - My notes state that this is a new English/Burmese broadcast from Darwin. Excellent reception with English news and sports. Off frequency on 11979.947 as measured on my Perseus. ABC news ID at 16:05, then Radio Australia ID, cut off after 'Radio Australia will keep'. Then ABC local radio ID! Interesting for sure. Update about a stolen Austin Martin in NSW. No sign that this is the new Burmese service!.

765 RUSSIA (KARELIA) Radio Rossii, Jan 1 2128 - Surprised to hear this one with EZL music, and then into Russian a few moments later. Fair level. 150 kW from Pedaselga in the Karelia region near Finland. The trans-Polar paths are open!.

999 MOLDOVA ? Sodruzhestvo program, Jan 1 1830 - Another fascinating channel. Often excellent level in Russian. Seemed to be one program to 17:30 and then another. At BOH, it faded down, while a Chinese station faded up to dominate briefly, but the Moldovan transmitter came right back into news. Golos Rossii ID at 18:32:30.

1089 RUSSIA Radio Rossii, Tbilisskaya, Jan 1 1849 - Under a very loud Chinese station, Russian is clearly heard, making this the interior Russian 1200 kW transmitter at Tbilisskaya. Almost 11:00 am local! Nice Golos Rossii at 18:53. Chinese station dominated until 20:00, but the Russian was totally dominating at 20:06 recheck with Golos Rossii ID.

1098 IRAN IRIB, Jan 1 2146 - Suspect this is IRIB with their 1st program at very good levels at times with middle eastern music. Could also be Bayrak Radio, though, so will have to keep listening, as the latter signs off at 22:00. Darn! Faded down right at 22:00:30 but came back up again 20 seconds later (that's when there was an announcement, and not at the TOH). Nope, still there very strong at 22:09, so presumably Iran.

1188 IRAN Radio Payam, Tehran, Jan 1 2214 - I'm thinking that this is the station hear with fair to at times very good reception with music typical of that part of the world. Listed as 100 kW in Tehran. Male announcer at 22:17 mentioned 'Iran'. Very good point at this point! Sure sounds Farsi to my untrained ear! Into a CSNY song at 22:20. Powerful at 22:30 and into presumed news. I need to pinch myself to assure myself that this is really happening!.

1269 GERMANY DLF, Jan 1 1658 - 300 kW from Neumunster puts out quite well, with German talk. One of my first Europeans in our local morning. I'm not surprised after the fun from last night. Simply put, the most amazing propagation I've ever experienced! What a way to celebrate the new year! At 17:00 on came 'This is Moscow' and into VORWS in English. This is a relay from Yunnan, China. Excellent level.

1296 AFGHANISTAN Radio Ashna, Kabul, Jan 1 1731 - Another coup! Often excellent reception with many mentions of Afghanistan in presumed Pushto/Dari. Deep fades, but then comes in very well. Splatter from 1300 domestic. Has the VOA feel, so highly unlikely the listed Azerbaijani station! Wow, it's still super strong at 20:01 with a very nice 'Radio Ashna' ID and finally into some music (mostly it's been a lot of talking!).

1394.866 ALBANIA TWR, Jan 1 2013 - Excellent reception on the off-channel frequency. PAL lists Bosnian to 20:15 Fridays, and then Croatian, but I didn't not any break at 20:15. Het from another transmitter on frequency. All in the clear at 21:12, but not in the listed Polish, from my most recent PAL, but I suspect it's the time change. The previous PAL I have lists winter times, and this would be Croatian, which sounds more like this. Not certain in any case.

1395 NETHERLANDS The Big L, Jan 1 0027 - Excellent reception with very fast paced modern pop music in English. This station has recently reactivated. A fine signal here in Masset. By far the best night since I've arrived!.

1422 CHINA CRI, Jan 1 1550 - Many mentions of CRI and Islamabad and Pakistan, so this must be Kashi, China's Urdu service at very good levels. PAL notes an English service 14:00 to 15:00, so I'll have to check that one out! Other weak cochannels noted. Did fade down (to be replaced by another Chinese station or possibly JORF with music, but then came back a minute or two later.

1449 IRAN VOIRI, Jan 1 1605 - Often very strong signal in listed Turkmen

with central Asian language and many mentions of Iran. Last night's amazing trans-Polar reception continues this morning!.

1548 KUWAIT Radio Sawa, Jan 1 1922 - Armchair copy at very strong level, but there's someone else on the channel, and my guess is Grigoriopol, Moldova which occasionally comes up. PAL lists Bulgarian. Each goes up and down, so it's difficult to know who is dominating! Main transmitter is on 1548.008 while another is on 1547.901 creating a het. Actually, I can see 7 carriers at least, with the strongest to the weaker being: 1548.004, 1547.903, 1548.101, and 1547.981 and several weaker ones too. At 19:30 there was a weak IS for Mayak. No idea from where. Perhaps Moldova? Very fascinating frequency for sure!.

1593 KUWAIT Radio Free Iraq, Jan 1 1925 - PAL lists this service from the 150 kW transmitter in Kuwait City. Non-stop Arabic music at fair level makes this a tentative logging.

1611 VATICAN Radio Vaticana, Jan 1 1916 - Good level and excellent modulation of Vatican Radio. PAL lists Romanian at this time. As seems characteristic of the Europeans today, they'll be there at very good level, then fade to oblivion, and then return.

972 GERMANY NDR Info, Hamburg, Dec 30 2202 - Tentative logging on this one. Before the TOH, I was hearing a Slavic language, sometimes at fair level. At the TOH was English, announcing 22:00 Universal Time and into English. Seems to best fit NDR according to the EMWG. Only 2:00 pm local on the west coast. Farda is still audible with occasional peaks to good on 1575.

1539 UAE VOA Radio Aap Ki Duniya, Dec 30 1624 - Absolutely armchair copy with Indian type music, presumably with their Urdu program. Best ever heard here! Still there at great level at 17:10 recheck, but mixing with CNR1, which should be off at 17:35.

1548 SRI LANKA Deutsche Welle, Dec 30 1714 - A very interesting channel. Often excellent levels in German, with DW Europa ID at 17:15. Earlier, around 16:20, I was hearing a cochannel which sounded Asian, perhaps Iran? English between 16:00 and 17:00 noted.

720 KOREA D.P.R. KCBS, Dec 31 1504 - A jumble on this frequency. Tuned in at 14:57 to hear a rumble of stations. Then, the well-known Voice of Korea IS began and continued through until the TOH, and then off. The het (from slightly off NK) left, leaving a couple of domestic stations. One played non-stop Christmas carols, plus another domestic. A tough one. I'm suspecting KOTZ was one of the two.

882 SRI LANKA TWR Sri Lanka, Dec 31 1656 - A fascinating channel for sure. Several co-channels with South Asian sounding talk and male vocal. Most definitely TWR Sri Lanka, as they went into English at 17:00 without an IS, but south Asian accented English with greetings. Several transmitters noted, and this one seems to be on 882.02 according to the Perseus spectrum display.

1323 GERMANY Voice of Russia World Service, Dec 31 0613 - English programming at occasionally good/very good level, but mostly fair to good. Generally a better evening than yesterday which was rather mediocre for trans-Arctic DX to Europe. Still, not as good as my first evening (UTC 29

Dec) which seemed best.

6030 ETHIOPIA Radio Oromiya, Jan 1 0324 - Thanks to a tip from Ron Howard in California, I decided to check for this rarely heard station and sure enough at 03:20 tune-in I was already hearing the repetitive xylophone-like instrument. This continued to 03:29:30 when there was an announcement in possible French. I don't have access to my home resources, and am not sure whether I have the proper station ID and location. Please confirm or clarify! Very weak, but no sign of Marti or the jammer at my location! Nice ID and very decent reception at 04:00. Whew, what a night!!!.

1566 KOREA Rep. HLAZ, Dec 29 1757 - Very good reception with Russian religious sermon. ID given as Radio Theo at 17:59. Mentioned the South Korean transmitter on 1566. Transmitter cut at 17:59:30. Weaker time pips at 18:00 followed by English, and then ?CC translation. Then, Yankee Doodle. English lesson, as they mentioned, 'today we are going to talk about the problem of pollution'. Suddenly improved markedly by 18:02. Not listed in the most recent PAL. I'm assuming that this is still HLAZ, but I'm not 100% sure. Not a religious program at all. More akin to VOA!.

4850 UNID unid, Dec 29 1735 - Big open carrier first noted last night, and still there now. No idea who this may be. Continues there on the 30th.

4949.79 ANGOLA Radio Nacional, Dec 29 1736 - Presumed logging, as there are 2 stations cochannel with het. The 4950 is presumably AIR Srinigar. Too weak to make much out. Threshold audio only.

7580 EGYPT Radio Cairo, Dec 29 2354 - Very good reception with Arabic male vocal. Rather good modulation for a change! At 00:12 noted an Arabic language lesson, and yes, the modulation could be a bit better!.

15215 LIBYA Voice of Africa, Dec 29 1707 - Very good reception with French program, followed by an African song with 'Africa, Africa, Africa' noted in the French song. I might have thought that it sounded rather Caribbean! Parallel 11965 only poor.

2368.48 AUSTRALIA Radio Symban, Dec 30 1455 - Snippets of audio heard this morning. Also checked for the other reported private SW station on 2355. My Perseus SDR shows a very faint tracing on the waterfall, but that's all. No where close to audio. Nothing at all on 3210. Definite audio but much weaker than in August, when rechecked at 15:39.

3960 LITHUANIA VOIRI, Dec 30 1517 - Fair reception with clearly Russian talk, making this from Lithuania. Also another transmitter on 3959.768 which may be North Korea.

5050 CHINA Beibu Bay Radio, Dec 30 1522 - Excellent reception with Chinese duet. Then lots of Vietnamese talk. No English ID heard as was observed recently, at 15:30. AIR presumably barely audible cochannel.

6095 CHINA CNR 1, Dec 30 1933 - On yet another Chinese attempt at jamming RFA, I hear multiple, slightly out of phase transmitters extremely strong over just barely audible RFA. Carrying CNR1 in the clear.

7100 KOREA D.P.R. Voice of Korea, Dec 30 1837 - Armchair level with French language programming. Excellent accent too. Difficult to hear any

kind of Korean accent.

7105 CHINA Nei Menggu PBS, Hohhot, Dec 30 2228 - Arm chair level Chinese with lots of ads. Not sure whether this is Nei Menggu or not, but found it on an old DBS survey. Marshall music, and Dientai mentioned at 22:30. // noted 9520, but out of sync, with 7105 about 2 sec behind 9520.

7110 ETHIOPIA Radio Ethiopia, Dec 30 1508 - Fair to good reception in presumed Amharic with rapid speaking male and short music bridges.

7110 ETHIOPIA Radio Ethiopia, Dec 30 1840 - Another arm chair copy this morning with very enjoyable Horn of Africa male vocalist.

7165 ERITREA ?Voice of the Broad Masses of Eritrea, Dec 30 1510 - Fair reception, but with two transmitters noted. One's on 7164.977 and the other on 7165.267. Both are equal strength, but causing a loud het. Also ham QRM. The upper frequency seems to be the one carrying the VOBME programming. Nothing noted on 7175. Mostly talk. Possibly also jammed (?the lower frequency?). Tough to sort out.

7175 ERITREA Voice of the Broad Masses of Eritrea, Dec 30 1848 - 2nd program listed at good level with talk, in presumed Eritrean. News seemingly at 18:58 re-check, with many mentions of Somalia.

7180 KOREA D.P.R. Voice of Korea, Dec 30 2227 - Pyongyang in the amateur band with their choir singing to the glory of their dear leader. Fair to good reception. Not sure of the language service.

7200 SUDAN Sudan RTVC, Dec 30 1847 - Fair reception with mix of talk and African/Arabic sounding music. Not nearly as strong as the old days when I used to hear them on 8000 kHz, as I recall.

7465 ALBANIA Radio Tirana, Dec 30 1945 - Lovely IS up to 19:45, and then into English with schedule. The IS was very strong, while the YL is quite a lot weaker, so perhaps it was a sign-off of another station? Nothing heard on the 11635 to North America frequency (7465 is to UK).

15550usb USA WJHR, Dec 30 1812 - First time I've heard this one from Milton, FL. At poor to fair level in USB with preaching. I suspect that this one will get stronger as our short day goes on. Fair to good level at 19:54 recheck. ID at 20:02 after a brief hymn, and then back into the 40 years of recorded sermons!.

4765 TAJIKISTAN Radio Tajikistan, Dec 31 0156 - Good reception except for some deeper fades in presumed Tajik. Actual frequency measured on 4765.061 on the Perseus SDR. Seems to be // to very weak 7245 at 02:05 when checked. I'm not 100% certain of this, though. Listening further, I don't think that's the case. 7245 is usually the FS, and I've rarely heard them on the west coast. The 60m channel is far easier to hear.

5940 RUSSIA Govorit Magadan, Dec 31 0213 - Right at 02:10, both 5940 and 7320 cut to a local Magadan program, while 7140 and 7200 stayed with the network Radio Rossii feed. Both at excellent levels. Lot's of New Year's greetings.

6100 ROMANIA Radio Romania International, Dec 31 0622 - French language programming with only occasional dropouts. DReaM software states this is

'Transradio Bln.' with Stereo at 20.96 kbps. ID and schedule for B09 announced at 06:24. Surprised at how well it came in from Europe at this time of the night! One of my rare European DRM transmissions I've actually demodulated.

7140 RUSSIA Radio Rossii, Dec 31 0132 - Another 'intruder' in the amateur band. Very good reception with Russian New Year programming, // to 7320, 5940 and 7200. My Perseus database lists this as Yakutsk at 20 kW.

7190.083 SRI LANKA ?SLBC, Dec 31 0120 - Fair reception with what sounds like a sermon. Initially I was sure that it was in English, but it's not now for sure. The preacher may have given an address initially. My Perseus database states SLBC in Hindi, so perhaps this is it. Confirmation needed. At 01:27 there was definitely a hymn sung, (What a friend we have in Jesus), so very likely SLBC which has many Christian programs. Indian style music at 01:30, so almost certainly SLBC.

7200 RUSSIA Radio Sakha, Dec 31 0448 - Unknown language at armchair levels. ?Indigenous programming, with the odd Russian word, like 'Rossiska Federatsiya'. Also // 7140, but not 5940 or 7320 which are carrying Radio Rossi network programming. Back into Russian mentioning Vladivostok at 04:51. Mentioned the Radio Company Sakha, so this must be the program, Radio Sakha.

9770.19 SRI LANKA SLBC, Dec 31 0113 - Presumably them with pop music, but very weak.

#### Radio Australia ANNIVERSARY - WANNEROO.

It was exactly 70 years ago, to the very day, that Australia Calling was  
launched by the Prime Minister of Australia, Mr Robert Menzies. In later  
times, Mr Menzies was knighted and became Sir Robert Menzies, and  
Australia Calling was re-designated as Radio Australia.

At the time of its inauguration on Wednesday December 20, 1939, Mr Menzies  
was celebrating his 45th birthday during his first term as prime minister;  
and Australia Calling was on the air from just three shortwave

transmitters at two different locations; two at 10 kW at Pennant Hills in New South Wales, and one at 2 kW at Lyndhurst in Victoria.

During the following month, preliminary test broadcasts began from a 4th transmitter, again just 2 kW, at a 3rd location, Wanneroo in Western Australia. This then is the story of Radio Australia Wanneroo, and we present this information here in this edition of Wavescan in honor of Radio Australia's 70th anniversary.

It was back in the year 1932 that the PMG Dept procured the Wanneroo property on the northern edge of the state capital, Perth, for the purpose of establishing a new radio broadcasting station. At the end of the year, the eight year old mediumwave station 6WF, located on the top of a commercial building in downtown Perth, was retired and a new 5 kW transmitter for this ABC service was installed at Wanneroo.

In 1938, work commenced at Wanneroo for the installation of two additional broadcast transmitters, one mediumwave and one shortwave. The one year old mediumwave 6WN was transferred from the city post office building to Wanneroo, and a new shortwave transmitter VLW was installed for coverage of outback areas in Western Australia.

The earliest known test broadcast from the new shortwave station VLW was noted in the United States on 7170 kHz in September 1939. However, with the inauguration of Australia Calling, plans were laid for the incorporation of this new unit on the west coast of the continent into part time usage for programming beamed to South Africa and the islands of Indonesia.

Additional test broadcasts from VLW were noted in Australia and New Zealand during the following weeks, and, in the New Year 1940, test broadcasts were beamed specifically towards Africa. This transmitter was officially taken into the programming service of Australia Calling on April 7, 1940, with programming in both English and Afrikaans.

Interestingly, two sets of callsigns were in use from this low powered transmitter. One set of numeric designators was in use for the ABC outback service in Western Australia, and another set for the overseas service from Australia Calling. For example:- VLW2 was in use with ABC programming on 9615 kHz VLW2 Australia Calling 9650 kHz

The initial series of broadcasts beamed to Africa from VLW with a relay of programming from Radio Australia in Melbourne lasted for less than a year. However, a new service in the Malay language for the Asian islands north of Australia was introduced in October 1941, though this service too was soon afterwards terminated.

In 1945, the 2 kW VLW was dropped completely from Radio Australia programming and these program services were transferred to the three new high powered shortwave transmitters located at Shepparton in Victoria. Transmitter VLW was now on the air exclusively with the ABC regional service to the outback.

In 1959, work commenced on a new transmitter building at Wanneroo in which several new mediumwave and shortwave transmitters were installed. These new units, three shortwave and four mediumwave ranging in power from 2 kW to 50 kW, were taken into full service in 1962.

In 1963, a series of test broadcasts at 50 kW were beamed to Africa from Wanneroo; six years later another series of broadcasts were beamed to Africa using two transmitters at 10 kW; and in 1983, there was a series of test broadcasts lasting three days beamed to Africa.

In 1984, there was a series of test broadcasts directed to Antarctica using a 10 kW transmitter and back radiation from a rhombic antenna beamed to the Kimberly region in Western Australia. Programming was in English and French with a relay from Radio France International in Paris.

The shortwave transmitters at Wanneroo were in use for international and outback Australian coverage for some 55 years, but they are silent now. These units were withdrawn from service and closed down in 1994. During their more than half a century of service, they were on the air with programming for the outback from the ABC in Perth, and with a relay from Radio Australia beamed to Africa, the Middle East, Asia and Antarctica.

On this occasion today, we salute Radio Australia for their 70 years of on air service, which included the initial usage of the small 2 kW shortwave transmitter VLW located at Wanneroo near Perth in Western Australia. QSL cards for this unique shortwave service during its initial one year period were issued from the ABC headquarters in Sydney Australia and these QSLs were the early version of the orange colored card featuring the wild kangaroo.

(Adrian Peterson-USA, AWR Wavescan script Dec 16 direct and via dxld)

Dear friends, this afternoon I visited  
<<http://www.tiger.latrobe.edu.au/bruny/index.html>>  
and was not amused about the Tiger-Radar.

Click the "Realtime Data Display" and then "Tiger Bruny" button.  
Then choose the Status Window or Geographic Plot!

Results: Bruny-Tiger is often abusing different frequencies between 10100 and 10150 kHz. (Unwin is operating out of this band.)

I think that WIA should contact La Trobe.

73 from Wolf, DK2OM, Dec 22

Dear Intruder Busters,  
after having read the info of Wolf Hadel DK2OM I immediately went on the Tiger-Bruny homepage.

Wolf is right: Bruny most of the time is transmitting on Band 10.

Here is my observation ("between" transmitting in the range 10105 - 10150 kHz there were always some QRGs higher than 10150 kHz):

This is what I read between 1742 and 1745 UTC (time UTC indication Bruny homepage) on the Bruny homepage:

10130 - 10135 - 10105 - 10150 - 10150 - 10105 - 10105 - 10150 - 10135 -  
10120 - 10145 - 10140 - 10145 - 10150 - 10105 - 10150 - 10150 - 10105 -  
10105 - 10145 - 10150 - 10150 - 10145 - 10130 - 10105 - 10150

Here in southern Germany Wolf Hadel DK2OM and I are unable to hear BRUNY-TIGER, so sending a complaint to LaTrobe University or to the German

telecoms authorities is useless. Also the "problem" is not the problem of ITU Zone 1.

My urgent demand goes to Peter Young VK3MV asking him to contact LaTrobe University, WIA and the Australian telecoms. authorities ACMA. Immediate action is necessary!

Fraternally yours,  
Uli Bihlmayer, Vice Coordinator of IARU-MS Region 1, Dec 22.

DJ9KR noted: this evening all 3 TIGER RADARS are active at the same time:

Bruny, Tasmania at 1926 - 1928 UTC: Beams used 1, 11, 14 Frequencies used: 40 10 frequencies inside range 10100 - 10150 kHz.

Unwin A, New Zealand at 1930 - 1932 UTC: Beams used 7, 12, 15 all frequencies in Band 10, but higher than 10295 kHz.

Unwin B, New Zealand at 1932 - 1934 UTC: Beams used 7, 12, 15 all frequencies in Band 10, but higher than 10260 kHz.

I have read the beams and the frequencies on the homepage of Tiger La Trobe Radar. I could NOT hear the radar in DL.

This is for your information.

Regards,  
Uli, DJ9KR  
IARU-MS Region 1 (Dec 23)

At this time of year, for the past three years, there appear to be only two spots from EU of VK7s in the hour before 2000 UT. But a lot of spots around 2030 UT. Maybe VK7s don't get up early, or the band is more likely to be open (or perhaps a little of both). 1930 UT may have been a little early to hear the TIGER from DL.

Yes, the ZL TIGER is on a similar prow, if you watch long enough, you will see it covers the range 10200-10600 kHz. I have not watched both VK7 & ZL simultaneously long enough to see if the two radars try to use 10200 at the same time, though I have seen both of them take turns using it. Note how the two radars are otherwise segregated from each other. I wonder why?

Also note that the ZL TIGER covers 4x the spectrum than VK7. It's a "stereo" radar (A & B are separate channels, which means they use separate frequencies), but I have yet to see other than the same frequency displayed by both. Both also always display the same "noise" number, perhaps something based on receiving & we might expect to see at least some least-significant-digit differences between the two, even if both channels were on the same frequency. Much seems to be made about Unwin's stereo capability, so is strange that doesn't appear to be used yet the radar is moving about far enough that the two channels would not step on each other based on the mono VK7's 100 kc span.

Anyway, the interesting thing from all this is that the TIGERs are kept away from each other. One might have thought that the mechanism for avoiding causing interference to others would be good enough to keep the TIGERs out of each other's hair.

73, ex-VR2BG/p. Brett Graham in INTRUDERALERT mailing list, Dec 24.

AUSTRALIA 2368.5 Radio Symban, on Jan 11 at 1056 UT, talk by man in Greek at best level ever noted. Talked right through the hour with no ID, then music and apparent ads. 'Radio Symban' ID by man at 1106 UT.

Voice of Australian Chinese, Brisbane, 1656 kHz, Jan 11, 1517, presumed the one with man talking in Chinese.

(Patrick Robic-AUT)

DRM transmission from Deanovec on 594 kHz.

Dear Sir!

Thank You for beeing our listener. Experimental DRM transmitter was switched off due to preparations for detachment to new location. We regret that at the moment we cannot provide information when it will be on the air again. Hope to send news soon.

With regards, Josko Blazic, OIV Croatia.

(via Patrick Robic-AUT, wwdxc BC-DX TopNews Jan 8)

CUBA 5025 Unmistakably it is still Cuba 5025 kHz heard here at 0930 UT Jan 8th with man/woman speech and a phone-in contribution, with musical breaks. A good signal, peaking to S=8+, but slowly going down. I don't hear anything else in the background.

(Noel Green-UK, dxld Jan 14)

Meeting Held Between Cuba Officials And CRI.

My source within CRI today informed me a meeting took place January 7 and 8 at the Ministry of Communications, which included officials from the Ministry Of Culture, State Admin. of Film, Radio & Television, Ministry Of Propaganda, CRI and Cuban Government officials. The meeting was to discuss the leasing of land in Cuba to the Chinese.

A few month ago I informed you about a ship that left Tinjian [you mean Tianjin?] Port that was bound for Cuba that contained a few containers of broadcast equipment. I managed to get a little bit more on the contents.

3 x 250 kW transmitters

2 x 500 kW transmitters Copies of Continental Electronics transmitters by a division of the Jiangxi Hongdu Aviation Industry Group Corporation.

5 x HRS type antennas Copies of Thales Broadcast Multimedia that was once owned by France's Thales Group. These were built by a division of the China Leihua Electronic Technology Company.

I wish I had more for you, but at the moment I don't, so don't even bother to ask. If my source finds out more I'll pass it along.

(Keith Perron-TWN, ex-RHC, ex-CRI, Taiwan, dxld Jan 10)

I guess if satellite imagery is updated regularly enough over Cuba we might have some idea as to where the equipment is installed ?? Could it possibly be an extension of an existing SW site or new site altogether?

Guess we'll know within a few years.  
(Ian Baxter-AUS, TX shortwavesites yg via dxld)

I guess the 21 SW curtain masts at Quivican are looking like really China mainland type fashion, at least 8 to 9 years now. So the Quivican site and masts will now well finished and fully equipped with 5 new tx units and curtain antenna sets.

Three fully equipped SW tx sites in action is more than enough for such a small country like Cuba...  
(wb, wwdxc BC-DX TopNews Jan 14)

CYPRUS [c.f. BC-DX TopNews #946] 1323 Zyygi MF Antenna.  
BBC Zyygi 1323 kHz 200 kW 150 degrees.

I have twice visited the site, once when I was commissioning the IBB antenna at Cape Greco, and once when I was making measurements of the coupling between the Ladies Mile antennas for filter design. I took a number of pictures of the MF antenna because, as far as I am aware, it is the highest power slant wire fed MF antenna in operation anywhere, and one of the few DA's with slant wire feed (although, as noted from VT, the second element is a grounded parasitic). I was told that the masts are from a no longer used curtain array, so it wasn't originally designed as an MF antenna, but modified for that purpose. The feed arrangement is very elegant, using a group of roughly // wires for minimization of surface voltage gradient.

(Anker Petersen-DEN, via Dario Monferini-ITA, playdx yg via dxld)

ETHIOPIA Unid frequ. Radio Fana with religious christian prgr in Vernacular, choirs, sermon at 1815 UT, at 1834 UT playing the X-mas song "Noel" in En. So their Orthodox church is celebrating on 7 January as in Russia, Serbia, Macedonia and two sinods in Greece. In Bulgaria, Romania, West Ukraine and one synod in Greece the X-mas is on Dec 25th.  
(Rumen Pankov-BUL, wwdxc BC-DX TopNews Jan 7)

Welcome to the January 2010 edition of "Signals Unlimited". Fortunately, it's the time of the year that I can take a break from lessons, lecturing and marking and focus on writing a column for "The Messenger". I hope that everyone had a good Christmas and a Happy New Year.

During my summer (still 7 months away!) break, I'll be continuing my world travels with a trip out to Ethiopia and this marks my first excursion to Africa.

Ethiopia is a relative hotbed of shortwave activity both in terms of transmissions that it makes and other groups which broadcast to Ethiopia. Ethiopia is one of the few countries in East Africa/Horn of Africa which I have never been able to hear. I always hope to be able tour/visit one of the shortwave stations in whichever country I am visiting and this time will not be another exception.

Ethiopia is a landlocked country in Eastern Africa and is surrounded by Sudan, Eritrea, Djibouti, Somalia and Kenya. Map courtesy of <<http://www.ezilon.com/maps/africa/ethiopia-maps.html>>

Ethiopia was one of the few areas of Africa which was never successfully colonized; however, the Italians did manage to occupy the country from 1936 to 1941. The Italians were driven out of Ethiopia by the British Army and the Emperor of the time, Haile Selassie, placed back on his throne.

Ethiopia remained pro-west until 1974 when a Marxist revolution took place and Haile Selassie was disposed. The Marxists remained in power until 1991 when the junta was overthrown in a popular revolution. Two years later in 1993, Eritrea declared independence and this would lead to a full-out border war between Ethiopia and Eritrea in the late 1990's. A truce has been in place for several years but there still are ongoing disputes between the two countries over the border.

The country has a population of nearly 86 million and the capital is Addis Ababa. The country is very poor and the economy is essentially based in agriculture. When most people hear of Ethiopia they think of famines and droughts. Food shortage is certainly an issue and has been for many years.

Internet is by no means a prevalent medium in this country and radio is still very popular. There are quite a number of broadcasts to-and-from Ethiopia. The state-owned radio enterprise is the Ethiopian Radio and Television Agency, ERTA:

<<http://www.erta.gov.et/>>

and is responsible for the regional, national and external radio and television services.

Of course, I was unable to find and information concerning a shortwave schedule on the website and sent a comment that such information should be included (if you visit the website please you can make comments by clicking on the "Feedback" tab).

One of the churches at Lalibela in the Gonder region. Photo courtesy of <<http://www.wayfaring.info/2009/06/10/lalibela-church/>>

The external shortwave station is known as Radio Ethiopia. Based upon the EiBi B09 schedule and Glenn Hauser's "DX Listening Digest", the frequencies of 5990 kHz (Geja Dera, Geja Jewe), 7110 kHz (Geja Dera) and 7165 kHz (Geja Jewe) are used by Radio Ethiopia.

Radio Fana was founded by the current ruling party in 1994 and broadcasts in Amharic <<http://radiofana.com/>>

The website, at the very bottom of the start page, claims to use 6110 kHz and 7210 kHz. The use of 6110 kHz has been verified but it appears that 7210 kHz has been replaced by the use of 6890 kHz; the transmitters

operate with 100 kW of power. Radio Fana operates a national commercial radio station. I had no luck in finding the location of transmitters for this station.

Examples of stelae at Axum (Tigray region), Ethiopia. Photo courtesy of <<http://www.sacred-destinations.com/ethiopia/axum-stelae>>

Another shortwave station in Ethiopia is Radio Oromiya which broadcasts on 6030 kHz. This may be a tough catch for DXers in the west as they have to contend with CFVP in Calgary. Adama City (also known as Nazret) is located about 100 kilometres southeast from Addis Ababa. This station, in all likelihood, uses the same transmitters as Radio Ethiopia but is a separate station. Oromia is the largest state in Ethiopia and occupies one-third of the country. Not too surprisingly, the station operates exclusively in the Oromo language and acts as a regional broadcaster for the state.

The Tigray regional state government operates its own shortwave services. Tigray is in the northernmost part of Ethiopia and is home to the Tigray people. The station operating from this region is known as the Voice of the Tigray Revolution. Prior to 1991 this station operated as a clandestine. Currently this station is licensed and operates from the city of Mekele and operates on 5950 kHz and 5980 kHz in the Tigrinya language. I had trouble with this website with regards to display of fonts used in the webpage in spite of setting up Firefox to be able to display several of the Ethiopian languages but here is the website:  
<<http://www.dimtsiwoyane.com/>>

Their transmitters are located near Addis Ababa but they still maintain two 10 kW transmitters near Mekele.

Photo of a priest climbing to the Debre Damo monastery in the Tigray region of Ethiopia. Photo courtesy of <<http://www.traveladventures.org/continents/africa/debre-damo-monastery.shtml>>

And, finally, there is Amhara State Radio which also acts as a regional broadcaster. The station is believed to use the transmitters of Radio Ethiopia. The studios are located in Bahir Dar (south of Lake Tana) in Amhara State and they use a frequency of 6090 kHz. With Anguilla silent on 6090 kHz (at least of Dec. 15, 2009) this might be a good time to try for this station.

I always hit the printed travel guides and websites looking for tidbits of interesting and useful information. The latest Bradt travel guide (edition 5) on page 86 makes the recommendation that travellers should carry a shortwave radio with them. A recommendation which I heartily endorse! My trusty Sony 7600GR will be making the trip with me and I hope to be able to do a little listening after a hard day's worthy of touring around the various cities and countryside of Ethiopia.

Tis Issat (Blue Nile) Falls located south of Lake Tana. Photo courtesy of <<http://omurtlak1.bloguez.com/omurtlak1/636539?googleimage>>

This issue dealt with most of the legitimate shortwave stations broadcasting from Ethiopia and I hope to be able to verify most of the information presented here. However, the number of clandestine transmissions to Ethiopia is quite impressive and will be a topic for

another day.

(Dr. John Barnard-Alb-CAN, Signals Unlimited, Jan CIDX Messenger via dxld)

EQUATORIAL GUINEA 7250 RNGE making another sporadic appearance on 6250.0 (right on, compared to Vatican 7250.0), good S=9+12 signal Jan 9 at 0625 UT with Spanish news mentioning Bata and Malabo, 0626 UT a timecheck for 7:21 UT so that explains why news often starts well past hourtop.

Frequent stingers, futbol news; 0627 ute beeps begin to QRM on lo side.

0648 UT still audible but weakening, as the equatorial sun rises almost vertically building up D-layer absorption. The accent sounded Castilian to me, to be expected but I wonder if native speakers could detect some ex-colonial accent pegging it on EqG?

(Glenn Hauser-OK-USA, dxld Jan 9)

FRANCE 6015drm TDP Radio from Belgium noted in English via Issoudun-TDF site at 1150 UT Jan 7, scheduled 1100-1200 UT. ID: E06021. Engine like pop mx [which takes getting used to ...]. SNR 30.4 dB ratio, S=9+20 dB.

(wb, wwdxc BC-DX TopNews Jan 7)

GERMANY 855drm Seit heute [Jan 14] beobachte ich, dass DRadio Wissen ueber 855 kHz in DRM mit 18,7 kBit/s EEP AAC+ und P-Stereo abgestrahlt wird.

Es handelt sich um die Info-Trailer, die bereits auch schon auf der Dradio Wissen Homepage abrufbar sind.

Der Empfang in Heilbronn ist an der 2 x 20 m T-Antenne zur Zeit mit - 48dBm, und mit einem SNR von 7-17 dB moeglich - Audio kommt wegen der Gleichkanalstoerer nur etwa zu 50% der Zeit durch - die Audio-Schwelle ist >12dB.

(Juergen, via wwdxc BC-DX TopNews Jan 14)

DRadio Wissen als neues Programm fuer eine "junge Erwachsenen Generation" beginnt am 18.1. mit seinem regularen Programm aus Koeln. Das ist eine Duftmarke des neuen (exSWR Direktors) DLF-DLR Intendanten Steul.

Eine ganz neue, junge Redaktion ist dort zusammen gestellt worden. Auch kann die Redaktionskonferenz jeden Tag um 1800 Uhr mitverfolgt und per Blog diskutiert werden. Die Ausbreitung geht primaer ueber Internet, DAB, Satellit und auch ein Blog wurde eingerichtet. Moeglicherweise wird auch 855 kHz dauernd eingesetzt, ausser es gibt direkte Uebertragungen aus Angela-Land...

(wb, wwdxc BC-DX TopNews Jan 15)

729 kHz BR Wuerzburg. Ein befreundeter OM schrieb dies: Tests 12. und 13. Januar.

Mir ist aufgefallen, dass BR Wuerzburg seit etwa 2 Tagen auf 729 kHz erheblich staerker einfaellt als bisher. Moeglicherweise hat dies mit dem neu aufgebauten Stahlgittermasten zu tun, der im Radioforum schon mehrfach in Bildern gezeigt wurde.

Ich vermute, dass der Mast jetzt 729 kHz abstrahlt.

An meiner Antenne (2 x 20 m parallelgeschaltet als T-Antenne) sind um 11.30 h am Perseus folgende Pegel gemessen:

729 kHz -63dBm

801 kHz -56dBm

Am GRUNDIG Satellit 500 ist 729 kHz bei mir erstmals mit 50% S-Meteranzeige zu empfangen. Dies war bisher auf dieser QRG ohne Ausschlag - das Signal ist jetzt wieder so stark wie ehemals 520 kHz Wuerzburg.

Link auf Bilder des Turmes im Radioforum:

<<http://forum.mysnip.de/read.php?8773,634797,page=2>>

Kann die Runde die Empfaenge bestaetigen ? Sind das nur sporadische Tests am neuen Turm ?

(Juergen, wwdxc BC-DX TopNews Jan 13)

Jetzt um 1300 UT hoere ich auf 729 kHz nur einen sehr mickrigen Carrier in SYNC, Hundertmal schwaecher als MW 801 kHz.

(wb, wwdxc BC-DX TopNews Jan 14)

I can confirm that Putbus DRM on 729 kHz has been off (or at least not audible) since Jan 1st. So far Spain and Greece have been dominating and CKAC 730 has been a regular catch before midnight. If you find out more about BR 729 kHz in the next few days, please let me know.

(Olle Alm-SWE, wwdxc BC-DX TopNews Jan 14)

Am 14.1. habe ich mal die 729 kHz beobachtet. Bei mir zuhause war nichts von Deinen sagenhaften Signalwerten aus Bayerischer Rundfunk Wuerzburg zu bemerken. 801 kHz dagegen ist selbst inmitten des Hauses hinter drei Betonwaenden mit den diversen SONY ICF2010 oder AOR AR7030 noch fair zu hoeren, von Wuerzburg 729 kHz dagegen keine Spur.

Vielleicht waren das waehrend der Errichtung und Installation am neuen Turm einige Testsendungen an zwei einzelnen Tagen, bestimmt dann mit der maximal moeglichen Leistung von 1 oder 5 kW, statt 200 Watt nominal ? Deshalb hatte auch 729drm Putbus Ruegen abgeschaltet?, jedenfalls fiel das in der vergangenen und dieser Woche in Skandinavien auf. Letzteres kann aber auch mit dem Schneesturm an der Ostseeinsel zutun haben.

Ich bin um 15.00 z mal mit dem AUDI A4 CONCERT radio unterwegs gewesen, mit Diversity Antenne hier auf der Hochflaeche um die 490 m ASL, in vollkommen stoerungsfreie Lage.

Der CONCERT hoert das Gras wachsen bis Urumchi und Saudi Arabien. Auf 729 kHz war nur ein Mischmasch von 4 Stationen zu hoeren, selbst ein Vergleich mit 801 kHz erbrachte keinen Wuerzburg Empfang. Griechenland und UAE, aber Spanien war in jedem Fall ganz obenauf.

(wb, wwdxc BC-DX TopNews Jan 15)

As a reminder: The era of Frankfurt on mediumwave will end tonight [Dec 31, 2009]. The last block of foreign language broadcasts just ended at 2130 UT, and in all likelihood the two transmitters on 594 kHz will be switched off at local midnight, i.e. 2300 UT.

The foreign language block also included Russian and Polish broadcasts from Berlin, probably (i.e. if I do not overlook something) the last ones from RBB studios that went out on mediumwave, four years after RBB shut down its own AM transmitter.

Hessischer Rundfunk not only abandons mediumwave but also stops the cooperation with Westdeutscher Rundfunk on the foreign language field (RBB only provides studio capacity anymore since their Radio Multikulti closed down a year ago). WDR plans to itself produce broadcasts in Greek and Spanish, until today provided by HR. In order to free up some money for this the broadcasts in Turkish will be abridged, a plan that triggered a controversial and in parts just nonsensical debate.  
(Kai Ludwig-D, dxld Dec 31)

[later] Concerning the closure of 594 kHz: It appears that the Hoher Meissner synchro transmitter left the air a few seconds before local midnight. The main transmitter at Rodgau-Weiskirchen (near Frankfurt) stayed on air for another five minutes of last news, then the carrier had been killed at 23:05:33 UT during the opening announcement of ARD-Nachtkonzert. I suspect this has been done by engineers on-site, not by timer or remote control.

This relay of ARD-Nachtkonzert replaces as of today the former overnight relay of MDR Info. It's absolutely crazy: Now the all-news station relays overnight the same programme of classical music than hr2. And to my knowledge this saves not even money. No idea why they did this (there are even conspiracy theories), the announcement of the "changed overnight programming" does not mention any reasons:

<[http://www.hr-online.de/website/radio/hr-info/index.jsp?rubrik=20772&key=standard\\_document\\_38515355](http://www.hr-online.de/website/radio/hr-info/index.jsp?rubrik=20772&key=standard_document_38515355)>

Now 594 kHz is here in Germany dominated by Bulgaria and the BBC relay in the Ukraine. In the case of Bulgaria it is ironical that this is a transmission site which looks like a clone of GDR sites, simply because in fact it is one. Only the original Funkwerk Koepenick transmitter has at some point (1995 acc. to this source; the old one was a 250 kW, too) been replaced by a Russian rig:

<<http://www.predavatel.com/bg/8/pleven.htm#rrts>>

(Kai Ludwig-D, dxld Jan 1)

New frequency change for Voice of America in Tibetan from Jan.8:  
1400-1500 NF 9315 LAM 100 kW 075 deg, x11695 LAM, re-ex15530/17520 BIB

GREECE The Greeks still on limited two transmitters only, on 9420 and 15630 kHz, carried same Greek program no Radio Filia relay today.  
(wb, dxld Jan 8)

VOG, Jan 10 at 0626, good on 7475 with Greek Orthodox chanting, // weaker 9420, so two transmitters are running, but is there a third? From a land where there is no separation of church and state, Sunday morning services taking up 2+ hours of public airtime. Fortunately, the rest of us can just enjoy this for the music without the baggage of belief, thank you very much to the broke Greek taxpayers.  
(Glenn Hauser-OK-USA, dxld Jan 14)

GREEK BAILOUT? Hello all: I do not seem to be getting any replies from the Voice of Greece on the status of the Avlis 3 transmitter on 9420 kHz. I am wondering if there is more to the problem than the transmitter breaking down. Perhaps they have shut it down to save electricity and even furloughed or eliminated positions at ERA 5 to save money. This letter

that we received recently gives an insight as to what is going on with the people; my scenario would be that they are making cuts in the positions in the government, and Greek Radio is state-operated and funded.

This is excerpted from the letter of December 7 that we received from Cousin Anna Petridou, who has apartments a block from the water at Thessaloniki, Greece. She was born in Washington, DC, graduated from high school there, and returned later with her parents to live in Greece:

"We have gotten into the Christmas season. The store windows have put on their Christmas ornaments, trying to lure the people to shop, but due to lack of means, they just window shop. Greece is in debt on account of bad managements done by the alternating previous governments for the past thirty years. Greece is a step before bankruptcy. We owe a lot of money from borrowing. Billions of Euros! The European Commission is ordering us to cut down on expenses. Our government now is imposing on us a lot of taxes. Taxes on buildings, automobile cars, country houses, cigarettes, liquors, gas, food, clothing, electricity, and so on. Wages have been frozen for the last two years. Prices are going up, and the people are in despair. They are hoping that with the 13th wage they will be getting for Christmas, they will be able to mend some of the openings they have. I, myself, am lucky I have my own income."

## NO TO LAYOFFS IN GREECE

... Participating in the strike were also employees of the Greek state television and radio ERT, who will also be affected by new changes. Currently the total number of workers in the state media is about 6000 people, 1300 of whom are with civil contracts and with the advent of the New Year there is a real danger they will be unemployed.

"We need to make changes, because the system is really not working. Our position is that if there should be layoffs they need to be done based on objective indicators like work efficiency rather than political party affiliations and acquaintances," said an employee of ERT operating in conjunction with the methods of appointment in the administration. According to long term television workers during the management of New Democracy in the past five years, many people were appointed to permanent posts (with unreasonably high salaries) without meeting the necessary criteria and without actually having ever worked in the media.

As a result, the budget of ERT has reached "fantastic" sizes, without increasing the quality of the aired programs. "We want structural changes that will objectively assess the team of ERT and will screen out employees who deserve employment contracts and security for the future," said an employee of ERT2, who has ten years of service in the TV and according to who the media can operate much more effectively with fewer staff if the management takes the right decisions to reform the administration ...

JAPAN New QSL-card from Japan SW Club.

2010 is the year of Tiger in the twelve signs of the Japanese and Chinese  
zodiac. So our QSL cards for 2010 is featuring a Tiger as shown in the  
cover of our January issue bulletin. We will send this beautiful  
verification cards to all correct reports to the Asian DX news in HCJB DX  
Partyline (every 4th Saturday) and our segments of AWR's Wavescan (the  
first Sunday of the month).

Send your reports to JSWC, P.O.Box 44, Kamakura 248-8691, Japan.

Please enclose 1 IRC. (No more US one dollar bill which does not cover an  
airmail stamp.).  
(Toshimichi Ohtake-JPN, dswci DXW Jan 6)

JAPAN [to KOREA D.P.R.] 5910 Thu Jan 14 at 1426 UT, Shiokaze via JSR  
JAPAN was concluding Japanese broadcast with usual sad piano music  
background; but also a fast SAH from some co-channel QRM not noted before.  
Uplooked later, maybe it was Iran's Bengali service scheduled for 1430 UT  
via Kamalabad, and they ordinarily do come on a few minutes early, so Sea  
Breeze should still be clear for most of the broadcast from 1400 UT, aside  
from Juche jamming, none audible today.  
(Glenn Hauser-OK-USA, dxld Jan 14)

KAZAKHSTAN Frequency change for Voice of Orthodoxy in Russian:  
1530-1600 NF 7430 A-A 200 kW 312 deg to RUS Tue/Fri, ex7435\*  
\* to avoid China Radio International in Pashto.  
(R BULGARIA DX MIX News, Ivo Ivanov, via wwdxc BC-DX TopNews Jan 14)

KOREA D.P.R. 4450.00 AINDF, via KCBS, Pyongyang, North Korea, at 1200-1215 UT on Dec 23, Korean talk by man and woman, 25312 heard // weaker carriers on 3480.01 kHz and 4557 kHz.  
(Anker Petersen-DEN, dswci DXW Jan 6)

Observed the start of three different programmes in Korean languages at 2301 UT as follows: Home Sce 1 on 2850 and 9665 kHz; Home Sce 2 on 4450, 6250 and 6399 (there were jammers on 6250 & amp; 6399!) kHz.

Voice of Korea on 3560, 6280, 7180, 7570, 9345, 9975, 11535, and 12015 kHz; also Voice of Korea in Japanese on 9650 (and seems the poor signals on 3250, 4405, and 11865 kHz are also in parallel?), or generally 14 or more freqs.  
(Rumen Pankov-BUL, wwdxc BC-DX TopNews Jan 9)

KOREA Rep. of HLAZ-1566 kHz. The English LL program of HLAZ-1566 kHz was started in last August 2009 at 1800-1900 UT in Chinese. An announcement of "Basic English language course, and introduction to American people and culture" is heard at start 1801 UT.

This program is produced in FEBC-USA by the offer of the Qingdao Korean church  
<<http://www.qdkc.org/>> in Qingdao, China.  
(Sei-ichi Hasegawa NDXC Nagoya-JPN, dxld Jan 8)

MADAGASCAR Three transmitters NOW on air at RNW Madagascar.

<[http://4.bp.blogspot.com/\\_9bzQfEcs4dw/SzTqU4aynUI/AAAAAAAAAF4A/Y5X8LQk5w08/s1600-h/GetAttachment.aspx.jpg](http://4.bp.blogspot.com/_9bzQfEcs4dw/SzTqU4aynUI/AAAAAAAAAF4A/Y5X8LQk5w08/s1600-h/GetAttachment.aspx.jpg)>

There was a fire on Christmas Eve in the high voltage room of the external mains power supply at Radio Netherlands Worldwide's relay station in Madagascar. Firefighters from the Madagascan capital Antananarivo managed to bring the blaze under control within hours.

The fire destroyed the high voltage circuit breaker equipment, so broadcasts from Madagascar had to be suspended while repairs were carried out. Satellite and Internet broadcasts were not affected.

A temporary schedule went into effect on 1 January using the two Philips transmitters, and the 50 kW Siemens transmitter began tests on 2 January. The fourth transmitter (250 kW) is still out of service and requires some repairs, which are expected to take up to a week.

Installation of the new 20KV/400V-160KVA for the auxiliary equipment inside the power plant building [captions] The visible damage to the Siemens transformer after a summary clean up (20KV/400V- 400KVA). There is also some oil leakage.

The situation as from 5 January 2010: All times UTC:

Transmitter 1 (250 kW):

0300-0428 on 9660 kHz Vatican Radio (multilingual)  
0430-0457 on 9660 kHz Vatican Radio (French)  
0500-0527 on 9660 kHz Vatican Radio (English)  
0530-0630 on 7265 kHz IBB (French)

1300-1357 on 17670 kHz AWR (Vietnamese)  
1400-1557 on 15595 kHz RNW (English)  
1600-1657 on 9590 kHz Family Radio (Swahili)  
1700-1727 on 9895 kHz RNW (Dutch)  
1730-1757 on 6020 kHz RNW (Dutch)  
1800-1957 on 7395 kHz Family Radio (English)  
2000-2030 on 7395 kHz Radio Sweden (Swedish)  
2030-2100 on 7395 kHz Radio Sweden (English)  
2100-2130 on 9680 kHz IBB (French) Mon-Fri  
2200-2300 on 7380 kHz Deutsche Welle (Indonesian)

Transmitter 2 (250 kW):

0200-0230 on 11550 kHz Radio Sweden (Swedish)  
0230-0300 on 11550 khz Radio Sweden (English)  
0330-0358 on 7360 kHz Vatican Radio (Swahili)  
0400-0500 on 11610 kHz Radio VOP (multilingual)  
0500-0600 on 12015 kHz IBB (Persian)  
1330-1428 on 17550 kHz Voice of Tibet (Tibetan)  
1430-1527 on 17495 kHz DVB (Burmese)  
1530-1627 on 13800 kHz Press Now (multilingual)  
1630-1657 on 13740 kHz RNW (Dutch)  
1700-1757 on 12080 kHz IBB (Multilingual)  
1800-1857 on 6020 kHz RNW (English)  
1900-2057 on 7425 kHz RNW (English)

Transmitter 3 (50 kW):

0230-0330 on 3215 kHz AWR (multilingual)  
0400-0500 on 11610 kHz Radio VOP (multilingual)  
1430-1530 on 3215 kHz AWR (Malagasy)  
1630-1655 on 3215 kHz FLM (Malagasy)  
1900-2000 on 6020 kHz Family Radio (English)  
2000-2100 on 6020 kHz Family Radio (English)

Madagascar transmissions temporarily via other sites:

RNW: The following arrangements remain in effect:

2100-2131 UTC Dutch via Bonaire on 13700 kHz azimuth 80 degrees  
1957-2057 UTC English via Montsinery on 11655 kHz azimuth 80 degrees  
1730-1757 UTC Dutch via Nauen on 11655 kHz azimuth 300 degrees

Vatican Radio: Transmissions at 0300-0530 UTC have returned to Madagascar, but the transmission at 1600-1630 UTC on 13765 kHz is broadcast via Santa Maria di Galeria.

See original for photos, updates, above info probably inapplicable:

<<http://blogs.rnw.nl/medianetwork/fire-puts-rnw-madagascar-relay-station-off-the-air>>

(Andy Sennitt-HOL, RNW MN blog, dxld Jan 4)

**MALAYSIA 7 MHz Amateur Frequency.**

In the last WRC it was decided that Broadcast Stations will move out from 7.100 MHz to 7.200 MHz by March 2009 and this sector allocated to amateur radio in Region 3. Authorities in Singapore, Philipines and Indonesia have allocated 7.000 MHz to 7.200 MHz to amateur radio.

I would be grateful if you can let me know the stand of MCMC on this matter.

Thank you, Rashid 9M2RS.

(Rashid Sultan-MLA, intruderalert\_iaru-r1 July 9, 2009)

Tuan Haji, We are pls to inform u that align our position with this decision. There is one remaining RTM station operating in this band. RTM has already carried out tender exercise to replace this station with new DRM station this year operating freq outside 7000 to 7200 kHz.

Thank u. Regards, Aris Bernawi

(Mohd Aris Bernawi-MLA, via intruderalert\_iaru-r1 July 9, 2009)

Tuan Haji Aris, Assalamualaikum and Happy New year 2010.

It is observed that Radio Malaysia Sarawak is no more operating on 7.130 MHz. The authorities neighbouring countries, Singapore, Indonesia, Philipines, Brunei, Australia, India, and the latest Thailand have released 7.1 to 7.2 MHz for exclusive amateur use as agreed in WRC 03.

I hope MCMC will also follow the other neighbouring countries in releasing the said portion of the band. Your assistance is greatly appreciated.

Thank you. Haji Rashid Sultan, 9M2RS.

(Rashid Sultan-MLA, intruderalert\_iaru-r1 Jan 1, 2010)

We have cleared 7100 to 7200 kHz from any broadcasting services since last year. The remaining station at 7199 kHz has also been cleared. All amateur radio operator is free to use this band now. Other broadcasting transmitter from neighbouring is taking their time to clear the band. You are cordially requested to use only part of the band whenever there is no such broadcasting service on the air.

Ir Mohd Aris Bernawi

Senior Director

Resource Assignment and Management Division

Malaysian Communications and Multimedia Commission

Tel: +60 3 8688 81 81 Fax: +60 3 8318 81 81

(Mohd Aris Bernawi-MLA, via intruderalert\_iaru-r1 Jan 9, 2010)

Just QSPed via 9M6, sounds like MLA b'cast will be leaving 7100-7200 kHz.

And since 7100-7200 kHz is not on the frequency schedule of our licences,

looks like we have also received permission to operate there.

Good news for all & double good news for all 9Ms from MARTS for the lunar new year!

73, VR2/9M6BG.

(Brett Graham, intruderalert\_iaru-r1 Jan 10, 2010)

MALAYSIA [SARAWAK] 5030 RTM Kuching, Jan 14 tuned in time to monitor the 2-pip timesignal at 1500 UT, this time it was close to correct rather than 3 seconds late, no doubt having noted my previous observations.

MYANMAR 5985 Myanmar R hrd Jan 6 from 1335 UT tune (recorded from 1430 UT) w/ gradually improving signal to 1600\* w/ woman ann in En and anthem. Adj ch QRM from 5990 kHz gradually decreased but from 1500 to 1515 UT there was co-channel QRM from an unknown station - fortunately Myanmar dominated the frequency during this period. From 1430.5 to 1456 UT there was a nice program of traditional Burmese vocals w/ inst accompaniment, from 1456 UT to 1457 a woman ann in Burmese and from 1457 to 1529 UT there was a non-stop pgm of pop vocals incl two C&W selections.

The English program started at 1530 UT with an opening announcement by a woman followed by news and a weather report by the same announcer. Following news, there was a short program announcement (with a background echo) and then a program of popular music until 1559 UT. The music started with a Burmese or Indian vocal, then pop songs by female artists. At 1559 UT a woman ann made closing anmts "We have come to the end of the English language program\_good night" followed by the Myanmar nat'l anthem until a new station came on strongly at 1600 UT (R. Rossi ?). SINPO 33533. (Bruce W. Churchill-CA-USA, DXplorer Jan 9)

PALAU Re attempts to visit T8WH: Finally seen the station but not from land as my ship got underway and is now heading to Guam; we passed it from sea. Thanks for the help and hope to view it next time.  
(Larry, n6hpx/mm, Fields, dxld Jan 2)

I finally found the site as posted in the myradio world and catches I posted the pictures as my ship sailed past it, on Jan 2, thanks to all and hope to view these closer.

(Larry enroute to Guam, dxld Jan 3)

Hello from Guam Island, First wish to wish everyone a Happy New Year and hope our world of radio and DX improves for the coming year and decade. As you might have read, I was on Palau for the Holidays and did some looking for the relay station of WHRI or better known as T8WH.

Despite the thoughts of locals there on Palau, and the comments it might been moved, I want to rest everyone's mind that it was found and seen; unfortunately for me, I saw it only after my captain picked up anchor and went out that side of the harbor near Koror. The antenna that the locals were thinking was Harvest Radio was a totally destroyed former Japanese antenna that was either damaged by a storm or someone who didn't want it in service. It must have been there a while, as it was very rusty and beyond use.

Palau has a ham station you can rent and its located at the VIP Hotel, operated by George T88GN; bad part, if you try to get licensed locally, the office has moved. The good part, the address on the forms are still good, and costs a whopping \$40.

I loved it on Palau and for anyone else is worth the time to visit. 73's de (Larry n6hpx/mm <<http://www.myradioworldandcatches.blogspot.com>> Jan 4, swl at qth.net via dxld)

See blog above for his photos of T8WH et al. Three masts are barely visible in longshots from asea. Also on land, a WWFM 89.5, not to be confused with the classical music station in Jersey.

SLOVAKIA Radio Slovakia International gets 5 year funding.

Edwin Southwell wrote to me advising that he'd heard on-air that Radio Slovakia International had got future funding. I found the item, dated Dec 21, on the RSI website:

#### SLOVAK TELEVISION AND SLOVAK RADIO SEAL SUBSIDY DEALS WITH STATE.

Representatives of the state-run Slovak Television and Slovak Radio signed framework agreements with the Culture Ministry on Monday. The two media organisations will receive funds towards making programmes in the public interest. The deals were signed by Culture Minister Marek Madaric and the general directors of Slovak Television and Slovak Radio, Ivan Niznansky and Miloslava Zemkova for a period of five years.

At least 10 million Euros per year will flow into Slovak Television, while Slovak Radio will receive 4 million Euros annually. The allocated funds will cover expenditures incurred by Slovak Television in the production of almost 400 programmes such as fairy tales, documentaries and films. Slovak Radio, in turn, will put the money towards making over 8000 programmes related to music, religion, education and documentary work.

Support for broadcasting in six foreign languages via Radio Slovakia International is also included in the subsidy. (via Mike Barraclough-UK, dxld Dec 30)

SOLOMON ISLANDS 5020 SIBC hrd Jan 8 from 0717 UT tune and recorded to 1600. At 0717 UT QRM from R. Rebelde was severe but thanks to the Perseus SDR's tunable passband and notching capability, decent audio could be captured under Rebelde's saturated audio covering 5015 to 5035. Highlights of this extended logging: At 1100 UT there was local news in En to 1109.5 and an SIBC ID by a woman at 1103 UT. A request pgm hosted by a woman ann in En and Pidgin followed w/ an Australian caller hrd at 1123 UT. The songs were very pleasant island instrumental and vocal pieces by seemingly local bands.

At 1158 a woman ann ID'd as "... Solomon Islands Broadcasting Corporation, Radio Happy Isles" fol by closing anmts in En and the Solomon Is. Nat'l anthem to 1200 UT. QRM was nil to slight in this time period (SINPO 44544), but adj ch QRM gradually worsened after 1130 UT, presumably from 5030 kHz. From 1200, BBC programming took over to 1600 UT tune out. BBC News hrd at 1200 UT w/ man and woman ancrs. (Bruce W. Churchill-CA-USA, DXplorer Jan 9)

Making radio in the Solomon Islands, remote SIBC Gizo.  
<<http://www.abc.net.au/local/videos/2009/12/22/2778655.htm?site=westqld>>

Let's take off to the Western Province in the Solomon Islands for a taste of the sea and a tour of a Solomon Island Broadcasting Corporation (SIBC) radio station.

My name's Julia Harris and I'm the cross media reporter for ABC Western Queensland.

Earlier this year I was lucky enough to take some time off work to visit the Solomon Islands.

While I was there, I visited the SIBC radio station at Gizo, (the largest town in the Western Province), (about two hours by small plane from the capital, Honiara).

I thought it would be interesting to compare a remote SIBC radio station to our ABC Local Radio station here in Western Queensland.

Adrian Gina, is the manager of the SIBC station in Gizo, he has three full-time and one part-time staff members.

One small studio, one small editing booth, one portable audio recorder, at least one computer that hasn't worked for five months and a motorbike for transport.

Unid 7195 kHz aus Afrika? vorhin durchkaemmte ich wieder mal das nun "freie" 41-m Band zw. 7100 und 7200 kHz. Alle ueblichen Verdaechtigen mit O=4 (7200, 7175, 7165 und 7110).

Auf 7195 kHz war mit O=2-3 um 1520z eine Station in einer dem arabischen aehnlichen Sprache zu hoeren. Als ich wieder auf die 7195 ging, gegen 1533z war eindeutig Afropop zu hoeren. Um 1535z spricht ein Mann in franzoesisch mit starkem Akzent durchsetzt mit einer anderen Sprache. 1536z Telefongespraech das Wort "Ja" auf franzoesisch faellt mehrmals. Ab 1539z nur noch der Traeger. Um 1539'30z wird der Sender abgeschaltet!

Wer oder was koennte das gewesen sein? Kann morgen zur selben Zeit wieder rein hoeren.  
(Hans Pammer-AUT, A-DX Jan 13)

UNID 7194.98 station. Jan 13 around 1520 UT noted a station in unid language on 7194.98 with talks and phone-ins. Local noise here, but the music had an African flavor. Transmitter was dropping off at times for long periods and the modulation was weakish. They had news in English at 1703 and tx went off again at 1712 UT.

Possibly Uganda that Martien Groot has been monitoring on this split. No sign of them on 4976 kHz at this time  
(Jari Savolainen-FIN, DXplorer Jan 13)

UAE Did you see the new Thales AHR rotatable antenna at Al Dhabbaya ? same type like new at Sines-POR, new at Radio Kuwait, new at TRT Cakirlar and Emirler. And soon at refurbished Radio PAK Karachi site.

RFE/RL Launches Radio Station in Pakistan's Pashtun Heartland Radio

Mashaal Logo January 14, 2010

<[http://www.rferl.org/content/Press\\_Room\\_Press\\_Release\\_Radio\\_Mashaal\\_Launch/1929887.html](http://www.rferl.org/content/Press_Room_Press_Release_Radio_Mashaal_Launch/1929887.html)>

Radio Mashaal will operate out of a new bureau in Pakistan and broadcast from RFE/RL's Prague headquarters. The station will share a frequency with VOA's Radio Deewa and transmit via FM and shortwave. Online, Radio Mashaal's website will provide a live stream of its broadcasts.

<<http://www.mashaalradio.org/>>

That URL goes nowhere yet on our browsers!

Hunting thru the RFE/RL website, we find Mashaal on a list at

<<http://www.rferl.org/howtolisten/PK/ondemand.html>>

but of course no programs just yet. Judging from similar pages, there should be added a WAVES button displaying the times and frequencies.

So far there is only an AFFILIATES button which shows 100.5 FM for three cities in Afghanistan, not Pakistan, Gardaiz, Khost, Kunar, at 16-18 local time [11-13 UT]. But the press says it will be on SW too.

(Glenn Hauser-OK-USA, dxld Jan 14)

Schedule is 1030-1230[sic, 1100-1300] UTC on 9395UDO, 11605IRA, and 13700IRA kHz shortwave.

I'm sure Radio Mashaal will do a good job. But it will do much the same job that VOA's Deewa Radio is already doing, in the same language, to the same target area. Put together the talent from these two stations, and US international broadcasting would be in danger of achieving excellence.

This was not the idea of the Broadcasting Board of Governors. Some senator put some language in some appropriations bill, and Radio Mashaal was created. Such shards of bad legislation have made US international broadcasting the archetype of bureaucratic inefficiency.

(Kim Andrew Elliott-USA, <[kimandrewelliott.com](mailto:kimandrewelliott.com)> via dxld Jan 15)

If it's really "4 pm local time", (1600), 1030 UT would make that a UT +5:30 zone, i.e. India or Sri Lanka, not Pak which is currently UT +5:00 (1100 UT as we assumed), or Afghanistan which is UT +4:30 (1130 UT). Why in the world don't they just give the time in UT in the first place, about which there can be no confusion?

(Glenn Hauser, dxld)

A check on 9395, 11605 and 13700 kHz at 1045 UT today Jan 15 reveals only the CNR-8 network in Chinese on 13700 kHz. But at about 1100 UT this went off, and now there is lively Afghan sounding music and song in // 11605 and 9395 kHz. Talk followed. 13700 kHz is the best signal and peaking to 7 on my S meter. I'm still waiting to hear/copy the ID.

(Noel R. Green-UK, dxld Jan 15)

Add Radio Mashaal to the IBB stable. Radio Mashaal confirmed that started at 1100UT on 9395 kHz on Jan 15.

later - I often heard ID of "Daa Mashaal Radyo" in Pashto.

(Sei-ichi Hasegawa-JPN NDXC, dxld Jan 15)

(R BULGARIA DX MIX News, Ivo Ivanov, via wwdxc BC-DX TopNews Jan 14)

WTWW was testing with music on 9480 UT Jan 14 around 0030, but propagation had dropped out here, so weak and fading.

At 0045 came up on 5755, much better signal with music, S9+15 on the FRG-7 but that's just slightly above the local noise level with computer on. Much better than 5745 station, presumably WWRB. Modulation seems good but still not a solid signal. Don't know how much longer they will be on tonight.

5755 rechecked at 0117, MUCH stronger signal S9+22 or so, now solid, as if they turned up the power but were supposedly full power earlier, so maybe we had just hit a propagational hole then.

Still much stronger than Brother Scare on WWRB 5745, and much much stronger than WWCR PMS/DGS on 5935. WWCR 5890 PPP does not start until 0200. Comparing signals to these neighbors should be helpful.

0120, 0124, 0130 IDs, apparently between each tune, say "Coming to you from near the banks of the Upper Cumberland River in middle Tennessee, this is WTWW, Lebanon, Tennessee, U S A, performing equipment tests". Mod seems a bit distorted now and/or with selective fading distortion. Disappeared at 0126:30 or so, back on at 0128.

Here's the ID recorded around 0134 UT Jan 14 on 5755, the final one before went off at 0136: <<http://www.w4uvh.net/WTWW.rm>> (Glenn Hauser-OK-USA, dxld Jan 14)

VIETNAM VOV-1 confirmed that extended broadcast at 1900 UT on Jan 13 on 7435 and 9635 kHz for Gulf of Tonkin. Probably it seems that 24hrs service. First noted on Jan 3rd at 1935 UT on 7435 kHz.

Other frequency on 5975 at 1700\* UT, 9530 and 11720 kHz unknown. (Sei-ichi Hasegawa-JPN NDXC, dxld Jan 13)

ALGERIA 6297.205 National Radio of Sahara ArabDem Rep. - Saharui, via Rabouni-ALG, SIO 454 in Arabic at 1848 UT.  
(Nils Schiffhauer-D DK8OK, A-DX Jan 21)

AUSTRALIA - see under Marianas/Palau also.

Sad News I received a shock reading through today's obituaries in this morning's paper. Ted Carter, who was once VK7EC has died after a long illness. Ted was a long-time SWL and monitor for various international stations such RN, DW and the VOA. I first met him whilst attending a local amateur radio club meeting almost 50 years ago. He was more interested in listening than transmitting. In fact I got my first copy of the WRTH from him when I told him I heard a Philippine station on 570 kc/s when 2YA went off the air. That was in 1961 and reception would have been better if the persistent frying noise had gone away. It was Ted who told me it was fluorescent tubes. I was only 13 or 14 then.

Ted was always a very private person and was a lecturer at the local General Hospital nursing school and continued on for a while after nursing was upgraded to university level. I was fortunate once to visit his listening post at Legana when we started a local branch of the then Southern Cross DX Club and his set-up was modest.

Ted was a member of the ARDXC and Southern Cross DX Club and probably the two NZ DX clubs before the Australian clubs came into existence. I last saw Ted in the early 90's and he was frail then. He died from a long illness and has been privately cremated. No cards or condolences please.  
(Robin Harwood VK7RH, dxld Jan 19)

AUSTRIA Der ORF hat die Verbreitung von Radioprogrammen ueber die Mittelwellenfrequenz Ende 2008 eingestellt. Diese Technologie wurde von UKW-Radio abgelost. Die Mittelwellen-Masten am Bisamberg werden jetzt gesprengt.

<<http://noe.orf.at/stories/417891/>>

Kein Bedarf mehr fuer Mittelwellenfrequenz.

Am Bisamberg gibt es derzeit noch zwei Mittelwellen-Sendeanlagen. Seit Jahren besteht aber kein Bedarf mehr fuer die Mittelwellenfrequenz, sowohl bei Programmanbietern als auch bei Zuhorern.

Die Sendemasten werden daher Ende Februar gesprengt und abgetragen - das hat der Betreiber der Sendemasten, die ORF Sendetechnik-Tochter ORS am Freitag bekannt gegeben.

Die kuenftige Nutzung des Areals ist unklar.

Am 29. Februar (persoenl. Anmerkung: 2011??) gibt es einen Informationsabend fuer alle Anrainer im Sendesaal der Sendeanlage Bisamberg im 21. Wiener Gemeindebezirk. Wie das Areal und das denkmalgeschuetzte Sendergebäude am Bisamberg kuenftig genutzt werden, ist noch offen. Die erste Sendeanlage am Bisamberg ist 1933 errichtet worden

(Paul Gager-AUT, A-DX Jan 22)

War einst Wien Bisamberg auf 585 und 1476 kHz MW, wb.

AZERBAIJAN [NAGORNY KARABAKH enclave] 9677.51 Aedaelaen Saesi Radiosu, Stepanakert, \*0600-0625\* UT on Jan 16, Azeri, IS+ID "...Stepanakert...", news and a report with lots of mentions of Azerbaijan, ID "Aedaelaen Saesi Radiosu" at s/off. Good signal, but bad audio quality, 35442.  
(Patrick Robic-AUT, dswci DXW Jan 20)

Aedaelaen Saesi Radiosu aus Stepanakert war heute am 16.1. um 0600 UT auf 9677.51 kHz mit tollem Signal aber einer Modulation vom Typ "Radio Kairo" zu hoeren. Mit einem breiten Filter war der Empfang zumindest teilweise verstaendlich - ECSS Empfang war vollkommen unmoeglich. s/off war heute um 0625 UTC.

(Patrick Robic-AUT, A-DX Jan 16)

## BULGARIA/HUNGARY/LATVIA/ROMANIA/RUSSIA/TURKEY

Hi folks, The BING Maps people have just released another map update dated January 18, 2010.

1. In terms of first time high resolution we can now see the former SW site of: Yuzhno-Sakhalinsk in Russia. From the Excel files we have the coordinates as:  
46 50 33 N 142 53 05 E Many masts can still be seen. Hopefully Victor & Wolfgang can tell us more about the site & its antennas. Also if anyone can tell us the date of the last SW BCB transmission from this site, we be pleased to hear from you.

### 2. EXTRACT FROM BING MAPS BLOG.

The Bing Maps imagery release for January 2010 release is SO BIG we had to break it into two parts - not kidding! The January 2010 Part 1 release is 558,000 square kilometers of imagery consisting of:

- \* Germany's Ruhrgebiet
- \* Belgium
- \* Luxembourg
- \* Vancouver - Sea to Sky Hwy to Squamish and beyond
- \* Additional imagery scattered throughout Russia, Bulgaria, Hungary, Poland, Latvia and Turkey.

If anyone finds further new imagery of SW sites or notable MW ones from this latest update please drop us a line.  
(Ian Baxter-AUS, SW TX site Jan 21)

Re: Bing maps. Bing Maps in Germany version is very, very SLOW !  
at least 30 x times slower, compared to Google Earth / maps. Like a 16 MHz notebook of 1991 year !

Bing Maps English version is a little bit faster, but Microsoft has very little streetside images yet...

- \* Germany's Ruhrgebiet
  - \* Belgium
  - \* Luxembourg
- Always answered "There is no streetside near here"; and the red pass through traffic sign occurred...

- \* Vancouver - Sea to Sky Hwy to Squamish and beyond.
- Vancouver ist the correct ONLY streetside image I found. <<< positively

B I N G share the location - lot's of errors on BING so far.  
"That web page doesn't exist. Let's see if we can help you find what you are looking for."  
BING on this version is a decade behind GOOGLE back.

CZECH REP Radio Prague news - 17 January 2010.  
Only a single unit at Litomysl site will be in use for various Radio

Prague programmes from Febr 1st, 2010.

Hier gibt es infos der letzten Entwicklung, ab 1.2. wird mit einem leicht eingeschaenkten Plan weiterhin ueber die Litomysl Anlage gesendet. Die Relays ueber Russland und Portugal werden wohl gekappt??

<<http://www.radio.cz/en/article/124078>>

La seule mauvaise nouvelle est qu'il sera toutefois procede a des reductions de ces diffusions puisque seul l'emetteur de Lytomysl sera conserve.

<<http://www.radio.cz/fr/article/124097>>

(wb, Jan 16)

Once again, thank you - all of you who have written in in the last few months - so much for expressing your support. As we announced several times, our shortwave broadcasts are to continue according to the current schedule until the end of January. Radio Prague's management is now working on a new schedule starting on February 1st but the great news is Radio Prague will keep its shortwave broadcasts.

There will be a certain reduction but it will not be substantial and the majority of our listeners should not be affected by it. Radio Prague will need to find other ways to save and make ends meet with the slimmer budget for 2010. This is the result of intensive negotiations between Czech Radio and the Foreign Ministry and we hope this is good news for you just as it is for us here at Radio Prague.

<<http://www.radio.cz/en/article/124078>>

(via Jonathan Murphy on the Save Radio Prague Facebook group, BrDXC-UK ng Jan 17)

Radio Prague continues on SW with one transmitter.

No comments yet

<<http://blogs.rnw.nl/medianetwork/radio-prague-continues-on-sw-with-one-transmitter>>

An article on Radio Prague's website deals with the situation following the Czech government's decision to reduce the station's budget, especially with regard to shortwave, which the Director of Radio Prague, Miroslav Krupicka, says accounts for about half the station's audience reach:

"Radio Prague's budget for this year has been reduced by 15.0 percent. It is a little bit more than we expected but we have to come to terms with it. It still makes it possible for us to continue shortwave broadcasts.

What we have to do is to close one of the two shortwave transmitters that we have in Litomysl. We will be able to cover basically more or less the same territory we have been covering so far, which means the whole of Europe, North Africa, let's say the Middle East and parts of North and South America. We won't be reducing very much the area that we cover so far." Those economy measures almost halve the shortwave transmission bill to 7.0 million crowns (US\$ 387,000) a year. Dutch-based consultant and former RNW Creative Director Jonathan Marks and the AIB's Simon Spanswick explain to Radio Prague's Chris Johnstone why some international broadcasters have dropped shortwave altogether.

(Andrea Borgnino-ITA IW0HK - HB9EMK <<http://www.mediasuk.org/iw0hk>>

<<http://www.radio.cz/en/article/124187>>

In this week's Talking Point we examine the future of shortwave broadcasting. Shortwave has undoubtedly been on the retreat in developed countries, forced to share its former primacy with upstart mediums such as the internet and satellite radio. But are its days numbered even in the developing world.

The topic for this week's Talking Point is one that is close to home for the staff of Radio Prague and for a large number of its listeners. It is the future of shortwave. Shortwave is our main broadcast medium with feedback from listeners suggesting that this is the way we reach around half of you.

But shortwave transmission has also been one of the station's main costs, representing 13 million crowns out of a budget of just under 65 million crowns last year [that means 20% of the total budget ... that's not too much, I guess, wb.]. And with demands from the Ministry of Foreign Affairs for severe cutbacks, the whole future of shortwave broadcasting by Radio Prague has been under threat.

Station director Miroslav Krupicka describes the latest situation.

"Radio Prague's budget for this year has been reduced by 15.0 percent. It is a little bit more than we expected but we have to come to terms with it. It still makes it possible for us to continue shortwave broadcasts. What we have to do is to close one[!] of the two[!] short wave transmitters that we have in Litomyšl. We will be able to cover basically more or less the same territory we have been covering so far, which means the whole of Europe, North Africa, let's say the Middle East and parts of North and South America. We won't be reducing very much the area that we cover so far."

Those economy measures almost halve the shortwave transmission bill to 7.0 million crowns a year. [...]

"Major broadcasters like the BBC have actually stopped broadcasting to Europe on shortwave along with France. Denmark and Norway have gone off the air, as has Austria and Slovakia. The list goes on and on. There are a lot of transmitter facilities that are at the moment standing idle. And frankly I do not think they will ever come back to the glory that we knew say 20 to 25 years ago."

He adds that one of shortwave's main problems is its expense. "In terms of short wave broadcasting, you need huge powers - electricity costs - in order to make just one signal. And if you are spending hundreds of dollars to keep a 100 or 250 kW shortwave radio transmitter on the air, that may have been physically possible 10 years ago when oil was 50\$ a barrel but when it becomes 100\$ a barrel it becomes a very, very expensive way of sharing an idea."

But Radio Prague's Mr. Krupicka believes shortwave still has a major role, especially in those parts of the world where the internet has not advanced so far and so fast.

"Shortwave is one of the basics of international broadcasting. That is what I think and what I want to fight for. Because despite all of the digitalisation and all the new platforms and so on and modern means of communication, Internet and so forth; international broadcasting, very much especially outside Europe, is based on short wave."

Even so, Radio Prague has not been putting all its eggs in one basket. Although hopes that digital shortwave would provide a cheaper, higher quality option have faded out, other technological options have come along and been grabbed. Mr Krupicka:

"There are, of course, other means of broadcasting which we have been using for years. It is satellite broadcasting; it is internet broadcasting, both live streaming and on demand, and pod casting. Podcasting seems to be one of the ways, very modern and very effective ways, of spreading audio. The number of podcasts downloaded from the Radio Prague website is about 500,000 a month. It is a great number and it is growing. So I am very much in favour of pod casting and investing in podcasting and I see it as one of the very important platforms for the future for broadcasting audio content."

Another big broadcaster out of Prague is the US-financed station Radio Free Europe-Radio Liberty broadcasting to 20 countries. Julian Knapp describes how shortwave fits into its options to get the message across.

"Like everywhere, we adapt to our consumers. As consumers move more towards the internet, television, towards online video and towards these media, we adapt. So shortwave is on the decline overall. But in some markets such as Afghanistan where we have 50 percent listeners in the country - it is still very much a radio nation and radio market - shortwave is still popular although we do have FM and other wavelengths. But in some rural areas you can only reach with shortwave. So in these countries shortwave still has a big role."

He adds that shortwave came into its own when the Georgian government starting blocking other broadcasting during a state of emergency in 2007 and in contemporary Russia. There, local stations have been leaned on to discontinue re-broadcasting arrangements so shortwave is again in vogue.

If shortwave is still part of the broadcasting picture for the moment, the question seems to be how long will that continue to be the case?

Simon Spanswick is the chief executive of the Association for International Broadcasting, an industry group covering radio and television. He sees an ever declining role.

"It is still very useful in some parts of the world. But a lot of the world has moved on, immensely far. And if you walked outside Czech Radio or go down into Wenceslas Square and asked half a dozen people when they last used a shortwave radio and then repeated that in Dubai or in Accra, Ghana,

I think you will find a very small proportion of the people you ask respond positively about shortwave. Increasingly people want easy access to news, information and entertainment and shortwave radio is not the easiest to tune into, whereas a local FM station blasting out of small transistor radio is a lot more easy to find."

## TALKING POINT END OF THE ROAD FOR SHORTWAVE?

19-01-2010 12:44 - Chris Johnstone [8:43 audio available]

TDP/ DRM test transmissions from TDF Montsinery (French Guiana) to Florida on January 21 and 22, 2010, on 17755 kHz at 1900-2100 UTC

FYI: TDP Radio will perform DRM test transmissions from TDF Montsinery (French Guiana) to Florida on January 21 and 22 2010 17755 kHz 1900-2100 UTC; may be a possibility of regular transmissions to Florida as of February 1st if test results are OK.

Frequency: 17755 kHz,  
Power: 100 kW RMS,  
Antenna: 4/4, azimuth 311 degr

DRM parameters:

- B mode,
- MSC 64 QAM
- CR 0,6
- Audio encoding : AAC + SBR,
- Language: English.

Wishing you successfull listenings, reports appreciated at  
<f6ajw @ wanadoo.fr>  
Regards / 73.

What about the Darwin Australia outlet future of TDP from Febr 1st onwards ?  
17755 kHz 0700-0900 UT 40kW 317degrees English AUS TDP  
(wb, dxld Jan 21)

17755 TDP Radio via TDF Montsinery (French Guiana).  
For whom? Is this considered an irrelevant detail? The audio content of these tests could reveal it, but no observations have been posted at drmr.org so far.  
(Kai Ludwig-D, dxld Jan 22)

DRMNA reports good reception in North America. And the folks there haven't been very active at drmr in the past, too... For whom? Thats easy: TDPs programming is a showcase for DRM (probably paid at energy cost level) and

as Darwin shuts down at the end of the month there seems to be a little bit money in someones pocket left which has to be given away. Now NoAM is "lucky" to get the "look what we can" programming. And this fits to the first availability of a DRM Receiver in the US.

(Stephan Schaa-D, dxld Jan 22)

GEORGIA 9474.76 [rather 9494.76] Sukhumi, Abkhazia, at 1157-1258\* UT on Jan 03, good carrier, but very low audio. A few minutes later audio improving considerably, in Russian, ID at 1202 UT as "Govorit Sukhumi ...", news, several reports, music and songs, no interferences, 35444.

(Johann Wiespointner-AUT, dswci DXW Jan 20)

GERMANY 9800 Sawtu Linjila, via Wertachtal, at \*1830-1850 UT on Wed Dec 30, s/on with sound of African instruments, talk in presumably Fulfulde. Short music and greetings "Assalaam Aleikum" at 1843 UT, another talk program, 45444-45343.

11830 Voice of Ethiopian Unity, via Nauen, at \*1700-1729 UT on Wed Dec 30, full ID "Yih Finote Demokrasi ye Ethiopia andinet dimts" in Amharic, talk, an Ethiopian popular song, 45444-43443 sometimes disturbed by heavy jamming.

(Nobuya Kato at Luxor-EGY, dswci DXW Jan 20)

GREECE Voice of Greece ERA-5 and ERT-3 regional service heard on three channels again today Jan 22nd. 3rd tx at Avlis site was on repair since Dec 27, 2009.

In 6-10 UT slot only two frequencies in use. ERA-5, The Voice of Greece, ERT S.A., today Fri Jan 22, at 0800 UT ERA-5 in Greek language on both 9420 and 12105 kHz (not 15630 kHz).

9420 kHz S=9+20dB, 12105 kHz S=9+40dB powerhouse signal here in southern Germany.

At 1150 UT noted three Greek language transmissions from Avlis.

ERA-5 on both 9420 kHz S=9+20dB and 15650 kHz S=9+10dB, and weakest signal from Avlis site on ERT-3 regional Thessaloniki relay 9935 kHz with S=9 pure.

(wb, wwdxc BC-DX TopNews Jan 22)

Today on <<http://www.ert.gr/filia/en>> Radio Filia carried Greek from tune in at 0800 UT, until 0900 UT when the German half hour was heard. At the end also 12105 kHz was heard. At 0933 UT Russian began.

These programs are not in // with 12105 kHz which also is heard here in Copenhagen, but with QRM 0930-1045 UT from KTWR, Agat, Guam. Here at 0930 UT both 9420 and 15630 kHz are in // with 12105 kHz.

So, they seem to have got their 3rd tx running again.

2200-2400 Connection With Second Program.  
(Compiled by John Babbis-MD-USA, dxld Jan 10)

GUINEA 7125 Radio Conakry, Sonfonia, Conakry, at 1905-0005\* UT on Jan 07, 09, 10, 11, 15 and 16, French annmt, lively Afropop, ID, news about the attack in Cabinda, phone calls from listeners, 2300 UT vernacular, no HAM QRM, 35333. On Jan 07 sudden off the air at 2031\* UT, on Jan 02 without fanfare at 2330\* UT.

(Michele D'Amico-ITA, Rich D'Angelo/FCDX, Max van Arnhem-HOL, Howard-USA, Wilkins-USA, Anker Petersen-DEN, and Johann Wiespointner-AUT, dswci DXW Jan 20)

7125 Radio Conakry also regular these days. For instance after 2200 UT the knight before with Westafrican MX and talk in French by man. Unusually strong at times. SIO: 322.

(thanks Zeljko Crncic-D, wwdxc BC-DX TopNews Jan 21)

INDIA Special broadcasts by AIR for Republic Day 2010, on Jan 25 and 26. All India Radio will broadcast the following special programs in connection with the Republic Day celebrations on 26th January.

25 January 2010

1330 UTC President Mrs. Pratibha Devisingh Patil's address to the nation.

This will be broadcast by all stations of AIR. Delhi frequencies are 5015 6030 6085 9575 & 9835 kHz. Regional stations on SW are using 60 MB frequencies at that time. Look out especially Kohima 4850 kHz (1000 to 1630 UTC).

26 January 2010

Running Commentary of Republic Day parade from 0350 UTC

Hindi: 6155 (Bengaluru 500 kW); 11620 (Aligarh 250 kW); 15135 (Delhi 50 kW).

English: 5990 (Delhi 250 kW); 9810 (Delhi 50 kW); 11830 (Delhi 50 kW); 15050 (Bengaluru 500 kW).

The following Regional stations will change from their Morning frequencies on 60 Meters (4 & 5 MHz frequencies ) to their day time frequencies between 0335...0350 UTC as follows:

5965 Jammu?

5985 Ranchi ?

6000 Leh

6040 Jeypore

6065 Kohima?

6085 Gangtok

6150 Itanagar?

6190 Delhi

7230 Kurseong

7240 Mumbai

7280 Guwahati

7295 Aizawl

7315 Shillong

7325 Jaipur

7440 Lucknow

(? Normally off air)

So some unusual reception of AIR stations shall be observed. The other following stations are already scheduled to be on air daily at this time and will also relay the running commentary.

6020 Shimla  
6110 Srinagar  
7210 Kolkata  
7290 Thiruvanthapuram  
7335 Imphal  
7380 Chennai  
7390 Port Blair  
7420 Hyderabad  
7430 Bhopal

Reception Reports may be sent to <spectrum-manager @ air.org.in>

DXindia Jan 21)

INDONESIA 4925 RRI Jambi on Jan 20 activated again. Jan 20 at 1100-1600\* UT, Jakarta news at 1200 UT. Closing down with Love Ambon at 1600\* (c/off at 1608 UT). Jan 20 at 2200 UT IS by the call of bird at 2155 UT. Opening theme at 2157 UT. Jakarta news at 2200 UT. RRI Jambi was off the air from Nov 19, 2009.  
de A.Ishida-JPN Jan 20  
(Sei-ichi Hasegawa-JPN NDXC, dxld Jan 21)

9526 Voice of Indonesia. What a surprise! They finally have their act together: fair signal along with good modulation/audio level. 1439 UT, Jan 17 heard in assume Malaysian; pop songs; V.O.I. IDs with slogans ("Let's make the world great", "The sound of dignity" and "Be the first. Be the first being the best"); 1502\* UT; adjacent QRM started before ToH.  
(Ron Howard-CA-USA, dxld Jan 17)

IRAN Additional frequency of Voice of Islamic Rep of Iran in Arabic 1430-1727 9830 KAM 500 kW 178 deg to N/ME, co-ch CNR-1 in Chinese.  
(R BULGARIA DX MIX News, Ivo Ivanov, via wwdxc BC-DX TopNews Jan 18)

IRAQ 3931.06 R Voice of Kurdistan, Sulaimaniya, Northern Iraq, 1425-1431\*, Jan 07, Kurdish talk, music and closing annmt 1431 UT with same type of jammer as heard on 4775 kHz. It stopped for 10 seconds during music at 1429 UT to check, if the clandestine still was broadcasting. The impatient [Iranian] jammer operator signed off at 1432\* UT !

4770.95 Voice of Iranian Kurdistan, Salah Al-Din, Iraq, \*0300-0340, Jan 12, Kurdish ann and songs, 0337 jumped to 4980.00, 23332 jammed.

4775.00 Iranian jammer was here, heard from \*1405, Jan 07, 08 (on 4770), 14 and 17 (on 4779.96), but jumped to 4779.99 at 1432 and stayed there until it signed off at 1545\*. On Jan 14 and 17 it had disappeared at 1509 UT.

No clandestine was heard and the Voice of Iranian Kurdistan is only scheduled in the morning! But R Djibouti in Arabic 4780 faded in and became stronger, 23332. (Petersen and Ritola)

4780.00 Voice of Iranian Kurdistan, via Salah Al-Din, \*0358-0402\* and \*0420-0427\*, Jan 16, Kurdish very distorted talk jumping here and disturbing Djibouti, 33433. The Iranian jammer stayed on 4770.97 all the time 0315-0435 QSA 3, but the clandestine could not be heard while jumping to the latter frequency.

(Anker Petersen-DEN, dswci DXW Jan 20)

MADAGASCAR 5009.96 R Nasionaly Malagasy, Ambohidrano, at 0252-0335 UT on Jan 11 and 12, group singing prior to IS followed by choral National Anthem at 0255 UT, Malagasy ID, frequency ann, jazz, conversation, jingle, 25332.

(Rich D'Angelo/FCDX, Anker Petersen-DEN, dswci DXW Jan 20)

MALAYSIA [SARAWAK] 5030 Sarawak FM via RTM, at 1340 UT on Jan 9. The usual presents here of CNR-1 was absent today! In vernacular; EZL pop songs; 1400 1+1 pips; "RTM" news; long music segment of repetitive indigenous drums accompanied by chanting/singing; phone conversations; sign off probably at 1600 UT. If China continues to be off the air here, folks should have a decent chance to hear this station that is normally buried under CNR-1. 1506, Jan 12. In vernacular; the "RTM Kuala Lumpur" news; DJs playing pop songs and with on air phone conversations; off at 1600. Good reception; 100% readable!

Bruce Churchill (CA) also commented to me about their good reception and wrote: "Hard to believe this is a 10 kW transmitter!" and I certainly agree with him, as their reception has improved day by day since CNR-1 left them in the clear.

(Ron Howard-CA-USA, JPNpremium Jan 15)

MALI 7285.96 RTVM Mali, Kati, Bamako, at 1650 UT on Dec 27, Afro music, ID, French, fair.

(Michele D'Amico-ITA, dswci DXW Jan 20)

Radio Mali is missing on 7285v for quite some time. Radio Prague uses 7285 kHz since Dec until 1757 s/off for the German service. In a mailbag program in German on December 15th they stated, concerning the heterodyne from Mali, that this was "a locally limited problem that could be resolved". The latter is, in fact, the case now, but I doubt that Radio Prague has played an active role in this development, as well as the "local" nature of such interference.

(Robert Foerster-D, dxld Jan 15)

9634.98 RTVM Mali, Kati, Bamako, at 1010-1100 UT on Jan 10, vernacular and African-accented French talks, weak, but no QRM.

(Johann Wiespointner-AUT, dswci DXW Jan 20)

MARIANA ISLS/AUSTRALIA [Palau] Yesterday I checked the new Radio Australia via Palau relays first reported by Sei-ichi Hasegawa-JPN on Monday.

All schedules:

<[http://www.mediakat-blog.jp/usr/hiroshi/t8whb09\\_2010jan.gif](http://www.mediakat-blog.jp/usr/hiroshi/t8whb09_2010jan.gif)>

Radio Australia via T8WH Palau. I confirm that T8WH Palau relayed Burmese and Indonesian of Radio Australia from Jan 19.

0100-0130 Burmese 15655PAL // 17655SHP  
0400-0430 Indonesian 15785PAL // 11550TWN 15180SHP 15415SHP  
[from Jan 20 15780PAL kHz instead]  
0500-0530 Indonesian 15590PAL // 11745TWN 15180SHP 15415SHP

It is the first time that a program of Radio Australia is relayed by Palau.

de Hiroshi  
(Sei-ichi Hasegawa-JPN NDXC, dxld Jan 19)

T8WH-Angel 4 New Schedule  
2200-2400 12040PAL RA English  
0000-0030 15225PAL RA Indonesian // 15180DRW 15335SNG 15415SHP  
0100-0130 15655PAL RA Burmese // 17655DRW  
0400-0430 15780PAL RA Indonesian // 11550TWN 15180DRW 15415SHP  
[Jan 19 only on 15785 kHz]  
0500-0530 15590PAL RA Indonesian // 11745TWN 15180DRW 15415SHP

1300-1430 9890PAL RA Chinese // 9475SHP 11660SHP 11760TWN 11825DRW  
1600-1630 9965PAL RA Chinese

<[http://www.mediakat-blog.jp/usr/hiroshi/t8whb09\\_2010jan.gif](http://www.mediakat-blog.jp/usr/hiroshi/t8whb09_2010jan.gif)>  
(Sei-ichi Hasegawa-JPN NDXC, dxld Jan 20)

15655 - at 0059 on 20 Jan opened abruptly with World Harvest Radio feed, mention of Palau and address for reception reports. At 0100 cut to Radio Australia feed ending English, then Kookaburra and RA ident in Burmese, followed by familiar news theme intro. Fair to good signal with // 17665 kHz Shepparton[sic, Darwin site] very good.

15780 (not 15785 as reported elsewhere) - at 0411 UT on 20 Jan found English / Indonesian language lessons here with fair to good signal. Transmission slightly delayed compared with // freqs: 15415[SHP] & 15180[DRW] - both very good; Taiwan relay on 11550.11 kHz was only poor.

Language lesson ended 0429:30 UT with 'Good Bye Listeners' and Palau went off, whereas Taiwan 11550.11 kHz continued with closing anncts and identification in Indonesian.

15590 - at 0459 UT tune-in on 20 Jan found WHRI ident & address, then at 0500 UT, ABC (Australia) news theme and into Indonesian news. with Haiti the lead item. Poor signal. Parallel freqs audible - 15415[SHP] & 15180[DRW] kHz both excellent, 11745 kHz via Taiwan was poor.  
(Bryan Clark-NZL, dxld Jan 21)

Radio Australia via Darwin, Cox Peninsula site  
9630 2200-2330 54 DRW 250 290 Indonesian  
11825 1300-1430 44 DRW 250 340 Mandarin  
11980 1600-1700 49,50,54 DRW 250 317 English  
12010 2200-2400 49,50,54 DRW 250 317 English  
15180 0000-0030 54 DRW 250 290 Indonesian  
15180 0400-0430 54 DRW 250 290 Indonesian  
15180 0500-0530 54 DRW 250 290 Indonesian  
17665 0000-0200 49,50,54 DRW 250 317 English

Re Radio Australia via T8WH Palau site. As replacement for Darwin Australia site?

The story of this site got out of sight somewhat, but gossip from Australia has it that a shut-down of Darwin (or, rather, the Cox peninsula station) could be imminent, probably due on Jan 31, 2010.  
(Kai Ludwig-D, dxld Jan 20)

... at least no CVC anymore, [via Darwin Australia, wb.].

I listened to their Internetstream last half hour and it definitive says:  
No more shortwave from 1.2.2010 anymore. Only internet streaming is going on to India. So probably the next 10 days are the last chance to catch CVC from Australia on shortwave ...  
(Stephan Schaa-D, dxld Jan 20)

MEXICO 6104.74 XEQM Candela FM um 0734 UT in Spanisch mit Latino-Pop, anns, Jingle. 24322.  
(Patrick Robic-AUT, A-DX Jan 20)

MOLDOVA Sorry, I was wrong too. Here is correct schedule on Grigoriopol Maiac MW 1413 kHz site:  
1830-1900 Ukrainian TWR 1900-2100 Russian VOR  
(Alexander Egorov-UKR, "open\_dx" RUSdx Jan 17)

6240 Radio PMR, Grigoriopol, at 2317-0000\* UT on Dec 30, English talk about employment and economic issue, the relations between Pridnestrovie and Ukraine. Snailmail and e-mail address information at 2327 UT, then talk program in French mentioning economic issue and so on followed. ID in German "Hier ist Tiraspol" at 2345 UT, then talk program in German followed. The transmission closed down after frequency and contact information in German. (The contents of talk programs in three languages seemed to be identical ones.) 45444. Very good and stable reception condition.  
(Nobuya Kato at Luxor-EGY, dswci DXW Jan 20)

6260 Test of YFR via Girgoriopol.

Family Radio on 6260 - new frequency?  
Heard Family Radio with Brother Harold Camping, "Open Forum" 'phone-in programme yesterday (Sat 16 Jan) at 2015 UT and again this evening 2048 UT on unscheduled 6260 kHz ( // weak 15195 kHz). Very strong powerhouse signal here on 6260 kHz, SIO 555. Anyone know the site for this frequency which I can't see scheduled - its strong enough to be somewhere like Moldova?  
(Alan Pennington-UK, BrDXC-UK Jan 17)

Re 6260 kHz. Maybe a punching error at Grigoriopol Maiac Moldova site?  
YFR nominal on 6240 kHz at 2000-2200 UT with 300 kW, at 285 and 309 degrees.  
(wb BrDXC-UK Jan 17)

Nope, it's not a punching error. According to IBB Monitoring, WYFR is TESTING from Grigoriopol 2000-2100 UT on 6260 kHz from Jan 14. You can hear reception samples [mp4 and ra format] by visiting  
<[http://europe.ibbmonitor.com/rmsweb/ui/sound\\_query.php](http://europe.ibbmonitor.com/rmsweb/ui/sound_query.php)>  
and choose:

YFR; TEST; - All -; - All - (all dates, or desired)  
and then click Submit..  
(Dragan Lekic-SRB, BrDXC-UK Jan 18)

Thanks Dragan, test on 14 til 17 Jan only. No reception at nearby  
Bucharest and Vienna monitoring, due of dead skip zone. Malmoe files not  
so strong than London monitoring.  
(wb, BrDXC-UK Jan 18)

MOLDOVA/BULGARIA Re: And I wonder what "Sgdra rotation A-31A" means.

This description appears to be slightly messed up. SGD-RA are dipole  
arrays on fixed constructions, as opposed to the usual wired curtains.

But Grigoropol has also a rotating antenna that runs on rails. It is being  
referred to as PA A30/31. It remains a bit unclear if this is the type  
number of this system, A30/31 could also be a specific Grigoriopol  
equipment designator.

Here it is:  
<<http://www.novosibdx.info/grigoriopol.html>>

<<http://maps.google.de/?ie=UTF8&ll=47.263472,29.400508&spn=0.002672,0.004774&t=k&z=18>>

Of course the system has been placed away from the other installations to  
minimize the azimuthal range it can not reach. North of this system are  
the other shortwave antennas and transmitters.

It is pretty obvious how the transmitters are placed in two groups. The  
first one consisted of three PKV-500 transmitters and went on air in 1973,  
the second one with two further PKV-500's followed in 1975. Around 1986/87  
two of the transmitters from 1973 have been replaced by new Kondor-1  
units, rated at 2000 kW but apparently never run at more than 1000 kW. The  
other three transmitters have been upgraded into a 1000 kW variant called  
PKV-500-M.

East of the shortwave facilities is the LW/MW complex that went on air  
with three Buran model transmitters (1000 kW) in 1971, later followed by a  
Shtorm-S (150 kW) that has been moved in from somewhere else. The long row  
is the travelling wave antenna (Zarya) for 1548 kHz, the four masts are a  
configurable antenna (Kvadrat) that should be in use on 621 kHz. The  
"thick" one of the three ND masts is a configurable cage antenna (ARRT)  
for 999 kHz. The missing mast was a 350 meters tall antenna (AM-350) for  
234 kHz that crashed in 1997, not disrupting an existing service because  
234 kHz had been closed down already some years before due to the slow  
decline of Radio-1.

<<http://www.panoramio.com/photo/2753512>>

Some of the other shortwave equipment: SGD-RA antennas (the closest ones  
aiming at South America), background left curtains aiming at North  
America, background right the 1973 transmitter complex.

Check out also the Padarsko photos, this is identical equipment:  
<<http://www.predavatel.com/bg/3/plovdiv.htm#pad>>

(Kai Ludwig-D, dxld Jan 16)

MONGOLIA 12085 Voice of Mongolia at 1000 UT with sign on. Typical interval signal then MX. SIO: 333.

(Zeljko Crncic-D, wwdxc BC-DX TopNews Jan 22)

MYANMAR 5915 Myanma Radio, at 1512 UT on Jan 13. Perhaps a change in their schedule! Heard in vernacular with a lecture till 1517 UT; started segment of non-stop indigenous music and songs till 1529 UT; assume sign off announcement; 1530\* UT. Noted the usual CRI QRM. This format is consistent for their Educational Service \_ Distance Learning programming, which since mid-2009 ended at 1245 UT, followed by indigenous music and songs till 1300 UT

This needs more monitoring to see if we can hear any lectures in English, as heard in the past.

(Ron Howard-CA-USA, JPNpremium Jan 15)

5769.99 Defence Forces BC, Taunggyi, at \*0030 UT on Jan 05, trumpet and talks, then slow music, frequency slowly drifting, fair. (Bernardini-ITA).

Also heard at 1415-1445 UT on Dec 27 and Jan 08, native Burmese songs, 23422. Best in USB.

(Michele D'Amico-ITA and Patrick Cody-IRL, dswci DXW Jan 20)

NIGERIA 594 MW, Radio Nigeria Kaduna, at 2242-2258 UT on Jan 08, Hausa, African music, IDs "...Hausa Radio Nigeria Kaduna" and Qur'an recitation, 33433.

917 MW, Radio Gotel Yola, at 2131-2205 UT on Jan 08, African music and vernacular ann, from 2200 UT on in English. Only audible during musical-breaks of Radio Slovenija on 918 MW, O=1-2.

(Patrick Robic-AUT, dswci DXW Jan 20)

PAKISTAN Pakistan seems to have revived it's out of use 250 kW transmitter, and it's been heard between 0830-1105 UT on 15100 kHz the last two days, and also on 9340 kHz at 1700-1900 UT. But 11565 kHz which should be in use from 1330-1530 and 1600-1610 UT only has a unmodulated carrier today, so maybe the transmitter is still not working correctly?

(Noel R. Green-UK, wwdxc BC-DX TopNews Jan 17)

9340 noted at 1800-1900 UT with 20% modulation only, 7535 was much, much better modulated.

(wb, wwdxc BC-DX TopNews Jan 17)

Islamabad-Rawat has reactivated the 250 kW transmitter that had been off air since some time last year, although there still appears to be a problem with the modulation level at times. So these services can now be heard on two frequencies once again...

World Service to SEAsia 0045-0215 on 11580 and 15490

World Service to Gulf & ME 0500-0700 on 15100 and 17835

World Service to WeEUR 0830-1105 on 15100 and 17700 (includes English news at 1100)

Chinese service 1200-1300 on 9390 and 11510

World Service to Gulf & ME 1330-1530 on 7510 and 11565

English news to M.E. 1600-1610 on 7535 and 11565 (also listed via 15100 kHz via API-3 100 kW to EaAF)

World Service to WeEUR 1700-1900 on 7535 and 9340 kHz.  
(Noel R. Green-UK, dxld Jan 19)

PHILIPPINES 17770 Radyo Pilipinas heard at fair level on 17770 kHz at around 0230 UT on 20 Jan in English with news about the death of the Press Secretary Cerge M. Remonde. Logged at the Sunshine Coast Amateur Radio Club HQ at Bli Bli, Queensland, using an ICOM IC-718 and beam antenna, while on holiday in Australia.  
(Colin Miller-CAN VE3CMT, on holiday in AUS, wwdxc BC-DX TopNews Jan 20)

PBS FIEE Manila 0200-0330 UT  
11880 250kW 283degr  
15285 250 283  
17770 250 283

RUSSIA 6160 had a fair signal in Russian only - I assume Arkhangelsk and // 5930 kHz where Monchegorsk resides. There was no trace of CKZN.

Yakutsk 7200 and 7230 were good signals by 0830 UT with traces of 7140 kHz but mixing here with another - Pyongyang perhaps. But of Magadan there was no trace on either 7320 or 5940 kHz.  
(Noel R. Green-UK, dxld Jan 19)

15195 Meleket Ethiopia Radio via Samara-RUS site um 1600 UTC in Amharisch mit ID, Nx und HoA-Mx. 34433  
(Patrick Robic-AUT, A-DX Jan 20)

15195 Meleket Ethiopia Radio (presumed), via Samara-RUS, at 1635-1645\* UT on Wed Dec 30, talk in presumably Amharic, and folk instrumental music, 25232. The reception was disturbed by heavy noise.  
(Nobuya Kato at Luxor-EGY, dswci DXW Jan 20)

9605 Voice of Assenna, via Samara, \*1731-1758\*, Wed Dec 30 and Sat Jan 09, news and talks in Tigrinya, Horn Africa songs, music, fair to good because of fading. (Assenna seem to be the right name, see: <<http://www.assenna.com/>> ).  
(Bernardini-ITA, and Nobuya Kato at Luxor-EGY)  
Voice of Assenna scheduled here Mon/Wed/Fri, Voice of Meselna Delina on Sat! (AP Ed)

RUSSIA Yuzhno-Sakhalinsk LW/MW/SW site in Russia.

BING Maps Update: RUSSIA 2010-01 Part 1. Hi folks, The BING Maps people have just released another map update dated January 18, 2010.

1. In terms of first time high resolution we can now see the former SW site of: Yuzhno-Sakhalinsk in Russia. From the Excel files we have the coordinates as:

46 50 33 N 142 53 05 E

Many masts can still be seen. Hopefully Victor & Wolfgang can tell us more about the site & its antennas. Also if anyone can tell us the date of the last SW BCB transmission from this site, we be pleased to hear from you.

## 2. EXTRACT FROM BING MAPS BLOG

The Bing Maps imagery release for January 2010 release is SO BIG we had to break it into two parts - not kidding! The January 2010 Part 1 release is 558,000 square kilometers of imagery consisting of:

- \* Germany's Ruhrgebiet
- \* Belgium
- \* Luxembourg
- \* Vancouver - Sea to Sky Hwy to Squamish and beyond
- \* Additional imagery scattered throughout Russia, Bulgaria, Hungary, Poland, Latvia and Turkey.

If anyone finds further new imagery of SW sites or notable MW ones from this latest update please drop us a line.

(Ian Baxter-AUS, SW TXsite ng, Jan 21)

Re: Yuzhno-Sakhalinsk in Russia.

ITU Geneve registry entry is  
IUJ Iujnsakhalinsry RUS 46N55 143E10

RUS Vestochka Sakhalin 279 kHz 500 kW, looks like the LW mast scrapped at  
46 50 33.98 N 142 53 45.80 E

<<http://www.flashearth.com/?lat=46.842826&lon=142.896217&z=17.9&r=0&src=msa>>

But mediumwave mast of 972 kHz 150 kW is still visible

46 49 44.53 N 142 52 23.13 E

<<http://www.flashearth.com/?lat=46.829136&lon=142.873212&z=17.9&r=0&src=msl>>

RUS Yuzhno-Sakhalinsk 720 kHz 193degr 1.93 km length, most likely 26 ant elements, but unfortunately not visible.

Srednyaya Zarya directional mediumwave antenna towards Japan, 1200 kilometers to Tokyo-JPN, 440 kilometers to Sapporo-JPN.

46 50 20.62 N 142 53 22.10 E

<<http://www.flashearth.com/?lat=46.837944&lon=142.889439&z=15.6&r=0&src=msl>>

RUS Yuzhno-Sakhalinsk, 3 SW masts, but still dimmly on Bing Maps

46 50 12.89 N 142 52 38.54 E

<<http://www.flashearth.com/?lat=46.83656&lon=142.877081&z=17.6&r=0&src=msl>>

2 SW masts at

46 50 23.93 N 142 52 31.07 E

<<http://www.flashearth.com/?lat=46.838689&lon=142.876793&z=18.6&r=0&src=msl>>

l>

5 SW masts at

TAIWAN Kouhu - Hukou Village. Here's a new Panoramio image of a net style LOG periodic at or near the RTI Kouhu site. I didn't know RTI utilised any log periodics SW antennas at any of it's sites?? Perhaps this antenna is used by a different organisation adjacent to the RTI site?? I'm really not sure - more investigation needed.

<<http://static.panoramio.com/photos/original/27688867.jpg>>

Below is the link to the previously seen RTI MW antenna at Kouhu.

<<http://www.panoramio.com/photo/16781350>>

(Ian Baxter-AUS, SW TXsite Jan 17)

11550.58 at 1045 UT on 22 Nov. RTI, Chinese style music, rock music, Indonesian, IS, 1059 ID, SIO 252.

(Alan Pennington-UK, BrDXC-UK Communication direct and via dxld)

TUNISIA In a recent mail Glenn mentioned Tunis 7335 kHz as believed active until 0910 UT. It's actually 0810 UT, or thereabouts, as noted here today the 19th Jan.

(Noel R. Green-UK, dxld Jan 19) Noted cl-down at 0807 UT on Jan 21, wb.

TURKEY 17700 / 17690 due of bad interference from adjacent 17705 kHz channel, TRT Emirler eventually will be move 10 kHz down to 17690 kHz, German service daily at 1230-1327 UT.

17705 kHz is object of heavy radio jamming from probably Hainan Island, China mainland. China jams their neighbour AIR Bangalore transmission in Mandarin language heavily til 1315 UT, signal of jamming about S=7-8 in southern Germany.

AIR Bangalore with 500 kW at 58 degrees on 17705 kHz at 1130-1315 UT to zones 43,44. But latter seldom heard here in Europe due of co-channel jamming from China.

Eventuell neue Frequenz bei TRT moeglich.

Liebe Mitglieder und Freunde des RTI Hoererklubs Ottenau, auf Grund zahlreicher Rueckmeldungen ueber die Empfangsprobleme mehrerer Hoerer der Stimme der Tuerkei bei der Mittagssendung von 1230-1330 UTC auf 17700 kHz wird ein Frequenzwechsel erwogen.

Aus diesem Grund bitten Ufuk und ich Euch, bis zum Montag 25. Januar zu dieser Sendezeit die Frequenz 17690 kHz zu beobachten und die Empfangsergebnisse der deutschen Redaktion an die obige in der Kopiezeile stehende Adresse mitzuteilen.

(Bernd Seiser-D, A-DX Jan 19)

Re: neue Frequenz bei TRT moeglich. Heute habe ich nochmals die TRT Emirler in Deutsch auf 17700 kHz eingeschaltet. Signal ab circa 1228 UTC mit TRT Pausensignal und Identifikation mit starkem S=9+30dB Signal hier in Stuttgart.

Zu dem erwogenen Frequenzwechsel von 17700 nach 17690 kHz:

Das macht Sinn fuer die deutschsprachigen Hoerer mit billigeren Empfangs-Geraeten, die eine 5 kHz abseitige Interferenz des Nachbarkanals nicht ausblenden koennen. Bernd und Paul sollten den Tuerken gruenes Licht wegen eines Wechsels nach 17690 kHz signalisieren.

Tatsaechlich, leichte Fruehjahrsbedingungen ergeben auch eine Ausbreitung des chinesischen Jammers von 17705 kHz hier nach Europa, wenn auch mit Mehrwegeausbreitung.

Die Chinesen stoeren seit 8 Jahren auch den Nachbarn AIR Bangalore mit dessen Mandarin Programm bis 1315 UT auf 17705 kHz, der Jammer war heute hier mit S=7-8 aufzunehmen. Die Senderichtung des Jammers duerfte von Hainan Island straight Nord sein und hier in Europa ist nur ein Restsignal empfangbar.

Zum TRT Programm: die Ansagerin verhaspelte sich heute fuer mein Gefuehl zu oft, obwohl sie vom Eindruck her Deutsch fliessend spricht.

Dann fiel mir noch - in Teilen - eine kratzige Modulation auf, diese koennte von einer zu hohen Aussteuerung der Spitzen herruehren, die auch ein kurzzeitiges Herunterfahren des Senders ausloest. Direkte Programmunterbrechungen notierte ich heute nicht.

Trotzdem wuerde ich TRT einen Wechsel ins 19 oder 22 mb eher anraten, um auch oesterreichische Hoerer stabil zu versorgen !

(wb, wwdxc BC-DX TopNews Jan 22)

UAE 9840 Sudan Radio Service, via Dhabbaya, at 1735-1759\* UT on Fri Dec 31, news in English including interpretation of recorded talk, ID at 1747 UT "...news from Sudan Radio Service..." and at 1748 UT "You are tuned to Sudan Radio Service", news headlines, an interview, closing annmt with contact (e-mail address) information. 45444 with stable reception condition.

(Nobuya Kato in Cairo-EGY, dswci DXW Jan 20)

UNITED KINGDOM [to SIERRA LEONE] 11875 Cotton Tree News Radio, via Rampisham 250 kW 189degrees, at \*0730-0800\* UT on Dec 28, signed on during talk in English with African dialect, recorded talk, 34443.

was updated on Jan 03 with the December loggings as an extra service to their purchase. Any DX-er can download the complete monitoring view at <<http://www.dswci.org/tbm>> of stations heard broadcasting on tropical bands during 2005, 2006, 2007 and 2008. (Ed) (dswci DXW Jan 20)

#####

DXpedition to French Creek.

Rich D'Angelo reports on the Second French Creek DXpedition of this

season:

We started the New Year with a DXpedition to French Creek which was our second outing of the DX season. It was cold but fortunately dry in January. Kris Field and Bob Montgomery were comfortably listening to the bands inside the warm cabin I unloaded my gear, set-up my antenna and joined them. Shortly thereafter John Figliozzi and Ed Mauger arrived. Finally, Rich Cuff arrived - a day tripper for this outing. This was the first time in many moons we had six for a DXpedition.

Africa, Pacific and Asian reception was good for the most part. Latin America was very quick reflecting the low A Index values. While Papua New Guinea and Indonesia were heard, most of the Indian regional outlets were quiet this time around which was a major disappointment. Highlights included Radio Oromiya on 6030 kHz at armchair level, Candela FM on 6105 kHz, Solomon Islands with BBC World Service program on 5020 kHz with splatter from Rebelde, several different Thailand logs plus finding a suitable home for a cute little stray black and white cat that was left in the park by its former sub-human owner.

3250 HONDURAS Radio Luz y Vida, \*1132-1144 Jan 11, caught man announcer with opening announcements in Spanish with long sign on routine featuring several IDs. Group vocals from 1139. Poor to fair.  
(D'Angelo/FCDX-PA)

3260 PAPUA NEW GUINEA (New Guinea Territory), Radio Madang, 1138-1225 Jan 12, group vocals hosted by a man announcer. Man announcer with greetings to listeners at 1218, taking phone calls and providing contact number. Poor to fair.  
(D'Angelo/FCDX-PA)

3290 PAPUA NEW GUINEA (Papua Territory), Radio Central, 1115-1215 Jan 12, program of island music hosted by a woman announcer with Pidgin talks. News at 1200 followed by a man with canned ID and announcements in English at 1206. Also, caught woman announcer mentioning website but heard only "www dot" portion. Poor to fair.  
(D'Angelo/FCDX-PA)

3310 BOLIVIA, Radio Mosoj Chaski, 1007-1028 Jan 12, woman announcer talking in presumed Aymara language. Some rustic vocals and talks by a man. Nice ID over flute music at 1021 as well as some other announcements. Poor to fair.  
(D'Angelo/FCDX-PA)

3325 INDONESIA (Kalimantan), RRI Palangkaraya, 2203-2231 Jan 11, Jakarta news with a man announcer. End of news at 2210 into local program hosted by another man announcer. Series of female vocals until 2229 when a brief instrumental selection, time pips and talk by the man announcer. Weak with deep fades.  
(D'Angelo/FCDX-PA)

3385 PAPUA NEW GUINEA (New Britain Island), Radio East New Britain, 1203-1304 Jan 11, woman in Pidgin hosting island music program which turned into pop music program at 1230. Several ads for a Coca-Cola contest in English. Fair.  
(D'Angelo/FCDX-PA)

4747 PERU, Radio Huanta 2000, 2340-0005 Jan 11, man announcer with Spanish talks, ID and announcements hosting rustic music program. Poor.  
(D'Angelo/FCDX-PA)

4750 INDONESIA (Sulawesi), RRI Makassar, 2157-2204 Jan 10, man announcer with talk in Indonesia followed by Song of the Coconut Islands at 2159 and Jakarta news at 2200 with a man announcer. Poor. 2150-2203 Jan 11, music program hosted by a female announcer until local ID, SCI and Jakarta news. Poor.  
(D'Angelo/FCDX-PA)

4955 PERU, Radio Cultural Amauta, 2325-2351 Jan 16, man with Spanish talk followed by a woman at 2332 with ID and several announcements. OA vocals before TC at 2338 and more talk. Poor.  
(D'Angelo-PA)

5010 MADAGASCAR, Radio Madagasikara, 0252-0316 Jan 11, tuned in to catch group singing prior to IS followed by choral National Anthem at 0255. A man and woman opened program with station ID and frequency announcements. There was a segment of smooth jazz followed by more talk in Malagasy and a couple of local music selection. A discussion by a man and woman commenced at 0311. Very good signal tonight.  
(D'Angelo/FCDX-PA)

5020 SOLOMON ISLANDS, Solomon Islands Broadcasting Corporation, 1250-1304 Jan 11, noted with BBC World Service programming // 9740 Singapore. Poor and squeezed by Radio Rebelde. Nothing noted from SIBC the following morning.  
(D'Angelo/FCDX-PA)

6030 ETHIOPIA, Radio Oromiya, 0401-0430 Jan 11, tuned in to a man and woman hosting the news in the Oromo language after Marti jammer clears channel. News ended at 0413 with several IDs and announcements. Music programming from 0418. This is one of my favorites these days. Very good signal.  
(D'Angelo/FCDX-PA)

6055 RWANDA, Radio Rwanda, 2044-2101\* Jan 11, man announcer with long talk in French. Played Bobby Vinton's "Roses Are Red" at 2053. Man returned with more talk until sudden carrier termination in mid-sentence. Good signal with some co-channel QRM.  
(D'Angelo/FCDX-PA)

6105 MEXICO, XEQM - Candela, 0720-0740 Jan 11, Latin vocal tunes with IDs between each selection. Fair.  
(D'Angelo/FCDX-PA)

6890 ETHIOPIA, Fana Radio, 2052-2059\* Jan 10, man with Horn of Africa vocals followed by a man announcer with Amharic talk prior to closedown ID. Another musical selection before carrier cut. Fair.  
(D'Angelo/FCDX-PA)

7125 GUINEA, Radio Guinee, 1920-2008 Jan 11, non-stop highlife vocals, man announcer with ID at 1932 and French talk. ID and news at 2000 followed by another ID at end of news. Fair to good.  
(D'Angelo/FCDX-PA)

7175 ERITREA, Voice of the Broad Masses of Eritrea - Program 2, 1955-2100\*  
Jan 11, Horn of Africa music, ID and closedown by a man announcer into  
rustic choral National Anthem. Fair.  
(D'Angelo/FCDX-PA)

7210 ERITREA, Voice of the Broad Masses of Eritrea - Program 1, 1954-2001\*  
Jan 11, pop music selection, "Only You" followed by a man announcer with  
ID and close down announcement. Rustic choral National Anthem. Poor to  
fair.  
(D'Angelo/FCDX-PA)

7250 BANGLADESH, Bangladesh Betar, \*1227-1235 Jan 11, open carrier noted  
with test tones intermittent from 1229 but no voice noted today.  
Reasonably strong carrier but no programming noted.

#####

Der Elektor Verlag hat heute ein neues Buch zum Thema Funkempfaenger  
angekueundigt. Es stammt von Ralf Rudersdorfer, OE3RAA, der sich in den  
letzten Jahren einen guten Namen in der "Szene" gemacht hat.

Hier der Presstext:

Funkempfaengerkompodium.

Wollten Sie schon immer wissen, wie sich die klassische  
Funkempfaengertechnik fortentwickelt hat? Wie funktionieren professionelle  
Funkempfaenger heute und was koennen sie leisten? Wie ist es der modernen  
Funkueberwachung und den Nachrichtendiensten moeglich, gleich ganze  
Frequenzbaender in kuerzester Zeit auszuforschen? Welche Empfangssysteme  
und Techniken stehen heute zur Verfuegung? Moechten Sie auch ausgefallene  
Anwendungen von Empfaengern kennenlernen und wissen, wie ein Software  
Defined Radio (Digitalempfaenger) nun wirklich funktioniert und was der  
letzte Stand der entsprechenden Technik kann?

Wodurch unterscheiden sich Kreuzmodulation und Intermodulation und worauf  
ist bei der messtechnischen Bestimmung und Datenblattvergleichen unbedingt  
zu achten? Warum folgen Intermodulationsprodukte nicht immer den  
Darstellungen von Lehrbuechern? Welche Auswirkungen haben derartige  
Kenngroessen tatsaechlich auf die Empfangspraxis und warum kommt es nicht  
nur auf den IP3 an? Wie haengt beispielsweise die Grenzemfindlichkeit mit  
der Empfangsbandbreite zusammen? Was unterscheidet einen  
Signal/Rauschabstand nach der Beurteilung durch SINAD und (S+N)/N? Wie ist  
ein Empfangssystem zur Aufnahme kleinster Signalpegel zu optimieren?

Fragen ueber Fragen - im vorliegenden Buch findet man die Antworten!  
Ausfuehrlich und mit Details. Mit vielen extra dafuer erdachten  
Zeichnungen zur visuellen Erlaeuterung der Zusammenhaenge. Mit  
durchgerechneten Fallbeispielen und dem stetigen Bezug zur Empfangspraxis.  
Grosser Wert wurde bei den Darstellungen auf einheitliche  
Betrachtungsweise und durchgehende Systematik gelegt. Das erhoeht die  
Uebersichtlichkeit und erleichtert den Vergleich einzelner Vorgaenge,  
Konzepte und Anlagen. Um den tatsaechlichen Stand der Technik gut zu

erfassen, wurden dutzende Patentschriften recherchiert und die Industrie mit eingebunden. Durch das sorgfaeltig aufbereitete Stichwortverzeichnis mit ueber 1100 Eintraegen lassen sich die entsprechenden Stellen mit den Erklaerungen rasch und punktgenau auffinden.

Auch ueber die Thematik von Funkempaengern hinaus, wird beim Studium der Lektuere vieles klar! Denn auch Messgeraete der Hochfrequenztechnik funktionieren vielmals nach aehnlichen Prinzipien. Wer den Inhalt durcharbeitet, kann wichtige Eigenschaften verstehen, beispielsweise von Spektrumanalysatoren und bei der Arbeit damit professionell umgehen.

Naehere Informationen auch direkt beim Verlag:

<<http://www.elektor.de/products/books/hf/funkempfangerkompodium.1166542.1ynkx>>

Sicher ein gutes Fachbuch fuer alle die tiefer in die Materie der aktuellen Empfangstechnik einsteigen wollen, daher biete ich das Buch auch ueber

<<http://www.ratzer.at>> zum Kauf bei Amazon an. Mit jedem Kauf ueber ratzer.at wird wie bekannt A-DX und NET-Radio durch einen kleinen Werbekostenbeitrag von Amazon unterstuetzt, das Buch kostet natuerlich deswegen nicht mehr! Meines habe ich schon bestellt ;-)

ALBANIA 13640 R. Tirana, VG S9+12 signal for English to NoAM at 1530 UT on Jan 30: going from talk to music segment at 1543 UT, and no problem from doomed Darwin transmission of CVC whose carrier was barely detectable on 13635 kHz; see AUSTRALIA. 1553 UT the music outro sounded like "Dance with Me", then another folk song with ululations, 1557 UT outro that as "Folk edition musical program", closing theme to 1558 UT, IS until 1600 UT and open carrier until 1601\* UT. Altho modulation level was good, modulation quality was as usual deficient, especially during the music. (Glenn Hauser-OK-USA, dxld Jan 30)

The quarter hour of Radio Tirana in English at 1945-1958 UT on 11635 kHz to North America surprisingly strong and excellent audio quality by the tube of the 2nd TX at Shijak, S=9+30dB superb, but on // 7465 kHz channel much poorer. (wb, wwdxc BC-DX TopNews Jan 30)

ARGENTINA 15344.87 RAE Buenos Aires in German at 1707 UT on Jan 28th.

Mail from RAE German service, of Jan 22: RAE Buenos Aires technicians have got the new transmitter TUBE and repaired the 11710v/15345v kHz unit. Station is again on air from yesterday Fri Jan 22. (wb, wwdxc BC-DX TopNews Jan 22/28)

15344.89...88 kHz by RAE Buenos Aires more than fair S=8 level signal, on weekends in usual Spanish section at 1930 UT.  
(wb, wwdxc BC-DX TopNews Jan 30)

15344.951v RAE Buenos Aires, Spanish, at 2108 UT Jan 23, news and current affairs program (sounded like it was a Radio Nacional relay). Looks like they have repaired the old transmitter (presumably, a new transmitter would be exactly on freq). Hard to pinpoint exact frequency as the transmitter "warbled" a bit. Still though, happy to have it back as this is the most reliable RAE freq for me.  
(David Sharp-NSW-AUS, dxld Jan 23)

11710.78 RAE, at 0015-0110+ UT on Jan 30, tune-in to Portuguese programming with talk and Argentine music. IS/ID sequence at 0056 UT. Spanish ID announcements at 0100 UT and local music. Japanese talk at 0108 UT. Fair to good.  
(Brian Alexander-PA-USA, DXplorer Jan 30)

11710 & 15345 RAE, Radiodifusion Argentina al Exterior is again active on the SW freq's from 22 January 2010. The station have been reported by Gleen Hauser on same Jan 22, and its reports are corrects, this confirmed today by the Director of RAE through a personal email to me. The tube have been buy in USA and is in use now, with the General Electric transmitter. The station have been inactive from Oct 27th, 2009.  
(Gabriel Ivan Barrera-ARG, playdx yg via dxld Jan 26)

AUSTRALIA [and non] Hi Andrew, Have been getting reports that CVC will be closing down Darwin at the end of January. Does this mean the entire site will be dark, permanently, or will CVC just no longer be involved??

There have also been reports that CVC will be ceasing ALL shortwave broadcasting. Please confirm or explain. Are any other sites you use going out of service on the same date or soon, and if so, which ones, which languages and services?  
(Glenn Hauser-USA, WoR, to Andrew Flynn-CVC-UK, via dxld)

Indeed, the Darwin site is ending transmissions on 31st January, and being dismantled[!] ahead of CVC's lease expiry in June [! 2010, wb].

It is untrue that CVC is ending ALL shortwave broadcasting - Santiago and Lusaka still serve viable targets in Latin America and Africa, and The Voice Asia, which we broadcast from Tashkent, generates tens of thousands of responses every month.

However, as I have said before, when you combine changing patterns of media consumption with a tough financial climate, it's necessary to examine where funds will make the most impact. Christian Vision is committed to introducing people to Jesus and see Him touch and change their lives - and since we consider the message to be superior to the means or medium we won't be precious about being narrowly defined, like 'we are a shortwave broadcaster' for example.

This is clearly a time of transition and nobody quite knows how it will pan out as target demographics, media access, habits and trends are non-homogenous. Radio is still an important part of the mix, especially for those who cannot access new media (I will be speaking on this at Radio

Asia in February), and it does things that other media can't do; but a generation of a billion (and increasing) 'connected' mostly-young people has emerged for whom radio has little or no relevance. This presents a huge opportunity which we cannot ignore.

Kind regards

(Andrew Flynn-UK, Dir International Broadcasting Christian Vision, The Pavilion Manor Drive, Coleshill, West Midlands B46 1DL UK Jan 26, WoR dxld Jan 26)

Andrew, Thanks for explaining. I wonder if you could also give me some ideas about this:

Whose decision was it to dismantle the Darwin facility rather than repurpose it? One would have thought that Radio Australia would be glad to have it back for its own full use. Since CVC was leasing it, whose property is it now, on the air or not?

Are some of the transmitters, antennas destined for other sites?

Do you plan to mark the final transmission(s) in any particular way, special programming or announcements, and if so, exactly when; specially endorsed QSLs?

(Glenn Hauser to Andrew Flynn-UK, Jan 26, via WoR dxld)

The Cox Peninsula "Darwin" transmitter site is closing down as of January 31, and to be dismantled[in June 2010, wb.]. CVC has not told us exactly when the last transmission will go on air, or whether any of the existing transmissions of its own or relays of R. Australia, and JCI (Japanese clandestines to North Korea) will have stopped earlier, but based on Aoki list, here is the full schedule we have been able to put together for all Darwin transmissions, in station, language, and then time order:

9585 2200-2300 340 CVC Chinese  
15170 2300-0200 340 CVC Chinese  
17690 0400-0600 340 CVC Chinese  
17635 0600-1200 340 CVC Chinese  
13685 1200-1800 340 CVC Chinese

15535 0930-1230 303 CVC English  
13635 1230-1830 303 CVC English

15250 2300-0200 290 CVC Indonesian  
17820 0400-1000 290 CVC Indonesian  
9890 1000-1300 290 CVC Indonesian  
11925 1300-1700 290 CVC Indonesian

11825 1300-1430 340 RA Chinese

12010 2200-2400 317 RA English [except Burmese 2300-2330]  
17665 0000-0200 317 RA English [except Burmese 0100-0130]  
11980 1600-1700 317 RA English

9630 2200-2330 290 RA Indonesian  
15180 0000-0030 290 RA Indonesian  
0400-0430 290 RA Indonesian  
0500-0530 290 RA Indonesian

9880 1430-1530 3 JCI Japanese - Furusato no Kaze alt 11995

9690 1500-1530 3 JCI Korean - Nippon no Kaze alt 11650

17755 0700-0800 317 TDP English DRM 17750-17760

Altho WRTH says Darwin has 2 x 100 kW, 3 x 250 kW, and 1 x 300 kW transmitters, all these are listed as 250, except for a semi-250 for DRM.

This should be useful in monitoring which transmissions are still going or end as of UT January 30, 31, or even February 1; and attempting to get a historically-dated QSL.

(Glenn Hauser-OK-USA, dxld Jan 29)

AUSTRIA/GERMANY Persian transmission of TWR Europe ceased Jan 1st?

7430 Moosbrunn and 5965 Wertachtal at 1729-1759 UT left. I asked

Dr. Hansjoerg Biener to find out the reason for.

(wb, wwdxc BC-DX TopNews Jan 26)

Vienna MW Transmitter To Bi Demolished.

The complete antenna array of the Wien-Bisamberg mediumwave site will be demolished at the end of February. So far it is not known what will happen with the grounds. The transmitter building is under preservation order.

<<http://wien.orf.at/stories/417899/>>

Transmissions from this site, on 1476 kHz, ceased on 31 Dec 2008 at 2310 UT. At this point it was planned to blow up only the 265 m tall "Nordmast"

(northern mast), once used for the 585 kHz outlet that is silent for almost two decades now. The 120 m "Suedmast" for 1476 kHz was supposed to be kept, and Oesterreichische Rundfunksender GmbH told ADXB-OE that the frequency would still be available for interested broadcasters. But now they dump this option definitely.

Some photos of the antenna array:

<<http://www.wabweb.net/radio/sender/bisamberg2005.htm>>

More photos, also of the old tube transmitters, with a link to an even larger photo collection that includes also a shot of the Thomson M2W transmitter that had been used during the last years of operation:

<<http://radiomuseum.heim.at/index-Dateien/Page541.htm>>

This development makes the Moosbrunn site the only operational AM transmission facility in Austria.

[AM in the German meaning, technically correct covering all amplitude-modulated broadcasting, also dubbed "LMK" /LW/MW/SW.]

(Kai Ludwig-D, dxld Jan 25)

What's about the ORF Dornbirn Lauterach Vorarlberg TX site, formerly on 629 / 1125 [later 585/1026] kHz MW ? Remains only on FM and local TV only?

<<http://en.wikipedia.org/wiki/Lauterach>>

The Lauterach Transmitter is a 116 m tall broadcasting facility.

<[http://en.wikipedia.org/wiki/Lauterach\\_Transmitter](http://en.wikipedia.org/wiki/Lauterach_Transmitter)>

Lauterach Transmitter is a broadcasting facility in Lauterach, Austria, located at 47 26 55 N 09 42 10 E / 47.44861 N 09.70278 E

mast at 47 26 55.09 N 09 42 06.94 E

<[http://maps.google.de/maps?f=q&source=s\\_q&hl=de&geocode=&q=47+26+55.09+N++09+42+06.94+E&ll=51.151786,10.415039&sspn=20.585961,56.469727&ie=UTF8&ll=47.448539,9.701883&spn=0.001351,0.003447&t=h&z=19](http://maps.google.de/maps?f=q&source=s_q&hl=de&geocode=&q=47+26+55.09+N++09+42+06.94+E&ll=51.151786,10.415039&sspn=20.585961,56.469727&ie=UTF8&ll=47.448539,9.701883&spn=0.001351,0.003447&t=h&z=19)>

It is used for FM and TV broadcasting, and until 1995 also for medium-wave broadcasting. It was inaugurated in 1934 and uses as antenna mast a 116 metre tall guyed mast, which is insulated against ground.

(subsection DORNBIRN) in Radiogeschichte Oesterreichs

<[http://members.aon.at/wabweb/radio\\_a/radio\\_a3.htm](http://members.aon.at/wabweb/radio_a/radio_a3.htm)>

<[http://www.geoflags.de/Monument\\_Gebaeude\\_Statue/Hinterburg\\_Lauterach\\_Transmitter\\_30210](http://www.geoflags.de/Monument_Gebaeude_Statue/Hinterburg_Lauterach_Transmitter_30210)>

<[http://de.wikipedia.org/wiki/Lauterach\\_\(Vorarlberg\)](http://de.wikipedia.org/wiki/Lauterach_(Vorarlberg))>

Medien - In Lauterach betreibt der ORF eine Sendeanlage fuer UKW und TV. Bis zum 1. Januar 1995 wurde von dieser Anlage auch das erste Programm des ORFs auf der Mittelwellenfrequenz 1026 kHz verbreitet. Als Antennenmast wird ein 116 Meter hoher, gegen Erde isolierter Stahlfachwerkmast verwendet. Der Sender wurde von den Franzoesischen Truppen nach dem Zweiten Weltkrieg erbaut.

(Wikipedia)

BRAZIL 9694.926 Radio Rio Mar, Portuguese, at 2038 UT Jan 22, per

Goncalves tip, noted all alone on freq but threshold with local music.  
First time I've heard this.

9819.350 Radio 9 de Julio, Portuguese, tentative, noted as het against  
9820 kHz even. Very weak with occasional audio (talk by a man) poking  
through. [Time?] Jan. 23.  
(David Sharp-NSW-AUS, dxld Jan 23)

CANADA Site Photos Of The CHU Time Station, Ottawa, Canada.

Hi, all you Shortwave sites enthusiasts! Living in Western Canada, I was  
quite surprised that there is not any picture of the transmitter site of  
the CHU Time Station in Ottawa on the Internet. So I decided to bother my  
cousin, who lives there, to take some photos of the site. The first takes  
were taken last fall and appeared to be very blurry. Finally, I got these  
good ones and I'm happy to share them with the people of our group.

<<http://s307.photobucket.com/albums/nn314/sixsixii/Antenas/?action=view&current=CHUOttawaCanadaTimeStLefttoright785.jpg>>

In the photo above you can see the 7850(now), 3330 and 14670 kHz masts  
from the left to the right accordingly.

<<http://s307.photobucket.com/albums/nn314/sixsixii/Antenas/?action=view&current=CHUOttawaCanadaTimeSt7850kHzantenna.jpg>>

Time: 1900-1932 UT (could not take the music any longer. Was about to  
go postal. LOL), Date: Jan 22, 2010 Frequency:

17755 kHz DRM transmission via Montsinery, French Guiana Program ID: Disco  
type music. Male, in English "The best trans and dance. TDP Radio". Slight  
dropouts.

I have to admit, the audio sounds very good. Too bad DRM has taken so long  
to catch on. Just think what could have happened to SW if DRM was  
available to the masses sooner!

INDIA 6100drm BES Expo 2010 on the rolls at Pragati Maidan. AIR DRM  
heard from 0330 UTC on 6100 kHz. Must be meant for this expo?  
(Jose Jacob-IND VU2JOS, DXindia Jan 30)

Test for BES Expo 2010. 0330-1200 UTC for 3 days ... 29-31 Jan 2010,  
multichannel DRM broadcast. 1st channel carrying VBS & 2nd channel  
news/commentary on single freq 6100 kHz. Another innovation from AIR  
Research & Development.

BES Expo 2010 on the rolls at Pragati Maidan January 29, 2010.  
16th International Conference & Exhibition on Terrestrial & Satellite  
Broadcasting started here at Pragati Maidan, New Delhi on Friday 29th of

January 2010. The Expo bannered under Broadcast Engineering Society (India), this time carries the theme of 'Broadcasters & New Media Technologies' and will focus on the expanding opportunities in the following domain. This 3 day exhibition being India's biggest Broadcasting Technology show will continue till 31st of this month.

The exhibition was inaugurated by Ms. Ambika Soni, Minister of Information and Broadcasting India as a Chief Guest. Whereas other respected guests were B.S. Lalli, CEO Prasar Bharati, Uday Varma, Special Secretary (I&B).

Director of Asia Pacific Broadcasting Union (ABU), Mr. Sharad Sadhu delivered his lecture concentrating on different issues of broadcasting as the keynote speaker of the programme.

In a quote, R.R. Prasad, President BES said, "Digital is taking over from the conventional broadcasting operation. Analogue, Tape-based, Hardware dominated work flow is being replaced by digital, file-based & software dominated work flow."

Whereas in her addression, Ms. Soni stated, "I am very glad to see the largest society of Broadcast Professionals i.e. BES is keeping with the opportunity to organize a conference cum exhibition at such grand scale so that the people mutually benefit. The competition is gradually increasing but at the same time ensuring healthy growth of technology eventually benefiting the consumers."

She also mentioned about the challenges being faced by the Broadcasting industry in India. Phase III policy for FM, HITS, Community Radio and how the upcoming Commonwealth Games in India would change the Broadcasting scenario were among some topics she emphasized while her speech.

BES is organizing this EXPO with a purpose of providing a perfect platform to all media professionals, dealers, manufacturers, suppliers, distributors and all the organizations related to this domain. This EXPO will include display of technology and equipment related to broadcasting arena such as Production & Post Production, Satellite & Microwave, Multimedia, Networking, Cable, Broadband, DTH, HDTV, IPTV, DRM, DRM+, Internet TV and Transmission etc.

Total 78 exhibitors from India and abroad are participating in the event. Some major players from the long list include SONY, Prasar Bharati, Prime Focus, Playbox Technology, Harris Broadcast, Qualcomm India, Schaf Broadcast, Sennheiser India, RSG Infotech Pvt. Ltd. WASP 3D and many others.

Around 4000 Individuals and companies related TV and Radio industry from countries such as Canada, India, Australia, Austria, Finland, France, China, Germany, Hong Kong, Israel, U.K, U.S.A, Norway, Netherlands and many more are expected to visit this EXPO.

Halls no. 8 & 9 of Pragati Maidan are holding the arrangements of this exhibition and several lectures, seminars and conferences will be conducted during the span of following three days.

2000-2100 6260 KCH 300 kW 309 deg via TRW=TV Radio Waves  
[KCH=Grigoriopol]  
2000-2100 7240 DHA 250 kW 315 deg via VTC=VT Communications  
(R BULGARIA DX MIX News, Ivo Ivanov, via wwdxc BC-DX TopNews Jan 25)

MOLDOVA 15670 Radio Mada International via Grigoriopol Maiac Moldova  
[Pridnestrovye] at \*1530-1600\* UT on Jan 30. I finally remembered to check  
again for this on the weekend. Yes, they are still here with fair  
reception; sounded like Malagasy; interview in studio; segment with  
interviews with a lot of background noise from a large crowd; 1555 UT  
played nice African ballad till suddenly off with no announcement; fair.  
300 kW at 160 degrees.  
(Ron Howard-CA-USA, dxld Jan 30)

No curtain antenna available towards Africa at Grigoriopol Maiac. Most  
probably the revolving antenna at  
47 15 48.82 N 29 24 01.08 E in use.

<[http://maps.google.de/maps?f=q&source=s\\_q&hl=de&geocode=&q=47+15+48.82+N++29+24+01.08+E&sll=51.151786,10.415039&sspn=20.808164,57.084961&ie=UTF8&ll=47.263561,29.4003&spn=0.002741,0.006968&t=h&z=18](http://maps.google.de/maps?f=q&source=s_q&hl=de&geocode=&q=47+15+48.82+N++29+24+01.08+E&sll=51.151786,10.415039&sspn=20.808164,57.084961&ie=UTF8&ll=47.263561,29.4003&spn=0.002741,0.006968&t=h&z=18)>

NIGERIA 15120 ... 15119.99 strong at S=9+10dB level at 1935 UT.  
Modulation amplitude for music segment was too high. But talk audio from  
studio was superb "clean" tonight. Music selection from West Africa sound  
was excellent.  
(wb, wwdxc BC-DX TopNews Jan 30)

PAKISTAN The Frequency manager of Radio Pakistan informs me that they  
will once again broadcast in Nepali, Sinhala and Tamil from February 1st.  
The existing schedule between 0900 and 1330 UT via API-3 & 4 will be  
replaced with:

0900-1000 Bangla  
1000-1030 Nepali  
1045-1145 Hindi  
1145-1215 Gujrati

The proposal is to use 11580 and 9345 kHz for all of these, but I informed  
him that both frequencies would probably receive co-ch interference. So  
the final choice is not yet known.

At 1230-1300 UT Sinhali and 1300-1330 UT Tamil is listed for 11580 kHz  
(this may be changed) and 15630 kHz.

Their services in Pashtu and Dari are scheduled from 1300 UT on one - or  
maybe both - of these transmitters, so it is possible that these services  
will start at 1345 UT instead via 6235 kHz. I have no positive information  
about this.

WTWW, Lebanon TN: owner/operator/engineer George McClintock

Contact: George McClintock LEAP OF FAITH, INC 6611 ORMOND DRIVE,

NASHVILLE, TN 37205 USA

(Dario Monferini-ITA, playdx yg via dxld Jan 27)

Re: Haven't heard WTWW testing the last few days on 9480 or 5755, so I asked George McClintock how things are going. He says a long test period is scheduled for Saturday Jan 23, times here changed to UT:

1600-1900 9480 1900-2200 9475

2200-2400 9480 0000-0400 5755 [UT Sunday]

"All this assumes that we have no problems. This will be a test to see how the transmitter and other equipment hold up with extended transmission time."

[later] And it's on and running! Huge S=9+25 signal here with classic rock 'n' roll music at 1608 UT Jan 23. Initially steady, but then with slow selective fading the only thing marring the music. Frequent IDs by Ted Randall, asking for reports to

<tedrandall @ tedrandall.com>

(Glenn Hauser-OK-USA, dxld Jan 27)

WTWW heard with weak but clear signal here in the UK from tune-in at 1830 UT on 9480 with oldies and frequent "equipment tests" announcements. First time I've heard it here.

(Dave Kenny-UK, dxld Jan 23)

9480 WTWW (Lebanon, TN), 1844-1900, Jan 23, English. 1960s pop music. Canned announcement by Ted Randall with identification "You're listening to WTWW, Lebanon, TN, performing equipment tests". Requested reception reports to <tedrandall @ tedrandall.com>

Good signal with some fading. Signal strength decreased by about 50% at 1859, and test on 9480 ended at 1900. Test continued on 9475 with same (weaker) signal.

(Jim Evans-TN-USA, dxld Jan 27)

Now, at 0253 UT of Jan 24 on 5755 kHz WTWW comes with good signal playing their wonderful rocks, 44444, incredible quality of the received signal.

(Jorge Freitas-BRA, dxld Jan 27)

No idea, Tim. But without insulting anyone else's listening preferences, I hope it doesn't turn out to be another religious/ radical politics format.

I think we could do with a little more variety from domestic SW.

(John KC2BPU Figliozzi, NY, ibid.)

I believe it will be a lot like WWCN and KAIJ - mostly religion, plus far-right politix. That's where the business is. If we are lucky, there will be some time left over for DX programs to fill in. Enjoy the oldies while you can (could).

(Glenn Hauser-USA, dxld Jan 27)

(via Wolfgang Bueschel, dxld Jan 24)

Last night from 20:43 to 21:00 Guatemalan time (0243-0300 UT) I was performing a scanning and found on 5755 kHz a very good signal that I thought was KAIJ coming back to air. Interestingly this station was broadcasting Rock and Roll Oldies and to my surprise its ID was as follows: "Coming to you from the banks of the upper ???? River in middle Tennessee, this is WTWW, Lebanon, Tennessee, USA, performing equipment tests".

As soon as possible, I made an electronic search and found the following links in YouTube:

<<http://www.youtube.com/watch?v=xIRnAh1txK8>>

<<http://www.youtube.com/watch?v=43q5qMTP9jE&feature=related>>

<<http://www.youtube.com/watch?v=OhCM8R8bx8Q&feature=related>>

One of this videos, show other frequency: 9480 kHz that I am going to try

tonight.

Sunday 31st January Arsenal v Man Utd 1600

(WRN Jan 3, via dxld)

Still 6230 via Tashkent, UZBEKISTAN. Evidently the commentaries in English via Ukraine to Scandinavia have ended. (gh, Jan 3, ibid.)

6230 kHz 100kW 90 degr 1245-1900 in Mandarin Chinese to 43,44 zones.

No: Further match in English on 5800 kHz [Nikolayev-Mykolajiw-UKR].

Wednesday 6th January, Kick Off: 1945 - Arsenal v Bolton Wanderers. Off

Air: 2145 UT.

(WRN Jan 4, via dxld)

Nothing heard in Germany of WRN 6230 kHz Liverpool v Bolton English football live commentaries in Chinese via Tashkent Uzbekistan, on 1530 UT Jan 30. Rather data signal of G2D/G7D CODAR format interferes ?

ITU Monitoring List shows Quimper - Brest in France location, due of cross finding by monitorings in Klagenfurt Austria, El Casar in Spain, and Baldock in U.K.

VANUATU/LIBERIA 3945 / 4025 From: "Jamie La Badia"

Dear Sir, I am a Shortwave Broadcast Engineer, and would like to know if a station I designed is being heard here in the U.S. The station is RADIO VANUATU, on 3945 kHz. I finished building the transmitters and antenna systems around the middle of July, 2009.

They are running half power, (5000 watts) temporarily until I get back for the finishing touches this weekend. I will be updating some portions of the equipment, and adding a second frequency. Either 5055 kHz or 7260 kHz, depending on the testing. I am leaving for Vanuatu on Sunday, the 31st. I should be testing the 5055 kHz frequency by the 2nd week in Feb.

Here is a little tech info about the system. It's a Solid State, broadband operating in Class E. Modulation is Pulse Width. The 3945 antenna is a 180 foot long fan dipole, around 60 feet high. The 5055 antenna is about 90 feet long, and up about 45 feet.

I have also just finished a 2500 Watt transmitter for Liberia on 4025 kHz, but won't be putting them on for a month or so. I just want to add that this web site is fantastic, and will be joining when I get back. I need feedback from listeners, as I am not able to put antennas up where I live currently. I build about 15 stations a year, and would love feedback on how they are being heard. Thanx, JAMIE

(Ralph Brandi-NJ-USA, DXplorer Jan 28)

VIETNAM 1242 Voice of Vietnam announced in the Letterbox programme that they have ceased using 1242 kHz due to lack of feedback from listeners.  
(Edwin Southwell-UK, WDXC-UK Contact Jan 27)

#####

QSL's Here are the QSL's which I have received in the past few weeks:

FRENCH GUIANA 11605 V. of Russia relay, card in 8 weeks after follow-up.

PORTUGAL 11700 R. Prague via Sines, card, schedule, ruler in 18 days.

RUSSIA 6170 V.of Russia via Khabarovsk, card in 6 weeks.

SINGAPORE 15360 V.of Croatia relay, card and a certified copy of the report in 6 weeks after follow-up.

USA [clandestine to Laos] 11785 Hmong Radio, a confirmed copy of the report in 5 weeks after follow-up via St. Paul, USA address. V/s Rev. Gia Tou Lee. [1500-1530 UT Sats only in Hmong 100 kW at 315degrees via Furman-Noblesville-USA, wb]  
(Vashek Korinek-AFS, DXplorer Jan 25)

### 1964/65 INTERVAL SIGNAL MONTAGE / QSL's

From Roger G3XBM's Amateur Radio blog  
<<http://g3xbm-qrp.blogspot.com/2010/01/shortwave-in-1960s-interval-signals.html>>

Yesterday I found this wonderful link which is a montage of 40 different old shortwave interval signals from almost 50 years ago. Get a coffee, sit back and listen. Imagine you are listening on your one valve radio in your bedroom in 1964. It brings back such happy memories that I am almost tearful with nostalgia.

<<http://garlinger.com/QSL/montage.mp3>>

A couple of the later ones are more recent. I found Doug Garlinger's webpage where the link is included, has many QSL cards he received as well as links to other interval signals if you click on the cards:

QSL Collection 1964-1965 of Doug Garlinger Age 13  
(while normal kids collected baseball cards, I collected QSL cards)  
<<http://www.garlinger.com/QSL/qsl.html>>  
(Mike Barraclough-UK, dxld Jan 25)

Garlinger went on to become chief engineer, or the like, of World Harvest Radio, accounting for his extensive collection of mint WHR QSLs.  
(gh, dxld)

ALASKA/KOREA Rep. of The annual NASB/DRM two-day meeting was held in May at the Holiday Inn, Nashville, Tennessee, hosted by World Christian Broadcasting and Radio Station WWCR.

Tom King, President of Kintronics Labs of Bristol, Tennessee, gave the final lecture of the morning. Kintronics builds antennas, including the corner reflector for WRMI in Miami, Florida. They have also provided a 3-tower antenna for KICY, Nome, Alaska for programmes directed to Eastern Siberia, and a 250 kW 6 tower array, directed in three patterns to North Korea, China and Japan, on 1566 kHz on the island of Cheju off the southern coast of South Korea for FEBC.

AUSTRALIA Strong windstorms at HCJB's broadcast site in Kununurra, WA last weekend damaged two of our antennas and put the East Asia broadcasts off the air. Until the antenna is repaired, programs for China and Japan

will not be broadcast. At this stage, repairs could take about three weeks.

Check this place for updates regarding restoration of East Asia broadcasts.

Nach dem Sendeende aus Juelich hat CVC International nun auch den Sendebetrieb seiner Kurzwellenstation auf der Cox-Halbinsel zum 31. Jan. 2010 auslaufen lassen. Wie englischen und chinesischen Mitteilungen zu entnehmen war, nutzt CVC das Ende des Vertrages in Darwin fuer den vollstaendigen Uebergang ins Internet und wird keine zusaetzliche Sendezeit am bisherigen zweiten Asienstandort in Usbekistan mieten. Vielmehr verspricht man auf den Internetsites ein runderneueres Programm mit viel mehr Interaktivitaet. Die indonesische Internetpraesenz wurde vom Netz genommen; allerdings wird auch hier auf der CVC.TV Homepage eine neue Homepage in Aussicht gestellt.

Andrew Flynn, Director of International Broadcasting, bei Christian Vision, scheut sich nicht vor klaren Worten: "Wenn man die Veraenderungen der Mediennutzung und schwierige finanzielle Umstaende zusammenbringen muss, muss man pruefen, wo das Geld, das man hat, am sinnvollsten ausgegeben wird. Das Ziel von Christian Vision ist es, Menschen mit Jesus Christus bekannt zu machen und dadurch zur Erneuerung ihres Lebens beizutragen. Weil wird die Botschaft fuer wichtiger halten als das Medium, koennen wir uns eben nicht ueber eines definieren. Von unserem Selbstverstaendnis her koennen wir eben nicht so etwas sagen 'Wir sind ein Kurzwellensender'."

In seiner Mail an den US-amerikanischen Kurzwellenexperten Glenn Hauser beschreibt Andrew Flynn am 26. Januar 2010 die aktuelle Uebergangssituation so: "Niemand kann heute genau wissen, wie sich Demographie, Medienzugang und -nutzung, Gewohnheiten und Moden im einzelnen entwickeln. Hoerfunk ist immer noch ein Teil unseres Medienmixes, besonders dort wo man noch keinen Zugang zu den Neuen Medien hat, und Radiosendungen haben auch ihre speziellen Staerken.

Was wir aber wissen, ist, das es eine Milliarde Menschen haben, fuer die Radio keine Bedeutung mehr hat. Das koennen wir nicht ignorieren, wenn wir die Moeglichkeiten haben, ihnen nachzugehen."

Die Programme von Christian Vision wurden urspruenglich nicht nur aus Australien ausgestrahlt, sondern dort auch zusammengestellt. Spaeter mietete man fuer die Sendungen in Hindi und Englisch auch Sendezeit in Usbekistan und baute Studiokapazitaeten in Singapur, Bandung und Bangalore auf. Bei einer "nur Internet Strategie" ist abzuwarten, ob die CVC-Programme auch die Grosse Chinesische Firewall unbehindert passieren

koennen. Auf der anderen Seite stellt auch die chinesische Gemeinschaft ausserhalb der Volksrepublik eine grosse Zielgruppe dar.

(ntt Dr. Hansjoerg Biener-D, Feb 1)

AUSTRIA 585 / 1476 Hallo liebe Funkfreunde, gestern habe ich im Radioforum eine sehr bedauerliche Nachricht gefunden die ich hiermit an Euch weiterleite.

Am Senderstandort Wien werden der 265 m Mast und der 120 m Mast gesprengt - anscheinend moechte man die Resaurationskosten fuer die Mastabspannungen in Hoehe von 1 Million - nicht mehr - investieren.

Somit faellt wieder ein historisches Technikmonument weil man die veraltete MW-Sendetechnik anscheinend nicht mehr braucht.

Damit ist m.E. das Ende fuer diesen Standort endgueltig besiegelt - urspruenglich war nur geplant den 265 m Masten zu faellen.

Bleibt zu hoffen, dass in DL dies nicht so schnell passiert - aber nachdem der Hessische Rundfunk auch schon auf MW qrt gemacht hat, kuendigen sich die naechsten Sprengungen schon an.

Im untenstehenden Link sind weitere Details zu finden siehe auch die weiteren Links:

<[http://www.radiomuseum.org/forum/sendemastsprenzung\\_mw\\_sender\\_wien.html](http://www.radiomuseum.org/forum/sendemastsprenzung_mw_sender_wien.html)>

Eine sehr gute Dokumentation der Sendeanlage ist dort zu lesen:

<<http://www.qth.at/adl325/bisamberg-ed02.pdf>>

(Juergen, wwdxc BC-DX TopNews Jan 24)

Hoehstes Bauwerk Bisamberg-Sendemast wird gesprengt. Dadurch wird der Donauturm mit seinen 252 Metern zum hoechsten Bauwerk Oesterreichs

Die Tage von Oesterreichs hoechstem Bauwerk sind gezaehlt: Der 265 Meter hohe Nordmast des Senders Bisamberg an der Grenze von Niederoesterreich und Wien wird Ende Februar gesprengt. Zugleich faellt dann auch sein kleineres, nur 120 Meter hohes Pendant. Damit rueckt der Donauturm mit seinen 252 Metern auf Platz 1 der Hoehenrangliste nach. Der Grund fuer die Sprengung seien die hohen Instandhaltungskosten.

Wie der "Kurier" berichtet, haette allein die Erneuerung der Stahlseilsicherung eine Million Euro gekostet. So werden vier Sprengungen im Februar den 80 Tonnen schweren Mast in drei Teile zerlegen und seiner Karriere als hoechstem Bauwerk ein Ende setzen. Sein kleiner "Bruder" soll im Ganzen fallen.

1933 errichtet.

Der eigentliche Mittelwellensender Bisamberg ist bereits seit 1995 nicht mehr in Betrieb. Der Kern der Anlage wurde 1933 errichtet, allerdings 1945 von den abziehenden SS-Truppen zerstoert. In ihrer heutigen Form entstand die Sendeanlage 1959 mit vier Sendern zu je 120 kW. Waehrend sich die beiden gigantischen Masten auf Wiener Stadtgebiet befinden, liegt der ueberwiegende Teil des Sendegebaeudes im niederoesterreichischen Langenzersdorf.

Auch wenn die beiden Stahlfachwerkkriesen fallen werden, bleibt der

Senderaum aus den 1950er Jahren der Nachwelt erhalten und wird der Öffentlichkeit zugänglich gemacht. Was mit dem 25 Hektar grossen Areal im Besitz der Stadt Wien und des ORF geschieht, ist noch offen. (A\_P\_A)

GERMANY/USA Re: Greenville and Erching sites.  
I hear from a confidential source that the Greenville transmitting station of VOA will be closing on September 30, 2010. What this will mean for the broadcasts it still transmits, Radio Marti, VOA English, Special English, recently expanded Creole, Hausa, Portuguese, Spanish, RNW relay is as yet unknown.

[later] I don't know for sure, but I was about to add that it is probably somewhere in the next FY budget just coming out, or caused be it.  
(Glenn Hauser-OK-USA, dxld Feb 1)

Kim Elliott has followed up on this, partially quoting us:  
BBG budget plan includes closure of Greenville transmitting station, last IBB shortwave facility in the US.  
<<http://kimelli.nfshost.com/index.php?id=8252>>

Kai Ludwig in dxldyg suggests that Greenville may not really close until the end of October, A-10 season, rather than end of Sept, FY 2010.

Media Network also follows up on this:  
<<http://blogs.rnw.nl/medianetwork/more-on-the-ibbs-plans-for-fiscal-year-2011>>

Wolfgang Bueschel, dxldyg, says the Erching, Germany IBB site refers to the former longwave 173 kHz facility. [see below]  
(Glenn Hauser-OK-USA, dxld Feb 2)

I wonder if this has anything to do with the proposed budget. Perhaps there just aren't enough funds to keep Greenville alive ... after all these years!  
(Steven Wiseblood-USA, dxld Feb 1)

Bombshell - VOA Greenville closing in 8 months. Thanks to <[kimandrewelliott.com](http://kimandrewelliott.com)> we have a link to:  
Broadcasting Board of Governors FY 2011 Budget Request  
<<http://www.bbg.gov/reports/documents/BBGFY2011CONGBudgetSubmission-ForInternetPost.pdf>>

We have found pertinent excerpts from the 119 page document concerning Greenville, EMPHASIS ADDED WITH CAPS; et al.:

#### PROGRAM CHANGES:

The BBG proposes the following reductions in the support area: reduction of contracting costs by 4 percent throughout the Agency through efficiencies; sale of a former transmitting site in Erching, Germany [which one is that by a name we recognize?].  
(Glenn Hauser-OK-USA, dxld Feb 2)

Re: dxld 10-01, Jan 6, 2010. - Extraordinary Hauser...  
You mention 'Munich Ismaning BR museum'.  
Any idea what happened to VOA Erching 1000 kW transmitter?  
It was a Continental (2 x 500 kW), same MF type was in Poro etc.

I was a USIA/IBS monitor during years 1960-1964 under IBS/EF (Frequency chief) George Jacobs and I have available Helsinki monitoring post logs 1957-1964. 173 also was jammed.

I live in Heinola in hospital. I write histories for the Finnish Radiohistorical Society journal.

My best regards  
Vaeinoe K. Lehtoranta, Finland  
(Jan 2010)

Re: [castle manor] Erching Germany facility

sale of a former transmitting site in Erching, Germany  
[which one is that by a name we recognize?];

The former 173 kHz 1734 mb, VOA/RIAS facility Munich Erching - belonged to the US Munich consulate - has been scrapped in around 1990-1991.

Erected in cold war era around 1952 to 1953.  
In service from Sept? 1953 til Febr 1, 1964.  
In use at selected times from 25 January 1954 to 31 January 1964 on 173 kHz. VOA also off from 1 Feb 1964.

Resumed in August 1969. VoA Russian in test. From Sept 3rd, 1969 regular 1600-2000 English, 2000-2200 Russian, [comment: to USSR occupation army in GDR and CSSR after Czech occupation, wb]. Ceased service end? of 1973 again.

On 22.11.1975 entry again on ITU Geneve new longwave plan (in effect from Nov 1987) on 209/207 kHz channel - under GER but on request of USA-Munich general consulate!, 0400-1800 hrs UT nondir 500 kW, 27.4 dB max. ERP amplification gain.

The VOA transmitter at Erching became available to the DLF Deutschlandfunk program on 1 March 1979. It started operations on 209 kHz using 500 kW on 4 July 1979. On 1 February 1988 the frequency was changed to 207 kHz.

It was the same 1000 kW Continental TX gear like in Poro PHL, Bangkok-THA and Naha Okinawa JPN. Antenna with 26 dB ERP gain, from 1979 til 1989 leased to German public broadcaster DLF Deutschlandfunk on 209 / 207 kHz longwave daylight service, til 1800 hrs local time only, due of co-channel Kiev Ukraine transmission.

Special main power of 60 Hertz needed by a generator, later connected link to German main power net via transformer converter.

<<http://www.weblexikon.de/Erching.html>>

Hello all,

Here's a collection of all notes I have gathered over the past few years concerning the VOA txer at Erching. It would be interesting to have the final story after the last transmission period. The costs of operating this monster and its twins in Poro and Naha must have been astronomical. The Poro unit (and also Bangkok 1575 kHz) was replaced by a modern Harris DX-1000 in 1996, after 43 years of operation.  
(73s /Olle Alm-SWE)

173 kHz RIAS via Muenchen-Erching (VOA). In use at selected times from 25 January 1954 to 31 January 1964 on 173 kHz. VOA also off from 1 Feb 1964.

209-207 kHz

The [former movable 14 truck WWII Reichspost tx] Martha transmitter at Mainflingen near Frankfurt/Main was used on this frequency from 23 November 1978 using 20 kW.

The VOA transmitter at Munich Erching became available on 1 March 1979. Started operations on 209 kHz using 500 kW on 4 July 1979. On 1 February 1988 the frequency was changed to 207 kHz.

[Regensburg Deggendorf - Aholming: Two 250 kW transmitters (Telefunken S4008) started operations using 500 / 250 kW on 1 February 1989. The antenna system has two 265m masts at a mutual distance of 483m. The power is fed at 203m height. Days only one mast is used to provide a nondirectional pattern. G.C: 12E56/48N43.

VOA LW Erching 173 kHz. - Resumed in August 1969.

Ab August 1969 wieder mit VoA Russisch in Test-Betrieb. Danach ab 3.9.1969 wieder regulaer, 1600-2000 En, 2000-2200 Russisch, [comment: fuer Besatzungsarmee in DDR und CSSR bestimmt, wb]

Schlossgut Erching 173 kHz 1734 m, errichtet 1952-1953, lief von [Sept?] 1953 bis 1 Feb 1964.

Funkschau in 1969: "Auch Moskau 500 kW benutzt 173 mit 500 kW. Beide

Traeger differieren um 4 Hertz, so dass zusaetzlich eine unangenehme Schwebung auftritt".

Im WRTH 1974 nicht mehr enthalten, deshalb im Laufe 1973 Betrieb wieder eingestellt.

Am 22.11.1975 wurde im Genfer Wellenplan Erching fuer 209 kHz eingetragen - auf GER mit Betreiben der USA-FCC und auf deren Forderung!, 0400-1800 nondir 500 kW, 27.4 dB max. Verstaerkung/Abstrahlung.

Max. Abstrahlung 1800-0400 hrs 27.0 dB, ausser Sektoren mit Einzug 115-160 Grad Caltanissetta-Italien 21.0 dB, 160-230 Grad Marokko 20 dB, 72-88 Grad Kiev-UKR 4 dB - Kiev durfte mit 500 kW und der 257 m hohen Antenne - gleiches Model wie in Mongolei 4x, Tashkent, Blagovechtchensk, Skovorodino, rundstrahlen ohne Einschränkungen, deshalb die geringe Unterdrueckung durch Erching mit 4 dB.

Stillgelegt auf 173 kHz seit 1973 bis Juni 1979, aber immer in Betriebsbereitschaft, und sofort an die Amerikaner zurueckfallend. D.h. nur Wachpersonal, aber regelmaessig von amerik. Techniker aus Ismaning [MW 1196 kHz unit] getestet.

Rent agreement: Ab Juni 1979 fuer 7 Jahre von den Amis an die Bundespost / DLF ueberlassend - in Betrieb, nur Tagbetrieb 0500-1900 hrs MEZ. (wb df5sx)

ntt-aktuell Juli 2007 (2. Ausgabe)

Dr. Hansjoerg Biener, 90461 Nuernberg, Germany  
<[Hansjoerg.Biener@asamnet.de](mailto:Hansjoerg.Biener@asamnet.de)>

Deutschland: Das fuer die US-amerikanischen Auslandsdienste zustaendige International Broadcasting Bureau schliesst noch in diesem Sommer die Niederlassung in Ismaning bei Muenchen. Dies wurde am 2. Juli den Mitarbeitenden bekanntgegeben.

Ismaning war einer der aeltesten Relaisstandorte fuer US-amerikanische Auslandssendungen. Die Voice of America sendete von hier seit Dezember 1946.

Die Kurzwellensender stammten noch aus Reichspostzeiten (4x75 kW) und waren westlich vom Bach auf der Seite des BR und AFN. Ab 1949 wurde die Antennenanlage auch oestlich vom Bach auf der Seite des Mittelwellensenders erweitert. Die Mittel- und Kurzwellen in Ismaning firmierten unter Munich-A/B. dazu kam die 6 km nordwestlich gelegene Langwelle Erching 173 kHz als VoA Munich-C.

Nach dem terrestrischen Sendeende war Ismaning noch an der Steuerung und Kontrolle des weltweiten Sendernetzes beteiligt. In den letzten Jahren haben Mitarbeiter ausser ihren Wartungsaufgaben auch den Abbau europaeischer Sendeanlagen und den Wiederaufbau von Sendern an anderen Standorten bewaeltigt. Die Kurzwellensendungen aus Lampertheim und Biblis bei Frankfurt sollen jedoch weitergefuehrt werden.

VOA Munich Ismaning

<<http://members.aon.at/wabweb/frames/ismanf.htm>>

<<http://members.aon.at/wabweb/frames/ismaningf.htm>>

History of 2001y.

IBB Biblis and Lampertheim belong to US consulate Frankfurt/Main.

Longwave sender Munich Erching [castle manor] on 173 kHz 1734 mb near Hallberg-Moos village, and broadcasting house of RFE/RL Munich - English Garden - , - did belong to General Consulate Munich Germany.

Holzkirchen and Ismaning, as well as former Receiving station (Rhombics) for overseas reception monitoring at Ueberacker, 18 km west of Munich near Maisach/Sulzemoos village.

Managed the facilities Funkhaus Englischer Garten, MW&SW transmissions in Munich Ismaning tx site since 1945, also at Erching since 1952, and also during erection phase in 1952 on LW 173 and MW Ismaning 1197 kHz in 1949, as well as RFE/RL site Holzkirchen on MW 719/720 kHz also.

The engineering staff at Ismaning and Lampertheim also worked worldwide at IBB facilities Holzkirchen, Kuwait, Cyprus, but also in central Asia like in UZB, TJK etc., as well as on satellite and FM IBB relay gear, in Africa and in NE/ME on the erection phase of the MW facilities in Djibouti, Kuwait, UAE etc.

vom 7.7.2001 c.f. BC-DX Top News # 527.

Sightseeing tour at BR Bayerischer Rundfunk installations, and IBB/VoA/RFE tx site and radio museum BR Munich Ismaning.

Ex Reichspost site of Nazi era and US occupation time after WW II, tx house of ex-AFN Munich 1106 kHz and Radio Munich til 1949. Old Reichspost / VoA / Radio Munich / Bayerischer Rundfunk installations/museum.

Slavia/Tesla Prague tx of 1943, used for VoA also on 3980 kHz in 75 mb, and Collins program and feeder txs towards VoA relay sites Tangiers, Thessaloniki and Rhodes Isl. are shown.

Open Door Day on Saturday July 7th, 2001, 0600-1500 UTC.

Die viermastige Mittelwellenantenne wurde vor fuenf Jahren [1996] ueberholt, reicht aber im Prinzip bis in die Nachkriegszeit zurueck, als man 1949 einen 150-kW-Mittelwellensender fuer 1196 kHz in Betrieb nahm. Aufgrund des Balkankonflikts haben Radio Free Europe und die Voice of America ihre Sendungen fuer den Balkan stark ausgeweitet, so dass die Mittelwelle Ismaning derzeit rund um die Uhr laeuft. Aufgrund der bekannten Probleme am alten RFE-Standort Holzkirchen, wo ein Umbau der Antennenanlage am Widerstand der Bevoelkerung scheitert, sind viele RFE-Sendestunden jetzt beim alter VoA-Standort. Die Zusammenlegung der Sendertechnik aller US-amerikanischen Auslandsdienste in eine Organisation ermoeglicht hier die noetige Flexibilitaet.  
(Dr. Hansjoerg Biener, July 2001)

Re: Greenville sitee.

I wouldn't call it a bombshell. It's a logical development. The total airtime for all international broadcasters has decreased significantly over the past few years, and there are now more opportunities to place broadcasts on a facility closer to the target area. The BBG plan specifically refers to closer cooperation with other international broadcasters. The advantages of doing this are that lower power is often sufficient (e.g. 250 kW or even 100 kW instead of 500 kW) and the signal

can be a single hop from the target so fading is less of a problem. Our services to Asia provide better signals via transmitters in the region than was possible direct from the Netherlands.

It makes sense to have a smaller number of transmitting stations that are full occupied (or nearly so) instead of scattering transmissions across a larger number of facilities that are only operating at half capacity. There are a lot of fixed costs associated with transmitting stations, so the more productive they can be, the better. At our Madagascar relay station, for example, we have about ten clients who collectively use about two thirds of the total transmitter hours. That includes IBB. Without those other broadcasters, it would be extremely hard to justify the cost of running the facility.  
(Andy Sennitt-HOL, dxld Feb 2)

Would the government consider selling the VOA Greenville facility to some private party? My guess would be the price tag would be enormous since it is such a large facility. I have visited and toured the VOA Greenville facilities when I lived in North Carolina back in 1990, and back then (in "better" days) the facilities were huge.

HAITI Nach der Voice of America reagierten auch der BBC World Service und Radio France Internationale mit Sondersendungen auf die Situation in Haiti. Mit Aerger war dabei zu bemerken, dass die Ankuendigungs- und PR-Maschinerie im Inland auf Hochtouren lief, waehrend die Sendeplaene nicht schnellst- und breitestmoeglich kommuniziert wurden. Offensichtlich ist aber auch, dass die Kurzwelle nicht mehr die erste Option ist.

Nach einer Marktanalyse, die der fuer die strategische Leitung der US-Auslandsdienste zustaeendige Broadcasting Board of Governors im Juni 2009 auf Haiti durchfuehren liess, nutzt weniger als 1 Prozent der Bevoelkerung die Kurzwelle und nur 8 Prozent die Mittelwelle. Tatsaechlich ist es wohl so, dass nur 1 Prozent der Radiogeraeete ueberhaupt noch die Kurzwelle empfangen koennen, aber 63 Prozent die Mittelwelle und 96 Prozent UKW. Zu diesen kommen dann noch die UKW-Funktionen vieler Mobiltelephone. Wo aber die Empfaengerseite nicht mehr ueber die Kurzwelle verfuegt, macht Kurzwelle auch keinen Sinn mehr als Medium in Krisen.

Vor dem Erdbeben gab es in der Hauptstadt rund 50 Stationen. Nur Signal FM 90.5 konnte beim Erdbeben weitersenden, Caraibes FM und der lokale UKW-Sender von Radio France Internationale konnten sofort nach dem Erdbeben wieder senden. CaraibesFM und SignalFM waren auch die beiden einzigen Sender aus Port-au-Prince, die in den naechsten Tagen auch im Internet zu hoeren waren.

Mit Hilfe auslaendischer Techniker waren eine Woche spaeter 20 Stationen wieder auf Sendung, darunter Vision 2000, Radio Lumiere, Radio Solidarite, Melodie FM, Radio One und Radio Boukman (aus Cite-Soleil im groessten Slum

der Hauptstadt). Die World Association of Community Radio Broadcasters hat Nachbarschaftssender in aller Welt aufgerufen, Spendenaktionen fuer Haiti zu organisieren und eventuell auch Ausruestung fuer die mindestens zwei zerstoeerten Nachbarschaftssender in der Erdbebenregion zu spenden. Die UN-Station, Radio Minustah, sendete wieder ab dem 18. Januar 2010. Einigermassen schnell kamen zahlreiche Stationen wieder online.

Ab dem 16. Januar 2010 war auch ein Senderflugzeug des US-amerikanischen 193rd Special Operations Wing ueber Haiti unterwegs, das nun nachmittags ein fuefnfstuendiges Programm auf UKW 92,4 und 104,1 MHz und Mittelwelle 1030 kHz ausstrahlte. Damit war die Gesamtsendezeit des kreolischen VoA-Dienstes nun auf 10,5 Stunden werktags bzw. 9,5 Stunden am Wochenende angewachsen. Begleitet wird der Einsatz des Flugzeugs mit der Verteilung von 50.000 solarbetriebenen Radioempfaengern. Mit Aerger notiert der US-amerikanische Medienexperte Glenn Hauser die Tatsache, dass die Sendeplaene weder auf den allgemeinen noch auf den kreolischen Internetseiten der Voice of America aktualisiert wurden. Tatsaechlich sei der Sendereinsatz wechselhaft.

Der Medienexperte Jonathan Marks aergert sich, wie diese Initiative am 24. Januar 2010 auf BBC Radio 4 dargestellt wurde. Nach diesem Beitrag "wuerde man schw hoeren, sie waeren die einzigen, die sich auf diesem Gebiet engagieren". Marks konstatiert eine mangelnde Koordinierung der Aktivitaeten und bemerkt: "Diese Inseln der Hilfe und die PR-Maschinerien, die sie begleiten, sind fuerchterlich." [Jonathan Marks on Jan 24th, 2010 at 13:45 im Blog von Radio Netherland:

Just heard a piece on BBC Radio 4, World at One, done by one of the organisers of BBC Connexions in Miami. Listening to it, you'd swear they were the only ones active in their field. I'm sure they are providing a great service, but if only more of the NGOs and broadcasters coordinated their activities. These islands of help - and the publicity machines that go with them - are awful.]

INDIA Am 3. Dezember 2009 hat All India Radio bei einem Konsortium von BECIL (Broadcast Engineering Consultants India Ltd) und Thomson zwei 1000-kW-Mittelwellensender zur schluesselfertigen Uebergabe bestellt.

Beide Sender der S7HP-Serie koennen sowohl in DRM als auch herkoemmlichem analogen Modus senden. Die Megawattanlagen ersetzen entsprechende Kapazitaeten in Chinsurah (594 / 1134 kHz) und Rajkot (1071 kHz). Die Anlage in Rajkot, 450 km nordwestlich von Mumbai, wurde 1970 in Betrieb genommen und solllste auch Westpakistan versorgen. Die Megawattwelle ist seit 2004 ausser Betrieb. Die seit 1969 aus Chinsurah, 35 km noerdlich von Kolkata, sendende Anlage war auch fuer Ostpakistan bzw. Bangla Desh bestimmt. Seit 2005 wird der 1000-kW-Sender mit halber Leistung betrieben. (Alokesh Gupta-IND 30.1.2010, ntt Dr. Hansjoerg Biener-D, Feb 1)

All India Radio confirms order for two Megawatt DRM MW transmitters.

India's national broadcaster All India Radio (AIR) has placed an order for the supply of two 1000 kilowatt DRM capable medium wave transmitters. These will replace old analogue transmitters of same capacity at Chinsurah (West Bengal) and Rajkot (Gujrat), with state-of-the-art solid state transmitters.

The new Megawatt transmitters can be operated in analogue, in simulcast or in DRM mode with automatic change-over between these three operational modes. The transmitters shall provide coverage to very large areas in the Indian sub-continent as well to the West, North, East and Southeast Asia.

This significant purchase was revealed at the recently concluded Broadcast Engineering Society (BES) India's conference in New Delhi, attended by exhibitors and participants from all over the world. The need for cheaper digital radio sets and content innovation was highlighted by speakers during the event.

All India Radio has already chosen DRM as the technology for converting its vast analogue network to digital. This is part of its digital radio switchover strategy where more than 40 transmitters are to be made DRM capable in the near future. AIR is already broadcasting in DRM from one of its high-power shortwave transmitter located at Khampur near Delhi that covers an area of approximately 800 kilometre radius.

The DRM Consortium is delighted with this development which underlines the commitment made by India to new technology in general and the DRM standard in particular.

(DRM Consortium Press Release; via Alokesh Gupta-IND, DXindia Feb 3)

828 Last year I visited the SW & MW transmitters of AIR Panaji. Then I was told that they were changing their Vividh Bharati 20 kW transmitter on 1539 kHz to 828 kHz due to co channel interference from Voice of America.

In November 2009 I heard them on the new 828 kHz and reported to them. Recently I got an email reply from the Station Engineer that they were on low power at that time and that now they are on full power. They are interested in reception reports of this transmitter.

Reception Reports may be sent to  
Mr.V.N.Page, Station Engineer, AIR Panaji at the email id  
<panaji.spt @ air.org.in>

By the way it is heard only very faintly at my location and there is co channel interference from Radio Pakistan. Incidentally the SW transmissions from AIR Panaji are not fully operational now.

(Ian Baxter-AUS, SW TXsite Jan 18)

KUWAIT/GERMANY/GREECE Rotatable antenna at IBB Kuwait MW and SW site.

Many thanks Stephan, download worked fast due of 5890 Kbit/s transmission.

Most questions solved now, when watched to the Johnson Imagineering video from IBB Kuwait Transmitting Station.

At IBB Kuwait site the erection phase #2 is in progress:

1 - erection of MW station for Radio Farda Kuwait relay 1386 kHz service, remove of ex 600 kW Harris MW sender unit from Kavalla Greece to Kuwait site and to erect newly 3-mast antenna in north-easterly corner of the area too. close to 29 31 17.36 N 47 41 24.74 E

2 - both two 250 kW Continental SW units removed from former IBB RFE/RL Holzkirchen Germany site switched on at Kuwait recently.

Via the antenna matrix at Kuwait site 4 x 250 TX via maximal 12 antenna positions [connected to fixed 70 degrees curtain arrays and via the new rotatable Thomson antenna soon], watch Johnson Imagineering video at 2.35 minuts duration, "Monitor and Control" image precise.

3 - matches in connection to item #2, the very new Thomson AHR 2/2 antenna, rotatable at around 360degrees and soon in full broadcasting service of more 10 IBB scheduled transmissions.

That's not a pure ALLISS antenna type. There are new fixed RIGID dipol elements in use, but the accompanied transmitter is not placed on the shaft mast, like at other Thomson made installations at Issoudun France, Nauen Germany, Montsinery French Guiana, and Qiqihar Heilongjiang in China [of April 2003], but signal is fed by more than 1 kilometerlong feeder line from TX house, like in Sines Portugal and Abuja Nigeria implemented.

Similar "Thomson RIGID dipole antenna" erected worldwide, like at Sines Portugal, RTL Luxembourg Junglinster, Radio Pakistan Karachi Landhi, Abuja Nigeria and Turkey revolving at Emirler and Cakirlar sites.

According to the Video and fixed points like TX house, nearby

Communications-Tower and the satellite antennas, also the view to the highway road, the main power masts and the 1593 kHz MW twin mast array in the northwestern corner of the area, the new rotatable Thomson AHR 2/2 antenna should be narrowed to the location at 29 31 22.22 N 47 40 19.60 E see accompanied Google Earth screenshot image. Feeder line to the Thomson antenna is more than 1 kilometers in length.

See type table on page 4 of the PDF pamphlet of Thomson AHR 2/2 antenna in <[www.grassvalley.com/assets/media/2072/TRB-RDAnt-R1.0.pdf](http://www.grassvalley.com/assets/media/2072/TRB-RDAnt-R1.0.pdf)>

4 different antenna types, like single, two, or 4 vertical dipole rows, als well as up to four horizontal dipole layouts seen, also with different gain levels.

PDF pamphlet:

"The newly developed Rigid Dipole Technology combines design principles as implemented in rotatable shortwave antennas with the advantages of curtain antennas."

History of former Holzkirchen dismantelling:

IBB Holzkirchen Germany site stopped service on Dec 31, 2003, and was dismantelled by IBB engineers in January to August 2004. Word is that the station grounds has been be sold for 7 million Euro to the municipality of Valley the Oberlaindern settlement (situated about 3 km east of Holzkirchen). The federal govt of Germany payed the expenses of 600,000 Euro for the demolition of the station. All txion equipment has been

dismantled by the end of June 2004; two of the four SW txs moved to the Tinang Philippines site, remaining two to IBB Kuwait shortwave site.

Dec 25, 2003.

MALAYSIA Die Kurzwellenplanungskonferenz fuer die Sommersaison findet Anfang Febr. 2010 in Kuala Lumpur stattfinden. Ein Veranstaltungsort fuer die Konferenz zur Wintersaison im Aug. 2010 ist noch nicht bekannt. Wie HFCC Chairman Oldrich Cip bemerkte, besteht trotz verringertes Sendeplaene und neuer Verbreitungswege wie dem Internet immer noch erheblicher Planungsbedarf, da die Rundfunkbaender immer noch sehr voll sind. So waren sich die HFCC-Mitglieder auch einig, Frequenzplaene von Nicht-Mitgliedern weiterhin nicht (offiziell) zu beruecksichtigen, da man keine Trittbrettfahrerei will.

(Jeff White NASB Newsletter Sept. 2009 direct and dxld)

ABU - 2 February 2010.

ABU shortwave broadcasters meeting in Kuala Lumpur today renewed their support for the creation of a monitoring network to assess the reach and quality of their broadcasts.

The backing came at a meeting of the Steering Committee of the ABU Shortwave Coordination Group, ABU-HFC.

Over the past few years the committee has been looking into the development of a monitoring unit. Audio monitoring within the ABU-HFC would be a bilateral process, with the ABU providing its support at no extra cost.

Participants in the Kuala Lumpur meeting said the proposed network for ABU members could be extended to other shortwave broadcasters if required.

Among other issues discussed were ways to achieve an increase in the audience for shortwave radio. Members noted that other, modern delivery media were overtaking shortwave with new, high quality programming.

Participants said there was a need to concentrate not only on technical issues but also on good quality content. The committee also agreed to provide training content on new techniques used in coordination as well as on updated software tools on the ABU's online Media Learning Centre.

(R BULGARIA DX MIX News, Ivo Ivanov, via wwdxc BC-DX TopNews Feb 1)

PBC's South Asian Broadcast Services.

Minister of State for Foreign Affairs Nawabzada Malik Ammad Khan inaugurated PBC's South Asian Broadcast Services under which programmes in three more languages: Nepali, Sinhala and Tamil had been launched.

Pakistan Broadcasting Corporation is already broadcasting programmes in seven languages including Bangla, Hindi, Chinese, Gujarati, Pashto, Dari and Farsi. Induction of three more services would make the number of foreign services to ten.

(Alokesh Gupta-IND VU3BSE, dxld Feb 1)

Pakistan B-09 sched Febr 1st.

Below I have typed the full SW schedule as far as I know it - highlighted.

Yes - it's usual for there to be lot's of alternatives registered, but never used. As we know, this can lead to confusion and unwanted QRM. (NG)

Dear Noel, a lot of summer alternatives shown up, 73 wolfy

The Frequency manager of Radio Pakistan informs me that they will once again broadcast in Nepali, Sinhala and Tamil from February 1st. The existing schedule between 0900 and 1330 UT via API-3 & 4 will be replaced with:

0900-1000 Bangla 9375 11570 (alt.15630)

1000-1030 Nepali 9375 11570 new

1045-1145 Hindi 9375 11570  
1145-1215 Gujrati 9375 11570 (alt.15630)

At 1230-1300 UT Sinhali and 1300-1330 Tamil 11525 and 15630 kHz.

MSK7290 kHz in periods 1800-1900 and 2000-2100

in the direction of Ukraine and Moldova  
GRI1548 kHz in time 1300-1600;  
SAM5940 kHz 1200-1500

in Europe and the Baltics  
KLG1215 kHz in time 1100-1400;  
StP1494 kHz 2000-2200; completely eliminated broadcasting on a frequency  
612 kHz from Vilnius-LTU 0600-1600 UT,

and completely removed broadcasting on a frequency of 1170 kHz from  
Mogilev-BLR 0800-1600 and 1800-2000 UT. Broadcasting at 1170 kHz from  
Amavir Krasnodar is saved, [0400-0600 1500-2300 UT, wb.].

In the calendar of international Russian radio removed the following  
frequencies:

towards the Middle East  
MSK5985 kHz in time 1700-1800

in the direction of the Middle East and Caucasus  
SAM7225 kHz in time 0000-0400

in the direction of Europe and the Baltic States  
KLG1215 kHz in time of 0900-1100

in the direction of Belarus also fully removed from Mogilev-BLR at 1170  
kHz 0100-0500

in the direction of Ukraine and Moldova SAM5940 kHz in time 1700-1800; and  
completely removed broadcast at 621 kHz from Grigoriopol Maiac Dniesteria  
0500-2300.

From 18 January some frequencies which international Russian radio, Voice  
of Russia ordered Russian service, namely:

1500-1700 MSK6140 kHz in the direction of the Caucasus and the Middle East  
1600-2000 StP1494 kHz towards Europe and the Baltic States  
1300-1800 and 1900-2200 KLG1143 kHz towards the Baltic States and Belarus  
2300-0400 ERV-Armenia 7430 kHz towards Central America  
0500-1000 on medium wave in Germany Braunschweig 630, Oranienburg 693 and  
Dresden Wilsdruff 1431 kHz (instead of broadcasts in English).

(Technical service GTRK "Voice of Russia", "DX club",  
via MIDXB # 669, 26 Jan, ed Vadim Alexeev-RUS, via RUSdx)

891 An oscillating carrier has been interfering with the Dutch station  
for a long time. The culprit appears to be Petrozavodsk, but the audio is  
usually too distorted for positive identification. The hours are 0300-2200  
UT.

(Olle Alm-SWE, ARC MV-Eko Feb 1)

Correction of WYFR Family Radio via TRW = TV Radio Waves:

1400-1500 9440 ARM 200 kW 147 deg to SoAs in Assamese, not Pashto.

(R BULGARIA DX MIX News, Ivo Ivanov, via wwdxc BC-DX TopNews Feb 1)

I have been monitoring Armavir Krasnodar 9440 kHz at 1400-1500 UT as in my  
logs and dxlds. It's YFR, initially in English, then switched to another  
language. A difference of opinion whether it is Assamese[see above on DXM,  
wb.] or Pashto, see dxld 10-04.

(Glenn Hauser-OK-USA, dxld Jan 31)

SAUDI ARABIA 15435 Patrolling 15 MHz band around 1500 UT Feb 2, I was  
braced for another blast of buzz from Riyadh 15435 kHz transmitter, but it  
never happened! At 1506 UT I checked 15435 kHz itself and there was BSKSA,  
but it's been fixed, (or transmitter substituted), no buzz at all, and  
occupying normal bandwidth not exceeding 10 kHz!!! But not totally healthy  
as it does have a lite whine on it.

Apparently BSKSA finally got an earful at HFCC Kuala Lumpur, or somehow,  
that they had a slight problem for the past year. By 1548 UT recheck,  
15435 kHz was weakening with flutter, now in Arabic talk rather than  
Qu'ran recitation, still stronger than // 15225 kHz. Let us hope the buzz  
be gone forever, but it's too early to count on that.

(Glenn Hauser-OK-USA, dxld Feb 2)

17730.00 even ! No BUZZ this morning on this usual odd 17729.65v channel  
of BSKSA Riyadh 1st program transmission, today at 0630 UT S=8-9,  
scheduled 0600-0900 UT. // 17740.00. Many ID's by charming lady announcer.

Also Holy Quran program noted at fair level on 15380.00 and 17895.00 kHz  
at same time.

(wb, wwdxc BC-DX TopNews Feb 5)

SERBIA 1503 Radio 202 - the power is now 10 kW, ex1 kW. Reception  
reports are welcomed. 24 hrs. Best time to listen is from 1800 UTC because  
Radio Zavidovici, Bosnia is on the air on the same frequency from 0700 to  
1800 UTC. The announcement for "202" in Serbian is: "Radio Dvestadva"  
(202). Reports can be sent to my e-mail address:

SLOVAK REP 15670 [to SUDAN] Miraya FM relay via IRRS via Rimavska  
Sobota-SVK is back on 19mb, without notice, a new frequency, 15670 kHz,

Feb 2 at 1508 UT when I wondered what's this? English and Arabic dialect mixed together, actualities and voice-overs. Reminded me of Libya 17725 kHz but not // . Nor // SRS via Portugal 17745 kHz. At 1510 UT headlines alternating with stingers, "end of news, [www. but lost to fade], FM news, 101 Mira FM" (that's the way it's pronounced, almost dropping the -ya, so I must stop saying Miraya).

Somewhat rough modulation, probably a feed input problem rather than a transmission problem. This broadcast at 1500-1800 UT had been on 9825 kHz so far in B-09, where we could not hear it, so welcome back! Furthermore, IRRS found a clear frequency this time instead of resuming 15650 kHz where it collided for months with Greece despite our advice. Ironically, Greece was missing from 15650 kHz at the moment, but was back at 1528 UT check.

At 1553 UT, 15670 kHz still audible but weaker, and again mixing English with Arabic.

(Glenn Hauser-OK-USA, dxld Feb 2)

SLOVENIA 918 This transmitter is constantly off frequency by 30 Hz to the higher side.

SRI LANKA After a break of about 17 years, the Union of Asian DXers has risen like a phoenix from the ashes. The UADX has published its first Newsletter since July 1993 as a PDF file on the DXAsia website, edited now, as then, by my good friend Victor Goonetilleke in Sri Lanka. Familiar UADX names such as Gerhard Werdin, Sarath Amukotuwa & Sarath Weerakoon will also be helping Victor, who says that the first edition of the E-Newsletter is meant as an introduction and sample. The next edition is scheduled before the end of February. I hope SWLs and DXers amongst our readership will support this venture.

Victor has also written an article about Eclipse Monitoring on 15 January 2010. A UADX blog will also be starting soon. Thanks to Alok das Gupta and his son Abhishek for technical help in getting this material online.

SWAZILAND 3200.000 TWR Manzini, English, 1947 UT, noted in passing, with male preacher talking about "the Creation(ist) Movement." Very good.

(David Sharp-NSW-AUS, dxld Jan 22)

TAJIKISTAN 4765.058 TR-1, 2015 UT, presumed with local music, into talk by language man at 2018 UT. Very good.

4975.000 Voice of Russia, English, 1940 UT, very good, despite slight transmitter hum, and het on high side from Uganda. Peaking at about S9+40dB.

(David Sharp-NSW-AUS, dxld Jan 22)

TURKEY TRT Emirler 500 kW sender festival.

15350 often known as the most bad transmitter at Emirler, produced some sideband spurs today Febr 4th at 0700 to 1400 UT.

Covered more space on the 19mb segment. Spurious signals on 15332 to 15368 kHz range, as well as two sidebands at 15284 - 15292 and 15407 - 15416 kHz.

Much better and cleaner signals from TRT Emirler side on 11795, and 13690 kHz, as well as Cakirlar site on 11955 and 15480 kHz, at very same time.

(wb, wwdxc BC-DX TopNews Feb 4)

UK/CROATIA/GERMANY Tnx to a tip from Dragan Lekic-SRB, Voice of Croatia heard testing new 7385 kHz via Woofferton UK, Feb 2 at 0309 UT, YL with weather report in English, then something about recipes. This was // only a slight echo behind usual 7375 kHz, which is Wertachtal 100 kW at 300 degrees plus Nauen 100 kW at 325 degrees. But stronger signal from the Germans.

Evidently VTC, or whatever it is called this week, is making a bid to take business away from DTK, or whatever it is called this week. Dragan says this test on 7385 kHz is for four nights only, UT Feb 2-5 at 0300-0500 UT. (Glenn Hauser-OK-USA, dxld Feb 2)

UK 1197 One of the Absolute Radio transmitters has been several Hz off frequency for quite some time, causing a bad flutter on the channel.

## USA FY 2011 Budget Request for the Broadcasting Board of Governors.

The President's budget request for Fiscal Year 2011, sent to the Congress today, includes \$768.8 million for the Broadcasting Board of Governors (BBG), an increase of 1.5 percent from the FY 2010 funding level. The request reflects the continued critical role of BBG broadcasts in support of U.S. foreign policy goals.

The FY 2011 budget supports key new initiatives:

- Upgrading the BBG's global satellite distribution capacity, infrastructure, and network control center;
- Expanding FM, digital, and new media opportunities;
- Improving digital workflows and expanding distribution to mobile devices;
- Adding 24/7 FM transmitters in Afghanistan to carry Radio Free Europe/Radio Liberty (RFE/RL) and Voice of America (VOA) Pashto and Dari programming;
- Creating Radio Free Asia (RFA) video programming in Burmese, Tibetan, Mandarin, and Vietnamese;
- Diversifying distribution of VOA content in Africa.
- Addressing critical personnel and capital needs in RFE/RL bureaus.

The proposed budget also continues funding for ongoing programming to critical audiences, including: 24-hour streams for VOA Persian News Network television and RFE/RL Radio Farda to Iran; Alhurra, including Al Youm, the daily three-hour Alhurra Television program broadcast live from the Middle East; Radio Sawa to the Middle East; Afia Darfur to Sudan and Eastern Chad; VOA and RFE/RL Pashto programming to the Afghanistan/Pakistan border region; RFE/RL and VOA Dari and Pashto programming to Afghanistan; VOA Urdu radio and television broadcasts to Pakistan; VOA Somali to Somalia; a 10-hour coordinated RFA and VOA stream to North Korea; and a 30-minute, five-day-a-week VOA Spanish television program for Venezuela.

The FY 2011 budget request balances competing policy priorities with available budget resources. The request proposes to reduce contracting costs and other Agency support expenses through efficiencies. The request also includes several program adjustments, including the closure of selected language services and programs, operational efficiencies in broadcast services, and realignment of transmission networks.

The Broadcasting Board of Governors looks forward to working with the Congress toward enactment of the proposed funding levels and program proposals. Further detail on the requested BBG budget is available at <http://www.bbg.gov/reports/budget.html>

The Broadcasting Board of Governors is an independent federal agency, supervising all U.S. government-supported, civilian international broadcasting, whose mission is to promote freedom and democracy and to enhance understanding through multimedia communication of accurate, objective, and balanced news, information, and other programming about America and the world to audiences overseas. BBG broadcasts reach an audience of 171 million in 100 countries. BBG broadcasting organizations include the Voice of America, Radio Free Europe/Radio Liberty, the Middle East Broadcasting Networks (Alhurra TV and Radio Sawa), Radio Free Asia,

and the Office of Cuba Broadcasting (Radio and TV Marti).  
(dxld Feb 2) see also LW Erching item under GERMANY.

VOA had two locations in Pitt County.

The location referred to as VOA Site C, located in western Pitt County off N.C. 43 North, was acquired by East Carolina University in 1998, according to university records.

Budget cuts quiet Voice of America. The federal government wants to close the Voice of America transmission site located in Pitt County. President Obama's Fiscal Year 2011 budget for the Broadcasting Board of Governors recommends funding increases to update satellite and other broadcasting technology. But the improvements come at the loss of the Pitt County Voice of America site and reductions in engineering staffing.

The annual NASB/DRM two-day meeting was held in May at the Holiday Inn, Nashville, Tennessee, hosted by World Christian Broadcasting and Radio Station WWCR.

I spoke to Larry Vehorn, engineer for WHRI Cypress Creek, South Carolina, and he confirms that WHRA in Greenbush, Maine has signed off the air for good. All equipment has been dismantled. Former frequencies for WHRA have been reassigned for WHRI usage. NASB member LeSea Broadcasting continues to operate shortwave stations WHRI in South Carolina and T8WH in Palau (South Pacific).

KJES is back! Not reported for almost two months, but on 11715, Feb 2 at 1449 UT I am hearing some off-key singing, a dead giveaway, 1450 UT into OM intoning verses, undermodulated and mixing badly with at least two other stations, i.e. R. Liberty in Uzbek via Lampertheim, and ChiCom jamming, probably CNR1 (tho Aoki does not show it as jammed, we know they jam other Uzbek services).

This mess quit at 1459 UT, but now there is an open carrier as Vatican is about to start relaying RVA Philippines in Tagalog/English back to the jobless Catholic Filipino Gastarbeiter stuck in the UAE et al. Can't make much out of KJES while this is on, but at 1518 UT I think I can detect KJES still under there.

Finally at 1559 UT frequency is clear for KJES, monotone OM preacher in English with robokidsinging off-key in background. 1559.5, kid ID in English with usual "please let me know if you can hear me" but not "and get me out of here!", 1600 UT into Spanish as scheduled. Still very undermodulated and must strain to copy. Now there is increased ACI from music on 11720 kHz which is RFA in Uighur via Saipan plus ChiCom jamming; also squeezed on lower side by weaker N Korea. Since KJES had been making a lo het with co-channel stations, I determine it is slightly off-frequency to the low side, but probably not as low as 11714.90 kHz.

Now we need to check its other scheduled transmissions to see if they are back too: 1900-2100 on 15385 kHz, 0200-0330 on 7555 kHz. For starters: yes, 15385 kHz with kidchoir at 1905 UT on Feb 2, doing its best against Greenville 15390 kHz LavwadrAmerik.

All three KJES frequencies supposedly rotate the LP antenna to different azimuths at top of each hour, tho I did not notice any difference at 1500 and 1600 UT. Long ago, I believe they had problems with it being stuck in one direxion. Even when active, their broadcasts were sporadic, and some listings show KJES as M-F only.

(Glenn Hauser-OK-USA, dxld Feb 2)

Re 4775 ... have no idea how long WWCR had been on 4775 kHz tonight, as I was not monitoring between 02 and 06 UT. However, a dxld monitor in South Carolina also caught 4775 kHz at 0600 UT with Alex Jones, instead of on 5070 kHz. And Noble West in TN noticed 5070 kHz was off already at 0430 UT.

I heard 4775 kHz on air today (Feb 4) at 0745 UT with a good signal - nothing on 5070 kHz. What is the difference between these two frequencies - does the lower end one propagate better than the high end one? At 0750 UT there was only a unmodulated carrier on 3215 kHz at good strength.

Brother Stair was in full flow via 3185 kHz at 0750 UT - another good signal - but only a carrier yesterday. Maybe he had fallen asleep at the mike? I assume he has to sleep some time!

(Noel R. Green-UK, dxld Feb 4)

WWCR on 4775 kHz. Clearing it can receive it from +0900 UT in Japan. However, QRM of AIR Imphal India from 1030 UT yesterday Feb 3.

(Sei-ichi Hasegawa-JPN NDXC, dxld Feb 4)

5070 antenna is of ITU #902 type, like  
900-908 type - rhombic horizontals

#902 RH 155/68/40

maybe 5070 kHz range suffers more by UTE services worldwide, or the  
horizontal rhombic matches better gain on lower 60 mb edge?

ITU explanation of 902 antenna type

2.8 Type 8: Rhombic antennas

Designation: RH l/h, where:

l : length of one side of the rhombus (m).

h : one half of the interior obtuse angle of rhombus.

h : height of rhombus above ground (m).

FIG 7 Horizontal rhombic antenna.

The rhombic antenna has been extensively used for HF communications. It  
continues to be used for fixed-services point-to-point links. It has also  
been used for HF broadcasting but is no longer recommended for this  
purpose. The antenna consists of four straight wires of the same length l  
arranged in the form of a rhombus.

A typical rhombic antenna design would use side lengths of several  
wavelengths and be at a height of between 0.5-1.0 l at the middle of the  
operating frequency range.

The rhombic antenna differs from the array of dipoles since it belongs to  
the travelling-wave antenna category, i.e. the currents in the conductors  
of the antenna are substantially travelling waves originated from the  
feeding point and propagating through the wires towards the terminating  
resistance.

A considerable amount of power may be lost in the terminating resistance  
and represents the price that has to be paid for some desirable features  
such as simplicity of construction, relatively wide bandwidth of operation  
and high directivity gain.

(ITU explanation; wb dxld Feb 4)

VATICAN STATE 4004.253 Vatican Radio, 1959 UT, noted in passing with  
interval signal, into talk by a man. Fair.

#####

The annual NASB/DRM two-day meeting was held in May at the Holiday Inn, Nashville, Tennessee, hosted by World Christian Broadcasting and Radio Station WWCR.

Increasing the Reach of Shortwave Broadcast Systems  
Small-footprint Antenna System with Unlimited Flexibility  
from Thomson Radio Broadcast

Shortwave broadcast systems can reach millions of people anywhere, anytime from a single transmission site. The possibilities are theoretically unlimited. On the other hand, shortwave infrastructure is a notorious power consumer and stations require a lot of land to accommodate adequate antenna systems. Thomson's newest rotatable curtain antenna helps broadcasters with limited space and budget to make important power savings while increasing considerably their coverage flexibility. The Thomson HP-RCA 2/2 (High Performance Rotatable Curtain Antenna) is a highly interesting alternative system solution for broadband fixed curtain antenna configurations.

HP-RCA 2/2 services similar coverage areas as the classical LPD (Log Periodic Dipole Antenna) with up to 45% higher efficiency of the radiated power into a defined target area. Additional comparative figures of merit include

In addition, the HP-RCA 2/2 has a better overall efficiency, requires less land, is easier to maintain and affords better reliability with regard to storms and electrostatic effects. The footprint of this powerful and highly flexible system is surprisingly small. With dimensions of 51m x 51m, the foundation surface needs less than 12m x 12m. The covered area has a radius of approximately 50m.

With an overall weight of 80t, the antenna has a maximum survival wind speed of 240 km and a maximum operational wind speed of 120 km. It takes less than 3 minutes for a 180° rotation. Based on a rigid array and a tubular shaft, the HP-RCA 2/2 is a back-to-back arrangement of a low band and a high band curtain antenna equipped with a reflector screen. The 2/2 configuration gives a good radiation pattern performance with moderate structural effort.

Whereas the classical HR 2/2 curtain antenna solution is based on a fix structure with phasing system limited to less than 20° azimuthal slewing with considerable sidelobes, the new rotatable structure with a central shaft has 360° azimuthal performance radiation patterns without sidelobes. (NASB newsletter, Dec 2009)

DX and SW meetings list 2010.

Hello, here follows a tentative list about DX and SW meetings to be held this year. Updates and amendments are very welcome. best 73  
Risto Vahakainu  
Finnish DX Association

Shortwave Radio Meetings - 2010

Date: February 27 (1430-1700 BST)  
Location: Reading International Solidarity Centre (RISC), 35-39 London Street, Reading RG1 4PS, England  
Organization: Reading International Radio Group  
Expected Attendance: 20  
More info: <www.bdx.org.uk>  
Note: these Reading DX meetings are held with 1-2 months interval.  
Next ones: 10 April, 5 June, 24 July

Dates: March 5-6  
Location: Kulpville, PA, USA  
Organization: Winter SWL Fest  
Expected Attendance: 200  
More Info: <www.swlfest.com>

Dates: May  
Location: Ontario, Canada  
Organisation: National Association of Shortwave Broadcasters  
More Info: <www.shortwave.org> (pages under construction)

Dates: May 14-16  
Location: Dayton, Ohio, USA  
Organization: Dayton Hamvention  
Expected Attendance: 20,000  
More Info: <[www.hamvention.org](http://www.hamvention.org)>

Dates: June 4-6  
Location: Vejers Beach, Jutland, Denmark  
Description: The annual general meeting of DSWCI and listening camp  
Organization: Danish Short Wave Club International  
Expected Attendance: 30  
More Info: <[www.dswci.org](http://www.dswci.org)>

Dates: June/July  
Location: Sweden  
Description: The annual DX-Parliament of Swedish DXers  
Organization: Swedish DX Federation  
Expected Attendance: 30  
More Info: <[www.sdx.org](http://www.sdx.org)>

Dates: June 25-27  
Location: Friedrichshafen, Germany  
Description: Ham Radio, biggest annual hamfest in Europe  
Expected Attendance: 19.500

Dates: July  
Location: Mexico  
Description: The Annual Mexican DX Meeting  
Expected Attendance: 50  
More Info:

Dates: August 6-8  
Location: Haapavesi, Central Finland  
Description: The Annual Summer Meeting  
Organization: The Finnish DX Association  
Expected Attendance: 70  
More Info: <[www.sdxl.org](http://www.sdxl.org)>

Dates: August 21-23  
Location: Tokyo, Japan  
Organization: Tokyo Ham Fair  
Expected Attendance: 30000

Dates: September 3-8  
Location: Berlin, Germany  
Name: IFA Internationale Funkausstellung  
Description: Consumer Electronics Fair - Including Radios

Dates: September 10-14  
Location: Amsterdam, Holland  
Name: IBC Expo,  
Description: Media trade show

Dates: September 30-October 3  
Location: Ankara, Turkey  
Description: European DX Conference

Organization: European DX Council / Voice of Turkey

Expected Attendance: 50

More Info: <[www.edxc.org](http://www.edxc.org)>

#####

ALBANIA 13640 Seemingly the feeder line from Radio Tirana studio control center to Shijak transmitter site was out of order this afternoon at 1527 to 1600 UT, Feb 11. Signal from Shijak was S=9+30dB loud and clear. Wonderful Albanian songs as station identification or even new music signature at 1527 til 1530 UT. Radio Tirana ID by male.

Then the whole 1530-1600:00 UT broadcast was not in English, but in Albanian language instead. Noted IDs like Radio Scupie, Radio Kosova live discussion relay, probably from Albanian domestic broadcasting program. (wb, wwdxc BC-DX TopNews Feb 11)

ARGENTINA 11710.786v on Jan 29 at 0100 UT, RAE Buenos Aires, announcements in several languages, fair. (Giampiero Bernardini-ITA, 6 Feb, playdx yg via dxld Feb 11)

ARMENIA/CANADA/CYPRUS/JAPAN/MARIANA ISL-Palau/SOUTH AFRICA/TAIWAN/TAJIKISTAN/UKRAINE/UAE/U.K./UZBEKISTAN Winter B-09 Schedule of VT Communications Relays. Part 2 of 3:

WRN Premier League Football commentaries (times vary)  
1230-1930 on 6230 TAC 100 kW / 090 deg to CHN Chinese Sat/Sun  
1500-1930 on 5800 KV 100 kW / 330 deg to U.K. English Sat/Sun

(R BULGARIA DX MIX News, Ivo Ivanov, via wwdxc BC-DX TopNews Feb 8)

The English of WRN England Premier League Football was not able to receive Sat Feb 6. 1600-1800 were able to receive on Sun Feb 7 on 5800 kHz.

I can't receive Chinese on 6230 Hz anymore; after Manchester.United vs Burnley of Jan 16.

(Sei-ichi Hasegawa-JPN NDXC, dxld Feb 8)

Is VT really involved in these transmissions and WRN only re-sells VT services? I thought WRN makes shortwave arrangements directly with Radioaginstvo- M, Sentech and Media Broadcast.

KV Kiev, i.e. Brovary. If so 5800 would not be co-located with 5830 etc. (Radio Ukraine International with 100 kW) but instead with 5970 (UR1). (Kai Ludwig-D, dxld Feb 8)

(Ian Baxter-AUS, SW TXsite Feb 8)

Re: CVC Closing Darwin: Hi Glenn, Sorry, I am pretty busy right now so I've not had much time to answer your questions. We're past the weekend and Darwin is now closed so too late on the last question. As to the others:

GH: Whose decision was it to dismantle the Darwin facility rather than repurpose it? One would have thought that Radio Australia would be glad to have it back for its own full use. Since CVC was leasing it, whose property is it now, on the air or not?

AF: CVC's lease expires at the end of June so we have to vacate the site by then. You would have to ask Radio Australia directly about their intentions.

GH: Are some of the transmitters, antennas destined for other sites?

AF: CVC is the owner of all the technical equipment on site, so yes, this is variously being sold, redeployed, scrapped.

Do you plan to mark the final transmission(s) in any particular way, special programming or announcements, and if so, exactly when; specially endorsed QSLs?

AF: the time has passed, but I don't know the answer in any case!

Hope that helps, sorry again for the delay.  
(Andrew Flynn, CVC HQ UK, Feb 4, WoR, dxld)

**RADIO AUSTRALIA USING NEW RELAY SITES AFTER DARWIN CLOSES.**

Mike Bird writes: The Cox Peninsula, Darwin HF transmitter station in Australia was closed on 31 January 2010. CVC, a Christian broadcasting company who leased the transmission equipment since 1999 after the then Howard government closed the site in 1997, had decided to drop HF

broadcasting to Asia.

The original lease to use the site included a get out clause after 10 years. The land the transmitter complex is built on has since been claimed by a local Aboriginal community in the Northern Territory. In the past few days the technicians have started decommissioning the equipment and lowering the antennas. This has meant Radio Australia (RA) has had to find alternative HF transmitting relays to service Asia. VT based in the UK have so far found two sites that can provide relay transmissions for RA to broadcast to Asia at Medorm (HBN) Palau in the Pacific Ocean and Dhabbaya (DHA) in the United Arab Emirates.

The schedule is as follows (all times UT):

0000-0030 Indonesian to West & central Indonesia on HBN 15225  
0100-0130 Burmese to Burma on HBN 15655  
0400-0430 Indonesian to West & central Indonesia on HBN 15780  
0500-0530 Indonesian to West & central Indonesia on HBN 15590  
1300-1430 Chinese to SE China & SE Asia in general on HBN 9890  
1600-1630 Burmese to Burma on HBN 9965  
2200-2400 English to SE Asia (Indonesia, Vietnam) on HBN 12040  
2200-2330 Indonesian to West & central Indonesia on DHA 5935  
2300-2330 Burmese to Burma on DHA 5955

Discussions are currently taking place between RA, VT and the Singapore government about the possible use of the Kranji relay facility to further bolster RA's transmissions to Asia.

(Mike Bird-AUS, Febr 6th, by Andy Sennitt-HOL, RNW MN via WoR, dxld Feb 11)

Comments on "R. Australia using new relay sites after Darwin closes"

3. #3 Glenn Hauser on Feb 8th

So the Singapore government has veto power over what VT relays from Kranji? Why would they veto Radio Australia?

4. #4 Andy Sennitt on Feb 8th

The word 'veto' does not appear in the above story, neither is it implied. But presumably the media law in Singapore requires the government's approval for relays of foreign broadcasters. There's nothing unusual in that.

5. #5 Kai Ludwig on Feb 8th

Indeed. Here in Germany an approval from the Foreign Office is necessary to transmit foreign broadcasters on shortwave.

However, in the case of the ABC this approval would be just a formality. Thus it is indeed interesting that the ABC needs to "discuss" the possibilities of using transmitters in Singapore with the authorities there. This wording suggests that the matter is a bit more complicated, and this sheds an interesting light on aspects of media politics.

And in regard to the Darwin/Cox transmitter site I understand the situation to be such that

1/ closing it down and dismantling it is unavoidable, due to the station grounds being claimed by the previous or just legitimate owners (a problem

caused four decades ago, when the station has been set up) and

2/ the equipment is still owned by either Broadcast Australia or an Australian authority, so it's up to them to decide what to do with it (the three Thomson transmitters are certainly still too valuable for the scrap yard and could be sold to an interested operator).  
[see CVC Andrew Flynn interview above]

6. #6 Andy Sennitt on Feb 8th

I wouldn't read too much into the wording. I suspect the discussion has more to do with VT being able to negotiate a favourable price, as RA's budget is very limited. I wouldn't call it 'media politics', it's simply business. I cannot comment on the situation regarding Darwin as I am not a lawyer.

ECUADOR One 100 kW transmitter, some lower powered (30/10 kW) transmitters and other material are left from the Pifo site, closed down and dismantled by HCJB Global. This equipment, in particular the 100 kW transmitter, has been donated to Vozandes Media. It is planned to set it up in Ecuador again for broadcasts in German and Portuguese, in a joint effort with HCJB Brazil. They hope to be able to keep the transmissions from Chile on air until this new facility is ready.  
(via Kai Ludwig-D, dxld Feb 6)

Plaene fuer eine neue HCJB-Kurzwellenstation.

Eine neue Ausgabe von Medien aktuell: Kirche im Rundfunk ist bei  
<[www.biener-media.de/medien-aktuell.html](http://www.biener-media.de/medien-aktuell.html)>  
abzurufen. In Ergaenzung einer dortigen Meldung das Nachstehende:

Plaene fuer eine neue HCJB-Kurzwellenstation.

Nachdem die US-amerikanische Zentrale von HCJB Global das mit dem Bau des neuen Grossflughafens von Quito verbundene Sendeende aus Pifo zum Ausstieg aus der Kurzwelle genutzt hat, haben die Mitglieder der deutschen Redaktion zunaechst die Initiative ergriffen, die Kurzwellensendungen fuer Ekuador fortzufuehren.

Aktuell sendet HCJB La Voz de los Andes vom Ersatzstandort Pichincha nach folgendem Sendeplan auf 6050 kHz (10 kW): 08.30 Quechua, 11.30-15.00 Castellano sowie 19.00 Castellano, 00.00 Waodani, 00.30 Cofan, 01.00-05.00 Castellano.

Obwohl Ausruestung von Pifo zum Standort von HCJB Australia verlegt wurde und anderes Material wohl nicht wiederverwendbar ist, ist immer noch einiges uebrig (ein 100 kW HC 100 Sender, mehrere 30 und 10 kW Sender, Antennen, Leitungsmaterial...). Vozandes Media plant deshalb auch die Wiedererrichtung einer internationalen Kurzwellenstation.

Wie Iris Rauscher auf Nachfrage ausfuehrte, hat Vozandes Media von HCJB Global einen 100 kW-Sender gestiftet bekommen, "und wir planen diesen Sender fuer die Programme in Deutsch fuer Europa neu in Ecuador aufzubauen. Wir suchen gerade nach einem geeigneten Grundstueck. Wenn es dann so weit ist koennen wir vielleicht auch andere Sprachen (Portugiesisch und Kechwa, Plattdeutsch etc?) mit dazu nehmen. Dann koennten wir auch mit DRM weitermachen."

HCJB Brasilien wird sich an den Kosten beteiligen und Mitbetreiber werden.

Dennoch: "Das ist ein grosses Projekt fuer uns. Wir hoffen auch auf neue Mitarbeiter gerade fuer die technische Seite."

Sendungen mit suedamerikanischer Flaechendeckung werden aktuell aus dem chilenischen Calera de Tango [bei Santiago] ausgestrahlt. Bei den beteiligten Zweigen von Radio HCJB hofft man, die Sendungen aus Chile so lange fortfuehren zu koennen, bis Vozandes Media einen neuen Kurzwellenstandort in Ekuador in Betrieb nehmen kann.

ETHIOPIA 7110.07 Radio Ethiopia, 2035-2101\*, Jan 31, variety of local pop music and Western/Euro-pop music. Amharic talk. Sign off with National Anthem. // 9704.19 kHz - both frequencies fair to good.  
(Brian Alexander-PA-USA, dxld Feb 6)

FRANCE/TAIWAN 15225 RTI Taiwan via Issoudun France relay in Russian at 1440 UT Feb 11. S=9+10dB from 500 kW powerful beast.  
(wb, wwdxc BC-DX TopNews Feb 11)

FRENCH GUIANA 17755 The Disco Palace has started broadcasting the best of disco music of all time to listeners across Europe and North America using Digital Radio Mondiale (DRM). The Disco Palace is based in Miami, USA and owned by Alyx & Yeyi, LLC.  
[i.e. TDP Ludo Maes, Belgium connection / belonging. Previous TDP DRM transmissions via Darwin, Australia ceased on Feb 1st, 2010, wb.]

The programme schedule includes hits from the USA, hits from the UK, great hits of the 1970s and 1980s, slow disco hits, etc. Times, frequencies and contact information are on the station's website  
<<http://www.thediscopalace.com/>>

The broadcast service provider is TDP and the broadcasts are via TDF facilities. The current shortwave schedule according to the DRM Software Radio Forums is:

To Europe: 1400-1500 UT on 6015 kHz Issoudun, using 60 kW RMS and 2/2 antenna at 60 as on TDPradio transmissions.

To North America: 1900-2000 UT: TDPradio, 2000-2100 UT:  
The Disco Palace.

Frequency: 17755 kHz  
Power: 100 kW RMS  
Antenna: 4 / 4 at 311 degr

DRM parameters: DRM B mode, Bandwidth: 10 kHz, MSC 64 QAM, CR 0,6;  
encoding: AAC + SBR. Parametric stereo: to be confirmed

(The Disco Palace, via dxld Feb 11)

Andy Sennitt comments: I wish them well. However, a new RNW survey of over 1000 Dutch expats has revealed that nobody under the age of 35 listens to RNW on shortwave, which was hardly a surprise to me. Only a handful of shortwave listeners (literally a few hundred) have DRM receivers, so it isn't clear who this service is intended for. And since the broadcasts are in the local afternoons, I would imagine that any potential listeners are likely to be at work or school. Or am I missing something?

(Febr 10th, by Andy Sennitt-HOL, RNW MN blog via dxld Feb 11)

2 Comments on "The Disco Palace launches broadcasts in DRM"

#1 ruud on Feb 10th

I am in line with your comment Andy. Also nobody will try and find a station that only provides music for a couple of hours with many alternatives doing 24/7. SW is for 35 + and what do they expect from SW additional to their local content.

Good unbiased News, and music that is not or limited available on other platforms. Examples: Oldies 60-80, Jazz/Oldies 40-50, Salsa, "Bollywood". Dynamic and catchy. With personlaity presenters. And more News then just 1 minute 30 sec bulletins. So current affairs for say 15 min at certain times of the day.

Platforms SW and Internet, Satellite. The production of these formats is rather cheap, and can be done by major broadcasters, most of them already have a newsroom, so this comes at no extra costs.

#2 Kai Ludwig on Feb 10th

I guess the potential audiences for such a format rarely go still to school ...

What are the other businesses of the company that runs this project, Alyx & Yeyi? Their website says that "we count with more than 12 years working as a service provider of worldwide radio broadcasting in Europe, Asia, Africa, Middle East and North America. Alyx & Yeyi owns the required technical infrastructure in order to provide broadcasting service to Latin America and the Caribbean Region ...".

And, if you allow me to make no secret of this circumstance, what I read between the lines of this press release is despair:

<<http://www.drm.org/news/detail/news/new-drm-channel-of-disco-music/>>  
(RNW MN blog comments via dxld)

17750-17755-17760 is surely via Guiana French, tho not stated, as if no one would care. If they are such a big player in IBC, how come we have never heard of Alyx & Yeyi?

Part of the Olympics coverage by the public broadcasters in Germany will be an ARD-Olympianacht, produced by MDR Info (because Mitteldeutscher Rundfunk is in charge for the ARD coverage) and to be broadcast from Feb 12 to March 1 daily 2200-0500 UT. It will be relayed by Deutschlandradio Dokumente&Debatten, hr-info, NDR Info Spezial, WDR Event and Antenne Saar, besides B5 aktuell and SWR cont.ra who relay MDR Info at night anyway.

For the AM side this means that the programme will be heard on 153, 177, 576, 702, 711, 720, 774, 783, 792, 828, 882, 972, 990, 1017, 1044, 1179, 1188, and 1485 kHz.

Re Nils Schiffhauer DK8OK comment about "round the world echos" [seen on Perseus screen by 138 ms delay] here in Europe especially at 06-08 and 14-15 UT range.

Die 138 ms rund-um-den-Globus Echos gibt es zwar seit dem Wochenende aufgetretenen Sonnenflecken so circa zwischen 6 und 8 UT oefter, vor allem hier in St. sind die Powerstationen Wertachtal, Nauen und Issoudun zu vermerken.

Heute Nachmittag so 14-15 UT waren es die gleichen Verdaechtigen mit den dicken Muckis auch, wie Wertachtal 13655, 15285, 15325; Nauen 13700, sowie auch Vatikan Radio aus Santa Maria de Galeria mit 500 kW auf 13765.  
(wb, wwdxc BC-DX TopNews Feb 11/12)

GREECE R Filia relay today on 11645 kHz instead. ERT - ERA5 multi foreign languages relay of Radio Filia towards Europe at 0600 to 1000 UT usually on 12105 kHz in B-09 appeared on the summer frequency today Feb 8th.

German nx in progress at 0908 UT S=9+30dB signal in Germany.

English 0600-0700, French 0700-0800, and supposedly Sp 0800-0900 too, heard on Feb 9th.

Scheduled - but not in reality anymore. Europe (Foreign languages):  
0600-1000 665 12105 (Albanian, English, French, Spanish)  
1000-1200 665 German, Russian, Arabic, Serbocroatian,  
1200-1700 665 Bulgarian, Polish, Roumanian, Turkish)

Noted R Filia Serbo-Croatian news at 1430-1500 UT today. R Filia

<<http://tvradio.ert.gr/radio/liveradio/filia.asp>>

[later] 0600-0650 UT Greek sce on 7475 and 9420 kHz.

0600-0700 UT Radio Filia English sce on 11645.

At 0621 nxcast "48 cm snowfall in Baltimore ..."

so 0600 En, 0700 Fr, 0800 Sp, German 0900, Russian 0930-1000 UT is okay at present.

INDIA 4880 AIR Lucknow hrd Feb 8 via long path from 0119 UT tune w/ man ann, woman ann and then what sounded like an interview or discussion

between two men 0125 to 0135 UT. This was followed by vocal/inst Indian mx

w/ man ann at 0136.5. Steady S2 w/ no QRM but moderate lvl of local noise.

Fading slowly after 0130 UT consistent with local sunrise in Lucknow.

(Bruce W. Churchill-CA-USA, DXplorer Feb 12)

IRAN/GERMANY Deutsche Welle: Satellite Broadcasts Blocked Once Again.

As of Wed, Febr 10, the broadcast of Deutsche Welle's television program

has been jammed once again. According to the information received by

Germany's international broadcaster, the satellite interference - like

that in December 2009 - is most likely coming from Iran.

In a letter to the Iranian Embassy in Germany, Director General Erik

Bettermann insistently objected to the "direct interference of the reception of international information offerings". He went on to say that the repeated limitation of freedom of opinion and freedom of speech by the Iranian administration is "no longer acceptable".

The Director General pointed out that not only has the television broadcast been jammed, but that Deutsche Welle radio and especially Internet content has been censored by Iran. Since Wednesday afternoon, DW-TV's satellite broadcast has been selectively jammed. The signal, which is broadcast using Hotbird 8, a satellite that provides programming for Europe and bordering regions - including Iran - was available for a few hours overnight, but was once again jammed on the morning of Thursday, February 11.

Hotbird 8 is also used as relay point for the Nilesat satellite and the provider of Deutsche Welle's live stream service - both of which were also affected due to the interference. In this respect, there have been problems in receiving DW-TV programming for Europe (English and German) and for the Arab world (Arabic and English) as well as the Farsi radio service. The DW-TV ARABIA broadcast has in the meantime been re-established using a Hotbird transponder.

Deutsche Welle had already experienced interference on Dec 7-8, 2009 on its Hotbird transponder. According to the information provided by Eutelsat, the source of the interference could be clearly localized and identified: the jamming signal came from Iran.

Bettermann pointed out the Deutsche Welle's Farsi service via shortwave in and around Teheran has been a problem for quite some time.

However, radio programming was still available on the website <[www.dw-world.de/persian](http://www.dw-world.de/persian)> and although this was regularly blocked, users in Iran knew of technological ways to access it. (DWL Press Release) (via Alokesh Gupta-IND, dxld Feb 12)

Bettermann pointed out the Deutsche Welle's Farsi service via shortwave in and around Teheran has been a problem for quite some time.

Never heard about this before ...

pure nonsense? local Tehran PLC hiss ?

DWL Bulgarian was jammed by Bulgarian communist dictatorship til December 1988. DWL Amharic broadcasts in last year by broadband DRM-like hissing data jamming by Ethiopia.

Regularly Iranian army security services jams whole transmissions of VoIranian Revolution, VoIranian Communist Party, Radyo Dengi Kurdistana in 3 and 4 MHz band.

Kol Israel remaining Persian service in 9, 11 and 13 MHz band is also jammed regularly by Iranian authorities. (wb, wwdxc BC-DX TopNews Feb 12)

(wb, SW TXsite Jan 24)

KOREA D.P.R. 7180 Voice of Korea, Kujang, at 2134-... UT on 9 Feb, Mandarin to EaAsia, light music, songs of the not-so-exhalted type; 35433; // 9975 kHz poor, 11535 kHz even worse.  
(Carlos Goncalves-POR, wwdxc BC-DX TopNews Feb 12)

KOREA Rep of [Clandestine] 6518 Voice of the People, Goyang, KOR, at 2246-... UT on 5 Feb'10, Korean to KRE, talks, songs; 43432; // 3912 kHz, 6600 kHz both as good.  
(Carlos Goncalves-POR, wwdxc BC-DX TopNews Feb 9)

KYRGYZSTAN 4010/4050 Kyrgyz R. on 4010 UT and relay of R. Rossi on 4050 kHz are putting in weak audio around 0130 UT via long path (our local twilight), but not yet clearly discernable pgm details. Expect these channels to improve in coming wEnks. Definite carriers visible on the

Perseus. These are also possible in local mornings, around 1400 UT.  
(Bruce W. Churchill-CA-USA, DXplorer Feb 12)

LIBYA 17725 LBJ Sabrata noted in S=9+10dB quality around 1425-1435 UT  
in English. Long comment on Luther King and speech "I have a dream, I have  
a dream ...", Feb 11.  
(wb, wwdxc BC-DX TopNews Feb 11)

MALAYSIA HFCC. The 6th Global Shortwave Coordination will be held from  
1 to 5 February 2010 at the Hotel Istana, Kuala Lumpur. Participants of  
the three coordination groups, namely The High Frequency Coordination  
Conference (HFCC), the Arab States Broadcasting Union (ASBU) Coordination  
Group and the ABU-HFC Coordination Group, representing around 90% of the  
shortwave broadcasters in the world, will take part in this conference to  
coordinate shortwave frequency schedules for the A-10 (summer) season.

As you are aware, the frequency channel situation for shortwave radio is  
always changing because of the 11 year solar cycle and seasonal effects,  
as well as because of new or changed frequencies of shortwave broadcasters  
around the globe. The Coordination Conference provides you and your  
organisation with a valuable opportunity to coordinate your frequencies  
directly with the frequency managers of other broadcasters and prevent  
interference occurring in your radio services.

If you or your organisation is not present at this conference, elimination  
of interference in your shortwave services and preservation of your  
shortwave frequencies cannot be ensured. Therefore, we strongly suggest  
that you consider participating in this conference on behalf of your  
organisation.

We are delighted to invite you and your organisation to actively  
participate in this conference. Please also copy this invitation to all  
your colleagues and to those who may be interested otherwise.

(ABU via Yimber Gaviria-CMB, dxld Jan 29)

MARIANA ISL-Palau/SRI LANKA Frequency change of CVC International in  
Indonesian:  
0700-1000 on 15725 HBN 100 kW / 270 deg to SEAs, ex 0400-1000 on 17820 DRW  
(R BULGARIA DX MIX News, Ivo Ivanov, via wwdxc BC-DX TopNews Feb 8)

Aha?! Only these three hours (and Mon-Fri only), or are more  
transmissions, perhaps also via other sites, in the pipeline? And what  
about CVC Chinese?  
(Kai Ludwig-D, dxld Feb 8)

CVC Indonesian can receive on 17820 kHz at 0830 UT, but is very weak.  
Does Darwin still live?  
(Sei-ichi Hasegawa-JPN NDXC, Feb 2!, ibid.)

17820 former CVC Darwin in Indonesian outlet, seemingly now carried via  
Tashkent-UZB site at 0700-1000 UT. (wb)

CVC Indonesian was not able to receive on Feb 6 & 7.  
<[http://www.mediakat-blog.jp/usr/hiroshi/t8wh\\_2010feb7.gif](http://www.mediakat-blog.jp/usr/hiroshi/t8wh_2010feb7.gif)>

CVC Chinese is broadcast on satellite live radio and the Internet.  
(Sei-ichi Hasegawa-JPN NDXC, dxld Feb 8)

Frequency change of CVC International in Indonesian:  
0700-1000 15725 HBN 100 kW 270 deg to SEAs Mon-Fri (not Sa&Su)  
(Sei-ichi Hasegawa-JPN, NDXC HQ Feb 8)

Collision on 9930 kHz T8WH Palau and VOA Iranawila Sri Lanka.  
Feb 6 at 1440 UT I am hearing an American preacher, good signal atop some weaker audio. Preacher is certainly T8WH PALAU, registered here at 0700-1800 UT, and underneath is VOA via SRI LANKA at 1400-1600 UT. Azimuths are 345 and 322 degrees, respectively, which means a worse clash likely in Asia, altho the CIRAF target zones are officially distinct, 43-45 and 41, respectively.

1457 UT, plug for WHR Bible giveaway and off by 1459 UT, uncovering VOA weak and fluttery, but apparently they are about to sign off too.  
(Glenn Hauser-OK-USA, dxld Feb 7)  
same QRM log also widely reported on A-DX ng.

MOLDOVA On MW 999 kHz Grigoriopol site heard Mon-Fri in Russian at 0430-0500 UT with ID "Pragramma Prdnestrovia". It is already renamed ID from the earlier "Radio Pridnestrovia".

All news and comments are with friendly words to Moldovian authorities in Chisinau, not as earlier. The announcement at 0457 UT was "We are on the air Mondays to Fridays on FM from 11 and from 20 and on MW 999 kHz from 6 to 8 MT", resp. 08 & 17 UTC on FM and 0300-0500 UT on 999 kHz.  
(Rumen Pankov-BUL, wwdxc BC-DX TopNews Feb 5)

6240 - Radio PMR from Tiraspol, Pridnestrovye, has considerably expanded their output recently on 6240 kHz. Over the past couple of days I have monitored the following schedule:

1800-2000 Radio PMR (probably Mon-Fri)  
1800 English, 1815 French, 1830 German,  
1845 English, 1900 French, 1915 German  
1930 English, 1945 German

(2000-2200 Family Radio relay)

2200-0000 Radio PMR (Sun-Thurs?)  
2200 English, 2215 French, 2230 German  
2245 English, 2300 French, 2315 German  
2330 English, 2345 German

Massive signal here throughout the entire span, not surprising really with up to 500 kW from Moldova beamed this way.  
(Dave Kenny-UK, BrDXC-UK Feb 12)

MONGOLIA 4830 Mongoliin R, Altay, 2342-2356, 05 Feb'10, Mongolian, talks, classical music peces; 24331, CODAR QRM. 4895 Murun not parallel.

4895 Mongoliin R, Murun, at 2346-0004 UT on 5 Feb'10, Mongolian, pops, talks, light music, TS, talks (newscast?); 35332; 4830 kHz Altay not parallel.  
(Carlos Goncalves-POR, wwdxc BC-DX TopNews Feb 9)

MONGOLIA/RUSSIA Checked on different times and weekdays but seems radio Voice of Mongolia in Russian is not using more the facilities of Voice of Russia in Russian and it is probably since 01.01.2010.  
(Rumen Pankov-BUL, wwdxc BC-DX TopNews Feb 5)

NETHERLANDS Google Earth imagery. Some high resolution place. Another GE image update.

Distant View of Lopik MW (former SW) site:

Lopikerkapel

Google Earth imagery. Some high resolution place. Another GE image update.

Distant View of Lopik. PLUS: View of location where former Huizen site was. Huizen was before World War II site of a large transmitter.

<[http://en.wikipedia.org/wiki/Huizen\\_transmitter](http://en.wikipedia.org/wiki/Huizen_transmitter)>

a.. Broadcasts were considerably improved in 1937 with the construction of beam antennas supported by the world's first wooden antenna masts rotatable on two concentric circular rails at the transmitter site in Huizen.

b.. Rotatable shortwave antennas were not in common use until the 1960s, so PCJ was far ahead of its time with its introduction of rotatable HRS type antennas.

Huizen transmitter was one of the first broadcasting stations in the Netherlands. It was built in 1923 as 500 watt experimental transmitter whose power was increased in 1926 to 5000 watt. At Huizen transmitter in 1926 possibly the first rotating shortwave transmission antenna consisting of 2 60 metres tall towers were built.

The towers of Huizen transmitter were well-known landmarks and often shown on postcards. In 1935 they were demolished after the erection of a mast radiator near Hilversum in 1931.

A replica of the shortwave antennas can be found on a roundabout in Huizen.

NIGERIA 15120 Due of increased sunspots Nigeria noted at 0700 UT with S=9+20dB. French nx at 0705 UT under slogan "un peuple, une nation." Magnetic tape music totally distorted, news information towards Mali, Chad, Burkina Faso etc.  
(wb, wwdxc BC-DX TopNews Feb 8/9)

PAKISTAN I monitored the Pushto and Dari Language services of Radio Pakistan on 30-01-2010 on 6235 kHz. The Pushto broadcast was monitored from 1300 to 1400 UT. The signal was poor, SIO rating was 333. Modulation was bad. The programme content was below average as usual. Except a five minute news bulletin and three minute news commentary, rest of the transmission consisted of Pushto Music and Quran recitation. Dari service commenced at 1430 UT on the same frequency with a weaker signal. It directly commenced with Quran recitation without opening announcement. SIO rating was 242. The transmitter was very buzzy; at 1455 UT the signal faded away.

Both frequencies were again monitored on 31-1-2010 but no signal of Radio Pakistan was noted from 1300-1500 UT. Nowadays Pakistan is facing electricity shortage; there might be some long power failure or some frequency changes to accommodate new transmissions of Tamil, Sinhala and Nepali languages.  
(Aslam Javaid-PAK, dxld Feb 1)

Monitoring report of Radio Pakistan Frequency Changes w.e.f. 1.2.2010.  
[c.f. BC-DX TopNews #950]

Radio Pakistan Bangla service was monitored from 0900 UT Feb 5th at 9375 kHz which was followed by Nepali Service at 1000 UTC on the same frequency. SIO rating was 232.

No activity was noted on 7475 kHz, the other frequency announced for both services. Hindi service was monitored from 1105 UT at 9375 kHz which was followed by Gujrati service at 1145 UT. Pushto service was monitored from 1345 UT at 6235 kHz which was followed by Dari at 1445 UT on the same frequency.

The transmitter for all these services was API-3 100 kW with loud buzz. The programme content was poor as usual. No signal was noted on these frequencies on Febr 6 and 7th. Sinhala and Tamil services were not heard in my region on all these three days.  
(Aslam Javaid-PAK, dxld Feb 9)

Hello Aslam, Thanks for forwarding the monitoring report. Frequency 7475 kHz is not used any more, and has been replaced with 11570 kHz in // with 9375 kHz. Sinhala and Tamil 1230-1330 UT are using 11525 and 15630 kHz. What is causing the interference on 9375 in your SIO rating?

There have been reports that 4835 kHz is also being used for Pushto and Dari at the new times of 1345-1445 and 1445-1545 UT. Do you hear it?

(Noel Green-UK, dxld Feb 9)

I hope you are fine. I would like to add that on Febr 5, I checked Tamil and Sinhala services on 11525 and 15630 kHz from 1230 to 1330 UT Feb 10th but found no activity on both the frequencies. It happens that Radio Pakistan transmission via 100 kW transmitters on 25 and 19 meterbands are rarely heard in my region.

As regards transmission of Pushto and Dari on 4835 kHz from 1345 UT, I checked this frequency on Febr 5th and then on Febr 9th but found no signal. I monitored Pushto broadcast on 6235 kHz on Febr 9. The signal was very weak and buzzy. Programme content was Quran recitation, devotional Urdu song, Pushto patriotic song followed by News in Pushto and then Pushto songs till 1435 UT when the signal faded away.

(Aslam Javaid-PAK, dxld Feb 20)

15395 tentatively Islamabad R Pakistan with terrible modulation at present 1040 UT Feb 11 on 15395 kHz, broadband distorted audio on 15389.40 to 15419.54 kHz. Not listed on newly schedule like Hindi, retimed

TX photos of Krasnodar, Russia. I spent a lot of hours trying to find some photos of the Tx site near Krasnodar, Russia, but it was all in vain, except for one very very blurry. Then I had a strike of luck!

Once while surfing Google I started to use the key words "Krasnodar, Antanna farm" in Cyrillics (Russian alphabet) and all of a sudden I stumbled upon a report accompanied by three photos of this site in a small Russian newspaper, published mostly for the local farmers near Krasnodar.

It was interesting to read that the collective farmers (they are still in Russia) gathered a good crop of wheat, using the area in close proximity to the antenna towers. The land there is very fertile and valuable. Yes, indeed, the antenna farm occupies a huge territory and the towers are self-supporting, so it's possible to use the agricultural machinery there (see the satellite image of the Tx site, which I divided into two parts - North and South).

Looking at the configuration and the arrays of the towers you can realize that the camera was directed toward the East-South from the North on the satellite image. The original size of the photos was quite small and enlarging them, of course, didn't improve their quality. Sorry.

The exact coordinates are  
45 28 48,9 N 40 06 57,0 E

[later] Ms. Min Sun to Bob Hill.  
The 9545 [sic, rather 9541.55] kHz would not propagate so well right now  
due to atmospheric conditions. We also had a technical fault in the dual  
frequency transmitter (which was on 5020 kHz) owing to the antenna  
physically breaking.

We are in the process of getting it back up to 5020 kHz and making a few  
technical changes ... as we are very far away from anything here, probably  
looking in the next two weeks before we are back!  
(Bob Hill-MA-USA, DXplorer Feb 10)

SRI LANKA 882 TWR Asia Renews Cooperation with Sri Lanka  
Broadcasting Corporation.

Representatives from TWR-Asia and SLBC signing a new contract on January  
12 extending their broadcasting cooperation for another three years.  
(Photo courtesy of TWR-Asia)

The Asian division of Christian broadcaster Trans World Radio has signed a  
new contract on January 12 with the Sri Lanka Broadcasting Corporation to  
continue broadcasting from its transmitter site in Puttalam.

TWR-Asia has been working with the oldest radio station in South Asia for the past 33 years and currently broadcasts a total of 77 programmes in 24 languages via the station.

Under the new contract, which was signed after months of negotiations and discussions between both sides and which will take effect on 1 Feb 2010, the cooperation will continue for the next three years with an option to extend it for another two years.

TWR-Asia International Director Sebastian Chan said: "TWR has had a good partnership with SLBC for the last 33 years. The signing of the new contract is a testament to those years of cooperation, collaboration and trust. It is a privilege to be working with SLBC. We look forward to more years of working together, and are excited to see what possibilities the future brings for both TWR and SLBC."

David Butler, the Director of Ministry Operations, added: "Through the entire process, we saw God's hand at work in many ways \_ both big and small. We rejoice in these things, that they all came together. We continue to believe that God is moving in our ministry to South Asia, and we have another three years to reach the people of South Asia.

"Radio is still the best way to reach the masses, but we look forward to augmenting the radio broadcasts by connecting with the listeners through the internet, mobile phones, and other means of communication. Christ is transforming lives in South Asia through His word, and causing these lives to bear fruit. We rejoice that God has blessed us and allowed us to be part of this."

Founded in 1952 TWR helps lead millions of people speaking more than 200 languages and dialects in 160 countries around the world from doubt to decision to discipleship concerning Jesus Christ using radio, the internet and through face-to-face visits.

TWR-Asia broadcasts programmes across the region in more than 80 Asian languages and dialects. In addition, the ministry has undertaken many humanitarian projects including tsunami relief efforts, adopting HIV/AIDS villages in China, distributing radios in several Asian nations, ministering to women's health needs and ministering to orphans in Cambodia.

TAIWAN I'm wondering if anyone has picked up the Chinese number station on 11430 kHz from 0600 UT to about 0630 UTC ?

(Keith Perron-TWN, dxld Feb 10)

I know it's been reported this station is coming from the ROC but something makes me wonder if it really is. The accent is not a Taiwan accent, but rather a PRC accent. I listened again today and the accent is very Northern Chinese. The only thing I can think is that the numbers being called out was recorded by someone who was originally from the PRC who is now living in the ROC. Or that they wanted it to sound as if it was from the PRC, which would not surprise me.

(Keith Perron-TWN, dxld Feb 11)

According to ABI, 11430 kHz are QSY from 13750 kHz on Star-Star Broadcasting Station (Xing Xing Guang bo dian tai)-4th Radio (not New Star).

(Sei-ichi Hasegawa-JPN NDXC, dxld Feb 10)

Number station at 0600 UT. Probably New Star Broadcasting Stn V13.

Check these links ...

(wb, wwdxc BC-DX TopNews Feb 11)

U.K. I was informed V. of Croatia will be testing from England (WOF - Woofferton site) Feb. 02 to 05 only 0300-0500 UT on 7385 kHz towards America. 7375 kHz from Germany will be in // .

(DrAgan Lekic-SRB, woR dxld Feb 1)

Tnx to a tip from Dragan Lekic, V. of Croatia heard testing new 7385 kHz via Woofferton UK, Feb 2 at 0309 UT, YL with weather report in English, then something about recipes. This was // only a slight echo behind usual 7375 kHz, which is Wertachtal 100 kW at 300 degrees plus Nauen 100 kW at 325 degrees. But stronger signal from the Germans.

Evidently VTC, or whatever it is called this week, is making a bid to take business away from DTK, or whatever it is called this week. Dragan says this test on 7385 kHz is for four nights only, UT Feb 2-5 at 03-05 UT.

(Glenn Hauser-OK-USA, dxld Feb 4)

Radio Republica 9810 kHz. I am getting Radio Republica, the clandestine station for Cuba occasionally on 9810 kHz at 0130-0300 UTC. The email id in WRTH 2010 was wrong. Glenn Hauser gave new new id of

<info @ directorio.org>

I have received general email confirmation from the station within 24 hours of my sending report.

Reply was from Maria A. Lima, Special Assistant to Program Coordinator, Directorio Democratico Cubano and her e-mail id is:

<marialima @ directorio.org>

Their URL is <[http://www.directorio.org/en\\_index.php](http://www.directorio.org/en_index.php)>

There is co channel interference from China. By the way AIR Panaji is also temporarily off air on 9810 kHz at this time in Nepali. In fact I was looking for Panaji when I heard Radio Republica.

(Jose Jacob-IND VU2JOS, via wwdxc Feb 7)

11720 Two big 500 kW powerful outlets for Deutsche Welle Russian service via Rampisham at 48 and 85 degrees noted here at 1500-1600 UT, Feb 11.

(wb, wwdxc BC-DX TopNews Feb 11)

USA 4775 Re WWCR on 4775 kHz, 2300-1200 UT.

Contrary to a report from a Downunderite, that WWCR-3 is using 4775 kHz from 2300 UT due to an interference complaint to the FCC about 5070 kHz.

4775 really starts at 0300. Still on 5070 at 2311 check Feb 5 and after 0000, 0100 and 0200 Feb 6.

WWCR has been on 5070 kHz for many years, and just now someone finds it a problem during the next nine hours? As I recall, initially it was on 5060

or 5065 but soon settled on 5070.

Another check of WWCR-1 found it going strong on 7465 kHz after 2300 UT Feb 5, but almost like someone threw a switch, it became quite weak after 0000 Feb 6. I'm sure propagation would have been inbooming on previous 3240 but who knows, another interference complaint may have knocked them off that too like 3230 before it, which was used only briefly. After 0100, 7465 again had switched to 7490.

WWCR's homepage now says:

"WWCR's Transmitter #3 will broadcast on 4.775 MHz from 0300-1200 UTC until further notice. WWCR's Transmitter #1 will broadcast on 7490 kHz (moved from 7465 kHz) for 1 hour daily, 0100-0200 UTC. These changes are noted in the program guide, updated 5 February."

All these frequencies on 3, 4, 5 and 7 MHz are "out of band", really fixed bands in the US, and broadcasters trying them must take the risks associated with their usage being on a non-interference basis (NIB) to higher-priority transmissions, however sporadic.

Complaints from utility stations at home or abroad seem to count for more, or be more likely, than from broadcasters which are in-band tropical stations in their own areas.

(Glenn Hauser-OK-USA, dxld Feb 6)

Frequency change of WWCR#3 from Feb 3 until further notice:

0300-1200 NF 4775 WCR 100 kW / 040 deg to NoAm, ex5070

(R BULGARIA DX MIX News, Ivo Ivanov, via wwdxc BC-DX TopNews Feb 8)

Re WWCR on 4775 kHz. 4775, 2300-1200 UT.

Widely reported to be on 4775 kHz soon, due of complaint to FCC authority.

WWCR Nashville TN has this announcement on its website:

"WWCR's Transmitter #3 will broadcast on 4.775 MHz from 0300-1200 UTC until further notice. WWCR's Transmitter #1 will broadcast on 7490 kHz (moved from 7465 kHz) for 1 hour daily, 0100-0200 UTC. These changes are noted in the program guide, updated 5 February. "

<<http://www.wwcr.com/>> (Transmitter schedule updated 4-Feb is at:

<<http://www.wwcr.com/transmitter-sched.html>> )

However last night (Mon 8-Feb) I heard 4775 with a strong signal earlier than above, at 2347 UT (and 5070 was silent) - lady preacher (presumably Sylvia Pearce per schedule) then hymns with harmonium accompaniment. At 0003 UT though, 4775 cut off abruptly. Retuned to 5070 and heard live preacher (Joe Anthony) telling listeners his programme (Voice of the Wilderness scheduled Mon and Fri 0000 UT) would soon be on 4775 kHz instead of 5070 and to check 4775 if you couldn't hear him on 5070. So maybe 5070 will soon be dropped altogether by WWCR?

This morning had the misfortune to catch Alex Jones' 'Infowars' at 0630 UT on 4775 in accordance with the revised schedule (5070 was silent).

(Alan Pennington-UK, BrDXC-UK Feb 9)

ZNBC shortwave transmitters break down.

The Zambia National Broadcasting Corporation (ZNBC) shortwave transmitters  
that carry the Radio 1 and 2 signals in the shortwave band have developed  
a technical fault. ZNBC Public Relations Manager Miriam Mtonga disclosed  
the development in a statement in Lusaka yesterday. She said the situation  
means that listeners in remote areas will not be able to access the

service, adding that the technical fault requires importation of spare parts which has since been instituted by the national broadcaster.  
(Lusaka Times)

Andy Sennitt adds: The two 100 kW transmitters normally operate at 0245-2205 on 5915 kHz (Radio 1) and 6165 kHz (Radio 2).

<<http://blogs.rnw.nl/medianetwork/zambia-znbc-shortwave-transmitters-break-down>>

(via Mike Terry-UK, BrDXC-UK Feb 10)

4965 CVC w/ gangbusters signal on Feb 7 from 0400 UT tune with religious songs and various prayers, devotional msgs, etc. in En. SINPO 45444. Excellent sigs to past 0450 UT. One of the best sigs from CVC here in recent months.

5915 1Africa CVC w/ another gangbusters signal on Feb 9 from 0430 UT tune with up-beat Christian rock and frequent anmts in En \_ at 0500 UT when En news was scheduled, the signal took a sudden and inexplicable dive from near S5 to S2. Not sure what was going on here.  
(Bruce W. Churchill-CA-USA, DXplorer Feb 12)

ZIMBABWE 6045 R. Zimbabwe (presumed), at 0408 UT on Feb 9. In vernacular; talking till 0420 UT; drums; into Hi-Li music; covered at 0430 UT by UNID station sign-on (in French). The language and music leaves no doubt in my mind that it was them, but no ID as such. Nothing on 3396 kHz. First time I have caught them here!  
(Ron Howard-CA-USA, dxld Feb 9)

#####

RSUK - Radio Stations in the United Kingdom - New 2010 - 22nd edition is now available from the club.

BDXC's guide to all UK and Irish MW and FM radio stations.

click <<http://www.bdx.org.uk/>>

click <Radio Stations in the United Kingdom.>

This 72-page booklet follows the successful format of previous editions with its comprehensive frequency-by-frequency guide to domestic mediumwave and FM stations in the UK. It covers all BBC, commercial and community radio stations as well as the low power AM and FM stations operating with long-term restricted service licences.

Features include:

- \* All stations listed by frequency as well as station name
- \* Frequencies cross-referenced to show parallel channels
- \* Transmitter sites, powers and transmitter polarisation
- \* full postal addresses, web address and phone numbers
- \* Comprehensive listing of long-term Low Power AM and FM stations at colleges, hospitals, schools, sports venues, prisons and army garrisons.
- \* Full details of the many new Community Radio stations
- \* Separate section covers RTE and independent stations in Ireland

"Radio Stations in the UK" aims to be the most accurate and comprehensive

guide to British domestic AM and FM radio for the DXer and UK radio enthusiast. Since the last edition there have been many changes and dozens of new stations have come on the air.

Anyone planning a holiday or business trip in the UK, or visiting the country would find the guide invaluable in helping to identify the numerous radio stations now on the air. Why not order a second copy to keep in your car?

### Getting a Copy

"Radio Stations in the UK" is available from:

British DX Club  
10 Hemdean Hill  
Caversham  
Reading RG4 7SB  
United Kingdom

PRICE per copy including postage:

- \* UK: £4.00
- \* Europe: £5.00 / 7 Euros (paypal/cash only) /  
8 International Reply Coupons
- \* Rest of World: £6.00 (sterling)/ 9 International Reply Coupons /  
US\$10 (paypal/cash only)

SPECIAL OFFER for 2 copies: UK £7.00, Europe 10 Euros (paypal/cash)

All prices include postage. To avoid sending coins through the post you may send a combination of currencies, eg 5 Euro plus 2 IRCs or 2 dollars.

Recommended methods of payment:

- \* UK Cheque / UK postal order payable to "British DX Club"

ARGENTINA 11710.629 RAE, 0226, weak and warbly carrier, sounded like English service but really difficult copy. Starting to peak just prior to 0300 with interval signal and multi-lang ID's. First time noted on this freq here. 13 February.  
(David Sharp-NSW-AUS, dxld Feb 13)

15345.17v RAE, 2237-2300+, Feb 12, lite Argentine instrumental music. Spanish announcements. ID. Frequency drifting. Was on 15345.17 at 2237 UT and 15345.12 kHz at 2318 UT check. Fair signal.  
(Brian Alexander-PA-USA, DXplorer Feb 13)

11710.62 RAE, 0240-0255, Feb 19, English talk. Lite Spanish music. Poor. Weak, slightly wobbly carrier.  
(Brian Alexander-PA-USA, DXplorer Feb 19)

ARGENTINA/MOROCCO Just like the good old days, an audible het of about 200 Hz between two obstinate stations which refuse to move apart and eliminate the problem, despite plenty of open frequencies just above and below.

Yes, RAE has drifted off-channel again to 15345.2 kHz or so, but around 2115 UT Feb 14 the dominant audio is Arabic from Nador Morocco. Next check

2219 UT, Morocco is off, leaving very weak and fluttery RAE, or rather R. Nacional relay on weekends via same General Pacheco transmitter, in the clear. By 0010 UT Feb 15, 15345.2 kHz signal has surged to good level but still heavy flutter in live play-by-play of some SBG.

(Glenn Hauser-OK-USA, dxld Feb 15)

(R BULGARIA DX MIX News, Ivo Ivanov, via wwdxc BC-DX TopNews Feb 15)

#More details continue to emerge on this new station: it seems that the name will be Bar-Kulan Radio, rather than Radio Bar-Kulan as first reported.

A website - under construction - has appeared at:

<<http://www.bar-kulan.com/>>

So, they have a registration from 1st March via Ascension.

(Chris Greenway-UK, dxld Feb 19)

Unid on 17700 kHz. Thanks, Mauno, for pointing out my unid on 17700 kHz at

1600-1659:30 was Sudan Radio Service on a new freq [from Ascension Isl].

That accounts for the many mentions of Sudan and Darfur. This was barely audible today, and I could hear nothing on // 11785 kHz. With SRS and Radio Bar-Kulan aimed at the same general area after March 1, I hope one will change freq.

(Wendel Craighead-KS-USA, DXplorer Feb 19)

AUSTRIA 17610 AWR Afar language program via Moosbrunn transmission center in Austria. 1430-1500 UT fluttering with Horn of Africa music at S=8-9 level.

(wb, wwdxc BC-DX TopNews Feb 13)

Keine Nachnutzung - MW 585 / 1476 kHz. Sendemast am Bisamberg wird gesprengt.

Mittelwelle Bisamberg Masten: Sprengung am 24. Februar. Die Sprengung der beiden Mittelwelle-Sendemasten am Wiener Bisamberg wird am 24. Februar stattfinden. Beim Abtragen von Oesterreichs hoechstem Bauwerk, dem 265 Meter hohen Nordmasten und seinem 120 Meter hohen Pendant wird die Oeffentlichkeit auf zwei eigens eingerichteten Aussichtsstellen zuschauen koennen, teilte die ORF-Sendetechniktochter ORS mit.

Rund um die beiden Masten wird eine Sicherheitszone eingerichtet, weswegen die Zufahrtsstrassen zur Sendeanlage gesperrt sein werden, sagte Gernot Radosits von der ORS. Interessierte sollten am besten ueber Langenzersdorf anreisen und sich zu Fuss auf den Weg machen. <Standard.at>  
(Paul Gager-AUT, A-DX Feb 18)

Mit der Abtragung der beiden Sendemasten am Bisamberg geht ein grosses Stueck oesterreichischer Rundfunkgeschichte zu Ende. Die Sprengung ist fuer 24. Februar geplant.

Waehrend der Grossteil der Bevoelkerung diesem Ereignis gelassen entgegensieht, kaempfen andere "aufopferungsvoll" fuer den Erhalt dieses Denkmals. Vier gezielte Sprengungen werden Ende Februar das mit 265 Metern hoechste Bauwerk des Landes dem Erdboden gleich machen. "Eine Sanierung ist zu teuer, zudem gibt es keine sinnvolle Nachnutzung", so Norbert Grill von der zustaeendigen ORS.

Erfinder will Sprengung stoppen. Ganz anderer Meinung ist da Fernmeldemonteur Harald Stuetz: "Ich habe ein Erfolgskonzept fuer ein weltweit empfangbares Radioprogramm entwickelt, fuer die Umsetzung ist aber ein funktionstuechtiger Sender am Bisamberg notwendig." Der Techniker ist von seiner Geschaefsidee derart ueberzeugt, dass er weiter gegen die bereits beschlossene Abtragung vorgehen will.  
von Christian Resch, K\_ronen Zeitung.  
(via WalterPerina-AUT, wwdxc BC-DX TopNews Feb 18)

BAHRAIN 9745U R. Bahrain at 2141 UT Segued Middle Eastern vocals with accompaniment by uds and other instruments. Weak with QSB; audio seemed to fade up and down at times. Announcement at 2200 UT by man just before being completely blocked by co-channel CVC s/on. Heard Feb. 8 and 9 but not since.  
(Bob Hill-MA-USA, DXplorer Feb 14)

6010 Radio Bahrain confirm still active, but can catch their weak signal only from 1700-1755 UT in the CNR silent period. Usual Western DJ type programme on 6010 kHz.  
(Victor Goonetilleke-CLN 4S7VK, DXplorer Feb 13)

BOLIVIA 3309.976 Radio Mosoj Chaski, 0938, fair with Andean flute music, mention of "Cochabamba." Also noted het against CHU (3330) around this time (and wonder if it was Peruvian, Ondas del Huallaga.) 12 Feb.

4716.746 Radio Yura, 1031, almost too late for this one, but still readable on peaks with nice local music and occasional talk. Tried for R. San Miguel (4700v) but not even a carrier. 12 Feb.

5952.350 Radio Pio XII, 1012, presumed with Quechua talks, very difficult, as sandwiched between two powerhouses, some copy possible in LSB. 12 Feb.

6155.264 Radio Fides, 1020, tough copy in USB, against presumed China (on nominal, lowside). Brief snippets of Andean flute music but no ID, so tentative. 12 Feb.

(David Sharp-NSW-AUS, dxld Feb 13)

BRAZIL 11765 Super Radio Deus e Amor, Curitiba, 0055-0115, Feb 13, ID announcements at 0101 UT. Local religious music. Portuguese preacher. Fair signal. // 6060 kHz - weak under Cuba. // 9565.22 kHz - threshold signal.

(Brian Alexander-PA-USA, DXplorer Feb 13)

CHAD 6165 Rdif. Nat. Tchadienne, Gredia, at 0558-0559 UT on Feb 5, just in time to hear some hilife music with heterodyne from weak open carrier, and start of French ann, before Bonaire blasted on at \*0559 UT with tone and RNW IS starting Dutch to North America. Anyhow, that was enough to confirm RNT active on 6165, the interim carrier probably Croatia.

(Glenn Hauser-OK-USA, via dswci DXW Feb 17)

Also heard at 2050-2105 UT, African joyful music, vocal chants, no I/S 2100 UT, small talk in French and again music, good.

(Leonardo Bolli-ITA, via dswci DXW Feb 17)

CHILE The HCJB Portuguese relay spurs from 11920 CVC Calera de Tango, vary considerably; have been 20 kHz away, but Feb 13 at 2303 UT as closely as I could measure their mushy centers, they were plus and minus 15.9 kHz, i.e. 11904.1 and 11935.9. When will they get around to eliminating these?

(Glenn Hauser-OK-USA, dxld Feb 13)

HCJB via CVC CHILE 11920 kHz spurs containing mushy distorted // audio in Portuguese, Feb 15 at 0026 UT centered on about 11900.5 and 11939.5 plus and minus 19.5 kHz, while 25+hours earlier they were circa 11904 and 11936 kHz.

(Glenn Hauser-OK-USA, dxld Feb 15)

CHINA "Holy Tibet" in English service of Tibet PBS-XZDT was broadcasted three times a day.

Current skd:

0600-0630 4905 4920 5240 6110 6130 6200 9490 9580

1530-1600 4905 4920 5240 6110 6130 6200 7255 7385

2230-2300 4905 4920 5240 6110 6130 6200 7255 7385

(Sei-ichi Hasegawa-JPN NDXC, dxld Feb 16)

COLOMBIA 6010.03 LV de tu Conciencia, Puerto Lleras, 1035- 1115, Feb 13, Spanish religious talk. National Anthem at 1102 UT followed by ID, short music breaks and back to Spanish religious talk. Poor in noisy conditions.

6035 LV del Guaviare, San Jose Guaviare, 1033-1110, Feb 13, children's chorus. Spanish talk. Local music. IDs. Promos. National Anthem at 1058 UT. Spanish announcements at 1100 UT. Spanish talk. Fair but some noise on frequency.

(Brian Alexander-PA-USA, DXplorer Feb 13)

CUBA Transmission of RHC's 2030-2130 UT English broadcast is still irregular and problematic. Sat Feb 13 at 2114 UT check, nothing but Spanish on 11730, 11760, 11770, 11800 kHz, lo-fi interview with a revolutionary veteran? Dog barking in background, no DXers Unlimited.

17705 Feb 13 at 2057 UT upwrapping RNV relay with IS iterations and off. But back on with weaker signal at 2235 UT, poor in French with RHC mid-ID during Journal Parle about Afghanistan.

This semihour is on the schedule as Guarani, but French has been substituting, since as we all know, there are oodles of people who understand both. Does RHC really have any living Guarani-workers on its meagre payroll?

Calling a radio newscast a "spoken newspaper" seems rather archaic, but also occurs in Castilian as "diario hablado". Are they admitting they are just reading directly from a newspaper? Radio/TV require material to be rewritten in a different more conversational style; broadcast journalism 101.

(Glenn Hauser-OK-USA, dxld Feb 13)

Greetings from Lourdes Lopez.

Hello OM's, This letter came in by mail today. It states that Lourdes Lopez from Radio Havana, Cuba, is retired as of now. Lourdes Lopez answered al listeners letters and mails to RHC for the past years and did it well.

(although sometimes it took al long time)

I wish her well and hope she may spent her coming years in good health with her family.

Gerard Koopal  
Postus 1516  
1300 BM Almere  
The Netherlands

Greetings from Lourdes Lopez

"YEAR 52 OF THE REVOLUTION."

Dear Friend: May I get in touch with you once again to say hello and inform you that I've retired, so now I'll be able to spend more time with my grandchildren.

I want to tell you that, one of the greatest pleasures in my lifetime is to have worked in Radio Havana Cuba for more than 40 years and particularly, to have been in regular contact with you, esteemed listeners and friends.

I'm retiring but I'm happy because the group I leave behind share similar feelings and the privilege of communicating with the friends of Cuba in every continent. The new Head of the Department is Rosario Lafita Fernandez, with 30 years of experience in the job, who will continue the beautiful work I've done with so much love.

With the assurance that you'll stay in contact with our beloved shortwave station.

Lourdes Lopez  
(RHC, via Gerard Koopal-HOL, WWDXC Feb 17)

CUBA/SAUDI ARABIA 15120 Equal level of RHC Spanish from Quivican, romantic canciones of the 50ties, and from Argentina; and BSKSA Riyadh in Bengali co-channel. At 1445 UT RHC S=8. // 15360 kHz RHC, latter co-channel ahead of superpower 500 kW RFI Issoudun in Persian.

13770 UNID - tentatively RHC Spanish. Noted on few occasions in past weeks, but was still a puzzle. Nothing found on the usual SW frequency lists. But today Feb 13 at 1530-1535 UT noted Spanish nx read by female staff reader, signal just above threshold.

RHC schedule shows 13770 kHz at 1100-2300 and 0000-0500 UT in direction of Buenos Aires, South America, latter which is on totally extreme differ to the Quivican - Europe path. Only tiny S=3-4 level.  
(wb, wwdxc BC-DX TopNews Feb 13)

ECHOES This Febr 19 morning monitored typical springtime echoes again - of 125 ms delay duration visible on Perseus screen - usually reported by Nils DK8OK in Austrian newsgroup.

0945 to 1015 UT report, echoes from East Asia. Kunming South China / Udonrtani Thailand and Singapore too.

17560XIA 17670KUN 17690JIN 17875ISS

15130BIB 15135KUN 15190URU 15210KUN 15300ISS 15340SNG  
15440KUN 15500BEI 15515UDO

13590BEI 13650Jammer 13765UDO

And 14-15 UT too, Wertachtal 13655, 15285, 15325 kHz; Nauen 13700 kHz, as well as Vatican Radio from Santa Maria de Galeria 500 kW on 13765 kHz.

Nils Schiffhauer DK8OK reported recently that -signal-round-on-the-world-echo signals are visible on Perseus rx screenshot, mostly a little shorter at 125ms than 138ms. Mostly 500 kW beasts of WER, NAU, RMP, ISS and SMG heard in 0700-0800 and 1300-1400 UT range here in central Europe.

For example 17630 kHz DWL German 1200-1400 UT via Rampisham-UK towards Russia, Siberia, South Asia subcontinent. At same time noted YFR 15325 via WER in Oriya at 1400 UT and RFI Persian 15360 kHz via ISS 1430-1500 UT.  
(wb, wwdxc BC-DX TopNews Feb 11/12/17/19)

EQUATORIAL GUINEA 15190 R. Africa at 2220 UT Sunday Feb 14 with evangelist Tony Alamo, convicted and sentenced to 175 years for child sex abuse, rambling about baptism and resurrexion, from a station and a broker, Panamerican Broadcasting in Cupertino CA, which have no compunxion about diffusing this monster with money. WINB broadcasts him only Monday-Friday so this is a much-needed Sunday fix; Saturday too?

Whew, he's out of Oklahoma after being transferred thru OKC on the way to his permanent prison, or at least the next one, which is in Tucson AZ. Now

officials are trying to figure out how many "wives" still under his influence will be allowed to visit him, altho not conjugally. See <<http://www.tonyalamonews.com/3271/21210-tg-tony-alamo-transferred-to-tucson-prison.php>> (Glenn Hauser-OK-USA, dxld Feb 15)

ERITREA 5060 Eritrea's Radio Bana on new freq Heard on 5060.0 from former 5100 kHz. Observed in vernaculars with Horn of Africa music. Talk at 0430 UT, possible news and music. (Anker Petersen-DEN, playdx, via NZDXT Feb 15)

The following are some snippets from observations made in Nairobi Kenya earlier this month.

VOBME's two channels were heard with separate programming on 7175 and 7210 kHz. Very strong noise jamming (from Ethiopia, of course) was sometimes, but not always, heard on 7175 kHz.

Both channels now open their evening transmission period at 1300 UT (an hour earlier than before).

Radio Bana was not positively logged, but very strong Ethiopian-style jammer was heard on 5060 kHz in the early evening, closing at 1630 UT, suggesting that Bana may have been underneath it. (Chris Greenway-UK, on visit to Nairobi Kenya earlier Febr, dxld Feb 17)

ETHIOPIA Radio Ethiopia National Service was heard on 5990, 7110 and 9704 kHz, though 5990 kHz seems to be irregular. The Monday-Friday English broadcast is still running at 1200-1300 UT.

Radio Ethiopia External Service is regular on 7165 and 9560 kHz.

Radio Fana's frequency usage seems to be erratic. 6110, 6890 and 7210 kHz were all heard, though only on one or two frequencies at a time. 7210 kHz was only heard in the early morning. Care is needed as 7210 kHz is also used by Eritrea.

Voice of Tigray Revolution was only heard on 5950 kHz.

Radio Oromia and Amhara Regional State Radio were heard at various times on 6030 and 6090 kHz respectively. Both were heard closing at 1900 UT. (Chris Greenway-UK, on visit to Nairobi Kenya earlier Febr, dxld Feb 17)

Radio Fana.

Radio Fana to offer new services from new HQ. By Muluken Yewondwossen.

Radio Fana Share Company in Ethiopia has gone through a transformation to enable it to transmit other services in addition to its current shortwave and FM radio services.

The station was established in 1994 as a share company, however, it has been broadcasting since 1985 when the current ruling party, the EPRDF, was fighting an insurgency against the military regime.

The station is still associated with the EPRDF.

Now, 15 years after its official foundation it has become the Radio Fana

Broadcast Company (RBC). According to sources at the radio station, the company has a plan to enter television.

"It needs to meet preconditions to launch the new service, including technical and administrative assistance," a source said.  
(via NZDXT Feb 15)

9560.73 Radio Ethiopia Addis Ababa-Gedja tiny but also heavily het by co-channel DWL Trincomalee-CLN in English. 1600 UT.  
(wb, wwdxc BC-DX TopNews Feb 17)

FRANCE [to ALGERIA+Sahara] 7455 R. Algerienne at 2117 UT Qur'an reading; very good here and good on // 5865ISS kHz. Both freqs listed as emanating from France via satellite.  
(Bob Hill-MA-USA, DXplorer Feb 12)

GAMBIA 648 GRTS Bonto, at 2317-2340 UT on 14 Feb'10, Vernacular, Afr. pops, some talks; 33442, QRM de ESP.  
(Carlos Goncalves-POR, wwdxc BC-DX TopNews Feb 15)

GERMANY 15315 YFR to India in Malayalam language. S=8 signal some 120 kilometers away of the TX site. With accompanied "round-the-globe" echo, which occurs often in 1400-1500 UT slot, at least on powerful WER, NAU, or SMG Vatican Radio transmissions.  
(wb, wwdxc BC-DX TopNews Feb 13)

Frequency change of RFE/RL Radio Farda in Farsi  
1500-1600 NF 7545 LAM 100 kW 108 deg to WeAs,ex7520 to avoid VOA English (R BULGARIA DX MIX News, Ivo Ivanov, via wwdxc BC-DX TopNews Feb 15)

RHU - Radio Huriyo (Xoriyo) ceased 9820 kHz to Horn of Africa via M&B Nauen Tue/Fri at 1630-1700 UT.  
YFR English at 1500-1600 UT via M&B Nauen on 13700 kHz to Asia.

972 MW - Tuning around in my car radio this afternoon, I was curious to find English language from BBCWS there with a decent signal. (I am on a touring holiday, currently in Northumberland). No doubt I have missed this in Communication, but thought I'd mention it here just in case!  
(Tom Read-UK, BrDXC-UK Feb 17)

You didn't say what time this was Tom but it could have been NDR Info Hamburg which relays BBCWS 1700-1730 UT according to WRTH 2010. (and its just across the North Sea from Northumberland!).  
(Alan Pennington-UK, BrDXC-UK Feb 17)

That is exactly it. They broadcast Europe Today at those times. The only English language broadcasts that I am aware of on domestic German Radio.  
(Andrew Tett-UK-UK, BrDXC-UK Feb 17)

From last year. Radio Oeoemrang geht wieder auf Sendung...

Der Amrumer Arjan Koelzow wird wieder zum Biikebrennen Neuigkeiten der Insel in der friesischen Sprache moderieren.

Nach der Premiere im Jahr 2006 geht der Amrumer Arjan Koelzow auch in diesem Jahr mit seinem "Radio Oeoemrang" auf Sendung. Wie im letzten Jahr versprochen, wird am Samstag, den 21. Februar, also am traditionellen

Petritag, wieder eine einstundige Sendung zu hoeren sein. Die Sendung in friesischer Sprache ist mit einem Weltempfaenger beziehungsweise einem guten Reise-Radio, zu empfangen.

Auf Kurzwelle im 19-Meter-Band via Juelich, auf der Frequenz 15230 kHz, startet Koelzow seine Sendung um 1700 Uhr (MEZ), 1600 UT und 11.00 Uhr New Yorker Zeit. Sehr zur Freude des Initiators wurde die Sendeleistung zum Vergleich zu 2008 verfuennfacht.

Fuer die Sendung sind weitere Beitrage noch herzlich willkommen, so Koelzow. Wer also Interesse hat, moege sich doch bei Arjan Koelzow, Tel. 04682 / 2688 oder per E-Mail melden:  
<familie-koelzow @ t-online.de>

Mit dem Projekt hat er eine Idee seines Vaters Theodor Koelzow und von Jens Quedens aufgegriffen und in die Tat umgesetzt. Alles begann vor einigen Jahren damit, als Arjan Koelzow sich ein Programmbuch fuer Kurzwellenhoerer besorgte. Ein Hinweis, dass es fuer Interessierte eine Moeglichkeit gebe, fuer 200 Mark eine Stunde lang zu senden, weckte das Interesse. Eine Initiative der Telekom ermoeglichte es Koelzow den Kampf durch den buerokratischen Dschungel, zu ueberwinden. Produziert wurden die letztjaehrigen Sendungen auf eine Kassette, die vom Sendezentrum der Telekom in Juelich eingespielt wurden.

Die Kosten von damals 200 Mark sind jetzt mittlerweile auf 300 Euro gestiegen. Hinzu kommen noch die Kosten fuer die Produktion. Radio-Paten, die ihn finanziell oder auch ganz praktisch, beispielsweise als Moderator, unterstuetzen moechten, sind herzlich willkommen. "Mitmachen kann jeder von acht bis 80 Jahren", so Koelzow. Wer Interesse und Lust hat, moege sich doch melden.

Verantwortlich fuer diesen Artikel: Thomas Oelers.

INDIA DRM - Special Digital transmissions for Radio Asia Conference in New Delhi, India.

London, 19th Feb 2010: Radio specialists assembling for the Radio Asia 2010 Conference, to be held from 22nd -24th Feb in New Delhi, will be able to hear some high quality digital broadcasts via Digital Radio Mondiale (DRM) technology. This year's Radio Asia Conference (RAC) looks at the digital future of radio with its overall title 'Journey to Digital Land'. DRM is the global digital technology which can convert analogue broadcasts to digital thus significantly improving the audio quality and bringing many other benefits to broadcasters and listeners through its added

features.

British Broadcasting Corporation (BBC) is going to broadcast three hours in DRM every day from 22nd-26th Febr from 04.29:30-07.29:00 UT on 17760 kHz.

For the first time this year the broadcast will start with the daily Hindi programme followed by current affairs in English.

Christian Vision Radio (CVC) will run DRM transmissions from [21th]22nd-24th Febr from 0830-1230 UT on 17590 kHz.

The programmes will be in Hindi.

[CVC Test India on 17590 kHz at 1005 UT s/off Feb 18th. Screenshot by Show in Owari-Asahi, near Nagoya-JPN.

(Sei-ichi Hasegawa-JPN NDXC, dxld Feb 18)

Look-out on Feb 21 too. Its strange to have JUL on DRM mode again on the records, because went to shred scrapping some 4 months ago ... ]

All India Radio (AIR) already has a daily DRM SW broadcast from its transmitter in Khampur, Delhi. They air three hours of local transmission within India from 1430-1730 IST on 6100 kHz.

AIR recently placed a contract for 2 MW medium wave transmitters to BECIL (Broadcast Engineering Consultants India Limited). BECIL and Thomson were awarded to supply these high-power medium wave transmitters including auxiliaries, commissioning and testing. The new transmitters will replace old existing transmitters near Kolkata and Rajkot. Both transmitters are equipped with DRM and can operate on analogue, on simulcast or on full power digital with automatic change over between the 3 operation modes.

Special demos of DRM30 (meant for converting SW, MW, AM broadcasts) and DRM+ (meant for converting FM Bands I and II) will be held on the sidelines of the conference. RAC participants will be able to hear these transmissions as well as learn more about DRM and its potential at various sessions and also during the specialised DRM workshop scheduled for February 22nd a.m.

"We are delighted that the BBC and CVC will be transmitting these special programmes for Radio Asia," ABU Secretary-General, David Astley said. "It will enable delegates who may not be so familiar with DRM to hear first-hand the improvement in sound quality that the technology provides."

DRM is also the principal sponsor of Radio Asia 2010 and DRM Consortium Chair, Ruxandra Obreja, expressed hope that it will be a great success, "Radio Asia is being held in India for the first time and is already shaping as a significant radio event with industry representatives having committed to attend. This will be a great occasion to showcase the tremendous potential of DRM and how it can change the future of radio broadcasting for good. We extend our thanks to broadcasters who are putting in the special DRM transmissions for this event and making it even more useful for the participants."

DRM Consortium Press Release.

(wb, wwdxc BC-DX TopNews Feb 16)

JAPAN Shiokaze via Yamata-JPN QSY from 5910 to 5985 kHz at 1400-1430 UT on Feb 15 in Korean. Jamming from North Korea is stay on 5910 kHz.

<[http://www.mediakat-blog.jp/usr/hiroshi/5985\\_20100215\\_5985s.gif](http://www.mediakat-blog.jp/usr/hiroshi/5985_20100215_5985s.gif)>

de Hiroshi

(Sei-ichi Hasegawa-JPN NDXC, dxld Feb 15)

KOREA D.P.R. 11545 Arabic UNID station at 1547 UT at S=9+20dB level most likely Voice of Korea, Pyongyang at 1500-1757 UT in Ar, En, Ar segments.

(wb, wwdxc BC-DX TopNews Feb 13)

6250 PBS, Pyongyang, at 1648-1657 UT on 14 Feb'10, cf. // 6398.8 kHz below.

6398.8 PBS Kangye, at 1647-1658 UT on 14 Feb'10, Korean, songs; 34432, adj. uty. QRM; // 6250 kHz.

(Carlos Goncalves-POR, wwdxc BC-DX TopNews Feb 15)

KOREA Rep. of [clandestine stn to No.Korea] 6518 V. of the People at 2224 UT in Korean with what sounded like an interview, with one man in the studio and the other on the telephone; possibly jamming in the background. Poor/fair this freq and // 6600 kHz; only a faint het on listed // 3912 kHz.

(Bob Hill-MA-USA, DXplorer Feb 9)

KENYA The rumours and speculation last year about the KBC closing its MW network have turned out to be incorrect as almost all listed channels were heard, including Garissa 567 / 639 kHz, listed in the WRTH as irregular.

(Chris Greenway-UK, on visit to Nairobi Kenya earlier Febr, dxld Feb 17)

LAOS 7145.000 Lao National Radio, at 1215 UT, Vietnamese (listed) woman announcer with nice local music. Frequent breaks in transmission. 12 Feb.

(David Sharp-NSW-AUS, dxld Feb 13)

LIBYA 17725 LBJ "Voice of Africa" from Sabrata, Libya, S=9+30dB, ID at

1435 UT "...broadcasting from the Great Libyan Arab Jamahiriya..." ... nx  
by female like "AFG + PAK region most trouble for US America..." // 21695  
tiny S=4 signal. En nx at 1434-1442 UT, like Pakistan atomic dilemma.  
1443 UT reading from GREEN book.  
(wb, wwdxc BC-DX TopNews Feb 13)

MADAGASCAR 13800 Radio Dabanga in Sudanese Arabic via RNW Madagascar  
site observed at 1540 UT on Feb 13. S=9+20dB in southern Germany. ID of  
the station sung five times running one after the other. Underneath around  
13799.00 kHz another signal like interference tone of 1000 Hertz heard  
accompanied. But latter could be an UTE signal on odd channel.  
(wb, wwdxc BC-DX TopNews Feb 13)

Heard during the day on both 6135 and 7105 kHz.  
(Chris Greenway-UK, on visit to Nairobi Kenya earlier Febr, dxld Feb 17)

MARIANA ISLS/SAIPAN RFA and FEBC Saipan pics.

(Alokesh Gupta-IND VU3BSE, SW TXsite Feb 17)

MOLDOVA/SLOVAK REP 15670 at 1500-1508 UT the 300 kW unit at Grigoriopol  
Maiac Moldova switched on and off again and again with S=9+20dB level, to  
prepare the antenna matching for 1525 UT opening procedure. Scheduled  
1525-1600 UT Sat/Sun Radio Mada Internationale towards Madagascar at  
160 degr via the revolving antenna at Maiac site.

From RNW Media Network:

<<http://blogs.rnw.nl/medianetwork/radio-mada-internationale-on-the-web>>  
"Radio Mada Internationale, the clandestine shortwave station supporting  
the deposed president of Madagascar Marc Ravalomanana, also has a website  
at

<[radiomada-int.blogspot.com/](http://radiomada-int.blogspot.com/)> and a YouTube channel at  
<[www.youtube.com/user/radiomada](http://www.youtube.com/user/radiomada)>

The website contains audio files of the station's broadcasts. As far as I  
can see, the station doesn't as yet have its own logo."

Still 15670. "Miraya 101 FM" via Rimavska Sobota Slovak Republic to Sudan?  
underneath. IRRS brokered, S=6 tiny level, English nx at 1504 UT onwards,  
dead zone groundwave signal at my location. "Miraya FM" ID in En at  
1511 UT, then changed from English to local Arabic instead.  
(wb, wwdxc BC-DX TopNews Feb 13)

To Madagascar via [Moldova] Pridnestrovye, 15670, Radio Mada Internat.  
\*1530-1600\* UT on Feb 13, test tones at 1527 UT. Sign on at 1530 UT with  
Malagasy talk. Sat, Sun only. Fair signal level but poor overall signal  
due to co-channel QRM from Miraya 101 FM.  
(Brian Alexander-PA-USA, hcdx Feb 13)

To Sudan via Slovakia, 15670, Miraya 101 FM, 1420-1600 UT on Feb 13,  
tune-in to pop music by Beyonce and others. Vernacular and English talk  
concerning Sudan. "Miraya FM" ID at 1431 UT followed by Afro-pop music and  
some Western pop music. Time pips at 1500 UT followed by "Miraya 101" ID  
and English news, Gave mirayafm.org website. Arabic talk at 1511 UT. Fair  
signal until 1530 UT when hit with co-channel QRM from Radio Mada Int at  
their 1530 UT sign on. Radio Mada on the air Sat, Sun only.

(Brian Alexander-PA-USA, hcdx Feb 13)

MONGOLIA/KOREA D.P.R. 9665 Voice of Mongolia Ulaanbaatar and KCBS Pyongyang-KRE in 1400-1600 UT range. Came across of MNG in English at 1530 UT with fair signal until cl-down at 16.00:23 UT on Feb 17th.

Charming sound of young lady announcer in best Cambridge english accent. Little disturbed by tiny hiss of Korean domestic service KCBS Pyongyang on adjacent odd 9665.44 kHz. Ulaanbaatar 1400 Mongolian, 1430 Mandarin, 1500 Jpn, 1530-1600 En.

(wb, wwdxc BC-DX TopNews Feb 17)

MYANMAR 7185.70 Myanma Radio, at 1444-1530\* UT on Feb 13, ex 5915; in vernacular with EZL indigenous songs; almost fair; 1528 UT sign off announcement with frequencies; followed by indigenous instrumental music till off the air. Not // 5985 kHz; Myanmar not heard on 5915 kHz or 9730.8v kHz. Even though this frequency will cause new QRM for hams, it is infinitely better than former 5915 kHz, which had strong CRI QRM. More people should now be able to hear and enjoy this station here! Seeing as the frequency is off set, perhaps it is via Yangon and not Naypyidaw site. (Ron Howard-CA-USA, dxld Feb 13)

7185.783 on Feb 18, at +1425-1525+ UT, R. Myanmar, Yangoon, poor/fair, a lot of Burmese pop mx interchanging with spoken fragments in local dialect (YL). Fortunately no BCers, no HAMs in this part of the band. Just occasionally wandering HAM's carriers. NB. At the same time there was no sign of BRM on 4725.5985 kHz ...

(Vlad Titarev-UKR, Perseus + K9AY ant, DXplorer Feb 18)

On the 13th of February Yangon decided to use 7185.75 instead of 7200 kHz and has been observed with the following schedule since: 0030-0230, 1120-1530 UT.

At 0745 UT observed both 9730.85 and 7185.75 kHz carrying two different programmes, also same time 5770 and 5915 kHz. 5985 kHz was silent, which s-on at 0930 UT and its agudio was heard under 9730.85 kHz ! Anyway, this proves that Myanmar has at least four SW transmitters and a 5th at the Defense Forces [in northeastern Burma, wb.]

(Victor Goonetilleke-CLN 4S7VK, UADX / IntruderAlert Feb 16/17)

TVNZ Story About RNZ Problems.

The radio station owned by taxpayers and listened to by hundreds of thousands of New Zealanders is heading for a major showdown with the government. ONE News can reveal the chairwoman and board members of Radio New Zealand could face the sack, if they continue to defy requests to cut costs. Radio New Zealand's programmes have made broadcasters like Sean Plunket and Kim Hill into household names.

RNZ costs taxpayers about \$38 million a year, but its funding is frozen and may remain so for five years ...

<<http://tvnz.co.nz/national-news/rnz-govt-in-showdown-over-funding-3369371>>

Radical options for Radio NZ.

A directive from the New Zealand Government to Radio New Zealand to cut costs has been discussed in Parliament today.

Various options have been floated so far but one that might be great for New Zealand MW DXer's (but not so great for Overseas DXers trying to log them) is

"going off air after midnight until 6 am has been floated by Radio New Zealand bosses as they fronted a Parliamentary select committee hearing today".

I presume this may only be for domestic MW/FM services but could affect RNZI SW.

Mark Nicholls

Chief Editor NZ DX Times

(Andy Sennitt-HOL, RNW MN blog via dxld Feb 19)

7385 Miraya FM, \*0300-0600\*, Feb 19, New additional time. Sign on with

pop music. IDs. "Good Morning Sudan" program with a mix of Arabic & English talk throughout broadcast. Local Afro-pop music. Promo for protection against HIV-AIDS. Many "Miraya FM" and "101 Miraya FM" IDs. Time pips at 0600 UT and off. Poor, weak in noisy conditions at sign on but improved to a fair signal quality by 0310 UT.

15670 Miraya FM, \*1400-1540+, Feb 19, sign on with local Afro-pop music. Arabic talk. IDs. English news at 1502 UT. Local pop music at 1512 UT. Back to English at 1520 UT with talk about upcoming local Sudanese elections. Promos for HIV-AIDS protection. Canned IDs. Fair to good signal.  
(Brian Alexander-PA-USA, DXplorer Feb 19)

SOLOMON ISLANDS/VANUATU "G'day Patrick. Thanks for your reception report. I can confirm that you have heard us on 5020 kHz, unfortunately our transmitter blew up the frequency driver circuit and one of the valves so it is off air at the moment. We are working on restoring services ASAP. Thanks, Min. Min Sun, AYAD Volunteer, Solomon Islands Broadcasting Corporation. E-mail: <msun @ sibc.com.sb>  
Mobile: +677 74 93015.  
(Patrick Robic-AUT, dswci DXW Feb 9)

I have just heard Radio Vanuatu on the new frequency of 5054.97m kHz, noted with very good signals at 0715 UT on 19 Febr with talk in Pidgin about a cyclone. Running // to usual 3945 kHz which was slightly better reception.

There was nothing on 5055 kHz when I did a 60 metre bandscan at 0600 UT, and I focussed on logging Radio Apinte 4990 kHz until rechecking the frequency just now.  
(Bryan Clark-NZL, dxld Feb 19)

Radio Vanuatu Second Shortwave Transmitter on Air. Thanks Bryan's tip, checking for this at 1005 UT on a computer receiver in Australia. Untraced on 5054 kHz but nice signal on 3945 kHz with news in Pidgin read by man and an ID within a minute of tuning in.  
(Hans Johnson-FL-USA, dxld Feb 19)

Bryan, - your neighbour Steve White is the RNZ transmitter specialist and is on repairing t o u r to Vanuatu and the Solomon Islands at present. Also Solomons 5020v kHz noted at 0900 UT Feb 19 with usual signals strength again.  
(wb, DXplorer Feb 19)

SIBC is back on 5020 kHz. Usual strength at 0900 UT. SIBC on 5019.96 kHz received from 0800 UT on Feb 19 by many Japanese DXer. Condition is good.

I confirm that 5055 kHz of R. Vanuatu s/off at 1000 UT on Feb 19. The condition was poor by QRM of Chinese OTH, here in Japan.  
(Sei-ichi Hasegawa-JPN NDXC Feb 19)

SOMALIA No sign of Hargeysa on 7145 kHz.

(wb, SW TX site Feb 14)

**SOUTH AFRICA** 11785.03v little odd - two stations observed on 1643 UT Feb 13. Ahead an African station in Arabic like SSIRI Southern Sudan Interactive Radio Instruction from Meyerton-AFS, which is registered by 100 kW unit at zero degrees true north. S=9+20dB at 1640-1650 UT, underneath an unid Arabic singer.

11819.97v Another slightly odd outlet from Meyerton-AFS is Saturday only BBC Swahili service at 1430-1750 UT via Sentech AFS transmission center. (wb, wwdxc BC-DX TopNews Feb 13)

**SRI LANKA** 11750 SLBC Ekala scheduled in Sinhala language via the 300 kW TX gift by NHK World Tokyo. On schedule at 1500-1900 UT towards Middle East to the Ceylonese nationals as Foreign Workers living on the Arabic peninsula. S=9+20dB at 1635 UT Feb 13. Typical increased spring time propagation appearance here in Europe. (wb, wwdxc BC-DX TopNews Feb 13)

**SUDAN** 7200 kHz is on for most or all of the day (WRTH shows it taking a break at 0430-1500 UT). (Chris Greenway-UK, on visit to Nairobi Kenya earlier Febr, dxld Feb 17)

**SYRIA/LEBANON** UNID pro-Lebanon stn on 1071 kHz. I was wondering why none of our Arabic speaking friends was yet able to identify the station on 1071 kHz which is targeting its broadcasts to (or from?) Lebanon. Its signal is often very strong here in the middle of Europe around our local sunset. Unfortunately I do not speak Arabic but I

could hear something like "Saut al Lubnan". They speak very often about Lebanon, Beirut, they mention something what seems to be "Beirut time ... Greenwich Mean Time ..." etc.

The format of the station is quite "modern". If somebody is interested to take a closer look at this station, I would like to offer my assistance of supplying some recordings (not made yet) if the reception is not good in your area.

The station is not listed in WRTH (there is a section with Lebanon as a target but this station is not mentioned), not even in its MW list.  
(Karel Honzik-CZE CSDXC, mwdx Feb 13)

Looks as though its the Lebanese radio station al Nur (or Al Nour)  
<<http://www.alnour.com.lb/>>

I found this report about it on DXing the Finnish Way:  
al-Nur Radio on 1071 kHz. Jan 19, 2007.

The Hezbollah-controlled radio station, al-Nur Radio (Light radio), has been logged in recent months on 1071 kHz. The transmitter site is believed to be in Syria and transmission power 100 kW. The programme consists of relays of a FM-station of the same name and newscasts from al-Manar Television station.  
(Jan-Mikael Nurmela-FIN, Jari Savolainen-FIN, Tarek Zeidan-EGY, via Wolfgang Bueschel via NTT Aktuell, Jan 17, 2007)

It IS listed in WRTH 2010 but under Syria - see p.355. The tx site is Tartus 100 kW.  
(Dave Kenny-UK, mwdx Feb 14)

1071 kHz 100 kW. Tartus southern site Tartus Amrit,  
- not 783 Tartus Besira northern site  
34 50 33.97 N 35 54 19.92 E

2-mast north-southerly pattern

UKRAINE Quiz von Radio Ukraine International.

Sehr geehrte Klubmitglieder, liebe Radiofreunde,  
RUI startet ihr erstes Quiz "Die Ukraine entdecken". Damit wollen wir Ihnen einen umfassenden Einblick in unser Land, seine Sehenswuerdigkeiten, Geschichte und Kultur geben. In einer Woche, am 3. Maerz, geht mit dem Quiz los im MM-Mittwochsmagazin auf RUI. Wichtig: Zum Quiz werden die Klubmitglieder herzlich eingeladen, an unserem Quiz "Die Ukraine entdecken" teilzunehmen!

Der Quiz dauert bis zum 7. Juli dieses Jahres.

Nun zu den Quizregeln: Wir bitten Sie sowohl um Antworten zu zwei Fragen je MM-Mittwochsmagazin als auch um einen Aufsatz zu jeweiliger Frage.

Wenn Sie alle Fragen bis zum 7. Juli richtig beantworten und schriftlich Ihren Aufsatz uebermitteln, haben Sie die Chance auf einen Preis. Wir erwarten von Ihnen, dass Ihr Aufsatz nicht gerade knapp ausfallen wird.

Dabei werden unsere Fragen nicht unbedingt auf unsere Sendungen beziehen, manchmal wuerden die Teilnehmer vielleicht auch die anderen Quellen heranziehen muessen was aber im Zeitalter von Internet und anderen neuen Moeglichkeiten keine zu hoch gesteckte Aufforderung von uns waere.

Der Preistraeger gewinnt einen deutschsprachigen Reisefuehrer durch die Ukraine.

Viel Spass und Erfolg beim Quiz!

Fuer die Mitglieder von RUI Hoererklub haben wir noch eine neue Option offen. Sie, liebe Klubmitglieder, koennen unsere Sonderurkunde fuer das Jahr 2010 mit dem exklusiven Designe in Anspruch nehmen. Die Bedingung ist, dass innerhalb von 6 Monaten 12 Empfangsberichte geschrieben werden, also 2 pro Monat. Einer davon muss unbedingt den Empfang von MM-Mittwochsmagazin belegen. Daraufhin erhaelt man unsere Sonderurkunde 2010.

Die Empfangsberichte sollen direkt nach Kiew gesendet werden. Der Verfasser der Empfangsberichte muss auf den Empfangsberichten vermerken, dass diese fuer die Sonderurkunde gedacht sind. Danach bekommt er die Mitgliedsurkunde die von RUI erstellt und versendet wird. Sehr begruesst werden auch ihre Kommentare zu unseren Sendungen. Damit starten wir auch am 3. Maerz und werden im September Ihre letzten Empfangsberichte fuer sie RUI Hoererklub Sonderurkunde 2010 erwarten. Dann wollen wir die Bilanz davon ziehen.

Wir haetten gerne Ihre Meinung zu diesem Angebot wissen. Schreiben Sie an uns! Hier ist die Adresse:  
<perepadya @ nrcu.gov.ua>

Mit freundlichen Gruessen,  
Ihr RUI. (Feb 18)

USA Seems to be in question?

Frequency changes of Deutsche Welle effective from Feb 1:

1000-1100 9865 HRI 250 kW 152 deg to SoAm in German, canceled

2200-2400 15640 HRI 250 kW 152 deg to SoAm in German, canceled

(R BULGARIA DX MIX News, Ivo Ivanov, via wwdxc BC-DX TopNews Feb 1)

I asked Rudolf Grimm in Brazil to check these outlets. Frequencies of HRI Furman-SC-USA are still visible on DWL Bonn website. Still noted also on US RMS monitoring Quito and San Jose stations in log and also as MP4 soundfile on Feb 7&8.

Mysterious.

Probably WHRI Furman-South Carolina USA site had a sudden maintenance break on Febr 1st to 5th only? 9865 1000-1059, 15640 2200-2400 UT.

(wb, wwdxc BC-DX TopNews Feb 12)

15640, am still hearing DW in German after 2200 UT, altho DX Mix News Bulgaria reported the relay via WHRI had been cancelled. Wolfgang Bueschel also finds it on IBB Monitoring clips Feb 7 and 8.

(Glenn Hauser-OK-USA, dxld Feb 11)

I've seen reports that DW was to cease its use of WHRI-Cypress Creek relays from Feb. 1 not so, as I have noted 15640 kHz in German with a good signal at 2200 UT on Feb. 8.

(Joe Hanlon-NJ-USA, dxld Feb 12)

15210 YFR Okeechobee in En at 1450 UT suffered by a strange UTE like hiss/buzz signal. Scheduled 1400-1600 UT, S=6-7 signal in Germany. I couldn't determinate whether this was a separate UTE "vibration buzz" or settled together with YFR audio.

(wb, wwdxc BC-DX TopNews Feb 17)

WWCR Nashville on 15825 kHz noted with two accompanied spurious signals on 15809.39 kHz and 15840.61 kHz at 1513 UT Feb 13. English sermon "to win Christus..." S=9+30dB on 15825 kHz.

(wb, wwdxc BC-DX TopNews Feb 13)

Am trying to find out why WWCR has suddenly left 5070 for 4775 kHz. If there was an interference complaint about 5070 kHz, where was it from? Was there also one concerning 3240 kHz, which has been replaced by 7465 / 7490 kHz? Thanks,

(Glenn Hauser-OK-USA, Feb 5 to FCC via dxld)

Hi Glen[n], WWCR had to vacate 3240 kHz due to an interference complaint from a MARS operation. We have received an interference complaint from a foreign government's fixed operation concerning WWCR's 5070 kHz operation. We are currently communicating with that government agency concerning this; meanwhile, WWCR is operating on 4775 kHz pending the outcome of this matter.

(Tom Lucey-USA, FCC, dxld Feb 16)

WDEA Ellworth, ME 1370 kHz bestaetigte meinen Empfangsbericht innerhalb von 14 Tagen mit einem det. Brief. Adresse: Cumulus Media, P.O.Box 100, 49 Acme Road, Brewer, ME 04412, USA. v/s Fred Miller, Operations Manager.

Aufgrund der im Brief enthaltenen Beschreibung liess sich auch der Sendestandort an der Newberry Neck Road leicht auf Google Earth finden, und zwar bei 44 27 59.40 N 68 28 10.78 W

Wie Fred Miller auch noch mitteilte, steht der seeseitige Masten z.Z. im Wasser.

(Patrick Robic-AUT, A-DX Feb 15)

6875 WYFR replaced 6915 kHz at 0300-1200 to northwestern USA/CAN.

15550 QSL WJHR, Milton, Florida: Unsatisfied with a short e-mail from the station, I re-sent my e-mail report by postal mail with a SASE, requesting a postal QSL. In about 10 days I received an ersatz QSL-card, specifically a piece of paper with stn name, location, fqy, scheduled hours (0900-1700 CST), but no specific reception details, taped to the back of a blank George S. Mock, WB4BFO QSL-card; also a short note on the back of a sheet of a business products letterhead thanks for listening, we just installed a log periodic, God will bless you for a donation. Tnx to tip from John Fisher-MA. Scans attached.

(Jerry Berg-MA-USA, DXplorer Feb 14)

VIETNAM 9730 V. of Vietnam at \*2100 UT s/on in French ("Ici La Voix du Vietnam ...") and into news and actualities with female announcer.

Somewhat choppy and with "distant"-sounding audio, but fair overall.

(Bob Hill-MA-USA, DXplorer Feb 12)

ZAMBIA 13650 Tentat CVC "1Africa" Lusaka program S=6-7 at 1520 UT Feb

13, via CVC Lusaka Makeni ranch site, SW 4965 6065 9430 9505 13590,  
and 13650 kHz

G.C. 15 32 18.89 S 28 00 09.83 E on Google Earth imagery.

(wb, wwdxc BC-DX TopNews Feb 13)

As already reported in the Zambian press, both 5915 and 6165 kHz are off,  
owing to problems at the transmitter site.

(Chris Greenway-UK, on visit to Kenya earlier Febr, dxld Feb 17)

20. Claes-W. Englund, p.t. USA 1 064.75 200.00 62 1 343.16

All the following countries received 100 points each:

Argentina (1), Canada (1), China/Taiwan (1), Guam (4), Japan (1),  
Lithuania (6), Neth. Antilles (1), New Zealand (3), Poland (1), Romania  
(5), Russia (2), Slovakia (8), South Africa (5), S. Korea (5), Spain (4),  
Turkey (9), UAE (1), United Kingdom (2), Vatican (2), Vietnam (5).

Other countries:

Australia (11) 90.91, Cuba (11) 90.91, Bulgaria (12) 83.33, Germany (12)  
83.33, USA (20) 50.00.

### QUIZ QUESTIONS Points

1) When the following stations started their broadcasting (year)?:

- RNE, Spain 1937 7  
ORF, Austria 1929 7  
R. Vatican, Vatican 1931 7  
RN Madagascar, Madagascar 1972 7  
SABC, Rep.of South Africa 1936 7  
R. Mongolia, Mongolia 1934 7  
WHRI, USA 1985 7

2) Abbreviations of international broadcasters' names & country ITU codes:

- DW Deutsche Welle SUI 2+1
- ERTU Egyptian Radio & TV Union EGY 2+1
- RTI Radio Taiwan International TWN 2+1
- KTBN Trinity Broadcasters Network USA 2+1
- RNZI Radio New Zealand International NZL 2+1

3) Names of transmission sites & country ITU codes:

- TIG Tiganesti ROU TAC Toshkent UZB 1+1, 1+1
- DEA Deanovac CRO DLN Delano USA 1+1, 1+1
- ABZ Abu Zaabal EGY SGO Santiago de Chile CHL 1+1, 1+1
- BAT Bata GNE DRW Darwin AUS 1+1, 1+1
- ZAH Zahedan IRN RAN Rangitaiki NZL 1+1, 1+1

4) Station emblems: (Station 2 points, country 1 point):

Station	Country		
Radio Srbija	Serbia	2	1
The Voice Africa	Zambia	2	1
Voice of Vietnam	Vietnam	2	1

(Bohac)

Congratulations to the two winners who will receive a free copy of our new DSWCI DBS-12 in May.

<<http://www.dswci.org/tbmonitor/2009.pdf>>  
was updated with the January loggings as an extra service to their purchase. Any DX-er can download the complete monitoring view at <<http://www.dswci.org/tbm>> of stations heard broadcasting on tropical bands during 2005, 2006, 2007, 2008 and 2009.  
(Anker Petersen-DEN, dswci DXW Feb 17)

#####

Homage to John Bryant.

JOHN H. BRYANT

The worldwide DX fraternity was very shocked to learn of John's untimely death on 9 February. Emeritus Professor John H. Bryant served as a Senior Fulbright Research Fellow in Japan in the mid-1970s and was an internationally recognised authority on East Asian Architecture. John's contributions to the profession of architecture were recognized when he was elevated to the status of Fellow of the American Institute of Architects in May 1997.

Following his retirement in 2000, John built a retirement retreat in the San Juan Islands on the US West Coast, from where he was able to indulge his interest in broadcast and tropical band DX from Asia. He undertook

serious studies on radio propagation on lower frequencies, co-authored books including

"Zenith Radio: The Early Years - 1919-1935",  
"Zenith Radio: The Glory Years - 1936-1945" and  
"Dangerous Crossings: the First Modern Polar Expedition, 1925",

and even made the front page of the NZ DX Times in June 2007. That issue featured his pioneering DXpedition to Easter Island in March 2007.

In more recent times John was a leading light in the Ultralight Radio DX field. Our hobby has lost a fine and generous man and we extend our sympathy to his family, friends and colleagues.  
(one of the countless commemorations; this via NZDXT Feb 15)

I am deeply saddened by the loss of my very good friend John. He was the most articulate and enthusiastic man I have ever known. I learned so much of life, art, history, architecture, common sense, and good humor from him... not to mention our common bond of the radio monitoring and "DXing" hobby over 24 special years. I am already missing him immensely.  
(Guy Atkins-WA-USA, dxld Feb 11)

I was very saddened to hear of John Bryant's passing. I always regarded him as one of the pillars of the hobby. His expertise & enthusiasm will be sorely missed. His drive for enhanced equipment DX performance was an inspiration, especially for those of us not as technically astute as he was. My prayers and condolences go out to his family. I would like to suggest some sort of memorial activity at the upcoming IRCA convention or an award in his name. Just a few thoughts ... Vaya con Dios, Compadre!  
(Craig Barnes, IRCA mailing list via dxld Feb 19)

John and I shared a common calling of university professor and a common hobby of long-distance radio. In the 90's he visited me in Newfoundland, and I traveled to Grayland WA for one of his famous radio get-togethers.

John was a man with enthusiasm, intelligence, humor, and generosity. I am very deeply saddened by his sudden demise, and I offer my condolences to Linda and to his family.  
(Jean Burnell-NS-CAN, dxld Feb 19)

Please accept my sincere condolences from London Ontario CANADA. I have known John for well over 20 Years through the Radio Hobby, and most recently became very close and worked with John on the Ultralight Radio Front. John is truly admired throughout the world as a True Gentleman, and his contributions to all the Hobbies and Professions he admired will be forever cherished. Thanks John for making my life a little brighter. I'll miss you pal!! Regards  
(Robert S. Ross-Ont-CAN, dxld Feb 11)

Linda and Mary Ellen, please accept my most sincerest condolences. I was so looking forward to the Bryants' living just across the water from the very active radio community in Victoria and southern Vancouver Island. I had the honour of knowing John for some twenty years, and of meeting Linda on several occasions both at their wonderful Orcas Island home, and when the two of you visited Victoria. No one would ever say a bad thing about John.

He was simply that unique type of personality that immediately drew people towards him in a very positive way. Wherever he was, he would rally the troops and get the job done. I'm so happy that he had an opportunity to join me at a very special inaugural DXpedition to my Haida Gwaii (Queen Charlotte Islands) cottage several years back. The two of us were planning a trip even further north to Barrow, AK one day as well. Alas, the Lord had different plans. Rest in Peace, my friend. You'll never be forgotten.  
(Walter Salmaniw-Vic-CAN, dxld Feb 12)

ANGOLA 4949.8 RNA-Canal "A", Mulenvos, 2225-..., 21 Feb'10, Portuguese (pres), talks, music, but everything so weak as if they were putting an empty carrier. What on earth are they doing with the modulation/audio - saving the modulator stage? (Carlos Goncalves-POR, wwdxc BC-DX TopNews Feb 23)

ARGENTINA RAE Buenos Aires is now using nominal 15345 kHz for its foreign language broadcasts, with nominal 11710 kHz not heard the past 2 days. As I write this, 0210 UT 24 Febr, English is heard with very good reception on 15345.36 kHz. The previous day the frequency was 15345.14 kHz. English is scheduled at 0200 UT, French from 0300 UT (after an attractive and lengthy rendition of the Argentine National Anthem). With no interference from adjacent or nominal 15345 kHz, this is the best reception I have had of the English service from RAE in some time. (Bryan Clark-NZL, dxld Feb 24)

6060 R. Nacional, General Pacheco, 2231-2246, 21 Feb'10, Castilian, f/ball match rpt. Argentina Junior vs. Atletico de Tucuman; 45433.

AUSTRIA Vienna - Bisamberg Transmitter RIP.

If reports that I read are correct, today is the day for the destruction of the antenna masts of the old Vienna MW transmitter. It used to use both 585 kHz and 1476 kHz and transmissions on these frequencies closed years ago [1995].

There are two masts on site, and one has already fallen (at 1100 UT, I believe) and one is due to be felled at 1400 UT. More information (in German - you could try one of the on-line translation tools to understand it) is available from:

<<http://futurezone.orf.at/stories/1640258/>>

(Andrew Tett-UK, BrDXC-UK Feb 24)

Sprengung der Masten des Senders Wien-Bisamberg

Noch ragt die Spitze des Nordmasts in den Nebel. Anbringung der Sprengsaetze - dann geht es weiter hoch, bis die Sprengmeister kaum noch zu erkennen sind. Ueber einen Kran werden die Zuendschnuere an den Pardunen angebracht und zu Boden gefuehrt.

Alles ueber die Abwicklung auf dem Blogspot der Firma Alpine:

<<http://www.alpine-energie-worklife.blogspot.com/>>

(Christoph Ratzler-AUT OE2CRM, A-DX Feb 24)

Bisamberg-Masten: Sprengung findet am 24. Februar statt.

<<http://www.vienna.at/news/wien/artikel/bisamberg-masten-sprengung-findet-am-24-februar-statt/cn/news-20100218-07134386>>

Sender am Bisamberg werden gesprengt - der Senderaum bleibt erhalten

Die Sprengung der beiden Mittelwellen-Sendemasten am Wiener Bisamberg wird am 24. Februar 2010 stattfinden. Beim Abtragen von Oesterreichs hoechstem Bauwerk, dem 265 Meter hohen Nordmasten und seinem 120 Meter hohen Pendant wird die Oeffentlichkeit auf zwei eigens eingerichteten Aussichtsstellen zuschauen koennen.

Bisamberg-Sendemasten werden gesprengt.

Grundsatzlich wird eine Sicherheitszone rund um die beiden Masten eingerichtet, weswegen die Zufahrtsstrassen zur Sendeanlage gesperrt sein werden, sagte Gernot Radosits von der ORF-Sendetechniktochter ORS.

Interessierte sollten am besten ueber Langenzersdorf anreisen und sich zu Fuss auf den Weg machen. Das Sicherheitspersonal wird die Zuschauer dann einweisen. Auf der Aussichtsplattform wird es Tee und Kaffee geben.

Der eigentliche Mittelwellensender Bisamberg ist bereits seit 1995 nicht mehr in Betrieb. Der Kern der Anlage wurde 1933 errichtet, allerdings 1945 von den abziehenden SS-Truppen zerstort. In ihrer heutigen Form entstand die Sendeanlage 1959 mit vier Sendern zu je 120 kW. Waehrend sich die beiden gigantischen Masten auf Wiener Stadtgebiet befinden, liegt der ueberwiegende Teil des Sendegebaeudes im niederoesterreichischen Langenzersdorf.

(via Walter Perina-AUT, A-DX Feb 20)

The demolition will take place on Wednesday, Feb 24. The 1476 kHz mast will be blown up at about 1100 UT, the 585 kHz mast at about 1400 UT.

Both demolitions will be broadcast live (starting at 1050 and 1350, respectively) by TW 1, which is available free-to-air via 19.2 deg. East on Astra 1H, 12.663 GHz h.

<<http://blog.ors.at/stories/abtragung-der-masten-am-bisamberg/>>

The complete antenna array of the Wien-Bisamberg mediumwave site will be demolished at the end of February. So far it is not known what will happen with the grounds. The transmitter building is under preservation order.

<<http://wien.orf.at/stories/417899/>>

Transmissions from this site, on 1476 kHz, ceased on 31 Dec 2008 at 2310 UT. At this point it was planned to blow up only the 265 m tall "Nordmast" (northern mast), once used for the 585 kHz outlet that is silent for almost two decades now. The 120 m "Suedmast" for 1476 kHz was supposed to be kept, and Oesterreichische Rundfunksender GmbH told ADXB-OE that the frequency would still be available for interested broadcasters. But now they dump this option definitely.

Some photos of the antenna array:

<<http://www.wabweb.net/radio/sender/bisamberg2005.htm>>

More photos, also of the old tube transmitters, with a link to an even larger photo collection that includes also a shot of the Thomson M2W transmitter that had been used during the last years of operation:

<<http://radiomuseum.heim.at/index-Dateien/Page541.htm>>

This development makes the Moosbrunn site the only operational AM transmission facility in Austria. (AM in the German meaning, technically correct covering all amplitude-modulated broadcasting, also dubbed "LMK".) (Kai Ludwig-D, dxld Feb 23)

Abtragung der Sendeanlage Bisamberg live auf TW1.

Am morgigen Mittwoch wird ein rundfunkgeschichtliches Monument endgueltig abgetragen. Oesterreichs hoechstes Bauwerk, der 265 Meter hohe Nordmasten und sein 120 Meter hoher Pendant am Wiener Bisamberg werden voraussichtlich um 1200 und 1500 Uhr Lokalzeit gesprengt. TW1 nimmt dies zum Anlass und sendet im Vorfeld der Sprengung eine Kurzdokumentation ueber die Historie des Senders - von seinen Anfaengen im Jahr 1933 bis zur endgueltigen Stilllegung in den 1990er Jahren. Nach dem Wiederaufbau und der Reparatur kriegsbedingter Schaeden an der Sendeanlage in den 1950er Jahren, galt der "Bisamberg" lange als Meilenstein in der Geschichte der Rundfunktechnik. Mit fortschreitender Verbreitung von alternativen Uebertragungsmoeglichkeiten, wie etwa Internet und digitaler Sendetechnologie, wurde die Bedeutung analoger Mittelwellen Sendeanlagen zunehmend obsolet und muendete schliesslich in der endgueltigen Einstellung des Sendebetriebs im Jahr 1997.

Anschliessend an diese Kurzdokumentation uebertraegt TW1 die Sprengung live in seinem Programm. Ergaenzend dazu zeigt TW1 am Mittwoch, 3. Maerz 2010, um 1945 Uhr MEZ eine Reportage ueber die umfassenden Vorbereitungen rund um die Sprengung der Sendeanlage. Sendezeiten: Historie und Sprengung

am Mittwoch, 24. Februar 2010, live um 1150 Uhr und 1450 Uhr MEZ sowie die Reportage ueber die Vorbereitungen rund um die Sprengung am Mittwoch, 3. Maerz 2010 um 1945 Uhr (Wiederholungen am Donnerstag, 4.3. um 1605 Uhr und Freitag, 5.3. um 2330 Uhr MEZ).

<www.orf.at> (Feb 23)

Und es gibt unschoene Nachrichten aus Oesterreich (die Bisambergmasten weg). Zu letzterer Neuigkeit moechte ich ein Paar Youtube-Links mit ein paar Videos beisteuern:

<[http://www.youtube.com/video\\_response\\_view\\_all?v=NN5RCuVVZDA](http://www.youtube.com/video_response_view_all?v=NN5RCuVVZDA)>

<[http://www.youtube.com/video\\_response\\_view\\_all?v=zeWdjAWR42Y](http://www.youtube.com/video_response_view_all?v=zeWdjAWR42Y)>

Darunter nicht nur die beiden TW1-Mitschnitte (da hat der ORF ja keine Kosten und Muehen gescheut ) sondern auch ein paar andere Perspektiven teilw. mit Zuschauerreaktionen.

Wer in der Naehelie ist kann sich ja noch was absaegen. Ich aergere mich immer noch nichts vom zerfledderten Sud-Radio-Mast in Andorra eingepackt zu haben obwohl da viel in souvenirgroesse rumlag.

Es ist wie bei vielen Dingen. Bedeutung und Wert erkennt man im vollen Umfang erst, wenn sie fehlen. Dem moechte ich mich noch rasch abschliessen und wuensche einen schoenen Abend!

(Douglas Kaehler-D, A-DX Feb 25)

AZERBAIJAN/IRAN/ISRAEL 13645 kHz at 1600-1700, Voice of Southern Azerbaijan?

In the radioescutas groupo, Fabricio Andrade Silva, Tubarao-SC, Brasil, reports an unID on 13645 kHz, last Friday and Saturday between 1615 and 1700 UT. Long discussion of this in Portuguese I will spare you here, but will be in next dxld. Suggestion is that V. of Southern Azerbaijan could be on the air again. My reply:

"Southern Azerbaijan" is in fact over the border in IRAN; thus our placement of this item.

\*HISTORY\*

"IRAN [non]. 9375, Voice of Southern Azerbaijan, \*1629-1700\*, Feb 06 and 13, Azeri talks with very frequent mentions of Azerbaijan, ID heard as: "Danisir cenub Azerbaican Radiosu." 44444 slight CWQRM. It is probably the same station which did broadcast on 13645 kHz around August 1998. (Masato Ishii-JPN, and Anker Petersen-DEN, dswci DXW Feb 26 via dxld)"

Possibly they are back; it looks as if the 2003 report may also have been after a long absence since 1998. It would be strange to resume the same time and frequency of so long ago, but 1600-1700 UT happens to be a hole in usage of 13645 kHz between India and China. With such a big signal in southern Brasil, it is surely via one of the major SW transmitter sites with time for sale. The new report was on Friday, and Adalberto says its schedule was once on Thursdays and Fridays only, but Fabricio heard it again on Saturday, so let's look for it this week.

The reference to qsl.net leads to

<<http://www.clandestineradio.com/intel/station.php?id=86&stn=346>>

which has not really been updated in years and has only very sketchy info under IRAN, not Azerbaijan:

"Organization: National Revival Movement of Southern Azerbaijan (also known as Southern Azerbaijan National Awakening Movement), which is linked to the irredentist National Liberation Movement of Southern Azerbaijan.

Location Unknown

Languages Farsi

Identification Unknown

Active January 8, 2003 - present

Contact Unknown"

The audio link says "sign on January 23, 2003, but plug-ins are required. It also mentions intervalsignals.net, and going there also under IRAN, we find a nice 2-minute studio-quality (?) recording at

<[http://www.intervalsignals.net/files/irn-voice\\_of\\_southern\\_azerbaijan\\_230103.m3u](http://www.intervalsignals.net/files/irn-voice_of_southern_azerbaijan_230103.m3u)>

Note also that the ID quoted in the 2003 log above is in a Turkic language, presumably Azeri, and not Farsi.  
(Glenn Hauser-OK-USA, dxld Feb 24)

Probably reappeared to weaken Iran regime and disturb the peace ?  
wwdxc bcdx - my first item appeared in July 1996.  
"which ME country changed to winter time on Sept 14th, 1997? SYR? ISR?"

Two d i f f e r e n t stations with same ID in the past on air ?

In 1996-1998 originated undoubtedly from Israel,  
from scrapped "Hillel" Kadima Porat site at  
32 16 51.27 N 34 55 54.38 E  
or present Yavne site at 31 54 12.83 N 34 45 05.63 E

and then again in 2002 til Dec 2003, most likely from Gäncä Azerbaijan.  
40 36 53.10 N 46 19 56.20 E

#### UNIDENTIFIED RADIO STATIONS

R. Free Azerbaijan?? From about late June[1996] a station in Azeri/Farsi has been heard 1530-1630 UTC mixing with R. Netherlands to South Asia. The QRM was bad making ID difficult. However, on 25 July an ID sounding " ...Azadese Azerbaijane..." was heard before it s-off at 1630 UTC. The word "Azad" or similar sounding ones all mean 'free' in the central asiatic languages as any DXer would know. So at once we presumed this was a clandestine and sought the help of BBC\_M and we were thrilled to get the following info from Chris Greenway and we quote

"Victor, Thanks for this. This is definitely a scoop for you as we only heard about the existence of this station on 25th July, so it was interesting to know that you've been hearing it for a while. It appears to be aimed at so-called "southern Azerbaijan", i.e. Azerbaijan province in northwestern Iran, rather than the Republic of Azerbaijan itself. It's an ANTI-Iranian operation. It's early days yet but I hope we'll be able to let you know more soon."  
(Chris Greenway-UK, 25 July 1996 to UADX)

So we thank the ever helpful BBC\_Monitoring for shedding light on the station. Tnx Chris.

(Victor Goonetilleke-CLN 4S7VK, UADX Sri Lanka, July 27, 1996, via bcdx)

IRAN/AZERBAIJAN New SW clandestine station broadcasting to Iran. Some interesting news for clandestine radio enthusiasts:

Voice of Southern Azerbaijan is a new clandestine station bc to Iran. The schedule is 1530-1630 UTC on 12090 kHz. The signal here in the UK is rather weak but clear as this is a clear channel. No jamming as yet. The ID in Azeri is "Bura Janubi Azerbaijan Sasi" ("This is the Voice of Southern Azerbaijan").

The station is aimed at the Azeri population in NoWe Iran, hence the use of the term "Southern Azerbaijan". I think the credit for first hearing the station must go to Victor Goonetilleke who tells me that he's been hearing it since June. This is also the unidentified station reported by Vladimir Titarev in DW Window 23. Although the station is announcing a telephone number in the Netherlands we think the tx site is somewhere in the Middle East.

(Chris Greenway/BBC\_M, via Dave Kenny-UK, July 31, 1996)

New opposition radio Voice of Southern Azerbaijan, a new anti-Iranian radio station has started operations.

A cassette tape and a letter relating to the station, both in Azeri, have also been sent by the National and Independent Front of Southern Azerbaijan to BBC Monitoring. ... This cassette has been sent to you from the National Independent Front of Southern Azerbaijan, the station that operates a radio station from a secret location, the station that broadcasts to our nation in Southern Azerbaijan and to all residents of Iran. This station broadcasts between eight and nine o'clock, Iran time, [1530-1630 UTC] on 12090 kHz or 24 mb ... You can also phone us and tell us your news. Our telephone number outside the country is 00 31 703 192189 [The Netherlands]. ... our struggles are to achieve the following objectives:

1. Complete national and cultural autonomy.
2. The Azeri language to be acknowledged in Iran as the second official language. In Azeri regions, the Azeri language should be acknowledged as the first language and should be taught in schools.
3. Azeris to have complete control over their region, their land, their natural resources.
4. Economic equality, the people of Southern Azerbaijan not be discriminated against.
5. Good education and training to be provided and the great traditions of the Azeri people to be valued.
6. Azeri representatives be promoted to high positions within government departments if they deserve to be promoted and not be discriminated against.
7. The budget for the Azeri minority to be allocated according to the population, or taxes [for Azeri people] to be reduced by as much as half the present level...

One people, one language, one blood, The National and Independent Front of Southern Azerbaijan. ...

(BBC\_M - BBC\_Monitoring, via AGDX, July 26-30, 1996)

UNIDENTIFIED RADIO STATIONS VoSouthern Azerbaijan moved from 12090 to 9927 kHz on the 1st Sept or before cause I first hrd it on 1st Sept upon my return from Europe. 1530-1633v UTC signing off.

(Victor Goonetilleke-CLN 4S7VK, UADX, via dswci DXW Sept 6, 1996)

CLANDESTINE RADIO STATIONS.

IRAN 9927 kHz. On Victor's tip last week, heard V.O.Southern Aizerbaijan with fair signals at 1615 kHz, no jamming.

(Finn Krone-DEN, dswci DXW Sep 10) and again 1540-1600+ with (pres) Aizerbaijani talk, mx 1555-1600 UTC into talk agn; many mentions of Aizerbaijan. Fair, and no jamming.

(Finn Krone-DEN, Sept 15, 1996, via bcdx)

Voice of Southern Azerbaijan (Azeri: Bura Janubi Azerbaijan Sasi), which was first heard in July 1996, is operated by the National and Independent Front of Southern Azerbaijan. Southern Azerbaijan is the Iranian province of Azarbayjan which borders the Republic of Azerbaijan. Programming is hostile to the Iranian government.

The radio says that it broadcasts programmes about "the daily life of the people of Southern Azerbaijan under Iranian oppression, the struggles of our brothers who live in Northern Azerbaijan (Republic of Azerbaijan), their long standing war with the Armenian enemy who receives help from Iran, programmes about our Azeri inheritance, our great history and civilization..."

(BBC\_M via AGDX, Sept 20, 1996)

[yes 9927 kHz easily heard on Sept 15th, but not on air Sat 14th, 1996. wb]

Voice of Southern Azerbaijan radio schedule. The opposition radio st Voice of Southern Azerbaijan is currently observed with bcs in Azeri 0615-0715 UTC on 11935 kHz, 1630-1730 on 6055 kHz. This radio st, which was first observed in July 1996, bcs in support of the National and Independent Front of Southern Azerbaijan, hostile to the Iranian government. Southern Azerbaijan is the Iranian province of Azarbayjan which borders the Republic of Azerbaijan.

(BBC\_Monitoring research Dec 96-Jan 97, via AGDX)

V of Southern Azerbaijan in Azeri on 11935 kHz signing on at 0615 UTC with the signature tune followed by opening anmts by yl and then into formal prgming. Good signals here in Sri Lanka. Signing off at 0715 UTC.

(Sarath Weerakoon-CLN, UADX, Jan 14, 1997, bcdx)

CLANDESTINE RADIO STATIONS.

Voice of Southern Azerbaijan in Azeri one hour later, from Sept 14th: 0615-0715 11935 [under RNW in Dutch], 1630-1730 12070 kHz.

(WB, bcdx May 9, 1998)

ISRAEL 13645 Voice of Southern Azerbaijan in Azeri to Northern Iran via KOL tx site in Jerusalem-ISR noted with extreme strong signal s-on at 0613 UT. Before the VOSA progr started, KOL ISR nx could be observed, // 15615 kHz.

(WB, bcdx Nov 22, 1998)

end of 1996-1998 transmission.

New Azeri broadcast from Dec 2002.

[IRAN non] The online newspaper Baku Today, quoting the press sce of SANAM [Southern Azerbaijan National Awakening Movement], says that the first independent radio of Southern Azerbaijanis, "Voice of South Azerbaijan Radio", will start bcng progrmes directed towards South Azerbaijan in the first week of January. The progrmes will be bc twice a week, says the report.

SANAM is one of the largest opposition groups in Iran. An estimated 16 million Azeris live in Iran, about twice as many as in Azerbaijan itself. A stn of the same name was active in 1996-1998, and was the subject of an investigative report by Clandestine R Watch:

<<http://www.qsl.net/yb0rmi/vosa.htm>>

[suggesting a possible link to Israel].

It's not yet clear if there's a link between the two.

(c) RNWMN NL Dec 31 Dec, 2002 also dxld)

[ISR? squabble to IRN. Former clandestine SoAZE Radio, which heard in the Nineties did originate from Yavne tx site in Israel. ed.]

IRAN [non; Clandestine from ISR to IRN? ed.] I was hearing a stn in a Middle Eastern lang at 1630-1700 UT on 9375 kHz since 8.1.03 and on 9, 15 and 16. Now I think this is the promised Voice of South Azerbaijan.

(Hans Dieter Schultz-D, DXLD Jan 17, 2003)

9375 Voice of Southern Azerbaijan presumed the one here, 1627 tune in carrier, 1631 annt by man in Middle Eastern lang with many mentions of Azerbaijan, democratia and a freq announced in MHz, "Azerbaijan sud(?) radyosu" heard, then into commentaries and interviews with occasional mxal

bridges or mx underneath, cut off mid sentence at 1700. fair strength and steady signal, tinny modulation and some tx hum but easily readable.  
(Mike Barraclough-UK, BC-DX Jan 23, 2003)

V. of Southern Azerbaijan: The SANAM web site  
<<http://www.cehreganli.com>> mentions its txion being at 9375 kHz. [sic showed faulty 9573 instead ! ed.] (P. Boselli-ITA, dxld Jan 26, 2003)

9375 V.O.South Azerbaijan Radio at \*1630-1659 34433 Azerbaijan, 1630 s-on with opening mx. ID. Talk and mx.  
(Kouji Hashimoto-JPN, JPN\_premium Feb 6, 2003)

9375 VoSouthern Azerbaijan, \*1629-1700\*, Feb 06 and 13, Azeri talks with very frequent mentions of Azerbaijan, ID heard as: "Danisir cenub Azerbaican Radiosu." 44444 slight CWQRM. It is probably the same stn which did bc on 13645 around August 1998 [which was via Israel site then...].  
(Masato Ishii-JPN and Anker Petersen-DEN, dswci DXW Feb 25, 2003)

V. of Southern Azerbaijan March 27, +1734-1755\* UT on 9375.6 with 34333, awful modulation, will require more monitoring; should be listed under Iran as clearly against Tehran Govt and seeking reunification of Azeri dominated provinces in Iran with today's Azerbaijan. I am not yet so sure about their schedule on the homepage is 5 days a week, please check the picture: [missing link]  
(Wolfgang von Poellnitz-POL, CRW Apr 4, 2003)

9375, Voice of Southern Azerbaijan, \*1630-1700\* Mar 27, SIO 242, ID with

opening mx as ". . . Azerbaijan sud radyosu . . . demokrasi . . ." then talk prgm. (Nagatani-JPN, JpnSWC, Mar 2003)

The following article published in March by the Swedish-based, Azerbaijan-related website "Cehreganli"

<<http://www.cehreganli.com/xeberler/radiok-english.txt>>

might indicate that The Voice of Southern Azerbaijan (Gueney Azaerbaycan Saesi Radiosu) towards Iran has been transmitted (resp. still is being transmitted) from Azerbaijan on SW, and the stn has been planning to ask the Azerbaijani Communications Ministry to change from SW to MW - provided that the reported press conference has been taken place in the Azerbaijani capital. Note that the text misspells the last used freq 9375 as "9537".

Quote: Voice of Southern Azerbaijan to be on air since March 21.

Founders of the radio will apeal to the communication ministry to alter the bcng from short waves to middle waves.

Head of the Baku Bureau of Southern Azerbaijan National Revival Movement (SANRM), Hussein Turkeli, head of Swedish Bureau Mahmud Bilgin and employee of the R of Voice of Southern Azerbaijan Afsane Sulduzlu gave a press conference yesterday (March 19, 2003).

In his address H. Turkelli said they decided to strengthen the activity of Radio of Voice of Southern Azerbaijan, which is bced 2 times a week from 2000-2030 [sic 2030-2100] in short waves ranging 31mb 9537 [sic, 9375, 1530-1600 UT] MH freqs.

According to him, key objective of establishment of this Radio was to organize the propaganda of a struggle conducted by 5 Southern Azeris for heir destiny and liberation. However, the Iranian regime is very much concerned by the activity of this radio and set up anti-propaganda campaign in this respect.

He said that they are planning to apeal to the Communication Ministry to alter the bcng from short waves to middle waves. Sevda Ilhamgizi end quote

The stn's webpage <<http://www.cehreganli.com/media/radio.html>> provides updated audio files of the bcs. The bcs are in Azeri, not Farsi as reported in other sources. They might possibly be produced in Sweden, as Stockholm is occasionally mentioned in the progrmes.

(Bernd Trutenau-LTU, dxld June 12, 2003)

Voice of Southern Azerbaijan still active, noted on May 8th at 1543 UT tune in on 9375, talk with many mentions of Azerbaijan, local music, more talk and abrupt off mid sentence 1557 UT. Fair strength on clear channel. (Mike Barraclough-UK, CRW May 8, 2003)

9375 V.O.South Azerbaijan Radio at \*1531-1543 23442 Azerbaijan, 1531 s-on with opening mx. ID and opening announce. Talk and local mx. (Kouji Hashimoto-JPN, JPNpremium Sept 22, 2003)

9375 Voice of Southern Azerbaijan at 1529 very short tone, then sign on with man mentioning Azerbaijan a number of times. 1533 what sounded like nx read by woman, mentioning the CIA, Iran. 1537 end of nx and talk by man. Short talks by a couple of different men, short fanfares. 1554 return of same woman who read the news. 1600 another fanfare with man, and off.

No sign of any jamming so I guess this one doesn't bother the Iranian  
govt.  
(Oct 1, 2003)

Oct 2nd: 1525 tune in to open carrier, no test tones were heard. 1530 sign  
on with ID, fanfare, and talk by man. 1533 what sounded like nx read by  
woman. Program continued to repeated yesterday's format. Once again, no  
sign of any jamming. Via Javaradio Europe.  
(Hans Johnson-USA, Cumbre Oct 2, 2003)

VOSouthern Azerbaijan Azeri 1630-1700 Tue/Fri 9375 UNID TX IN USB.  
(Dec 2003, bcdx)

AZERBAIJAN [to Iran] VO Southern Azerbaijan confirmed silent. The website  
of the SANAM (South Azerbaijan Awakening Movement) is confirming that the  
programmes of "Gueney Azaerbaycan Saesi Radiosu" (Voice of Southern  
Azerbaijan) are silent since December 2003. These prgr's were produced in  
Baku and transmitted to Northern Iran on 9375 via the Gãncã transmitting  
centre in Azerbaijan.

"The txion of the radio of "Southern Azerbaijan Voice" was temporarily  
ceased because of the facts of the exposure to the damages and the  
breakage of the technical equipment and the results of the horrible fire  
and terror made in the headquarters of Baku Representation by the  
"Southern Azerbaijan Voice" radio and the Baku Bureau of the SANAM in the  
city of Baku, December 17, 2003."

<<http://www.gamoh.org/en/radyo.html>>

(Bernd Trutenau-LTU, dxld June 17, 2003)

... and was backed by Israel's secret foreign sce in past decade, often  
heard with KOL mixture px and menmade error feeder switches to KOL  
programmes instead. I suppose, this to weaken the Iranian govt by South  
Azerbaijan opposition groups mouthpiece. (wb, June 17, 2003)

You are refering to the another program of the same name which was aired  
ca. 1996-1998 via Israel and had a contact address in Austria. This was a  
different project than the station mentioned above, backed by group called  
National & Independent Front of Southern Azerbaijan (FNISA). The CRW  
website has the details:

<<http://www.clandestineradio.com/intel/station.php?id=86&stn=46>>

There is no connection with the "Voice of South Azerbaijan" mentioned  
above, this project was produced in Baku and aired only via tx in  
Azerbaijan.

9490 R. Republica at 0010 UT on Feb 23, still very strong and clear signal, no jamming audible tho possibly some is far under, on this 227 degree beam from Sackville, which crosses central Florida and Yucatan, just missing Cuba, but close enough for this UT Tue-Sat 00-03 broadcast.

Meanwhile, noise jamming still on ex-9810 kHz. RR still very good on 9490

kHz at 0112 UT. This is so much better than ex-9810 kHz that now there is little doubt that was really from Rampisham UK.

DRM/INDIA DRM technology being demonstrated at RadioAsia 2010

One of the most eye catchy presentations at the RadioAsia 2010 conference, being held in New Delhi (February 22-24) is the demonstrations of the Live broadcast of radio by deploying the digital broadcast technology developed by DRM (Digital Radio Mondiale) Consortium.

DRM Consortium, the principal sponsors for conference, is demonstrated the difference that is created by digital broadcast over analogue for the radio medium. "DRM is the global digital technology which can convert analogue broadcasts to digital thus significantly improving the audio quality and bringing many other benefits to broadcasters and listeners through its added features" says the Consortium. [...]

In addition to the ongoing Conference, British Broadcasting Corporation (BBC) is to broadcasting three hours in DRM everyday from 22nd-26th February from 04.29:30 - 07.29:00 UT on 17760 kHz. For the first time this year the broadcast will start with the daily Hindi programme followed by current affairs in English.

Christian Vision Radio (CVC) will run DRM transmissions from 22nd-24th February from 0830-1230 UT on 17590 kHz via Juelich site. The programmes will be in Hindi.

[...] DRM Consortium Chair, Ruxandra Obreja, expressed hope that it RadioAsia 2010 Conference would be a great success, "Radio Asia is being held in India for the first time and is already shaping as a significant radio event with industry representatives having committed to attend." "This will be a great occasion to showcase the tremendous potential of DRM and how it can change the future of radio broadcasting for good. We extend our thanks to broadcasters who are putting in the special DRM transmissions for this event and making it even more useful for the participants," she remarked in a prepared statement.

ERITREA 7175 Voice of the Broad Masses, Asmara, 1851-1921, 20 Feb'10,  
Arabic, talks, HoA music & songs; 55444.  
(Carlos Goncalves-POR, wwdxc BC-DX TopNews Feb 23)

On 22 Feb at 1500- UT I was checking the jamming situation on 5060 and  
7175 kHz. No jamming on 5060 kHz although the weak Eritrea was audible  
under strong China. At 1600 UT no jammers appeared to 7175 kHz where VOBME  
was carrying some celebration program. When rechecking 7175 kHz at 1606 UT  
noted there enthusiastic female voice in American accented English talking  
about youths of Eritrea and new generation. Ended her speech with phrase  
"Victory to the masses" and got loud applauses. Back to local languages  
and music. This programme was also broadcast on 7210 and 5060 kHz.  
(Jari Savolainen-FIN, dxld Feb 22)

Re: Eritrea. Fine monitoring Jari. Today has been a day of protest by  
Eritreans in various cities around the world against UN sanctions imposed  
in December. Sounds like like you heard a special broadcast of one of the  
rallies.  
(Chris Greenway-UK, dxld Feb 22)

Yes Chris. Noted that event in the net later, too. I first checked if  
there was a public holiday or something in Eritrea, but none. Then noticed  
the web mentions of "Worldwide rally against UN sanction on Eritrea" on  
February 22. That must have been the subject of the program.  
(Jari Savolainen-FIN, dxld Feb 22)

GERMANY RHU Radio Huriyo (Xoriyo) on 9820 kHz at 1630-1659 UT Tue/Fri only, deleted, via Juelich site. see also

<[http://www.media-broadcast.com/fileadmin/user\\_upload/Downloads/B09\\_operational\\_060110.pdf](http://www.media-broadcast.com/fileadmin/user_upload/Downloads/B09_operational_060110.pdf)>  
(wb, via wwdxc BC-DX TopNews Feb 22)

The reports about the CVC showcase for the broadcasting fair that takes place in Delhi next week made me wonder: Juelich?

Guess what, the site was silent for less than four weeks and is again in use already since Nov 20, Mon-Fri between 1626 and 1659 UT only, for TWR in Armenian on 5980 kHz, Thu and Fri also for Radio Xoriyo on 9820 kHz.

<[http://www.media-broadcast.com/fileadmin/user\\_upload/Downloads/B09\\_operational\\_060110.pdf](http://www.media-broadcast.com/fileadmin/user_upload/Downloads/B09_operational_060110.pdf)>

It seems that the current state of the site is somewhat similar to what IBB circles call "caretaker status", with transmitter engineers shortly showing up on workdays and the transmitters being used for real transmissions instead of testing them on dummy loads.

Would be another question for Glenn to ask Andrew Flynn, since in fact no

real information about this matter is available so far, other than what appeared in the NASWA newsletter and the circumstance that first all transmissions from Juelich ceased as of Oct 25, like Brother Scare on 6110 kHz which, sure enough, stays at Moosbrunn to which he has been transferred.

(Kai Ludwig-D, dxld Feb 21)

mit einem Druckfehler: Stuttgart Hirschlanden mit 783 statt richtig 738 kHz eingetragen. 1539 kHz Mainflingen nur tagsueber, da abends/morgens von ERF TWR Wetzlar belegt.

(wb, wwdxc BC-DX TopNews Feb 22)

IBC 6045 kHz off air. IBC Tamil beamed to SoAsia is not heard for many days now at 0000-0100 UT on 6045 kHz. Wertachtal 125 kW. For many days prioier to that they were noted playing only Tamil songs with out even id or announcements.

Some weeks back they went off air for some days and shortly returned on air.

(Jose Jacob-IND VU2JOS, DXindia Feb 20)

Radio Oeoemrang 15245 kHz Wertachtal 500 kW at 1557-1700 UT on Feb 21 only.

At 1557 UT sender signed on at Wertachtal. My location is situated like in the main lobe direction of 300 degrees towards zones 4,8,9 via Stuttgart, Brussels, London, Edinburgh, and then Nova Scotia, into US Washington etc.

A smidgen fluttery which is not surpring in the 19 meterband, some 120 kilometers away of Wertachtal transmission site, S=9+20dB which is 55555 locally. At 16.00:04 UT anncmt in English, BUT STILL old details of last year like February 21, 2009, mentioned 15230 kHz and Juelich 100 kW.

Then started in Frisian (lower German) language, which is similar to Dutch West Frisian language spoken in North Western Netherlands. The Kiel student Anna read the (local?) news and also a weather report of North Sea area could be traced.

Powerful Wertachtal 500 Kilowatt Signal should "twist the spoons" in North America ?

Dann begann es mit Friesich Platt, die Kieler Studentin Anna hatte auch das Wetter drauf. Und auch noch ein Christoph in Platt war zugange.

Hier anbei noch zwei Mitschnitte von 15245 kHz, total stoerungsfreie Frequenz, auch die Nachbarkanaele total frei. Flatter Signal in Stuttgart.

Hello Dxplorers,  
Germany, Radio Oomrang at 1600 UT on 15245 kHz, 21 Feb, 2010. Excellent signal. Talk in German, but some En identifications. Very strong signal. I had to leave 20 minutes into the broadcast, and missed any contact info. Read this was via Wertachal, Germany.  
(John M. Fisher-MA-USA, DXplorer Feb 21)

Re BC-DX #952, 20 Feb 2010.  
972 MW - Tuning around in my car radio this afternoon, I was curious to find English language from BBCWS there with a decent signal. (I am on a touring holiday, currently in Northumberland).  
(Tom Read-UK, BrDXC-UK Feb 17)

You didn't say what time this was Tom but it could have been NDR Info Hamburg which relays BBCWS 1700-1730 UT according to WRTH 2010. (and its just across the North Sea from Northumberland!).  
(Alan Pennington-UK, BrDXC-UK Feb 17)

That is exactly it. They broadcast Europe Today at those times. The only English language broadcasts that I am aware of on domestic German Radio.  
(Andrew Tett-UK-UK, BrDXC-UK Feb 17)

You might be interested to know, that there is still another medium wave outlet with regular English programming. In 2008 Antenne Saar, a public radio channel with German-French focus, started re-transmitting 30 minutes News/Newslink program of Deutsche Welle (2100-2130 CET-local time, currently 2000-2030 UT) on 1179 kHz 10 kW and local DAB block 8B (thus regional reach only).

EINS EXTRA: ARD digital - Woche vom 27.02. bis 05.03.2010

RBB 16:9, Sun Febr 28, 2010. 03.00 MEZ

Funkstille. Die Geschichte des Funkhauses Nalepastrasse

Film von Harald Quist. Erstsending RBB: 31.10.2009.

"Funkhaus Berlin" steht am Eingang zu lesen, und wenn die alte Schranke aus DDR-Zeiten von neuen Sicherheitsleuten geoeffnet wird, dann spuert man ihn bald - den Geist des Hauses. Manchmal scheint es, als koenne er die denkmalgeschuetzten Gebaeude neu beleben - wenn der Meisterpianist Murray Perahia in Saal 1 Bach einspielt, der Schauspieler Dieter Mann ein Hoerbuch von Joseph Roth liest oder der deutsch-italienische Saenger Nevio im planet roc produziert. Das waren Sternstunden im Sommer 2009, aber die meisten Tage daemmert das ehemals so lebendige Areal an der Spree vor sich hin, wie im Wachkoma.

Guenter Gollasch, Jahrgang 1923, seit 1954 mit dem Rundfunk eng verbunden, erinnert sich und packt dabei auch wieder einmal seine Klarinette aus.

Noch laenger ist Gerhard Steinke als Toningenieur im Rundfunk. Er schwaermt von der einmaligen Akustik der Aufnahmesaele und klagt ueber die grosse Orgel, die seit Jahrzehnten ausser Betrieb ist - "ein trauriges Kapitel".

Die Jahre 1989-91 waren eine aufregende Zeit fuer den abzuwickelnden Rundfunk der DDR. Christoph Singelstein war Hoerspiel-Dramaturg und wurde dann Intendant, Hannelore Steer war Redakteurin bei Radio Berlin International und wurde Programmdirektorin. Beide erinnern sich in ihren ehemaligen Arbeitsraeumen. Helmut Lehnert kam als Musikredakteur vom Sender Freies Berlin in die Nalepastrasse, um das Jugendradio FRITZ aufzubauen. Das Verhaeltnis zwischen den Kollegen Ost und den Mitarbeitern West war "extrem gestoert", sagt er im Schutt der demolierten Studios im Block E-R.

Hier ist zu sehen, was in der neuen Zeit der Funkstille durch Vandalismus und kriminelle Machenschaften in der Nalepastrasse geschehen ist.

Dauer: 45 Minuten

25422.  
(Carlos Goncalves-POR, wwdxc BC-DX TopNews Feb 23)

KOREA D.P.R. 7140.02 V.O. Korea Usual IS start at 1200 UT played twice,  
ID in lcl lang by M, IS twice again, W briefly, then fanfare. Fairly good  
but blasted by Ham on 7143 kHz.  
(Dave Valko-USA, hcdx Feb 20)

3250 Voice of Korea, Pyongyang, 2233-2251, 19 Feb'10, Japanese to Japan,  
music, talks; 35332.

4450 KCBS, Pyongyang, 2245-2258, 18 Feb'10, Korean, songs; 45333.  
(Carlos Goncalves-POR, wwdxc BC-DX TopNews Feb 23)

LAOS 7145 Lao National Radio?? at 1140-1203+ UT, almost fair signal  
strength but modulation extremely low w/just strains of audio. No chance.  
Splatter from huge Ham signals on 7153 kHz net.  
(Dave Valko-USA, hcdx Feb 20)

LITHUANIA 612 To inform you and readers RusDX that 1 February we  
resumed retransmission "Voices of Russia" programme in the Russian  
language in Vilnius through MW 50 kW, transmitter on a frequency 612 kHz  
daily at 1300-1600 UTC. In 2009 retransmission was daily at 0600-1600 UTC  
power of 100 kW. Reduction in the volume and power broadcasting occurred  
for reasons beyond the control of Radio Baltic wave ".  
(Rimantas Plejkis-LTU, RUSdx Feb 21)

3955 QSL SW Radio, via Sitkunai-LTU, QSL (with mention of tx site),  
letter for e-report to <indo @ sw-radio.com> in 10 weeks. v/s Viktor  
Sawatzki.

(Artur Fernandez Llorella-ESP, RUSdx Feb 21)

MALAYSIA 11885 Voice of Malaysia on Feb 16 at 1033-1100 UT in Chinese.

SINPO 44433. Female talk till 1035 UT, then ID. Interview followed. Music program at 1045 UT. // 15295 kHz (SINPO 25332).  
(Iwao Nagatani-JPN, JPNpremium Feb 19)

11885 Voice of Malaysia, at 1142 UT on Feb 10. Thanks to a tip from Dan Sheedy, I dusted off my Eton E5 and listened from home, something I have not done in a while. Dan measured this at 11884.6 kHz. I heard them in Chinese with EZL songs; fair reception and good audio; ToH 1+1 pips and into a different audio feed in Bahasa Indonesia with poor audio (mushy/muffled); many "Voice of Malaysia" IDs (both spoken and singing).  
(Ron Howard-CA-USA, JPNpremium Feb 19)

5030.02 Sarawak FM at 1348-1410 UT Feb 19. Regional vocals, gal ancr; a few ads and/or program notes. Good signal competing with band noise.  
(John Wilkins-CO-USA, DXplorer Feb 25)

7295 Traxx FM via RTM, Kajang, 1101-f/out 1155, 22 Feb'10, English, news bulletin until 1110, advertisements, pops; 25422.  
(Carlos Goncalves-POR, wwdxc BC-DX TopNews Feb 23)

MALI 9635 R. Mali, Kati, 1155-1315, 22 Feb'10, Vernacular, tribal songs, French at noon for a 1 hr prgr of modern Malian music, newscast at 1300; 35444; // 7285v still silent.  
(Carlos Goncalves-POR, wwdxc BC-DX TopNews Feb 23)

MEXICO 6104.79 Candela FM 1157 lively LA mx, 1200 UT choral NA, 1202 UT M anncr in SP for abt 30 sec., then canned canned anmnt, and into Opera-like mx. Splatter by 6110 kHz Cuba.

6185 R. Educacion Classical mx from 1157 UT. 1159 UT full canned ID by M in Spanish w/call, addr, and ending w/ment of what sounded like 55 years on the air. Back to Classical mx. Good but splatter from 6180 kHz Cuba. Seems like RHC has it in for the Mexicans.  
(Dave Valko-USA, hcdx Feb 20)

6009.98 R. Mil, Cd. de Mejico, 1055-f/out 1120, 22 Feb'10, Castilian, rlg. propag., advertisements, songs; 15431.

6185 R. Educacion, Cd. de Mejico, 1051-f/out 1125, 22 Feb'10, Castilian, Cuban (pres) rhythms, songs; 25432.  
(Carlos Goncalves-POR, wwdxc BC-DX TopNews Feb 23)

MONGOLIA 7260 Mongoliin R, Khonkhor, 2322-2330 when blocked by CHN, 17 Feb'10, Mongolian, light music, talks; 34432, adj. QRM; // 4895 Murun, not 4830 Altay.  
(Carlos Goncalves-POR, wwdxc BC-DX TopNews Feb 23)

MOROCCO 9575 kHz Radio Mediterranee Int. at Morocco (Medi 1), 1100 UT, Febr 24  
9575 R.MEDITERRANEE Int. Nador-MRC 0500-0100 UT French/Arabic 250kW 110deg towards Saudi Arabia (Egypt, Sudan etc.)

Good transmission with SIO 444 by News and Music-Program in French/Arabic at transmitter location Morocco Nador-Selouane;  
Coordinate 35 02 31.15 N 02 55 21.56 W  
(Theo Aeverbeck-D, hcdx Feb 24)

Nador SW antennas 1100 meters eastwards of the longwave array, at  
9575 kHz 31 mb at 35 02 41.99 N 02 54 39.64 W  
15340/5 19 mb at 35 02 43.76 N 02 54 37.78 W  
(wb, hcdx Feb 24)

MYANMAR 7185.77 R. Myanmar?? at 1150-1203 UT, sufficiently strong  
signal, but like 7145 kHz, extremely low modulation lvl. Really impossible  
to get any decent details.  
(Dave Valko-USA, hcdx Feb 20)

7185.77 R. Myanma (pres) on 1412-1433 UT Feb 19. Vocal mx hosted by YL  
ancr; no BoH break noted. Carrier is of fair strength but can't make much  
out due to low modulation, as noted by others. Noted daily around this  
time with the same format.  
(John Wilkins-CO-USA, DXplorer Feb 19)

NEW ZEALAND 15720 R. NZi, Rangitaiki, 2240-0000, 22 Feb'10, English,  
cook recipe, songs, interview on books, news at 2300, prgr announcements,  
weather rpt. at 2315, "Business" feature on Midday Report, weather again  
at 2330 followed by World Watch and news at mid night; 25433. I was not  
expecting that such a high fq would provide this quality signal given the  
circumstances.

They were also vy. good on 16 Feb'10, 1904-1937, rated 44444, adj. QRM  
only.  
(Carlos Goncalves-POR, wwdxc BC-DX TopNews Feb 23)

NIGERIA 6089.8 R. Nigeria, Kaduna, 2218-..., 21 Feb'10, Vernacular,  
talks; 43442, QRM de VoRUS in Portuguese 6090, DRM signal 6085.  
(Carlos Goncalves-POR, wwdxc BC-DX TopNews Feb 23)

PAPUA NEW GUINEA 3385 R. East New Britain, at 1312 UT on Febr 21. Poor  
to at times fair signal of pop mx.  
(Jerry Strawman-IA-USA, DXplorer Feb 21)

PERU 5014.33 Radio Altura, Cerro de Pasco the strongest Latin on 60  
metres tonight (due Radio Rebelde Cuba 5025 kHz on open carrier). Noted  
with full identification in Spanish at 0509 UT on 24 Febr. Rarely heard at  
this time, so maybe special event?  
(Bryan Clark-NZL, dxld Feb 25)

RUSSIA 7140 R. Rossii, "Sakha", Yakutsk, Siberia, 2334-2344, 17 Feb'10,  
Russian, talks, reports; 23431; // 7200.

Google train from Moscow to Vladivostok, Far eastern Russia.

<<http://tinyurl.com/yjzxsle>>

<<http://www.google.ru/intl/ru/landing/transsib/en.html>>

Google train TransSib railway tour on Google Maps. Unfortunately only  
Atamanovka Chita is visible in bride sunshine on the left side of the  
railway. From 16.55min/sec to 18.50min/sec after departure at Chita.

2 x 50meters masts for mediumwave 1116 / 1395 kHz.  
(wb, wwdxc BC-DX TopNews Feb 20)

Mit dem Google-Zug durch Russland - gute Reise!

und siehe hier: <<http://tinyurl.com/yjzxsle>>  
(Theo Awerbeck-D, A-DX Feb 18)

Hobbymässig gibt die gesamte Filmstrecke nichts her.  
Nur Atamanovka Chita ist mit seinen 2 Masten ist sehr schön zu sehen.

Die meisten Häuser an der Strecke sind auch neu gestrichen, viele  
Schmutzflecken werden durch farbenfrohe Türkis / weissgrau Bandzäune  
verdeckt. Auch viele neue Häuser, viel Bahnpersonal und auch imposante  
Eisenbahnbauten sind zu sehen.

Alles sehr farbenfroh, auch die Loks und Waggonen gestrichen. Braun-rote  
Güterwaggonen sind höchstwahrscheinlich aus Russland, die grün-türkisen  
in Fernost aus China ?

Die noch sehr intakte Infrastruktur des Eisenbahnwesens - vergleichbar mit  
der blühenden Eisenbahn Anfang der 60ziger Jahre in Deutschland - ,  
rückt etwas die bleibenden Eindrücke zurecht, die noch sehr negativ von  
den Bildern in den früheren sehr verfallenen russischen Garnisonsbauten  
in der DDR herrühren.

Kommentar zu der Regie der Aufnahmen:  
die Loks müssten mit 2 Kameras bestückt sein, die sofort umspringen,  
wenn in Blickrichtung ein Gegenzug vorbei fährt.

Ausserdem müsste die gesamte Strecke auch noch mal in der Gegenrichtung  
abgefahren werden, damit auch noch ein anderer Blickwinkel entsteht.

Ausserdem sind die morgendlichen Aufnahmen gegen die tiefstehende Sonne zu  
vermeiden und müssten durch Aufnahmen am Nachmittag ausgetauscht werden.

TX center Moscow Svelii Kupavna zwischen Schelesnodoroschny und  
Elektrougli ist leider nur kurz als ein Mast zu sehen 19.25 bis 19.45  
min/sec, weil dauernd Bäume rechts an der Strecke stehen. Die Aufnahme  
zeigt nur die rechte/südliche Seite von der Lok aus.

23 km südöstlich von Kilometer-87 liegt das TX center Kurovskaya /  
Avsiunino, aber viel zu weit weg von der Bahnstrecke.

Bei Babino vor Nishni-Novgorod bei 7.45 min/sec sieht man 6...8 Masten  
direkt rechts von der Bahnstrecke, und Tankwagen, könnten Blitzableiter  
sein zur Brandvorsorge. Aber es sind nicht die RJH99 Masten des ehemaligen  
Reichs-Kriegsmarine Senders aus Kalbe-Milde / Stendal. das sind 18 Masten  
bei  
56 10 16.03 N 43 56 03.75 E RJH99 RDL Nizhniy Novgorod, former Nazi WWII  
marine radio Goliath Kalbe-Germany. Die stehen 12 km südlich der TransSib  
Strecke bei Gorbatovka weit weg von der TransSib.

Bei Minute-25 im Raum, bzw. Einfahrt Perm über die Kama Brücke geht es  
auf die südliche Seite der Kama, damit weit weg vom MW Zentrum Perm.

TX center Ekaterinburg LW/MW liegt 5 km nördlich von der TransSib auf der  
linken Seite bei der Durchfahrt Ekaterinburg.

Bei Tyumen ist auch nichts sichtbar, TX nur 3 km vom Hbf. entfernt.

In Omsk ist auch nichts zu sehen. Mehrmals stört auch ein sehr langer

Gueterzug auf dem Parallelgleis in Blickrichtung. Diese Streckenteile muessten nochmals abgefahren, gefilmt und dann in die Gesamtstrecke eingepasst werden.

Bei der Ausfahrt aus Omsk am Morgen sieht man eine Museums-Dampflok.

Novosibirsk, das KW Sendezentrum 12 km suedlich vom Hauptbahnhof. Auf der rechten Seite Richtung Osten. Die Filmaufnahme zeigt aber leider nach links.

TX center Oyash Raduga 8.40 bis 9.12min/sec ist links hinten ein hoher Mast zu sehen, vielleicht die 171 / 270 kHz Langwelle Raduga ? Dann kommt links ein Gueterzug ...

Krasnoiarsk, die Kamera filmt links, der lokale Sender ist auf der rechten Seite. Nur 1 km entfernt von der Bahntrasse entfernt die beiden 216/594 kHz hohen Masten, leider nicht auf dem TransSib Film.

Angarsk 198 kHz LW rechte Seite am Bahnhof, aber TransSib Film leider auf der linken Seite.

Irkutsk bei 4.40min/sec faehrt der Zug direkt am Sender vorbei - nur 240 Meter Distanz, leider die Kamera wieder an der falschen Seite. In der Lok muessten zwei Kameras quasi als Fischauge angebracht sein, damit etwa 160 Grad vor der Lok eingesehen werden koennen.

Selenginsk TX 279 kHz LW auch auf der falschen Seite.

Endlich mal -- , Atamanovka Chita ist auf der linken Seite sehr schoen und lange im Sonnenschein zu sehen. Ab 16.55min/sec bis 18.50min/sec nach Abfahrt Chita. 2 x 50m Masten fuer Mittelwellen 1116/1395 kHz.

Bei 30min is rechts gegenueber auf der anderen Flussseite LW Chita 261 und die Zarya MW 36masts 2.98 km lang 801 kHz gelegen, leider sieht man nur die Boeschung auf der linken Seite.

Skovorodino Amur wieder Masten auf der rechten Seite gelegen, aber Kamera filmt die linke Seite.

Belogorsk, sehr lieblos die Kamera in die Sonne positioniert, Wassertropfen zu sehen, alles koennte viel professioneller gemacht sein. vor allem beide Seiten der Strecke waeren abfilmen und auch in besserer guter Qualitaet.

Bei 6 bis 7.25 Min sieht man im Hintergrund die MW Antenne Belogorsk.  
50 53 11.69 N 128 32 02.90 E

Auch RAB-99 VLF Chabarovsk Nikolaevka auch auf der falschen Seite. Bei den Sendezentren Khabarovsk und Vladivostok Razdolnye ist nichts zu sehen.

ps. natuerlich auch nichts linkerhand in der Mongolei zu sehen, weil das der Abzweig nach China ist und dieser wird nicht gezeigt. Nils war dort mit seiner Tochter, bei Ulan-Bataar Khonkhor 4081 4850 site, sowie Sain Shand 4865 kHz in Richtung Jining-Beijing.

SOLOMON ISLANDS 5019.977 SIBC, at 2012 UT, English, noted with program

about corruption in the Pacific (i.e. PNG), would have been a BBC or Radio Australia produced program; noted them several hours earlier (0700+ UT) with open carrier. Feb 19.

[later]

I have only carriers, no audio. This on 5019.958 kHz. Also on Feb 24th with new Optimod sound. That would account for the better audio quality.

It is also much stronger at present as well.

(David Sharp-NSW-AUS, dxld Feb 20)

SOUTH AFRICA/UAE [not Ascension Isl]

UPDATE - Bar-Kulan Radio - New targeted broadcast for SOMALIA.

The station now tells me that their SW schedule from 1 March will be:

0500-0600 UT 15750 kHz (Al Dhabbaya-UAE)

1600-1700 UT 9960/9930 kHz (Meyerton-AFS)

This conflicts with the widely posted details that the transmissions will be from Ascension, and with 17700 kHz given as the frequency for the one at 1600-1700 UT.

(Chris Greenway-UK, dxld Feb 25)

SPAIN 531 RNE Navarra QSL. Seitdem die Schweiz Beromuenster 531 kHz verlassen hat, hat sich RNE Navarra hier in Genf zu einem Standardsender entwickelt. Regionalprogramme kommen z.B. von 0725-0730 und 0750-0800 LT Ortszeit. Im Gegensatz zu frueher scheint es allerdings mit QSLs etwas schwieriger zu sein, im dritten Anlauf hat es endlich nach 7 Tagen Laufzeit geklappt.

Im Umschlag waren PPC, Ansichtskarte und einige Aufkleber.

Die Adresse ist:

RNE

c/ Aoiz, 17 - 3 degr

31004 Pamplona, Spain

(Carlos Goncalves-POR, wwdxc BC-DX TopNews Feb 23)

TAJIKISTAN It seems, "Radio and Ovozi Tocik" (Tajikistan) fundamentally changed its grid broadcasting. Transfer description.ru on 1400-1500, now not. Till 1400 UT is English program (while WRTH-2010 gives 1300-1400 UT in Arabic), in 1400 UT sounds multilingual announcement (including English), and the transmission continues at some of the languages of the Iranian group (Persian, Dari or Tajik). 7245 KHz frequency, I heard at 33333. Shulyakovskiy vernicia CNR-2. Know any current schedule in Russian? (Dmitrijs Mezin-RUS, RUSdx Feb 21)

UGANDA 4976 R. Uganda, Kampala, 1919-1933, 18 Feb'10, English, talks, hard to copy to to a somewhat muffled audio; 34343, adj. QRM de VoRUS 4975 via TJK.

(Carlos Goncalves-POR, wwdxc BC-DX TopNews Feb 23)

UNID site 15165 Well, fairly new. Said to have launched on 7 January. Thursdays only. In French and Somali ("Codka Djibouti" "Voice of Djibouti"). Some confusion about the exact time: one part of their website

<[http://www.lavoixdedjibouti.com/index.php?p=1\\_4\\_Accueil](http://www.lavoixdedjibouti.com/index.php?p=1_4_Accueil)>

- gives it as

1800-1900 Djibouti time (1500-1600 UT), but another (cached) version gives 1830-1930 LT (1530-1630 UT). Both agree it's on 15165 kHz. The 1530-1630 UT time is also given on a YouTube clip of the inaugural broadcast:

<<http://www.youtube.com/watch?v=2P2AckZ763c>>

Has anyone spotted this registration or perhaps even heard the Thursday broadcast? What's the site of the 15165 kHz?  
(Chris Greenway-UK, dxld Feb 25)

Unknown TX location.

Is a TDP brokery transmission on Thurs only. Next to the usual Samara-RUS 15160 "home frequ". Also similar 15195 kHz at 1600 UT on Mondays ONLY, also via Samara-RUS 200kW at 188 degrees. EOTC Holy Synod Radio in Amharic. (wb)

Here in Finland good signal on 15165 kHz, ID at 15:31:30 UT as:

"Halkan wa Idha'adda ... Odki Djibouti".

(Mauno Ritola-FIN, dxld Feb 25)

This station is audible right now. Heard from tune-in at 1605 UT with good signal here in the UK on 15165 kHz. Talk in Somali with many mentions of Djibouti and ID heard as "Voix du Djibouti" (even when speaking in Somali) Into French at 1612 UTC mentioned "nouveau radio ... Voix du Djibouti".  
(Dave Kenny-UK, dxld Feb 25)

Newly discovered clandestine La Voix de Djibouti, 15165, confirmed Feb 25 at \*1530-1629:30\* UT. Had looked for it starting before 1500 UT as there was conflicting info about correct schedule, but nothing there, until cut on abruptly at \*1530 UT, with music, anthem? Then brief announcement, also brief Qur'an, more talk in non-French, mentioning kHz, and a .com.

Presumably all in Somali and still so when local noise, power-tooling neighbor overrode at 1610-1619. By 1619 when that cleared up, station had switched to French; sounds like a lot of platitudes. Dave Kenny, who had no such noise interruption, says French started at 1612 UT.

Cut off the air at 1629:30\* UT sharp before speaker was finished. So it's coming from a transmitter site with precision timing, but no clues beyond that. Signal at start was S9+10 with flutter and diminished somewhat during the hour.

Tnx to Chris Greenway for uncovering this, which has allegedly been on the air every Thursday since 7 January. More in French only at  
<<http://www.lavoixdedjibouti.com/>>

About time Djibouti, the former French Somaliland, Afars & Issas, had its own clandestine! Website indicates it is that, "free and independent voice," etc. Emissions Radio page axually linxs to mp3 files of the seven/eight broadcasts so far, and there are also apparently

full French transcripts on the next page. I did not realize Djibouti was so mountainous, even above the timber line, judging from the only illustration on the website. Hints it may be based in Colorado? (Glenn Hauser-OK-USA, hcdx Feb 25)

USA 12133.5usb Roland Schulze phoned me today Feb 20th, noted AFN AFRTS tentatively Key West-FL-USA program in late European afternoon. (Roland Schulze-D, wwdxc BC-DX TopNews Feb 20)

Frequency change of WYFR Family Radio in English & Spanish: 0400-1145 NF 6875 YFR 100 kW 355 deg to NoAm, ex6915 (R BULGARIA DX MIX News, Ivo Ivanov, via wwdxc BC-DX TopNews Feb 22)

VANUATU An update on the new frequency from Vanuatu. Adrian Sainsbury, Frequency Manager at RNZI advises that yesterday was the first day on 5055 kHz and the transmitter is only 1.5 kw on 5055 kHz at present. It will be operating 24 hours a day over the next few days (open carrier noted at 1815 UTC but nothing evident at 0515 UTC check).

Adrian also advises there will be some tests on 7260 kHz at some stage. (Bryan Clark-NZL, dxld Feb 20)

5055.000 Radio Vanuatu, at 0740 UT, Pidgin, fading-in with talk by a woman and island music. Parallel 3945 kHz. So, I wonder if 7260 kHz is also on the air? Feb 19.

And this I have on 5054.973 kHz? 1.5 kW only. (David Sharp-NSW-AUS, dxld Feb 20)

5055 R. Vanuatu recorded from 0700 to 1100 UT on Febr 21. Barely discernable audio at half-hour checks. Seemed best after 0930 to 1100 UT stop. QRM from 5050 kHz started at 0957.5 UT. If I could have seen the QRM pattern, the Perseus could have been set to eliminate the adjt channel QRM. Will try that with a later recording from 1100 to 1400 UT tonight. Vanuatu OFF air on Feb 23, but on air again Feb 24th. (Bruce W. Churchill-CA-USA, DXplorer Feb 22)

#####

125ms - round-the-world-echoes -, comment by Nils to Glenn Hauser.

Nils' paper doesn't deal with "real" RTW signals, but with "near" RTW signals. This means: transmitter & receiver are not at exactly the same place, but about 600 km apart. This also is the scenario, for which the cited paper is valid.

The results are a follows:

- with transmitter and receiver some 700 km apart, the short path goes its textbook way, whereas the long path goes a crooked way. This way is some 2500 km shorter than that of the textbook long path. This is, what Nils found.

- with transmitter and receiver being apart a couple of 1000 km, the textbook version of long and short path seem to work properly Nils' paper gives examples for both cases.

The not-so-new result is, that under specific conditions a "near" RTW can and will show a shorter delay as e.g. VoACAP suggests. This has been proven in praxi, as well as the Russian paper from 1975. This paper costs about 32 US-\$ to get it from the publisher's electronic resource \*...

\* "Propagation of Round-the-World and Back-Echo signals outside the plane of a great circle". By V.A. Bubnov and G.A. Rumyantsev, UDC 550.388.2:621.373.3

Transmated from Izvestiya Vysshikh Uchebnykh Zavedenii, Radiofizika, Vol. 18, No. 9, p. 1383-1386, September 1975.

Vor gut einem Jahr hatte ich bei Echo-Zeitmessungen festgestellt, dass die Echos deutlich kuerzer als erwartet waren. Dafuer fand ich - auch in der Diskussion mit Experten - keine vernuenftige Erklaerung. Als ich in diesem Jahr wieder die "verkuerzten" Echos hoerte, bin ich der Sache systematischer nachgegangen und fand ein wissenschaftliches Papier aus der UdSSR von 1975, das ueber den Mechanismus von Grosskreisabweichungen unterrichtete. Diese treten besonders bei Uebergaengen der Hell- und Dunkelzone bei Irregularitaeten der Ionosphaere auf. Dadurch kann sich ein "Rund-um-die-Erde"-Signal in der Laufzeit eben auch verkuerzen. Als "Erste Hilfe" habe ich dazu ein wirklich kleines PDF mit vier Hoerbeispielen verfasst, das zugleich Anregung fuer die multimediale Darstellung solcher Themen sein sollte. Alas, in English, ist eine umfangreichere Version in Deutsch in Vorbereitung.

(Nils Schiffhauer-D dk8ok, dxld Feb 21)

Wolfy, So what is the cause of this? You don't mention long-path/short path.

Let us take 10 megameters as the rough distance between Europe and East Asia, i.e. one quarter around the world. Therefore a long-path signal will travel 30 megameters, three times as far, and 30 minus 10 20 megameters difference. The speed of radio is 300 megameters per second, so 20/300 0.067 second, roughly half the delay reported.

In the same way, an LP signal of negligible short-path distance would travel 40 Mm further, which would take .133 second. This is close, and the SP/LP echoes I sometimes hear from WEWN or WWCR which are only 1 Mm away from me, and thus travel 38 Mm further, would be 0.127 second delayed.

Single-hop satellite feed delays are quite a different matter, and of course would not affect a single frequency.

(Glenn Hauser-OK-USA, Feb 22)

0945 to 1015 UT report, echoes from East Asia. Kunming South China / Udonrtani Thailand and Singapore too.

AUSTRALIA The Darwin site ended transmissions on 31st January, and is being dismantled ahead of CVC's lease expiry in June. CVC is not ending all shortwave broadcasting - Santiago and Lusaka still serve viable targets in Latin America and Africa, and The Voice Asia, which we broadcast from Tashkent, generates tens of thousands of responses every month. When you combine changing patterns of media consumption with a tough financial climate, it's necessary to examine where funds will make the most impact.

This is clearly a time of transition and nobody quite knows how it will pan out as target demographics, media access, habits and trends are non-homogenous. Radio is still an important part of the mix, especially for those who cannot access new media, and it does things that other media can't do; but a generation of a billion (and increasing) 'connected' mostly-young people has emerged for whom radio has little or no relevance. This presents a huge opportunity which we cannot ignore.

CVC is the owner of all the technical equipment on site, this is variously being sold, redeployed or scrapped.

(Andrew Flynn-UK, Christian Vision via dxld via WDXC Contact)

Discussions are currently taking place between Radio Australia, VT and the Singapore government about the possible use of the Kranji relay facility to further bolster Radio Australia's transmissions to Asia. As reported last month transmissions have moved to Palau and Dhabbaya.

(Mike Bird, RNW Media Network via WDXC Contact)

A blog entry Goodbye SW - Hello Mobile Streaming at the cvcradio.in website found by Glenn Hauser in dxld says:

Well it is February which marks the end of an era for CVC radio SW broadcasts. But it also marks the beginning of a fantastic new direction for CVC as we leap feet first into the digital era! You can now listen to CVC Radio 24/7 via our streamlined mobile website <m.cvcradio.in>

Underneath there are 8 audio clips of the January 31 shortwave broadcast including shout-outs to various South East Asian listeners and clubs.

(Mike Barraclough-UK, WDXC Contact March 3)

The transmitter power information for Darwin in WRTH and Aoki list is not correct.

Two of the three 250 kW Collins transmitters from 1968 (the only other site still using such equipment is Sackville) were disconnected and replaced by two Continental 100 kW transmitters, brought in from somewhere else. These transmitters were stand-by units and never in regular use. The third old Collins was still operational but had to be tuned manually

requiring 15 minutes for a frequency change. This transmitter covered the peak requirements when four frequencies were on air simultaneously.

The site had the Thomson transmitter originally installed in 1984 at Carnarvon, the provisional site that remained in use for two decades. After its final closure in 1996 the transmitter was moved to Darwin. Two further Thomson units were purchased and installed at the Darwin site in 1994. These three 300 kW Thomson transmitters were the core of its recently closed operations. What arrangements have been made in regard to the equipment? The antenna system must have cost millions, and the transmitters certainly also still represented a considerable value in 2000, when two of them were just six years old.

Lyndhurst transmitter & Control Building circa 1986:  
<<http://www.youtube.com/watch?v=61C6IyWEqZE&feature=related>>  
(Ian Baxter-AUS, SW TXsites Feb 27)

AUSTRIA 585/1476 The complete antenna array of the Wien-Bisamberg mediumwave site was due to be demolished at the end of last month. So far it is not known what will happen with the grounds. The transmitter building is under a preservation order.

Transmissions from this site, on 1476 kHz, ceased on 31 Dec 2008 at 2310 UT. The 120 metre "Suedmast" for 1476 kHz was supposed to be kept, and Osterreichische Rundfunksender told ADXB-OE that the frequency would still be available for interested broadcasters. This development makes the Moosbrunn site the only operational AM transmission facility in Austria.

AZERBAIJAN 9677 Voice of Justice from Nagorno-Karabakh (similar case as Pridnestrovia, Abkhazia etc.). Starting in Azeri with IS and ID, later some sentences in Armenian and Russian. Bad modulation. Heard 0600-0626 UT on Febr 24. It has to be aired on Wed and Sat?  
(Rumen Pankov-BUL, ARDXC ADXNews March 1)

9677.7 Radio Voice of Justice (if it is the right name) heard regularly 0600-0627 UT on approx 9677.7 kHz on Wednesday and Saturday in Azeri and sentences in Russian and ?Armenian sometimes. On 27 Febr talk about Hodzala in Nagorno-Karabakh. Checked in Wiki after long long searching and also in one old site of Voice of Turkey I found the black story: burned live 613 people, feat. 106 women, 83 children etc. from ... Armenian troops on 25 Febr 1992 in the village of Khojaly. Wheter we add that name to the Haibah (same case in Caucasus during the Stalin era - see RFI sites in Ru), Kathyn, Sebrenitsa, Lidice etc?  
(Rumen Pankov-BUL, wwdxc BC-DX TopNews March 4)

BELARUS Belarusian domestic SW transmission. In recent times the signals from these small txs has been quite good in the time frame of their regional program at 0440 UT being the worst the Mogilev outlet on 7235 kHz followed by Brest 6010 kHz. The best signals comes from Brest 6070 and Grodno 7280. Grodno 6040 suffers strong QRM from V.O.Turkey until 0458 UT. The Mogilev tx. in 6190 is imposible due the QRM. This morning the reception of Mogilev 7235 has been better than usual with some moments of intelligible speech being one of this just a the end of the regional output but to my surprise I have heard a "Radio Stolitsa" id. So no regional program from Mogilev on SW??  
(Mauricio Molano-ESP, dxld March 2)

Belarus R noted as usual in 5-6 UT range on 6010, 6040, 6070 strongest, 7235, 7255 and 7280 kHz. Nothing heard on 7265 kHz channel, absence reported also by Guenter Lorenz in A-DX. Also absence of Ukrainian R on 5970 kHz today.  
(wb, wwdxc BC-DX TopNews March 3)

BHUTAN Thimpu has been behaving rather erratically, so much so that it is difficult to know what to expect when you turn the dial to 6035 kHz. This time of the year, Northern Winter is the best time to hear them in Europe, North America and even here in South Asia. The problem has been their HF transmitter.

It appears their 100 kW is down and they are running their old 50 kW unit, but I dare say its anything more than a few kilo watts at the most.(WRTVH 2010 says running at 10 kW). Even this morning 30/1/10, at 0125 UT I could hear a very weak Bhutan on 6035 kHz, I would say readability just about 2 and strength also the same. The station is also heard around 1330 UT and appears to s.off at 1400 UT. Very hard to read, but when you know the language sounds you know its them and the carrier goes off at 1400 UT.

However, the best ever reception I got from them was at 0820 UT or so on the day of the Eclipse and that's at 1.40 p.m. here in the tropics. The station doesn't appear to come on at 0000 UT, or 0030 UT as in the past. We will keep watching and I urge DXers to get on it and observe as much as possible. By the way Bhutan is UTC+6 hours so according to their daily sked they should start at 0000 UT, but during winter conditions at 0000 UT the ionosphere in these low Sun-pot years won't hold propagation at almost a vertical return angle needed for local area coverage on 6 MHz.  
(Victor Goonetilleke-CLN 4S7VK, ARDXC ADXNews March 1)

And here is what Partha Sarathi Goswami has to say from Rajasthan.

<<http://www.bbs.com.bt/radiosch.htm>>

and  
<<http://www.bbs.com.bt/Frequency.html>>  
reports the schedule nearly similiar as I used to hear last year, they were same for few years the schedule as I listened last year.

The new schedule from 11 Nov 2009 as follows  
English 0500-0600 UTC FM + 6035  
English 0800-0900 UTC FM + 6035  
(confirmed on Solar Eclipse day 15/01/10 by GVG)  
English 1500-1600 UTC FM + 6035 previously 14UT-15UT

CANADA/ECUADOR/U.K. 6190 CRI in En via Sackville site at 0528 UT March 3, S=9+20dB. 6175 Vo Vietnam in Vietnamese via Sackville at 0522 UT March 3, S=9+20dB.

(wb, wwdxc BC-DX TopNews March 3)

Re Glenn Hauser logs Mar 1,

It's HCJB's Arabic half-sesquiour at 2100 UT transmitted from Sackville, which HCJB Global HQ in Colorado assured me is really their own ministry, except they don't call it HCJB; nor did I hear anything about the obsolete Andes.

(Glenn Hauser-OK-USA, dxld Mar 1)

Are you sure that this comes from Sackville? I always thought that this transmission is transmitted by VT from Europe?!

(Stephan Schaa-D, dxld Mar 1)

The casual Arabic listener might even think the program has some production connexion with RCI which has other Arabic broadcasts of its own. They ought to include a disclaimer.

(Glenn Hauser-OK-USA, dxld Mar 1)

Hi Stephan, in winter schedule

CHAD 6165 Radio N'Djamena in Chad. Radio Chad still active on 6165, noted at 0545 UT Febr 27 with talks in French and African music, fair on clear channel with some fading until wiped out by Croatia signing on at 0600 UT.

(Mike Barraclough-UK, WDXC March Contact magazine)

6165, Radio National Tchadienne (N'djamena) (presumed), 0447-0505, Febr 25, French. One long selection of West African pop music. Occasional brief low audio comments by a man over the music. Brief announcements by a man at 0501 UT followed by talk. Talk by a woman at 0502 UT, apparently in a large room producing a hollow echo, and with what sounded like chairs being moved at one point. Moderate signal strength under very strong Radio Nederland (Bonaire). In the clear after 0456:30 UT.

(Jim Evans-TN-USA, dxld March 4)

Radio Chad still active on 6165 kHz, noted at 0545 Febr 27 with talks in French and African music, fair on clear channel with some fading until wiped out by Croatia signing on at 0600 UT.

(Mike Barraclough-UK, March WDXC Contact magazine via dxld)

6165 small gap at 0530-0558 UT and chance to listen RNT N'djamena, this morning March 3, at 0529 UT on S=9+10dB level to decrease at 0558 UT on S=8 level. 0529-0531 UT endless drum beats. At 0532 UT ID in French by female. Ended exactly at 0558:33 UT when signal covered by Deanovec, Croatia powerhouse on co-channel, which came from 3984.90 75mb as scheduled. Followed by chimes interval signal of RNW Bonaire relay co-channel - underneath Croatia -, which started around 0558:45 UT.

(wb, wwdxc BC-DX TopNews March 3)

CHILE/USA Terremoto en Chile.

On Febr 27th listened to US ham radio station on 14275usb, endless loop annmt from 1700 to 2200 UT fade-out. Also on Febr 28th from approx. 1100 UT again.

"This is K1MAN, the International Amateur Radio Network is activated for the disaster and Tsunami caused by the earth quake in Chile ... Emergency and costal workers can contact and send an e-mail to <traffic @ K1MAN.com> or by radio contact K1MAN asking a control operator on 14322 kHz to call 2074952215 - Radio operators and other emergency volunteers are needed ..."

(Roland Schulze-D, wwdxc BC-DX TopNews March 1)

CVC Calera de Tango site survived the quake, still on air with usual good signal here. 17680 kHz at 1812 UT check with reports in Spanish about the quake, e.g. the airport is closed; no doubt from the Miami studios, as it would be unthinkable to originate anything from Chile itself.

Telemundo and Univision are also covering it on US television.  
(Glenn Hauser-OK-USA, dxld March 4)

So at least this antenna is still intact. 31 mB frequencies and HCJB relays still on air, too? See  
<[http://www.boston.com/bigpicture/2010/02/earthquake\\_in\\_chile.html](http://www.boston.com/bigpicture/2010/02/earthquake_in_chile.html)>

Picture 5 is a location close to the transmitter site; photos of it show the mountains in the background under the same angle. Perhaps I overestimate the effects on masts (since the light poles besides the collapsed bridges in Santiago still stand as if nothing has happened), but in light of these pictures it would appear to be a miracle if the antenna facility remained basically undamaged.  
(Kai Ludwig, dxld)

Earthquake / CVC-Chile.

Dear CVC family, I'm writing from the CV shortwave site at Calera de Tango, Santiago, Chile, after the big earthquake we had over the whole center-southern part of the country. The situation is a bit complicated in the cities affected by the earthquake, because the public transport and communications are not working properly. Also there is a lack of electricity and water in many places.

For me, it has been very difficult to get in contact with the rest of the team, but with the hours, it has been possible to get in contact with the enough people to get on the transmitters. Some of the personnel haven't been able to come to work because they are affected and are afraid of the other following earthquakes after the main one, which we feel very often.

Also, at the site, there is a lot of glass in the structure and offices, but just one big glass has broken and some small damages in the building, but anyway personnel are afraid of coming and leave their families alone. At least, until now I haven't heard about personal damages to some member of the team or their families, thanks God. Finally, some of the technicians who live near to the site will be able to follow the transmissions until 10PM as normal transmissions.

Thanks to Sergio, Antonio Suazo and Ariel who were able to stay. Also, we hope tomorrow morning we will be able to start the transmissions at 8AM as

normal, but also it will depend on the transportation availability. We hope the city will slowly come to normal with the days, but we will try to stay ON as much as possible with CVC transmissions and HCJB transmissions as well.

I would like to ask you for your prayers for our Team, their families, our site, the transmissions and the country. God Bless you all!

CHINA 3950 Xinjiang PBS, Urumqi, 1718-1800\*, 28 Feb'10, Mandarin, light songs, talks; // 5060, 5960, 7310 kHz; 22431, QRM de CHN (?!).  
(Carlos Goncalves-POR, wwdxc BC-DX TopNews March 3)

Currently there is a radio war going on, which is affecting radio hams and other legit stations, between a private group connected to the Falung Gong movement in Taiwan and the PRC. The Taiwanese apparently use converted ham equipment to transmit their message to mainland China (often using ham bands or frequency bands allocated to other users). As soon as they go on air a transmitter having been traced to the Chinese island of Hainan starts transmitting Chinese classical music at high volume on the same frequency. This Chinese jammer is called the "Fire Drake Jammer". The problem is that, with the transmissions being on HF, they disturb radio traffic on these frequencies all over the world.  
(Max Van Arnhem-HOL, Benelux DXC via dxld Feb 25)

Two NEW jamming sites to come online in China soon!  
China will be activating two new transmitter sites by June which will be used for jamming my sources in CRI inform me. The locations are:  
Qinghai (located some 100 km outside Xining City)  
Guizhou (located some 70 km outside Guiyang City).

Each site will house 4 transmitters and the antennas are Chinese copies of Thales Group ALLISS antennas. Power output is suggested to be around 300 and 500 kW (unconfirmed).

Both sites will used Firedrake and echo jamming using CNR 1 as well as some local stations.

My sources also told me that in the last few weeks on some occasions CRI's China Drive program was fed to the Hainan jamming site.  
(Keith Perron-TWN, dxld March 1)

Firedrake March 1: at 1336 UT on 13625 kHz, vs nothing else detectable, but RFA in Tibetan via TINIAN is scheduled, 12-14 UT.

Keith Perron reminds us that the Commie Party Congress is imminent, and each spring jamming levels greatly increase. We are certainly seeing that with CNR1 even more pervasive, but seldom bother to log those and try to figure out whether jamming or legit.

Firedrake on new frequencies, however, really stands out. March 2 at 1315

it was on 9365 and // weaker 9380 kHz; at 1348 weak on 11540 // 9365 kHz; at 1349 on 11500 kHz much stronger than 11540 kHz. But at 1425 recheck all four of these were gone. At 1441 found one FD, poor on 7560 kHz.

Consulting Aoki for possible targets:

7560: nothing, so likely another Sound of Hope jumparound.  
9365: nothing, unless WRN has started something via Tajikistan, etc.  
9380: SOH, but DW in Dari via Tajikistan is also there until 1400.  
11500: SOH, another 24h? 1 kW Taiwan spoiler.  
11540: R Free Asia in Tibetan via Tajikistan, 11-14 UT.  
(Glenn Hauser-OK-USA, dxld Mar 2)

Firedrake Feb 19: 8400 at fair level with drumming segment at 1332 UT.

Firedrake, traditional music-only jamming, UT Feb 20 at 2337 UT found a number of 'morning' frequencies, presumably inspired by Sound of Hope, the insignificant station which Must Be Jammed, as Ron Howard has also been hearing in California, much more than in the Asian evenings.

First noted on 17970 where it really stix out in an aero band, but here rearranged into reverse frequency order rather than the exact chronological order tuned:

18180 at 2337, fair, a bit better than 17970  
17970 at 2337, fair. No recognizable CRI/CNR signals on 16mb unlike 19mb  
16700 at 2339, poor with heavy flutter  
15970 at 2339, poor with worse flutter than 16700  
14970 at 2339, fair with flutter. They like '970s, but no 13970 any more  
9000 at 2345, very poor vs hets  
8400 at 2345, just barely audible

I see that the 20 Feb edition of Aoki has all these plus several more on the higher bands, except 15970 kHz.  
(Glenn Hauser-OK-USA, dxld Feb 25)

9380 19 Feb at 0148 UT, Firedrake on SOH. At least on this day of listening, I do not think a good choice of the VOA broadcast on this frequency. In the background you hear comments from YL and OM that I seem to be the VOA Radio Deewa, completely compromised.  
(Jorge Freitas-BRA, dxld Feb 25)

CHINA/BHI/RUSSIA/SERBIA Mistake  
Bijeljina BIJ-BIH/ownerSRB for Baoji-Xinjiezhen Hsin-Chieh-Chen BJI-CHN shortwave site.

9660 Voice of Russia in English at 1500-1557 UT is still via China

mainland relay site Baoji-Xinjiezhen Hsin-Chieh-Chen BJI-CHN.

From AustralianDXC - ADXN March 2010, p.14-15.

There is a wrong item detail in ADXN on the VoRUS 9660 kHz outlet. Glenys and the WRTH 2010 editor p.576 had a mistake under 9660 kHz.

Glenys had an additional mistake by using BEO = Stubline Serbia site instead of BIJ Bijeljina-BIH site.

Stubline which was destroyed during NATO airforce ride on 25 May 1999 at 1108 UTC. At Stubline remained only a poor amateur radio like reserve unit[former 9505] of small 10 kW and a poor dipole rope, which unit always was odd frequency on 6099.971, 7200.03, and 7239.938 to 7239.943 kHz and wobbling carrier in April 2007.

YUG / SRB Radio Serbia oldSW site Stubline destroyed on 25 May 1999

CONGO Richard und Kathy McDonald, die Gruender von Radio Kahuzi in der kongolesischen Krisenregion Kivu, werden am 1. Maerz 2010 von den US-amerikanischen National Religious Broadcasters mit dem NRB International Impact Award ausgezeichnet.

"Das Ehepaar betreibt seit 1991 einen christlichen Radiosender in Bukavu.

Sie haben kaum glaubliche Herausforderungen zu bestehen gehabt, sind aber ihrer Berufung treu geblieben", wuerdigt Bill Blount, der Vorsitzende des NRB International Committee die Leistung von Richard und Kathy McDonald.

"Sie begannen mit einer UKW-Station. Spaeter kam ein Kurzwellensender dazu, mit dem sie einen grossen Teil Zentralafrikas abdecken. Die McDonalds haben 200 lokale Hoererklubs mit 8.000 Mitgliedern gegrundet und sorgen so fuer soziale Kohaesion und Besserung der Lebensqualitaet durch den Umgang mit Gottes Wort."

Allerdings strahlt der Sender nicht nur religioese Sendungen aus. Die englischen und franzoesischen Sendungen sind meist Liveuebernahmen des VoA-Satellitenfeeds, die internationalen Swahilisendungen werden aufgezeichnet und um einen Tag versetzt abgestrahlt.

Die von DXern mit gehobener Empfangsausruestung auch in Europa gehoerten Kurzwellensendungen sind eine Zugabe zu den UKW-Sendungen der Station, die nach dem Hausberg von Bukavu benannt sind. Erkennungszeichen von Radio Kahuzi ist die Frequenz: 6209.9, nie 6210 kHz, wo wie Christoph Ratzer erlaeutert, schwache Mischprodukte leicht mit der Station verwechselt werden koennen. Im Sommer 2009 hat Radio Kahuzi seinen Sendepan auf Kurzwelle erheblich ausgebaut.

Wie Richard McDonald auf Anfrage von Martin Elbe bestaetigte, sendete die Station nun statt montags und freitags nun taeglich 0530-0700 Uhr UT Weltzeit in Franzoesisch und 1630-2000 UT Uhr in KiSwahili, Englisch und Franzoesisch. Zum Sendeschluss gibt es zwei Hymnen, so dass der 1-kW-Sender gegen 2007 UT Uhr abgeschaltet wird. Die Kurzwellenexperten hoeren die Abendstunden vor dem Sendeschluss.

Richard und Kathy McDonald bzw. Barbara Smith in den USA sind ausgesprochen DXer-freundlich, obwohl sie anderen Aufgaben nachgehen.

Weiterhin gilt

ERITREA QSL Heute ist eine QSL-Karte von "Voice of Broad Masses of Eritrea" transmitting from Asmara-Eritrea - in meinem Briefkasten gelegen.

Datum des Reports: 03.12.2006!

(Renato Bagattini-SUI, A-DX March 4)

EQUAT GUINEA 15190.00 At 0550 UT noted undoubtedly R Africa with English

language pastor preaching to the crowd, tiny S=2-3 strength in Germany.

Scheduled much later from 0630 UT.

(wb, wwdxc BC-DX TopNews March 5)

15190 R. Africa, Feb 25 at 2101 tune-in to hear a loop of one somewhat musical syllable with the pitch changing as long as it lasts, repeated 270 times per minute. This kept going until 2110 UT when someone woke up, briefly cut to a different sound, then to R. Africa canned ID, <radioafrica @ myway.com> spelled out but as announcer was about to give postal address, "you may also write us ..." that was cut off to a hymn introducing next gospel huxter, "Unchanging Truth", from the Ojai Valley Baptist Church, California, <<http://www.ovbaptist.com>> also spelt. ? but it's really .org

Next to WYFR 15195 via Ascension, about equal strength but separable. Maybe not so easily where both of them aim, at Africa. The strange 10-minute loop hints that R. Africa may have moved from the reel tape into the digital age for which it is not ready.

15190 R. Africa, at 1513 UT March 3, S=9+10 signal, but just barely modulated preacher in English. And he is paying good money for this? So many gullible gospel huxters pay their money and never monitor, a good business for the unethical broadcaster. But the preacher gets the satisfaction of imagining he is converting Africans. (Glenn Hauser-OK-USA, dxld March 3)

ESTONIA 1035 kHz 200 kW MW. Verdoppelte Sendeleistung: Radioprogramme in Russisch fuer 159 Mio. Menschen.

ERF Medien unterstuetzt Sendungen von TWR aus Estland.

Der Mittelwellensender Tartu Pereraadio in Estland auf 1035 kHz Mittelwelle wird in diesem Jahr seine Leistung von 100 auf 200 Kilowatt verdoppeln. Damit ist der christliche Sender in der Lage die potentielle Hoererschaft von 107 auf 159 Millionen zu erhoehen. Das gab TWR-Praesident Lauren Libby (Cary/USA) bekannt. Die Kosten dafuer bezifferte Libby auf fast 300.000 Euro, die durch Spenden aufgebracht werden sollen. TWR ist der internationale Partner von ERF Medien.

TWR und ERF Medien (Wetzlar) senden taeglich vier Stunden Programm in russischer Sprache ueber den Sender in Tartu. Der ERF beteiligt sich nach Angaben des Leiters Internationale Projekte, Dr. Thorsten Grahn, sowohl personell als auch finanziell am Produzieren und Ausstrahlen der Sendungen.

Fuer TWR und ERF Medien ersetzen die Ausstrahlungen aus Estland seit Mitte 2008 den Verlust der Sendemoeglichkeiten fuer das Zielgebiet Russland, die Ende 2007 ueber die russischen Sender Radio Mayak und Junost weggefallen waren. Die bis dahin taeglichen christlichen Sendungen ueber die staatlichen Sender waren von den Betreibern nach 16 Jahren aus dem Programm genommen worden.

Die beiden Radiomissionen betreiben ein Studio in St. Petersburg und Krasnojarsk (Sibirien). Sendungen in russischer Sprache werden auch ueber einen Sender in Moldawien verbreitet, der die Ukraine, Weissrussland und Teile Russlands erreicht. Ferner produzieren die Mitarbeiter in Krasnojarsk Beitrage, die bei lokalen UKW-Sendern in Sibirien ausgestrahlt werden. Ausserdem sendet TWR ein Programm in Russisch rund um die Uhr ueber das Internet.

Fuer weitere Informationen steht Ihnen der Pressesprecher, Michael vom Ende, zur Verfuegung,

FRANCE/TAIWAN 3965 / 7930hx TDF technician replaced failed feeder signal from Taipei, Taiwan by RFI German language compensatory program about horses in Camargue ... and Jura mountains. March 2nd, 2100-2200 UT.

Original Nachricht - RFI in Deutsch auf analoger KW.  
Seit 2100 UT RFI in Deutsch auf 3965 kHz ... u.a. auf dem Ruecken von Pferden durch das Juragebirge. ... (kommt mir irgendwie bekannt vor.;-)  
(Paul Gager-AUT, A-DX March 2)

Auch auf hx 7930 kHz.  
(Peter Kleber-D, A-DX March 2)

RTI Taipei relays via TDF Issoudun suffered by offline feed on March 1-2. And was filled by RFI German features on horses in Jura area.

Heute Abend am 3. Maerz habe ich alle Relaysendungen aus Issoudun und Skelton im 75mb mit originaeren Inhalt aus Fernost gehoert. Eine RFI Paris Fuellsendung wurde nicht gehoert.

Dies betrifft  
RTI Taiwan 3965 ISS S=9+30dB,  
KBS Seoul 3955 SKN S=9+20dB, und  
VoVietnam Hanoi 3985 SKN S=9+30dB.

Im Bereich 7900 bis 8000 kHz wurden [heute] keine Harmonische beobachtet.

Weiters wurden notiert:

3985KAM S=8-9 IRIB in Russisch 1700-1800 UT,  
3950URU S=5-6 CNR in Chinesisch um 1730 UT, und  
3965ISS S=9+20dB RTI in Englisch um 1825 UT.  
3984.89DEA S=9+10dB HRT Kroatisches Radio um 2140 UT.

Gestern hatte ich gefragt:

Welche Frequenzen, welche Programme hast Du gehoert?

Alle 4 Frequenzen ?

Also je 2 x aus Issoudun 3965 - fundamental plus Harmonische 7930,

bzw. 2x aus Skelton 3955 - - fundamental plus Harmonische 7910?

Pferde-Feature im Jura und Camargue zeigen ja auf

TDF RFI Issoudun 3965 / 7930hx kHz.

Kamen ueberhaupt die KBS Programme um 2000-2230 Uhr auf 3955 aus Seoul  
durch? Oder gab es dort auch Leitungsprobleme und Ersatz Cellomusik aus  
dem BBC Kontrollraum bei der VT-group in London?

(Alokesh Gupta-IND VU3BSE, dxld March 6)

GEORGIA Damage on 9495 kHz tx and only morning broadcasts via phone  
lines on 9535 kHz 0430 (irregularly) and Mon-Sat 0500-0600 and Mon-Fri  
0800-0908 UT are heard of Abkhaz radio for the the 1st week, but on MW  
1350 kHz the bcs are without any change (Feb-March 3rd).  
(Rumen Pankov-BUL, wwdxc BC-DX TopNews March 4)

Sokhum MW 1350 and 9495 kHz site at

42 59 18.03 N 41 03 57.73 E

9535 kHz site probably at Sotchi or Armavir site.

Both 5 kW shortwave units are former jamming transmitters of USSR era.

(wb)

GERMANY Juelich site reactivated as of Nov 20, 2009. The reports about  
the CVC showcase for the broadcasting fair that takes place in Delhi next  
week made me wonder: Juelich?

Guess what, the site was silent for less than four weeks and is again in  
use already since Nov 20, Mon-Fri between 1626 and 1659 UT only, for TWR  
in Armenian on 5980 kHz, Thu and Fri also for Radio Xoriyo on 9820 kHz.

<[http://www.media-broadcast.com/fileadmin/user\\_upload/Downloads/B09\\_operational\\_060110.pdf](http://www.media-broadcast.com/fileadmin/user_upload/Downloads/B09_operational_060110.pdf)>

It seems that the current state of the site is somewhat similar to what  
IBB circles call "caretaker status", with transmitter engineers shortly  
showing up on workdays and the transmitters being used for real  
transmissions instead of testing them on dummy loads.

Would be another question for Glenn to ask Andrew Flynn, since in fact no  
real information about this matter is available so far, other than what  
appeared in the NASWA newsletter and the circumstance that first all  
transmissions from Juelich ceased as of Oct 25, like Brother Scare on 6110  
which, sure enough, stays at Moosbrunn to which he has been transferred.  
(Kai Ludwig-D, dxld Feb 21)

(Dr. Hansjoerg Biener-D, wwdxc BC-DX TopNews March 5)

6140 MV Baltic Radio this Sunday.

MV Baltic Radio is on air this Sunday the 7th of March 2010.

At 1000 to 1100 UTC on our usual channel of 6140 kHz.

[Media & Broadcast Wertachtal 100kW non-directional]

M.V.Baltic. Information:

MV Baltic Radio relay service Schedule for winter 2010

1st Sunday - MV Baltic Radio

3rd Sunday - European Music Radio (April)

4th Sunday - Radio Gloria International

We wish you good listening and good reception! 73s Tom

(A-DX, March 5)

INDIA 4760 AIR R. Kashmir (pres), Leh, Jammu & Kashmir, 1645-1700 (off

at recheck), 28 Feb'10, Vernacular, talks; 25331. AIR's R. Kashmir is

typically stronger here, so maybe this was AIR Port Blair, Andaman &

Nicobar Is. instead?

(Carlos Goncalves-POR, wwdxc BC-DX TopNews March 3)

Leh is non-dir and 130 degr. Port Blair is 147 degrees.

4760.029 ... 4760.060 Leh starts at 0210 UT.

4760.000 ... 4759.987 Port Blair, measured with Perseus rx.

And 15.55:50 UT TWR Manzini Swaziland s/on, on 4760.001 kHz, s/off

16.59:15 UT (wb)

4840 AIR, Mumbai, 1648-1710, 28 Feb'10, Vernacular, Indian tunes; 35332;

// 4810, 4910, 4920 kHz.

4910 AIR, Jaipur, 1655-1713, 28 Feb'10, Vernacular, Indian tunes; 14431,

sporadic uty. QRM.

4920 AIR, Chennai, 1647-1706, 28 Feb'10, Vernacular, Indian tunes; 35332

but improving a lot; // 4810, 4840, 4910 kHz.

5010 AIR, Thiruvananthapuram, 1650-1716, 28 Feb'10, Vernacular, folk

tons; 44433, increasing co-ch. QRM de MDG.

(Carlos Goncalves-POR, wwdxc BC-DX TopNews March 3)

IRAQ/IRAN On 3932 kHz whistle at 1324, 1326 song and at 1331 UT ID in

Kurdish "Eira dendzhi Kurdistana Iran", followed by the hymn of Kurdistan

annmts and nx on Feb 24 but on next day was on 3936 kHz at 1413 UT.

Different schedule has another station with same name in range 4680-4805

kHz.

(Rumen Pankov-BUL, wwdxc BC-DX TopNews March 4)

ISRAEL Frequency 21245 kHz J3E-USB - synth. female voice.

Dear fellow intruder busters,

Yesterday stations in Germany have heard and reported for the first time the Israel on 21245 kHz in SSB-USB. Also today the station was active at half and full hours in the morning and afternoon. German telecoms. have pin-pointed the station as coming from Israel. It certainly is a station from M\_ossad. There is a female synthetic voice spelling the ident as "Echo Zulu India Two" many times followed by 5-Letter messages. German telecoms will send an International Complaint. I invite you to also inform your national telecoms. authorities and ask them to send a complaint to ISR.

Here are the reports from contributing hams:

Friday March 5, 2010 \* times (in UTC) 0715-0725, 0845-0910, 0930-1015, 1445, 1505-1514

Saturday March 6, 2010 \*\* times (in UTC) 0815, 1145, 1301-1304, 1333 ident EZI2, 1406-1421, 1431-1443 ident EZI-(I will continue listening)

Thank you very much bcnu de:- Uli, DJ9KR

(IARU Intruder alert, Febr 6)

Increasing sunspots these days ... Also many ham radio operators from North America appeared today on the rx/rx sets here in Germany on March 6th. (wb)

ITALY Google Earth imagery. Some high resolution place. Another GE/Google Maps Street View image update.

[KURDISTAN/UKRAINE] Roj TV, and Denge Mezopotamya Radio via Ukraine Mykolaiv Luch Posad-pokrovskote SW site 7540/11530 kHz were silent on March 4th and partly March 5th, also via Eurobird 9A satellite tp56 = Sky 11843V GHz. Surprisingly tiny Denge Mezopotamya Radio 11530 kHz signal this morning March 6th, wb.]

I confirm that. Nothing was heard on 11530 and 7540 kHz yesterday [March 4] too. I tried 11530 kHz several times today. It's empty. I did hear a beautiful rendition of the Dancing Dragon on 11540 kHz sometime after 0900 UT. The Voice of Mesopotamia used to provide a strong signal in ME and most of Europe. Occasionally, the station carried some nice folk songs.  
(Sergei Sosedkin, dxld March 5)

Belgian police have raided sites in Brussels, Antwerp and other cities as part of an international investigation into connections with a Kurdish separatist group, the PKK. Turkey applauds arrests.

11530 kHz channel of Denge Mezopotamya from UKR Mykolaiv Luch Posad-pokrovskote shortwave site is silent this morning March 5th.

MEZ TDP - Ludo Maes of Belgium should know the reason.

LITHUANIA 612 To inform you and readers RusDX that 1 February we resumed retransmission "Voices of Russia" programme in the Russian language in Vilnius through MW 50 kW, transmitter on a frequency 612 kHz daily at 1300-1600 UTC. In 2009 retransmission was daily at 0600-1600 UTC power of 100 kW. Reduction in the volume and power broadcasting occurred for reasons beyond the control of Radio Baltic wave".

(Rimantas Plejkis-LTU, RUSdx Feb 21)

MALI 6165 Small gap at 0530-0558 UT and chance to listen RTM Bamako site, this morning March 3, at 0529 UT on S=9+10dB level to decrease at 0558 UT on S=8 level. 0529-0531 UT endless drum beats. At 0532 UT ID in French by female anncr, "Ici ... Bamako ...".

Ended exact at 05.58:33 UT when signal covered by Deanovec Croatia powerhouse on co-channel, which came from 3984.90 75mb as scheduled. Followed by chimes interval signal of RNW Bonaire relay co-channel - underneath Croatia - , which started around 05.58:45 UT.

RUSSIA/ETHIOPIA 15195 TDP brokered "EOTC Holy Synod Radio" via Samara, Mons only 16-17 UT noted TX switch-on at 15.59:47 UT, S=9+0db straight signal and some deep fades. Program started approx. at 16.00:08 UT, sacred chants, but suddenly powerful Ethiopian broadband hissing noise jammer started at 17.02:40 UT. From now on, EOTC program was scarcely audible underneath noise.

Ethiopian jammer covered at least 15189.6 to 15201.3 kHz broadband. EOTC broadcast probably originate via Samara, Russia transmitter site.

[later 16.50 til 17.01 UT, Monday March 1st]  
Ethiopian jammer covered the EOTC signal in total, at least here in central Europe. Three times noted Horn of Africa flute music underneath jamming noise, i.e. at 16.52:30, 16.54 and 16.55 ... 16.57 UT. EOTC transmission seemingly ended at 16.58:30 UT. Ethiopian jammer ended appearance today at 17.00:30 UT.  
(wb, wwdxc BC-DX TopNews March 1)

15165 Newly discovered clandestine La Voix de Djibouti, confirmed Febr 25 at \*1530-1629:30\* UT. Had looked for it starting before 1500 UT as there was conflicting info about correct schedule, but nothing there, until cut on abruptly at \*1530 UT, with music, anthem? Then brief announcement, also brief Qur'an, more talk in non-French, mentioning kHz, and a .com.

Presumably all in Somali and still so when local noise, power-tooling neighbour overrode at 1610-1619 UT. By 1619 UT when that cleared up, station had switched to French; sounds like a lot of platitudes. Dave Kenny, who had no such noise interruption, says French started at 1612 UT.

Cut off the air at 1629:30\* UT sharp before speaker was finished. So it's coming from a transmitter site with precision timing, but no clues beyond that. Signal at start was S=9+10dB with flutter and diminished somewhat during the hour.

(Glenn Hauser-OK-USA, ARDXC ADXNews March 1) via Samara-Russia ? wb.

La Voix de Djibouti / Coodka Jabuu6i launched on Jan 7, broadcasts in French and Somali Thursdays only 1530-1630 UT on 15165 kHz. Site not yet determined.  
(Chris Greenway-UK, dxld via WDXC Contact magazine)

I tuned to 15165 kHz at 1555 UT and heard a language that could be Somali. At 1600 UT there was a definite mention of "Djibouti". French noted at 1618 UT. Decent reception.  
(Bruce Fisher-MA-USA, dxld March 4)

This station is audible right now. Heard from tune-in at 1605 UT with good signal here in the UK on 15165 kHz. Talk in Somali with many mentions of Djibouti and ID heard as "Voix du Djibouti" (even when speaking in Somali). Into French at 1612 UT mentioned "nouveau radio.... Voix du [sic] Djibouti".  
(Dave Kenny-UK, dxld March 4)

15165 Voice OF Djibouti, in presumed Somali at 1553 UT, March 4. About 1623 UT I realized men were speaking French but because of severe noise I hadn't noticed when the language changed. Horn of Africa vocal and instrumental at 1626 UT and off at 1628:30 UT. Fair signal but mostly unreadable due to noise. Thursdays only. Anyone know the transmitter site? (Wendel Craighead-KS-USA, DXplorer March 5)

UNID/RUSSIA ? 15165 clandestine La Voix de Djibouti noted today Thur March 4th again. TX signing-on at 15.29:49 UT. S=7-8 on Eton E1, but 7 diodes shining on Sony ICF2010, - signal here in southern Germany. At 1620 UT onwards a little stronger than 1530 UT.

Maybe Samara site? sidelobe of 188 degrees?, but could be rather also a "dead zone" groundwave like signal from nearby Moldova Grigoriopol [if not WER, ISS] ?

15.31:35 UT started audio feed, "La Voix de Djibouti" ID, + worldwide web address URL. Mentioned also FLSC? organization and also country names like Niger and Somalia. Started in Somali, but in second half hour also in French language and stronger signal.

16.28:31 UT audio stopped suddenly midst on the song.  
16.29:31 UT TX switch off transmission.

Listen to my local recording.  
Contains  
15165 La Voix de Djibouti,

SLOVAK REP 7385 Miraya FM Radio via IRRS SW at Rimavska Sobota shortwave site in Slovak Republic: in Arabic scheduled 3-6 UT noted with S=9+20dB level at 0549 UT March 3.

Also via Rimavska Sobota shortwave site, religious EGR on 5990 kHz in English noted on March 2nd at 6-7 UT.  
(wb, wwdxc BC-DX TopNews March 2/3)

SOLOMON ISLS 5020 SIBC at 1152 UT in Tok Pisin, announcer speaking to someone via telephone, 1154 UT Gospel song by The Gaithers, 1159 UT with what might have been a devotional, 1202 UT man with ID "This is the Solomon Islands Broadcasting Corporation...", mentioned resuming "tomorrow

morning", national anthem to 1204 UT and then left carrier on. Good, but frequent severe QRM from Cuba 5025 kHz.

(Harold Sellers-BC-CAN, DXplorer March 4)

SOUTH AFRICA 9960 Radio Bar-Kulan at 1558 UT. Radio Bar-Kulan via Meyerton-AFS um 1558 UT mit VT-Testmx, um 1600 UT dann ID "Radio Bar-Kulan" gefolgt von Sendeplan, Eingangsmoderation, Bismillah + kurzer Koranrezitation und Vn-Mx. Dazwischen immer wieder Jingles "Bar-Kulan Bar-Kulan Bar-Kulan".

(Patrick Robic-AUT, A-DX March 1)

Received a detailed reply from David Smith, Director, Radio Bar-Kulan in 2 days for a reception report sent on 1st March, 2010 just after the inaugural txn was over at the usual email ID

<barkulanradio @ gmail.com> mentioned on their website. Earlier, also received an instant auto reply from Sunni Said Salah, Senior Somali Sports Journalist & Sports Chief Editor.

Here's the reply received from David Smith, Director, Radio Bar-Kulan :  
"Thank you for your reception report. You heard us on our very first day of broadcast. Your details are correct.

This is a brand new radio station so we do not yet have QSL cards. We will get some in the future. We do not even have a letterhead yet! One of our technicians is from India and I am copying him on this reply - I'm sure he will be pleased! Soon we will also be streaming from our internet site so check <bar-kulan.com> for details.

Best and mahadsanid,  
David Smith Director"

(Alokesh Gupta-IND, wwdxc BC-DX TopNews March 3)

Hier in Stuttgart heute um 1635 UT ein sehr duerftig, flatterndes S=6-7 Signal mit HoA Musik ohne irgendwelche Stoerungen.

Bei 500 kW mit 20 Grad Hauptkeule muesste hier eigentlich etwas mehr Power aufscheinen. Plus/Minus 30 Grad einer 2 x 2 Dipolvorhangantenne (typ 146) gibt ueblicherweise bei 348 Grad Richtung in Stuttgart immer noch eine gute Abdeckung.

(wb, wwdxc BC-DX TopNews March 2)

SWEDEN Frequency change of Radio Sweden International in Swedish to Asia 1200-1230 NF 11550 HB Y 350 kW 040 deg, ex9380

(R BULGARIA DX MIX News, Ivo Ivanov, via wwdxc BC-DX TopNews March 1)

SYRIA 12084.98 at 2120 UT on Febr 24. Arabic vocals. Decent audio for them. Carrier had het or hum. Parallel to 9330 kHz which had much lower audio level. S7-8 carrier.

(Jerry Strawman-IA-USA, DXplorer March 1)

TAJIKISTAN/VATICAN STATE From 07.03.2010 morning onwards Vatican Radio plan to change - usually - ONE of its frequencies. New morning hour frequency 9580 kHz [was planned 9395 via Dushanbe TJK instead] 100 kW 137 degrees, (ex 5895 kHz scheduled til March 6th).

0025-0200 UT in Urdu, Hindi, Tamil, Malayalam, and English  
(K. Raja-IND, DXindia March 1)

9580 will remain March 28th til May 1st, and from Sept 5th til Oct 31st. In high summer season VR will replace 9580 by Dushanbe TJK 11850 kHz instead, May 2nd til Sept 4th.

Usual // frequency SMG-VAT on 7335 kHz 500 kW at 98 degrees. (wb)

TANZANIA R Tanzania, Dar es Salaam, known locally as 'RTD' or 'TBC' is located at Nyerere Road, a few km's from the city centre. The studio building was constructed by the British in 1954. There I met 4 friendly engineers who told me a lot about Tanzania's long SW broadcasting history. With nostalgia they spoke about the last SW transmitter, 'the fifty-fifty' (i.e. 5050 kHz) which was taken out of service in 2006 because spare parts were no longer available. A few years earlier 6105 had 'died' too. Just 1 km away from the studio building is the transmitting station where these oldies are now collecting dust and rust. RTD meanwhile has adequate MW coverage and FM is available from 11 sites throughout the country.

Three programmes are broadcast:

TBC Taifa (= 'National', supposedly only on MW),

TBC FM in Swahili, and

TBC International in English for the capital city area on 90.0 MHz FM.

Dec. 10, 2009, will no doubt go down in Zanzibar's history as 'Black Thursday'.

On that day the electricity supply, carried from the mainland by submarine cable, broke down. Since then the retailers of generators and fuel have become quite rich, but the blackout has left most Zanzibarians angry, desparate and frustrated. It will still take many months before the cable will have been repaired or replaced. The authorities are still only in the negotiating stage with foreign companies willing to solve the problem.

R Zanzibar has generators for the 585 kHz MW transmitter and 97.4 MHz FM.

The SW transmitter at Dole, 10 kms North-East of Zanzibar City (commonly known as 'Stone Town'), is off at the moment, but will return to the air once the blackout is over.

The 10 kW transmitter at Chumbum on 585 will be replaced by a new 50 kW Chinese unit.

I was given the following schedule:

585 at 0900-2100

6015 at 0300-0600

11735 at 1500-2100

on FM at 0300-2100 (Unguja 97,4 and Pemba 90,5)

The 11735 kHz outlet is regarded as an international frequency for coverage of the mainland and the vast Swahili-speaking region of East and Central Africa. By the way, Zanzibar is the collective name of all islands under the autonomous Revolutionary Government, part of the United Republic of Tanzania. Zanzibar Island is now commonly referred to as Unguja. (ibid., Benelux DXC Bulletin, via wwdxc March 4)

UNIDENTIFIED Around 0540 to 0600 UT noted two UNID odd frequencies stations on 9679.49 (maybe Jakarta-INS domestic?) and on 9689.75 (Nigeria starts much later in the morning at 0800 UT).

9680.00 seems YFR, and 9690.00 covered by US Biblis in Kurdish and RRI Bucharest French at 0600 UT. (wb, wwdxc BC-DX TopNews March 5)

U.K. 15480 new evangelical mission of IBRA Radio in Pashto, Dari, and Hazaragi; towards Muslim countries Afghanistan and Iran. IBRA Radio via VT-group Rampisham-UK, 500 or 250 kW, 76 degrees. Pashto 1430-1500, Dari 1500-1530, Hazaragi 1530-1545 UT. Hazaras living in rural areas speak Hazaragi, an eastern dialect of the Persian language. (wb, wwdxc BC-DX TopNews March 2)

BBC on 12095 kHz seems to have some problems... since 1630 UT on March 2 ... recorded message repeated ... this is the BBC, there are no programs on this channel at present. (Gilles Letourneau-CAN, dxld March2)

Powerful S=9+55 dB Signal, endless loop at 1645 UT, here in southern Germany.

BBC English Middle East progr Rampisham 1500-1700 500 kW towards 95degr.  
BBC English NoEaAfrica Zyyi, Cyprus 1700-2100 250 kW 177 degr.  
BBC English NoWeAfrica Ascension Isl 2100-2300 250 kW 27 degr.  
(wb, wwdxc BC-DX TopNews March 2)

USA WWCR moved to 4840 March 1 at 0300-1200 UT, they had moved from 5070 to 4775 kHz during this time slot last month. They are no longer using 3240 kHz at 2300-0200 on transmitter 1, 7465 kHz is now used 2100-0100, 7490 0100-0200. (Station website)

WWCR had to vacate 3240 kHz due to an interference complaint from a Military Auxiliary Radio system operation. We have received an interference complaint from a foreign government's fixed operation concerning WWCR's 5070 operation. We are currently communicating with that government agency concerning this.

WYFR is now using 6875 kHz at 0300-1200 UT, ex 6915 kHz. (Tom Lucey-USA FCC, dxld via WDXC Contact)

KJES heard Febr 2 at 1449 UT on 11715 kHz, into Spanish at 1600 UT, very undermodulated and co-channel interference, had not been reported for almost two months. Later the same day heard on 15385 kHz at 1905 UT and on Febr 3 heard on 7555 kHz at 0205 UT. (Glenn Hauser-OK-USA, dxld via WDXC Contact)

WJHR International Radio, 15550 via Milton FL, full-data card with WB4BFO ham card in six days for a taped report and \$2.00. Address: George S. Mock, 5920 Oak Manor Drive, Milton FL 32570, USA. (Smith-MA-USA, QSL Report, Feb NASWA Journal via dxld)

9480 WTWW at \*1758-1818 UT on Feb 28. Popped on at 1758 UT with talk to 1800 UT, then ID, followed by more talk on Conspiracies, the Subject du Jour. (John Wilkins-CO-USA, DXplorer March 4)

Re: UNIDENTIFIED. 7505.6 approx.: I often hear a het on FEBC PHILIPPINES 7505 which is in Mandarin, Cantonese 1400-1630 UT; e.g. March 2 at 1439. Since this is close to the real WRNO frequency during its only broadcasts at 0200-0500 UT, I am wondering if they leave the exciter on the rest of the day, producing this weak spoiler signal? (Glenn Hauser-OK-USA, dxld March 2)

7505.64 odd - Came across of WRNO English sermon by female(!) "...talk about teenager...", at 0540-0548 UT, March 3, S=8-9 signal in southern Germany. (wb, wwdxc BC-DX TopNews March 3)

WJHR Milton-FL-USA war um 1400 UT mit s/on, Ansage einer e-mail Adresse und Predigt auf 15550 kHz USB zu hoeren. SINPO 24422 (Patrick Robic-AUT, A-DX March 1)

VANUATU As of Wednesday, Febr 24th, here is what we accomplished. 5055 kHz is on at about 3500 watts, and 3945 kHz is on at 7000 watts. But, due to the unstable A.C. power infrastructure, I had to design the protection circuits to be very sensitive. The systems will "fold-back" the transmitters to 2000 watts if it senses any kind of spike or surge in the A.C. power feeds.

It may take the staff at Radio Vanuatu a few days to respond and clear the "fault mode" power cutback. So, there's a good chance you may be hearing them at 2000 watts at certain times. I just wanted a situation where they remain on the air, but with no "catastrophic" failures until the infrastructure becomes more reliable.

The antennas for each frequency are two fan dipoles, in phase, side by side. They are broadside north by northwest, by south-south east. Unfortunately, the U.S. is in the "null" of both services if you follow the "great circle" path. The 7260 kHz frequency won't be used until next January or February, depending on how the cycle progresses.

The staff hasn't finished the QSL design so they weren't ready when I left on the 24th. I'm going to be in constant communications with them, so will keep you posted with any updates. Within the next couple weeks I will be joining your service.

Yes, there are more new stations but I don't have the details on frequencies yet. Glenn, please thank everyone for the help, and keep me posted on how Radio Vanuatu is doing signal wise. I'm also curious on how the audio sounds. This new design I focused on trying to have great audio quality. It would be nice to get critical reports on how the audio compares with the "big guns". Thank you so very much for the assistance you've given me. Your website has been a godsend to me.

(Jamie Labadia, dxld Feb 28)

Vanuatu was barely to audio here just East of Toronto on 5054.97 kHz at 1205 UT check, but not loggable. 60m dipole at 40 ft, Perseus. 3945 kHz was a carrier trace buried in Ham QRM. Oh and Indonesia switched back to the 9526 kHz transmitter after a few days just below 9525 kHz again. (Tony Ward-CAN VE3NO, ComputerViz, NYAA StarFest On-Line March 1)

### World DX Club Announcement

The World DX Club is pleased to announce that we can now offer E-Membership of the World DX Club at a considerably reduced rate compared to standard postal rates.

E-Membership will entitle you to receive Contact Magazine by a downloadable pdf file. Each month you will be sent a password to enable you to download that month's issue from the World DX Club webpages. Note that E-Members will not receive postal copies of the magazine.

For details of E-Membership rates, and on how you can join the World DX Club, just go to

<<http://www.worlddxclub.org.uk>>

You can also download a free sample copy of a recent issue of Contact magazine on that page.

The World DX Club was founded in 1968, and the first edition of Contact published by the club was mailed soon afterwards. Today, the club continues to publish Contact Magazine every month, consisting of up to 56 pages containing station logs, news, information and comment about radio and radio broadcasts - primarily, but not exclusively, international shortwave radio.

#####

Hallo Freunde und Radiofreaks,

der Rhein-Main-Radio-Club laedt ein zum  
45. DX-Camp in Langenselbold vom 19.4. bis 25.4.2010

Die ersten Tage sind etwas Besonderes, weil wir uns da dem Extrem-DX widmen und vor allem die Nacht zu Tag machen bei Kaffee und Rotwein.

Am Freitag 23.4.2010 dann ein besonderes Highlight:

Wir besuchen Radio Andernach, das Betreuungsradio der Bundeswehr

Wir treffen uns um 12.00 Uhr MESZ am Tor

Zentrum fuer operative Information  
Kurrenberger Steig 34  
56727 Mayen

Eingeladen sind alle interessierten DXer, die Teilnehmer des DX-Camps in Langenselbold und alle RMRC Mitglieder Fuehrung ca. 2 Stunden, Kosten 10 Euro, RMRC Mitglieder kostenlos.

Achtung!!!! eine Anmeldung ist erforderlich (max. 12 DXer).  
Da die Einrichtung sicherheitsrelevant ist, sind Ausweise ebenfalls erforderlich mitzufuehren.

Harald Gabler, RMRC Vorstand <[www.rmrc.de](http://www.rmrc.de)>  
(March 4)

ALGERIA 6297v Spanish Sahara Radio back on the air / Spanish broadcast.

Spanish Sahara heard back on the air at 2040 UT on March 9 on 6297.1 kHz.

Music and Arabic, clear ID heard at 2049 UT. Very good reception here in Massachusetts, USA. Nice to hear this station again.

(Bruce Fisher-MA-USA, dxld March 9)

6297 at 2345 UT - Nat.R. of Saharan, Algeria/Clandestine - (Spanish) -  
sio: 344 - Mx and male announcer speaking in spanish. References to  
'Sahara'; funky local guitar-like music intermixed with the announcer.  
Clear station ID at 0001 UTC. Some kind of anthem played at 0002 UT, off-  
air by 0003.

(Scott McLean, dxld March 9)

I would like to remind everyone that the transmitter for this station, at  
last report, was actually in ALGERIA. And if memory serves correct, is the  
only SWBC direct from Algeria.

(David Sharp-AUS, dxld March 10)

RASD TX location ? 6300v / 1550 / 700 kHz.

8 kilometers north of Rabouni, West Saharan administration camp in  
Algeria.

14 kilometers south of Tindouf village, Algeria. see Google Maps

AUSTRALIA Radio Australia is not quite back to normal; altho 9560, 9580 and 9590 were doing well before 1400 UT March 12, later in that hour I noticed that 9590 was absent tho it is supposed to run until 1600. 7240 was still on but weakening.

"teddyfnballgame" in the ptsw yg got a March 10 reply from Nigel Holmes, RA CE: "RA's Shepparton transmitters were whacked by a cyclone on Sunday 7 March. Several aerials were knocked out including the one which carries 9580 kHz. Repairs are underway and we hope to be back with 9580 kHz tonight. Thank you for your kind comments about our programming, We're glad you've enjoyed our broadcasts over 25 years. Good listening. Kind regards, Nigel Holmes, Chief Engineer, Radio Australia"  
(Glenn Hauser-OK-USA, dxld March 11)

Radio Australia has reportedly suffered damage to the Shepparton facilities after a severe hail storm last week. 11660 was missing March 9th at 1430-1730 UT but 9475 kHz was on air.

Today - the 9th - 15160 kHz was on air until 0800 UT, and 9475 came up at 0700 as usual (15415 and 15240 not tuned), but 11945 and 9710 at 0700 are not audible. At 0830 UT there are weak fluttery signals audible on 9580 and 9590 kHz, but not good enough to ID positively so far. And on 13630 kHz there is another audible below CVC Tashkent which should be - and probably is - Shepparton.  
(Noel R. Green-UK, dxld March 9)

Chinese, Japanese broadcasts resume after team repairs HCJA antenna in Australia.

Repairs to a storm-damaged antenna at the international transmitting site of HCJB Global-Australia were completed in mid-February, allowing the station's Chinese and Japanese language broadcasts to return to the air.

Strong winds had damaged the antenna at the Kununurra-based site in late January. A team consisting of Dave Brewster, Mike Ewers, Daniel Forrer and Greg Wilson assessed damages to a broken tower guy wire and seven broken element guy wires. The broadcast team assembled all materials needed for the repairs. Dennis Pease traveled from Perth, Western Australia, to supervise repairs.

Rains during Kununurra's wet season made the ground too soft to use a crane, so Pease and Wilson climbed the tower, assisted by staff on the ground. Replacing the broken guy cable made the tower secure. Then they dismantled the broken section of the antenna, hauled up a new section, and fitted and secured it.

The repairs were completed on Thursday, Feb. 11, and regular programming in Chinese and Japanese resumed the next day after being off the air for 12 days. "Several Japanese DXers wrote to us regarding loss of signal," said Peter Penford, the studio manager. "One of them in particular often writes."

The site broadcasts 15 hours of programming per day in 21 languages, including English, Urdu, Hindi, Nepali, Chhattisgarhi, Indonesian (Bahasa), Mandarin, Bhojpuri, Tamil, Marathi, Marwari, Telegu, Gujarati, Malayalam, Kurux, Japanese, Malay (Bahasa), Rawang, Fujian, Punjabi and Hmar.

(TWR Vienna leaflet, via Alexey Zinevich-BLR, BC-DX TopNews Mar 12)

BRAZIL 4885.000 Rdif. do Amazonas, 1010, Portuguese, news or similar by man with many mentions of "Brasil." Would have been very good copy if not for sporadic utility QRM. March 3.

4885.012 Rdif. Acreana, 0945, Portuguese, nice ballads, into ad string. Very good when not hammered by utility. March 3.

4914.970 Rdif. Macapa, 0930, Portuguese, presumed with male reverb announcer, local music, fair-good. March 3.  
(David Sharp-NSW-AUS, dxld March 6)

CHILE Unfortunately, the quake did not shake some sense into the CVC 11920 kHz transmitter relaying HCJB, for it still outputs big nasty slushy spurs on each side, March 6 at 2342 UT in Portuguese, centered as closely

as I could tell at 11901.5 and 11938.5 kHz.  
(Glenn Hauser-OK-USA, dxld March 11)

CHINA/SINGAPORE/THAILAND/U.K. No significant Firedrake jamming noted here in Europe in past 3-4 months. Mostly curbed ECHO like jamming programs heard so far. Today only two times Firedrake music heard surprisingly on singel 15515 kHz at 8-9 UT and 15140 kHz at 0900-1000 UT. But both could also be only copies of the national CNR radio program ...

But noted China mainland jamming against BBC Uzbek sce at 1600-1630 UT March 7th. Firedrake music against 9685SIN and 11795WOF, as well as Mandarin CNR spoken ECHO jamming against 9495NAK, all S=+30dB strength in southern Germany.  
(wb, wwdxc BC-DX TopNews March 7)

Firedrake March 8 at 1331 UT, poor with flutter on 8400 and 9000 kHz. This pair had not been heard for a couple of weeks.  
(Glenn Hauser-OK-USA, dxld March 8)

9355 Firedrake music heard also against VOA. Noted at 1535 UT when VOA Burmese sce at 1530-1630 UT March 8th on air via Tinang-PHL.

Once again noted China mainland jamming against BBC Uzbek 1600-1630 UT March 8th. Heavy Firedrake music jamming against strongest-9685SNG and 11795WOF, latter suffered also by mix from DWL French from Kigali co-channel underneath. Also tiny Firedrake mx, but much stronger 2nd spoken CNR echo jammer on 9495 Nakhorn Pathom-THA. In summer season the jammer will follow to 11995NAK, 13630OMA, 17630RMP.  
(wb, wwdxc BC-DX TopNews March 8)

COLOMBIA 5910.024 Marfil Estereo, 0745, Spanish, continuous ballads across top-of-hour with no ID. Finally, canned ID/jingle around 0810. Fair. March 1. Noted again with very good signal from 0800+ on March 5.  
(David Sharp-NSW-AUS, dxld March 6)

CYPRUS Undoubtedly 24-25 kHz wide British radar on Cyprus site noted BUZZing at 0930-0935 UT, Sun March 7th on 15832 to 15856 kHz range.  
(wb, wwdxc BC-DX TopNews March 7)

ECUADOR 3810.000 HD2IOA, 1015, Spanish time checks by man every ten seconds or so, only readable in LSB (but otherwise very good). March 3.  
(David Sharp-NSW-AUS, dxld March 6)

ETHIOPIA VOA Amharic is JAMMED, THOROUGHLY. "In media interviews today, government spokesman Shimelis Kemal denied any government involvement. 'This is absolutely a sham,' he told CPJ, adding that 'the Ethiopian government does not support the policy of restricting foreign broadcasting services in the country. Such practices are prohibited in our constitution.'" Committee to Protect Journalists, 4 March 2010.

"As usual, spokesperson of the government dismissed it as a baseless allegation. He added, 'Ethiopia has a constitution which outlaws any act by any official organ to restrict the dissemination of broadcast material from abroad.' This continuing practice has also been confirmed by shortwave radio monitors (so says VOA)), further discrediting government credibility." Genet Mersha, nazret.com, 7 March 2010.  
(kimandrewelliott.com via dxld)

Listen to these samples via the IBB RMS receiver in Addis Ababa on 10 March:

- 1) VOA Amharic mostly in the clear at 1817 UTC on 11905 kHz, but
- 2) mostly covered by jamming on that frequency by 1844. Also at 1844:
- 3) covered on 11675,
- 4) getting through a bit on 9860,
- 5) some background audio on 9485, and
- 6) covered on 9320. It seems the jammers are winning. (The only VOA Amharic transmission is at 1800-1900 UT.)

To combat jamming, the best remedy is to transmit on as many frequencies as possible, from as many azimuths as possible. The closure of the IBB relay stations in Morocco and Greece has not been helpful in this regard. Transmitters for lease will have to be found. Posted: 11 Mar 2010.

(Kim Andrew Elliott, *ibid.*; for linx see <http://kimelli.nfshost.com/index.php?id=8503> via dxld March 11)

It also helps to use higher frequencies if they will propagate but that is 9-10 pm in Ethiopia (by the western clock), since that increases the skip distance the jammers have to transit.

I still wonder how effective jamming on 25 and 31 mb is within Ethiopia, much of which would be in the skip zone if the jammers are really around Addis. Could they be getting help from some other country at a better-positioned one-hop distance?  
(Glenn Hauser-OK-USA, dxld March 11)

FRANCE/FR GUIANA/NETH ANTILLES New schedule for The Disco Palace in DRM:

Baldige Besichtigungsmoeglichkeit des Senders in Wiederau  
Donnerstag, den 18. Maerz 2010  
Uhrzeit: 14.00 Uhr  
Ort: Sender Wiederau, Senderstrasse, 04523 Pegau, Ortsteil Wiederau.  
Treffpunkt: Eingangstor.

Info: Wegen der winterlichen Wetterbedingungen wurde der Termin vom 12. Januar auf den 18. März, 14.00 Uhr verschoben.  
Rueckfragen bitte an Guenter Freistedt; 0341/9411301 oder 0171/5677906.

Hinweis: Der alte Lorenzsender kann auch besichtigt werden. Ein Mitarbeiter, der bis zur Abschaltung den Lorenz-Sender betreut hat, wird führen und Fragen beantworten.

Viel Spass,

(Dr. Anton Kuchelmeister-D DK5TL, wwdxc BC-DX TopNews March 7)

Schade dass ich nicht in der Nähe wohne ... das hätte mich interessiert.

Re exReichspost Lorenz Sender in Leipzig. Das war jahrelang der gute alte Radio Moskau Relaisender 1322 kHz mit 120 kW bis im Juli 1989, als Moskau nach Wachenbrunn umzog und von dort dann auf 1323 kHz mit 1000 kW sendete, - heute 800 kW Transradio Berlin unit (ex Telefunken).

Ich habe beim DDR-Messebesuch in Leipzig 1977, 1981 oder 1985 [passte immer schön im Anschluss an die Funkausstellung in Berlin], heimlich Dias von den Antennen aussen mit dem Voigtländer Tele 135 mm gemacht, immer in Angst vor der STASI.

Wenn man mit dem D-Zug von Saalfeld-Gera-Zeitz-Leipzig fuhr, schepperten die Lautsprecher mit Direktstrahlung vom MW Sender in den Abteilen (Zug-Funk) bei der Vorbeifahrt einige Kilometer am Tagebau bei Pegau Richtung Markleeberg.

Ich war dort als Schuljunge schon mit dem Fahrrad zu Besuch, die Techniker konnten innen in der Antennenrohre per Leiter nach oben klettern, das hat mich als Schuljunge sehr interessiert.

<[http://maps.google.de/maps?f=q&source=s\\_q&hl=de&geocode=&q=Wiederau,+Pegau&sll=51.151786,10.415039&sspn=20.641509,56.733398&ie=UTF8&hq=&hnear=Wiederau+Pegau,+Leipzig,+Sachsen&ll=51.185288,12.28161&spn=0.005023,0.013851&t=h&z=17](http://maps.google.de/maps?f=q&source=s_q&hl=de&geocode=&q=Wiederau,+Pegau&sll=51.151786,10.415039&sspn=20.641509,56.733398&ie=UTF8&hq=&hnear=Wiederau+Pegau,+Leipzig,+Sachsen&ll=51.185288,12.28161&spn=0.005023,0.013851&t=h&z=17)>

Former Reichspost and later GDR shortwave antenna located close to the "Rundfunksender Wiederau" text tag. Used for Radio GDR domestic progr, RBI Berlin foreign service on 9730 kHz, as well as for clandestine transmissions in 31 mb to communist parties in southern Europe and Turkey. Former French made SW tx 75 kW of WWII Nazi era in 1943-1944, used later from approx. 1953 with 50 kW by Radio DDR and RBI.  
(wb, wwdxc BC-DX TopNews March 7)

711 / 1413 SWR Cont.Ra program.  
SWR Ulm Jungingen in AM mode on 711 kHz til March 8th,  
silent on March 9th,  
move to new 1413 kHz from Wednesday March 10th, 2010.

SWR Heilbronn Obereisesheim remains on 711 kHz, and will get a new DRM mode capable unit in second quarter 2010. At present the antenna characteristic to be changed, to cover 15 kHz DRM bandwidth on the mast feet. Obereisesheim will be used in DRM mode then 24 hrs.

SWR Cont.Ra auf Mittelwelle.

<<http://www.swr.de/contra/-/id=7612/nid=7612/did=5568236/1am91ht/index.html>>

"Raum Ulm: aus 711 kHz wird 1413 kHz. Unsere Hoerer in Ulm koennen sich freuen:

Ab Mittwoch 10. Maerz 2010 haben sie einen deutlich besseren Empfang auf einer neuen Frequenz. SWR Cont.Ra hoeren sie dann im Raum Ulm auf Mittelwelle 1413 kHz (bis Montag 8. Maerz noch auf 711 kHz)."

Die Trennung der SWR Gleichwellensender 711 kHz (3 Sender, frueher auch ueber den stillgelegten SDR Heidelberg Dossenheim Sender) Heilbronn Obereisesheim und Ulm Jungingen hat wohl auch den zukuenftigen DRM Modus im Blickfeld - wenn auch nur nachts auf 711 kHz.

Dann waere der naechste DRM-Test (nach Kaiserslautern und Mainz Wolfsheim) nach einem Antennenausbau faellig. Die Antenne in Obereisesheim muesste durch geeignete Massnahme, wie z.B. einen 6 Meter Ring rund um den Mastschaft breitbandig (15 kHz) gemacht werden.

711 kHz mag ja tagsueber lokal gehen, 702 kHz aus Monaco und 720 kHz aus Langenberg sind hier nicht allzu stark. Aber ob in Ulm Jungingen 1413 kHz Signale von DLF Heusweiler Saar 1422 kHz bei einer DRM Bandbreite sauber zu trennen sind ... ?

Die Mittelwelle 1413 kHz wurde frueher von den SDR Sendern Bad Mergentheim (Am Kettenwald), Buchen-Wallduern (Hainstadt), Wertheim (Oberer Haag), sowie Heidenheim (Schloss Hellenstein) genutzt, oder zumindest koordiniert. Damit konnte man die Versorgung im Norden Baden-Wuerttembergs sicherstellen, da der Grundnetzsender SDR Muehlacker auf 575/576 kHz in Richtung Baltikum und DDR seine Leistung drastisch einschraenken musste [screened by 4 mast array in the 60ties and 70ties].

<<http://home.arcor.de/berlin-rundflug/download/MW-Datenbank.pdf>>

Re 711 / 1413 kHz, SWR Gleichwelle 711 kHz getrennt, see

<<http://www.swr.de/contra/-/id=7612/2s5n3v/index.html>>

6. Meldung von oben in der mittleren Spalte.

Heute am 9. Maerz sollte Obereisesheim allein auf der QRG senden. Ich habe z.Zt. mit der Tages-Bodenwelle ein typisch properes Signal, nix von reduziertem Reservesender aus Heilbronn, - so ist mein Eindruck, 9 von 10 Dioden scheinen am ollen SONY ICF2010 Schaetzeisen.

Dies entspricht bei der Tageswelle genauso den anderen verbliebenen

DLF 549 Kulmbach Thurnau,

BR 801 Gleichwelle, die hier in Degerloch ein arges Verwirrungsgebiet darstellt - vor allem bei der Fahrt im Autoradio - , wobei Nuernberg Dillberg meist staerker als Ismaning ist.

AFN-AFRTS 873 Oberursel-Weisskirchen,

SWR 1017 Mainz-Wolfsheim,

Radio France Bleu Alsace 1278 Selestat.

Nur SWR Muehlacker 576, SWR Bodensee 666, DLF Ravensburg 756, AFN-AFRTS Stuttgart Hirschlanden 1143, sowie DLF Heusweiler Saar 1422 kHz sind viel staerker einfallend.

(wb, wwdxc BC-DX TopNews March 8/9/11)

Nach <<http://home.arcor.de/berlin-rundflug/download/MW-Datenbank.pdf>> ist der Mast in Ulm 51 m hoch, dazu passt 1413 kHz viel besser als 711 kHz.

Mit 5 kW kann man ohnhin nur in der Naeh via Bodenwelle versorgen, dazu ist eine flache Abstrahlung (Strahlerlaenge 1/4 oder 5/8 der Wellenlaenge) besser geeignet. Der Abstrahlwinkelbereich bei 1/8 der Wellenlaenge (711 kHz ueber 51-m-Mast) ist allerdings auch nicht viel groesser.

(Bernhard Weiskopf-D, wwdxc BC-DX TopNews March 8)

MW Jungingen only 1 kW - ex 3 kW, wb.

RE: SWR Gleichwelle 711 kHz getrennt.

Ulm laeuft jetzt auf 1413 kHz mit einem kW[ex 3kW], mehr darf man auf der 1413 nicht. Allerdings ist die kurze 52-m-Antenne fuer die Frequenz ganz gut geeignet.

Heilbronn soll bald 24 Stunden DRM machen und zwar mit Cont.Ra Programm.

(Peter Beck-D, wwdxc BC-DX TopNews March 11)

INDIA/CHINA 9620 co-channel buzz of AIR Sindhi/Baluchi sce 1230-1600 UT with distorted audio feed at 1555 UT March 8, hetting against co-channel CRI Kashi in Pushto.  
(wb, wwdxc BC-DX TopNews March 8)

INDONESIA 7289.864 RRI Nabire, at 2307 UT, Indonesian talk by woman and into local music. Just above threshold but readable due to quiet conditions. Never heard this one at this time before. March 5.  
(David Sharp-NSW-AUS, dxld March 6)

3325 RRI Palangkaraya hrd March 6 from 1228 UT tune to 1426\* w/ man and woman anns w/ several mentions of "Kalimantan", but no RRI ID hrd. A brief (2-3 sec) clip of Quranic mx was hrd during s/off anmts. After the main s/off at 1426 UT, there were a few secs of silence fol by a few words from a woman ann (as if not knowing she was still on the air) and then the carrier dropped at 1426.5. Man and woman anns w/ vy pleasant pop and Indo inst/vocals from 1228 UT. Signal steadily improved all the way from tune in to s/off.  
(Bruce W. Churchill-CA-USA, DXplorer March 7)

ISRAEL/IRAN 13850 Jamming from Iran against KOL Israel in Persian at 1530-1545 UT, S=9 signal, also two jammer peaks at 13850.05 and 13849.86 kHz. In // another jammer on 11596.20 kHz, but nothing heard of KOL in Persian in 25 mb.  
(wb, wwdxc BC-DX TopNews March 7)

MARIANA ISL(Tinian)/PHILIPPINES 7225 March 7 at 1350 UT, sounds like ham on AM discussing skin tones and other attributes of various women.

Never heard an ID in several minutes. But carrier stayed on during his pauses to listen. At first it seemed like an HF repeater. But his contact was barely detectable and not readable.

The only explanation for this is that both hams were really SSB, and zero-beat to an open broadcast carrier conveniently on this shared frequency. That cut off at 1354 UT leaving the hams and overlisteners to resume carrier-insertion of their own.

Then same big carrier cut on 7235 kHz, covering VOA English lesson in Korean service, which is scheduled at 12-15 UT, and making a site switch at 1400 UT from TINIAN to Tinang, PHILIPPINES.

So this is what was really happening: Tinang was warming up on a deliberately offset frequency, 7225 kHz, to avoid interfering with ongoing VOA Korean via Tinian on 7235 kHz. But instead of waiting until Tinian went off 7235 kHz at 1400 UT, Tinang made the switch by 1355 UT, still VOA vs. VOA QRMing itself for a pentamminute.

A larger question is why IBB makes so many site switches amid continuing language programs. Hardly any IBB frequency stays from the same site for more than two hours, often only one hour. It's hard to believe that propagation really requires these constant changes, complexity greatly increasing the chance for errors or unnecessary self-interference like this; but it keeps the engineers and frequency planners busy! Not to mention the DX monitors.

(Glenn Hauser-OK-USA, dxld March 7)

MOLDOVA/SLOVAK REP 15660 / 15670 - both broadcasts now on separated channels.

MADAGASCAR [non]. via Grigoriopol Moldova[Pridnestrovye], 15660, Radio Mada Int, at \*1530-1600\* UT on March 7, sign on with anthem at 1530 UT. Crowd noise and speech by man at 1531 UT in presumed Malagasy. Abrupt sign off. Fair. Sat-Sun only.

(Brian Alexander-PA-USA, DXplorer March 7)

SUDAN [non]. via Rimavska Sobota Slovak Republic, 15670, Miraya FM, at 1610-1645 UT on March 7, Arabic talk. Instrumental music. Local music. English news at 1630-1641 UT. Time check. IDs. Gave website. "Miraya" jingles. Back to Arabic at 1641 UT. Fair.

(Brian Alexander-PA-USA, DXplorer March 7)

MONGOLIA Home service on 4895 // 7260 s/on at 2300 kHz, on 4830 kHz s/on at 2200 UT and Voice of Mongolia in En 1530 UT on 9665 kHz are using a common IS, observed on Feb 24 and Mar 7.

(Rumen Pankov-BUL, wwdxc BC-DX TopNews March 11)

MYANMAR Re new MW transmitter on 693 kHz: UADX member Sarath Werakoon has meanwhile found this page on the website of Hong Kong-based Broadcast Technology Limited, referring to a project installing a mediumwave antenna and AM transmitter for Myanmar National Radio (MRTV) with BBEF (Beijing Broadcast Equipment Factory). It says the transmitter is 400 kW, and the project was completed in March 2010, so this is presumably what Jose heard. (Source: UADX Sri Lanka)

(RNW MN March 4 via dxld)

NETH ANTILLES (Bonaire)/FRANCE 15745drm / 15760am. The disco palace.

The Disco Palace kommt gerade mit an sich gar nicht so schlechtem Signal aus Bonaire hier in DRM auf 15745 kHz an. Leider sind die Anforderungen mit 20 kBit Mode B. doch recht hoch, so dass ich hier doch einige Dropouts verzeichnen muss. Dennoch insgesamt nett im Audio.

Auf 15760 kHz laeuft das Programm auch//analog zu 15745DRM zu Vergleichszwecken.  
(Stephan Schaa-D, RX: Pappradio2, Antenne: 19m Aktivloop, A-DX March 8)

Auch im Sueden gut dekodierbar. Ueber S=9+30dB, SNR22dB, 18,44kbs wird angezeigt, nahezu aussetzerfrei.  
(Clemens Paul-D DL4RAJ, A-DX March 8)

March 9 at 1439, no TDP DRM on 15745, nor TDP AM on 15760, so must have been a one-day-only test March 8. Andy Sennitt got the details from Jan Peter Werkman at RN.

"Hi Andy, Yes we did the DRM as planned on 15745 kHz and when it was on air we also decided to do it in AM on 15760 kHz to compare AM and DRM.

Than a few minutes later we also tried 17840 kHz on 50 degrees in AM on the 3rd transmitter to compare propagation between 15760 and 17840 kHz. But this test only lasted a few minutes as the SWR was not good so we decided to shut down that transmission. This all at about 1300 UT. I am not aware of any other tests on 17 MHz later. Maybe Bonaire was testing on a dummy load. I don't know.

The main purpose of this test was to try to feed the DRM data from the DRM content Server to the modulator in Bonaire via Internet as an MDI-stream for the first time. This was successful. Regards JP"

So it looks like 17840 must have been Bonaire too, as who else would be running RN programming on the same frequency later the same day? But it was certainly no dummy load.

About The Disco Palace, the domain <www.thediscopalace.com> has been registered by TDP, so it appears it is really just another facet of Transmitter Documentation Project itself.

The website is attributed to someone in Belgium. Give the homepage time to morph the virtual palace from day to night. Doubt we would find it on the 8th floor of a Miami building as given in the contact info; and do Alyx & Yeyi, what strange names, really exist? Maybe someone would drop in for a visit.

The Disco Palace  
c/o Alyx & Yeyi, LLC  
5201 Blue Lagoon Drive, 8th Floor  
Miami, FL 33126, U.S.A.  
(Glenn Hauser-OK-USA, dxld March 9) a TDF spinn-off ?

Monitoring DRM from The Disco Palace to Europe.  
FRANCE 6015 1400-, The Disco Palace, Mar 8. Carrier on at 1400:41 secs, straight into already playing pop song - // 15745 kHz. DRM mode B, SNR 22.1dB. DRM ID: 'The Disco Palace'. Unlike the other broadcast this did not chop off the song to give ID.

NETHERLANDS ANTILLES 15745 at 1300- UT, The Disco Palace, on Mar 8.  
Test transmission scheduled 1300-1825 UT. Carrier on at 1259:50 UT. cut  
straight into already started Leo Sayer song then cut off before finish to  
ID 'Feel the music - the Disco Palace'. Other IDs given say station name  
first. DRM ID 'The Disco Palace'. DRM Mode B. SNR 19.5dB 20.96kbps stereo.  
Drop outs as SNR drops more frequent than from Issoudun. After 1400 UT  
// 6015 kHz.

(Sean Gilbert-UK, International Editor-WRTH, Web:  
<<http://www.hfradio.org.uk>>

Disco Palace currently on 15760 kHz in AM (not DRM). Thanks to Steve  
Calver on BDXC-UK yg for tip. SIO 252 at 1631 UT tune-in. Break in music  
but carrier still on with buzz 1637-1654 UT. Disco music back 1654 and  
jingle and ID at 1701 UT then more cont. music.  
(Alan Pennington-UK, BrDXC-UK ng / dxld March 8)

There were a couple of reasons for this DRM test.

1. For the first time we tested the complete audio transmission chain  
developed for DRM. Which means a DRM content server in the studio and a  
MDI stream via IP into the DRM modulator of the Thomson transmitters in  
Bonaire. In the case of Bonaire this has not been tested before and TDP  
was able to set up this MDI stream for RNW.
2. RNW choose to transmit to Europe during office hours between 1300-1830  
UTC. This way we could analyse the MDI stream and overall performance of  
the DRM signal during a long period.
3. In principle the analogue transmission next to the DRM signal had  
nothing to do with the DRM transmission. However, this was necessary to  
test the power generators on full load after maintenance. The 3rd TX was  
"on air" on the dummy load.  
(Rocus de Joode-HOL, RNW, via Andy Sennitt, March 10/11, dxld)

As I said before, I can't imagine the big signal on 17840 being only  
to a dummy load, unless that ordinarily allows plenty of kW to leak  
into the real antenna, anyway. Maybe it really was from some other  
site? (Glenn Hauser, OK, DX LISTENING DIGEST)

Das war eine Eintagsfliege. Aauch // auf 6015 Issoudun in DRM, welches  
Steckenpferd Ludo Maes schon einige Jahre reitet - und in Darwin ritt.

Vom Jean Gilbert dem WRTH Redakteur:  
6015 1400-, The Disco Palace, Mar 8. Carrier on at 1400:41 secs, straight  
into already playing pop song - // 15745 kHz. DRM mode B, SNR 22.1dB. DRM  
ID: 'The Disco Palace'.

und auch einige Minuten in AM auf dem dritten Sender in Bonaire auf 17840  
kHz.

Laut dem Techniker Jan Peter Werkman:  
" Than a few minutes later we also tried 17840 kHz on 50 degrees in AM on  
the 3rd transmitter to compare propagation between 15760 and 17840 kHz.  
But this test only lasted a few minutes as the SWR was not good so we  
decided to shut down that transmission. This all at about 1300 UT."

...danke in die gesamte Runde fuer diesen Tip! Hier 24 dB, 18,44 kbps,

Stereo, keine Aussetzer. Sehr schoen: // laufen die gespielten Titel mit (obwohl: I will survive von Gloria Gaynor haette ich noch gewusst...).

Allerdings wird als Location "United States" im Label angegeben. Haben die USA nun das mit Bonaire gemacht, was sie mit Grenada & Cuba schon versucht hatten?! [Ludo Maes' Firma sitzt in Florida] // dazu natuerlich im Internet:

<<http://www.thediscopalace.com/listen.php>>

so dass man - wie bei RNZI - alle drei Verteilwege miteinander bequem vergleichen kann. Hinsichtlich der Radioaktivitaeten aber ist die Site veraltet.

(Nils Schiffhauer-D DK8OK, A-DX March 8)

Die DRM-Sender auf Bonaire sind schon ziemlich lange aktiv, die duerften dort seit 2003 DRM ready sein - wenn nicht sogar schon etwas laenger. Ich glaube zuletzt nutzte RNW die digitalen Sender vor drei-vier Jahren.

Jedenfalls: Hier gewinnt (hoereindrucksmaessig) tatsaechlich das digitale Signal, die Aussetzer bei 20 dB SNR halten sich einigermaßen zurueck und sind nur kurz. Das AM Signal ist nicht ganz so fein.

(Douglas Kaehler-D, A-DX March 8)

all other DWL language sections show still their present B-09 winter schedule.

(DWL via wb, wwdxc BC-DX TopNews March 10)

NEW ZEALAND Radio New Zealand International Temporary Schedule.  
Due to the failure of a Mains Breaker at the RNZI transmission Base they are only able to operate one transmitter. This means they have had to reduce the hours they broadcast in AM and in DRM mode.

<<http://radiodx.com/nzrdxl/>>

#### RNZI AMENDED SCHEDULE

I guess time difference is 13 hours against UTC, so 6170 kHz starts at 1300 UT and 13660 ends at 1258 UT.

#### UT TIME

1100?-1550 AM 6170 (49 mb) rather 1300-1550 UT-(wb)  
1550-1750 AM 7440 (41 mb)  
1750-1850 DRM 9890 (31 mb)  
1850-1950 AM 11725 (25 mb)  
1950-2050 AM 11725 (25 mb)  
2050-2150 DRM 11675 (25 mb)  
2150-2236 AM 17675 (16 mb)  
2237-0000 AM 15720 (19 mb)  
0000-0100 AM 15720 (19 mb)  
0100-0200 DRM 17675 (16 mb)  
0200-0300 AM 17675 (16 mb)  
0300-0400 DRM 17675 (16 mb)  
0400-0500 AM 15720 (19 mb)  
0500-0700 AM 11725 (19 mb)  
0700-1058 AM 9765 (19 mb)  
1058-1258 AM 13660 (21 mb)

(via Adrian Sainsbury-NZL and Mark Nicholls-NZL, March 9)

Adrian Sainsbury, RNZI advises that: A planned shut-down was carried out for maintenance on Thursday 11th March NZDT. More work still needs to be done and another shut-down is planned, probably on Saturday 13th March NZDT (as NZ is currently UTC+13hrs that may be late Fri 12th or early Sat 13th UT.)

(Mark Nicholls, Chief Editor/Webmaster, NZ Radio DX League,  
<<http://radiodx.com/nzrdx/>> March 12, hcdx)

OMAN 15140 R. Sultanate of Oman inaudible around 1430 UT on March 8 when has English news; as often happens, frustratingly improves after 1500 when in Arabic, e.g. March 8 at 1530 UT fair with Qur'an.  
(Glenn Hauser-OK-USA, dxld March 8)

btw. I miss R Sultanate of Oman from Thumrait site on 17630 kHz, scheduled 0600-1000 UT, OFF since approx. Jan 2010. TX seemingly faulty now, noted before on odd v17632.38 kHz instead in Sept, Oct, Nov 2009.  
(wb, dxld March 8)

PAKISTAN 15630v Few hundred Hertz odd frequency with four (or even more on PERSEUS) signal peaks on 15630.17, 15630.27, 15630.52, and most powerful 15630.40 kHz [API-#3 ?] tx noted at scheduled 1230-1300 Sinhali, and 1300-1328 UT Tamil service from Radio Pakistan, Islamabad.

From 1330-1530 UT now in Urdu on much even transmission channels 7510 and 11565 kHz, March 7th. And in Urdu night service to United Kingdom totally distorted audio feed on both channels: 7535 kHz, and // small band transmission on 9340 kHz.  
(wb, wwdxc BC-DX TopNews March 7)

PERU 4746.881 Radio Huanta Dos Mil, 1023, fair with huaynos, best in LSB to avoid slop on 4750. Only Peruvian noted today. March 3.  
(David Sharp-NSW-AUS, dxld March 6)

(DWL via Alexey Zinevich-UKR, dxld March 10)

RUSSIA 7140.000 Radio Rossii, 1037, good with classical music and male announcer, Surprised to hear this in the clear, as the Voice of Korea normally dominates the frequency 'till 1300 or so. March 3.  
(David Sharp-NSW-AUS, dxld March 6)

9755 UNID Russian, faulty switch at Vatican Radio SMG (nom. 9585) or - maybe tentat. extended RadioRossii in Ru noted around 1740 UT, scheduled 1500-1700 UT via Samara site to Middle East.  
(wb, wwdxc BC-DX TopNews March 7)

RUSSIA/ETHIOPIA 15195 March 8 at 1607 good with Horn of Africa music including singer; 1612 announcement and now I notice there is also DRM-like noise on frequency, axually Ethiopian jamming of EOTC Holy Synod Radio, the clandestine which broadcasts Mondays only at 1600-1700 UT via Samara, RUSSIA site, per Aoki, and also reported by Wolfgang Bueschel March 1 with such noise jamming.  
(Glenn Hauser-OK-USA, dxld March 8)

Mondays only, today March 8th noted again, probably via Samara-RUS site.

15195 kHz EOTC Service is totally useless here in remote Europe. TX

switched on at 15.59:47 UT, at 16.00:12 UT program feed started, mens chorus opening ID, but 28 sec later at 16.00:40 brutal Ethiopian hissing noise jammer started within a half second top on air, a brutal crash start of most modern transmitter gear. S=8-9 signal til 17.00:00 UT, when jammer left the air.

15195 Recording of EOTC, March 8th, at 1600 and 1700 UT pieces. Same strong jamming here in Germany - like on March 1st previous week. (wb, dxld March 8)

SAO TOME/SOUTH AFRICA 6080 15580 VOA has launched special broadcasts to Sudan and created a content-rich website on elections.

The Voice of America (VOA) has launched special broadcasts to Sudan and created a content-rich website on elections more than a month before Sudanese are to vote in the country's first free presidential contest since 1986.

"The people of Sudan suffered through years of civil war. Now, they're getting a chance to vote in elections. VOA wants to make sure they have all the information they need to make informed choices," said Steve Redisch, VOA's executive editor.

VOA's "Sudan Elections in Focus" website

<<http://www.voanews.com/sudan>>

contains stories about the candidates, analysis and commentary by bloggers, details about election preparedness and logistics.

Every Friday in March, VOA will air a 10-minute special report on the English-to-Africa stream. Programs examine the candidates, their platforms, electoral preparedness, and the ongoing conflicts over land and resources in Africa's largest country. It can be heard at 1645 UTC and 1845 UTC on VOA shortwave frequencies 6080 and 15580. Starting in April, the Sudan special report will air every day.

The presidential elections pit Sudanese President Omar al-Bashir against South Sudan's President Salva Kir. The elections are proscribed under the Comprehensive Peace Agreement (CPA) which ended 20 years of civil war between the North and the South when it was signed in 2005. Also at stake in the election are seats in Parliament.

In 2011, Sudanese are scheduled to conduct a referendum that would allow South Sudan to secede from the North. The referendum, also part of the 2005 peace deal, is a source of tension between the North and the South.

The Voice of America, which first went on the air in 1942, is a multimedia international broadcasting service funded by the U.S. Government through the Broadcasting Board of Governors. VOA broadcasts more than 1,500 hours of news, information, educational, and cultural programming every week to an estimated worldwide audience of more than 125 million people. Programs are produced in 45 languages and are intended exclusively for audiences outside of the United States.

For more information, please call VOA Public Relations at (202) 203-4959, or e-mail <askvoa @ voanews.com> (VOA, March 10)

6080 Sao Tome, 15580 Meyerton-AFS relay at 1645, Sao Tome relay at 1845 UT

SLOVAK REP 9510 IRRS EGR - Sure Word Ministries program <<http://www.surewordministries.net/>> via Rimavska Sobota transmitter site, with God season program, old testament, boring stuff, US like sermon, full power in Stuttgart: 55555, S=9+30dB. But audio feed distorted quality, 1040 UT March 7th. (wb, wwdxc BC-DX TopNews March 7)

SOUTH AFRICA 9960 Radio Bar-Kulan via Meyerton-AFS. March 1 at 1600-1630 UT in Somali. SINPO 34433. Opening with music & ID as "Halkani waa Radio Bar-Kulan ..." Koran recitation at 1602 UT, followed by talk by woman & local songs. (Iwao Nagatani-JPN, JPNpremium March 7)

WYFR Family Radio in new language Kinyarawanda/Kirundi from March 1: 1800-1900 on 9770 MEY 100 kW / 007 deg to SoAf, ex English (R BULGARIA DX MIX News, Ivo Ivanov, via wwdxc BC-DX TopNews March 8)

SRI LANKA Heard daily in ?Sinhala from 1630 UT on 11750 kHz and splashes from 1657 kHz Mon-Fri from REE in Ru on 11755 kHz. At 1630 UT the prgr is s/on directly from Home Sce without any IS and ID. (Mar 8-11) (Rumen Pankov-BUL, wwdxc BC-DX TopNews March 11)

SURINAM 4990 R. Apintie again decently hrd on March 7 from 0425 tune with the usual pop vocals to past 0700 UT and ocnl short com'l segments - one tune I recognized at 0522 UT was "My Heart Will Go On" (the Titanic love theme) by Celine Dion. Much better than avg reception here w/ steady S2 signal (S5-6 on the Perseus S-Meter) and good audio mod - ocnl peaks to S3. No QRM and vy little noise. R. Apintie is usually all carrier and not much audio at this QTH. Perseus spectrum showed R. Apintie at a noticeably better lvl than R. Brasil Central on 4985 kHz - a rarity. (Bruce W. Churchill-CA-USA, DXplorer March 7)

SYRIA 9330 Strong audio on 9330 kHz for German 1800-1900 and French 1900-2000 and low audio for 1630-1700 Tu, 1700-1800 Ru and 2100- ? En on Mar 8. Better quality sound was on MW 783 kHz 1830-1900 in Ru. On Mar 10th from 1824 UT began a prgr "Briefkasten" (Letterbox) in German on 9330 kHz. Nothing observed on 12085 kHz maybe due to the conditions?. Often in the background on 9330 kHz is heard also additional prgr maybe from some TV prgr in Syria. (Rumen Pankov-BUL, wwdxc BC-DX TopNews March 11)

TAIWAN I can receive mysterious SOH via Taiwan to change frequency for every several minutes at around 2230 to 0930 UT on 17520 to 17580 kHz. It is recorded 12 hours of Mar. 9 to 10 as follows:

9-Mar 22:21:30 17520

Will they examine ability for Chinese monitoring? These do not have the jamming from China. de Hiroshi  
(Sei-ichi Hasegawa-JPN NDXC, dxld March 12)

TAJKISTAN At 1401 UT on 7245 kHz a multi language announcement, feat. In En and in Ru and from 1403 UT nx in ?Dari? (1300-1400 UT the prgr was in En). (Mar 7)  
(Rumen Pankov-BUL, wwdxc BC-DX TopNews March 11)

UKRAINE News about Radio Ukraine broadcasting. As I saw in dxld, there was deformed information about changes in Ukrainian Radio broadcasting. Maybe this info is somebody's machine translation of my announcement to OPEN-DX forum. Now I'll correct and supplement this information.

From February 22, due to financial constraints, the Ukrainian Radio was forced to make the following changes to its transmissions:

5970 kHz (Brovary) ch. UR1 - cancelled  
1431 kHz (Mykolaiv) ch. UR3 - cancelled  
936 kHz (Lviv) ch. UR1 - cancelled  
7440 kHz (Lviv) ch. RUI (0400-0500 English to NoAM, 1 hour) - cancelled

Rest of the time to NoAM transmission on 7440 kHz is apparently active:

0000-0100 Ukrainian  
0100-0200 English  
0200-0400 Ukrainian

In the summer season, from March 28, all times in the schedules of RUI and UR channels will be shifted 1 hour earlier against UTC.

All other UR1 transmissions on Medium and Long waves have been shortened to 2200-2300 (1 hour). Best regards!

(Alexander Yegorov-UKR, dxld March 7)

Means UR1 schedule cut by 1 hour to 0330-2200 UT ? (wb)

Cancelled txions of First Channel of Ukrainian Radio in Ukrainian  
0330-2300 on 5970 KV 100 kW / non-dir to UKR, effective March 1?  
(R BULGARIA DX MIX News, Ivo Ivanov, via wwdxc BC-DX TopNews March 8)  
[rather from Febr 22, wb.]

KURDISTAN [non]. Wolfgang Bueschel reported to dxld and in BC-DX: "Belgian police have raided sites in Brussels, Antwerp and other cities as part of an international investigation into connections with a Kurdish separatist group, the PKK. Turkey applauds arrests.

11530 kHz channel of Denge Mezopotamya from UKRAINE Mykolaiv Luch Posad-pokrovskote shortwave site is silent this morning March 5th."

Sergei S. also found 11530 and night frequency 7540 missing March 4-5, but 11530 was back weakly on March 6.

Is back on air on both 7540 and 11530 kHz since March 7th.  
(wb, dxld March 8)

UKRAINE [to KURDISTAN] 11530 wonderful Kurdish music from the PKK terrorists, March 9 from 1415 to 1500\* UT, i.e. V. of Mesopotamia, via UKRAINE. Good reception even on the breakfast table DX-390 with reel-out clip-on antenna extension. They got back on the air only two days after the raids in Belgium; from a different studio??  
(Glenn Hauser-OK-USA, dxld March 9)

7540 night channel of Denge Mezopotamya, also proper side lobe of Mykolaiv (Nikolayev) UKR site at 1805 UT on March 9, S=9+20dB in Germany.

Great signal to 32 million Kurdish nationals target in Kurdistan, as four divided countries like Turkey [18 million, North Kurdistan, one third of Turkish territory], Iran [8 million, East Kurdistan], Iraq [5 million, South Kurdistan] and Syria[1.5 million Kurds], and more than a million Kurds in Europe, NoAM and Australia. see  
<<http://www.ronibaran.de/kurden/geo.html>>  
(wb, wwdxc BC-DX TopNews March 9)

UNIDENTIFIED Re UNID 17690 kHz 12-13 UT puzzle of Jorge. It was a very tiny signal here in Germany, just above threshold. But my guess is meant towards Indian subcontinent, like CVC or similar US fundamental evangelical mission program via UZB, KAZ or TJK facilities? Heard only with SYNC detection feature on Eton E1 set.  
(wb, wwdxc BC-DX TopNews March 7)

UAE Some VT Communications changes:  
Voice of Tibet in Tibetan from March 1:  
1330-1400 NF 15430 DHA 250 kW / 070 deg to CeAs, ex 13695  
(R BULGARIA DX MIX News, Ivo Ivanov, via wwdxc BC-DX TopNews March 8)

UNID 15570 puzzle. TAJIKISTAN/UAE/CHINA  
Noted an Unid program in 1300-13.59:20 UT range March 7th. Cut midst on the sentence on the TX site, S=9+10 dB. Undoubtedly one of the CeAS languages. Noted also comment in different ng as seems Voice of Tibet. Formerly in high winter season on 13695TJK, 15412TJK, 17550MDG and 17560TJK.

Most likely former 17560TJK now on 15570 kHz, // 15430UAE - see above. Usually Voice of Tibet uses split frequencies of x2/x3/x7/x8 kHz via Dushanbe-TJK site, but seemingly VT-group facility at Al Dhabbaya-UAE is limited also on 5/10 kHz spacing on their SW tx units, like the China mainland jammers too.

Seems now that VoT settled down as follows:  
New 15570 kHz probably instead of ex17560TJK 1300-1400 UT (or 2 x 30 min segments?)

Also 15430 kHz channel registered from Al Dhabbaya-UAE 1330-1400 UT.

17550 from Madagascar does not propagate into southern Germany, but heard the accompanied China mainland jammer in progress at 1333 UT today March 11.

Re 15570 kHz, full newscast in Tibetan from 1300-1316 UT was not jammed by China mainland jammer unit, but jammer signed on around 13.16 UT as carrier with S=9+30dB, whereas VoT TJK was S=9+20dB before.

FIREDRAKE jamming noted on 15570 kHz from start at 13.18:10 UT. At 1333 UT all three channels were covered by synchronous jamming "Tschaeng and Bumm music" as well extensive KLAXON tone usage.

btw. 13695 kHz is not VoTibet, but rather YFR in Chinese to NoAM, ID noted at 1259 UT today...  
(wb, wwdxc BC-DX TopNews March 7/8/11)

U.K. to Sierra Leone 11875 Foundation Hirondelle with "Cotton Trees News Radio" noted with fair S=8 side lobe signal here in southern Germany. 0750 UT March 10th, English and Verncaulars mixture, s-of, cut midst in talk by two women, at 08.00:00 UT.  
(wb, wwdxc BC-DX TopNews March 10)

<<http://www.cottontreenews.org/>>  
Frequencies FM frequency - 103 and 107.3 in Freetown.  
Short wave frequency daily from 7:30 to 8:00 a.m. at 11875 kHz.

(FEBA via Dragan Lekic-SRB, and Alokesh Gupta-IND VU3BSE,  
dxld/hcdx March 11)

USA Frequency change of WWCR#3 from March 1 until further notice:  
0300-1200 NF 4840 WCR 100 kW / 040 deg to NoAm, ex 4775, re-ex 5070  
(R BULGARIA DX MIX News, Ivo Ivanov, via wwdxc BC-DX TopNews March 8)

4840 WWCR is providing a good signal here today (March 8) and on most mornings on new 4840 at around 0700/0730+UT with no QRM audible. I have heard Mauritania 4845 kHz but at much weaker strength.

There was a show for technophobe's on air on Sunday morning at 0745 UT tune in - darned if I could understand what was being talked about though, and must have been for those with a good memory for all of the latest abbreviations given to new devices.

Others audible from Stateside are WWCR 3215 kHz and WWRB 3185 kHz - both fairly good, but not as strong as 4840 kHz. And WTWW I think is the one on 5755 kHz in this same time period, and with a fair to good signal. WYFR on new 6875 kHz is usually good with some intermittent UTE QRM. But no trace of anything on 7505 or 7355 kHz, and higher frequencies such as WTJC 9370v kHz are weak to poor. CHU 7850 is rarely audible, but 3330 kHz is.  
(Noel R. Green-UK, dxld March 9)

11714.92v traced with annoying 80 Hertz tone at 1435 UT on March 5th, most likely KJES carrier at 14-16 UT range underneath of groundwave IBB RL Lampertheim in Uzbek on even 11715.00 kHz.  
(wb, wwdxc BC-DX TopNews March 5)

13570 WINB Red Lion, "power of God" English sermon by male. Little audio buzz., S=7-8 signal in Germany. 1520-1530 UT March 7th.  
(wb, wwdxc BC-DX TopNews March 7)

George McClintock tells me that WTWW is moving from 5755 to 5080 kHz starting 0000 UT Saturday March 13. The frequency has been approved by the FCC, subject to the usual NIB complaints, which could end it in one day or somewhere down the road.

I am afraid there will be some, as there is a pretty constant and strong ute on 5078, which I just reconfirmed at 0025 UT March 12, not sure of the

mode, but sort of RTTY with regular beep patterns. Even if it does not complain, should be considerable QRM to WTWW.

He says WTWW will remain on 9480 as day frequency, and 5755 to be held for WTWW-2, now under construxion but not to be on the air for a few months. It appears that Scriptures for America Pastor Pete Peters will continue to be the prime if not only customer on WTWW-1.

9480, however was off the air when I checked at 2135 and 2258 March 11. George says he was working on getting the remote control funxional, and now it is; 5755 was on as usual at 0025 UT March 12. (Glenn Hauser-OK-USA, dxld March 11)

#####

7 MHz morning log.

This morning I checked the 7 MHz band on late winter condition. Propagation will change tremendously in coming two weeks, as daytime growing more and more towards spring/summertime.

7200 RUS RRS Yakutsk not heard today.  
7235 BLR OR S=7 at 0730 UT  
7250 VAT SMG French, S=9+20 dB  
7255 BLR Misnk 250 kW at 0728 UT, but in peak not stronger than S=9  
7265 BLR is still OFF air.  
7280 BLR Brest at 0727 UT, S=7 only  
7300 BUL Sofia in Spanish at 0726 UT, S=7 only  
7320 RUS RRS tiny S=3, at 0725 UT, fluttery like polar path signal.  
7335 TUN RTT Sfax, Ar at 0719 UT, S=7-8  
7385 UNID most likely USA WHRI, TX switched on off again and again, most probably TX and antenna check, could be CRI Albania also ...  
S=3 at 0723 UT, but could be someone else ...  
7400 BUL in French at 0718 UT, S=9+20dB.  
7440 UKR at 0717 UT in Ukrainian, not strong these days, like 30 to 50 kW power only, S=8-9  
7455 USA YFR EN?, only S=3, towards Vancouver, Alaska ... Northwest ?  
7520 USA YFR Sp at 0715 UT, S=9+10dB.  
7730 USA YFR Polish at 0716 UT, S=9+20dB.

RHC Sp at 0733 UT 6140 and 6150, S=9+10dB.

11925 kHz at 0800-0900 UT puzzled me, noted an English 'spoken' program - supposedly ahead of co-channel TRT Ankara in Turkish. Okay, that is the spurious of Cerrick-ALB 11785 English, and 11855 in Chinese, another spur should be on 11715 kHz in Chinese, all separated by 70 kHz spur difference.

see also under DXLD, items of 11875RMP, 11910harmonic RNW Nauen 2x5955. (wb, wwdxc BC-DX TopNews March 10)

5050 Guangxi Beibu Bay Radio on March 13 at 1409-1432 UT. After weeks of checking this frequency and that now we're into spring equinox, this station appeared on this date, with remarkably good signals.

Noted with EZL Listening to MOR Music, both in EG and VT. Annmmts in VT and in EG by M/spkr, and by a female speaker in EG. Noted with several 'good' ID's for 'B-B-R' and one for "Guangxi Beibu Bay Radio" by female announcer at 1431 hrs, in EG.

Since that day the reception of this station has dropped off and getting later to catch a decent signal.

ETHIOPIA International shortwave radio monitors have confirmed that VOA broadcasts in the Amharic language are being jammed. Amharic is the main official language and the language of commerce in Ethiopia. VOA representatives in Ethiopia have been received complaints from listeners about noise drowning out its Amharic Service broadcasts. People trying to tune in can hear occasional snippets of the VOA broadcast covered by a loud crackle. The static began Feb 22 on all five VOA SW frequencies aimed at East Africa in the 25 and 31-meter SW bands. Monitors say VOA transmissions in two other Ethiopian languages, Afan Oromo and Tigrinya, are being heard normally. They are broadcast on the same frequencies, before and after the hour-long Amharic program.

The other foreign broadcast heard in Ethiopia, the German government's Deutsche Welle Amharic language program, also reports experiencing some interference, in the past few days. VOA and Deutsche Welle were jammed around the time of the last parliament election in 2005, and again before the 2008 nationwide local elections. The next crucial parliament vote is scheduled for May 23. In 2008, the authoritative BBC monitoring service reported it was able to determine that the jamming signals originated from within Ethiopia. This time, however, no such determination has been made.

In a telephone interview, Ethiopian Communications Office spokesman Shimelis Kemal denied any government involvement in the jamming. "This is a baseless allegation. The government doesn't espouse a policy of restricting media outlets from disseminating their messages to Ethiopian audiences," he said. Ethiopian officials have often described VOA's Amharic Service as the "Voice of the opposition", saying its broadcasts reveal an anti-government bias. Meleskachew Ameha, an Amharic Service reporter in Addis Ababa, was detained for two weeks, last year, in a case involving alleged possession of illegal broadcast equipment. He was released without charge.

11900 Seedtime Ministries via Broker Pan American Broadcasting via listed  
Wertachtal transmitter. At 1613-1629\* UT on March 14. Seedtime Ministries  
broadcast with Pastor Ashley Day, noted with religious text, contact info  
at the end of the BCB  
<<http://www.seedtime.net/>>

11675 Voice of America Amharic broadcast via Nauen (listed). March 18 at  
\*1800-1825 UT.

Opening ID in EG for "This is the Voice of America ... the following  
broadcast is in Amharic. News and commentary to 1825 UT.

11830 Voice of Eritrean People via Nauen (listed). March 18 at 1729-  
1758\*UT. Noted in Arabic to 1730 UT, followed with broadcast in Tigrinyan.  
News summary with Horn of Africa music to closing segment. Final comments  
and off with Horn of Africa I.S. Really nice signal on this date.  
(Edward Kusalik-Alb-CAN, DXplorer March 18)

936 Radio Bremen mediumwave ceased service for ever.  
Gerade erhielt ich eine Mail von Peter Welfers, Programmleiter von Bremen  
Eins auf meine Frage betreffs der Abschaltung. Er schreibt u.a.  
"...allerdings sind wir davon ausgegangen, dass die Mittelwelle - wenn  
ueberhaupt-nur noch von sehr wenigen Hoereninnen und Hoerern genutzt  
wird".

Weiter "Unter anderem Ihre Reaktion zeigt uns nun, dass die Mittelwelle  
genutzt wird. Das fuehrt uns dazu, dass wir den Plan, die Mittelwelle  
endgueltig abzuschalten, sicher noch einmal intensiv ueberdenken und  
beraten werden. So wuensenswert es auch waere, so kann ich Ihnen aber  
hier und heute nicht die Hoffnung machen, dass es dabei eine Entscheidung  
fuer den Erhalt der Mittelwelle geben koennte..."

Es scheint sich also nicht nur um eine zeitweilige Abschaltung zu handeln  
sondern es ist wohl beschlossene Sache, dass die MW abgeschaltet bleibt.  
(Peter Vaegler-D, A-DX March 16)

Radio Bremen 936 kHz, SWR Heilbronn - Ulm 711 / 1413 kHz.

Radio Bremen has switched off its 936 kHz transmitter on Wednesday (March 10), assuming that hardly any listeners still tune in. The decision is not final yet and could be revoked if complaints demonstrate that the assumption is wrong.

<<http://www.facebook.com/photo.php?pid=86175&op=1&o=all&view=all&subj=295486116966&aid=-1&oid=295486116966&id=100000698834974>>

Listeners who already called Radio Bremen have been told that their reactions indeed get explicitly registered, so apparently this is not just sweet press officer talk and already writing off 936 kHz would be a bit premature. It has so far not been deleted either from

<[http://www.radiobremen.de/bremeneins/info\\_und\\_kontakt/frequenzen/frequenzen102.html](http://www.radiobremen.de/bremeneins/info_und_kontakt/frequenzen/frequenzen102.html)>

For the time being this example has been posted for how 936 sounds in Germany now:

<[http://hf-freak-ane.bplaced.net/audio/VoiceOfIran\\_936kHz\\_20100312\\_1900UTC.mp3](http://hf-freak-ane.bplaced.net/audio/VoiceOfIran_936kHz_20100312_1900UTC.mp3)>

A permanent closure would be remarkable because the whole transmission facility is not more than 11 years old. It uses a cheap antenna construction, as explained in detail at

<<http://www.waniewski.de/id534.htm>>

(link to the subpage with the best photos). This antenna has been repainted just four years ago, in green, since it is not subject to flight security rules with its height of just 45 meters. Must have cost them a considerable fraction of the power bills for one year.

A word about the programming: From 1999 to 2002 the transmitter carried Funkhaus Europa. In 2001 Radio Bremen closed down its Radio Bremen 3 program and put Funkhaus Europe on its FM frequencies, thus they decided to use 936 for Bremen Eins (the former Hansawelle) again. Time and again special programmes went out, apparently for the last time the ARD-Olympiaradio during "Beijing" (probably also during "Vancouver", here 936 has not been announced in advance but the DW relays on shortwave have not been either).

(Kai Ludwig-D, dxld March 13)

Also on March 10 Suedwestrundfunk changed the frequency of its transmitter at Jungingen near Ulm from 711 to 1413 kHz [in order to allow SWR Heilbronn Obereisesheim 711 kHz gear to transmit on DRM mode instead, -- in 2nd quarter of 2010... wb.], apparently in doing so reducing the power from 5 to 1 kW, at least according to

<<http://www.swr.de/frequenzen/radio/mittelwelle/-/id=3646/1yw1vsg/index.html>>

During the second quarter the AM service of SWR cont.ra via the remaining 711 transmitter at Heilbronn/Obereisesheim will cease and the frequency be used for DRM tests instead, as explained at

<<http://www.swr.de/frequenzen/-/id=3786/mrfxfv/index.html>>

1413 is an old Sueddeutscher Rundfunk (one of the Suedwestrundfunk predecessors) frequency, during the eighties it was in use with 3 kW from Bad Mergentheim and with 200 watts from some further sites. After 1990

Sueddeutscher Rundfunk closed some of its MW gap fillers and consolidated them on 711, amongst them Bad Mergentheim which has been shut down in 1999, followed by Heidelberg in 2004.

All these transmitters were necessary because the Muehlacker main transmitter on 576 operated co-channel with Woebbelin (until 1979 the even closer Wiederau instead). Here you can still read a page full of complaints about Woebbelin returning to the air in 1999, reportedly running again 250 kW with new Thomson solid-state transmitters:

<[http://www.magischesauge.de/magischesauge\\_schwerin.htm](http://www.magischesauge.de/magischesauge_schwerin.htm)>

Now Woebbelin is gone for good, the masts have been demolished in 2005. If you want to know what became of the transmitter building:

<<http://www.myspace.com/fabrikwoebbelin>>

(Kai Ludwig-D, dxld March 13)

GERMANY/ETHIOPIA 11810 Voice of Oromo Liberation via Wertachtal noted 1700-1800 UT, Suns only. But JAMMED heavily by Ethiopian broadband HISS crackle jamming.

(wb, wwdxc BC-DX TopNews March 14)

GUINEA 7125 obs'ed inactive for some days now.

(Carlos Goncalves-POR, wwdxc BC-DX TopNews March 16)

INDIA AIR Employees strike on 17 March 2010.

On 17 March 2010 a mass casual leave with day long strikes at AIR Stations has been announced by unions of AIR. AIR has made contingency plans. Its worth monitoring AIR stations (for any interruptions) on that day.

AIR Delhi (Khampur 250 kW)

The following schedule of Air Delhi (Khampur 250 kW) External Services which was off air for many months is now noted back..

17510 0845-0945 Indonesian (SE Asia) 1000-1100 English (Australia/NZ)

17670 1515-1615 Swahili, 1615-1730 Hindi (EaAfrica) etc.

AIR Panaji (250 kW)

Both the 250 kW SW transmitters of AIR Panaji carrying External Services were not heard for some months but one transmitter is noted back on the air with the following schedule now.

15210 0400-0430 Persian, 0430-0530 Arabic,(WeAsia)

15235 1115-1200 Thai (SoEaAsia)

11775 1215-1330 Tibetan (Tibet), 1330-1430 Nepali (Nepal) etc.

12025 1615-1730 Hindi, 1730-1830 Malayalam (WeAsia)

<<http://www.qsl.net/vu2jos/new.htm>>

(Jose Jacob-IND VU2JOS, DXindia March 15)

INDONESIA Ganz Deutschland hoert Voice of Indonesia, und zwar auf 9525.885 kHz derzeit (1825 UT) mit SIO 333. Natuerlich in Deutsch, was man erst beim zweiten Hoeren so richtig gewahr wird.

(Nils Schiffhauer-D DK8OK, A-DX March 18)

LIBYA 15215 LJBC Sabrata in French "Voice of Africa" program with phone in program, terrible distorted small 2 kHz wide audio feederline quality - phone in from somewhere in Africa, at 1655 UT March 14.  
(wb, wwdxc BC-DX TopNews March 14)

MADEIRA Madeira update Back in January 09, the folded monopole used for 531 kHz 10 kW at Pico das Eiras, Porto Santo island, was destroyed in a storm. Being a tower of this type, it meant it could be used as a mast for the VHF-FM antennae too, and it was indeed the case. A new tower for these antennae was erected soon after that. This RTP-radio facility is located west of the this island.

<<http://static.panoramio.com/photos/original/15109580.jpg>>

I have just been informed that the RTP administration decided not to reactivate the MW outlet since full coverage is being accomplished by VHF-FM.

Now it remains to be seen whether the Pico do Areeiro tx 603 kHz 10 kW, Madeira island, has the same fate. The tower collapsed two days prior to the recent sad events in Madeira when floods and mud slides destroyed property and killed some 40 people. Pico do Areeiro is located north of the capital, Funchal.

MYANMAR For the past week it seems to me that ALL the Myanmar stations have had well above average reception. There are also some new developments.

7185.75v Myanma Radio, checked from about 1315 to 1515 UT, March 14, 15 and 16, but noted off-the-air. Perhaps down for maintenance to fix the two different audio feeds that I have heard being broadcast at the same time.

NEW ZEALAND Adrian Sainsbury (RNZI) advises that the Mains Breaker has been fixed late last night (NZ Time) and RNZI is back to normal operation with both transmitters.

For their full broadcasting schedule visit their website

<<http://www.rnzi.com>>

(Mark Nicholls-NZL, Chief Editor/Webmaster, NZ Radio DX League,

<<http://radiodx.com/nzrdxl/>> hcdx March 17)

From the Radio NZ International website

<<http://www.rnzi.com/pages/whatsnew.php#282>>

Yes indeed, we had a power failure caused by a 600 amp mains breaker failing. This took the whole power off the transmission site. Staff today found it was possible to get one transmitter operating, so we are operating a mix of DRM and AM. All very awkward, having to rewrite transmission schedule for the one transmitter. We hope to find a replacement breaker as soon as possible.

(Adrian Sainsbury-NZL, March 07, via Erik Koie-DEN, dswci DXW)

Update RNZI Power Supply Problem. It is taking much longer than expected to complete repairs. We hope to have our full schedule operating sometime this week.

Due to the failure of a Mains Breaker at the RNZI transmission Base we are only able to operate one transmitter at the moment. This means we have had to reduce the hours we broadcast in AM and in DRM.

The AM service will available from midnight to 0650 NZ time, 0750-0950, 1050-1400, 1500-1600, 1700-2400.

DRM will be available from 0650-0750, 0950-1050, 1400-1500, 1600-1700 NZ time.

We regret these interruptions and hope to have normal services back to normal as soon as the repair work is completed.

(Mark Nicholls-NZL, NZ Radio DX League, hcdx March 15)

DST in 2010: Pakistan All locations Thursday, April 15 to Monday, Nov 1st.

So look for most or all the above times including English to shift one UT hour earlier, like last summer, putting PAK, WEST of India on UT +6 hrs, AHEAD of it in time.

(Timeanddate.com via gh Glenn Hauser, dxld)

Hi, March 14, 2010. Radio Pakistan Nepali service was monitored in Lahore today at 1000 UT at 9375 kHz. Signal was strong. SINPO was 55444. The transmitter buzz was at a minimal level. Programme content was: religious song in Urdu followed by Pakistani film songs in Urdu, News in Nepali at 1015 UT resumption of film songs at 1020 UT. Whenever I monitor Nepali service, I have noted that songs/music in Nepali language are not broadcast from this service. Since this transmission is music based, I wonder why Radio Pakistan cannot arrange some Nepali songs despite the fact that there is an agreement of cooperation between Radio Nepal and Radio Pakistan.

(Aslam Javaid-PAK, dxld March 15)

Thanks for your report, Aslam, It seems that 9375 kHz via API-3 is doing extremely well currently. Unfortunately there is no propagation to me on 9 MHz at 1015 UT and so I can't try it myself. But the same transmitter should operate on 11525 kHz for Sinhali and Tamil at 1230-1330 so I'll see what I get on there.

I would guess that the programme producers should be able to buy Nepali music CD's somewhere in Islamabad if they went out to look! But perhaps the policy is to only broadcast Pakistani music? I used to hear occasional

programmes featuring western style pop music during World Service to Europe when it opened for a while at 0730 UT, but now it seems only Pakistani music is played whenever I listen.

By the way, I've been trying to find out if the 10 kW transmitter at Rawalpindi is still operating on 4790 kHz. It used to carry Rawalpindi III programmes around 1300 UT. Have you heard it recently?

RUSSIA Yahoo maps, MS Virtual Earth, Google Earth imagery. Some high resolution place. VE Update - Google Earth V.5 historical image.

Yazykovo ex4485 kHz, 17 kW

Looking at your GE KML file of txer sites I find the above SW TX site marked. Are these coordinates CONFIRMED? I didn't have the coordinates in the Extinct SW TXer sites Excel file. Location still low res in GE & BING. (Ian Baxter-AUS, SW TXsite March 11)

54 45 30n 56 02e, best visible in 2004 photo.

I suppose SW was co-sited in Yazykovo with 693 and 1287 kHz, but in low resolution and I don't know the exact place.

See Victor's page <<http://victorcity.narod.ru/Cities/ufa.htm>>

maybe he knows?

(Mauno Ritola-FIN, SW TXsite March 12)

I suppose SW was co-sited in Yazykovo with 693 and 1287 kHz, but in low resolution and I don't know the exact place.

Yes, Yazykovo is the new site for SW/MW from 1987. Small size and small antennas so it's hard to find. Somewhere near Yazykovo, the best view till now

<<http://kosmosnimki.ru/permalink.html?N0c7f6063>>

(Victor Rutkovsky-RUS, SW TXsite March 13)

wb: In my archive, I see a log of 4485 by Brazilian DX Club in 2001.

Yazykovo ist not icluded in ITU shortwave location site list of former USSR. It could be co-located with a big Ufa longwave installation. Maybe Mauno knows the LW / MW location near Ufa - Bashkortostan ?

(wb, SW TXsite March 12)

Ufa: The reference to Komintern denotes the earliest stage of Soviet broadcasting. The site in question is subject of this item:

<<http://blogs.rnw.nl/medianetwork/?p=8366>>

Radio Rossii was on 693, Mayak on 198 kHz. Another transmitter site exists at Yazykovo, 40 km north of Ufa. It used to relay GTRK Bashkortostan programming on 162 kHz, but according to an item in dxld this transmitter is off as well. The Yazykovo site has also a modest power (about 15 kW) shortwave transmitter which used to relay GTRK Bashkortostan and later a plain Radio Rossii feed on 4485 kHz. This shortwave transmitter has been closed down a few years ago if I'm correct.

(Kai Ludwig-D, dxld July 21, 2007)

They have demolished LW RS im. Komintern in Ufa (built in 1942) in June 29 54 45 30N, 56 02 00E low res. 162 RV-96 (GTRK Bashkortostan) and 198 RV-1 (Mayak) are cut off for ever. Other site near Ufa in Yazykovo now has 693 (Radio Rossii) and 1287 (Radio Yunost) many photos, videos and news in Russian:

<<http://www.radioscanner.ru/forum/index.php?action=vthread&forum=5&topic=25330&page=2>>

In June 19 RTRN has destroyed MW site in Astrakhan

46 21 10N, 48 04 13E hi

res. 576 RV-50 and 792 RV-35 are perished for ever too. FM and residential areas are coming.

(Victor Rutkovsky-RUS, dxld July 24, 2007)

Ufa silent? My earlier notes about the Ufa transmitter sites were in part wrong. Notes on this topic in Russian can be found here:

<<http://victorcit.dxing.ru/Cities/ufa.htm>>

Longwave 162 and 198 kHz was in the city, Ufa Sipailovo.

The Komintern station operated on longwave only, on both 162 (moved to this frequency from ex-153 during the nineties) and 198. The dxing.ru page speculates about 198 being moved to a former jamming site, but of course this would have to be discussed only in case there is still a signal on this frequency.

Photos of the Komintern site taken as recently as in last March, including a mast climb:

<<http://ufaradiov.narod.ru/>>

Large thread with photos of the still intact site on pages 1 and 2 and pictures of its demolition on pages 3 and 4:

<<http://www.radioscanner.ru/forum/index.php?action=vthread&forum=5&topic=25330>>

Yazykovo has mediumwave transmitters instead, the mentioned 693 as well as another one on 1278. Photos of the site, prominently featuring the shortwave antennas:

<<http://foto.mail.ru/list/4034098/29/>>

(Kai Ludwig-D, dxld July 24, 2007)

SLOVAK REP Radio City Relay on 9510 kHz via Rimavska Sobota, Slovak Rep.

This Saturday the 20th of March 2010 Radio City will return to the airwaves via Nexus (ex. IRRS) broker with 150 kW on 9510 kHz. The time slot is 0900-1000 UT.

Our contact address is still <citymorecars @ yahoo.ca>  
(Tim Taylor-???, hcdx March 18)

9510 Radio Rasant transmission on Saturday March 27, 2010 via IRRS broker and Rimavska Sobota tx site in Slovak Republic.

Dear OMs, amateurs and shortwave listeners,  
On coming Saturday there will be a new programme relayed from Radio Rasant. It will be the first transmission this year. This programme will be relayed on Saturday 27th of March 2010 at 0900-0930 UTC on 9510 kHz via IRRS, Rimavska Sobota tx site in Slovak Republic.

Students from different continents have explored about the protection of drinking water and why it is important to protect water. They will point out the importance of the industrial countries in this discussion. The whole programme will be in German. All non-German reports will be synchronized simultaneously.

All participating students \_ these are more than 100 \_ would be happy about your comments and reports. Please send your mails to <redaction\_radio\_rasant @ yahoo.de>  
We appreciate snail mail. Please send your letters to the address mentioned below.

Greetings from Sundern, Sauerland, Germany

Reinhard Marx; Tamara Tuchel, Jennifer Merschmeier, Kira Gonzales, Jana Friedetzky, Carmen Wittiber -- on behalf of the students from Burkina Faso, Germany, Egypt, Japan, Iran and from the Faeroer-Islands.

SOLOMON ISLANDS 5020, SIBC, Honiara, 0940-1204\*, Mar 01, 04 and 15, Tok Pisin, announcer speaking to someone via telephone, Gospel song by The Gaithers, 1159 with what might have been a devotional, 1202 ID "This is the Solomon Islands Broadcasting Corporation...", mentioned resuming "tomorrow morning", national anthem, good, but frequent severe QRM from Cuba 5025.  
(Bolland-USA, Sellers-CAN and Wilkner-USA; dswci DXW March 17)

The Solomon Islands Broadcasting Corporation is back on air after the Solomon Islands Electricity Authority (SIEA) restored electricity following a long power blackout at its Henderson transmitter.

General Manager, Cornelius Rathamana, said he was pleased that the people of Solomon Islands were again able to hear broadcasts from both 1035 kHz AM and 5020 kHz Shortwave. He said SIEA power to the area was cut early on Tuesday morning.

It is thought a storm caused trees to fall and break the lines between the Lunga Power Station and the Henderson sub-station.

SIBC began broadcasting again throughout Solomon Islands on 1035 AM and 5020 Shortwave just after midday yesterday.

TAIWAN/AUSTRALIA 15240.10 Radio Australia English Broadcast via Tainan,  
Taiwan relay. March 16 at \*2200-2225 UT. Noted with sudden sign-on in mid-  
programming, with Radio Australia News, Promotion for AM Australia hosted  
by Tony Eastley. Gradual fade-outs to 2225 UT.  
(Edward Kusalik-Alb-CAN, DXplorer March 18)

UGANDA 4976 R. Uganda, Kampala, 1920-1941, 12 Mar'10, English, talks  
abt. social development & women's role in society; 54433, somewhat muffled  
audio, adj. QRM de VoRUS 4975 via TJK.  
(Carlos Goncalves-POR, wwdxc BC-DX TopNews March 16)

UAE 9650 Came across 'dimmed' Polish Radio Warsaw in English via VT-  
group Al Dhabbaya relay at 1800-1900 UT, only suffers by fair S=6-7 level.  
Also low modulation, like noted previously also on DWL transmissions in 49  
mb last winter. This location has never been observed with reliable  
signals from VT-group relay arrangements towards Europe.  
(wb, wwdxc BC-DX TopNews March 14)

U.K. UK transmitter sites on Google Street Maps. Google Street Maps extended its coverage to most of the UK on Friday. I've been spending ages viewing the house I grew up in and the surrounding area which I haven't visited for years :)

There's a thread on the Digital Spy radio forum Google Street View Radio Stations and Transmitters Game which has currently got 96 posts, most with more than one site/studio, mostly domestic but here's the post with links to Wooferton, Rampisham and Skelton:

<<http://www.digitalspy.co.uk/forums/showpost.php?p=39015486&postcount=58>>

Google Street Maps now has nearly national coverage of Spain, France, Italy and the US according to UK newspaper articles.  
(Mike Barraclough-UK, BrDXC-UK March 16)

11875 IBRA Radio via Rampisham Transmitter. After sending an e-mail follow-up, got back a reply in 24-hours from the V/S: Maria Levander. She sent me two e-mail .pdf QSL letters with full data and site indicated with languages of the two broadcasts (Hausa and Fon).  
E-mail: <info @ ibra.se>  
(Edward Kusalik-Alb-CAN, DXplorer March 18)

USA Excellent propagation condition this afternoon March 14th even on 13, 16, and 19 mb.

For the first time in past two years I heard reliable signals from US stations in 13 mb again. 21640 kHz WHRI noted on S=4 level at 1635 UT March 14th. YFR from Okeechobee Florida in Russian noted with S=7 level on 21745 kHz at 1640 UT.

15420 English at 1700 UT from WBCQ Kennebunk, S=8 level, ahead and severe interference to BBCWS nx from Meyerton outlet.

13570 WINB Red Lion, funky bohemian like signal, like "rasp ssb mode" sound at 1710 UT, English sermon, S=6-7.  
(wb, wwdxc BC-DX TopNews March 14)

QSL - After a really dry spell these have finally manage to make their appearance.

The following were received to a Postal report with CD in Mp3 format, to Indiana Address.

V/S: Initials "LMV". Total time of 6 months, 38 days after posting these reports as follow-ups to WHRI address in Indiana.

17820 Deutsche Welle Spanish BCB via Cypress Creek. Full data (w/site indicated & name of station) '20 years of short-wave Ministry to the World' QSL Card.

15665 Voice of Biafra International via Cypress Creek. Full data (w/site indicated & name of station) '20 years of short-wave Ministry to the World' QSL Card.

9410 BBC-WS Spanish BCB via Cypress Creek. Full data (w/site indicated & name of station) '20 years of short-wave Ministry to the World' QSL Card.

(Edward Kusalik-Alb-CAN, DXplorer March 18)

5080 George McClintock tells me that WTWW is moving from 5755 to 5080 kHz starting 0000 UT Saturday March 13. The frequency has been approved by the FCC, subject to the usual NIB complaints, which could end it in one day or somewhere down the road.

I am afraid there will be some, as there is a pretty constant and strong ute on 5078, which I just reconfirmed at 0025 UT March 12, not sure of the mode, but sort of RTTY with regular beep patterns. Even if it does not complain, should be considerable QRM to WTWW.

He says WTWW will remain on 9480 as day frequency, and 5755 to be held for WTWW-2, now under construxion but not to be on the air for a few months. It appears that Scriptures for America Pastor Pete Peters will continue to be the prime if not only customer on WTWW-1.

9480, however was off the air when I checked at 2135 and 2258 March 11. George says he was working on getting the remote control funxional, and now it is; 5755 was on as usual at 0025 UT March 12.  
(Glenn Hauser-OK-USA, dxld March 13)

5080 UNID (tentative: WTWW, Lebanon in Tennessee, USA), 1008-1015 UT, March 14, English, Religious talk by male (in english), 24422 Strong QSB.  
(Arnaldo Slaen-ARG, DXplorer Mar 14)

It is WTWW, Arnaldo, ending "Scriptures for America" prgm at 1100\* UTC. Said they were "closing down on this frequency" at 1100 UT but kept going. Very strong here.  
(John Herkimer-USA, DXplorer March 14)

Arnaldo and others, thanks for highlighting this. This morning I heard 5080 kHz the Gospel Station WTWW fading in at 0020 UT, peaking around 0040 UT staying there till 0100 UT and diving down to nothing by 0115 UT. BTW sunrise here is 0015 UT or so these days and here in the tropics it gets dark very fast after sunset and also daylight zooms in a few minutes after sunrise.

I want to send a report. I heard bits and pieces and could follow a bit now and then. I have 100% on this one but will they?!! I don't chase QSLs much tho. I have logged more than 200 SWBC but have about 500 QSLs!! I will wait a few more days to see if things get better! Can someone give me a QSL address. They announced both a POBox and www, but I couldn't copy clearly enough. This is 50 kW I presume.

Thanks guys. Victor.  
(Victor A. Goonetilleke-CLN 4S7VK, DXplorer March 17)

Hi Victor, The only address I could find is: Leap of Faith, Radio Station WTWW, 6611 Ormond Dr, Nashville, TN 37205, U.S.A.

There is a website <<http://wtww.us>> but no contact information there. The FCC database shows 50 and 100 kW:  
<[http://www.fcc.gov/ib/sand/neg/hf\\_web/WTWW.txt](http://www.fcc.gov/ib/sand/neg/hf_web/WTWW.txt)>  
(John Herkimer-USA, DXplorer March 17)

Here is a couple of photos of the Chatworth Peak, taken from different angles of view. On the top of the peak you can see two antenna masts of the KVOH Rancho Simi-CA, a religious station transmitting in Spanish on 17775 kHz, with a power of 50 kW. If this type of antenna is a dipole, I'm confused about its orientation towards the South. The Birds Eye Map was recently opened for this area, so now we can see in the third picture the KVOH Tx site in all its glory (and in detail, as well) !

<<http://s307.photobucket.com/albums/nn314/sixsixii/?action=view&current=KVOHCARanchoSimiintheMiddle-waterta.jpg>>

<<http://s307.photobucket.com/albums/nn314/sixsixii/?action=view&current=KVOHRanchoSimiCAChatsworthPeakAnten.jpg>>

<<http://s307.photobucket.com/albums/nn314/sixsixii/?action=view&current=RanchoSimiCAUSAkVOH.jpg>>  
(Lev Lytovchenko-CAN, SW TXsite March 18)

I live a few miles from KVOH. The antenna is supposed to be a log periodic with the narrow end on two shorter supports and angling up to the taller masts seen in the photos. The target area is Central America and the Carribean. Hence the angle to the southeast. I hike in those hills often and will try to snap some closer pictures and more details.  
(Jay ibid., SW TXsite March 18)

VANUATU Vanuatu on 5054.97 kHz broadcasts non-stop music with after a end of program at 1216 UT on Mar 13 again. The condition is good. I can't receive it on 3945 kHz at 1500 UT.  
(Sei-ichi Hasegawa-JPN NDXC, dxld March 13)

VATICAN STATE 11715 Radio Veritas Asia via Santa Maria di Galeria Transmitter. Full data ( w/site indicated as 'Vatican Relay' )Spratly Islands QSL card w/schedule & Studio Postcard. V/s Ms. Arlene A. Donarber Audience relations Officer.  
(Edward Kusalik-Alb-CAN, DXplorer March 18)

#####

A REVIEW OF THE HFCC A10 CONFERENCE, by Dr. Jerry Plummer, WWCR.

The A10 HFCC Coordination Conference was held in Kuala Lumpur, Malaysia, February 1-5, 2010. The theme, or key, of the conference was "Developing Friendship."

Domestic U.S. shortwave broadcasters were represented by Tom Lucey of the FCC, George Ross and Mike Sabin of Trans World Radio (Guam) and Dr. Jerry Plummer, representing the NASB and WWCR. A total of 118 attendees were present for the Conference.

Regarding climactic conditions in Kuala Lumpur, temperatures in the Fahrenheit scale typically were 92-94 daily and 73-76 in the evenings. To me, it felt like Punta Cana, but no pool or ocean nearby. However, it was generally tolerable, and being located directly in the "Golden Triangle" of KL offered much dining and shopping activities, with a myriad of varied type restaurants, offering all imaginable types of fare-as well as a milieu of merchants, offering everything from knockoff Rolex watches to "reflexology" sessions (i.e. massages).

The meeting opened promptly at 9:30 Monday morning, and the opening included welcoming remarks by several members of the Board, including Horst Scholz of Deutsche Welle; Oldrich Cip, Chairman of HFCC and representative of Czech Radio; Geoff Spells of VT Communications; and Bassil Zoubi of Arab States Broadcasting Union. Upon completion of the opening remarks, the coordination activities began, and ran through Friday morning.

The conference room was a spacious, well-equipped area with plenty of room for all members, including room to suitably place extra chairs across each table for visiting representatives to sit and discuss collision correction.

The wireless network worked well, including external Internet access; although (as expected) peak times of activity slowed down overall speed. However, the system was usable the entire time. The print server never was operable to several representatives, but anything needing to be printed could be at the four workstations located at the back of the conference room.

A meeting was held Tuesday afternoon for the G8 representatives and Steering Board regarding the Russian contingent(s) and its requirements entries. GFC, as one group, and TRW and RAM as another group, previously separately entered requirements. If I understand correctly, one group was VOR and the other two combined for all "retail" sales to out of country leased transmitter time. GFC told the G8/HFCC group that they were now responsible for all Russian shortwave coordination activities[!!], and requested the HFCC to announce as such, and to remove all entries not posted by GFC. The HFCC, preferring to not become politically involved, declined[!!] to do so at the current time. Thus, there are 173 duplicate entries in the database.

To quote the HFCC:

Wording of the Russian Delegation for the HFCC Conference Minutes:

"The delegation of the Russian Federation gave explanations regarding 173 radio broadcasting requirements which were submitted on 01.02.2010 on behalf of the General Radio Frequency Centre (GFC) of Russia within the process of the HFCC Conference.

"The above mentioned radio broadcasting requirements fully duplicate the requirements submitted by the Radio-Agency-M Ltd. (RAM) and TV Radio Wave (TRW) organizations with the used technical facilities to broadcast radio programs from the territory of the Russian Federation . Only the name of the Frequency Management Organization (FMO) was changed in the above requirements.

"Coordination of new 173 radio broadcasting requirements was carried out

by the GFC organization at the HFCC Conference. In doing so the former requirements of the TRW and RAM organizations which were duplicated should have been ignored within the process of the HFCC Conference.

"To avoid confusion and misunderstanding in the work of the HFCC conference the delegation of Russia requested the HFCC Steering Board to delete the RAM and TRW requirements with the use of technical facilities to broadcast radio programs from the territory of the Russian Federation from the list of the requirements to be coordinated.

Answer of the SB for the HFCC Conference Minutes:

"The HFCC Steering Board thanked Alexander Stadinchuk for the detailed explanation for the duplication of requirements of RAM and TRW via facilities in Russia by GFC. However, the SB stated that it cannot accept the request to delete the corresponding RAM and TRW requirements for those transmissions from the territory of the Russian Federation. The reason for this is that both RAM and TRW are members of HFCC and the SB does not have the authority to delete requirements of any member. The SB states that the duplication of requirements significantly hampers the informal co-ordination process. On this occasion the Steering Board of the HFCC suggests to the Administration of the Russian Federation to work with the three FMOs on the territory of the Russian Federation with the aim of eliminating the duplicated requirements and to resolve this difficult problem. As RAM and TRW are not[!!] present at the joint HFCC/ASBU/ABU-HFC meeting held in Kuala Lumpur, the SB will inform them of this matter."

Coordination flowed smoothly all during the week, with no computer or network anomalies. Much interaction was noted among all members during the coordination times.

For the first time that I remember, no group dinner was held at the Conference, although a Friday afternoon tour was arranged, which included trips to the 500 metre Communications Tower, as well as KL's skyline Twin Towers. The tour also included a visit to Malaysian radio studios and a trip to a local group of craft shops.

During the conference, the Group of Experts met (Wednesday) and offered the following information on the Friday Plenary (closing) statements:

G. of E. documents will soon be placed on the website for everyone to review.

Regarding the new software showing target ID by polygon, the testing is going well. It will offer clearer and better collision calculation.

Antenna design frequency, used in the requirements file, must be filled in. It is used for calculation of collisions. A warning message will be displayed whenever a requirements file missing this information is entered.

More information regarding a new antenna program will be coming in future.

Older DOS versions of the plotting software should not be used; consider using newer software.

A list of minutes from Punta Cana of requests and their updates will be

issued shortly.

Geoff of VTC says that ITU is considering adding DRM to its system, which includes HD Radio, etc. This will be reviewed in April, 2010 for acceptance. The following items came from Geoff, also:

26 MHz DRM for local broadcasts services proposal is in the ITU pipeline.

A proposal for DSP for new receivers was not approved, but will be reviewed again in April, 2010.

G9960 includes a proposal regarding powerline devices to extend range to 200 MHz. The intention is greater bandwidth for data services, but also offers tremendous interference for many bands, outside of shortwave, too. Much discussion has occurred over this proposal.

Oldrich addressed the need to increase access to shortwave listeners, particularly via the HFCC website. Currently, the public access database is updated twice per year, and there was a vote to update the public record more regularly[!!]. The delegates approved this measure.

Regarding finances, Geoff reported that 2008 was a lean year for the HFCC, but 2009 year-end numbers indicated that things were back financially where the HFCC should be. Geoff says that this is partially because member arrearage has been paid. He noted that Czech law has changed, and there is a chance that the HFCC will be exposed to a value added tax. This must be investigated more to determine if the HFCC is applicable to this taxation law change. Results will be forthcoming.

Horst chaired the election activities, where two posts were to be voted on: Chairman and System Coordinator. Oldrich Cip was the only candidate for the former, and was unanimously elected. Gerald Theoret of Radio Canada International and Sergio Salvatori of Vatican Radio were co-elected to the System Coordinator position. Upon election Oldrich called for an increase in public awareness of the HFCC and its functions.

Oldrich noted that REE Spain, who had been absent for two years, will be back next time; and that an FMO name change was awarded for DTK changing to MDK.

It was noted again about the duplication of requirements due to the Russian situation noted above.

In closing the Plenary meeting, Oldrich thanked the ABU for hosting and orchestrating the Conference.

Einladung vom Rhein-Main-Radio-Club.

Hallo Radiofreunde.

Der RMRC hat - dank Lutz Winkler -am Samstag, dem 10. April 2010

Horst Rosiak von HCJB Quito, Ecuador - die Stimme der Anden - zu Gast.

Das Treffen am 10. April 2010 ab 1800 Uhr hrs MESZ-CEST in der  
Gaststaette Sportzentrale, Am Erlenbruch 94, 60386 Frankfurt/Main.

Zu erreichen ist die Gaststaette ueber die A661 Bad Homburg-Offenbach,  
Ausfahrt Frankfurt Ost, Richtung Eisssporthalle, Riederwald oder mit der U-  
Bahn U7 bis Schaefflestrasse. (Informationen auf der Homepage)

Eingeladen sind alle Interessierten Radiofreunde und DXer.

Dr. Harald Gabler, RMRC Vorstand (via A-DX, March 16)

Budget cuts.

NO AM broadcasts of Radio Bulgaria in 0800-1300 UT slot anymore. (wb)

Bulgarian National Radio suspends some mediumwave transmissions.

The Director General of Bulgarian National Radio, Valeri Todorov, spoke to Bulgarian MPs from the Parliamentary Committee on Culture, Civil Society and Media and introduced to them some of the anti-crisis measures [to tackle the national budget deficit of an estimated 750 million euros] undertaken by the national radio. The main focus is the temporary suspension of some of the transmissions on mediumwave in regions of the country where there is guaranteed FM reception. Mr Todorov voiced his hope that this would not inconvenience much the population in these regions.

CHILE A-10 for Voz Crista / La Voz via SGO = Santiago:

(R BULGARIA DX MIX News, Ivo Ivanov, via wwdxc BC-DX TopNews March 20)

Correction on Chilean summer time.

Commentary by Glenn Hauser-OK-USA, dxld:

I mean 4 April to 9 October are the NON-DST dates for Chile,

i.e. UT -3 hrs until April 3 and from Oct 10;

UT -4 hrs from April 4 to October 9.

(Glenn, March 20)

Spanish

"to Southern South America from Oct. 4"

[sic; the 12-23 and 23-02 schedule is really in effect from 4 April to 9 Oct. These are the DST dates for Chile, but why should that have any bearing on broadcasts to other countries originating in Miami?? Perhaps local working/office hours for staff in Chile trump everything else -- gh]

- - -

WB: so this seems correct schedule on CVC SGO transmissions:

CHILE B-09 / A-10 for Voz Crista / La Voz via SGO = Santiago:

Spanish to Northern South America

1100-2300 on 17680 SGO 100 kW / non-dir from Oct. 10

1200-2300 on 17680 SGO 100 kW / non-dir till Oct. 9

2300-0200 on 11665 SGO 100 kW / non-dir from Apr 4 till Oct. 9

2300-0100 on 11665 SGO 100 kW / non-dir till Apr 3, from Oct. 10

Spanish to Southern South America

1100-2300 on 9635 SGO 100 kW / 030 deg till Apr 3, from Oct. 10

1200-2200 on 9635 SGO 100 kW / 030 deg 14 March till Apr 3

1200-2300 on 9635 SGO 100 kW / 030 deg Apr 4 till Oct. 9

2200-0200 on 9745 SGO 100 kW / 030 deg 14 March till 28 March

2300-0100 on 6070 SGO 100 kW / 030 deg till Apr 3, from Oct. 10

2300-0200 on 6070 SGO 100 kW / 030 deg Apr 4 till Oct. 9

Alternative:

1100-1200 on 9780 SGO 100 kW / 000 deg 14 March till 3 Apr

Portuguese to Brasil in DRM mode

1800-2000 on 17640 SGO 015 kW / 045 deg from 28 March

1800-2000 on 17860 SGO 015 kW / 045 deg till 27 March

CUBA Radio Havana Cuba.

Just found the following announcement on the Radio Havana website at

<[http://www.radiohc.cu/ingles/a\\_noticiasdecuba/10/marzo/19/cuba6.htm](http://www.radiohc.cu/ingles/a_noticiasdecuba/10/marzo/19/cuba6.htm)>

"Radio Havana Cuba to Broadcast on Tropical Band.

Radio Havana Cuba will broadcast on the Tropical Band of shortwave frequencies. The international radio station's programming in Spanish, English, French, Creole and Esperanto will be heard throughout Cuba, as well as in the southern part of the United States, Central America, Mexico, the Caribbean and the northern part of South America.

Listeners will be able to tune in to Radio Havana Cuba between the hours of 23:00 UTC and 11:00 UTC the following day on 5040 kHz. "

(Alan Roe-UK, WDXC-UK, dxld March 19)

That's not new meter band for RHC, has been used in past on 5055 or 5060 too. But comes a little bit late this decade, due of increased sunspots growing on the horizon.

Two steep fountain like antenna [similar like BR Munich 6085 kHz type] visible at Quivican at

(wb, wwdxc BC-DX TopNews March 20)

Radio Havana Cuba in English with strong signal on 5040 kHz tonight as announced on their website (see below). SIO 443 at 2345 UT tune-in, with Caribbean Outlook show. Stronger than 5025 Rebelde.  
(Alan Pennington-UK, BrDXC-UK ng March 22)

Radio Havana Cuba now on the 60 metre band March 23rd, 2010 - 10:46 UT by Andy Sennitt.

Professor Arnie Coro writes on the DXers Unlimited blog  
<<http://dxersunlimited.blogspot.com/>>

"At 23 hours UTC, March 22 , Radio Havana Cuba started its national service for the Cuban archipelago on the ITU Registered Frequency of 5040 kiloHertz. The first program that went on the air was our English language service, and the "menu" continued with a program in French. March 23 UTC day (Tuesday UTC day) the 5040 kiloHertz frequency will continue to be on the air until 1100 UTC, with programming in Spanish too.

"The new national service is designed to provide coverage of the most famous Cuban tourist resorts, like Varadero Beach, Cayo Largo, Jardines del Rey, Guardalavaca, and others where last year some two million three hundred thousand foreign tourists visited to enjoy their holidays. Reports of the new transmissions began to come in immediately from the Jardines del Rey tourist resort located in the keys north of Ciego de Avila province, where signals of S=9+40 dB were picked up.

"The antenna used on 5040 kiloHertz is an NVIS system. Near Vertical Incidence Skywave radiating system, also known as a "Cloud Warmer "because it sends the signals at very high angles above the horizon, so I am not expecting many reports outside the primary target area of the broadcast. Anyway, reports will be, as always most appreciated, from anywhere the 5040 kiloHertz transmission is picked up."  
(dxersunlimited.blogspot.com via RNW MN March 23)

5040 Arnaldo Coro: " ... so I am not expecting many reports outside the primary target area of the broadcast ...

Er wird sich bestimmt ueber Post aus old Europa freuen.

"Arnaldo Coro CO2KK" <arnie@rhc.cu>

"Prof. Arnaldo Coro Antic" <coro@enet.cu> <arni@rhc.cu>

Heute frueh um 0440 UT war das 5040 Signal staerker als Rebelde 5025 kHz.

Yes, Radio La Habana de Cuba on 5040 kHz noted here in Germany at 2344 UT March 22.

Also even heard here with proper signal on my Sony ICF2010 in the sleeping room, without external antenna this morning at 0430 UT March 23. But was OFF air 5040, when checked at 0555 UT today again.

Instead heard Radio Rebelde La Habana de Cuba as usual on 5025 kHz as well as US religious WWCW 4840, and probably under heavy CODAR signal WWRB 5050.

6140 International news in English from Radio La Habana de Cuba at 0605 UT March 23, S=9+20dB, "... anti US war protest rallies in California ...", "... we think always of Vietnam and Afghanistan war ...".

6150 Similar signal of Spanish service from Radio La Habana de Cuba at 0615 UT March 23, but heavily hit by neighbour Moosbrunn Austria powerhouse on 6155 kHz, latter S=9+40dB. No signals of RHC noted in 31 mb at same time slot, due of poor propagation?  
(wb, wwdxc BC-DX TopNews March 22)

5040 Genau um 2345 UTC habe ich gestern auf 5040 diesen Sender auch gehoert und die oefter namentliche Nennung von Cuba; lt. Geocities-Frequenzliste sind nach ITU-Landeskenner Stationen aus IND - CHN - GEO - INS - EQA auf der QRG aktiv, und passend zur Sendezeit kann es dann auf 5040 kHz von 2230-0130 UT aus Ecuador die Voz del Upano in Spain aus der Sendestation Macas in EQA gewesen sein - wo innerhalb der Sendung neben English auch in French gesprochen wurde!  
(Theodor Averbeck-D, A-DX March 23)

Das letzte mal vor 3 Jahren unter dem Namen "Radio Difusora Catolica Cultural" als aktiv gemeldet ... Die Aoki-Liste ist unbestritten eine tolle und aktuelle Liste was Auslandsdienste betrifft. Im Tropenband finden sich aber unzählige Karteileichen von Stationen die schon seit Jahren nicht mehr aktiv sind. Auf 5040 kHz senden auch schon lange keine Stationen aus INS und GEO mehr. Fuer Inlandsdienste/Tropenband sind das WRTH oder die Domestic Broadcasting Survey des DSWCI bessere Nachschlagewerke.  
(Patrick Robic-AUT, A-DX March 23)

CZECH REP Fuer unsere Sendungen um 12 Uhr und um 18 Uhr 30 MESZ, also um 10 Uhr und um 16 Uhr 30 Weltzeit, gelten ab der Zeitumstellung am kommenden Sonntag neue Frequenzen. Um 10 Uhr UT Weltzeit empfangen Sie unser Programm auf 6055 Kilohertz im 49-Meterband. Um 16 Uhr 30 UT Weltzeit, das ist die Ausstrahlung ueber die Sendestation Sines in Suedportugal, gilt ab Sonntag die Frequenz 11700 Kilohertz im 25-Meterband. Wir hoffen, dass unser Programm auch in Zukunft bei Ihnen in guter vielleicht sogar noch in besserer Qualitaet ankommt.

Eine weitere Ankuendigung muessen wir machen. Wegen Wartungsarbeiten an unserer Hauptsendestation im ostboehmischen Litomysl wird es im

Sommersendehalbjahr jeweils einmal im Monat zu einem eintaegigen Ausfall dieser Sendestation kommen. Zum ersten Mal wird dies am 21. April der Fall sein. Fuer Sie bedeutet das, dass Sie Radio Prag an den entsprechenden Tagen nur um 18 Uhr 30 MESZ, also um 16 Uhr 30 Weltzeit empfangen koennen. Das ist die Sendung, die ueber die Station Sines in Portugal ausgestrahlt wird. Wir werden Sie aber selbstverstaendlich noch einmal zeitnah in unseren Sendungen ueber den wartungsbedingten Ausfall des Senders Litomysl informieren.

As you can see, most of frequencies for transmissions to Russia and Europe were changed in opposite to the previous summer seasons. I have my doubts that these changes are apt because of possible considerable interferences.

Real schedule can be changed taking into consideration the financial troubles. First of all it concerns the [high] power transmission to North America, which from February 22 has been shortened by one hour at 0400-0500 UT (the second English language transmission to North America). (Alexander Yegorov-UKR, dxld March 20)

(Alokesh Gupta-IND, wwdxc BC-DX TopNews March 20)

USA Nothing, not even a carrier of WRNO noted 7505.64v kHz at 0600 UT.

6030 R Marti in Spanish on Chilean terremoto with much stronger 500? kW powerhouse Greenville at S=9+40dB level.

UNID 6019.27 signal in Spanish, S=8 at 0613 UT. R Victoria, Peru ?  
(wb, wwdxc BC-DX TopNews March 22)

5080 WTWW, Lebanon, at 0350-0420 on March 20, English, OM religious talks, more short talks with mentions of their SW frequencies, Russia (as target area), local stations of Ohio and WWCR - fair and slightly better in USB.  
(Mikhail Timofeyev-RUS, DXplorer March 22)

WJHR has been broadcasting ILLEGALLY.  
Glenn, In DXLD and elsewhere, WJHR Milton FL has been reported with what would appear to be programming.

FCC rule 73.712(a) limits an international broadcast station conducting equipment tests to voice ID and tones only.

<<http://www.hallikainen.com/FccRules/2010/73/712/>>

I inquired to the FCC about the status of this station. The Commission responded that this station has a construction permit and has not filed an application for license. The station can only do equipment tests, not actual programming, until a license application is filed and program test authority (PTA) is granted. PTA and licensed operation must be at 50 kW PEP.

#####

KLINGENFUSS + PERSEUS + WAVECOM

Dear friends,  
"Your frequency lists are incredibly good." says Dennis Brewer from IBB's RFA relay station at Udorn, Thailand. For more recent references see

below.

Our critical 8-pages PERSEUS User Test is now available in English as well, see

<<http://www.klingenfuss.org/persuser.pdf>>

For 2010 we again offer a Klingenfuss frequency database - including both broadcast and utility radio stations worldwide! - for the MICROTELECOM PERSEUS. Package prices with other products are available. See our website for full details and hundreds of up-to- date sample screenshots from real radio monitoring.

The superb WAVECOM W-CODE Digital Data Decoder works perfect with software-defined radios (SDRs) such as the PERSEUS. The cost of around 10,000 EUR for one basic radio monitoring post, comprising a PERSEUS and a WAVECOM, is simply ridiculous. Hundreds of brandnew screenshots of digital data radio stations can be found on our website.

The new W-CODE software released on 17 March 2010 now features a digital media player and recorder similar to that of the PERSEUS. This tool records signals directly to WAV files from the host sound card inputs. During playback, the signal is sent unprocessed to the W- CODE, and a monitoring signal is played through the sound card.

Agilent - a Hewlett-Packard spinoff and the world's premier measurement company - selected the revolutionary W-CODE Digital Data Decoder as the core of its new E3238S/N6820E Signal Survey System. For details see

<<http://cp.literature.agilent.com/litweb/pdf/5989-2837EN.pdf>>

The new 2010 catalogue plus full A4 size sample pages of all our printed publications, and much more, can be downloaded from our website. Simply click the PDF or GIF symbol!

-

Recent reviews of our new 2010 products.

Helmuth W Kump KT3L, United States of America - 24 February 2010: "Passport to World Band Radio in Limbo ... I have found a worthy salve for my gaping Blue Pages wound, in the Klingenfuss 2010 Shortwave Frequency Guide, but at a somewhat dear price ... This is an excellent resource which includes utility stations and lots of supplemental information, including schedules by broadcaster as well as by frequency. You get what you pay for: the physical quality of the book is excellent. It will lie flat, and it's easy-to-read, with high-quality pages that can be thumbed through quickly. I highly recommend you view the online sample before purchasing to see if it is your cup of tea. Klingenfuss also offers its manuals in CD-ROM format, and although I have not tested this, you should be able to produce custom listings by filtering on language, time, country, etc."

John Collins, United States of America - 22 February 2010: "2010 Shortwave Frequency Guide ... 2010 Super Frequency List on CD ... 2009/2010 Guide to Utility Radio Stations ... Radio Data Code Manual ... The books and CD's are, as we have come to expect, are simply fabulous very nice work!"

Willi Fuehles, Germany - 22 February 2010: "2010 Shortwave Frequency Guide ... Ich war viel im Ausland und habe jetzt als Rentner wieder Zeit zum Radiohoeren. Bei den beiden anderen da hat die Qualitaet doch stark nachgelassen, haben die keine Fachleute mehr oder sind die alle schon gestorben? Ihre Buecher waren schon immer sehr genau, die konnte man noch nach Jahren in die Hand nehmen und verwenden."

Thieu Mandos NL199, NL-Post editor of VERON, in Electron, Netherlands - February 2010: "2009/2010 Guide to Utility Radio Stations ... standaardwerk voor de utility luisteraar. Een onvoorstelbare hoeveelheid details van de radiostations die je kunt beluisteren is te vinden in dit boek. Stations die werkelijk van over de geheles wereld komen. Interessant zijn ook de screenshots die het decoderen van diverse stations tonen, leuk te zien dat daar gebruikgemaakt wordt van de Perseus SDR-ontvanger en van WAVECOM decoders. Voor uitleg en de achtergrondinformatie moet je wel het boek erbij hebben. - 2010 Shortwave Frequency Guide ... Hiermee zijn de stations goed te identificeren of kun je op jacht gaan naar een van de stations. - 2010 Super Frequency List on CD ... voor wie echt alles wil weten van de kortegolf. Een enorme database dus met snelle zoekmogelijkheden."

John Collins, United States of America - 3 February 2010: "2010 Shortwave Frequency Guide ... 2010 Super Frequency List on CD ... 2009/2010 Guide to Utility Radio Stations ... Radio Data Code Manual ... Thank you for the speedy service - very nice to see! Keep up the outstanding production!"

Maciej Zycinski, Poland - 29 January 2010: "2010 Super Frequency List on CD ... Thank you very much for your e-mail confirmation and prompt shipment. I do hope to have a lot of enjoyment ... It is very encouraging to see that there are still some companies taking their business (and their customers) very seriously."

Peter Le Quesne ZL4TCC, New Zealand - 26 January 2010: "2010 Shortwave Frequency Guide ... 2009/2010 Guide to Utility Radio Stations ... some 25 years ago when I lived in Dunedin, I was in contact with you and bought several of your publications which I still have."

Harald Kuhl, Buchbesprechungen editor of Radio-Kurier Weltweit Hoeren, Germany - February 2010: "2010 Shortwave Frequency Guide ... 2010 Super Frequency List on CD ... Konzentration auf das Wesentliche und eine moeglichst effiziente Datenpraesentation sind die beiden Maximen, denen dieses fuer Wellenjaeger empfehlenswerte Werk konsequent folgt."

Dennis Brewer, United States of America's Broadcasting Board of Governors, Radio Free Asia, Relay Station Udorn, Thailand - 18 January 2010: "2010 Super Frequency List on CD ... Your frequency lists are incredibly good."

Anker Petersen, Chairman of Danish Shortwave Clubs International, in Shortwave News - January/February 2010: "2010 Shortwave Frequency Guide ... a comprehensive shortwave frequency list which for each frequency contains a line for each broadcast, practicably arranged in time order within each frequency. That includes exact times, transmitter site, language and target area. I prefer the Shortwave Frequency Guide when I scan the shortwave broadcast bands. In mid- December 2009 I listened to 50 broadcast stations at random in frequency band and time and identified them 100 %, no matter what language, and made a comparative analysis. WRTH

95 % correct, 2010 Shortwave Frequency Guide 96 % correct. - 2010 Super Frequency List on CD: This modern tool is very easy to use on a PC using Microsoft Windows and has excellent search functions for specific frequencies, countries, stations, languages, call signs and times - or any combination thereof!"

Mike Richards G4WNC, Decode editor of Radio User, United Kingdom - January 2010: "2009/2010 Guide to Utility Radio Stations ... time to turn to your trusty frequency guide. I use Klingenfuss as my main reference for two reasons - it's regularly updated and it allows you to look up utilities in several different ways."

H van Heteren PE2VHE, Netherlands - 15 December 2009: "... many, many thanks for making a frequency database for the Perseus SDR!"

Alfredo Gallerati IK7JGI in Associazione Radioamatori Italiani's Radio Rivista, Italy - December 2009: "2010 Shortwave Frequency Guide ... Personalmente l'acquisto ormai da anni perche agile e funzionale nella consultazione della immensa raccolta di orari, stazioni, frequenze, siti di trasmissione, e molti altri dettagli."

Best wishes, Joerg Klingenfuss

## Radio Recording Archive

Hallo an alle,  
fuer alle, die sich fuer Mitschnitte von Radiostationen interessieren,  
gibt's hier eine neue Fundgrube mit ca. 400 historischen und aktuellen  
Stationen:

<<http://home.arcor.de/radio-archiv>>

Vor einigen Wochen durchforstete ich mein gesamtes Audioarchiv und entdeckte auf diese Weise so manchen historischen Schatz.

Ich begann mit der Aufzeichnung von Radio-IDs im Jahre 1969. Damals benutzte ich ein UHER-Tonbandgeraet mit 18er-Spulen. Irgenwann in den 80ern koptierte ich dann alles auf Kassetten, und vor gut 10 Jahren landete das Archiv in digitalisierter Form auf dem PC. Leider sind einige Aufnahmen dadurch nicht besser geworden. 40 Jahre hinterlassen eben Spuren ...

Die Webseite kann noch ein paar Fehler enthalten. Wer einen nicht funktionierenden Link entdeckt, kann dies mich gerne wissen lassen.

Viel Spass beim Hoeren

(Michael Schnitzer-D, A-DX March 12)

30 Jahre Kurzwellenhoererklub Murgtal in Ottenau

29. ueberregionales DX-Treffen des Ottenauer Kurzwellenhoererklubs Murgtal und RTI Hoererklubs Ottenau.

Am Samstag, 8. Mai 2010 findet ab 1300 Uhr MESZ im neuen Versammlungslokal Gasthaus Strauss, (Telefon 07225-984070), in der Marxstrasse 12 in D-76571 Gaggenau-Ottenau das

29. ueberregionale DX-Treffen fuer Kurzwellenhoerer und DXer im Raum Murgtal, Offenburg, Karlsruhe und Bretten statt.

Verbunden wird dieses Treffen wie schon in den letzten Jahren wieder mit dem Hoerertreffen des Radio Taiwan Hoererklubs Ottenau. Zu dieser Veranstaltung sind natuerlich alle Kurzwellenhoerer, DXer und Freunde des Rundfunkfernempfangs aus dem angesprochenen Gebiet und natuerlich auch darueber hinaus sehr herzlich eingeladen, unabhaengig einer Klubmitgliedschaft.

Organisator dieses Treffens ist auch in diesem Jahr wieder der Kurzwellenhoererklub Murgtal  
c/o Bernd Seiser  
Hauptstrasse 205-207  
D-76571 Gaggenau-Ottenau  
Bundesrepublik Deutschland  
Telefon 07225 981213

Auf dem Programm des Treffens steht ein Rueckblick ueber die hobbybezogenen Ereignisse in den letzten 12 Monaten in unserer Region, eine kleine Tombola und das bekannte Stationsquiz. Weiterer Programmpunkt ist das Jahrestreffen des RTI Hoererklubs Ottenau, an dem auch in diesem Jahr wieder die RTI Redaktionsleiterin Chiu Bihui teilnehmen wird und uns ueber die aktuelle Situation bei Radio Taiwan International informiert. Geplant ist auch diesmal wieder eine telefonische Verbindung mit dem Studio in Taipeh herzustellen.

Auch der Radio Japan Club Brilon nimmt an diesem Treffen teil, ebenso haben sich Mitglieder weiterer Hoererklubs schon angemeldet. Wie in jedem Jahr geben wir auch diesmal wieder einen Ausblick auf bevorstehende Hobbyaktivitaeten in unserer Region.

Der RTI Hoererklub Ottenau veranstaltet auch zu diesem Treffen wieder eine Diplomaktion, bei der eine Sendung von RAE aus Buenos Aires in der Zeit vom 5. April bis 4. Juni 2010 auf 15345 kHz und die Hoererbriefkastenprogramme von Radio Taiwan International am 30. April und 7. Mai auf Kurzwelle 6185 oder 3965 KHz zu hoeren sind.

Das von Hoererklubmitglied Rudolf Koehler gestaltete Diplom gibt es bei Hoererklubsekretaer Christoph Preutenborbeck per email kostenlos unter <preuti @ aol.com> oder in gedruckter Form in mehreren Preislagen gegen Beilage von 2 Euro

fuer die Bundesrepublik und 3 Euro fuer das europaeische Ausland fuer  
Diplome auf sehr gutem Papier oder gegen 4 Euro fuer die Bundesrepublik  
und 5 Euro fuer das europaeische Ausland auf sehr festem Diplompapier an:

Christoph Preutenborbeck  
Strasserhof 20  
D-51519 Odenthal  
Bundesrepublik Deutschland.

Der Tagungsort ist am besten zu erreichen ueber die Autobahnausfahrt  
Rastatt. Von dort auf die Bundesstrasse 462 bis zur Ausfahrt Gaggenau-  
Mitte. Nach der Ausfahrt nach links ueber die Murgbruecke bis zur Ampel,  
von dort nach rechts auf die Hauptstrasse einbiegen und weiterfahren, bis  
zur zweiten Bruecke. Ueber die Lindenbruecke wieder die Murg ueberqueren,  
dann ist auf der rechten Strassenseite auch schon das Gasthaus zu sehen.  
Wir hoffen auch einige neue Hoererklubmitglieder hier persoendlich  
kennenzulernen und uns schon bekannte Mitglieder wiederzusehen.

Weitere Informationen zum Treffen gibt es auch im RTI Hoererbriefkasten am  
7. Mai. Auch in der Tuerkei live Sendung von TRT am 6. oder 7. Mai  
koennten noch aktuelle Informationen vor dem Treffen bekannt gegeben  
werden. Mit der Bahn anreisende Besucher fahren aus Richtung Karlsruhe mit  
der Linie S 41 in Richtung Forbach-Freudenstadt bis zur Haltestelle  
Ottenau. Von der Haltestelle zu Fuss in Richtung Bahnuebergang gehen, nach  
rechts an der Kirche vorbei ueber die Lindenbruecke bis das Gasthaus schon  
zu sehen ist.

Uebernachtungsmoeglichkeiten bestehen unter anderem im Hotel Nachtigall in  
Gernsbach, Telefon 07224 2129 und Fax 07224 69626, im Hotel Krone in  
Gaggenau-Selbach, Telefon 07225 5779 sowie beim Gaestehaus Lauer in der  
Beethovenstr. 25 in Ottenau, Telefon 07225 697159.

Am selben Tag findet auch von 0800-1400 MESZ wieder auf dem ueberdachten  
Festplatz bei Sportplatz der 36. Amateurfunk, Computer und  
Elektronikflohmarkt in Baden-Baden Sandweier statt. Der Eintritt ist frei,  
Standgebuehr 5 Euro. Der Anfahrtsweg zum Flohmarkt in Sandweier ist ab  
Autobahnausfahrt A5 Raststaette Baden-Baden / Autobahnkirche  
ausgeschildert. Weitere Infos unter: <webmaster @ a03.de>

Mit freundlichen Gruessen, Bernd Seiser.  
(March 19)

#####

ALBANIA Today RT Shijak 13755 kHz had a tiny signal here in the skip zone. Only 4 diodes of ten, shining on Sony ICF2010. When Kuwait started at 1500 UT at back lobe of 46 degrees, all 10 diodes on Sony shined brightly. So hopes, that RT signal was much better from Maine to Texas.

Traced RT Shijak site on new 13755 kHz in 1420 to 1500 UT slot today ... just free 13745, 13750, 13755 channels, and fine selection. 13760 at 1428 UT noted Pyongyang KRE, but as expected S=7 only tiny in EUR, NOT ANOYING to hit RT signal in the northwest path.  
(wb, wwdxc BC-DX TopNews March 28/29)

Further R. Tirana A-10 monitoring: March 30 at 2000 no signal on 13640 kHz, finally came on at 2005 UT after one brief false start, then joined English program in progress.

March 31 at 0031, 9860 opening English, good signal better than yesterday. Surprised at next check 0050 to find it still going in what is supposed to be a 15-minute broadcast. Maybe it started over at 0045 as I recall noticing on the webcast. Now there is adjacent QRM from at least as strong 9855, which is IBB SRI LANKA, 250 kW at 20 degrees, 0000-0100. Not sure when Tirana went off, but before 0100. 0230 on 7425, poor reception.

The 1430 broadcast on 13755 overlaps a bit with its successor, CRI at 1500 UT. March 31 at 1457 UT just as R. Tirana was saying its broadcast was ending, on came stronger carrier causing a rippling subaudible heterodyne, with Chinese lessons in English, which often occupy the final few minutes of CRI hours.

Overlap was less than a minute with R. Tirana's closing theme, so not a major loss and not worth changing frequency because of. Then CRI cut audio and stayed on open carrier until 1500 UT timesignal, IS and opening in Chinese. This is 308 degrees from Kashgar to Europe, but also US.

CUBA Neben den ueblichen 5025, 5040, 6060, 6140, 6150 kHz von RHC um 0400-0500 UT, auch 9790 mit CRI Beijing via Quivican relay in CANTONESE, S=7-8. RFI Issoudun ist jetzt um diese Zeit noch in der Toten Zone.

UNID 6110, acc to Glenn another Cuba channel. Ein Log von heute morgen mit ganz ungewoehnlicher Lautstaerke. Gleich stark mit RHC 6060 und 6140 um 0400 bis 0500 UT. Mit ganz rauher aber sehr gut verstaendlicher Modulation. Von der Klangfarbe des Spanisch her bestimmt ein Lateinamerikaner. Die Frequenzmessung lag fast bei 6110 even. S=9+15 dB. Vielleicht auch nur eine Sonntagsaussendung lokaler Zeit. Muss ich mal weiterhin beobachten.

Um 0500 UT geht dann nichts mehr, wegen NHK R Japan via Sackville im Kanal.

(wb, wwdxc BC-DX TopNews March 29)

11970 RHC in Sp, phone in at 0030-0040 UT, S=7-8 in Germany. Also 11760 RHC S=9+25dB, 11690 S=9+10dB. Sport news on Olympic champions.

(wb, wwdxc BC-DX TopNews Apr 1)

CYPRUS 13885-13914 approx. British Airforce Cyprus OH radar at 1635 UT.

(wb, wwdxc BC-DX TopNews March 29)

9922 to 9951 kHz, wide range British Airforce OHR signal at 0040 UT.

S=9+20dB.

(wb, wwdxc BC-DX TopNews Apr 1)

CZECH REP Wegen Wartungsarbeiten an der Hauptsendestation im ostboehmischen Litomysl wird es im Sommersendehalbjahr jeweils einmal im Monat zu einem eintaegigen Ausfall dieser Sendestation kommen. Zum ersten Mal wird dies am 21. April der Fall sein.

An den entsprechenden Tagen ist das deutsche Programm von Radio Prag dann nur um 1630 UT (MESZ 1830 hrs) Uhr auf 11700 kHz zu empfangen. Das ist die Sendung, die ueber die Station Sines in Portugal ausgestrahlt wird. Die Hoererschaft soll zeitnah in den Sendungen ueber den wartungsbedingten Ausfall des Senders Litomysl informiert werden.

(Radio Prag <[www.radio.cz/de/artikel/126221](http://www.radio.cz/de/artikel/126221)> via Paul Gager A-DX ntt)

5905 is Radio Liberty Lampertheim 1700-1800 UT 100 kW in direction of  
108 degr. In previous summer 2009 used for VOA Kurdish.  
(wb, wwdxc BC-DX TopNews March 29)

An update in regard to the transmitter site at Wiederau near Pegau, once  
known as "Leipzig" (which now would be ambiguous since Wiederau is no  
longer the only transmitter site in Leipzig area):

The older, 236 m tall mast is no longer in use and will soon be  
demolished. This was the original "J1" mediumwave antenna, later also used  
for FM and VHF TV. Problems with the insulator forced them to give up this  
mast for MW around 1985, leaving only two triangular hammock antennas for  
the 100 kW mediumwave transmitters. The mast fell completely silent when  
the ch. 9 transmitters left the air in Dec 2005, after FM had already

moved to the newer 212 m mast, originally built for UHF (which is no longer here either, moved for DVB-T service to a smokestack within Leipzig).

<<http://www.janbalzer.de/wiederau/3771.jpg>>

Doomed J1 is the left one.

As well-known shortwave from Wiederau ceased in autumn 1993. The four rhombic antennas (every one about 100 x 300 m in size) have since been removed, like the building with the Funkwerk Koepenick transmitter than was in use since 1972. Only the (emptied) building of the wartime transmitter still exists.

<<http://janbalzer.gmxhome.de/wiederau/kurz.htm>>

(pictures are larger than embedded there)

Mediumwave: During the not too distant past (let's discuss GE75 times only) the equipment consisted of two 100 kW transmitters, a Lorenz from 1939 and a Funkwerk Koepenick from 1963 (which had replaced the oldest transmitter). Until summer 1989, when the new 1323 kHz facility at Wachenbrunn came into operation, the transmitters were in use on 531 and 1323 kHz. They had a preference for using the Koepenick on 531, since its modulation was noticeably better, but there was no fixed allocation.

Lorenz transmitter with SRW 357 PA tubes, made by Werk fuer Fernsehelektronik, same ones than in 250 kW Funkwerk Koepenick transmitters as well as the 750 kW (which was a 3 x 250 kW amplifier)

LW at Zehlendorf:

<<http://www.janbalzer.de/wiederau/19100022.jpg>>

<<http://www.janbalzer.de/wiederau/19100019.jpg>>

<<http://www.janbalzer.de/wiederau/19100023.jpg>>

Funkwerk Koepenick transmitter with vapotron PA tubes:

<[http://www.janbalzer.de/wiederau/1992\\_1.jpg](http://www.janbalzer.de/wiederau/1992_1.jpg)> (Lorenz in background)

<<http://www.janbalzer.de/wiederau/19100013.jpg>>

<<http://www.janbalzer.de/wiederau/19100014.jpg>>

<<http://www.janbalzer.de/wiederau/19100015.jpg>> (5 kW pre-stage)

<<http://www.janbalzer.de/wiederau/19100016.jpg>> (mod pre-stage)

<<http://www.janbalzer.de/wiederau/19100020.jpg>>

Operation of these transmitters, after 1998 only occasionally, ceased in 2001. Until the very end both transmitters were operational and used alternately. The Koepenick was on air for the last time on 13 June 2001 (13:00 til 15:00 CET), the Lorenz on 19 Juni 2001 (08:25 til 11:25 CET). At present both transmitters still sit at their places.

Question: Which broadcasting transmitter of this age (let's say pre-1945) was elsewhere on air after June 2001?

Also the two antennas had been used on both frequencies alternately. They were fed via 50 ohms cable. For 1323 kHz the antenna tuning was a downconversion on at least one antenna, which on this frequency had just 22 ohms. (Contrary the J1 had on 531 kHz about 1000 ohms.)

The old mediumwave facilities had been rounded up by a Lorenz 5 kW transmitter, run on 729 kHz with Messewelle from Leipzig studios during the trade fairs and Berliner Rundfunk for the rest for the year:

<<http://www.janbalzer.de/wiederau/19100024.jpg>>  
<<http://www.janbalzer.de/wiederau/19100025.jpg>>  
<<http://www.janbalzer.de/wiederau/19100026.jpg>>  
<<http://www.janbalzer.de/wiederau/19100027.jpg>>  
<<http://www.janbalzer.de/wiederau/19100028.jpg>>

This transmitters used a self-radiating 51 m mast as antenna.

Since 1998 the main transmitter for 783 kHz, which three years later became the only one at all, is a Thomson M2W that sits in the original FM/VHF transmitter building. See at bottom of  
<<http://janbalzer.gmxhome.de/wiederau/mittel.htm>>

... which indeed provides about the best possible views, the sight is basically just that of some metal plates, with the air vents being the only clear indication that this *\*is\** the transmitter. A new antenna has been provided with the M2W, very similar to the now removed ones of the old transmitters:  
<<http://www.janbalzer.de/wiederau/3800.jpg>>

These antennas are an East German staple, but I never saw them on photos of transmitter sites abroad, with the only exception being the Koepenick-built Pleven in Bulgaria. Any comments on this aspect?

Besides this the M2W can also use the above mentioned 51 m mast at reduced power of 20 kW, which is what this standard design permits. This happens not too seldom, just every time work on the main antenna takes place.

Perhaps you remember that Mitteldeutscher Rundfunk decided in 1995 to use 783 instead of 531 kHz from Wiederau. 531 was a very good daytime frequency, one would have guessed rather 300 than 100 kW for it. 783 is noticeably poorer, and at night things become really bad. Perhaps you remember my reports about a 1 kHz het, which turned out to originate from Syria. Just 90 km away from a 100 kW station! Of course the DCC system does not help by making such interferences more prominent, lacking the full carrier in pauses, but still quite some people think that MDR should better have ridden out the Beromuenster co-channel situation, since now this problem would have been evaporated.

For FM/TV see  
<<http://janbalzer.gmxhome.de/wiederau/fmtvtx.htm>>

At top the current FM transmitters in the former UHF building, below the test cards the TV transmitters that have now all been removed.

In the pre-1990 era most FM/TV equipment originated from Funkwerk Koepenick, plus some own construction, plus some added Zarat (Poland) equipment. Feeds came in via microwave (in place for TV anyway), also for the MW/SW transmissions, with cable connections being only a back-up. (Kai Ludwig-D, dxld March 20)

SWR-cont.ra hat den Mittelwellensender Ulm (Jungingen) von 711 nach 1413 kHz verlegt. Die alte Frequenz wurde am 8. Maerz 2010 abgeschaltet, die neue am 10. Maerz 2010, 09.30 Uhr, in Betrieb genommen. Zugleich wurde die Sendeleistung auf 1 kW reduziert. Die SWR-Mitteilung verspricht den Ulmern "einen deutlich besseren Empfang", doch die Frage ist nun, wie sich die neue Ulmer Frequenz 1413 kHz neben den starken Signalen der

Deutschlandfunk-Mittelwelle Heusweiler 1422 kHz behaupten wird.

Die Trennung der Frequenzen von Heilbronn und Ulm ermöglicht den Beginn von DRM-Testsendungen aus Heilbronn (Obereisesheim), der fuer das zweite Quartal 2010 vorgesehen ist. Dabei wird weiterhin das Programm SWR cont.ra abgestrahlt. Zur nun aufgelosten SWR-Gleichwelle 711 kHz gehoerten bis 1999 und 2004 auch die stillgelegten SDR-Mittelwellenstandorte Bad Mergentheim (Loeffelstelzen) und Heidelberg (Dossenheim). Die Mittelwelle 1413 kHz wurde frueher von den SDR-Sendern Bad Mergentheim (Am Kettenwald), Buchen-Wallduern (Hainstadt), Wertheim (Oberer Haag) sowie Heidenheim (Schloss Hellenstein) genutzt oder zumindest so koordiniert. Damit konnte man die Versorgung im Norden Baden-Wuerttembergs sicherstellen, da der Grundsender Muehlacker in Richtung Baltikum und DDR seine Leistung drastisch einschraenken musste.

SWR cont.ra hat nach dem Ulmer Frequenzwechsel folgende terrestrischen Frequenzen:

UKW 91,5 Stuttgart rund um die Uhr.

576 (Muehlacker 100 kW) rund um die Uhr fuer "Baden-Wuerttemberg, Bayern, Suedhessen, Elsass".

666 (Rohrdorf 100 kW) 5.00 (Sa So 7.00)-23.00 Uhr fuer die "Bodenseeregion".

711 (Heilbronn-Obereisesheim% 5 kW) rund um die Uhr.

828 (Freiburg 10 kW) 5.00 (Sa So 7.00)-23.00 Uhr fuer "Suedbaden, Nordwest-Schweiz".

1017 (Wolfsheim 100 kW) rund um die Uhr fuer "Rheinland-Pfalz, Suedhessen".

1413 (Ulm-Jungingen 1 kW[at present on test 600watt]) ab 10. Maerz rund um die Uhr.

1485 (Baden-Baden 1 kW) 5.00 (Sa So 7.00)-23.00 Uhr.

(all local time MEZ/MESZ CET/CEST)

Auffaellig ist die naechtlige Sendepause bei den alten SWF-Standorten, waehrend die alten SDR-Standorte auch nachts durchsenden. Besonders nett ist folgender Hinweis auf der Frequenzseite

<[www.swr.de/contra/-/id=7612/nid=7612/did=5568236/1am91ht/index.html](http://www.swr.de/contra/-/id=7612/nid=7612/did=5568236/1am91ht/index.html)>

"Am Besten schalten Sie SWR cont.ra natuerlich gleich hier im Internet (Webradio) ein."

(ntt via Dr. Hansjoerg Biener-D, March 28)

% Die Antenne in SWR Obereisesheim wurde schon angepasst und getestet. Eine Menge der Leistung wird ueber Widerstaende verbraten. (wb)

In Heusweiler (SR fr DLF) wurde fuer DRM-Betrieb ein separates Anpassnetzwerk im Masthaus errichtet. Das enthaelt auch einen grossen Widerstand, der Leistung verbraet, um die Antennenimpedanz breitbandig genug konstant zu halten. Deshalb wird es nur bei DRM-Betrieb verwendet. DRM finde ich interessant, irgendwie ist diese Technik aber noch nicht ganz ausgereift.

(Bernhard Weiskopf-D, wwdxc BC-DX TopNews March 21)

GREECE Fuer die vielen Freunde vom Radio Filia Programm ueber Kurzwelle.

Ja Danke, da fuehle ich mich auch angesprochen und gleich raetseln darf warum ich am Sonntag das englische Programm auf 9420 kHz hoerte. Vermute

das die Auflistung unvollstaendig ist.?

Auszug von meinem A-DX-Posting vom Sonntag:

\*PS: Athen in Englisch von 1300-1400 UT auf 9420 kHz.

GREECE: VOICE OF GREECE (11645 kHz) SW  
A-10 RADIO FILIA (665 kHz) AM  
FOREIGN LANGUAGE BROADCASTS (0500-1000 UT)  
(Effective March 28 to October 31, 2010)

Nur 665 kHz [und Livestream, wb.] Gesamtliste - bzw.  
auch 11645 kHz Uebernahme

UT MONDAY THRU FRIDAY

0500-0600 BBC English Program

0600-0700 RFI French Program

0700-0800 Spanish Program

0800-0830 German Program\*

0830-0900 Russian Program\*

0900-1000 Greek Program\*

\*Not on Tuesday.

UT SATURDAY AND SUNDAY

0500-0530 French Program

0530-0600 Spanish Program

0600-0630 German Program

0630-0700 Russian Program

0700-1000 Greek Programs

(Compiled by John Babbis, Silver Spring-MD-USA, March 31)

Hier die Gesamtliste von Radio Filia auf MW Athens 665 kHz / Livestream,  
die ich von John aus MD bekam.

Paul, wenn Du um 1300 UT an Sonntagen English Programme auf 9420 und 15630  
kHz hoerst, sind das pure ERT English oder EN/GR gemischte Programme, die  
nichts mit den Radio Filia Uebernahmen zu tun haben. Siehe WRTH p.444,  
dort scheint auch nachts noch eine 0105-0205 Sendung auf, (?sommers 0050-  
0105?). Alles etwas unuebersichtlich.  
(73 wb, to Paul Gager-AUT, A-DX March 31)

RADIO FILIA A-10 - Good afternoon,  
here is my English version of Radio Filia's A-10 Program Schedule. Please  
notice that on Saturday and Sunday, the Albanian, English, French, and  
Spanish Programs are on for only 30 minutes, whereas on weekdays they are  
on for 1 hour.

Regards, John Babbis

(Jose Jacob-IND, DXindia March 29)

Partha Sarathi Goswami spoke with the transmitter engineer for AIR Kohima 4850. He was very pleased and appreciated our listening habits, but he said that it's a very sad experience that the power supply is irregular for the shortwave transmitter and the insufficiency of the staff are the main problems in running the shortwave transmission regularly. He also admitted that he likes very much when listeners write from Oslo or USA and also said that they do verify the reports with QSL.

(Union of Asian Dxers, Sri Lanka, via WDXC Contact April magazine)

INDONESIA 9525.87 kHz VoINS Cimanggis heard on tiny level at 1000 UT s-on.

(wb, wwdxc BC-DX TopNews March 29)

IRAN [non] "Dengi Kurdistani Iran" prgr. 1 observed s/on 0257 and cl/d 0333 UT on 3929 (jumping to 3914-3932 kHz range to avoid the jammer."Dengi Kurdistani Iran" prgr2 s/on 0304 UT and cl/d 0335 UT on stable 4880 kHz not jammed. The transmissions were shortened, not as earlier as 1-1/2 hour duration - all on March 25th, but on March 27th s/ons were at 0157 UT and 0204 UT resp., maybe due to the DST in Iran?

(Rumen Pankov-BUL, wwdxc BC-DX TopNews March 29)

IRIB Arabic service on usual ODD 13789.95 kHz at 0636 UT / 0530-1430 UT slot.

15240 IRIB, phone-in in Arabic, IS at 1155 UT, S=9+20dB. Puzzled me first at 1155 UT, TX is on air very early, - later scheduled regularly for Hebrew-Ebri service to Israel at 1200-1230 UT.

15150 terrible mixture of IRIB Arabic at 0645 UT, + co-channel B-09 IBB  
Mandarin + CHN echo jamming. [IBB season schedule ends on last winter  
Sunday morning around 0700 UT summertime]  
(wb, wwdxc BC-DX TopNews March 29)

ISRAEL 13850 Kol Israel in Persian heard with fair side lobe signal.  
Unjammed from IS before 1400 UT til 14.07:50 UT, when a poor Iranian army  
jammer started with tiny bubbling. Latter on odd 13849.95..94 kHz, means  
50-60 Hertz buzz too.  
(wb, wwdxc BC-DX TopNews March 29)

JAPAN NHK World - Radio Japan Tokyo - A-10 Schedule

NHK summer season A-10 file I sent out at 12.44 UT was totally wrong, so  
sorry. Please delete it. I've to update this NHK A-10 file once again, new  
version see below.

Thanks Jean-Michel and Dave for help, what an offense of NHK Tokyo, to put  
two different seasons into a single PRF file. Never happened before ?

(NHK Radio Japan, wwdxc BC-DX TopNews Mar 29)

"BCL Life 2010" published.

The annual magazine for serious DXers "BCL Life 2010" (all in Japanese) was published on March 29 by Sansai Books Co. Ltd. They published "Restarting BCL 2008" and "Restarting BCL 2009" respectively in 2008 and 2009, and succeeded in making many middle-ages (40-40 years old), who were once the "radio boys" in 1970's, to resume their DX listening hobby with more sophisticated sense.

This is the first Japanese annual magazine for serious DX listeners. "BCL Life 2010" consists of, "Practical Use of PERSEUS receiver", "DX life in the apartment houses", "Making Small Loop Antenna", "Know more about NHK-World Radio Japan", "Little DXpediton with Antenna", "Practical Study of Accessory Equipments for DXing", "DXing in Overseas", "DXing with old Panasonic COUGAR2200 receiver", "Chinese Radio Catalogue", "QSLs & Screenshots of Overseas TV/FM DXing", "Document on St. Helena Day 2009", "DRM reception on shortwave", "DXing with military receivers", "DXing North American MW stations", "Challenging to Overseas TV/FM DXing", "Improving the power of external antenna", In-depth introduction of 13 shortwave stations with Japanese language programs, 8 stations with foreign language programs.

A5 160 pages, with a supplement B6 64 pages "BCL Radio Frequency Data Book"(listing 3300 waves on shortwave). All the articles are written by active DX specialists in Japan.

see <<http://www.sansaibooks.co.jp/cgi-bin/list.cgi?detail=383>>  
(Takahito Akabayashi-JPN, wwdxc BC-DX TopNews March 30)

In "BCL Life 2010", I wrote the 18 pages article  
"Practical Study of Accessory Equipments".

In the article, I rated, Active Loop Antenna for 2.2-20 MHz"? Loop7"  
(Japan), Quantum QX Loop v2.0 (USA), Tuned Preamplifier for 150 kHz-100  
MHz DPA-100B (Japan), Digital Noise Filter NEIM1031 (UK), Synchronous  
Detector SE-3 MkIV (USA), Noise cancelling Signal Enhancer MFJ-1026 (USA).

In the "In-depth information of the radio stations" section, an  
interesting information about Radio Pyongyang is given. It was revealed  
that Mr. Pak Ampok, a famous announcer of Radio Pyongyang Japanese  
section in the 1970's was executed by shooting due to the purge by Kim Il  
Sung.

Best Regards,  
(Takahito Akabayashi-JPN, wwdxc BC-DX TopNews March 30)

MYANMAR Tonight Myanmar on 5985.8 kHz was on till 1629 UT when it s.off with the National Anthem, military band type. Until 1557 UT it was good at which time CRI s-on for its Swahili programme causing major problems. However, I discovered my transceiver the Icom IC7400 which I don't use much was far ahead of my regular R71A, as the 7400 has 3 filters and passband tuning. I am goin to use it more!!  
(Victor A. Goonetilleke-CLN 4S7VK, DXplorer March 29)

NETH ANTILLES 15750-15755-15760, new DRM signals noticed here March 30 at 2015 UT. Figured it might be TDP ex-17755 kHz which is now open with WYFR-AM on 17750 kHz. The DRM schedule at  
<<http://www.baseportal.com/cgi-bin/baseportal.pl?htx=/drmdx/main&sort=kHz,UTC>>

confirms it is TDP and now via Bonaire rather than French Guiana site:

1900-2000 daily 15755 320 USA/Canada 100 TDPradio BEL English Bonaire

2000-2100 daily 15755 320 USA/Canada 100 The Disco Palace USA English  
(Glenn Hauser-OK-USA, dxld March 31)

15755 kHz RNW DRM.

Auf 15755 kHz scheint RNW in DRM zu testen, trotz 28 dB kein Audio und die Anzeigen springen immer hin und her.  
(Stephan Schaa-D, A-DX March 31)

15750 Und gleich daneben Sofia in DRM, - oder ist das nur eine Luftbuchung?

Bulgarien, Sofia 15750 kHz um 1900-2200 UT in Richtung Zonen 18, 27-29, 37, und 39, 100 kW 306 Grad.

Bei dem in diesem Jahrzehnt beobachteten DRM Bandbreite von, - gering gemessen 14 kHz -, ginge das denn // 15750 Sofia und 15755 Bonaire auf den Nachbarkanaelen?  
(wb, wwdxc BC-DX TopNews March 31)

NEW ZEALAND 11725 at 0621 UT Radio NZi S=6 signal in AM mode. Also RA SHP with fair signals on 13690, 15160, 15415 at 0630-0640 UT.

Marked the R NZi hobby program as usual, Mon/Tue/Fri, but detected the two Media programs "Media Watch" on Sat 2107 / Sun 0912 UT have gone, due of national domestic progr relays replaced ... but may change again in future, when NZ is going to normal NZ winter time this Saturday, "Daylight Saving" will have ended ?

"New Zealand Summer Time or Daylight Saving Time as it is called here ends this weekend at 1400 UTC on Saturday. It still feels very much like summer still with warm days and nights."  
(wb, wwdxc BC-DX TopNews March 29)

NIGERIA Thanks to Ian of SW TX site.

New GE imagery - Nigeria Abuja - Lugbe antenna is 120 meters away, and TX house 320 meters away of the previously estimated new location coordinates

There is some cause for excitement today as for the very first time we get to see the new Abuja - Lugbe 'Voice of Nigeria' SW transmission site before it's actually hit the airwaves!!! Miracles do happen :-)

The coordinates are of course in the Current Excel File, but here's the correct coordinates for the TX building. We see the two curtain arrays & rotatable antenna - marvellous!

(Ian Baxter-AUS, SW TX site March 25)

Abuja ist in sehr feiner Aufloesung sichtbar gemacht worden. Aufnahme ist vom 2. Dezember 2009.

(wb, wwdxc BC-DX TopNews March 26)

PAKISTAN The original mediumwave stations in Pakistan.

Much in the news these days is Pakistan. Located on the western edge of what used to be British India, this territory, nearly one thousand miles long and maybe five hundred miles wide, has featured prominently in ancient historic events. Its own colorful history dates back some 4,500 years to what is known as the Indus Valley Civilization. Two ancient cities, Harappa & Mohenjo-Daro, are just a pile of restored ruins these days, but they tell of a remarkable level of social development way back when civilization was young.

The main river system, the Indus with its five tributaries in the north of the country, provides life-giving water to the entire nation; and we should remember that the name Indus, which simply means river in the original language, provided the original name for India itself. The five rivers, they tell us, give us the name Punjab in the original language, and that is the name of a major province in both Pakistan and India.

Many moons ago, we presented the story of the early wireless stations in the territory that is now Pakistan, and they were located in the five cities; Karachi, Lahore, Quetta, Rawalpindi & Peshawar. That was way back in the era of the 1920s.

Here in Wavescan today, we continue in the Pakistan radio story, this time with the saga of their early mediumwave stations. It is the story of two radio stations in two cities; or, if you look more closely, it might be the story of four radio stations located in two cities.

The first radio broadcasting station in the territory now known as Pakistan, was a small amateur station installed in the YMCA building in Lahore in the year 1928. This station was funded by the YMCA, the local Text Book Company, and the provincial Punjab government.

This new and rather amateurish radio station was initially allocated 812 kHz as its broadcasting channel, though this was subsequently changed to 1200 kHz. The allotted callsign was VUL, indicating India Lahore. Radio station VUL Lahore was on the air spasmodically for a period of a little less than ten years, and it was finally closed on September 1, 1937, in favor of a larger new station due to open soon afterwards.

This new station in Lahore was officially inaugurated three months later on December 16, 1937 with 5 kW on 1086 kHz under the same callsign as its predecessor, VUL. It was one of the new radio broadcasting stations in the expanding network of All India Radio.

Thus, it is true, there were really two different radio broadcasting stations in Lahore in the era before partition; the amateur station followed by the government station, both of which were on the air, consecutively, under the same callsign, VUL.

Now up to the frontier city, Peshawar. It was in the year 1934 that the Marconi radio company in England offered equipment for a new radio broadcasting station to the government of the North West Frontier Province. The agreement was that if the project was successful, the provincial government would purchase the equipment.

This new radio broadcasting station was inaugurated on March 6, 1935 and soon afterwards it was allocated the callsign VUP, with these letters indicating India Peshawar. This small radio station emitted just 250 watts on 1500 kHz which gave it little more than just quite local coverage. Back at that time there was a promise that the station would be upgraded to 2 kW, though this prediction was never ever fulfilled.

During the following year, the provincial government took over the control of the station, and during the next year again, the station was taken over by the Indian national government in Delhi. Then, in March 1939, station VUP Peshawar was converted into a relay station, taking its programming from the national station VUD in Delhi.

However, a totally new broadcasting station, with new studios and new technical equipment, was constructed in Peshawar soon afterwards, and this was inaugurated on December 1, 1942. This new station was assigned the mediumwave channel 629 kHz with an output power of 10 kW.

Thus, it is true, there were really two different radio broadcasting stations in Peshawar in the era before partition; the Marconi station followed by the government station, both of which were on the air, consecutively, under the same callsign, VUP.

At the time of partition between India and Pakistan, known as Freedom at Midnight, August 14 & 15, in the year 1947, there were just these two rather small radio broadcasting stations on the air in the new Pakistan:-  
VUL Lahore 5 kW 1086 kHz  
VUP Peshawar 10 kW 629 kHz  
(Adrian Peterson-IN-USA, AWR Wavescan March 21 direct and via dxld)

QATAR Transradio installs 600 kW DRM compatible MW txer in Qatar.

A 600 kW DRM compatible MW transmitter was installed on 15th March 2010 at Al-Arish, Qatar by the state broadcasting company. The overall project included the installation of two TRAM 300 AM transmitters, one Paralleling Unit (PU), two digital DRM Exciter DMOD2, and an antenna for medium wave frequency 675 kHz.

Antenna design & construction was by Thomson Broadcast & Multimedia GmbH & was developed in collaboration between Thomson & Transradio. The transmissions will begin in the next few days. With this transmitter, an older station near the Qatari capital of Doha will be replaced.  
Source: Transradio Press Release in German.  
(Alokesh Gupta-IND, dxld Apr 1)

RUSSIA Radio Rossii broadcasting reductions on SW.  
It is not Radio Sweden, but nevertheless lamentably ... It seems some of  
Radio Rossii SW transmitters will leave the air for good starting tomorrow  
due to stress of money.

I do not have all info yet but among these for a long time usable ones  
will be:

5930 Murmansk (0100-2100 UTC during the summer seasons),  
6085 Krasnoyarsk (2100-1700),  
6160 Arkhangelsk (0100-2100),  
6195 Ulan Ude (2100-0100), etc.

I am listening now Radio Rossii on 5930 kHz and cannot still believe that  
March 27, 2010 will be the last day of SW relays from Murmansk ...

Date correction: all changes will be in use starting from May 8th !  
(Mikhail Timofeyev-RUS, hcdx March 27)

Last minute info: almost all Radio Rossi relays on SW do not stop starting  
from March 31st (1700 UTC) as I wrote yearier. These relays includes:

5930 0100-2100 50 RV-790 Murmansk  
5940 1700-1300 100 RV-1001 Magadan  
6075 1700-1300 100 RV-658 Petropavlovsk-Kamchatsky  
6085 2100-1700 50 RV-98 Krasnoyarsk  
6100 2100-1700 5 Kyzyl

6160 0100-2100 2x20 RV-300+RV-297 Arkhangelsk  
6195 2100-1700 50 RV-44 Ulan Ude  
7320 1700-1300 100 RV-647 Magadan

Also Moscow's Radio Rossii relays to Europe on 12070/13665/9410/7220 kHz  
by sessions between 0100 and 2100 UT will be continued.

It seems 65th anniversary celebrations of Victory in the Great Patriotic  
War is the main reason to keep SW relays till this date at least ...

[May 8th, wb]

(Mikhail Timofeyev-RUS, hcdx March 31)

5930 R Rossii, Monchegorsk, at 0504 UT on March 31, Russ "Novosti Sport".  
Transmitter still on the air April 1 at 0450 check but switched off after  
pips 0500 confirming Mikhail Timofeyev's report. However, much to my  
surprise Archangelsk 6160 continued and was noted with definite Rossii ID  
at 0700 as usual.

(Martien Groot-HOL, dxld Apr 1)

13655 Radio Rossii via Taldom, Moscow, new schedule adopted. On new  
summer A-10 season I noticed Radio Rossii Moscow outlet, nominal  
registered on 13665 kHz at 0830-1300 UT on 13655 kHz instead - 10 kHz  
down. Bad choice. Suffers heavily by adjacent powerhouse CRI Albania in  
English on 13650 kHz at 1100-1300 UT, and Radio Kuwait in the morning too?  
(wb df5sx, wwdxc BC-DX TopNews March 28/29)

Radio Rossii in Russian to WeEu noted today March 28 from 0825 until  
probably 1300 on new unregistered 13655, instead of 13665 in A-09. Yes,  
just began Radio Rossii in Russian at 1723 on 7220 kHz.

Checked today in every hour Radio Rossii in Russian and heard:  
0400-0800 12070 0823-1300 13655 ! 1322-1700 9470  
1722-2100 7220 kHz.

Parts of this schedule were observed on March 28 & 29 too, so it is right  
bc times & freqs.

Observing some of the bc times today I found some different data for radio  
Rossii in Russian prgr to Europe as follows:

s/on at 0823 on 13655 kHz;

next s/on at 1322 on 9470 and

s/on at 1722 on 7220 kHz [noted at 2045 UT with S=9+30dB March 31, wb]

Also noted 0500-0700 // on 9535 kHz, instead of Abkhaz radio. Presumed  
Abkhaz radio with own prgr is now Mon-Sat 0400-0500 (Sun-0430) and 0700-  
0810 on 9535 kHz only on SW, but // MW 1350 kHz.

(Rumen Pankov-BUL, wwdxc BC-DX TopNews March 29/30)

Dear Wolfgang, the frequency of 13655 kHz was right as in our adopted  
schedule.

(RC-3, Radiocenter 3 Taldom Moscow, March 30)

Hello Wolfgang, thank you very much for your message - I have asked our  
higher leadership about frequency 13655 kHz and they have found their  
mismatch - there must be 13665 kHz as usually in earlier schedules.

Tomorrow our TX with program of "Radio Rossii" will be on 13665 kHz.

(RC-3, Radiocenter 3 Taldom Moscow, April 1)

7200 GRTK Sakha bestaetigte meinen Empfangsbericht mit einem undet. Brief innerhalb von 54 Tagen. QTH: ul. Ordzhonikidze 48, 677007 Yakutsk, Respublika Sakha (Yakutiya), Russia.  
E-mail: <gtrksakha @ yandex.ru> v/s Ch. N. Dyakolov, Direktor.  
(Patrick Robic-AUT, A-DX March 30)

I always thought there were two SW BCB sites in the Ulan-Ude region?  
Ulan-Ude Nurseleniye Radio Rossii - 4795 kHz at  
51 44 57 N 107 26 56 E

looks like I count 72 antennas / more than 140 masts visible.  
some military or AIR traffic control site ?

Bryansk LW 279, 6195 kHz (Radio Rossii) at  
52 02 45 N 106 56 45 E  
44 masts 22 Antennas, plus tall LW mast.  
(wb, wwdxc BC-DX TopNews March 25)

UNID - Thought is was a ghost ... noted Voice of Russia's Kremlin chimes on 17495 kHz at 1457-1500 UT, into Asian subcontinent language like Hindi. Noted on three different rxs.  
(wb, March 30)

ST HELENA ISLAND News from Robert Kipp in Germany:  
Please note that there will be a delay in sending the RSD 2009 QSL cards from St. Helena, due to:

- (a) the ship RMS St. Helena being in dry-dock for repairs for six weeks in March and April and,
- (b) the fact that the package containing the QSL cards can not reach Cape Town in time, and
- (c) Gary Walters and his family going on a well-deserved and much needed holiday to Cape Town during May and June and part of July.

The St. Helena government is attempting to organize a special voyage of a different cargo vessel from the UK to St. Helena. If successful, the ship is expected to sail from the UK in the later part of June and to arrive St. Helena in early July. It is expected that the QSL cards will be on board.

On 25 January, Gary Walters wrote that RSH had received about 300 reception reports and that they expected to receive about 400 reports in total about the same as in 2009 for RSD 2008. As in 2009, the largest number of reports came from SWLs in Japan. Radio St. Helena will, most likely, not be able to post the RSD 2009 QSL cards to DXers until late July or early August.  
(Robert Kipp-D, DXplorer March 29)

SAUDI ARABIA 0300-1500 UT on 9715/11785 kHz are not in use in the past two weeks (but 11785 kHz was with "buzzy". The ARS effect may be observed daily at 1153 UT on both 21670 kHz, and spur on 21740 kHz when the National Anthem of Saudi Arabia is traced and cl-d at 1155 UT. On 21740 kHz were heard two prgrs from 21600 and from 21670 Quran and in

Indonesian:

formula  $21670 \times 2 = 43340$  kHz minus 21600 = 21740 kHz.

There are also other mixtures in 13 m.b. on March 26.

(Rumen Pankov-BUL, wwdxc BC-DX TopNews March 29)

17615 UNID Arabic phone-in at 1437 UT. But traced 22 and 19 mb, and discovered // BSKSA Riyadh progr on 13710 kHz. So seems addit HQ program at 1400-1600 UT.

(wb, wwdxc BC-DX TopNews March 29/30)

SRI LANKA The All Asia English transmission from SLBC is at 0055-0330

(Sunday to 0430 on 6005 10 kW, 9770 10 kW and 15745 35 kW. Indian Service

is 0030-0300 (Sunday to 0430) and 0830-1230 on 7190 10 kW and 11905 35/200

kW.

Middle East Service in Sinhala for Sri Lankans in the Gulf: 1630-1900

11750 35 kW, on Tuesdays 200 kW when the programme is sponsored by the

Bank of Ceylon.

(Union of Asian Dxers, Sri Lanka, via WDXC Contact April magazine)

SLBC launches a radio programme focussing Sri Lankan listeners in South

Korea.

The programme is broadcast through City FM Service from 4.00 p.m. - 5.00 p.m. each day of the week. At the launching ceremony held in SLBC premises today Chairman Hudson Samarasinghe said about 16 thousand Sri Lankan migrant workers in South Korea will be benefited by this programme. They have the opportunity to get information from Sri Lanka and to address their family members and friends via this new channel.

Participating at the ceremony South Korean Ambassador to Sri Lanka Cho Kee Chool said this radio programme will lead to enhance diplomatic, cultural and religious ties between the two countries. - SLBC Web site.

The broadcast from 1030-1130 UTC is transmitted from the Deutsche Welle Trincomalee facility on 15120 kHz and is heard in Sri Lanka on FM 92.2 MHz. The programme is in Sinhala. SW frequency and FM both confirmed by live monitoring in Colombo with co-channel AWR from 1030-1100 UT then in the clear.

The Service to the Middle East in Sinhala is on the air daily 1630-1830 UTC on 11750 kHz. [Ekala tx, wb.]

0500-1200 4840 kHz  
1200-0000 13845 kHz  
0000-0500 4840 kHz

Transmitter #4 - 100 kW - 90 degrees  
0500-1200 5890 kHz  
1200-0200 9980 kHz  
0200-0500 5890 kHz  
(Jean-Michel Aubier-F, dxld March 30)

As of March 9 a second transmitter, a 100 kW Continental 418, was being installed at WTWW per George McLintoch. It may not be ready to go on the air for four to six months and they are also looking at purchasing more transmitters.

On March 11 they moved from 5755 to 5080 as a nighttime frequency, scheduled 0000-1200. Day frequency is 9480, during the testing period they have been relaying Pastor Pete Peters, who also has 24 hour airtime on WWCR. Moved back to 5755 March 23. Programming scheduled to officially begin April 1.

(Glenn Hauser-OK-USA, dxld via WDXC Contact)

WTJC on odd 9369.90 kHz at 0610 UT, S=6 sermon by man.  
(wb, wwdxc BC-DX TopNews March 29)

Starting today WTWW has shifted to 9479 kHz! George McClintock tells me the FCC has OK'd it. The reason is an unexpected interference problem very near the transmitter site. The school system of Smith County has a remote receiver on a mountaintop which happens to use 151.680 MHz, and the sixteenth harmonic of WTWW 9480 kHz has been interfering. WTWW harmonic is properly more than 80 dB suppressed, but in this circumstance it is not enough. Until a new harmonic filter can be installed, by shifting to 9479 kHz WTWW moves the harmonic far enough off to 151.664 MHz.

The 'tone' is a heterodyne of 1 kHz which now results from other stations still on 9480.0 kHz, no longer YFR via Germany, but CRI via Albania at 1800-2000 UT in French. Voice of Russia might also be using it after that time, and China at other times. It is certainly audible, not subaudible.

This is not 'crossmodulation' either.

(Glenn Hauser-OK-USA, dxld March 31)

As I write, I'm monitoring WTWW Lebanon-TN. On 9480 kHz crossmodding with Crosstalk and SAH sounding like a Tone Test at the same time on this frequency as of 1848 UT on Wednesday, March 31, 2010. Seems like there is a problem either WYFR relay is blending in or WTWW is putting voice with Tone hee on this channel. Can you confirm this strange anomaly?

(Noble-TN-USA, dxld March 31)

1100-1400 NF 9660 TAC 100 kW / 153 deg, ex 9655 kHz.

(R BULGARIA DX MIX News, Ivo Ivanov, via wwdxc BC-DX TopNews March 29)

VANUATU As of Wednesday, February 24th, here is what we accomplished at Radio Vanuatu. 5055 is on at about 3,500 watts, and 3945 is on at 7,000 watts. But, due to the unstable A.C. power infrastructure, I had to design the protection circuits to be very sensitive. The systems will "fold-back" the transmitters to 2,000 watts if it senses any kind of spike or surge in the A.C. power feeds. It may take the staff at Radio Vanuatu a few days to respond and clear the "fault mode" power cutback.

The antennas for each frequency are two fan dipoles, in phase, side by side. They are broadside north by northwest, by south-south east. The 7260 frequency won't be used until next January or February, depending on how the cycle progresses. I'm also curious on how the audio sounds. This new design I focused on trying to have great audio quality. It would be nice to get critical reports on how the audio compares with the "big guns".

(Jamie Labadia, dxld via WDXC Contact April magazine)

**ASCENSION ISL** The BBC English Bay Wind Farm has started to generate clean electricity for Ascension Island. On Thursday 18 March the first of the wind turbines started generating electricity. Since then three more of the five wind turbines have been commissioned, and last one should be running soon.

The wind turbines were made by Enercon in Germany who chartered a ship to send them to Ascension. Each turbine is 37m to the top of the tower with a 33m rotor diameter, making them 53.5m (176 ft) tall to the tip of the blades. The rotor spins at approximately 35rpm and always in a clockwise direction. The turbine automatically turns to face into the wind. The towers are steel and the blades are made of fibreglass. The wind turbines are the same model as on the Falklands .

Each wind turbine can generate up to 330 kW (450 hp) when the wind speed is 30 mph (25 knots) or more. If the wind speed is lower than this the turbine will produce less power. The wind on Ascension is excellent for generating power as it is both strong and consistent; the wind also seems to be well correlated with the electrical load on Ascension - that is, the wind is strongest at peak times for electricity usage. The power from the wind farm goes directly into the island electricity system.

Once finished the wind farm will be capable of generating up to 1650 kW on a windy day although most of the time it will average about 900 kW. Ascension Island uses between 1000 kW and 3000 kW depending on the time of day and the BBC transmitting schedule. This means that the wind farm will contribute a significant percentage of the island's electricity and help to reduce the amount of diesel burnt. This is better for the environment as it means cleaner electricity, a lower carbon footprint, fewer diesel tankers and less reliance on fossil fuels.

(The Islander, Apr 6, by Andy Sennitt-HOL, RNW MN via dxld)

**AUSTRALIA** I hear that some of the transmitters decommissioned by CVC at Darwin may be going on to useful second (third?) lives: two 100 kW could wind up at Radio Australia, Shepparton, if rather expensive shipping costs of a megadollar can be covered. RA may also be getting a 300 kW transmitter, DRM-capable, and some new antennas to serve Africa and SW

Asia. Some other equipment from Cox Peninsula has already been donated to HCJB Kununurra.

BRAZIL 11749.86 Radio Voz Missionaria, Florianopolis, at 0140-0210 UT  
on April 2, Portuguese religious talk. Portuguese religious music.

Announcements. Weak but readable. Stronger on // 5939.94 kHz.

(Brian Alexander-PA-USA, hcdx Apr 2)

BULGARIA BNR reduce the transmission of Radio Medium wave.

Some observations from April 7th / 1530-1710 UTC

1224 kHz Ext. Service - break between 1600-1700 UTC

747 kHz Ext. Service // 1224 kHz but without the break

261 kHz Horizont

864 kHz Radio Blagoevgrad

963 kHz only Horizont / no signal heard from Radio Shumen

1161 kHz Horizont with echo - so at least 2 tx on air.

no signal from Bulgaria heard on 594 / 576 / 828 kHz.

7.4. 1900 UTC

1296 kHz Christo Botev weak signal.

774 kHz only Egypt ans Spain on air, nothing of Radio Varna anymore.

(Patrick Robic-AUT, A-DX April 7)

From April 7th on MW: Vidin 576 kHz was stopped and Vidin 1224 kHz  
reactivated with FS and HS.

(Rumen Pankov-BUL for WWDXC BC-DX, April 8)

On March 24, 2010 the Director General of Bulgarian National Radio Valery Todorov briefed members of the parliamentary committee on culture media and civil society with a piece of anti-crisis measures taken media. The main emphasis was freezing part of broadcasting in the range of average waves in areas where there is acceptance that the quality of the FM band. Thanks to the leadership of measures announced BNR expects to save about seven million of the budget of the media. Valery Todorov said he hoped that after the changes people will not experience discomfort.

The amended announced measures to optimize the power transmission network and the expansion of broadcasting in the VHF range, on 6 April BNR stopped most of its medium wave transmitters. Only three of the stations will be fully closed (Suvorovo Haskovo and Dobrich), otherwise it was announced that shall be suspended and will be preserved. Possible subsequent use of these stations for digital broadcasting.

List of excluded transmitters:

Program "Horizon"

Suvorovo - 1485 kHz (closed completely)

Dobrich - 1584 kHz (closed completely)

Pirin 1 to 963 kHz

Varna 2 to 1143 kHz

Sofia 4 to 963 kHz

Pleven 1 to 594 kHz

Stara Zagora 1 to 1161 kHz

Program "Hristo Botev"

Haskovo - 1485 kHz (closed completely)

Pleven 2 to 1296 kHz

Pirin 2 to 702 kHz

Sofia 2 to 828 kHz

Shumen 1 to 828 kHz

Vidin 2 to 576 kHz

Regional radio stations

Radio Plovdiv - 648 kHz

Radio Stara Zagora - 873 kHz

Radio Varna - 774 kHz

Radio Varna - 9300 kHz

(rather 6000 kHz the "Hi Sea!" Of the Bulgarian sailors)

Radio Shumen - 963 kHz

Will continue to operate transmitters in Dulovo, Kardjali, Malko Tarnovo, Samuel, Targovishte, Shumen and Blagoevgrad, Bulgaria Radio stations abroad - 747 kHz and 1224 kHz Petrich Vidin. Saving the only transmitter in Bulgaria in the range of long waves - Vakarel 261 kHz.

The transmitter is located six kilometers south of the city, near the village Voyvodovo and released in 1995, altitude (terrain elevation): 200 m, antenna height: 110 m. On April 6, 2010, in order to optimize costs, BNR stops most of the transmitters on medium wave, including CBA and Haskovo.

<<http://predavatel.com/bg/4/haskovo.htm>> click to translate English (wb, wwdxc BC-DX TopNews April 8)

Most remarkable: No signal on 594 kHz, so Pleven either goes off until 2100 UT (had no opportunity to check earlier in the day so far) or, which is more likely of course, has been shut down. Practically 594 is at night a dead frequency here now, on usual radios only a mess of some carriers can be made out, at times not even this.

1224, which has pretty faint modulation, goes off at 2200 UT. Last night Iran quite nicely emerged from the Spanish mess this frequency otherwise is.

1161: Probably all three transmitters are still on air, in fade peaks there appear to be even three transmitters, with the prominent one (which would be Stara Zagora) being the one with the second-longest delay. But this could be a deception.

And indeed 261 is still on air, too, quite weak but // 1161, so no doubt indeed the Vakarel transmitter. Both 261 and 1161 stay on air beyond 2200 UT.

By the way, the project to sell the Bulgarian transmitter network to Oesterreichische Rundfunksender GmbH finally fell through:

<<http://news.dnevnik.bg/?y=2010&m=2&d=9>>

(Kai Ludwig-D, dxld Apr 8)

Bulgarian regulator sells part of broadcasting division to financial investor.

Vivacom (Bulgarian Telecommunications Company AD) has signed an agreement to sell 50 per cent of its broadcasting division - National Unit Radio and TV Systems (NURTS) - to international financial investor Mancelord Limited and has applied for approval by the Communications Regulatory Commission (CRC), Vivacom said on its website on Wednesday.

The new joint venture's main focus will be development of the digital network infrastructure of the company in order to position it as a competitive player on the digital broadcasting market in Bulgaria. NURTS will benefit from the additional financial support to develop innovative solutions for its digital TV infrastructure.

"NURTS needs a financial injection that will help us implement our strategic investment programme associated with the introduction of digital television and radio broadcasting. This transaction will help us turn the company into a nationwide modern multiplex service provider," said Vivacom CEO Bernard Moscheni.

According to the EU requirements all Member States must fully cease the analogue broadcasting signal by the end of 2012. Bulgaria is also committed to meet this deadline. In order to fulfil the criteria it is necessary to build infrastructure that makes transmission possible through the new technology.

NURTS is the leading provider of radio and television broadcasting services through its unique network of over 800 strategically located sites covering nearly 100 per cent of the Bulgarian territory. Since 2006 it has been developing in Sofia an experimental DVB-T multiplex for transmission of digital terrestrial television. So far, NURTS has been a division within the Vivacom group. After getting the necessary approvals by the CRC and Commission on Protection of Competition (CPC), NURTS will become part of a joint venture in which BTC will have 50 per cent.

International investment bank Lazard has advised Vivacom on the deal.

Mancelord Limited is represented in Bulgaria by Bromak Ltd., majority shareholder in Bulgaria's Corporate Commercial Bank Ltd. (CCB). The press recalls that CCB financed the purchase of a TV channel and five newspapers by Irena Krusteva. Bromak is a partner in Krusteva's media group. (BTA news agency, Apr 7 via BBC\_M via dxld)

#### RECENT DEVELOPMENTS OF LORAN-C IN EUROPE.

European Loran-C Policy Group - to be introduced later in section 2.2.2 -  
in ... Matratin station in Libya to Lampedusa Italy - is somehow restored.

...

<[tycho.usno.navy.mil/ptti/1990/Vol%2022\\_49.pdf](http://tycho.usno.navy.mil/ptti/1990/Vol%2022_49.pdf)>

For land and air navigation, some activity is performed Eastern Europe.  
Indeed a new CHAYCA chain is planned between Eastern Germany, Hungary and Bulgaria; the planned positions of this new proposed chain were:

Eastern Germany	Damgarten	12 27 E	54 15 N
Hungary	Esztergam	18 45 E	47 46 N
Hungary	Kunmadaras	20 48 E	47 26 N
Bulgaria	Pleven	25 04 E	43 20 N

No news are available about the status of the new proposed chain nor about the consequences of recent political changes. At any rate it can be stated that, at least from July-August 1990, no activity was observed from our Laboratory at the GBI of 49.60 ms, proposed for the new chain.

see also Groundwave maps on p592 - p596

In mediterranean area the US lost Matratin in Libya, which was on service in 1959 to 1970.

CRI Beijing in Croatian on shortwave.

Apr. 02, 1750z, 9435 kHz with a very good signal I've heard CRI in Serbian - Let's Learn Chinese program. I was VERY surprised to hear them at this time, since CRI is on short wave in Serbian only at 1200-1300, 2000-2030 & 2100-2130z. After listening more carefully, I realized

**THIS IS CRI IN CROATIAN!!!**

I know the CRI Croatian section was established in 2008 as a web-only station, but it looks like they started broadcasting in Croatia on short waves. I've searched for a // freq, and I've found 7335 kHz also carrying CRI Croatian, with a good signal.

(Dragan Lekic-SRB, dxld Apr 3)

CRI Beijing Croatian - needs more check from your side. But when the CRI website shows SW outlets, so the Chinese cut off two frequencies from their numerous English and Cantonese ones in reality.

53th language on CRI in 2009 year.

Left side tall MW 1125 kHz mast. Right masts are the 75, 49, 41, and 31 mb antennas. (wb)

CUBA 13680 RHC La Habana in Spanish at 1300-1400 UT Apr 2nd, covered by IBB Radio Svoboda via VT-group Rampisham relay from 13.59:45 UT. Equal signal level then. // RHC SP on 13780 kHz underneath DWL German via VT-group Woofferton relay. Both RHC S=3-4.

But different Cuban program, likely Radio Nacional de VEN, observed at same time on 15120[and BSKSA Bangla co-channel] and 15360[S=7] kHz. Speech to the crowd transmission, on "...capitalism, ... musulm n ..., dinero ...". Presidente de Angola on visit.

(wb, wwdxc BC-DX TopNews April 2)

Morning check in 49 mb on April 9th at 0400-0500 UT determined R La Habana's English sce on fair 5970 and 6000 kHz signals, but Spanish sce on much stronger 6060 and 6110 kHz. Off on 6140 and 6150 this morning.

(wb, wwdxc BC-DX TopNews April 6)

El Hugazo AWOL again, Sunday April 4 at 1645 check, nothing on the Alo Presidente frequencies via CUBA, 17750, 13750, 13680, 12010 kHz.

(GH, dxld Apr 4)

Full feed. Radio Habana Cuba expands use of 5040 kHz April 7. In Radio Havana Cuba's DXers Unlimited midweek edition 6/7 April 2010, host Arnie Coro says:

"Monday April 5 UTC day we completed implementing the registered at the ITU Geneva Radio Habana Cuba's A10 schedule, that will be effective until October, although it may require some minor changes during the middle of the summer according to my analysis.

"You will now be able to pick up RHC on several new frequencies , like for example 5970 kiloHertz, beaming to Central North America with our 4 by 4 curtain array.

"We are also now broadcasting on 12030 kiloHertz in Spanish , and we may soon be testing a daytime frequency on the 21 megaHertz or 13 meters band.

"We also added two more hours to our domestic Tropical Band service on 5040 kiloHertz, that from now on will be starting at 21 Hours UTC with our Spanish language magazine show."

(dxersunlimited.blogspot.com via RNW MN Apr 7)

CYPRUS and etc.: Radio Sawa (Is it Radio "Together"?) heard with four different mx prgrs at 1900-1915 UT on MW

990 Cape Greco, Cyprus,

1170 Al-Dhabbaya, UAE,

1431 Djibouti and

1548 Kuwait (here under Grigoriopol-Moldova)

and common nx in Arabic read by lady from 1915 to 1923 UT and next again different songs on all freqs (Apr 1). On 1170 kHz from 1930 UT under CRI in Turkish from Krasnodar, Russia.

(Rumen Pankov-BUL for WWDXC BC-DX, April 1)

CYPRUS / GREECE Two different Orthodox sermons directly from the Churches heard from 1630 on MW 1044 kHz, one from Cyprus another from Greece (Thessaloniki // 9935 kHz). From Cyprus were // 603 & 963 (Nicosia) // 558 (Pahpos) // 1044 (Limassol) but 693 & 918 kHz were not heard.

Checking MW 1098 kHz Iskele from Northern Cyprus I found a prgr in Arabic and oftenly ID "Huna Idaatu Iraq" (maybe This is Voice of Iraq?) at 1640 UT and at 1645 UT switching in Turkish, at 1647 UT ID "Radio Bayrak", next pop songs and ballades in western style in Turkish and at 1700 UT a lady said the pop mx will be till "irme dyor saat" (= 24.00 hrs). On Apr 1 at 0445-0515 UT on 1098 kHz nx, comments wrp in Turkish.

(Rumen Pankov-BUL for WWDXC BC-DX, April 1)

FRANCE{tent}/DJIBOUTI Summer A-10 schedule of La Voix de Djibouti in Ar/Fr+local.

1530-1630 on 15165\*UNID transmitter/ISS?to EaAf. On air Thu only.

\* QRM 1530-1600 AWR in Hindi & 1600-1630 WYFR in Oromo, both on 15160,

also 1530-1630 BBC in Russian on 15170 kHz.

(R BULGARIA DX MIX News, Ivo Ivanov, via wwdxc BC-DX TopNews April 5)

FRANCE/TAIWAN 15225 R Taiwan International via Issoudun France in Russian language. 500 kW powerful beast, S=9+10dB in the dead skip zone Germany. 1400-1500 UT.

(wb, wwdxc BC-DX TopNews April 2)

GERMANY/HUNGARY Summer A-10 schedule of Hungarian Radio in Hungarian  
0100-0200 6150 JBR 250 kW 306 deg to NoAm till June 30  
0100-0200 6150 WER 250 kW 300 deg to NoAm from July 1 via MBR(exDTK)

(R BULGARIA DX MIX News, Ivo Ivanov, via wwdxc BC-DX TopNews April 5)

GERMANY/ICELAND [non] 9895 No one so far has commented on RNW's service  
in Dutch to Iceland at 2059-2127 UT via M&B Nauen, 9895 kHz from May 31 to  
August 29. Even CRI doesn't have an Icelandic service! And I can't think  
of any other now that Deutsche Welle no longer has to pretend that's where  
they were broadcasting to on the old 40 metre ham band when the service  
was actually for NoAmerica.  
(Noel R. Green-UK, dxld March 27)

It was Croatia via DTK Germany which did this. (gh, dxld)

??? 7560 unIDed at 2137 UT with talks in French, giving rendez vous with  
listeners and mentions of the station (in a fadeout) 2140 UT with  
spiritual song also on 2155 UT. Sudden s/off at 2159 UT. Signal just S=2  
23242. Nothing on both lists Aoki or Eibi spur? /harmonic?  
(Zacharias Liangas-GRC, wwdxc BC-DX TopNews April 6)

Suggest is an Intermodulation at M&B Wertachtal site,  
7290 and 7425 kHz both 500 kW at 180 degrees to Africa.

Only two station FRENCH programs end at 2200 UT,  
7205 kHz RFI Issoudun, and 7290 YFR Wertachtal.

Another outlet from Wertachtal also at 2100-2200 UT on 7425 kHz. So I  
guess two intermodulations occur in 41 mb, like on 7155 and 7560 kHz, both  
135 kHz away.

Formula:

$7425 \times 2 = 14850$  minus 7290 kHz = 7560 kHz

$7290 \times 2 = 14580$  minus 7425 kHz = 7155 kHz

(wb, wwdxc BC-DX TopNews April 6)

9490 Tiny S=3-4 signal in dead skip zone of Wertachtal, traced with  
Democr. Voice of Burma progr in Burmese at 2330 UT.  
(wb, wwdxc BC-DX TopNews April 6)

GUAM Frequency change of AWR KSDA Agat, Guam in Mongolian:

1030-1100 NF 15320 SDA 100 kW / 315 deg to CeAs, ex 15120

(R BULGARIA DX MIX News, Ivo Ivanov, via wwdxc BC-DX TopNews April 5)

15425 KTWR Guam accompanied by heavy BUZZ like 60 Hertz, in Korean segemt  
at 1400-1515 UT, S=9+10dB, Apr 2nd.  
(wb, wwdxc BC-DX TopNews April 2)

ICELAND Iceland tower per Bugaj and Fybush items.

<<http://www.panoramio.com/photo/4253624>>

<<http://www.panoramio.com/photo/4253588>>

Found on Google Earth --- While wandering about Iceland looking for the erupting volcano, I found this. Could this be the transmitting antenna for Iceland's LW station on 189 kHz?

<<http://www.panoramio.com/photo/4253624>>

(Mike Bugaj-CT-USA, WTFDA-AM via dxld Mar 26)

If the coordinates on this picture are correct, it doesn't match either the 198 site in Gufuskalar or the 207 site on the east coast of Iceland. Maybe a LORAN mast?

(Scott Fybush-NY-USA, ibid. dxld Mar 26)

Glenn, I am still digging, but it's not Loran (the 189 kHz site is the former Loran site, repurposed by Harris Corp. with help from us; the 207 kHz is a newly established site as a part of the same project, also our design), and it's not Omega, and those coordinates don't match any Decca sites.

I have some reference to a "1000 footer" in Iceland in some project correspondence about impedance calculations for various low frequency and VLF sites, but my data doesn't include a location.

But I think it's the Navy Keflavik LF (37.5 kHz) and it was built in 1993 or so, but is supposedly 13 km from the former Keflavik NAS, which is in southern Iceland.

It doesn't look like it's toploaded, but it does have insulators in the guys, so is some sort of MF, LF or VLF installation. But I'm unable to identify it.

(Ben Dawson-WA-USA, dxld April 1)

INDONESIA 9525.907 Voice of Indonesia, at 1900 UT, English at this hour (not 2000 UT as indicated in WRTH) with announcements by a woman (including e-mail address), then "This is the Voice of Indonesia...the news..." which included stories about "Global Earth Hour", foreign health workers in Indonesia and mine project to create 6000 jobs. Decent copy in USB. Mar. 27.

(David Sharp-NSW-AUS, dxld Apr 1)

ISRAEL Political talks in Hebrew on MW 927 kHz at 1610-1625 UT, probably Reshet Bet Home Sce.

Acc to the DX Club of VORussia and DX Editor Vadim Alexeev from April the  
6th, all MWs and SWs used by Russian Internat Radio in times between 1300-  
2300 UT will transmitting the prgr of VORussia in Russian. On MWs outlets  
in Germany at daytime will be RIR and at evening VOR.  
(Rumen Pankov-BUL for WWDXC BC-DX, April 8)

17495 Still a puzzle at this end.

In past days as well as Apr 2nd noted Voice of Russia program in Urdu 14-15 and Hindi 15-16 UT on very high frequency of 17495 kHz, observed here on two different rx's.

Was puzzled a bit of an intermodulation on Dushanbe, Chita, Irkutsk, or Novosibirsk site. But no formula works so far. [ 6 + 11.5 MHz, 9.9 + 7.55 MHz neither].

Dushanbe 17495 kHz is scheduled from 0700-1000 UT for VoRUS towards South Asia and AUS/PAC.

So maybe the engineers let the tx on air still in the afternoon til 1600 UT ? Or just propagation test into South ASian subcontinent? (wb, wwdxc BC-DX TopNews April 2)

GTRK Kamchatka in Russia has verified my reception report with a proper QSL card (f/d except for tx site, but that is unambiguous in this case) after 4 weeks. They also included a nice postcard featuring Petropavlovsk's local volcano, a very pretty view as long as the mountain is quiet.

The transmission schedule of regional programmes is handwritten on the back:  
0700-0730, 0810-0900, 1100-1130, 1310-1400, 1910-1924, 2010-2100, local time, daily except Sundays.

I heard the station on 6075 kHz in Colorado, which is impossible in Germany due to Deutsche Welle 24/7. Their address on the envelope is

GTRK Kamchatka  
ul.Sovetskaya 62  
683000 Petropavlovsk-Kamchatskij  
Russia

I send them a RR in Russian, but as the QSL is in English that should work, too.  
(Eike Bierwirth-D, hcdx April 5)

(VORUS, April 1)

VOR 9890 is still useless. This is supposed to be 500 kW from "Armavir"

aimed right at us, 315 degrees. Wolfgang Bueschel in Germany confirms it's on the air, but sounds more like 20 kW to him. Of course, we are still recovering from the G3 geomagnetic storm of a couple days ago, so things ought to improve in next few days, but deliberately or negligently transmitting 5 kHz from any North American SW frequency is self-defeating nonsense.

(Glenn Hauser-OK-USA, dxld Apr 8)

Yes 9890 Armavir Krasnodar Caucasus is on air 2230 UT today April 7(UT) noted with free jazz music, played in // to Koenigsberg Bolshakovo MW 1215 kHz. Latter is 4 seconds ahead of slower Armavir transmission. Very lousy signal strength on 9890, like a 20 kW small domestic station.

At 0000 UT only VoRUS Russian sce on 7270 kHz via Yerevam Kamo Gavar site heard here in western Europe tonight. The only Russian txion in 41 and 31 mb. [all Greece, Serbia/Bosnia, Bulgaria and Romania sces towards NoAM with fair signals at same time.]

Weak signals under threshold on tentat 7285 and, tiny carrier on 9890 kHz at 0000 UT. Looks like the Russian internat radio service is bankrupt in some way at present ... ?  
April 9th.

15510 Vo Russia in Pa/Da via Samara noted in 1200-1400 UT time slot Apr 8th, but accompanied by heavy 60 Hertz BUZZ tone.  
(wb, wwdxc BC-DX TopNews April 8/9)

SAUDI ARABIA Holy Quran prgr in Arabic back on 11785 kHz with stronger "buzzy" now, heard 1000-1030 UT on April 1.

SPAIN REE's Spanish DX program Amigos de la Onda Corta has not made a one-hour-earlier DST change this A-season, but still at 0605 UT Saturdays as in B-season, followed by Correo del Oyente mailbag at 0630. Now we can only get it on 5965 via COSTA RICA, unless Spain direct propagate on 11895, 12035 aimed eastward, not tonight. ...

Amigos had host Antonio Buitrago with some DX news at 0613. The only other scheduled broadcast of it is Sunday 1230 on numerous frequencies, 21610 21570 21540 15585 15170-CR 13720 11910-China 11815-CR 9765-CR, so it no longer competes as it did thruout B-09 season with RHC's Spanish DX program at 1335. But there is NO other airing of the mailbag on the REE A-10 grid.  
(Glenn Hauser-OK-USA, dxld Apr 8)

#### SRI LANKA SLBC A-10 transmissions noted as follows:

0020-0300 UTC SLBC HINDI 7190, 11905 kHz (Bengali segment at 0035-0050 UTC, Sponsored Devotional Prog)

0100-0330 UTC SLBC ENGLISH 6005, 9770, 15745 kHz  
(Alokesh Gupta-IND, Mar 30, dx\_sasia yg via dxld)

The All Asia English transmission from SLBC is at 0055-0330 (Sunday to 0430) on 6005 kHz 10 kW, 9770 10 kW and 15745 35 kW.

Indian Service is 0030-0300 (Sunday to 0430) and 0830-1230 on 7190 10 kW and 11905 35/200 kW.

#### Middle East Service in Sinhala for Sri Lankans in the Gulf:

1630-1900 11750 35 kW, on Tuesdays 200 kW when the programme is sponsored by the Bank of Ceylon.

SLBC BEAMS TO LANKANS IN KOREA. The Sri Lanka Broadcasting Corporation ceremonially launched a new program to broadcast its services to Korea last Sunday. The event was held at the Sri Lanka Broadcasting Corporation premises under the patronage of South Korean Ambassador Choi Ki Chul.

"We will broadcast our programs to Korea for Sri Lankan expatriates/ Sinhala listeners," said Sri Lanka Broadcasting Corporation Chairman Hudson Samarasinghe.

This is basically a magazine program which features Sri Lankan songs, Sri Lankan news and currency rates. This program aims at providing entertainment and information to the 75,000 Sri Lankan migrant workers.

This program aims at providing an open forum for participation. Through this program the migrant workers can send messages to their family members in Sri Lanka. The people in Sri Lanka can listen to the voices of family members living in Korea. Some of the programs aim at providing Sri Lankan workers in Korea with information on how to use and save money.

This is a live program done in SLBC premises and is broadcast to Korea via the German Transmitter Station Deutschwelle which belongs to the German Government. According to the agreement the SLBC has with this broadcasting station, (Deutsche Welle) will be providing services without charge for one hour.

At the same time CityFm service also broadcasts this program to Sri Lanka. The Lankans can listen to the voices of family members living in Korea.

Samarasinghe added that it is a shortwave station and that they are using shortwave to broadcast this one hour program from four to five in the evening. By tuning into 15120 shortwave frequency anyone in Sri Lanka and Korea can listen to the program. "It is our responsibility to look after our migrant workers. This is our obligation. We must do something for these people," he pointed out.

(via Alokesh Gupta-IND, dxld Apr 8)

SWEDEN Radio Sweden will terminate its MW and SW broadcasts this Oct 31 in favour of web services \_ with Swedish R management stating that is the best use of resources and in line with international trends. The English-language service is to continue on the web and on national broadcasts. The Russian output will be available on the web as is the German now. Elle-Kari Hoejeberg, in charge of SW and MW broadcasts at Swedish R explains why the decision was made to wind up the broadcasts:

"We Are at a Crossroad and Had to Make a Decision".

Among the immigrant languages, Albanian, Assyrian-Syriac and Bosnian-Serbian-Croatian are to be terminated on the same date. Meanwhile, Arabic and Somali - the largest immigrant language groups here at present - are to be boosted. The same applies to Romani - one of Sweden's five official minority languages. The Persian service is to include even Dari spoken by the rapidly increasing number of Afghan refugees coming to Sweden. Kurdish broadcasts remain unchanged. Swedish Radio's output in immigrant languages will be available on the web and broadcast nationally.

(From <[www.sr.se](http://www.sr.se)> via Arnaldo Slaen-ARG, dswci DXW March 31)

TAIWAN 11875, March 27 at 1457 just tuned in to big signal but undermodulated with kids' choir when it went off at 1457:23\*. Per Aoki this can only be RTI's Indonesian service at 14-15, 205 degrees from Tainan, so off the back would be 25 degrees, close enough to USward. (Glenn Hauser-OK-USA, dxld Apr 1)

7355 RFA Chinese via Tainan-TWN, 1800-2200 UT noted with fair S=7 signal also in Europe at 21-22 Ut slot.

(wb, wwdxc BC-DX TopNews April 6)

TAJIKISTAN UNID 17495 Still a puzzle at this end.

In past days as well as Apr 2nd noted Voice of Russia program in Urdu at 14-15 UT and Hindi 15-16 UT on very high frequency of 17495 kHz, observed here on two different rx's.

Was puzzled a bit of an - expected - intermodulation of Dushanbe [11755], Chita [9745], Irkutsk [9445], or Novosibirsk [6070] site. But no formula works properly so far. [6 + 11.5 MHz, 9.9 + 7.55 MHz neither]. {frequency channels used in B-09 season}

Dushanbe 17495 kHz is now scheduled from 0700-1000 UT for VoRUS towards South Asia and AUS/PAC.

So maybe the engineers let the tx on air still in the afternoon til 1600 UT ? Or just a propagation test into South Asian subcontinent?  
(wb, wwdxc BC-DX TopNews April 2)

7545 TWR to Indian subcontinent via Dushanbe Yangiyul site in Bengali, Hindi, Nepali, and Bhojpuri noted at 0000 UT, S=3 in Germany.

15520 Voice of Tibet program accompanied by Chinese mainland jamming, tiny S=3 at 1100-1230 UT.  
(wb, wwdxc BC-DX TopNews April 6)

(R BULGARIA DX MIX News, Ivo Ivanov, via wwdxc BC-DX TopNews April 5)

U.K. THE OLD BBC WORLD SERVICE SHORTWAVE TRANSMITTERS CHANGE HANDS AGAIN.

"Babcock and VT group clinched a merger deal today to create a defence and

support services group with sales of o3bn and more than 25,000 employees in Britain and the US. ... VT also has major interests in education and training and operates transmission sites for the BBC world service." Richard Wachmann, The Guardian, 23 March 2010. <[www.kimandrewelliott.com](http://www.kimandrewelliott.com)> via dxld Apr 1.

In 1997, BBC World Service contracted out its shortwave transmission to a group of BBC engineering employees, who formed the company Merlin Communications. Merlin owned and operated the BBCWS shortwave and medium wave transmitters based in UK territories, and operated the transmitters located elsewhere. In 2000, VT Communications purchased Merlin, at a pretty profit for the Merlin ex-BBC employees.

This recent transaction is actually a takeover by Babcock. In addition to leasing (back) shortwave time to BBCWS, VT Communications also leases time to other international broadcasters through its own and partner sites. Religious broadcasters seem to be taking over the time formerly occupied by government-funded stations, but for how long will shortwave transmission remain a profitable concern? 26 Mar 2010. (Kim Andrew Elliott, *ibid.*)

Extract from Kai Ludwig: \*) Yupp, VT just got swallowed! <<http://www.guardian.co.uk/business/2010/mar/23/babcock-vt-merger>> Of course Babcock could seek to get rid of the broadcast distribution business now.

If I recall correctly, this firm used to be known as Babcock and Wilcox - and still is when I do a Google search. It has been in business for a very long time and is perhaps extending its "arm" into another sector of engineering? (Noel R. Green-UK, dxld March 27)

The name Babcock & Wilcox is still in use by a US-based company. But this is the UK-based one, nowadays Babcock International Group PLC. They are already in the broadcasting business, by way of installing transmission equipment, cf. <<http://www.babcock.co.uk/pages/markets/critical-infrastructure/communications/>>

Actually Babcock does pretty much the same than VT. And after a second look I rather expect them to keep the former Merlin, also because it appears to be consolidated with VT's military solutions to a considerable extent now. An obvious example are VLF submarine communications, for which transmission equipment has been set up at Skelton if I recall correct.

I'm a bit concerned about this constellation. Broadcasting and military are fields that just do not belong together. OK, VT has nothing to do with program content, but still I think that civilian telcom providers are the reasonable sphere for broadcast distribution, not armaments trusts. (Kai Ludwig, *ibid.*)

15760 "UK Rocks the World," \*1500-1550\* Apr 4, as promoted in Apr 4 e-mail posted in numerous groups. "This is a UKRTW test broadcast. Post your reception reports to [twitter.com \ UKRTW](https://twitter.com/UKRTW) or e-mail <[ukrockstheworld @ googlemail.com](mailto:ukrockstheworld@googlemail.com)>

"Yours Is No Disgrace," "Paint It Black," "Overkill," etc. E-mail rpt

brought brought brief thank you reply. Very strong, steady signal, good audio, a "Greenville-like" signal. But site unknown.

(Jerry Berg-MA-USA, DXplorer April 5)

UK Rocks The World April 4 transmission to North America on 15760 kHz via Woofferton. (wb)

So, is it a pirate broadcaster? (Sergei)

UK Rocks the World has a transmission today (April 4) 1500-1558 UT 15760 kHz to NoAmerica "UK Rocks The World" reception reports to.

<www.twitter.com/ukrtw> or <ukrockstheworld @ >

Weak and fluttery here, very good signal using a Global Tuners receiver in New Hartford, CT, s/on 1501 UT, ID, request for reports, Yours is No Disgrace by Yes.

(Mike Barraclough-UK, BrDXC-UK Apr 4)

And the same here in NW England. Virtually unlistenable for most of the time. I would guess this means a UK site was in use.

(Noel R. Green-UK, dxld April 4)

I have heard them today, April 4, on 5875 with a very strong signal. ID as ukrtw at 1030 UT and off abruptly at 1032 UT in the middle of a song.

(Harry Brooks-UK, dxld April 4)

USA Frequency change of WWCR tx#2 in English:

Frequency change of WYFR Family R. in

Arabic/French/English/English:

0500-0845 NF 9385 YFR 100 kW / 087 deg to WeAf, ex 9340

(R BULGARIA DX MIX News, Ivo Ivanov, via wwdxc BC-DX TopNews April 5)

USA [non] Additional unregistered frequency of Radio Liberty in

Kyrgyz:

1200-1230 on 15265 UNID transmitter // 15140 BIB and 17730 IRA

(R BULGARIA DX MIX News, Ivo Ivanov, via wwdxc BC-DX TopNews April 5)

R Liberty in Kyrgyz noted at 1200 UT from unid tx site. Not from Wertachtal!

(wb, wwdxc BC-DX TopNews April 6)

15550 USB, WJHR, Milton, FL, at 1700-1715 UT on April 1, English fire & brimstone preacher. Gospel music. Very weak.

(Brian Alexander-PA-USA, hcdx Apr 2)

The situation with Greenville has not been definitively approved. At the latest HFCC meeting, the plan to close it had only just been announced. It is likely take some time before IBB is in a position to start negotiating replacements. In the meantime, there's always a chance that the decision is reversed or delayed.

BTW I am still waiting for Sergei to tell us where he got the information that IBB has "a priority over every other station - including RNW." That contradicts discussions I had with my colleagues in Programme Distribution just after we started relaying the VOA Creole service at 1200 UTC, who

told me that IBB would have liked more airtime for Creole via Bonaire but the facilities were not available at the times they wanted due to other commitments. So I am wondering where Sergei got different information from. It makes my job very difficult when misleading information about RNW is circulated but I don't know where/who it came from.  
(Andy Sennitt, ibid., dxld Apr 1)

Already now, with Greenville-B still being operational.

I just took a quick look at the Sackville usage, as an example between 0000 and 0200 UT: Three transmitters Radio Canada International, two transmitters China Radio International. So hardly possibilities left there. And Bonaire is fully in use at this time, too.

In this slot IBB needs two transmitters for VOA Creole, three transmitters for VOA Spanish and another three transmitters for Radio Marti. Altogether eight ones, 100 percent of the Greenville-B capacity.

Good luck finding these eight transmitters elsewhere! I think it's simply impossible, unless they accept using transmitters in Germany, France and/or the UK for some of these eight frequencies. Or, of course, unless they substantially cut back this affair.  
(Kai Ludwig-D, dxld March 27)

And these are the AM QSLs of North American stations collected during my stay in Boulder, Colorado:

KABQ, New Mexico 1350 (3 weeks)  
KBMR, North Dakota 1130 (11 days)  
KBRF, Minnesota 1250 (14 days)  
KCMN, Colorado 1530 (5 days)  
KCSF, Colorado 1300 (4 days)  
KFI, California 640 (24 days)  
KGAB, Wyoming 650 (8 days)  
KGEM, Idaho 1140 (email, 1 day)  
KGHL, Montana 790 (4 days)  
KKOB, New Mexico 770 (6 days)  
KKTY, Wyoming 1470 (66 days)  
KLMR, Colorado 920 (email, 1 day)  
KMOX, Missouri, tx in Illinois 1120 (27 days)  
KOGA, Nebraska 930 (email, 1 day)  
KRVN, Nebraska 880 (55 days)  
KSAL, Kansas 1150 (14 days)  
KSIR, Colorado 1010 (9 days)  
KVCU, Colorado 1190 (9 days)  
KVNS, Texas 1700 (email, 4 days)  
KXEL, Iowa 1540 (9 months!)  
KZNT, Colorado 1460 (3 days)  
Rocky Mountain National Park Information Radio, Colorado 1610 (3 days)  
WBAP, Texas 820 (24 days)  
WDAY, North Dakota (email, 1 day)  
WD2XSH/6 (ham beacon), Mississippi 506 (8 months)  
WLW, Ohio 700 (10 days)  
CBW, Manitoba 990 (13 days)  
CKRM, Saskatchewan 620 (email, 1 day)

Stations from Oklahoma seemed to be collectively unresponsive.

(Eike Bierwirth-D, hcdx April 5)

ALBANIA Der Radio Tirana Hoererklub meldet

<<http://www.agdx.de/rthk/html/neuigkeiten.html>>

Die nachgedruckten QSL-Karten der Trachtenserie stehen nun in der Redaktion in Tirana zur Verfuegung.

Durch eine Versehen ist im zuletzt veroeffentlichten Faltblatt ein Fehler unterlaufen, daher zur Richtigstellung: Der Hoererbriefkasten kommt sehr wohl wie gehabt am Mittwoch, nicht wie im Faltblatt angegeben am Dienstag.

Wir bitten, den Fehler zu entschuldigen. Weiterhin viel Spass!  
(Dr. Anton J. Kuchelmeister-D, RT Hoererklub April 10)

ANTARCTICA 15476.000 LRA-36, 1202 UT, tentative. Only a weak carrier here, detectable in LSB (to escape China on 15480 kHz), but sadly, no audio getting through. Hopefully this is a sign of better conditions to come; didn't even have a carrier on prior attempts. 7 April.  
(David Sharp-NSW-AUS, hcdx April 15)

ARMENIA/PALAU/SOUTH AFRICA/TAIWAN/TAJIKISTAN/UAE/UK  
Some new txions and frequency changes of VT Communications:

AUSTRIA Hallo DX-Freunde in Oesterreich,  
vom 16.4. bis 21.4.2010 werde ich in Oesterreich sein um die Radioarbeit  
von HCJB, die Stimme der Anden vorzustellen. Falls Interesse fuer ein  
Treffen besteht, bitte eine Email an  
<hrosiak @ andenstimme.org> senden.  
Herzlichen Gruss, Horst

Herzliche Einladung zum Radiomissionstag von HCJB und SW-Radio am 8. Mai  
2010 um 1000 Uhr in der  
August-Hermann-Francke-Schule, Georgstrasse 24, 32756 Detmold

Horst Rosiak  
HCJB Global - Voice  
Die Stimme der Anden  
Deutschsprachiger Dienst  
Quito - ECUADOR  
(April 11)

Sonderstation OE10M fuer 72 Stunden QRV.  
Eine Auflistung aller Sonderstationen zum Marconitag findet sich unter:  
<<http://www.gb4imd.org.uk/introduction.htm>>  
(Klaus Spielvogel-D, A-DX April 15)

Die Amateurfunk-Sektion im Oesterreichischen Rundfunk/ORF und das  
Dokumentationsarchiv Funk/QSL Collection betreiben, fuer nur 72 Stunden,  
am Wochenende 23. bis 25. April 2010 eine Amateurfunkstation mit dem  
Sonderrufzeichen OE10M. Am Samstag, dem 24. April, dem "International

Marconi Day", zaehlt OE10M ueberdies, als eine der rund 25 IMD-Stationen weltweit, fuer das IMD-Diplom. QSL via OE-Buero oder direkt an OE1WHC. (Deutschlandrundspruch des DARC, April 15)

... und auch Gute Besserung an Wolf OE1WHC nach dem gesundheitlichen Malheur,  
de Wolfgang df5sx

AZERBAIJAN [NAGORNO-KARABAKH] Voice of Justice heard today in Azeri on approx. 9678 kHz s/on 1303-1330 UT cl/down. Presumed A-10 schedule:

Tue and Fri 1300-1330 UT rep. Wed and Sat 0500-0530 UT on 9677.7 kHz. In the programme was announced the address, as in Passport 2006. (Rumen Pankov-BUL, wwdxc BC-DX TopNews March 30, 2010)

Seems an older jamming site against Radio Free Europe Bulgarian service ?

(wb)

Re Blagoevgrad on 864 kHz.

Last night I also have checked Blagoevgrad on 864 kHz. Congrats! I'm left,

You're right ... (as sings Elvis Presley in 1954). That restoration of

Blagoevgrad on MW it's surprsing to me, because all other Bulgarian

regional stations are off the air on MW. Varna / Plovdiv / Stara Zagora /

Shumen (+Vidin) transmit only on FM since 6th of April. Thank you very

much for having correct us !

The signal that I have observed on 864 kHz from Blagoevgrad is weaker than 150 kW tx. I suppose they has put into operation the former 30 kW tx, which was a standby unit.

Samuil 2x5 kW // transmits on the same frq too, 24 h Horizont + Turkish lang 0500-0530(SS-0600) / 1200-1300 / 1730-1830 UTC.  
(Stoyan Kovatchev, Haskovo-BUL, to Patrick Robic-AUT, April 13)

That's a political issue, to keep Blagoevgrad and Dragoman on air, due of Balcan neighbours, like Macedonia, Skopje 125 kilometers, 170 kilometer to Privista Kosovo province away.  
(wb)

CHINA Mainland jamming in A-10, Echo / Firedrake modes.  
This list is not complete. Due of lousy SW propagation condition this reflects what heard in southern Germany. Even Chinese jamming powerhouses heard - very low - just above threshold on some mbands.

(Bulgarian Radio, Ivo Ivanov-BUL, via wwdxc BC-DX TopNews April 16)

Schedule of Holy Tibet via CNR-11 was changed from April 11.

Holy Tibet in English via CNR-11

1400-1430 6010 7350 9480

0500-0530 9530 11685 15570

The schedule of Tibet PBS is not changed.

Holy Tibet in English via Tibet PBS

2230-2300 4905 4920 5240 6110 6130 6200 7255 7385

0600-0630 4905 4920 5240 6110 6130 6200 9490 9580

1530-1600 4905 4920 5240 6110 6130 6200 7255 7385

(Sei-ichi Hasegawa-JPN NDXC, dxld April 11)

Hi Sei-ichi, no sign of the new schedule noted on April 13. Heard from the

usual 1430-1500 UT on 7350 (in the clear, but weak), // 6010 (poor with usual jamming QRM from 6003) and // 9480.0 (poor with WTWW QRM on 9478.98); with the "Holy Tibet" program in English and playing Tibetan songs. Clearly "Holy Tibet" was not on today from 1400-1430 UT.  
(Ron Howard-CA-USA, dxld April 13)

CUBA [non] Radio Marti is running four SW frequencies at a time now instead of three, to which it was cut back last year. This may be temporary because MW 1180 Marathon FL is off the air for upgrading(?).

April 8 at 2042 UT I noticed that 6030 was already on instead of previous \*2200, but at this early hour it was just barely audible, // 11930 kHz. The only other also very weak 49mb signals vs the noise level were RHC 6110 and CFRX 6070 kHz. Could not hear any jamming on 6030 but maybe too weak to tell.

April 9 at 1311, I hear RM on 9805 in conversation about marmalade, // 11845, and no jamming audible on 9805 kHz. At 1359 monitoring both frequencies, the list to start "en algunos instantes" was "9565, 11845, 11930, 13820" kHz.

Yesterday we had already noted 9565 on the air after 1400, but today it took more than a few instants to bring it up after 9805 cut off at 1400 UT, not until \*1403.6, and no jamming audible there initially. Original A-10 schedule for 9805 was 10-13 UT only.

I figured it would be pointless to consult the RM website for its frequency grid, which they had let languish for months without updating, but this one is axually dated 6 April, as "temporary" showing 4 frequencies at once between 10 and 04 UT:

<<http://www.martinoticias.com/frecuencia.aspx>>

Here it is, converted to UT and to text:

so this fit, XX = 1130

04-07	6030	7405			
07-10	5980 6030	10-XX 5980 6030	6105	9805	
XX-12	5980 6030		9805	11845	
12-13	6030	7405	9805	11845	
13-14		7405	9805	11845	13820
14-18			9565	11845 11930	13820
18-23	6030		9565	11930	13820
23-24	6030		9565	11775	11930
00-01	6030	7365		11775	
01-03	6030	7365	9460	11775	
03-04	6030	7365 7405	9460		

Note there are two totally new frequencies, which I had not yet run across, 6105 and 9460 kHz. Tough luck, XEQM!

The color coding uses a slightly different shade of green for these blox, indicated as temporary. Apparently during most of the day there was an extra transmitter available at Greenville; not sure if this also indicates a cutback in Creole or other services. We do know that the one used for DRM in the daytime on 9445-9455 kHz has been liberated:

6105 1000-1130

11845 1130-1300  
9805 1300-1400  
9565 1400-1700  
11845 1700-1800  
6030 1800-2200  
13820 2200-2300  
11775 2300-2400  
9460 0100-0400

The gap at 00-01 UT is during "A Fondo" Tue-Sat, the joint show with VOA, when one of the transmitters is "VOA" instead, but axually totaling five frequencies with same program during that hour 5890, 6030, 7365, 11775, 11970 kHz, as monitored April 9 at 0045 UT, and they were all jammed. The DCJC has not been so quick to extend its jamming to the entire expanded temporary schedule of RM.

As for what happen UT Sun & Mon, RM grid does not go into such details and it still shows 1180 kHz as on the air 24 hours. ALL, except for the UT Monday 03-09 UT truce.

Here's the program schedule grid which automatically shows the current week's dates, and with GMT confusingly in AM and PM:

<<http://www.martinoticias.com/RDprogramacion.aspx>>

(Glenn Hauser-OK-USA, dxld April 9)

CUBA As previously noted, RHC has been colliding with Portugal on 12020 kHz after 2300 UT, both targeting South America. Portugal is M-F only into UT Sat, but at 0015 UT April 13, RDPI was alone on 12020 kHz so we guessed RHC had moved somewhere else.

However, at 0034 UT April 15, RHC was back on 12020 kHz with its crackly transmitter, and RDPI music could be detected underneath // 9715 kHz. But nothing on RHC's // 12030! No, Arnie, it's 12020 kHz you need to evacuate, not 12030.

(Glenn Hauser-OK-USA, dxld April 15)

CZECH REP/USA Radio Miami International - Relay of Radio Prague /  
Attn. Jeff White

Hi Jeff,

We at WORLDWIDE DX CLUB are just uncertain, if WRMI is still relaying Radio Prague's English, Spanish or French transmissions to North America. Radio Prague's transmission schedule does not mention anything, the HFCC schedule not as well. However, in the schedule published at

<<http://www.wrmi.net/schedule.php>>

and also in Glenn Hauser's DXLD the relays are still mentioned.

I should be very glad if you could confirm or not confirm these relay transmissions.

For today best wishes and kind regards from Germany,  
Michael Bethge

During the A10 season, we have changed many of the Radio Prague relay times on WRMI.

Currently, we are airing Radio Prague in English daily (7 days per week) at 1400-1430 UTC, Monday through Friday at 0600-0630 UTC, and Saturday and Sunday at 0900-0930 UTC. We are airing Radio Prague in French Monday through Friday at 1330-1400 UT. And we are airing Radio Prague in Spanish Saturday and Sunday at 0930-1000 UTC.

This schedule is subject to change, and we may be adding some more relays of Radio Prague's Spanish program in the near future.

All the best. Jeff

ECUADOR 4814.95 Radio El Buen Pastor, Saraguro Loma Loja. 0910 UT  
musica linda, good signal 4 April.  
(Robert Wilkner-FL-USA, hcdx April 15)

ETHIOPIA/ERITREA 7140 / 7165 / 7140 um 1730 in Arabisch, ohrenscheinlich  
// zu 7165, wo gerade neben Aethiopien auch Eritrea sendet.

Herbert Meixner: Sprecher, relativ klar zu empfangen in AM und 10 kHz.  
Horn{of Africa}-mx. O=2/3

7110 kHz Radio Ethiopia SIO 354-3  
7140 kHz UNID SIO 243 (Ethiopia / Eritrea)  
7165 kHz Ethiopia, hiss jamming SIO 322  
7185 kHz UNID, Myanmar / Burma? SIO 242, low modulation  
7195 kHz Kuwait SIO 455  
7200 Sudan missed at present.  
(Thorsten Hallmann-D / Herbert Meixner-AUT, A-DX April 13)

ERI/ETH radio war.  
Eritrea on 7185 kHz. I can hear on 7185 kHz at 1535 UT on Apr 15  
// 7165 kHz. Spurious?  
(Sei-ichi Hasegawa-JPN NDXC, dxld April 15)

Not spurious. We've been monitoring with Mauno since yesterday. Eritrea has now three transmitters in parallel on this frequency range. One basically on 7185 kHz, may jump to 7175 kHz at times. The one usually on 7175 jumps to 7165 kHz when jammed. Third one was yesterday on 7140 UT, today on 7120 UT, unjammed so far. I guess fourth transmitter is still on

7210 UT carrying home service.  
(Jari Savolainen-FIN, dxld April 15)

Tonight Radio Kuwait is there on 7190 kHz and Eritrea on 7185, 7175 and 7120- (-last night 7140) kHz.

1080 Haeju, oriented toward Seoul, not that far distant, looks like a very standard Chinese design, used by many others, too (such as BBC Ladies Mile 90 degree and 270 degree main lobes, AIR N. of Mumbai toward Karachi).

Two driven radiators 1/2 wave spaced, 2 parasitics 90 degrees behind, turning the "skinny figure 8" from the two driven radiators into a "cosine squared" unidirectional pattern. A very simple and straightforward and cost effective way of obtaining high gain.

I have seen a Chinese 200 kW transmitter at a (redacted) SE Asia location which had the diagram for this type of array etched into its front panel controls even though its current user employed an entirely different pattern.

KUWAIT 7190 / 7150 Radio Kuwait in 7.1 - 7.2 MHz ham radio frequency segment.

First reported by Martien from Holland on April 12:  
7190 Radio Kuwait, 1804-1825 UT on April 12, Arabic clear ID, brief items on international football mentioning lots of players & coaches. Superb signal, first time noted here, is this a regularly scheduled NF in amateur band?!  
(Martien Groot-HOL, dxld April 12)

Wie HFCC angemeldet: Kuwait 7190 kHz ... Ist tatsaechlich von der High Frequency Co-ordination Conference (HFCC) koordiniert:

7190 kHz, 28.03.-31.10.2010, taeglich 1600-2200 UTC, 500 kW ueber horiz. Quadrantantenne (Rundstrahler, EIRP 2 MW) mit 40 degr Elevationswinkel

("lokale" Versorgung um Kuwait ueber Raumwelle), Reichweite mit hoher Feldstaerke nur etwa 1000 km.

(Bernhard Weiskopf-D, A-DX April 12)

Radio Kuwait is 59+60dB here in EI.

(McNamara EI4GXB, Intruder Alert April 13)

Radio Kuwait on 7150 kHz at 1900 UTC.

Dear friends of IARU-MS,

I am just (13 April 1900 UT) hearing R. Kuwait on 7150 kHz with S9+30dB. I could clearly identify it as the stn announcement was at 1902 UTC. Hani Raad this morning had already received a report from a ham citing Radio Kuwait on 7150 kHz. Until now I did not hear Radio Kuwait on 7190 kHz (nil at 1800, 1830, 1900 UT). I will keep on listening. Pse listen yourself and invite your national telecoms. authorities to listen also and to send an International Complaint.

[later] Radio Kuwait in Arabic is now on 7190 kHz (2028 UTC). At 2000 UT the QRG was clear. The signal is, as yesterday, S=9+30dB with a dipole antenna. I guess the txer will s/off at 2100 as yesterday April 12.

Happy listening Uli DJ9KR, Intruder Alert (April 13)

Kuwait on 7150 kHz at 1630 UT on today.

My DX-friend in Akita-JPN confirmed s/off at 2100 UT on Apr 12 on 7190 kHz.

(Sei-ichi Hasegawa-JPN, NDXC April 13)

I'm afraid so, 16-22 UT 500 kW non-direxional to the ME.

(Glenn Hauser-OK-USA, dxld April 13)

Strong signal also here [in Finland] on 7150 kHz at 1730 UT Apr 13. Maybe the same unit that was testing Jan 27 with Quran programming on 7130, 7160, 7190 etc.

(Jari Savolainen-FIN, dxld April 13)

Hello all, Radio Kuwait heard loud and clear on 7150 kHz at 0350 UT 14th April. Complaint will be laid with CCK[Kenya] today and 7190 kHz will be checked but is clear at this time.

(73, Ted 5Z4NU {E.H.M. Alleyne}, ARSK Nairobi, Intruder Alert April 14)

R. Kuwait at 1610 UTC on 7190 kHz with S=9+30dB. Dear Intruder Busters, I have just heard R. Kuwait on 7190 kHz. It seems the stn has started a bit later than 1605 UT, bcos at 1605 it was not active. Now at 1610 UTC it is. The German Telecoms[BnetzA]. Authorities are informed and have taken a fix.

(Uli DJ9KR, Intruder Alert April 14)

Radio Kuwait at 0350 UT April 14, on 7150 kHz. A complaint has been filed with the Indian authorities today. Also about Sri Lankan Broadcasting Corp Colombo {Ekala transmission} on 7190 kHz.

(73, Gopal Madhavan-IND VU2GMN, Intruder Alert April 14)

Carrier start at about 0158.5 UT 2010-04-15, modulation started 5 sec later, sounding like cut straight into program material already running.

ID on either side of top-of-hour at 0200 UT is in attached file. ID at bottom-of-hour at 0330 UT also attached. Good copy at PI4THT until ~0600

UT or so 2010-04-14, with carrier still heard after that. Anybody know how to say "radio" in Arabic?

(73, ex-VR2BG/p. Intruder Alert April 15)

Tonight Radio Kuwait is there on 7190 kHz and Eritrea on 7185, 7175 and 7120- (-last night 7140) kHz.

(Victor Goonetilleke-CLN 4S7VK, Intruder Alert April 15)

"Houna al Kuwait" usually. It is Radio Kuwait in Arabic from 0200 UT on 7150 kHz, listening today 16th April 2010.

(Arasu vu2ur, Intruder Alert April 16)

Arabic - German translation:

"Funkwellen und Ueberschneidungen mit dem Amateur" waere der Betreff der Mail von Abdulhafiz Kashkar gewesen.

Und dann schrieb Hafeez:

Friedens, der Barmherzigkeit und der Segen Gottes. Morgens gluecklich sein, so Gott will. Problem mit Radiowellen und Tdakhlm haben nicht nur Amateur-Funkstoerungen eritreischen Ethiopian oder die Frequenz 7110 kHz Radio Kuwait zu kommen und beginnen Rundfunks auf der Frequenz 7150 kHz vom fruehen Morgenstunden und in der besten Albroobakishn mit dem amerikanischen Westen und den Pazifik. Ich weiss nicht, wie lange ist Thema ignoriert.

Ich hoffe, dass Sie das Problem mit den Betroffenen aktivieren.

Ich gruesse Sie und 73

Hafeez 7Z1CQ

(intruder alert April 14)

Did you see the various correspondence mail on the newsgroups of Radio Kuwait Arabic appearance on 7150 kHz mornings and 7190 kHz at late afternoon/night, using non-dir HQ quadrant antenna #935 with 0.3 lambda above ground level.

3 x HQ Quadrant antennas ITU type #935, non directional located between the two transmitter house installations, visible see

LAOS 7145 Lao National R., Vientiane, at 1343-1400\* UT on April 15.

Tuned in expecting to hear their domestic news in English, but instead had nice selection of non-stop Laotian songs; suddenly off with never any ID.

Did not sound like their normal FM programming they usually run after the news; not // 6130 kHz. A one day event?

(Ron Howard-CA-USA, dxld April 15)

LIBYA 15215.008 Voice of Africa, 1722 UT, French, talk by a woman with brief African music bridges, peaking at about S9+30. Listed parallel of 11995 kHz not heard. 2 April.

(David Sharp-NSW-AUS, hcdx April 15)

MALAYSIA 15295 Surprisingly fair level signal from RTM K-L Kajang, English news read by Cambridge like high-British accent English newsreader. Still in progress at 0904 UT Apr 14. As beam headed of 133 degrees towards Pacific, I guess RTM signal signal came longpath across Pacific, Easter Isl, Colombia, Bonaire and Azores to my post.  
(wb, wwdxc BC-DX TopNews April 14)

MEXICO 4800.000 Radio Transcontinental XERTA, 1053 UT, Spanish, local ballads with brief talk by a male announcer. Under co-channel China. 30 March.  
(David Sharp-NSW-AUS, hcdx April 15)

MOLDOVA 12130 YFR Bible Hour via Grigoriopol Moldova relay, like Arabic lang sce 1500-1600 UT, deep fades. S=6 poor signal.  
(wb, wwdxc BC-DX TopNews April 12)

NIGER 9705.00 back on air, daily til approx. 0700 UT.  
Nachdem Montagabend und Dienstagmorgen die Hoerversuche erfolglos verliefen, ging Niger 9705 kHz heute morgen wieder gut, aber um 0649 UT war schon Schluss. am Montag immerhin bis 0700 UT, wobei um 0655 UT umfangreiche Frequenzansagen in Franzoesisch kamen.  
(Thorsten Hallmann-D, A-DX April 9)

9704.99 LV du Sahel, Niamey, 2115-2145+, April 9, reactivated? Tentative log with vernacular talk. Local tribal chants. Local music. Poor to fair in noisy conditions ... Phone-ins "La Voix de Sahel, allo?" 2206 UT.  
(Brian Alexander-PA-USA, dxld Apr 9)

ORTN-La Voix de Sahel heard at +1900-2301\*UT on Apr 9 in Vernacular and French. Talking drum and local Flute IS at 2148, as ID in French at 2151 and National Anthem at 2259 UT. 1st noted at 2045 UT on Apr 8. [and mornings Apr 9 here in Germany]  
(Sei-ichi Hasegawa-JPN NDXC, dxld Apr 9)

NIGERIA Voice of Nigeria introduced a new schedule from April 4, as announced during the French service. It's not on the homepage, but a few things have definitely changed, further monitoring needed:

9690 1700-1730 Kisuaheli  
15120 1730-1800 Arabic  
15120 1800-1900 English, (announced as until 2000 UT,  
likely changing to 7255 kHz)  
7255 2000-2100 French (announced during the morning service)  
15120 0500-0700 English, 0700-0800 French and  
9690 0800-0900 Hausa unchanged.  
(Thorsten Hallmann-D, <<http://www.africalist.de.ms>> dxld April 11)

The following announcement was heard during the "This Week on VON" programme from Voice of Nigeria, 1805-1815 UTC on Sunday 11 April 2010 (I was listening online at <[www.voiceofnigeria.org](http://www.voiceofnigeria.org)> but 15120 kHz was offering good reception when checked):

"... this is to inform you that there is now a slight change in the number of hours we broadcast on 15120 kHz in the 19 mb to North Africa and Europe, and on 9690 kHz in the 31 mb to West Africa.

On 15120 kHz you can listen to programmes in English between 04.45 and 07 hours, and between 15 and 19 hours UT daily. While on 9690 kHz broadcasts of programmes in English begin at 09 hours and 15 hours UT, and between 19 and 20 hours UT daily".

Perhaps for 9690 kHz they meant "between 09 and 15 hours UT"?

Perhaps these changes are related to the new shortwave transmitter site at Abuja coming on air. However, the schedule will need to be monitored as they seemed to be getting mixed up with time announcements (i.e. they said it was "15 hours UT" when it was 1800 but acknowledged the mistake at 1805), and prior to that Arabic was heard at 1745 UTC tune-in online and I'm sure it was also on 15120 kHz, although reception was very poor (reception improved significantly for English at 1800 UT which must have been due to an antenna change).

(Tony Rogers-UK, BrDXC-UK April 11)

I came across V of Nigeria with their programme in English Sunday 11 April at 1515 on 15120 (with the Musical Heritage programme). Just before 1600, they announced that programmes would continue in Kiswahili. 15120 in English went off at 1600. At 1601 found VoN in Swahili on 11770 until 1630 UT. No trace of programmes at 1630 (although still streaming online in unknown language). At 1735 observed back on 15120 in Arabic, and then English from 1800 until 1900 UT. Still streaming online in English at 1900 UT - 9690 is completely blocked at present by Radio Romania Int.

(Alan Roe-UK, BrDXC-UK April 11)

Schedule changes for Voice of Nigeria.

To complete with yesterday's and current observation:

1500-1600 15120 E to Eu, very strong both Sun+Mon

1600-1630 11770 Kiswahili to ??? (very strong on Sun)

1630-1730 9690 Yoruba and Igbo ??? Not Kiswahili.

Not heard Sunday at 2100/2200 UT, not heard Monday from 0900 to 1500 UT on 9690 kHz, as scheduled, or anywhere else, starting again 1501 on 15120 kHz. E to Eu is definitely not 1500-1900 as Tony Rogers heard, but only 1500-1600 + 1800-1900, probably changing to 7255 (likely not 9690) kHz for the rest of the evening, but it's a very crowded channel. If English really starts at 0900 UT as announced, Fulfulde is likely to be in the evening now.

(Thorsten Hallmann-D, dxld April 12)

Re: Perhaps these changes are related to the new shortwave transmitter site at Abuja coming on air ...

Yes, it makes sense. Maybe is the OVERTURE for organizing a reshuffled foreign service from new Abuja downtown broadcasting house during the present year 2010 ... but there are some delays in Civilworks. The 3 new Thomson TXs at Abuja Lugbe site are ready since mid Dec 2009.

Last week Thomson Abuja site antenna engineer Bodo Fritsche\_DL3OCH / 5NOCH came back from Maldives trip and was surprised to see the Abuja TX site like excellent visible in Google Earth.

<<http://www.youtube.com/watch?v=sztmmg7FJLs>>

QSL addresses aof 2006:

Radio Abuja 7275 kHz. QTH: Broadcasting House, P.O.Box 377, Gwagwalada / P.M.B.71, Gark1, Abuja, Nigeria. v/s Ben Obeta.

FRCN Abuja National Station, Broadcasting House,  
P.O. Box 377 Gwagwalada/P.M.B. 71, GARK1 ["GARK one"], Abuja, Nigeria.  
tel. 09-8821065 & 8821341, fax 09-8821040.

Mail of 19 Dec 2009:

So we will wait impatiently for the start of the new English, Arabic, French, Kiswahili, Hausa, Fulfulde, Igbo, Yoruba and new Portuguese, German, Mandarin Chinese and Hindi[Urdu?] services on 7255 9690 11770 15120, and possibly ?17800 kHz too.

17800 kHz is not an official FRCN client frequency yet, but is in discussion.

Also 2 x 100 kW SW txs of 7275 kHz at FRCN Abuja in Gwagwalada, 32 kilometers westerly should be overhauled by Thomson engineers in spring 2010.

(wb, wwdxc BC-DX TopNews April 12)

PAKISTAN/UZBEKISTAN Something colliding on 15540, April 13 at 1310, the stronger signal slightly off to the hi side, producing a wavering whine, one talk, one music.

At 1328, SoAsian music on the hi side is atop the talk on the lo side, and the lower one goes off at 1329, while the hi side makes an announcement, and then a brief riff which sounds hymnic.

Still trying to figure out what the remaining signal is at 1350, a bit of music sounds HOA, later Chinesish, 1355 SEAsish, now with heavy flutter. 1400 a brief tone and off.

Eibi shows 15540 kHz with R. Pakistan in Tamil at 1300-1330 UT. Aoki has nothing at all in this hour. The other one must be something new.  
(Glenn Hauser-OK-USA, dxld April 14)

Co-channel unid service towards Korea via Tashkent 1330-1400 UT. (wb)

PERU 3329.573 Ondas del Huallaga, Huanuco, 2345 UT on 14 April, very strong, 1012 to 1037 UT good signal with hyper yl, 13 April, same time 9 April.

4790 Radio Vision Chiclayo occasionally silent during 0900 to 1100 UT, 13 April.

4824.49 La Voz de la Selva, Iquitos 2330 and 1030, regular.

4835.52 Radio Maranon Jaen. 1020 UT under adjacent 4840 kHz slop, narrow filter 12 and 13 April.

4857.4 Radio La Hora, Cusco. 2350 UT, 8 and 11 April.

4949.9 Radio Madre de Dios 1030-1040 UT, opening to Florida, 1, 3, 7 April, 2 April at 1025 UT slow om en Espanol to 1040 UT fade out. Several times English language UTE mixing with signal.

Complete VoR A-10 schedule for the summer season.

I forgot to say that I regular update VoR sked which is published on the DX-Portal

<<http://dxing.ru>>

Of course if VoR technical staff inform me about changes.

MB: Thanks a lot for sending the complete VoR schedule in Russian.  
Can you give me a direct link to the VoR schedule on your DX-Portal

<<http://dxing.ru>>

I have not found it there, but I have to admit that my knowledge of the Russian language is not very good.

VA: direct links

All languages excluding Russian

RUSSIA/TAJIKISTAN 15195 Supposedly an additional Radio Tatarstan Kazan transmission in Russian noted at 0800-0900 UT, April 14. From Tatar Radio

via Russian Samara tx center. Talk between female journalist and male musician from Kazan. Strength jumped up to S=9+20dB level. Time pips at exact 0900 UT, tx switch off at 09:00:45 UT.

Re my wrong WBCQ logging of 17494.94 kHz.

Noted once again an English newsreader on 17494.94 kHz at 0915 UT this morning, so seemingly rather Voice of Russia via Dushanbe-TJK scheduled 0700-1000 UT to SoEaAS/PAC, AUS/NZL, though tiny signal in Europe. This tx observed also at unscheduled time slot 14-15 UT.

11750 SLBC rather some Home Service in Sinhala from 1630 UT was in B-09 and now is daily. Today under Beijing's jammer.  
(Rumen Pankov-BUL, wwdxc BC-DX TopNews April 10)

Sri Lankan national broadcaster SLBC has started relaying BBC World radio on FM band. The relaying starts the BBC English, Sinhala and Tamil programmes after a 14 month break. The BBC suspended its rebroadcast in February last year.

The BBC programmes were suspended in February last year "following deliberate interference in its broadcasts," BBC said in a statement.

During the suspension, the BBC's services in all three languages remained available in Sri Lanka via short wave; on [bbc.com/news](http://bbc.com/news), [bbcsinhala.com](http://bbcsinhala.com) and [bbctamil.com](http://bbctamil.com) via the Internet; and news bulletins in English via the Sri Lankan commercial broadcaster MBC.

Director of BBC Global News Peter Horrocks said that the BBC wishes to rebuild its partnership with SLBC.

"We have been reassured by SLBC that our contractual agreement will be respected, which guarantees that our programmes in English, Sinhala, and Tamil are broadcast uninterrupted," he said. Mr. Horrocks added that the BBC audiences value the editorial integrity of its programming.

"Our audiences understand that in order to cover news events in the most

comprehensive and balanced way, the BBC adheres to specific editorial values that include impartiality, editorial independence and seeking a relevant range of views on any topic," he said.

(Daily\_Mirror April 15 via Jaisakthivel-IND)

SURINAME 4990.064 Radio Apintie, 1044 UT, no ID, but presumed with Dutch-sounding man, then brief ad or jingle at 1045 and further comments. Very weak and low modulation. Almost perfect grayline from my location to Suriname this hour. 30 March.

(David Sharp-NSW-AUS, hcdx April 15)

TUNISIA DX Mix News, Bulgaria, just published the A-10 schedule of RTT, including 7275 kHz at 0500-0730 and 7335 at 0700-0830 UT. Based on previous experience I found this questionable, and sure enough, April 9 at 0550 check, both 7275 and 7335 kHz were on in //, Arabic music, 0600 both into Arabic talk, 0601 Akbar; the lower one stronger, but both rather poor unlike pre-magstorm and in the B-season when they were a great source of easily-listenable nightmiddle music. DX Mix info must be from imaginary HFCC registrations.

We need to monitor the \*axual\* opening and closing times of these and all other RTT frequencies, the other morning ones being 12005 and 9725 kHz; evening 12005, 9725, 7345, 7225 kHz.

(Glenn Hauser-OK-USA, dxld April 9)

The 0626-0627 UT closing of 7275 kHz is exactly the same time as in B-season, as I reconfirmed several times by monitoring; it did not vary more than one minute as if controlled by a timer, interrupting whatever programming was in progress, and I think 0805v UT also for 7335 kHz as per your monitoring, right? So perhaps there has really been no change in the A-season.

(gh)

Monitoring RTT this Sunday morning - the 11th - I heard 7275 kHz stop broadcasting during a musical item and the transmitter off almost immediately at 0626 UT. Meanwhile, parallel 7335 kHz didn't go off until 0\*8\*05 UT. So was the latter a mistake or for real?

Yes, this is what it is looking like. On Sunday the 11th March I heard 9725 and 12005 kHz open at 1556 UT, 7225 came up at 1656 UT, and 7345 at 1856 UT - all at four minutes to the hour. Carrier only for a short time before then. I could not hear 9725 and 12005 kHz at re-check 2015 UT or 7225 kHz at re-check 2115 UT, but 7345 kHz was still on, although badly QRMed - by CRI in Italian I think. All frequencies suffer some co-ch QRM despite being registered.

Today the 12th, 7275 kHz again went off suddenly at 0626 UT and 7345 kHz at 0806 UT. So all of these timings approximate the B-09 schedule. And it does seem that a timer is in use now instead of a man(ual) system.

Glenn - from past experience the sign-on/off times will vary by minutes each day, so the times quoted will be an approximation of what is intended rather than what actually happens. As we know, the same applies to Jordan, Kuwait and Saudi Arabia when we are sometimes 'allowed' to hear part of a unscheduled broadcast on a particular frequency. This is different to Iran which can be heard at times broadcasting in a language that is not scheduled at that time, only to find that it will drop off air part way

through. This usually happens when a transmitter is not switched off after the service it has been carrying terminates.

(Noel R. Green-UK, dxld Apr 11/12)

UGANDA 4975.972 Radio Uganda, 2000 UT, English, in the clear with Voice of Russia Tajikistan off today. Military band anthem or similar, then long-winded speech by a man, through until 2050 UT. Didn't pay close attention, partly because of the muffled audio. Best-ever reception of RU here. 3 April.

(David Sharp-NSW-AUS, hcdx April 15)

4975.96 R Uganda, at 1740 UT on April 14, English "News Hour" back here getting VOR 4975 kHz. Apparently their extended stay on 7194.98 kHz yesterday was just a one-day event.

(Martien Groot-HOL, dxld April 14)

UKRAINE Radio Ukraine International off SW.

From April 12, RUI's shortwave transmitters in Kharkiv and Lviv have been switched off. Also the same was done with all mediumwave transmitters of UR1 channel. Only transmitter on 657 kHz in Chernivtsi with RUI's Romanian service and UR3 operates in the night. Also the UR1 transmitter on 207 kHz in Brovary (Kiev) is active from 0230 to 2100.

(Alexander Yegorov-UKR, dxld April 14)

This means RUI is off the SW air completely, including the 0000-0100 UT English to North America which was high power from Lviv on 7440. All the other frequencies Kharkiv. Is this permanent, or another temporary shortage of funding?

(Glenn Hauser-OK-USA, dxld April 14)

RUI missing from its formerly reliable big signal on 7440, English to NAM at 00-01 UT, checked 0005 UT April 15. Alexander Yegorov reports that ALL SW transmissions of RUI from Lviv and the lower-powered Kharkiv site were turned off April 12.

Not clear whether this is temporary or permanent, but Ukrainian MW has also been drastically cut. Previously there have been interruptions in RUI service when funding ran out, but then resumed.

(Glenn Hauser-OK-USA, dxld April 15)

Just send in your complaints to Kiev and to the Ukrainian Embassy in DC and RUI will be back on the air. Most likely it's just the issue of funding - not some ideological decision to give up on SW. The Ukrainian diaspora is well organized. I suspect they are going to flood the station with complaints.

(Sergei, dxld April 15)

I don't think complaining will make any difference. The Ukrainian diaspora isn't paying the bills to keep RUI on the air. Many governments, and in turn, national broadcasters are experiencing severe budget shortfalls. Cuts have to be made, such as the recent reductions in Bulgaria.

Once all these transmitters have been off the air for a while the former audience will find other ways to listen or get information ... and there won't be any reason for the governments involved to reinstate the broadcasts. Sad for longtime SWL's, but it's the cold reality of strained finances and changing technology.

(Steve Lusetx, dxld April 15)

I respectfully posit that you've been listening a bit too much to Andy Sennitt :-). I've been an SWL for 34 years and when I started, the international broadcasters had nothing in their mandates about being cost-effective. The object of the game was to get their message out to as wide an audience as possible and the bottom line was secondary, if that.

Not everything in life should be run like a business.

(Anne Fanelli in Elma NY, dxld April 15)

UNID 9350.00 Some engineer checked a tx on air in 31 mb at 0800-0815 UT, maybe some of the VT-group beast from England. S=8-9, no content, just carrier.

(wb, wwdxc BC-DX TopNews April 14)

UNID 9385.00 a S=6-7 signal observed at 0817 UT Apr 14. Even with SYNCR option in E1 I couldn't trace the exact language, but I guess it was an English speaking typical US like religious prayer. WWRB is scheduled on 3185 til 1200 UT and later on 9385 from 1200 UT in US-FCC list.

At same time 08-09 UT fair propagation level from the west, like Shepparton-AUS on 9580, 9590, 11945, and 13630 kHz, the strongest was 9710 on S=7 level. Supposedly via long path Pacific, Easter Isl, Colombia, Bonaire, Azores into Europe.

(wb, wwdxc BC-DX TopNews April 14)

UNID UTE stations in bc bands at 0800-0900 UT probably from Americas ... Unid RTTY 9652 S=4 at 0825, 9864 at 0830 UT, 11523.90, 11913.50, 12149, STANAG on 12061 kHz, at 0840 UT.

(wb, wwdxc BC-DX TopNews April 14)

U.K. 11615 Polskie Radio Warsaw via Woofferton in Ukrainian 1500-1530 UT, noted at 1505 UT April 12, suffered and covered by China mainland echo jamming. Scheduled IBB Saipan 1400-1500 UT, I guess VOA Cantonese sce. But CHN jamming last longer into 15-16 UT slot.

(wb, wwdxc BC-DX TopNews April 12)

USA Frequency change of Voice of America in Spanish:

2300-2400 NF 11970 GB 250 kW 174 deg to SoAM, ex11625, till 0100 Tue-Sat (Bulgarian Radio, Ivo Ivanov-BUL, via wwdxc BC-DX TopNews April 16)

QSL WTWW 9480 kHz bestaetigte meinen Empfangbericht in 67 Tagen mit einer undet. Karte. Adresse: 6611 Ormond Dr., Nashville, TN 37205, USA.

(Patrick Robic-AUT, A-DX Apr 12)

Dear NASB Members and Associate Members,  
Solomon Meyer sent us the attached obituary regarding his father,  
Elder Jacob O. Meyer.

Elder Meyer will be greatly missed by the NASB family. He'd been an active participant in the NASB for many years, including spending several terms as a Board Member.

Best Regards, Dan Elyea  
NASB Secretary/Treasurer (April 12)

PDF page of Jacob O. Meyer

<[http://yahwehstruth.net/galleries/misc/Jacob\\_Meyer\\_Obituary.pdf](http://yahwehstruth.net/galleries/misc/Jacob_Meyer_Obituary.pdf)>

Elder Jacob O. Meyer Obituary.

<<http://www.legacy.com/obituaries/ldnews/obituary.aspx?n=jacob-o-meyer&pid=141757892>>

<[http://www.meaningfulfunerals.net/fh/obituaries/obituary.cfm?o\\_id=578618&fh\\_id=11666&s\\_id=10403217DAA498B17279FAC2E236B120](http://www.meaningfulfunerals.net/fh/obituaries/obituary.cfm?o_id=578618&fh_id=11666&s_id=10403217DAA498B17279FAC2E236B120)>

WMLK was one of those strange US-based SW stations - along the lines of KJES and perhaps WJCR. It was Elder Jacob O. Meyer's personal project. WMLK didn't really have a the serious support base among the traditional Christian churches. Assemblies of Yahweh being a minor splinter group.

I don't want to sound negative but I cannot imagine the station ever returning on the air without Meyer's involvement ... I wonder what is going to happen to that "BBC 250 kW [transmitting] unit".

The watered-down history of the station is found here:

<<http://www.wmlkradio.net/history.html>>

(Sergei, dxld April 13)

The obituary, with a nice portrait, mentions WMLK shortwave only in passing among his greater accomplishments. The website

<<http://www.wmlkradio.net>>

does not yet have the obit, with Elder still greeting us on the home page.

We suspect this may further set back the reconstruxion of WMLK which has been off the air for years. But perhaps he will eventually become another active post-mortem shortwave broadcaster? The website has a lot of photos and info about the antenna damage, and also of the 2009 Winter SWL Fest among other things.

(Glenn Hauser-OK-USA, dxld April 12)

While shortly after sign-on April 8 at 1510 UT, KVOH 17775 kHz spurs were audible as noise blobs, plus and minus 145 kHz, at next check 2031 UT they were much stronger and tho extremely distorted on 17920 and 17630 kHz, music modulation and the beat matched fundamental. 17775 kHz hit at least S9+25, tho at the high end of the scale it's not accurately calibrated on the FRG-7.

15550-USB, WJHR very weakly audible with you know what, April 9 at 1404 UT, shortly faded out. Was benefiting from sporadic E opening, which did WWCR 15825 kHz a lot more good.

(Glenn Hauser-OK-USA, dxld April 9)

VATICAN STATE 7140 Vatican Radio spurious intermodulation of 7250 / 7360, April 13, 1800 UTC ... ID in Romanian. SIO 253.

(Thorsten Hallmann-D, A-DX April 13)

Only observed on days of better propagation.

That's discussed already on March 13 in German Bandwatch mail, before A-10 season started.

Problem 7250 / 7365 in B-09

Problem 7250 / 7360 in A-10

From March 28

7250 1630-1930 SMG 250 10 Multi CVA VAT  
7250 1930-2020 SMG 250 326 FrenchEngl CVA VAT

und im gleichen Band

7360 1800-1840 SMG 250 55 RomBul CVA VAT  
7360 1840-1930 SMG 250 4 Multi CVA VAT

[then in A-10 IM 7 1 4 0 kHz]

(wb, wwdxc BC-DX TopNews April 13/14)

ZIMBABWE 6045 ZBC Gweru, at 0229-0306 UT on April 14, DJ in vernacular playing pop songs, none of which I recognized except "Every breath you take" and "The eye of the tiger". Usual distinctive drums at 0301 UT then into presumed news fading out. Weak but frequency is clear throughout. (Martien Groot-HOL, dxld April 14)

Hallo Radiofreunde,  
wie bekannt, findet das DX-Camp des Rhein-Main-Radio-Clubs vom 19.4. bis 25.4.10 in Langenselbold, Naturfreundehaus statt.

Freitag bis Sonntag wird uns  
Tibor Szilagyi, der Generalsekretaer des Europaeischen DX Council EDXC

besuchen. Er kommt fuer den RMRC-Besuch extra aus Schweden und wird uns erklaren, warum es den EDXC gibt, welche Aufgaben er hat und was er uns DXern bringt.

Den EDXC-Kritikern, von denen es wohl auch in der Liste einige gibt, bietet sich die Gelegenheit, dem derzeitigen EDXC-Generalsekretaer persoendlich Fragen zu stellen und ihm auf den Zahn zu fuehlen.

Am Freitag 23.4. besucht der RMRC Radio Andernach.  
(Anmeldung erforderlich!)

Samstag am Sa. 24.4. Vortrag Tibor Szilagyi.  
- warmes und kaltes Buffet

Eingeladen zum DX-Camp sind alle Radiofreunde und DXer. Empfaenger, Kopfhoeerer und gute Laune solle jeder selbst mitbringen.

Harald Gabler  
RMRC Vorstand  
(April 13)

New Domestic Broadcasting Survey

Dear DX-friends,

DSWCI have just published a new, fully updated edition of the Domestic Broadcasting Survey, the 12th Edition.

Please have a look at

<<http://www.dswci.org/news/2010/1004/dbs-12.pdf>>

for further information.

(Anker Petersen-DEN, DXplorer April 10)

#####

A lot of Chinese assignments. The latest ITU GE75 additon contains a large amount of Chinese assignments.

ALBANIA 13640 excellent late spring RT signal tonight. S=9+40dB  
EXTREME PEAK SIGNAL from Shijak received here in Germany tonight. Also //  
7520 kHz powerful at S=9+20dB level. 1848-1857 UT noted interesting news  
bulletin and Albanian "Panorama" newspaper headlines. About Berisha in  
Brussels with EU talks; hydro-electric power station; Women's forum in  
Tirana International hotel.  
(wb, wwdxc BC-DX TopNews April 20)

ANGOLA 7216.745 Radio Nacional, 1920, Portuguese, local ballads with  
male announcer. Running very low modulation and almost no audio getting  
through. In fact, similarly-low audio // (4949.797) was easier to copy.  
Both frequencies drift a bit. My last log for this one had it on 7217.050.  
16 April  
(David Sharp-NSW-AUS, dxld Apr 17)

ANTARCTICA LRA36 is supposedly scheduled 12-15 UT, only on M/W/F, so  
after hearing it Monday, I did not even check for it Tuesday, heard it  
again Wednesday but did check for it Thursday April 22 as I was already  
only 26 kHz away on Ankara. By golly, there is a carrier with some pop  
music audio on 15476 (not 15475) kHz at 1308 UT. In fact this is a better  
signal than previous days, peaking around 1315 UT, but soon declining to  
hardly any audio by 1330, and nothing but a carrier past 1421 UT. So Radio

Nacional Arcangel San Gabriel may also be active on other weekdays. Trouble is, there is another carrier at least as strong around 15478 kHz, and even stronger 15480 in Belarussian, Poland via Woofferton UK at 1300-1430 UT.

(Glenn Hauser-OK-USA, dxld Apr 22)

AUSTRALIA As I listen to RA on 9580 kHz, they just made an announcement stating that their Shepparton TX site would be down for maintenance. This will impact broadcasts to SEA and the Pacific between the hours of 5am and 1pm Bangkok time.

(S McLean, dxld Apr 22)

AUSTRIA ANOTHER ONE BITES THE DUST by Andrew Tett.

The Detonation of the Wien-Bisamberg MW Transmitter in Austria (This article was inspired by a thread featured in the German DX Magazine Reflexion)

Among those "Cold War" buzz-words and phrases that entered our consciousness during the 1980s, Russian words like "glasnost" (openness and freedom) "perestroika" (economic restructuring) and the French word "detente" (relaxation of tensions), the one that seems strangely to have been quietly forgotten is "The Peace Dividend." This was the basic premise that all the money that used to be spent defending us from our enemies could be spent on more fruitful, peaceful activity. I doubt if any of us DXers who heard these three words bandied about at that time realised the effects that "the benefits of peace" would have on our hobby.

For a start, the changed relations between nation states meant that some external service operations were no longer seen as important as they once were. Countries that kept their people informed by way of state-run monopoly broadcasters also suddenly started embracing "free market reforms" and their citizens could get relatively reliable sources of information from their local radio stations at last. Maintaining a network of power-hungry transmitters for the broadcast of crossborder information or propaganda (depending on which side of the Iron Curtain you were) became seen as unnecessary.

Just one of those trusted cross-border sources of information in Europe during the period of the Cold War was the OeRF – Oesterreicher Rundfunk. Its German language transmissions could be understood by millions of people across Eastern Europe. The main domestic transmitter in Austria was sited just outside Vienna at a place called Bisamberg. For Austria, with its well-developed FM network, the broadcasting of a 600 kW AM signal from this site was an obvious potential contribution to their own Peace Dividend. Bisamberg started its life as Austria's largest transmitter in May 1933. With 100 kW radiated from two masts, its first twelve years of service continued through the war until retreating Nazi SS Troops decided to destroy their "Reichssender" Linz (at that time on 1267 kHz) and felled the masts - for the first time.

American troops seeing its importance to the region rebuilt the station however, and in 1950 transmissions resumed once again from the site. By 1959, with two new masts the transmitter was able to radiate an output power of 120 kW. There are tales during this period of people living near the transmitter powering small house lights with the signal that they received from the transmitter.

This situation soon caused a change in the law to make such power theft [sic] illegal. In 1975 the transmission power level had risen to a heady 600 kW. Two services were broadcast from the site - the Domestic Service Programme 1 on 584 kHz (585 kHz after November 1978) from the larger Northern Mast and Oesterreich Regional on 1475 (1476 kHz) from the Southern one. Bisamberg's time as one of the biggest transmitters in Europe however came to an end in 1995 when Austrian Radio decided to silence it.

In a brief burst of enthusiasm and providing a ray of hope for the site, OeRF thought again and brought the transmitter into service in 1997 for its swansong. "OeRFRadio 1476" was born with an evening service consisting of its Domestic Service 1, the External Service of Radio Austria and the odd transmission for other broadcasters. During NATO's war with Serbia the transmitter played its part in the war effort with broadcasts of a service called "Nachbar in Not" ("Neighbour in Need"), even broadcasting Belgrade's infamous independent radio station "B92" at one point. It did all this with the relatively low power of 60 kW.

Once this war was over the transmitter reverted back to serving a mainly domestic audience once again and at the end of 2008 was silenced for good. It was kept serviced and ready for action for a while, but the costs of keeping the masts up to scratch and ready for action were seen as too much and the decision was taken to fell the masts - for the second time - on 28 February 2010. The masts were detonated separately, first the taller one and then its smaller brother fell to the ground as explosions broke up the masts where they stood and caused them to bow down to the ground.

The site still has a media life. The building, which has preservation order on it serves as a Data Centre for Internet company Google. With good electrical power availability, plenty of water for cooling equipment and good flood protection, Bisamberg was seen as a good place to base a secure server centre.

(April BrDXC-UK Communication magazine via editor Chrissy Brand, dxld)

AZERBAIJAN 9677.5 at 0502-0510 UT April 10, R. Nagorny Karabakh, Stepanakert, Azeri YL talk with some mentions of Karabakh - extremely strong with usual poorly modulated signal and slight transmitter hum.  
(Mikhail Timofeyev-RUS, hcdx April 17)

CHINA No jamming on April 21.

Clear Day. Last night I also noted that all FD stations were taking the same program as were all Chinese networks. yesterday was a Day of Remembrance throughout the PRC for the Qinghai earthquake. I copied the same program on 10300, 10420, 11100, 11590 (best strength) and 13610. It wasn't SOH Scott. This was at 1215-1259 on April 21 same as monitored it on 13970 kHz.

Further to the earlier post about the common program transmitted at 1215 to 1259 UT on the April 21, I am pretty certain that it was related to Qinghai Earthquake Memorial . The announcers were solemn and there were actualities of trucks and people shouting in distance, probably from Qinghai or nearby. There was no music except I did hear some children singing but pretty sure it was not in Chinese.

Frequencies monitored were 10300, 10420 (both were weak), 11100 and 11590 kHz. 13610 kHz also carried it but was not in parallel. 11100 kHz used to be a regular many years back. I recollect hearing a similar all-network feed during the Szechuan earthquake in 2008.

(Robin Harwood-AUS VK7RH, dxld Apr 22)

Chinese station relayed special broadcast of CNR-1 by all broadcast as a "Day of the Qinghai Earthquake condolence" on April 21. The jamming was only CNR-1 in substitution for Firedrake, too. Firedrake revived at 2305 UT on April 21.

(de Hiroshi; via Sei-ichi Hasegawa-JPN NDXC Apr 22)

Replacement of Firedrake by CNR1 jamming on April 21 has been explained by Sei-ichi Hasegawa and Robin Harwood as due to the anniversary of the Qinghai earthquake. Apparently the ChiCom felt it would be inappropriate to jam with such lively music on such a sad occasion. Of course this does not make the jamming any less evil.

Now on April 22 it's back to Firedrake as the audio source: at 1310 fair on 10970 but none of the other '970s. at 1405, 13970 has an open carrier with het, flutter, and FD cuts on at 1405:45. At 1408 FD also on 13300 about the same level as 13970. At 1409 also on 12950. 1411 on 10300 and stronger 10440 kHz.

(Glenn Hauser-OK-USA, dxld Apr 22)

Schedule of Holy Tibet via CNR-11 was changed from April 11.

Holy Tibet in English via CNR-11

1400-1430 6010, 7350, 9480

0500-0530 9530, 11685, 15570

The schedule of Tibet PBS is not changed.

Holy Tibet in English via Tibet PBS

2230-2300 4905, 4920, 5240, 6110, 6130, 6200, 7255, 7385

0600-0630 4905, 4920, 5240, 6110, 6130, 6200, 9490, 9580

1530-1600 4905, 4920, 5240, 6110, 6130, 6200, 7255, 7385

(de Hiroshi; via Sei-ichi Hasegawa-JPN NDXC Apr 13)

Yesterday heard Holy Tibet from 1630-1700 UTC on 594, 4905, 4920, 6110, 6130, 6200 kHz. I have not checked other frequencies, as I preferred to listen it on 594 kHz MW with good reception as there was a local power cut at that time.

(Partha Sarathi, Shiliguri-IND, dxld Apr 21)

(Carlos Goncalves-POR, wwdxc BC-DX TopNews Apr 18) moved down to 7090 also,wb.

Eritrea on 7185 kHz. I can heard on 7185 kHz at 1535 UT on Apr 15 // 7165 kHz.

(de Hiroshi; via Sei-ichi Hasegawa-JPN NDXC Apr 15)

On April 19th at 1700/1800 there was a lot of ERI/ETH activity on 6170, 7090, 7095, 7100, 7110, 7165, 7175, 7185, 7210. Not all on the air at the same time of course. 5950 had two HOA stations at the same time. Apr 20th check at 1730 showed things calmed, only usual listed stations on the air.

[later] We've been monitoring with Mauno since yesterday Apr 19. Eritrea has now three transmitters in parallel on this frequency range. One basically on 7185, may jump to 7175 at times. The one usually on 7175 jumps to 7165 when jammed. Third one was yesterday on 7140, today on 7120, unjammed so far. I guess fourth transmitter is still on 7210 carrying home service.

(Jari Savolainen-FIN, dxld April 20)

Eritrea on 7185 kHz. To add to this: my friends in the region note that Ethiopia is now also intermittently jamming 7210 kHz, either with noise (e.g. at 1700 UT) or with a relay of Voice of the Tigray Revolution (e.g. at 0400 UT). No doubt this is related to the Ethiopian elections on 23 May, and follows the resumption of jamming of the VOA.

[later] This evening (21 April), Eritrea has dodged the jamming on 7210 by moving to 7220 kHz, a move the Ethiopians seem to have missed so far.

Please also note Kim Andrew Elliott report today on new VOA Amharic

morning transmission: 0300 UT on 6055, 7300 and 11790 kHz (all jammed).

VOA Amharic evening transmission (1800-1900 UT) is now on nine (!!)  
frequencies: 9620 11520 11905 11925 11975 12140 13835 13870 15730 kHz.  
(Chris Greenway-UK, dxld Apr 20/21)

7090 is Radio Ethiopia ex 7110 and is // to 9704.3 kHz.

This transmitter is used to jam VOA Amharic at 1800-1900 UTC and they  
return to 7 MHz around 1920 UT. Ethiopia acquired a state of the art  
jamming set up from China. They are very good at it and jam Amharic, Oromo  
and Tigrigna transmissions.  
(Victor Goonetilleke-CLN 4S7VK, Intruder Alert Apr 19)

Auch tagsueber hoppsen die ERI/ETH Sender in der 7.09 bis 7.2 MHz Bereichs  
Spielwiese herum, da ist bisher kein Kanal davor sicher gewesen.

Hier eine Meldung aus Kenia Ostafrika von 0800 UT. (wb)

QRG 7160 kHz. There is a strong broadcast, music and speech, which is  
either Ethiopian or Eritrean, at 0800Z this morning 22nd April. I was  
unable to make out the station ident. I am informing CCK.

Ted

E.H.M. Alleyne-KEN, 5Z4NU

(via INTRUDERALERT mailing list, Apr 22)

BANDWATCH 7.1 - 7.2 MHz

Der Bereich 7100 bis 7200 kHz ist noch lange nicht frei von  
Rundfunksendern. Einige haben zwar den Frequenzbereich wieder verlassen;  
doch am 12. April tauchte dort Radio Kuwait auf und war gleich auf zwei  
Frequenzen (7150 / 7190) mit S=9+30 dB zu hoeren. Nach Beschwerdebriefen  
vieler Bandwachten an ihre Fernmeldebehoerde und Telefonanrufen von  
Faisal, 9K2RR, bei Radio Kuwait sind beide Frequenzen seit dem 19. April  
wieder frei.

Am 15. April war Radio Eritrea mit mehreren Frequenzen im 40-m-Band aktiv,  
die alle // liefen: auf 7140, 7165, 7175 und 7185 kHz. Die Frequenzen  
wurden laufend gewechselt, um den Stoerungen der Aethiopier durch weisses  
Rauschen auszuweichen. Selbst auf 7090 und 7095 kHz ist Radio Aethiopien  
nun manchmal zu hoeren, vermutlich um dort die Sendungen der "Stimme der  
Breiten Massen" zu stoeren.

(Nachrichten der DARC-Bandwacht, Apr 22)

(April 23)

MW Bremen 936 kHz off for good.

Press release, issued yesterday:  
<<http://www.radiobremen.de/unternehmen/presse/unternehmen/mittelwelle100.html>>

Says that in the four weeks since the transmitter has been switched off  
they received just under 200 reactions, so little feedback that they  
decided to rather spend the money on new technologies and program formats,  
especially since "in all likelihood there will be no future-proof  
digitalization of mediumwave broadcasting".

It has been considered to keep the transmitter on air at reduced power,  
but the operational costs would still be too high to justify it.

As a gesture of appreciation the 200 listeners will be invited to a  
exclusive visit. (Comment: I suspect the event will become kind of a DX  
meeting...)

-- By the way, Mitteldeutscher Rundfunk has at present no plans to give up  
any of its mediumwave frequencies (783, 882, 1044, 1188 kHz), sources

hurried to tell even without being asked. In this case it are leased facilities, owned and operated by Media Broadcasting.  
(Kai Ludwig-D, dxld Apr 22)

R. Bremen made 936 shut down permanent. Now Radio Bremen officially announced the permanent shut down of their 936 kHz tx. After closing a month ago they did not announced anything and waited silently for listener complains. Only 200 were received.

The annual MW operating cost in the higher 5 figure EUR range could be better spent on other fields, considering that it is public station financed by our radio/TV license fee.

Interesting their statement that they do not expect a bright future for digital MW, a view probably shared among other ARD stations.

In German:

<<http://www.radiobremen.de/unternehmen/presse/unternehmen/mittelwelle100.html>>

(Jurgen Bartels-D, mwdx Apr 22)

Radio Bremen stellt Mittelwellen-Ausstrahlung ein.  
Veroeffentlicht am 21. Apr. 2010 von RT unter Pressemeldungen.

Radio Bremen stellt Mittelwellen-Ausstrahlung aus wirtschaftlichen Gruenden ein.

Radio Bremen gibt zur Zeit einen hohen fuenfstelligen Betrag im Jahr fuer die Verbreitung von Bremen Eins auf der Mittelwelle aus. Die Nutzung der Mittelwelle nimmt seit Jahren ab. Eine zukunftssichere Digitalisierung der Mittelwelle wird es aller Voraussicht nach nicht geben. Mehrere Landesrundfunkanstalten haben die Mittelwelle daher schon abgeschaltet.

Der Bremer Sender hat sich jetzt ebenfalls zur Abschaltung der Mittelwelle entschlossen. Die Einstellung des Sendebetriebs fuehrt zu Einsparungen im sechsstelligen Zahlenbereich im Laufe einer Gebuehrenperiode. Generell gilt: Die finanzielle Situation zwingt Radio Bremen, unter Kosten-/Nutzensgesichtspunkten alte und neue Verbreitungswege zu pruefen und Prioritaeten zu setzen.

Radio Bremen hat die Abschaltung zunaechst auf Probe vorgenommen, da die Nutzerzahlen fuer die Mittelwelle nicht bekannt sind. In einer vierwoechigen Testphase meldeten sich knapp 200 Hoererinnen und Hoerer und kritisierten die Abschaltung.

Gemessen an den Nutzerzahlen von Bremen Eins ist diese Resonanz so gering, dass Radio Bremen nach Ende des Tests entschieden hat, die Mittelwelle nicht wieder anzuschalten - und die frei werdenden Mittel lieber fuer zukunftsweisende Verbreitungs-Technologien und Programmformen zu verwenden.

Bereits vor der Testphase hatte Radio Bremen geprueft, ob eine Verringerung der Ausstrahlungsleistung - mit geringen Einbussen bei der Versorgung - zu nennenswerten Kostensenkungen fuehrt. Hier haben die mittlerweile abgeschlossenen Untersuchungen gezeigt, dass man keine erheblichen Betraege einsparen kann, auch wenn dies gelegentlich in der Oeffentlichkeit anders dargestellt wird.

In den Anrufen und Schreiben der vergangenen Wochen hatten Hoererinnen und Hoerer beklagt, dass sie mit der Abschaltung auf den Empfang im Urlaubsort verzichten mussten. Bremen Eins-Fans weit ausserhalb des Sendegebiets hatten den abgeschalteten Sender vermisst. Radio Bremen bittet sie um Verstaendnis und verweist auf die neuen digitalen Verbreitungstechniken, wie z.B. per Internet - mit weltweitem Empfang - oder per Satellit. Im Sendegebiet wird Bremen Eins von der grossen Mehrheit des Publikums ueber UKW empfangen, weil die meisten Hoererinnen und Hoerer ueber entsprechende Empfangsgeraete verfuegen und die Klang- und Servicequalitaet des UKW-Rundfunks schaeetzen. Ausserdem wird das Programm im Kabel angeboten.

Radio Bremen moechte auf keinen Fall Hoererinnen und Hoerer verprellen - zumal es sich bei dem Mittelwelle-Nutzerkreis ueberwiegend um Stammhoerer handelt. Alle, die sich an Radio Bremen gewandt haben, erhalten eine Einladung ins Funkhaus. Dabei koennen die Gaeste nicht nur einen Blick hinter die Kulissen des Senders werfen, sondern bekommen auch ausfuehrliche Informationen ueber alternative Empfangsmoeglichkeiten und auf Wunsch entsprechende Beratung.

Bremen Eins:  
UKW Bremen 93,8 und Bremerhaven 89,3 MHz,  
Astra 1 H, digital DVB-S Tr. 93  
sowie im Kabel, als Podcast und Live-Stream

JORDAN 11960 Radio Jordan Amman in Arabic, scheduled 0500-0715 UT, but noted also much earlier at 0400-0500 UT like // 11810 kHz. S=poor 6-7 signal on Apr 13.

(wb, wwdxc BC-DX TopNews April 13)

Are you sure? I can't hear 11810 kHz at any time!

(Mauno Ritola-FIN, wwdxc BC-DX TopNews April 20)

Yes, 11810 is not at Jordan Radio Amman service at present, channel was empty this Morning Apr 21. And also as surprise, 11960 kHz service was only 4-5 UT shorttime on air, not til 0705 UT as usual ... maybe a maintenance day ???

11810 was regular on air in past decade at 0400-0710 UT slot, and also marked on my frequency list in B-09 too.

(wb, wwdxc BC-DX TopNews April 21)

KOREA D.P.R. Noted very strong North Korean jammers, loud and clear on 5890, 6003, and 6015 kHz at 1730-1830 UT.

(wb, wwdxc BC-DX TopNews April 21)

KUWAIT Radio Kuwait 7150 kHz and 7190 kHz.

Just to confirm that the Baldock Monitoring Station has confirmed my reports of the intrusions by Radio Kuwait and will be sending the appropriate complaints to the Kuwaiti authorities.

Regards,

Chris Cummings G4BOH

Co-ordinator

RSGB Intruder Watch

(via Intruderalert, April 18)

Radio Kuwait 7150 kHz and 7190 kHz.

Abu-Ali, we are in contact with the authority of Kuwait Radio and i will keep you in touch with the latest news.

Please as you mentioned send the complaints to the kuwaiti authoriti and this will support our demands.

take care and we will be in touch soon.

Faisal Al-Ajmi, 9K2RR

(Apr 18)

Dear Faisal, as-salamu alaikum, habibi,  
thank you very much for your good work and activities.

Yesterday evening and this morning the frequencies were again/still active with signals of S=9+30dB. Well, let us wait a bit and see, if the various complaints are working, insh-Allah.  
Keep up your good work, dear Faisal!  
Ma-salama  
de: - Uli, DJ9KR  
(Apr 18)

Dear Uli & Hani, I'm very pleased to inform you that the General manager of Engineering Broadcast in Kuwait Radio inform us that the transmitting on the amateur band is suspended in both frequency 7150 and 7190 kHz.

This is another battle we win against the intruder of our band. As usual we will keep monitoring the band for any other complains. i'll be standby for any explanations.

take care  
Faisal Al-Ajmi, 9K2RR  
Secretary of KARS  
member of IARUMS  
(Apr 19)

5960, R Kuwait, 0231-0303 UT on April 21, Arabic Qoran recitation, religious talk into news 0300 UT. Well over co-channel R. Japan, was wondering if this NF replaces 7150 kHz which seems to have been taken off the air following complaints?  
(Martien Groot-HOL, dxld Apr 21)

R. Kuwait on 7190 kHz that disappeared and noted QSY to 6050 kHz instead. I receive in Arabic on 6050 kHz strongly at 1600 (tune in) to 2101\*UT on Apr 21.  
(de Hiroshi; via Sei-ichi Hasegawa-JPN NDXC Apr 21)

15515 Radio Kuwait in Arabic noted here in 0700-0815 UT range, scheduled 0500-1000[but off at 0930] UT towards ME/CeAS. S=7-8 Apr 20.

But not on 13650 anymore today, latter was traced at ... 0400-1000 UT lately.

7.1 MHz R Kuwait intruder 7150 0200-0900 and 7190 1600-2200 left the air yesterday before. Only in service on April 12 til 18th.  
(wb, wwdxc BC-DX TopNews April 19/20)

R. Kuwait was heard on new 15540 kHz for the 1800-2001 English broadcast on April 19, not checked 20, heard again April 21; checked April 22 and it's in Arabic, instead! At 1805 UT news with musical stingers, good but fluttery signal.

Is English back on 11990? No, that is still vacant. 1818 still in Arabic on 15540, ditto 2015; at 2100 5+1 timesignal, fanfare and news in Arabic; frequent mentions of Amerikiyah, and arraiz. 2108 same fanfare news theme but cut off the air before it could finish.

Typical unreliable operation and now we have no idea what their intent is; was it Arabic by mistake today? English on some other unfound frequency today only or henceforth? English on no frequency? It's right around

sundown before Friday, so a weekend variation? And what about the onetime morning English at 0500-0800 UT: is it anywhere now?  
(Glenn Hauser-OK-USA, dxld Apr 23)

New Radio Kuwait A-10 schedule observations.  
Thanks Martien, Noel, Sei-ichi and Glenn for your success in monitoring R KWT.

Not complete, b u t good for orientation.  
See the latest A-10 registrations

41 mb 7.1 - 7.2 MHz, only April 12 to 18th.

noted April 20/21/22/23. S=9+20dB in Germany.  
Co-channel REE Madrid registration !

That's one of the stations I never have got an engineering operational schedule in past decade. Sometimes they sent out a colourful schedule leaflet, but often that contains very outdated frequency data.

Leaflet put often also on MOI - R Kuwait website, but I don't know the .pdf file URL, someone with Arabic skills should explore this Arabic lang letter website on  
<<http://www.moinfo.gov.kw/>>  
(wb, wwdxc BC-DX TopNews Apr 23)

Their registrations seem to indicate that a service to the ME is now in effect on 9 & former 7 MHz using quadrant antennas according to reports, and an international service via 21540 [to EUR, NoAM] and 11630 [to Ce and WeAF] kHz (Quran). Martien Groot appears to have found a 7 MHz replacement for the mornings transmission via 5960 kHz, but the evening service is still to be located. Former 15495 15110 and 11990 kHz are not audible. KWT is another station that seems to have a "wish list" of registered frequencies that are never used.  
(Noel R. Green-UK, wwdxc BC-DX TopNews Apr 21)

11990 replaced by new 15540 kHz. (wb)

Kuwait and REE on 21540 kHz, on 21 Apr at 1251 UT a collision between the Radio Kuwait and REE, from my listening post. Both come with almost the same signal. Slight predominance of Radio Kuwait during the time of my listening. Probably the collision is present in Africa, affecting the transmission of REE. Strong signal.  
(Jorge Freitas-B, dxld Apr 21)

Re Kuwait and REE in 21540 kHz. Targets differ approx. 9000 kilometers ... in these days of very bad propagation nothing is heard from Spain in 13 mb in central Europe. No collision in the targets.

R Kuwait target, 310 degr, 4000 kms away, to zones  
27 UK, France, Benelux  
28 Central & Eaern Eur, not Baltics

KWT towards AF target 7000 - 8000 kilometers, via Saudi Arabia, ETH, KEN, TZA ... but much more to Brazil 10.000 - 11.000 kilometers

REE 161 degr  
target 7000 kilometers,  
azimuth differs approx. 140 degr when compared towards CeEurope, U.K.  
46 W.Africa  
47 Central Africa  
52 Gabon, Congo, Zaire, Angola  
57 Namibia, SoAfrica, Botswana, Swaziland, Lesotho

(wb, wwdxc BC-DX TopNews April 22)

I was too engrossed in the daytime MW DX opening April 20 to even think of checking for Kuwait's new English frequency 15540 kHz, which I had

discovered the day before; but April 21 I tuned in at 1757 UT to hear music already, and 1800 UT accurate timesignal, R. Kuwait ID and opening English, some music, 1801 UT program summary, 1802 another show about Islam; the Kuwaitis do their duty. Fairly good signal; still fair at 2048 UT during more pop music.  
(Glenn Hauser-OK-USA, dxld Apr 22)

MALAYSIA 15295 RTM Kajang with nice Gamelan music at 0935-0945 UT April 20, S=9+10dB.  
(wb, wwdxc BC-DX TopNews April 20)

MALI 5995 R. Mali, Kati, 2135-..., 17 Apr'10, French, Sat. evening music show; 55444. They're still absent on 7285v during day time, only 9635 is being used.  
(Carlos Goncalves-POR, wwdxc BC-DX TopNews Apr 18)

MAURITANIA 7245.024 ORTM, 0916, Arabic, nice local music, with brief comments by man. The transmitter actually came on just after 0800, with open carrier only, on about 7245.2 kHz, but finally settled just above nominal. Don't know at what time they started feeding audio, as I quickly tuned out and only rechecked after 0900 UT, 10 April.  
(David Sharp-NSW-AUS, dxld Apr 17)

7245 R. Mauritanie, Nouakchott, 1045-1206, 18 Apr'10, Arabic, talks, lute tunes,..., news at 1200 in Arabic & Vernaculars; 35444.  
(Carlos Goncalves-POR, wwdxc BC-DX TopNews Apr 18)

783 R. Mauritanie, Nouakchott, 2033-2109, 18 Apr'10, Arabic, talks, seemingly some news magazine, anns., chanting, ID at 2106, different prgr, talks; 54444, QRM de E; // 4845.

783 ditto, 1021-f/out 1125, 19 Apr'10, Arabic, int'l. & Arabic pops, debate; 14341, adj. QRM de E; // 7245 vy. good.  
(Carlos Goncalves-POR, wwdxc BC-DX TopNews Apr 19)

MOLDOVA 6240 R. Pridnestrowja Moldova from Tiraspol via Grigoriopol Maiac site noted Apr 19 at 1759-1814 UT in French. Mon-Fri sce only? WRTH Update of Febr 2010 shows the whole R. Pridnestrowja Tiraspol winter schedule under Moldova. Transform it to DST schedule.  
(wb, wwdxc BC-DX TopNews April 19/20)

15540 Tnx to tip from Ivo Ivanov-BUL, Radio Xoriyo Ogadenia heard on new frequency at new time, April 19 at 1435 UT poor-fair in presumed Somali talk, 1441 UT a bit of HOA music, soon back to talk, and fading down some. Frequency is in the clear. This is 300 kW, 160 degrees from [Grigoriopol Maiac] PRIDNESTROVYE, Mondays and Fridays only since April 16 at 1430-1500 UT, replacing M & F 1815-1845 UT on 7425 kHz via Armenia, which of course had no chance of reaching deep NoAM, and apparently did not work that well to Ogaden either.  
(Glenn Hauser-OK-USA, dxld Apr 19)

Correction: 12130 WYFR Bible Hour via Grigoriopol Moldova relay, like Arabic[see below] lang sce 1500-1600 UT, deep fades. S=6 poor signal.  
(wb, wwdxc BC-DX TopNews April 12)

Thanks Ivo: According WYFR schedule: 1500-1600 on 12130 KCH 500 kW / 105 deg to SoAs in Sindhi, not Arabic.

NETHERLANDS/ AUSTRIA Media Network: Interviews mit Wolf Harrant.

Hallo Liste!

Im Media Network-(Audio) Archiv hat Jonathan Marks heute zwei Videoclips mit Interviews reingestellt, die er mit Wolf Harrant gefuehrt hat. Die Video-Links habe ich noch nicht ausprobiert. Webadresse des Archivs ist:

<<http://jonathanmarks.libsyn.com>>

(Dietrich Hommel-D, A-DX Apr 22)

Re: Media Network: Interviews mit Wolf Harrant.

Das ist ein gemeinsames Projekt von Jonathan und dem Dokumentationsarchiv.

Das Archiv sammelt, beschafft, digitalisiert ... die Audiodateien und

listet MN nach Sendedaten und Inhalten auf - Provisorium:

<[http://dokufunk.org/documentary\\_archive/findemittel/index.php?CID=6621&ID=7015#A7015](http://dokufunk.org/documentary_archive/findemittel/index.php?CID=6621&ID=7015#A7015)>

Jonathan stellt die Audios (da "er" die Urheberrechte besitzt) ins Netz.

Ziel: Komplettes Angebot bei gegenseitiger Verlinkung. Wer ueber

Aufzeichnungen von MN verfuegt, wird gebeten, das Archiv zu kontaktieren.

NIGERIA [c.f bc-dx TopNews #960] 15120 VONigeria in English, new time?

At that time, 1500-1520 UTC listen to Voice of Nigeria in English at

frequency 15120. Wonderful and strong signal here in Bulgaria. New hours

of broadcasting for the evening txion in English? 73! Ivo

(R BULGARIA DX MIX News, Ivo Ivanov, via wwdxc BC-DX TopNews Apr 23)

Yes, heard also a powerful signal this morning in 6-7 UT range on 15120 kHz. Seemingly they use at VoNigeria now the new 250 kW Thomson French transmitters at Abuja, other channels are 7255, 9690, 11770 kHz on other time of the day. New Abuja SW site finished already in mid Dec 2009, studio installation at Abuja downtown were still in progress.  
(wb)

Voice of Nigeria introduced a new schedule from April 4, as announced during the French service. It's not on the homepage, but a few things have definitely changed, further monitoring needed:

9690 1700-1730 Kiswahili  
15120 1730-1800 Arabic  
15120 1800-1900 English, (announced as until 2000 UT, likely changing to 7255 kHz)  
7255 2000-2100 French (announced during the morning service)  
15120 0500-0700 English, 0700-0800 French and  
9690 0800-0900 Hausa unchanged.  
(Thorsten Hallmann-D, <<http://www.africalist.de.ms>> dxld April 11)

The following announcement was heard during the "This Week on VON" programme from Voice of Nigeria, 1805-1815 UTC on Sunday 11 April 2010 (I was listening online at <[www.voiceofnigeria.org](http://www.voiceofnigeria.org)> but 15120 kHz was offering good reception when checked):

"... this is to inform you that there is now a slight change in the number of hours we broadcast on 15120 kHz in the 19 mb to North Africa and Europe, and on 9690 kHz in the 31 mb to West Africa.

On 15120 kHz you can listen to programmes in English between 04.45 and 07 hours, and between 15 and 19 hours UT daily. While on 9690 kHz broadcasts of programmes in English begin at 09 hours and 15 hours UT, and between 19 and 20 hours UT daily".

Perhaps for 9690 kHz they meant "between 09 and 15 hours UT"?

Perhaps these changes are related to the new shortwave transmitter site at Abuja coming on air. However, the schedule will need to be monitored as they seemed to be getting mixed up with time announcements (i.e. they said it was "15 hours UT" when it was 1800 but acknowledged the mistake at 1805), and prior to that Arabic was heard at 1745 UTC tune-in online and I'm sure it was also on 15120 kHz, although reception was very poor (reception improved significantly for English at 1800 UT which must have been due to an antenna change).  
(Tony Rogers-UK, BrDXC-UK April 11)

I came across V of Nigeria with their programme in English Sunday 11 April at 1515 on 15120 (with the Musical Heritage programme). Just before 1600, they announced that programmes would continue in Kiswahili. 15120 in English went off at 1600. At 1601 found VoN in Swahili on 11770 until 1630 UT. No trace of programmes at 1630 (although still streaming online in unknown language). At 1735 observed back on 15120 in Arabic, and then English from 1800 until 1900 UT. Still streaming online in English at 1900 UT - 9690 is completely blocked at present by Radio Romania Int.  
(Alan Roe-UK, BrDXC-UK April 11)

Schedule changes for Voice of Nigeria.

To complete with yesterday's and current observation:  
1500-1600 15120 E to Eu, very strong both Sun+Mon  
1600-1630 11770 Kisuaheli to ??? (very strong on Sun)  
1630-1730 9690 Yoruba and Igbo ??? Not Kisuaheli.

Not heard Sunday at 2100/2200 UT, not heard Monday from 0900 to 1500 UT on 9690 kHz, as scheduled, or anywhere else, starting again 1501 on 15120 kHz. E to Eu is definitely not 1500-1900 as Tony Rogers heard, but only 1500-1600 + 1800-1900, probably changing to 7255 (likely not 9690) kHz for the rest of the evening, but it's a very crowded channel. If English really starts at 0900 UT as announced, Fulfulde is likely to be in the evening now.

(Thorsten Hallmann-D, dxld April 12)

15120 noted in French language in 7-8 UT slot Apr 20, but still distorted audio quality of bad tube. So, supposedly via old tx site. New Thomson gear at Abuja on air would have much different superb quality instead.  
(wb, wwdxc BC-DX TopNews April 19/20)

Voice of Nigeria in English at good/fair strength this am from 0900 UT on 9690 faded after approx 1 hr and weak from then on. Also BBC via Meyerton weak on 9860 kHz, was at good strength on the 20th, from 0600 UT.

(Mark Davies Ruby, Anglesey, BrDXC-UK Apr 22)

NORWAY Time Signal Will Be History On NRK Radio.

NRK Radio has decided to drop their time signal, sent weekdays at 1300 local and weekends at 0800 local. The main reason is that DAB and Internet signals are delayed, so the purpose of giving the correct time is more or less gone. Read more here:

<[http://www.nrk.no/informasjon/nyheter\\_om\\_nrk/1.7090244](http://www.nrk.no/informasjon/nyheter_om_nrk/1.7090244)>

It's in Norwegian, but you can use Google Translate or some other online translator for a rough translation of the text.

The time signal starts at 15 seconds before the hour with 10 beeps, followed by a five-second break before the last beep.

(Bjarne Mjelde-NOR, dxld Apr 22)

Hopefully, the listeners in Norway can still pick up time signals from Radio Rossii or even Mayak. But don't ask me how precise those beeps are.

(Sergei)

Excellent RWM time signal station from Moscow:

"You might want to note, that the schedule given for the medium wave frequency Dushanbe 1251 kHz collides with the BBC schedule for the use of the same station. So CIS DXers will have to check the actual use of the frequency."

1300-1400 is scheduled for BBC Urdu on same Dushanbe transmitter at 1300-1400 UT. So maybe VoRUS is on addit 1503 kHz instead. Thanks to Dr. Hansjoerg Biener for advice. (wb)

SERBIA Ceremonial opening of the AVALA tower.

The Avala Tower, one of the trademarks of the Serbian capital, was ceremoniously opened yesterday by Belgrade Mayor Dragan Aeilas, who said that the building represented a symbol of future. The tower was opened in the presence of the highest state officials [...]

The opening ceremony was also attended by Serbian Patriarch Irinej, who emphasized that the Avala Tower represented the symbol of love and creativity of a people. He recalled that no one had ever built a monument to those who tear down monuments, but had to those who built them. He described the tower as a symbol of restoration, as Serbia is like a phoenix rising from ashes.

The new tower was built on the basis of the latest international standards. It is 204.5 meters tall and is taller by a meter than the old one, torn down during NATO bombing. It has many functions for use a?" for telecommunication, for establishing a digital TV system and will also be transmitting all signals required for the army, police, televisions and mobile stations.

Its construction cost some 10 million EUR and, besides the Serbian government and the city authorities, more than one million citizens donated funds for the restoration of the tower [...]

(Sergei, dxld Apr 22)

SOLOMON ISL 5020 at 1045 UT on Apr 21. Signal fluctuating between S3-S9, splash from Rebelde on 5025 kHz. Male EE talking about the Holy Spirit/Jesus message to his disciples. Had about 5 minutes of good copyable audio, then fadeout/splash from Rebelde til 1058 UT.

1100 UT female EE NX, fadein/mentions of Solomons/elections. Sunrise noise/fadeout by 1112 UT.

(S. McLean-NY-USA, dxld Apr 21)

5020 at 1035 UTC, April 23 - S3-S6 signal, splash especially during Rebelde / 5025 MX transitions, male/female EE, clear ID this morning at 1036 UT, 'South Pacific Radio, the Solomon Islands today, always at your service'. Followed by male talking about a business community meeting to be held tomorrow (Saturday), more mentions of the Solomons, more Rebelde splash at 1040, followed by different male speaking local and EE/heavily accented about education/information. 1055 short MX segue', male teasing

the news, reviewing some headlines, more local announcements of the weekend's events in the Solomons. MX segue at 1059, short anthemic variety and ID 'SIBC' into male NX at 1100. Seems I have found the window of opportunity for this DX here in the northeastern US between 1030-1100 UTC. (S McLean-NY-USA, dxld Apr 23)

SOUTH AFRICA/UAE/U.K. Effective April 19 WYFR changes:

WYFR Family Radio, additional txions:

1700-1800 12020 SKN 300 kW 090 deg to WeAS in English, deleted

1800-1900 5840 MEY 100 kW 345 deg to SoAF in English, no change

1900-2000 9490 DHA 250 kW 230 deg to SoAF in Lingala,  
new language, xEnglish.

(R BULGARIA DX MIX News, Ivo Ivanov, via wwdxc BC-DX TopNews Apr 19)

5840 New YFR service via VT group provider from Sentec Meyerton site at 1800-1900 Apr 19. New English service to SoAF, but probably in Vernacular, not English Apr 19. Tiny S=1-2 here in Germany.

9490 YFR service via VT group provider from Al Dhabbaya UAE site, 1900-2000 UT, scheduled in Lingala vernac, just above threshold on Apr 19, only carrier at S=0-1 traced, but due of bad level no language, no program content observed neither.

Thanks information to Ivo at DX Mix in Bulgaria, which forwarded the YFR news. Delete YFR Skelton in En on 12020 kHz at 17-18 UT.

(wb, wwdxc BC-DX TopNews April 19/20)

SUDAN see picture no.11 of Radio Studio Miraya from Sudan, and the other pictures too...

<[http://www.boston.com/bigpicture/2010/04/scenes\\_from\\_sudan.html](http://www.boston.com/bigpicture/2010/04/scenes_from_sudan.html)>

(Heinrich Gudhardt-D, A-Dx Apr 22)

Das ist eine sehr beeindruckende Bilderserie. Erstklassig!

Martin Elbe <<http://home.wolfsburg.de/elbe/>> Apr 23

Radio Miraya host Lubna Lasu broadcasts the Betna Weekend Edition program on April 10, 2010 in the southern Sudanese city of Juba. The show focuses on the elections and women's rights and is broadcast across South Sudan.

There were no televised debates, much less Twittering or blogging, as candidates sought to get their messages across to the people of south Sudan in an election campaign that wrapped up on April 9. Instead, it was mostly the transistor radio for the inhabitants of the dirt-poor semi-autonomous region, where most people are illiterate and few are wealthy enough or lucky enough even to have electricity for a television.

(AFP/Getty Images)

SWEDEN Re IBRA Radio. On their website <[www.ibra.se](http://www.ibra.se)>

IBRA-Radio provides this pdf-schedule of their international broadcasts.

They have less English on this site than before, but on the other hand, this schedule was put on the site faster than previous ones.

Regarding recent discussions in Glenn Hauser's DXLD, about whether frequency data should be labelled FEBA or IBRA, you will want to know, that IBRA used to be a programme provider who is now moving towards organizing their schedules themselves. (Like Gospel for Asia)

On the other hand, since the end of FEBA Seychelles as a short wave station, FEBA's role as provider of airtime has constantly been decreasing. In fact, the staff of FEBA-UK has already been cut.

Kind regards,

Hansjoerg

(Dr. Hansjoerg Biener-D, wwdxc BC-DX TopNews April 21)

TAJIKISTAN [to Tibet] 15540, UNID - we still have a mystery from before 1330 to 1400\* UT. April 22 at 1322 UT there is a wavering het and hum over a bit of audio. This is presumably from Pakistan's Tamil service until 1330 UT. Then the het went away and there is still a mixture of two audios with flutter. At 1336 UT it seems that one of them could be Chinese, but not sure. At 1400 UT there is a two(?) pip timesignal, and carrier off a few seconds later; the two signals' disappearance is closely coordinated.

Then I check the April 22 edition of Aoki, and the answer has been added: Voice of Tibet, via Dushanbe-Yangiyul, TAJIKISTAN, 100 kW at 131 degrees, 1300-1400 in Tibetan except for Chinese at 1315-1330. I wonder if this is the 'extra' broadcast VOT says they put on to convey condolences to Tibet after last week's earthquake on the Tibetan plateau, and complain that the ChiCom kept jamming it anyway despite pleas to turn it off.

See <<http://tinyurl.com/29a4zlx>> as found by Alokesh Gupta and <<http://bit.ly/99M3cj>> as found by Yimber Gaviria. And Yimber forwards this from VOT website <<http://www.vot.org/>>

VOT starts message line to quake victims. VOT encourages all those who want to have their message of support or condolences transmitted on short wave radio to Tibet to call the VOT main editorial office in Dharamsala. Your message will be recorded and included in our daily transmissions. To send your message call VOT at +91 1892 222384 or e-mail to <[info @ vot.org](mailto:info@vot.org)>

VOT - Shortwave broadcast frequency and time

The DOMESTIC BROADCASTING SURVEY 12 (DBS-12)

April 2010 edited by DSWCI Chairman, Anker Petersen. ISSN 1399-8218

NEW SURVEY AVAILABLE: The 53 years old DSWCI which counts experienced DX-ers in 33 countries all over the world as members, has just issued the 12th Edition of its annual Domestic Broadcasting Survey. This survey is divided into three parts:

Part 1: The 38th edition of the Tropical Bands Survey covering all ACTIVE

broadcasting stations on 2300 - 5700 kHz, including clandestines.

Part 2: Domestic stations on international shortwave bands above 5700 kHz broadcasting to a domestic audience.

Part 3: Deleted frequencies between 2 and 30 MHz which have not been reported heard during the past five years, but may reappear.

This new Survey is based upon many official sources and DX-bulletins. A10 schedules are included when available.

In order to make the DBS reliable, our own monitors around the world have checked throughout the period May 2009 - March 2010, if each of the 900 station frequencies is on the air. ACTIVE stations are marked with an A ("Regular"), B ("Irregular") or C ("Sporadic") in the list. D means "Likely inactive".

A unique feature is the right column called "Last log". It shows the last month and year before DBS deadline on March 31, 2010 when the particular station was reported logged by a DX-er somewhere in the world. This is another way of indicating the current audibility of the station. To avoid inactive stations in this DBS, most frequencies which have not been heard during the past year, have been deleted and are moved to Part 3.

Other useful features for easy identification (ID) are the //frequencies and reference to Station ID slogans.

Reviews can be found on <<http://www.dswci.org>>

All buyers of DBS-12 will get a username and password to the monthly updates on the tropical bands published as "Tropical Bands Monitor" on our website. The similar data from 2005, 2006, 2007, 2008 and 2009 are available at <<http://www.dswci.org/tbm>> to anybody.

The 28 pages A-4 size DBS-12 is available by e-mail as pdf-format (about 365 KB). A limited number is also available printed on paper. Since the clandestines are not included any longer above 5700 kHz, the prices have been reduced.

It is sold by the treasurer:

DSWCI, c/o Bent Nielsen, Egekrogen 14, DK 3500 Vaerloese, DENMARK

Aus SWR2 / SWR ContRa. Programm Wissen: Aula.  
"Weniger ist mehr."  
Wie geht man mit dem Informations-Crash um? Von Max Otte

Jeden Tag werden wir mit nutzlosen und auch irreführenden Informationen zugeschüttet, die uns kaum bereichern dürften. Das führt letztlich dazu, dass wir uns auf unser scheinbares Wissen nicht mehr verlassen können und sollten, das betrifft fast alle Bereiche: die Medizin, die Bildung, die Altersvorsorge, die Finanzkrise. Überall gibt es zuviel Fakten, Interpretationen, Gerüchte. Diese Flut zwingt den Konsumenten zur neuen Askese, zur Informationssouveränität. Der Finanzwissenschaftler Professor Max Otte zeigt Wege auf, um mit dem Info-Crash fertig werden zu können.

AFGHANISTAN BBG contracts HARRIS to modify MW transmitter site in AFG. The US Broadcasting Board of Governors (BBG) has issued a modification to its contract with Harris Corporation concerning a recently- installed BBG mediumwave transmitter in Afghanistan:

"Harris is the only firm capable of meeting BBG's requirement to enhance the capabilities of the existing 200 kW shelterized mediumwave (MW) transmitting system in a remote location of Afghanistan to provide for 24-7 operations.

The enhancement to existing Harris designed and provided broadcast site includes the design, fabrication, shipment, optional installation, commissioning and testing of one (1) additional Caterpillar C-18 generator capacity and fuel capacity at the recently completed site. It is mandatory the new equipment be precisely integrated into the existing site with no downtime.

Harris is required to provide all personnel, design, equipment, materials, supplies, documentation, training, fabrication, assembly, packing for overseas shipment, shipment, installation and otherwise do all things necessary and incident to the delivery of a highly efficient and highly reliable commercially available enhancement to the existing solid-state

mediumwave (MW) transmitting system. Minimal US Government security is provided at the site."

(BBG via tradingmarkets.com; April 25 by Andy Sennitt-HOL, RNW MN via dxld)

Andy Sennitt adds: This appears to be the new transmitter carrying VOA's Deewa Radio in Pashto into the Pakistan border area. According to a BBG document issued in July 2009, "an AM transmitter was being readied in Afghanistan whose signal was expected to extend significantly into the targeted region inside Pakistan. The transmitters are located in Afghanistan rather than in Pakistan because the Pakistan Media Law is very restrictive in this matter." Currently, only shortwave frequencies are listed for Deewa Radio on the VOA website. Does anyone know if the transmitter is already operational, and on what frequency?

2 comments on "BBG contracts Harris to modify MW transmitter site in Afghanistan"

#1 Kai Ludwig on Apr 25th

621 kHz, and apparently still not on air, at least I have not seen any reports about this "readied" transmitter actually being fired up. The situation appears to be still such as described by a Washington Post columnist in last October:

"So have we gotten all the cooperation we need regarding transmission facilities from the governments in the area? That was the question Sen. Roger Wicker (R-Miss.) posed last week to members of the Broadcasting Board of Governors at a Senate subcommittee hearing.

Not really, the members said. (...) And an unnamed Afghan minister - we understand it's the minister of information - has been 'sitting on our request' for a transmitter for more than a year. (...)

'Are they looking for a little gratuity perchance?' Wicker asked. No, no, board member Jeffrey Hirschberg said, the BBG doesn't do that and the law forbids it."

<<http://www.washingtonpost.com/wp-dyn/content/article/2009/10/20/AR2009102003727.html>>

#2 Kai Ludwig on Apr 25th

And now I receive rumours that the transmitter is on air, since about two or three weeks ago, with some testing done even earlier. It would be nice to receive some confirmation or probably denial from the region. (RNW Media Network blog comments via dxld)

Comments to this post conclude that this transmitter is on 621 kHz. It's listed as a frequency for RFE /RL's Radio Mashaal  
<<http://www.rferl.org/howtolisten/PK/ondemand.html>> (click on Waves),

its Pashto service for the Pakistan-Afghanistan border region. The frequency is not listed for VOA's Deewa Radio, to the same region, also in Pashto. Is Deewa not using the frequency, or has it not been posted yet at voanews.com? Refers to FedBizOpps via TradingMarkets.com, 22 Apr 2010

<[http://www.tradingmarkets.com/news/stock-alert/hrs\\_modification-to-contract-no-bbgcon3607c5854-harris-corporation-929725.html](http://www.tradingmarkets.com/news/stock-alert/hrs_modification-to-contract-no-bbgcon3607c5854-harris-corporation-929725.html)>

(27 Apr, Kim Andrew Elliott, <kimandrewelliott.com> via dxld)

Pakistan service, RFE "Radio Aap Ki Dunyaa" at 0900-1300 UT.  
VOA "Deewa Radio" at 0100-0400 and 1300-1900 UT time slots. No Pashto segments? but only in Urdu language to Pakistan ?

AUSTRALIA I spotted this article in dxld Apr 8, 2010 edition.

"I hear that some of the transmitters decommissioned by CVC at Darwin may be going on to useful second (third?) lives: two 100 kW could wind up at Radio Australia, Shepparton, if rather expensive shipping costs of a megadollar can be covered. RA may also be getting a 300 kW transmitter, DRM-capable, and some new antennas to serve Africa and SW Asia. Some other equipment from Cox Peninsula has already been donated to HCJB Kununurra. (Glenn Hauser-OK-USA, dxld Apr 8)"

Well, yes, two 100 kW SW transmitters from CVC Darwin will replace two 100 kWers at SHP site. I know one higher powered SW transmitter from DRW will go to another CVC site, so I'd imagine would be either Zambia or Chile.

Yes, SHP is take delivery of a new DRM SW transmitter. It will be essentially used as a feeder SW transmitter to feed local transmitter stations in the Asia Pacific region like RNZI does at present with its DRM

SW transmitter. Again I would have to imagine on designated SW broadcast bands. These changes are expected to occur in around six months time.

I would be interested to know who suggested new antennas at SHP site. This is news to me, particularly as Radio Australia is a regional broadcaster and not a global broadcaster and RA doesn't target Africa any more (not since early 90's).

I think the last RA / forces program service to Africa was to Australian forces serving in Somalia(?) from the military SW site Exmouth, WA in 2005, unless I am mistaken??? Anyway, maybe others know more.  
(Ian Baxter-AUS, dxld Apr 29)

AUSTRIA Maybe they already known but here ar some links to foto images of Moosbrunn SW TX site  
<<http://members.aon.at/wabweb/frames/moosbrunnf.htm>>

Wien Bisamberg MW site  
<<http://members.aon.at/wabweb/frames/bisambergf.htm>>  
(John Bernaerts-BEL, SW TXsite Apr 26)

The item on the Wien-Bisamberg transmitter in bc-dx #961, quoting BrDX-UK, contains some severe mistakes, e.g.:

Bisamberg transmissions came from "Reichssender Wien", not "Reichssender Linz".

The 1950 mast was provided by the US Allies - a defunct mast from their Linz-Kronstorf site - but the transmitter was operated, for the "Public Broadcasting Service" by the Austrian Postal Authorities, a first token of independence in occupied Austria.

"Neighbour in Need" started with 60 kW but was increased to 120 kW and even 600 kW.

That the building, which has preservation order on it "serves as a Data Centre for Internet company Google. With good electrical power availability, plenty of water for cooling equipment and good flood protection, Bisamberg was seen as a good place to base a secure server centre" is absolute nonsense;  
the author probably was prey of April Fools' Day.

(John Bernaerts-BEL, SW TXsite Apr 26)

CHILE CVC, Calera de Tango, is STILL putting out big mushy spurs from  
the HCJB relay transmitter on 11920, April 24 at 2310 UT difficult to  
pinpoint, but with BFO they are centered around 11897.6 and 11942.4 kHz,  
i.e. plus and minus 22.4 kHz. Sometimes they are closer to 20 kHz  
displacement, or even 18. Portuguese talk and music from fundamental are  
also audible on the spurs. This started as soon as the relay deal did last  
October, or was it September.  
(Glenn Hauser-OK-USA, dxld Apr 29)

CHINA 6190 Perhaps I should have mentioned straightaway that I first  
ran across this station on April 22 at 2318 UT in what to me sounded like  
Chinese with a difference (mind you I'm not an expert on Chinese), then  
stayed tuned to past 2345 UT when heard mixing with XPBS tune-up tone.

Did check CNR -2 on 7315 & 7335 but 6190 kHz was definitely not in // .  
Curious as to what time this would come on the air I again sat on this  
frequency April 24 from about 2230 UT, and never heard the faintest hint  
of CNR-2 there. Unfortunately I tuned away now and then and re-check at  
2252 UT was a few secs too late to catch full English ID as mentioned in  
my report for April 25.

I'm afraid, I never said I heard any English programming, just the ID was  
in English. I'm not implying this can't be Ge'ermu, only that apparently  
their scheduling on this freq has changed from what is listed in Aoki (who  
has English 2240-2300 UT close down).  
(Martien Groot-HOL, dxld Apr 26)

6090 Qinghai PBS, Ge'ermu, 2205-2226 UT, April 28, Chinese talk & pop  
songs competing with co-channel Melissa Scott. Very slightly behind //

4750 kHz. Also checked CNR -1 4800, CNR -2 6155, CRI 5975 but none of these were in // 6090. Apparently, as on 6190, the Ge'ermu transmitter here has dropped CNR-2 relay and now, temporarily (?), carries its own QPBS programming in Chinese aimed at the earthquake disaster area. (Martien Groot-HOL, dxld Apr 28)

6190 PBS Qinghai [in Tibetan], 1217-1245, April 27. Thanks to the observations and comments from Sei-ichi Hasegawa, Mauno Ritola and especially from Martien Groot, was able to hear this in assume Tibetan; // 4220; at 1230 heavy QRM on 6190 from NHK (in Korean) sign on. So is this ex: 5990? (Ron Howard-CA-USA, dxld Apr 27)

Sei-ichi has confirmed that he also heard 6190 // 4220. He adds: "PBS Qinghai broadcasts Qinghai Earthquake special program formation now. It seems that it broadcasts on high-power 6190 kHz for disaster area."

Seems that the Qinghai Tibetan website is outdated  
<<http://www.qhtb.cn/fujian/view.jsp?id=413&zt=0>>

Thanks to Sei-ichi for his confirmation and comments!  
(Ron Howard-CA-USA, dxld Apr 27)

7210 (ex6973) - According to HP of Yunnan PBS  
<<http://www.ynradio.net/minzu/pinlvzixun/20100420248.html>>

Minority language sce on 6973 kHz, QSY to 7210 kHz from May 1.  
1242 kHz on MW is stopped on Apr 30.  
(Sei-ichi Hasegawa-JPN NDXC, dxld Apr 27)

4460 CNR1 Voice of China at 1213 UT, man and woman in Chinese, with children's voices. Sounded like a program for children, by the tone and style of the announcers' speaking. Good April 27.  
(Harold Sellers-BC-CAN, DXplorer Apr 27)

5050 Beibu Bay Radio. Apr 22 at 1300-1345 UT in Vietnamese. SINPO 34333. News, Southern report and music. ID in Chinese, Vietnamese and English at 1300 & 1329 UT.  
(Iwao Nagatani-JPN, JPNpremium Apr 30)

Firedrake jamming. 14600, Firedrake music, at 0715 UT Apr 25, S=4-5, poor signal in Europe. Against "SOH Xi Wang Zhi Sheng".  
(wb, wwdxc BC-DX TopNews April 25)

Firedrake 25 April 2010 1148 UT: 14600, 13970, 10300 all three //  
All three frequencies strong and // at 1205 UT 25 April.  
(Leonard J. Rooney-PA-USA, dxld Apr 25)

I have 10970 at 1210 UT/very good (off by 1213!) in addition to the frequencies listed by Mr. Rooney this morning.

And just when you thought it was safe to go outside, lo and behold, SOH must be switching frequencies - like playing shortwave 'Whack-a-mole'. Here is an updated Firedrake list at 1225 UT:

8400, fair with some noise/fade  
10300, good, little noise

13970, very good/strong  
15140, good, slight noise.  
(S McLean-NY-USA, dxld Apr 25)

Firedrake April 25, from full bandscan 7-18 MHz:  
15140, fair at 1225; good still at 1356, a rare inband frequency  
13970, JBA at 1226  
13320, poor at 1227  
12950, good at 1220  
10300, good at 1231  
8400, good at 1234  
(Glenn Hauser-OK-USA, dxld Apr 25)

Firedrake all over the place April 26, with nothing audible co-channel,  
u.o.s.:

8400, good at 1246  
10300, good at 1246  
10420, good at 1246  
11100, good at 1246  
12970, good at 1249  
13320, good at 1249  
13500, good at 1249  
13970, good at 1249

15545, poor at 1318, // 16100. Nothing to jam in the April 26 edition of  
Aoki, but V. of Tibet likely upshifted from 15540, via Tajikistan at  
13-14 UT in Tibetan and Chinese.

16100, fair at 1254, nothing higher found yet up to 19 MHz 17300,  
poor at 1326 UT.

15795, probably CNR1, Chinese language QRM to something singing, April 26  
at 1253; at 1259 jamming off leaving S Asian music, and at next check 1315  
that is gone too. The explanation from Aoki: All India Radio's \*Chinese  
service at 1145-1315, 500 kW, 35 degrees from Bangaluru. Maybe it was just  
an hourtop pause for monitoring check?

The ChiCom are afraid even to let India speak to the oppressed,  
information-deprived Chinese people on SW and so many of them don't even  
know it. As a result, does AIR get any listener response? [more below]

CNR1 jamming on // 15330, 15285, 15265, April 26 at 1323. First noticed on  
unusual 15330 mixing with something, i.e. BBC Uzbek via Thailand during  
this semihour only per Aoki; and for good measure, the DentreCuban Jamming  
Command adds some residual pulses on this frequency abandoned by Radio  
Marti a month ago; and in any event did not start until 1400 in B-09 but  
close enough for Cuban government work!

Does the autocratic Uzbekistan government approve of China jamming  
broadcasts in its own language, or even encourage this?

15285 and 15265 are longtime haunts of CNR1 jamming, vs Chinese from BBC  
via Singapore, and RTI respectively. Reception here varies widely  
depending on the nightside MUF, which this date exceeded 17 MHz.

Firedrake April 27:  
8400, poor at 1327

12950, good at 1315, none lower down to 10 MHz; also at 1417  
13300, good at 1224, very good at 1417  
13970, good at 1306, much better than 15970; very good at 1417  
14900, JBA at 1314  
15970, JBA at 1306  
(Glenn Hauser-OK-USA, dxld Apr 26/27)

Firedrake on 9355 kHz over IBB - monitoring since 1700 UT still going now  
(1810 UT April 26) - strong signal of firedrake.  
(Partha Sarathi-IND, dxld Apr 29)

15795, Chinese talk in the clear at 1236 April 29, so AIR's Chinese  
service is unjammed? No! 15795 quickly confirmed as the CNR1 jammer since  
// 12040 where there's also a CNR1 echo against VOA. Not a trace of India  
itself audible on 15795.  
(Glenn Hauser-OK-USA, dxld Apr 29)

AIR in B-09 1145-1315 Chinese 9425(B) 11840(Kh) 15795(B) 17705(B) NE Asia.  
Re 11840 kHz, okay, noted CNR1 jamming this April month in A-10 too.  
(wb, wwdxc BC-DX TopNews April 29)

15255, CNR1 echo jammer also here, April 29 at 1238, vs VOA Chinese via  
Tinang, Philippines at 11-13.

Lots of CNR1s all over the dial as jammers or non-, but at 1240 UT April  
29 I start looking for Firedrakes. Only these found in the 8-19 MHz range:

12970, good at 1240  
10300, good at 1241 vs ute bursts  
9150, very good at 1242; unusual frequency  
8400, good at 1243 UT.  
(Glenn Hauser-OK-USA, dxld Apr 29)

CUBA Alo, Presidente, on the air this Sunday as declamations of El  
Hugazo audible at quick check April 25 at 1750 UT, best on 13680, also  
13750, 12010, 17750 kHz via CUBA. So what's become of RNV's own SW site  
supposed to be on air by end of last year from Calabozo?? Not a word since  
last October or so about progress in constructing it.  
(Glenn Hauser-OK-USA, dxld Apr 29)

This is Radio Havana Cuba, the name of the show is Dxers Unlimited, and  
today's program is on the air when our station is about to celebrate its  
49th year on the air amigos.

On the 16th of April of 1961 Commander in Chief Fidel Castro Ruz addressed  
our nation on the occasion of the burial of the victims of the air attack  
by B-26 bombers to the Ciudad Libertad airport in Havana.

During that speech Fidel told the world that Cuba had a new short wave  
radio station that was, in fact, broadcasting his speech to the world. A  
few days later on May first, we began to use the name "Radio Havana Cuba"  
to identify our station.

And talking a bit more about those early days of our station, we were  
running the first two transmitters while others were still been installed,  
and our antennas were up using electricity company wooden poles because  
the steel lattice towers had not arrived from Switzerland yet.

Yes, and this is part of our station's history.

Our first transmitter to be put on the air was an American made Gates one Kilowatt short wave set using a 4-1000A tetrode final amplifier tube, modulated by two 833's, and it was connected to a half way [sic] dipole antenna strung between two power company wooden poles that were about 45 feet high, that is about 13 meters above the ground, a very low height for a 49 meters band dipole antenna by all standards; but as our chief antenna engineer said, those two utility wooden poles allowed us to be on the air.

Our second transmitter was a brand new Swiss made Brown Boveri 10 kiloWatts rig, that was installed in a provisional building at the Bauta transmitting station site. The beautifully built Brown Boveri was a masterpiece of radio engineering, and we had it on the air in record time from the moment the wooden crates arrived in Bauta.

The third transmitter was quite a challenge, as never before in Cuba's radio history our engineers and technicians had installed and operated a one hundred kilowatt transmitter. Cuba's most powerful transmitters in 1961 were CMBC Radio Progreso and CMQ, both using AM broadcast equipment made by Westinghouse and running 50 kiloWatts.

Before the big Brown Boveri 100 kiloWatt transmitter was on the air, Cuba's most powerful ever short wave transmitter was owned and operated by COCO, and it was a 5 kiloWatt rig that went on the air way back in 1937 in a failed attempt to link several AM medium wave transmitters located at different Cuban provinces using the short wave signal sent from Havana and picked up with a radio at the remote sites.

So, putting the 100 kiloWatts Brown Boveri on the air was a historical landmark in Cuban radio history, and the transmitter was up and running just a few days before the Bay of Pigs invasion that began with the 15th of April air attack against three Cuban airports and continued with the landing of a 1500 strong mercenary force that was defeated in less than 72 hours.

So, on the 16th of April, when Fidel announced that Cuba was broadcasting with its own high power short wave station, we had three transmitters on the air at the same time, the one Kilowatt Gates, and the 10 kiloWatts and 100 kilowatts Brown Boveri's.

A few months later, the Bauta site, located west of the Cuban capital, had on the air two more Brown Boveri's completing the installation of the four transmitters and proceeding to install more and better antennas.

Si amigos, yes my friends, oui mes amis, I had the unique opportunity, as a very young radio technician to participate in the installation of our station's first transmitters and studio to transmitter UHF links; and today I want to pay tribute to the many Cuban radio engineers, technicians and antenna crews that made possible the installation and operation of Radio Havana Cuba's first transmitting station.

(Arnie Coro-CUB CO2KK, RHC DXers Unlimited script April 17 via Yimber Gaviria, playdx yg via dxld)

EGYPT 9305.07 (9305.08 at 0650) Radio Cairo in Arabic, radioplay on odd channel, at 0005 UT on April 25. Only poor S=6-7.

(wb, wwdxc BC-DX TopNews April 25)

ERITREA/ETHIOPIA Eritrea on 4700 kHz. At 1515 UT on Apr 26, I can receive VoBM Eritrea at 4700 kHz. // 7175 & 7185 kHz. My DX-friends received at 1547-1858\*UT on Apr 24. On Apr 25 was not able to receive it.

Ethiopia & Eritrea 7120 kHz jump to 7100 kHz at 1620 UT, Apr 26.

4700 Ethiopian jamming

7120 Ethiopia (jump from 7110 kHz) & Eritrea

7165 Ethiopian Jamming

7185 Eritrea

4700, 7175 & 7185 kHz was blocked at 1600 UT by Ethiopian jamming.

7120 kHz are clear.

(Sei-ichi Hasegawa-JPN, NDXC, dxld Apr 26)

GERMANY Media & Broadcast {former RBI-GDR, former German Telekom, T-systems} Nauen site antenna:

<<http://www.flickr.com/photos/offshore/4511546425/>>

(via Andrea Borgnino, shortwavesites yg via DXLD)

The only pre-1997 antenna that still remains. This is a development of the postal office's RFZ unit (centre for radio and TV engineering), inaugurated in 1964 as a prototype, which remained the only one that was ever built because the construction is just too elaborated. The particular feature of this antenna is that it can be adjusted not only in azimuth but also in elevation.

The building left of the antenna appears to be a new, lightweight one. Probably the ex-Juelich transmission equipment, which with this antenna is used today (the original, related Funkwerk Koepenick transmitter has been shut down in 2000), sits in this shack.

At present this antenna is in use 0100-0500 on 7375 (Hrvatski Radio to North America), Sun only 0900-1000 on 9780 (AWR in Italian), on various slots between 1530 and 1815 on 13590 and between 1800 and 1900 on 11855 (Bible Voice Broadcasting to Arabic world).

(Kai Ludwig-D, SW TX site / dxld Apr 29)

Thanks very much for the technical & historical/current info on this antenna & its broadcast schedule usage. Simply fascinating!

I see 4 rotatable SW antennas at the Nauen - (Weinberg-Waldsiedlung) site with year 2000 image on Google Earth (GE). Using GE as reference, what is the exact GE coordinates of this antenna? It's too difficult for me to discern the difference between this antenna & the other 3 with current GE image.

It's certainly the most complex & unique rotatable SW antenna that I have seen to date.

(Ian Baxter-AUS, SW TXsite, ibid.)

These are the transmission systems from 1997, of the Thomson design originally developed for Allouis (never installed there) and Issoudun, thus known as "ALLISS". The only major difference: These ones house Telefunken transmitters, the S 4105 design developed especially for the Nauen project after Telefunken almost got bumped out completely. As far as

I know only a single more S 4105 has ever been built, for the Sveio site in Norway which no longer exists.

The old main building

<<http://maps.google.de/?ie=UTF8&ll=52.647851,12.908437&spn=0.002327,0.004823&t=k&z=18>>

houses only the control room. The large transmitter hall there is empty, away from being home of a collection to which also the first broadcasting transmitter of the Nauen site belongs. This was a 50 kW Funkwerk Koepenick, installed at 1958 in this building

<<http://maps.google.de/?ie=UTF8&ll=52.644095,12.899339&spn=0.002327,0.004823&t=k&z=18>>

Otherwise this was until 1990 a utility site.

The unique antenna is here:

<<http://maps.google.de/?ie=UTF8&ll=52.645374,12.88781&spn=0.004654,0.009645&t=k&z=17>>

West of it were the old 500 kW facilities, with the towers just being demolished. It started in 1972 with a Brown Boveri 500 kW, using a 6/7 MHz HQ for services to Europe, a HR 4/4/0.5 for the Middle East (listed as 15 MHz only) and another HR 4/4/0.75 (6...12 MHz), dedicated to Chile services. During following years two PKV-500 transmitters plus a S-shaped row of 4/8 curtains have been added with a Soviet contractor.

These old 500 kW facilities have been replaced by the new 500 kW systems in 1997. The 100 kW system remained in use for another three years for DW (6140 kHz) and RNW (English at noon to the UK, the second frequency besides Juelich-6045) until 2000 UT, then it has been revived after six years with an ex-Juelich transmitter for free brokerage in 2006. The 50 kW transmitter on the utility site has been withdrawn in 1991, together with three of the four 2x50 kW Sneg units at Koenigs Wusterhausen.

<<http://www.senderfotos-bb.de/nauen.htm>>

By the way, on the next annual open monument day in 2006 the traditional Deutsche Welle booth (pictured in 2005 here) was already missing, of course, since another presentation after terminating the transmission contract would have been quite impudent.

And I already considered again walking out in 2007, only to listen how they say that they have nothing to do with Deutsche Welle anymore. Perhaps I indeed missed something, judging from the surprise I saw when explaining this to people.

(Kai Ludwig-D, dxld Apr 29)

6055 kHz Suns 0900-1000 UT only. Media & Broadcast via Wertachtal /  
Christian Science beam target towards Black Sea?

Hab mit dem Mary Baker Eddy Laden nichts zu tun, aber soll das so sein,  
dass die 100 kW auf 6055 kHz von 0900-1000 UT in Richtung Schwarzes Meer  
in Deutsch gebeamt werden? Hier jedenfalls kommt nur ein eher duennes  
Signal an.

Dieses deutsche Programm ist - glaub ich - ein Ueberbleibsel vom CSM-  
Radio. Das hatte damals an den Wochendenen lokalisierte religioese  
Programme, u.a. auch in Deutsch. Nach dem Verkauf der Stationen in den USA  
hat man sich dann eingemietet bei M&B. Ob die Buchung (und Produktion) aus  
Deutschland kommt oder direkt aus den USA weiss ich nicht.  
(Stephan Schaa-D, A-DX Apr 25)

Wer ist denn der Hersteller dieses Deutschprogramms? Diese soft-religioese  
Organisation steht dahinter? Ortsgemeinden sind hier beschrieben:

<[http://de.wikipedia.org/wiki/Christian\\_Science](http://de.wikipedia.org/wiki/Christian_Science)>

Ich habe die Station noch nicht gehoert ... CSM Radio in Maine ist doch  
schon vor einem Jahrzehnt eingestellt worden.

Technisch:

100 kW aus Wertachtal in Hauptrichtung 90 Grad ueber eine 201 Antenne, AHR(S)4/1/0.5 . Alle HQuadrant Antennen sind anderweitig belegt?

90 Grad ist Burgenland, Ungarn, Rumaenien, Krim, Georgien als Hauptkeule. Aber man vertraut darauf, noch genuegend quasi Rundstrahlung als Nebenprodukt zu erregen?

Im Winter gab es noch eine Aussendung in Richtung 75 Grad, von 5960 kHz 100 kW [ant 207 - AHR(S)4/2/0.8 ].

Jetzt im Sommer auf 9585 kHz im 31 mb gewechselt, 125 kW ant 217 - ein richtiger Brummer AHR(S)4/4/0.8 -, samstags um 1800-1900 UT.

Richtung deutschsprechende Neugeister in RUS/CIS, Ungarn, Ukraine, Wolgograd und weiter nach Sibirisch Russland/KAZ ...  
(wb, A-DX Apr 25)

Die angegebene Adresse ist jedenfalls Hamburg. Man hat auch eigene QSL-Karten (Hamburger Hafen?). Das man viele Interview hoert, die in Deutschland aufgenommen wurden, nehme ich an, dass auch die Programme hier produziert werden.

(Peter Vaegler-D, A-DX Apr 25)

Maybe they already known but here ar some links to fotos of Munich Ismaning

DAB+ til 2016 in Germany ?

Die Direktoren der Landesmedienanstalten haben den weiteren Fahrplan zur moeglichen bundesweiten Einfuehrung vom neuen digitalen Radio (DAB+) aufgestellt. Bis zum 22. Juli muessen die interessierten Radiosender einen Vertrag mit dem Sendernetzbetreiber Media Broadcast vorlegen. Bei der Sitzung der ZAK (Kommission fuer Zulassung und Aufsicht) am 3. August soll dann ueber die Aufteilung der Uebertragungskapazitaeten entschieden werden.

(Juergen Fenn-D, A-DX Apr 26)

Konzept einer hybriden Radionutzung vorgestellt.

Die Bayerische Landeszentrale fuer neue Medien hat ein Konzept einer hybriden Radionutzung vorgestellt, die die technische Verbreitung eines Radioprogramms hinsichtlich der Verbreitungskosten optimieren soll. Ziel ist es, in einem Radiogerat den jeweils technisch optimalen und fuer den Anbieter kostenguenstigsten Verbreitungsweg zu aktivieren.

Ein deutsches Hoerfunkprogramm kann heutzutage meist sowohl ueber UKW, Digital Radio als auch ueber Internet empfangen werden. Mit dem Vormarsch von WLAN-Radios tritt nach dem Urteil der Autoren Mathias Kuefner und Rainer Biehn derzeit in den Koepfen der Verbraucher UKW-Radio immer weiter in den Hintergrund, selbst wenn man auch altgewohnte deutsche Anbieter hoere. Fuer den Anbieter des Programms bedeutet aber jeder zusaetzliche Hoerer ueber Internet zusaetzliche Kosten, was bei einer terrestrischen Ausstrahlung natuerlich nicht der Fall ist. Das von der Bayerischen Medien Technik GmbH entwickelte Konzept sieht vor, dass ein ueber Internet

verbreitetes Programm, das gleichzeitig auch terrestrisch empfangen werden kann, von einem entsprechenden Radiogerät bevorzugt auf terrestrischem Empfang umgeschaltet wird. Der Hörer unterliegt dabei keinerlei Einschränkungen, doch kann der Programmanbieter erheblich Verbreitungskosten einsparen.

Die Autoren der Studie verweisen darauf, dass es zwar auch reine WLAN-Radios gibt, aber im Markt bereits jetzt auch Radioempfänger sowohl traditionelle Empfangswege als auch das Internet via WLAN bieten. Diese Option soll genutzt und gestärkt werden. Die BLM will in den kommenden Monaten gemeinsam mit interessierten Partnern ein Pilotprojekt zur Machbarkeit des Konzepts durchführen. Das 34 Seiten umfassende Konzeptpapier "Chancen und Möglichkeiten einer hybriden Radionutzung" steht unter <[www.blm.de](http://www.blm.de)> im Download-Center als pdf-Dokument <BLM\_Hybride\_Radionutzung\_V2.1.pdf> zur Verfügung.

(Dr. Hansjoerg Biener-D, ntt May 1)

Ehemaliger Telefunken / Telekom Antennenmessplatz Brueck.

Nach den zwischenzeitlichen Querelen um den Abriss enthalten die heutigen "Potsdamer Neuesten Nachrichten" auf der Regionalseite Potsdam-Mittelmark ein Foto des sog. Doppelturms III (54 m Höhe, metallfrei). Der Begleittext lautet:

"Brueck auf Sendung.

Zwei stillgelegte Antennenholztürme (Baujahr 1959 und 1963) stehen bei Brueck auf einer grossen Wiesenfläche. Der Antennenmessplatz wurde Anfang der 1930er Jahre von Telefunken gegründet und nach dem Zweiten Weltkrieg von der Deutschen Post der DDR weitergeführt. Noch bis vor einem Jahr wurden hier verschiedenste Antennenmodelle messtechnisch von Telekom-Mitarbeitern untersucht.

Der Beelitzer Bauunternehmer Thomas Schielecke hat die denkmalgeschützten Türme jetzt erworben, er strebt eine touristische Nutzung an. Studenten der Beuth-Hochschule für Technik aus Berlin untersuchen derzeit den Zustand der Türme und deren wirtschaftliche Nutzbarkeit.",  
Foto Nestor Buchmann/dpa

Erinnert sei in diesem Zusammenhang an den Beitrag  
Peter Manteuffel(+): Der Antennenmessplatz in Brueck,  
in: Gerd Klawitter (Hrsg.), 100 Jahre Funktechnik in Deutschland,  
Bd. 2 - Funkstationen und Messplätze rund um Berlin,  
Wissenschaft und Technik Verlag, Berlin 2002.  
Der Doppelturm ist Titelfoto des Buches.

Spannend im Moment zu testen, wie die 6140 und 6005 kHz mit dem gleichen Modulationssignal performen. In England 6005 kHz mit S=9+10, die 6140 kHz mit S=9+20. Auch schoen zu hoeren, wie ein Optimod 9000A/1 im Gegensatz zum 9105 klingt. Die 6140 klingt m.E. etwas "blechener". April 25.  
(Christian Milling-D radio.700, Apr 25/26)

GREECE SPURS: Greece regulary heard on 6210 kHz, f.e. on Apr 21st at 1800 UT // 9420 15630 kHz.  
(Rumen Pankov-BUL, wwdxc BC-DX TopNews April 29)

(Andrea Borgnino-ITA IW0HK - HB9EMK, shortwavesites yg via dxld)

GUINEA 7125.006 Radio Guinee, at 1907 Ut, French, nice Cora music with talk by a man, convenient "Radio-Guinee" ID. Good signal and good modulation but still some problems, as the transmitter kept cutting out. The station was off, when I rechecked about 30-minutes later. At least it

sounds as though they are "attempting" to stay on the air. 16 April.  
(David Sharp-NSW-AUS, via Robert Wilkner-FL-USA, DXplorer April 30)

GUYANA 3289.99 V. of Guyana, at 0905-0940 UT on April 26, good level despite constant static crashes. Soft spoken man DJ in English, oldies pops "My Cup Runneth Over With Love," "You Light Up My Life," etc. TC's, birthday greetings, local anmts, "Good morning to you," "plenty of sunshine today." Starting to drop fast by 0940 UT. Great to have this one back per recent rpts.

(John Herkimer-NY-USA, DXplorer Apr 26)

Senderbauer Jamie Labadia wollte am 18. April 2010 nach Georgetown fliegen, um den neuen Kurzwellensender des National Communications Network nachzuarbeiten. Bekanntlich hatte man bei ihm einen 10 kW-Sender fuer 5290[?] kHz bestellt und dabei eine Mischung der eigentlich vorgesehen Frequenzen 3290 kHz nachts und 5950 kHz tagsueber produziert. Labadia wollte beide Frequenzen bis spaetestens Ende des Monats in Betrieb sehen.  
(Jamie Labadia 9.4.2010 dxld, via ntt May 1)

HONG KONG Re 675 0000-2400 daily Hong Kong 1 kW En to SoCHN also in A-10 schedule.

Re <<http://groups.yahoo.com/group/dxld/message/40330>>

The BBC WS stopped broadcasting in Hong Kong after the turn over to China in 1997. RTHK run some newscasts but that's about it.

That was BBC WS on SW. Station was located in NW New Territories, area now a massive landfill.

<<http://groups.yahoo.com/group/dxld/message/40334>>

Replying to DF5SX's mention of Radio 6 on 675 kc: Yes I know. But now on that frequency is one of Metro Radio's channels.

<<http://groups.yahoo.com/group/dxld/message/40337>>

Forgot to paste this. Here is the RTHK site:

<[http://www.rthk.org.hk/index\\_eng.htm](http://www.rthk.org.hk/index_eng.htm)> Radio 6 is long gone.

Refer to sound broadcast service information from our telecom authority:

<[http://www.ofta.gov.hk/en/freq-spec/eng\\_freq\\_table\\_sound.pdf](http://www.ofta.gov.hk/en/freq-spec/eng_freq_table_sound.pdf)>

As for the web site, I believe seeing how Radio 6 is only non-RTHK content service, gives them convenient excuse to give it a little less visibility.

No point or perhaps even no contractual basis to stream it, therefore not archived either. Nor schedule anything for it. So no real surprise that

only mention of R6 I can find is at bottom of their "Radio Home Page"

<[http://programme.rthk.org.hk/channel/radio/channel\\_index.php](http://programme.rthk.org.hk/channel/radio/channel_index.php)>

Says "Heung Gong Din Toi Dai Luk Toi" - R(T)HK Radio 6 BBC World Service: AM 675.

(R BULGARIA DX MIX News, Ivo Ivanov, via wwdxc BC-DX TopNews Apr 27)

IRAQ/IRAN On 3922 kHz from 0240 UT a man singing, the jammer was on 3932 kHz but and at 0302 UT ID and Anthem of Kurdistan. Same hymn but no in parallel at 0304 on 4878 kHz. On both freqs the ID is same "Eira Dendzhi Kurdistanana Iran" but the contents of the prgrs are different, Apr 22.

(Rumen Pankov-BUL, wwdxc BC-DX TopNews April 29)

KUWAIT 11670-11675-11680, MOI Kuwait DRM broadcast, 0020, Apr 05, news and Islamic sermon in Arabic, 44444. Both were heard on a HIMALAYA 200 receiver with standard telescopic antenna. However, for DRM broadcasts it is difficult to give a quality rating in SINPO. For example, Voice of Russia announced DRM broadcasts were not heard!

(Vladimir Bochkov-RUS, dswci DXW April 12 direct and via dxld Apr 22)

After logging R. Xoriyo on new 15540 kHz at 1430-1500 UT, receiver was still tuned to 15540 when I turned it back on a few hours later.

Surprised to find good signal on 15540 kHz with pop music at 1856 April 19; 1900 no ID heard but into English program "Pioneers of Civilization", about the contributions of Muslim scholars for ten centuries. Opened with a credit to something-Choice Produxions, and then Allah-Akbar song. M narrator has American accent, W has Britishish accent, speaking slowly and clearly and with musical produxion.

You learn something every day: Allah created man from a leech. Finally got down to business at 1904 UT focusing on a mathematician, Ali Ben-Hamza (sp?). But whence is it? Modulation good, so can't be Cairo or Damascus on

a new frequency, but who else in Arab world has English at this hour?  
Kuwait! Check 11990 kHz where English has been scheduled for ages at  
18-21 UT: nothing there. Will go back to 15540 kHz again later.

At 1910, 15540 weakening and still no 11990; 15540 much weaker than  
Portugal on 15560. Next check at 2015, rock music, poor signal now vs  
noise level, and still music past 2035 with no announcement breaks. At  
2100 time signal, ID in Arabic mentioning Kuwait, news theme and news in  
Arabic, but cut off the air at 2104\*.

Later, checking the references, primetimeshortwave still has 11990 as the  
18-21 English frequency. EiBi too, 11990 for English to Europe at 18-21,  
and 15540 during the same pair of sesquihours is supposed to be DRM in  
Arabic!

Aoki has a match, tho, with 15540 as R. Kuwait A-10 analog English from  
MOI at 18-21, 150 kW, 310 degrees, i.e. USward as well as UKward. Altho  
Aoki got it, the complete R. Kuwait/MOI A-10 transmission schedule has  
been slow to come out; not yet in DXLD nor in the bclnews.it archive, for  
instance. Anyhow, 15540 should be better for US in the summer season than  
11990.

After 2200 I looked for DRM from Kuwait on 11670-11675-11680 as previously  
scheduled to North America, but unfound.

Another new A-10 frequency is per Aoki:  
11950 R KUWAIT (DRM) 2200-0230 1234567 Arabic 150 350 Sulaibiyah.  
Checking at 2247 UT, I can't hear any DRM around either frequency, but by  
now maybe just not propagable.

This DRM schedule does not now show anything for Kuwait!

<<http://www.drm-dx.de/>>

nor can I find any recent forum mentions of Kuwait DRM logs here or at the  
drmna yg. However, there was a report of Kuwait DRM on 11675, April 5 at  
0020 UT by Vladimir Bochkov-RUS.

(Glenn Hauser-OK-USA, dxld Apr 22)

When the transmitter on 15540 kHz was switched on - before 1800 UT - I  
heard the last part of the Urdu service - via the Multilingual programme I  
assume. This closed at 1759 UT with Anthem, then time pips (correct to the  
second) and ID as Radio Kuwait followed by a time check. Frequencies given  
were 963, 96.3 and 11995 kHz. A lengthy item about the Koran followed and  
then a pop music session until 1830 when more time pips, ID and  
frequencies then news. More pop music from 1835 UT.

Audio quality is clear but sounding via a low quality line - or is the  
station using an off-air relay? There is very slight interference from  
RNW English via WER using 15535 kHz - and they are receiving a lot of  
side-splash from KWT, especially during music sessions. Maybe this is not  
so bad in their EaAfrica target area.

(Noel R. Green-UK, dxld Apr 20)

Apr 26th noted R Kuwait starting on 7600 around 1650 in Arabic, // to  
13650. Noted them on 7600 also previous day at 1705 UT.

(Jari Savolainen-FIN, dxld Apr 29)

Thanks, Jari, for the news, now at 1740 UT nothing heard on 7600 kHz

anymore, but as usual on 6050{6055 Apr 30} kHz {noted Apr 24/25/26}, seemingly at 1600-2100 (-2200?) UT. And same program in // on 13650, latter which is also new.

Kuwait noted also on 11630 kHz {to Sahara and West Africa?} recently in 1500-1600 UT slot and co-channel CNR Lingshi in Uighur language.

Zacharias Liangas also reported 9750 kHz at 1116 UT. Latter is covered by V of Russia DRM hiss noise, so seize the hour til 1240 UT ...

1900 UT noted R Kuwait ENGLISH on 15540 kHz Apr 25, and 1910 UT R Kuwait Arabic on 6050 kHz S=8-9, and increased signal from dark around 1930 UT onwards. Around 1800 UT also Arabic on 6050 and 13650 in //

I guess the sheikhs need 4 weeks time to arrange their operations, according their registration, after start of A-10 season to establish their new summer schedule.

(wb, wwdxc BC-DX TopNews April 29)

Main Arabic prgr of Radio Kuwait QSY from 6050 to 6055 kHz at \*1607 UT on April 30.

(Sei-ichi Hasegawa-JPN NDXC, dxld Apr 30)

Comment by NG: KWT is another station that seems to have a "wish list" of registered frequencies that are never used.

(Noel R. Green-UK, wwdxc BC-DX TopNews Apr 21)

Well, 7600 is probably a mixing product of 13650 and 6050 kHz. Kuwait seems to be on both frequencies. The rather weak signal of 7600 points also to that direction.

(Jari Savolainen-FIN, dxld Apr 29)

KYRGYZSTAN KTR-Kyrgyzstan appeals for help. Friday 16 Apr 2010.

The ABU's member in the Kyrgyz Republic - the National TV and Radio Corporation (KTR) - has appealed for help after suffering significant damage in the recent clashes in the country's capital, Bishkek.

In the violence that led up to the ousting of the country's former President, Kurmanbek Bakiev, four of KTR's five studios were attacked and suffered irreparable damage.

Only the Zamana studio - where morning entertainment programmes are produced - escaped damage because it is located in a separate building away from KTR's headquarters.

Currently all of KTR's output is being broadcast from the Zamana studio, but according to Musaeva Janar of KTR's Foreign Affairs Department, equipment there has not been updated for many years and "may lead to overload and failure of the only available equipment of the corporation".

KTR is appealing to broadcasters in other parts of Asia for donations of cash or equipment to help it stay on air.

The ABU's Technical Department will help coordinate any offers of technical assistance for the station.

KTR - which was established in 1958 - is the country's first national channel and covers 90 percent of the Kyrgyz Republic.

4010 Kyrgyz Radio 1, at 1753 UT on 15 April with operas or classical music, barely heard due to very low modulation // 4795 kHz with same audio problem. Signals S7/S9 respectively, 44332.  
(Zacharias Liangas-GRC, wwdxc BC-DX TopNews April 25)  
see also KGZ under Azerbaijan above ...

MARIANA ISL [Tinian] Confirmed the Chinese broadcast from somewhere on 12035 kHz, splashed by Cuba 12030 kHz, April 29 at 2241 UT with ID, sacred choral music, 2242-2245\* VR IS.

Did NOT conclude with "This is the Voice of America, Washington DC, signing off" but presumably IBB TINIAN as scheduled in collusion with the RCC to the exclusion of any other religious broadcaster.  
(Glenn Hauser-OK-USA, dxld Apr 29)

12035 kHz 250 kW at 303 degrees, at 2200-2245 to China via Tinian site.

MOLDOVA [to Ethiopia] 15540 via Grigoriopol Maiac, Pridnestrovye, Radio Xoriyo Ogadenia, at 1435-1500\* UT on April 23, presumed with talk in listed Somali. Local Horn of Africa music. Weak but readable. Mon/Fri only.  
(Brian Alexander-PA-USA, dxld Apr 26)  
15540 switched OFF at 15.00:17 UT, S=1 only in Germany ...  
see also Grigoriopol-MDA 1413 kHz under Russia.

MONTENEGRO Nx in approx or exactly in Serbian language from 0300 UT on MW 882 on Apr 22.  
(Rumen Pankov-BUL, wwdxc BC-DX TopNews April 29)

MYANMAR [or UNID] 7186 Heard with poor signal on April 22 & 23: 2320 UT Carrier, 2326 IDs by Lady Voice in language close to Chinese, 2328 UT sw/on with song and at 2330 UT gongs, pipes and lady says "Sankua Konmua", choir with mantra singing.

2332 UT Bells and pop songs in Vernacular etc. At 2339 UT a Lady voice annmt. "... kilohertz ...", next songs and talks. At 0030 UT string sounds, mantra etc. and fade out. A very strange thing is that all time as background sound is heard a man voice reading something.  
(Rumen Pankov-BUL, wwdxc BC-DX TopNews April 29)

NETH ANTILLES [Bonaire] 6140 (ex5970) kHz.  
2359-0027 UT BON 5970 kHz 180deg 250kW RNW Dutch daily to CAR.

RNW Bonaire - RHC Quivican clash.  
Surprised the Radio Netherlands / Radio Havana Cuba clash is still happening at 0000 UT on 5970 kHz ... been going on for several weeks. Must make both transmissions useless in the target areas ... pretty much equal strength here in Houston-TX.  
(Steve Lucetex-TX-USA, dxld Apr 29)

You will be pleased to hear that the RNW frequency is changing to 6140 kHz as we have indeed had a number of reports of interference in the target area. I think the change is happening tonight, but if not it will definitely happen tomorrow (30th April).  
(Andy Sennitt-HOL, RNW via dxld Apr 30)

NEW ZEALAND Bizarre Radio New Zealand Competition!  
I prefer Radio # 9 ... my favourite is the Swappa Crate" radio - for obvious reasons!

NIGERIA Schedule changes of Voice of Nigeria, Abuja.

Here is the latest announcement made at the start of Voice of Nigeria's "This Week on VON" at 1005 UTC on Sunday 25 April 2010 (listening online at <[voiceofnigeria.org](http://voiceofnigeria.org)> ):

"Broadcasts of programmes in English from this station can be heard on three frequencies: 15120 kHz in the 19 metre-band to North Africa and Europe, and 9690 kHz in the 31 metre-band to West Africa, and 7255 kHz in the 41 metre-band also to West Africa.

Times of broadcasts on 15120 kHz are from 04.55 UT to 7 hours UT for the first segment, and 15 hours UT to 19 hours UT for the second segment.

And for 9690 kHz programmes run from 9 hours UT to 15 hours UT.

On 7255 kHz programmes are broadcast from 19 hours UT to 20 hours UT."

This still doesn't seem to completely match what is actually being heard on shortwave, but maybe it will settle down when all of the new transmitters are on air.  
(Tony Rogers-UK, BrDXC-UK ng Apr 25)

PAKISTAN Radio Pakistan Pushto service was monitored from 1345-1445 UT followed by Dari broadcast from 1445-1545 UT on 6235 kHz. Later on Persian service was monitored from 1700-1800 UT on 6235 kHz. The signal for Pushto and Dari broadcasts was reasonable and transmitter hum was higher than usual. While the signal for Persian language broadcast at 1700-1800 UT was good. SINPO was 45433 and the transmitter was API-3.  
(Aslam Javaid-PAK, dxld April 21)

15100 R Pakistan Urdu HQuran sce to NE/ME?, scheduled 0500-0700 UT, noted at 0615-0630 UT but poor signal S=4-5 level, // 17835 kHz stronger on S=7-8 level, April 23.  
(wb, wwdxc BC-DX TopNews April 23/25)

Woodpecker pix.

Hi Jonathan, All is good with the topic.

I think we 'might' have covered some Russian OHR material on this website previously or maybe in Wolfgang's bc-dx column. Anyway it is interesting material. Happy to see it here. I never fail to be in awe at the massive engineering construction of such antennas. I'm sure there's some fascinating stories associated with these stations / installations.

Is there a public link to your Media Network show ref Feb 1987 with Bob Horvitz? I'm sure I didn't hear this one.

Best regards

(Ian, SW TX site Apr 26)

RUSSIA/MOLDOVA Three different prgrs of Home Sces in Russian were at 1925 UT:

1. on 7200

2. on 6160 and 7220 (Radio Rossii)

3. on 7310 // MW 1413 {via Maiac Grigoriopol Moldova} (Voice of Russia)

On 4050 kHz at 2356 UT played the National Anthem of Russia (melody is the same as of the exUSSR anthem) and at 1800 UT was // 7220 with Radio Rossii prgr.

(Rumen Pankov-BUL, wwdxc BC-DX TopNews April 29)

SLOVAK REP 10000 UNID in Arabic language. IM of 9740 kHz fundamental?

Nils Schiffhauer schrieb: Hmmmh, aber um 06:00 UTC kam eine ID von IRRS Milano- Extra in Englisch, damit "sogar ich" sie verstehen konnte ... was zudem relativ zwanglos auch das haeufigere Auftreten des Woertleins "Sudan" erklart.

73, Nils DK8OK, Perseus rx, 96 m delta loop, 42 m windom.

Ich hab selbst jetzt nicht reingehort - aber offensichtlich macht sich neben Jordanien jetzt auch Rimavska Sobota unerwuenscht auf 10000 kHz

bemerkbar - das Programm duerfte dann wohl Miraya FM gewesen sein.  
(Patrick Robic-AUT, A-DX May 1)

During the period between the 1st of May and the 30th of September 2010  
the following changes will be implemented in our broadcasting schedule.

Monday, Tuesday, and Wednesday broadcasting will only take place on one  
frequency.

Highlighted frequencies will be broadcast during even weeks.  
Frequencies which are not highlighted will be broadcast during odd weeks.  
There will be no changes to broadcasts during Thursday, Friday, Saturday  
and Sunday.

THAILAND Support services company VT Group, which transmits the BBC

World Service, has been presented with the Professional Services Award at this year's BBC Global News Reith Awards for its exceptional effort in protecting the BBC Asia relay station in Thailand from severe flooding and maintaining transmission.

The site, located in the Nakhon Sawan province in Northern Thailand, is owned by the BBC and operated by 29 VT Group staff. The building faced major damage and the staff were also in danger after extreme rainfall in the region caused authorities to divert flood waters from dams to protect the population of Bangkok and other urban areas.

However, as a result, the transmitting station was in the direct path of the diverted flood waters and desperate action was needed to protect the site and staff. Hundreds of tons of sand were packed into bags to protect site buildings and inside doors were sealed and additional barriers erected.

Once the flood waters began to rise there was nothing more staff could do as the site was breached and eventually the safety of the equipment was compromised. There was no alternative but to cease all broadcasts and to find alternative ways to transmit in appropriate quality.

The decision to close the site triggered the VT planned emergency response. Within 30 minutes, all on-air transmissions had been placed at alternative VT transmitting stations. Site staff even enlisted the help of the Thai army who worked with volunteer staff to reinforce the sand-bag wall, operate the pumps and control water ingress. The building stood secure and essential power was maintained until the waters subsided and a clean-up plan was put in place, using local staff to ensure a cost-effective and efficient solution.

Subsequent work upgraded flood defences, including the re-design and re-laying of drains around the station to control any ingress of water better, strengthening the perimeter wall and raising the height of equipment in the antenna field.

VT Group General Manager Communications John Prior explained: "Inspirational leadership and great teamwork avoided a potential disaster. Although there was a threat to the homes of many staff, they remained on site to lead the efforts there. If the water had entered the building, it would have affected the equipment. BBC transmissions from the site would have been off air for months and the financial costs of repair would have been enormous. The response of the staff was really beyond the call of duty."

Nigel Fry, Head of Transmission and Distribution in the BBC World Service said the tremendous effort of the VT Group staff has been recognised with this award. The response is a great reflection on the relationship that we have with the VT Group team.

In recognition of the help offered by local teams, VT and the BBC made financial and other aid donations to the local flood aid centre for distribution to the neighbouring population.

(VT Group, April 28, by Andy Sennitt-HOL, RNW MN via dxld)

UNIDENTIFIED 9369.91 Unid stn, Arabic sermon, S=9+10dB, at 0008 UT Apr 25. Puzzle, WTJC MOREHEAD CITY is scheduled 9370 kHz in English. (wb, wwdxc BC-DX TopNews April 23/25)

6190 April 25, 2240, transmitter came on, uninterrupted tune-up tone, then dead air to 2248 female opening in definite Chinese, 2250 march which I recognized from CNR-2 because they play this before s/off. Followed ID in Chinese and English 2251 but could only make out the last word "... Radio", then continued in unid Chinese dialect or possibly Tibetan to well past TOH. Mixes co-channel DLF & Belarus, Aoki lists CNR-2 here 2055-2300 UT but not sure whether this is really them? A bit late for me to stay up to monitor this every night so can someone please help?

(...) Perhaps I should have mentioned straightaway that I first ran across this station on April 22 at 2318 in what to me sounded like Chinese with a difference (mind you I'm not an expert on Chinese), then stayed tuned to past 2345 when heard mixing with XPBS tune-up tone. Did check CNR-2 on 7315 & 7335 but 6190 was definitely not in //. Curious as to what time this would come on the air I again sat on this frequency April 24 from about 2230, and never heard the faintest hint of CNR-2 there. Unfortunately I tuned away now and then and re-check at 2252 was a few secs too late to catch full English ID as mentioned in my report for April 25.

I'm afraid I never said I heard any English programming, just the ID was in English. I'm not implying this can't be Ge'ermu, only that apparently their scheduling on this freq has changed from what is listed in Aoki (who has English 2240 to 2300 close down).

6190 April 26, 2251, English ID after same march as in previous report. Unfortunately co-channel DLF was much too strong so I again missed exact wording. I agree with Mauno Ritola that this might be Qinghai PBS broadcasting their own Tibetan service rather than relaying CNR -2. Tried // 4220 but inaudible there. Also have a listen to their multilingual string of IDs on <<http://www.intervalsignals.net>> (Martien Groot-HOL, dxld Apr 29)

U.K. 15220 Cotton Tree News Radio via Rampisham at 0730-0800 UT Apr 25, S=8-9 in Germany. Program in some English, but mostly Vernacular lang, interspersed with some French words. (wb, wwdxc BC-DX TopNews April 25)

ZAMBIA 9540 1Africa, CVC, is still on the wrong frequency, 9540 instead of 5940 as scheduled at 19-22. Or is it? Registered on 5940, but is it pure luck that there is no collision with anything on 9540, while there would be a collision with Iran via Lithuania on 5940? Maybe CVC intended to use 9540 all along, and "5940" was the mistaken entry in HFCC. I've advised CVC HQ in UK about this anomaly.

Rechecked 9540, April 24 at 2149, gospel rock, 2153-2159 extremely overwrought dramatization with screaming, something about the international airport in Tanzania. Gospel rap at 2200 until abruptly cut off air at 2203\* without so much as a good-night, frequency announcement, or please-retune-to.

I say "gospel" but that is only an assumption since any religious content is unclear, due to rapid pace and accents, hard to tell what they are saying or singing. Gotta hand it to these stealth evangelists: they really know how to suck in today's modern young Africans.

(Glenn Hauser-OK-USA, dxld Apr 29)

Glenn, 9540 is correct as per the 1Africa schedule at  
<<http://www.1africa.tv/>> i.e. 1900-2200 UT.

#####

A-10 season - 7.1 to 7.2 MHz ham radio range.

And re operations OOB - the band edges now appear to be very blurred, and  
I think it was Glenn who remarked that stations now seem to broadcast  
where they want to as long as there is no protest about it. And the HFCC  
appears to condone it by registering use of such frequencies. There was  
information for broadcasters via the HFCC concerning the 7100-7200 part of  
41m, and that it was now a ham band, but some Frequency Managers appear  
not to have read it.

However, most have now complied, and I would guess that Ethiopia and  
Eritrea would shift out of the 7100-7200 segment of the band if there  
wasn't a radio war going on. I would question if it is legitimate for a  
broadcaster to use 7200. Maybe if it used USB only, but in AM the signal  
will spread below 7200 kHz. It was obvious that by reducing the 7 MHz  
broadcast band by 100 kHz, and not allocating a similar amount elsewhere,  
that broadcasters would simply move to the top end of the band OOB, where  
many were operating already.

(Noel R. Green-UK, wwdxc BC-DX TopNews Apr 29)

AFGHANISTAN Re: Khost MW 621 kHz 200 kW Harris mediumwave unit ?

I monitored 621 kHz a couple of time during the week but found no signal in my region. Nowadays reception conditions here are poor on the whole. Radio Pakistan Peshawar, which used to be heard in Lahore with moderate strength is not being heard nowadays. While many Indian stations are being heard clearly on the frequencies between 650 to 600 kHz. The stations from the western direction are not being heard in my region from last few weeks.

(Aslam Javid-PAK, dxld May 4)

Logged VOA Deewa Radio in Pashto on 621 kHz, 2nd May during check at around 1750 UT; this is via the new MW transmitter site in Afghanistan located in Tani-Khost. A 200 kW Harris transmitter was installed recently. Schedule: 0100-0400 & 1300-1900 UT on 621 kHz in Pashto.

Here's an audio file:

<[http://sites.google.com/site/alokeshgupta2/deewa\\_radio\\_voa\\_621\\_1758-1800utc\\_2may2010r.mp3?attredirects=0&d=1](http://sites.google.com/site/alokeshgupta2/deewa_radio_voa_621_1758-1800utc_2may2010r.mp3?attredirects=0&d=1)>

(Alokesh Gupta-IND, dx\_sasia yg via dxld May 5)

ALASKA The Coast Guard has knocked down Alaska's tallest structure,

along with a part of its maritime and flight communications history. The agency and a private explosives company on Wednesday demolished a 1,350-foot Long Range Aids to Navigation tower on the Seward Peninsula.

The tower was at the Coast Guard LORAN station at Port Clarence about 70 miles northwest of Nome. It was completed in 1961 and was the tallest tower of its kind in the country...

<[http://hosted.ap.org/dynamic/stories/A/AK\\_TOWER\\_DEMOLITION\\_AKOL-?SITE=RIPRJ&SECTION=HOME&TEMPLATE=DEFAULT&CTIME=2010-04-29-23-06-52](http://hosted.ap.org/dynamic/stories/A/AK_TOWER_DEMOLITION_AKOL-?SITE=RIPRJ&SECTION=HOME&TEMPLATE=DEFAULT&CTIME=2010-04-29-23-06-52)>

(via Mike Cooper, dxld May 6)

Alaska's tallest structure demolished in explosion Alaska's tallest structure has been destroyed in a controlled demolition using explosives. The 411 m (1,350 ft) Long Range Aids to Navigation (LORAN) tower on the Seward Peninsula was brought crashing down. The Coast Guard, who ordered the demolition, said the tower was deteriorating and at risk of collapse.

AUSTRIA [Poland non] Polish Radio External Service.

Today, 6 May, I am hearing Polish Radio External Service in English at  
1700 UTC on 9770 (scheduled on 9655 kHz) with a strong signal and their  
programmes "Europol Express" followed by "Focus". I assume, this is still  
via Austria.

(Alan Roe-UK, dxld May 6)

This is on the Polish Radio website:

"As of May 5th PRES in English can be heard on 9770 kHz at 18[sic] UTC.  
The frequency has replaced 9655 kHz at the same hour, the reason being  
complaints of severe interference filed by another broadcaster. The change  
has been introduced by VT Group, our tx provider, who apologizes to  
listeners for the unexpected inconvenience."

I wonder who the other broadcaster is?  
(Andy Sennit-HOL, dxld May 6)

Is 1700 UT still correct ?  
<[http://www.thenews.pl/radio/multimedia/artykul130969\\_frequency-change-yet-again.html](http://www.thenews.pl/radio/multimedia/artykul130969_frequency-change-yet-again.html)>

"As of May 5th PRES in English can be heard on 9770 kHz at 18 UTC."

18 UT is wrong ! This change is still a puzzle,

-- RDPi, Lisbon registration entry is a fake, known as "wooden entry",  
is only a reserve frequency and is not on air.

-- Lutheran World Federation, program schedule shows later start  
from 1800 UT onwards.

-- the only interfering signal co-channel comes out and could be from  
Iran in Swahili 1730-1800 UT in a total different target towards  
East Africa.

#935 HQ1/0.4

H horizontal polarisation of the antenna

Q quadrant type

n the number of dipoles stacked vertically

h height of the lowest dipole above ground in wavelengths at the design  
frequency

<<http://www.antenna.be/hq.html>>

Antenna #935 at Moosbrunn Austria is like steep angle - fountain like -  
non-direction type, but strong 300 kW of power should cover central Europe  
as target easily.

I heard PRW via Moosbrunn 9655 kHz the other day and had no interference  
notice.

New 9770 kHz channel could be subject of interference of co-channel Kashi  
China outlet.

At first PRW in English was meant to Scandinavia target at ciraf zone #18,  
towards Norwich, Copenhagen, Stockholm, and Helsinki - St. Petersburg, via  
Woofferton site at 58 degrees. But changed later to Moosbrunn site with  
non-dir antenna to central Europe.

(wb, wwdxc BC-DX TopNews May 6)

Polish Radio confirmed this evening on new 9770 (ex 9655) for the  
1700-1800 UT English broadcast. Very good reception here at 1700 UT  
sign-on.

Thanks to tip from Alan Roe who first logged this yesterday.

(Dave Kenny-UK, BrDXC-UK / dxld May 7)

9655 kHz channel is totally free here in Germany at 1700 til 1727 UT, May  
7th. At 1728 UT IRIB Tehran smooth interval signal, S=6-7, somewhat back  
side lobe signal. ID at 1730 UT. "Huna Iran", Iranian hymn chorus at  
1731 til 1732 UT.

9770 some S=2 signal - probably - from China til 1658 UT.

9770 Cello symphonic pause music from VT-group control room at 16.59:20 UT, followed by PRW ID at 1700 UT even. Poor signal here in Germany. Something of tiny "ground wave" signal noted here tonight. Distance from Moosbrunn to my location is approx. 510 kilometers, not enough, and the PRW signal skips over my head. I understand only spoken English language, but couldn't follow program content. Slight QRM de - probably - China co-channel.

Resumen: to follow English sce from Warsaw I've to use another time slot or use satellite or website livestream.

ENGLISH 1200-1259 11675mos towards British Isles.

11980wof to Scandinavia, St.P.

1700-1759 7265kvi-drm 220degr towards

Leicester, Birmingham, Plymouth, Start Point.

9770mos(x9655mos, x9655wof), non-directional.

(wb, wwdxc BC-DX TopNews May 7)

AZERBAIJAN 9677.3 Voice of Justice. In Azeri, s/on 1301 UT with IS, next news and talks about "Hojala" (pse see in Wikipedia the story of this village!) and some instrumental music, address in Nagorno Karabakh Republic. IS at 1331 UT and close/down on April 23. Demodulated sounds like Cairo, Pakistan transmissions etc.

(Rumen Pankov-BUL, Sony ICF 2001, Marconi, May ARDXC ADXN direct and via dxld)

BELARUS 7265 tentatively Belarus Radio, Brest shortwave relay seems back on air again. Was missed, a lot of weeks out of service. Noted in 1800-1830 UT slot on May 3rd, S=5-6, announcement in Belarussian / Russian followed by symphonic music concert.

(wb, dxld May 3)

7265 Still I've my doubts about Radio Belarus 2nd program Belaruskaje Kanal Kultura via this SW channel from Hrodna/Grodno. During morning and noon hours the channel is empty, scheduled 1600-2200 UT. In late afternoon fade in by co-channel Beijing, til 1605 UT cl-down. Also Kashi, Urumchi, as well as Polskie Radio Warsaw via KVI in DRM mode use this channel.

So small time windows open on this channel at 1605-1657, 1800-1830 [tiny signal on May 8th], and 1900-1927 UT only.

(wb, May 9)

CENTRAL AFRICAN REP According to my sources, Radio ICDI night-time frequency will be 3390 kHz.

Web-blog of Dan Anderson at <<http://danhcjb.org/>>

tells us that another transmitter will be installed by HCJB engineers as a gift for Radio Centrafrique at Bangui-Bimbo site. Frequency not yet announced but probably 5035 kHz. The website also has photos of antenna installation at both sites. Please note that these two transmitters are low power, rated only as 1 kW.

(Jari Savolainen-FIN, DXplorer May 8)

CHAD 6165 R Dif. Nat. Tchadienne, N'Djamena, 2137-2158, Apr 09, French talks, ID, songs, African music, 32432/35443.

(Alexander Beryozkin St.P.-RUS in dswci DX Window May 5)

... in the gap when Croatia co-channel off at nighttime.

and fade in on 7120 kHz at 1515 UT, noted also at 1720 UT, by (Nils Schiffhauer DK8OK, wwDX BC-DX TopNews May 9/10)

CHILE Congratulations withdrawn! The spurs are back, as bad as ever, from the CVC CHILE transmitter relaying HCJB on 11920. May 8 at 2325 same but distorted audio is to be heard very close to 11900 and 11940, just as a Portuguese ID comes from HCJB on all. The fundamental is also noisy, but this is bleedover from the DentreCuban Jamming Command on 11930 vs R. Marti.

A few days ago and at some chex since, the spurs have been gone, but obviously not permanently. Tonight rechecked just before sign-off at 0043 May 9, the center of the spurs has shifted to approx. plus and minus 21.9 kHz, i.e. 11898.1 and 11941.9. 0044 sign-off claims to be on 11920 only! If they are not going to get rid of them once and for all, the least they could do would be to include the spurs in IDs, ha! All three off shortly after 0045\* UT.

(Glenn Hauser-OK-USA, dxld May 8)

CHINA I can't receive Yunnan PBS minority lang. sce on 6937 kHz today. I was able to receive it until yesterday. Probably, I think that QSY to 7210 kHz, but not confirm by heavy QRM of VOV-1 on same freq.

(Sei-ichi Hasegawa-JPN NDXC, dxld May 4)

Firedrake scan 0318 to 0338, April 30. Only found two; 12600 // 12970, both fair. Unusual to find so few!  
(Ron Howard-CA-USA, dxld May 6)

Firedrake April 30: 15730, fair at 1315, aside Sweden 15735, but what's to jam on 15730? Today's edition of Aoki does not show anything, except Sound of Hope on 15750 varies 15700-15795 kHz, so probably jumped here today, altho supposedly in a break at 1300-1400 UT between Tajikistan and Uzbekistan sites.

13100, fair at 1310  
12600, good at 1310  
10440, good at 1318 with het from something, ute?  
10300, poor at 1318, much weaker than 10440, why?  
Not found anywhere else 8-19 MHz, not even 8400 at 1323. Former regular spot 9000 has not been heard for several weeks.

Firedrake May 1:  
10240, good at 1320, unusual frequency  
10440, equally good at 1320  
12600, fair at 1326  
12960, good at 1326, not on 12970 or 12950 today.  
13970, good at 1326  
None others found 8-19 MHz.

However, checking 15540 kHz at 1332 UT I hear weak CNR1 jamming // much stronger 15285 and 15265 kHz; nothing else audible on 15540 kHz, so I wonder if V. of Tibet's expanded broadcast is really contracted now out of this timeslot. But unlike their teeny weeny DentreCuban comrades, the ChiCom are pretty astute at avoiding jamming against nothing, even if we can't hear the victim.

And at 1434 UT I find a poor and fluttery CNR1 on 17560 // 15285 kHz. This is to jam V. of Tibet due northeast from MADAGASCAR at 1400-1430, unheard. As of today this VOT broadcast is at 1400-1430 UT only, ex 1330-1430 UT.  
(Glenn Hauser-OK-USA, dxld May 6)

Seldom heard Firedrake music jamming against US propaganda stations, but today May 3rd came back on this music sound instead of echo word jamming.

Noted against RFA Mandarin service on 9540 17-19 Tinian S=9+30dB, 9905 kHz 15-18 KHBN Palau, 7355 against TWN, 11700 18-20 Tinian, 13625 17-22 Tinian.

17560 Mandarin echo talk jamming against VoTibet Madagascar, latter which was not heard here in Europe, 1330-1430 UT May 3rd.  
(wb, wwdxc BC-DX TopNews May 3)

11575 Firedrake mx at very good level, heard between 1650 and 1750 UT.  
May 1.  
(Harold Sellers-BC-CAN, dxld May 6)

Nothing likely to be jammed on 11575, except this in Aoki:  
11565\*SOH Xi Wang Zhi Sheng 1600-1630 UT Chinese 100 131 Tashkent UZB SOH 11500-11590 [varies].  
(Glenn Hauser-OK-USA, dxld May 6)

COSTA RICA 5954.15, ELCOR transmitter testing?, at 2310-0005+ UT on May 8-9, tentative with non-stop English and Spanish pop ballads by Shakira and others. Brief Spanish announcement at 2341 UT. Good level but poor to fair overall signal quality due to adjacent channel splatter. Very difficult after 0000 UT due to adjacent channel splatter.  
(Brian Alexander-PA-USA, DXplorer May 9)

5954.2 the continuous music tests are back on this odd frequency, May 8 at 2332 hitting WYFR 5950 at less than 5 kHz, and splashed from it. Side-tuning up a bit helps. Romantic music in Spanish, 2341 an announcement in Spanish, only caught one word, 'titulado'. Signal is improving, as WYFR gets a bit weaker. 2347 pause of almost half a minute between tracks, and no further announcements heard. The song ending at 2351 had applause and cheers. Kept going past 0000 May 9, but from just before then, adjacent channel interference gets much worse with CRI starting on 5960 in Chinese via Sackville. 0026 check, still going with the music. 5960 is splashing more than 5950 even tho it is 2 kHz further away from 5954. Another check at 0057 still, and heavy ACI. And 0102; and last check at 0112 still there.

I also heard this May 2 at 0046, but only as a carrier. Based on previous activity 26 months ago, it's ELCOR, the transmitter manufacturer, which used the same frequency and the same type of programming, presumably to test their products. This was discussed extensively with logs by many others in:

<<http://www.w4uvh.net/dxld8034.txt>> &  
<<http://www.w4uvh.net/dxld8035.txt>>

In March 2008, Raul Saavedra in Costa Rica remarked, "Shakira, as well as Mexican group Mana, are everyday recipes in those test transmissions."

Brian Alexander in PA was monitoring at exactly the same time May 8-9, 2010, also noted the announcement at 2341, music by Shakira and others, and pinpointed it at 5954.15.

And Earl Higgins in MO had this as an unID 24 hours earlier: 0044-0056 UT May 8, with "one Shakira song after another". I'll take their word for it as I wouldn't know Shakira.

This of course is now the only active SW station in CR, unless some of the R. Republica broadcasts are coming from there.  
(Glenn Hauser-OK-USA, dxld May 8)

CROATIA Again retimed. Voice of Croatia (Glas Hrvatske) on 1134 kHz via Zadar, 600 kW now airs on a new time segment: 1600-2245 UT.  
(Dragan Lekic-SRB, dxld May 8)

<[http://maps.google.de/maps?f=q&source=s\\_q&hl=de&geocode=&q=Zadar&sll=51.151786,10.415039&sspn=19.842079,57.084961&ie=UTF8&hq=&hnear=Zadar,+Kroatien&ll=44.230779,15.238638&spn=0.011039,0.027874&t=h&z=16](http://maps.google.de/maps?f=q&source=s_q&hl=de&geocode=&q=Zadar&sll=51.151786,10.415039&sspn=19.842079,57.084961&ie=UTF8&hq=&hnear=Zadar,+Kroatien&ll=44.230779,15.238638&spn=0.011039,0.027874&t=h&z=16)>

CUBA 15120 RHC Quivican in Spanish on 15120 and weaker 15380 kHz in 19 mb. Poor S=4-5 signals at 1115 UT, May 8th. Report and speech on Cuban-USSR/Russia relations of the Russian ambassador.

ERITREA/ETHIOPIA[non] According to Ginbot 7 homepage  
<<http://www.ginbot7.org/>> operates in ham band: Dimts Radio, 0600-0630 and  
1700-1730 UT, 6100, 7140, 7175 and 7185 kHz (Tue, Thur and Sat).  
(Sei-ichi Hasegawa-JPN, dxld May 5)

Especially 7175 and 7185 have been reported lately in the radio war with  
jamming. These bands indicate closer site (ERITREA?) than as in WRTH 2010  
Ginbot 7, Samara, Russia on higher frequencies. (gh, dxld)

I guess they use the Eritrean transmitters which are noted to hop around  
these frequencies. 6100 is news to me, 6200 has been recently used by  
Eritrea.

(Jari Savolainen-FIN, dxld May 6)

<<http://www.ginbot7.org/>> has a +44 GB number, +44 203 286 9661

against ETHIOPIA's present government  
<<http://www.addisdimts.com/aboutus.html>>

"Addis Dimts Radio provides diverse cultural and political perspectives for all Ethiopians globally and we believe in a mixture of private and public partnerships, We oppose the current EPRDF regime political philosophy and economic policies,"

so supposedly via ERI Asmara Selai Dairo [Saladaro] 2 MW,  
3 log-per SW arrays, 15 13 00.00 N 38 52 32.00 E

<[http://maps.google.de/maps?f=q&source=s\\_q&hl=de&geocode=&q=15%C2%B013%2700.00%22N++38%C2%B052%2732.00%22E&sll=51.151786,10.415039&sspn=19.842079,57.084961&ie=UTF8&ll=15.216614,38.875637&spn=0.007433,0.013937&t=h&z=17](http://maps.google.de/maps?f=q&source=s_q&hl=de&geocode=&q=15%C2%B013%2700.00%22N++38%C2%B052%2732.00%22E&sll=51.151786,10.415039&sspn=19.842079,57.084961&ie=UTF8&ll=15.216614,38.875637&spn=0.007433,0.013937&t=h&z=17)>

entry ETH under Aoki ginbot7 list entries seem to be wrong.  
(wb, dxld May 6)

Hello, tonight noted two different programs on 7165 and 7110 kHz.  
- at 1959 UT hymn and close-down, but noted another different program after 2000 UT on 7110 kHz. - and Guinea Conakry 7125 kHz at 2030 UT too.  
(wb, wwdxc BC-DX TopNews May 7)

ETHIOPIA/USA[non] VOA services in Oromo, Amharic, and Tigrigna at 1730-1930 UT were subject of hiss jamming today May 3rd. Noted Oromo at 1730-1800 and hiss on all three 11925, 12140, and 13870[not 13780 as typo on VOA website). Amharic at 1800 UT and annoying hiss noise on 9620, 11925, 11975, 12140, 13835, 13870, and 15730 kHz.  
(wb, wwdxc BC-DX TopNews May 3)

17565 now also jammed. Ethiopia/USA: I tuned in again today, 01 May, at 1800 UT to 17565 kHz. The carrier came on at 1759 UT, shortly jumping into a program in what seemed to be an African language with music. After a short break, it was in fact the VOA Amharic Service that started with an ID and information about the Arabsat relay. I started a recording at 1814 UT when an interview was going on.

At 1818 UT, the jamming signal appeared with a strong signal, modulated with noise. I had checked the//frequencies before, of which at least 12140 kHz and 13870 kHz showed similar jamming phenomena. On 17565 kHz, the jamming is only partly effective, as most of the modulation gets through in spite of it, while one may doubt about its effectiveness in the target area. That's it for today, have a good Sunday.  
(Robert Foerster-D, dxld May 6) see also under Botswana ...

ETHIOPIA/RUSSIA Ethiopian hiss on 15195 kHz, 1600-1700 UT today May 3rd. Last year in A-09 TDP had this service to Ethiopia, on 15195 kHz via Samara Russia - only Mondays - 1600-1700 UT

EOTC Holy Synod Radio <<http://www.eotcholysynod.org/>>

But only hiss sound noted here in southern Germany today. Signal from Samara is usually weak here. Our DXers in Greece and Cyprus, Zacharias and Costas will have more powerful signals on their sets ...  
(wb, wwdxc BC-DX TopNews May 3)

FRANCE [target broadcast] 15410 R Y'Abaganda, via Issoudun, Ugandan

clandestine, at 1709 UT on May 01, repeating no service telephone ann, tones and "We are sorry, you have reached...", pause and then programming kicked in with two men in Swahili. This broadcast is on the air Sa only, 1700-1800 UT. Poor.

(Harold Sellers-BC-CAN, dswci DXW May 5)

As Brian Alexander, PA, said on April 10, 2010, I heard the same today [Saturdays only] via France, 15410, Radio Y'Abaganda, \*1700-1715\*, May 01, Non-stop audio loop consisting of music tone and announcement loop saying "We're sorry you've reached a station that is unavailable at this time. Please try to tune in later" with "Live 365.Com" jingle.

Into vernacular talk at 1724 UT, several interview like presentations. Sudden sign off at 1759 UT while audio was running. Weak to fair reception, noisy conditions after 1730 UT.  
(Partha Sarathi Goswami-IND, dxld May 6)

Via France, 15410, Radio Y'Abaganda, \*1700-1725+, May 1, sign on with non-stop tape loop consisting of tones and saying "We're sorry you've reached a station that is unavailable at this time. Please try again later". Into vernacular talk at approximately 1715. Poor to fair in noisy conditions. Saturdays only.  
(Brian Alexander-PA-USA, dxld May 6)

GERMANY 6085 co-channel. Rumours these days, Bayerischer Rundfunk Munich Ismaning will cease SW transmission 6085 kHz in DRM for ever, due of budget cuts.

Ich habe eben im DAB-Forum eine Info gelesen, der BR stellt DRM ein. Siehe untenstehender Link unter der Rubrik "alles rund um DRM"

<<http://www.pro-dab.de/forum.htm>>

<<http://www.pro-digitalradio.de/phpBB2/viewforum.php?f=31>>

<<http://www.pro-digitalradio.de/phpBB2/viewtopic.php?t=2636&sid=cd262ec2464b2713bc478633b3713d22>>

(wb, wwdxc BC-DX TopNews May 7)

Perhaps the gossip in detail is of interest: Someone posted under pseudonym that he wrote Bayerischer Rundfunk engineering about a pretty low audio level of the DRM signal, and he says that the reply also mentioned that it is planned to cancel the DRM transmissions as a cost saving measure (this not necessarily means that the money will be cut, rather it will be spend for other purposes instead).

<<http://www.pro-digitalradio.de/phpBB2/viewtopic.php?t=2636>>

(Kai Ludwig-D, dxld May 8)

Additional transmission of BVBN in Arabic to WeAs:  
1730-1800 NF 11860 WER 125 kW 120 deg,ex11645 to avoid VOA Kurdish.  
(R BULGARIA DX MIX News, Ivo Ivanov, via wwdxc BC-DX TopNews May 1)

9515 Encoded DRM Service on May 5th. Probably via M&B Nauen tx site.

End of transmission war dann um 1330 UTC. Zum Abschluss waren sie dann

noch mal 30 Minuten als Journaline Service aktiv, unter der Kennung "Nachrichten".

Jetzt wird's speziell: Seit etwa 14:10 UTC auf 9515 kHz:  
<<http://www.dxaktuell.de/drm-ca.PNG>>

Ein (deutschsprachiger?) DRM-Dienst mit conditional access, das sehe ich hier zum ersten Mal. Wer hoert ihn (nicht) noch? Hier nur max. 6 dB. Ich tippe auf einen Test aus Nauen.

Die Damen und Herren tun jetzt das, was sie im August schon mal taten: Die ID wechselte nun auf "FC2012", das Label ist "N-TV" und der Inhalt erst ein unbekannter "Data Service" und nun eine uebliche "MOT Website", die sich aber nicht dekodieren laesst. Verschluesst ist das jetzt nicht mehr.

1) "Radio" - 20.96 kbps AAC+ Mono (CA). ID: FC2010  
(ich dachte erst an die Fussball WM!)

2) "N-TV" - 17.20 kbps MOT WebSite. ID: FC2012

3) "Nachrichten" - 14.20 kbps Journaline. ID: FC2011

Ich weiss nicht warum, aber die von Media Broadcast sind mir sympathisch. Einfach mal alle Knoeppe druecken und schauen was rauskommt.  
(Douglas Kaehler-D, A-DX May 5)

Mit der Kennung N-TV wuerde ich auch so tippen. Ein (deutschsprachiger?) DRM-Dienst mit conditional access, das sehe ich hier zum ersten Mal. Wobei es dann interessant wird, ob solch ein Dienst ueberhaupt noch in den internationalen Rundfunkbaendern senden sollte/darf?!  
(Stephan Schaa-D, A-DX May 5)

Bild dazu (aus 10/2009): <[http://www.omnirep.ch/drm/jpeg/n-tv\\_title.jpg](http://www.omnirep.ch/drm/jpeg/n-tv_title.jpg)>

Quelle: OMNIREP GmbH, Biberstein (CH).

"A transmission from Nauen, Germany on 12th October 2009 on 9655 kHz, 1648 UTC. 17.28 kbps EEP, 16-QAM / SM 64-QAM, Data: MOT Web Site. Protection Level: ? / ?, Mode B / 10 kHz. Audio: 0 / Data: 1. Interleaver: 2 s (long). Strong signal, but my PC froze, so no complete data before close down. Distance to the transmitter: 675 km."  
(via Thomas Kamp-D DF5JL, A-DX May 5)

BVB DTK query. I checked this today [Mons only] 0700 to 0800 UT on 7410 kHz there was NO TRACE of BVB - it was an empty channel at this time. Maybe it is only planned so far?  
(Dave Kenny-UK, wwdxc BC-DX TopNews April 26)

Media & Broadcast Management and Backoffice sent me an answer today. BVB English was planned for Mondays at 0700-0800 UT. But only twice on April 12th and 19th, ... and is now ceased totally.

I never came across BVB WER 7410 before. registration is  
2 = "M o n d a y s" only

125 kW non-dir 926 (Quadrant antenna)  
(wb, wwdxc BC-DX TopNews May 3)

Vielen Dank fuer Ihre Mail. Ihre Angaben sind korrekt. Die Sendung war fuer Montags von 0700-0800 UTC eingeplant. Allerdings wurde diese Sendung von Bible Voice nur am 12. & 19.04.2010 ausgestrahlt. Bible Voice hat danach den Betrieb der Sendung wieder eingestellt.  
(Michael Puetz-D, M&B May 3)

576 / ex6030 Am Dienstag habe ich den SWR Sender Muehlacker besichtigt.

Geliefert und z.Zt. im Aufbau durch die SWR Mitarbeiter befindlich: ein neuer digitaler [Telefunken] TRANSRADIO Berlin Sender, TRAM 100kW SWR SNT203 576 kHz. Bisher nur AM Modulator, nix DRM vorgesehen.

Es fehlt z.Zt. noch der lokale Lueftungs und Kuehlungsaufbau. Die Arbeiten werden bis zum Sommer 2010 abgeschlossen sein. Danach wird die Transradio Unit in Betrieb gehen, den Nautelsender im Regelbetrieb abwechseln[?Aussagen waren nicht eindeutig zu bekommen] und nach einem laengeren Echtbetrieb kann dann hinkuenftig der Reservesender Telefunken S 4004 maximal 300 kW, Roehrensender, aus 1982?, verschrottet werden - Problematik Ersatzteilversorgung -. Die Sender laufen beide mit 7 kHz statt 4.5 kHz ITU-Bandbreite (Sondergenehmigung), weil es keine direkten Nachbarkanalstationen mehr gibt, vor allem im Nahbereich zur Tag- und Daemmerungszeit.

Eine traurige Nachricht. Von 1997 bis Okt 2004 war ein kroatischer RIZ Zagreb Sender in Betrieb. Sehr modern mit integriertem PC und schoenem Bedienungsdisplay. Der lief auch sehr klaglos und verlaesslich, wurde vom Computer automatisch von 5 bis 23 UT per DCF77 Signal ein- und ausgeschaltet.

Jede SWR Abteilung musste in 2004 ein Sparpotential erfuellen. Bei Muehlacker traf es den 6030 kHz 49mb KW Sender nach erst relativ wenigen Betriebsjahren.

Jetzt berichtete der Senderingenieur, dass sich der SWR nicht recht einig war mit dem Verkauf oder der Ueberlassung des Kurzwellensenders an ein Drittes Welt Land - wie am Beispiel des 7265 kHz Rohrdorf Senders, der nach Madagascar quasi als Spende ging.

Die Entscheidung zog sich 3 Jahre hin. Als man den Sender nach 3 Jahren mal in Betrieb nahm, loesten sich Bauteile in Rauch auf, diese waren laengst defekt ohne im normalen Betriebszustand zu sein. Nach den Worten des Referenten waren beim KW-Sender von "RIZ" die Inhalte der EPROMS unbrauchbar (eine Schwaeche der ersten Halbleiterchips), dann waren auch noch die Backup-Batterien alle (mit der ganze Sauerei), eine Hilfe des Herstellers hat nichts genuetzt.

ps. EMV - Strahlungsproblematik. Der Sohn des ersten Hausmeisters wurde auf dem Gelaende des Reichspost Senders Muehlacker 1932 geboren. Und war spaeter nach seinem Studium dauernd auf dem Sendergelaende wohnend als Ingenieur beschaeftigt. Er lebt dort noch mit 78 Lebensjahren ... dies erinnert mich an aehnliche Aussagen des Rentner-Personals in Ismaning, Lampertheim und Biblis, die auch ein biblisches Alter erreichten.  
(wb, wwdxc BC-DX TopNews April 27)

GERMANY 13710 Came across of Saturday only transmission of "Evangelische Missions" at 1100-1130 UT in Russian language to all Russia and CIS states. M&B Nauen site, 250 kW at 20 degrees, S=9+20dB signal. Bible reading. Nice back lobe signal.  
(wb, wwdxc BC-DX TopNews May 8)

GUAM 12105 One of the KSDA Guam transmitters is bad in audio since few weeks now. BUZZY audio noted again from KSDA Guam in Chinese sce at 1105 UT May 8th, S=3 weak. But at same time KSDA Indonesian and Sudanese progr is correct in audio on 15540 kHz in 11-12 UT slot.

ISRAEL T.R. RAJEESH forwards this article on Galei Zahal Radio written by Isack Tunik, Galei Zahal commander which accompanied the 2008 issue of a stamp commemorating the station. Galei Zahal's shortwave frequencies are 6973 and 15785. Station address is Military Post Office Box 01005, Israel. email <glz @ galatz.co.il>

On Sunday, 24 September, 1950 a trumpet blast erupted from the radio at precisely 6:30 p.m., followed by "HaTikva", Israel's national anthem. Thus began the very first broadcast of Galei Zahal, the IDF Broadcasting Service.

The improvised studio was located inside a former school building in Ramat Gan. Army blankets were hung along the walls in an attempt to muffle background noise.

Galei Zahal was born in the State of Israel, which, at that time, was dealing with the absorption of waves of immigrants and contending with distress and poverty. For many years Galei Zahal broadcasts were mainly geared toward soldiers, including music programs bearing soldiers' greetings and various broadcasts related to the IDF. The station was unique in that it incorporated soldiers serving in the regular army into journalistic positions, including reporters, editors, producers, news broadcasters, music broadcasters, musical editors, announcers, etc.

Following the Yom Kippur War in 1973, the station began broadcasting 24 hours a day, expanding its broadcasts to include all citizens by adding news broadcasts and current affairs programming. For years, it was the only Israeli station that continued to broadcast throughout the night, to be joined later by "Kol Israel" Broadcasting.

Suggestions have been raised on more than one occasion stating that the station should be closed and its broadcasts ceased, but due to protests by the public, the Knesset and the Israel Broadcasting Authority Governing Council, none of these proposals has even come to fruition.

In November 1993 Galei Zahal began operating another station, establishing

Galgalaz, which broadcasts music interspersed with traffic reports and has extremely high listener rates.

Galei Zahal's various programs are currently presented by leading broadcasters, who are among the most highly esteemed journalists in Israel, alongside young, talented and energetic reporters, producers and editors. This combination makes Galei Zahal a relevant, young and characteristically Israeli media outlet.

Thanks to a widespread array of transmitters located throughout the entire country, as well as through the internet, the station's broadcasts reach IDF bases and private homes throughout Israel and abroad, making it a central component of Israeli media in general and of public broadcasting in particular.

(wb, wwdxc BC-DX TopNews May 8)

MYANMAR 6035 Myanma Radio, at 1208-1337 UT on May 1. In vernacular with music program till the start of the Minorities and Distance Learning Services lectures at 1330 UT; // 5915 kHz. Was able to occasionally hear Vietnamese (PBS Yunnan) underneath, so the real loser here is Bhutan! Yesterday Myanmar was not here during this time period.

So they seriously want to use this frequency! Heard FOUR transmitters on the air at the same time (5915, 5985.76v, 6035 and 7185.75v kHz). Back in mid-March the Naypyidaw transmitter was pulled from service on 5985.0 kHz and replaced with the off frequency Yangon transmitter. Perhaps the 6035 kHz transmitter is the one at Naypyidaw, formerly on 5985.0 kHz?  
(Ron Howard-CA-USA, dxld May 1)

5985.00 / 5985.83v May 5, Myanma Radio. The folks at Yangon and Naypyidaw are certainly experimenting with their transmitters! Tuned in at 1339 to find Yangon on about 5985.83v (past two days had been via Naypyidaw on 5985.00); then checked 5915 kHz to find them with a distinctive ECHO; yes, they were broadcasting the same Minorities and Distance Learning Services lecture via TWO transmitters; echo ended about 1350 UT; checked 5985.83v again and found them still there, but suddenly heard a strong het; tuned down to 5985.00 to find that Naypyidaw had started broadcasting; after 1400 the Yangon off frequency transmitter went off the air. When 5985.00 and 5985.83v kHz were both on they were NOT parallel. Strange developments!  
(Ron Howard-CA-USA, dxld May 5)

NETH ANTILLES Frequency change of RNW in Dutch effective April 30: 0000-0027 NF 6140 BON 250 kW 180 deg CeAM,x5970 to avoid RHCSpanish

(R BULGARIA DX MIX News, Ivo Ivanov, via wwdxc BC-DX TopNews May 10)

SAUDI ARABIA New frequencies were observed first by Glenn Hauser. Here is the new schedule of BSKSA in A10 as were monitored in period March 28 - April 24 (maybe there are more freqs which I didn't hear):

Main Program in Arabic  
0550-0855 17730, 17740  
0855-1155 15490, 17805  
1155-1455 17705, 21505  
1800-2255 9555, 9870, MW 1521

Call of Islam in Arabic  
1500-1755 15225, 15435

Qoran Kerim [Holy] in Arabic  
0300-0955 9715  
0300-0555 15170  
0300-0755 & 1155-1455 17895  
0555-0855 & 1155-1355 15380  
0855-1155 11935, 17570  
0855-1150 & 1255-1555 17615  
0955-1355 11785 with "bzzz" sound  
1155-1355 17625  
1455-1755 13710  
1555-1755 15205, 17560  
1755-2255 11820, 11915, 11930

Relay Radio Riyadh and Radio Jeddah on SW  
0745-0800 English & 0800-0955 French 17785  
1000-1230 English 15250  
(?1230?)-1400 Bengali 15120  
1400-1600 French 17660

Foreign Services  
0400-0655 Swahili 15285  
0900-1155 Indonesian 21670  
1200-1355 Urdu 13775  
1200-1230 & 1400-1455 Bengali 15120 (see above relay also)  
1500-1755 Farsi 7240  
(1500-1755 9885 under DRM seems is service to Xizang, China) [Tibet]  
1600-1755 Bambara 17560  
1800-2055 Turkish 9675  
(Rumen Pankov-BUL, May ARDXC ADXN direct and via dxld)

Thanks to Rumens Pankov for excellent BSKSA Riyadh monitored frequency schedule in dxld, from May Australian DX News.

#### Foreign Services

0900-1155 Indonesian NOT heard on alternative 17585 yet.

1500-1755 9885 in Tajik/Turkmen/Uyghur/Uzbek to TKM, TJK, UZB and Xijang CHN is heard in the clear here in Germany. DRM signal on adjacent 9880 kHz channel from Kaliningrad Bolshakovo is not a problem here.

Planned language section programs not heard here on air yet:

0300-0455 Somali 15320, alternative 17760.

0300-0555 Chinese 21665.

0800-0955 Chinese 15610.

1400-1555 Pashto 15575, alternative 9695.

(wb, dxld May 3)

11784.91v carrier heard before 1100 UT May 8th. Maybe Djeddah Saudi Arabia transmission in Holy Quran Arabic. Aoki list shows Riyadh 500 kW powerhouse instead 0955-1355 UT, but I've my doubts because of the weak signal and odd frequency.

VOA Udon Thani in Mandarin co-channel even starts at 10.59:45 UT, both very weak signals on May 8th. Lousy propagation condition today.

(wb, wwdxc BC-DX TopNews May 8)

SOUTH AFRICA 3320 SAUK / R. Sonder Grense, Meyerton, 2114-2134, 02 May'10, Afrikaans, opera pieces; 45242, so a good signal spoiled by noise.

(Carlos Goncalves-POR, wwdxc BC-DX TopNews May 4)

SRI LANKA 15650 R Liberty in Russian via tentatively - Iranawila -, noted around 1430 UT, and as fretful interference Unid station co-channel.

(wb, wwdxc BC-DX TopNews May 3)

SLBC, All Asia English is on 15120 (x15745) kHz as the synthesizer used on 15745 has a problem and they are using the available crystal and is asking for reception reports to Director Engineering, SLBC, P.O. Box 574, Colombo. Schedule 0055-0400 UT English.

(Victor Goonetilleke-CLN 4S7VK, in Dxplorer via dswci DX Window)

SLBC English to be back on 15745 from 7th May onwards. SLBC (Sri Lanka Broadcasting Corp.,) announced during its English txn today they will be back on 15745 KHz from 7th May onwards at 0055-0330 UTC. SLBC is temporarily using 15120 kHz due to txer problem for its english txn at 0055-0330 UTC. 15120 kHz suffers from co-channel QRM from CRI English 0300 UTC onwards.

Schedule: SLBC All Asia Service 0055-0330 UTC (Sunday upto 0430 UTC) on 6005 (10 kW), 9770 (10 kW) & 15745 (35 kW) kHz.

(Alokesh Gupta-IND, wwdxc BC-DX TopNews May 5)

SUDAN 7200 SRTC, Al-Aitahab, 1351-1415, 03 May'10, Arabic, radioplay, news at 1402, announcements, Arabic pops; 25443, but improving fast.

(Carlos Goncalves-POR, wwdxc BC-DX TopNews May 4)

TAIWAN 11695-11705, extremely distorted modulation spixe with no carrier, May 4 at 1154 UT, conversation sounds like English but hard to

copy. Quick scans of 25 and even 31m find no match. At 1158 UT sign-off announcement I hear a dot tw, and then RTI's complete English schedule recited, altho cannot make out two separate frequencies and targets for the 11-12 broadcast. At 1200 UT, 3+1 timesignal, the last one prolonged at higher pitch, and into Chinese.

Uplooked later, what does HFCC say? NOTHING. Taiwan is a nonentity there tnx to pressure from the ChiCom, world's largest jammer which should be banned from HFCC instead. Aoki and EiBi reveal that RTI is supposed to be on 11715 UT, so that transmitter is malfunctioning. Aoki says site Tainan, 250 kW, 180 degrees. The // is 7445 kHz, which would probably have been obscured by RNZI 7440 DRM before 1158. Language at 12-13 UT is specifically Amoy (Hokkein), says Aoki.

At 1205 UT I notice that this scratchy noise is also bothering RNV relay via Cuba on 11705 kHz, where its own modulation seems OK today. Have I unjustly criticised that previously, really caused by Taiwan? Maybe.  
(Glenn Hauser-OK-USA, dxld May 4)

TAIWAN Clandestine QSL: SOUND OF HOPE RADIO NETWORK, 8400 kHz, Cartolina QSL in 35 giorni. RP: 1\$. QTH: P.O.Box 70456 - Sunnyvale CA 94086, USA.  
Inviato CD MP3.  
(Luca Botto Fiora-ITA, bclnews.it yg via dxld May 6)

TAJIKISTAN/CHINA 15550 Firedrake music was heard poorly in background on May 7th at 1115 UT, but VoT with talk between two mens was on TOP. Channel scheduled for Voice of Tibet broadcasts via Dushanbe-TJK at 1100-1230 UT.  
(wb, wwdxc BC-DX TopNews May 7)

THAILAND QSL IBB Thailand.  
Die IBB Sendestation Udon Thani bestaetigte meinen Empfangbericht ueber eine Aussendung von Radio Mashaal auf 15360 kHz innerhalb von 9 Tagen mit einer det. QSL-Karte. Der Bericht ging per e-mail an:  
<manager\_thailand @ tha.ibb.gov>

Die Postanschrift lautet: IBB Thailand Transmitting Station, P.O.Box 99, A. Muang, Udon Thani 41000, Thailand.  
(Patrick Robic-AUT, dxld May 7)

TURKEY Frequency change for Voice of Turkey in Uyghur:  
0200-0255 NF 9465 EMR 500 kW 072 deg to CeAS, x7200  
(R BULGARIA DX MIX News, Ivo Ivanov, via wwdxc BC-DX TopNews May 1)

TURKMENISTAN [tentat.] 5130.00 UNID at 1730 UT with a song and a choir, sounding Asian; very weak, maybe a spurious signal?  
(Karel Honzik-CZE, dxld May 3/4)

I can hear a station on 5129.97 kHz; sounds like TKM and nothing heard on 4930 kHz?  
(Mauno Ritola-FIN, dxld May 4)

UGANDA 4976 R. Uganda, Kampala, 2143-2158, 02 May'10, Vernacular, talks; 55343. What have they done to the audio?! The modulation was punchy, clear; let's see how long it lasts this way.  
(Carlos Goncalves-POR, wwdxc BC-DX TopNews May 4)

UNID 4900 WAfr stn, 2224-2300, 01 May'10, long newscast in French heard until 2234, some announcements, Afr. pops, talks in Vernacular; 35422. Vy. faint signal audible today, 02 May'10, at 1815 UT.

(Carlos Goncalves-POR, wwdxc BC-DX TopNews May 2)

UNID 4899.96[.97] UNID station with African-like mx, mostly nonstop, then YL-talk 2326-cca 2340, music, no change on TOH, then at 0002 UT: something like a jingle with "... One ..." ?; no signal at 0027 UT at frequency check.

(Karel Honzik-CZE, wwdxc BC-DX TopNews May 3/4)

I did try that UNID on 4900 again, but was not luck, no decent signal then or even later when I was expecting at least the same level as on the previous day.

What I also found on 4900 was a QSO among Spanish fishing vessels, and wouldn't be surprised, if one of them were close to the African coast and decided to play a bit by relaying some local stn. This is simply not impossible; I have heard they doing this before, only with Moroccan and Spanish stns.

As to the origin, well, the signal was a lot stronger via the 225o Bev. which covers GUI, MTN, GMB; I tried the 145degr Beverage, but then the signal was a lot weaker. In sea location ? (=seamen playing?) or a coastal country?

Finally, I am sorry for being unable to extract any ID from your clip... and for having forgotten to record my own log even though no ID was actually heard. They did mention "chaine" ("nationale", I believe), so maybe this stands as tiny clue.

(Carlos Goncalves-POR, wwdxc BC-DX TopNews May 4)

I add Carlos here, because he was the first to report 4900 kHz. I also left the recording on last night, as it didn't sign off at 2300 as I expected. (At that time I thought it might be R. Centrafricaine). It continued until 0005, and that would suggest a West African country, as Carlos said in his report.

Togo used to s/off at 0005 UT, but wasn't that with news and NA? This was more like plug off when music was going. Carlos could confirm that it wasn't // with Guinea Conakry 7125 kHz, so still a puzzle. The signal just a bit too weak to understand anything, except the language was French at least at certain times. I'll try to catch the fade-in time, maybe that gives more clue. It drifted from 4899.98 to .94 kHz in the course of the evening, so probably not a brand new tx? I left recording on last night and you can hear that it had drifted a bit in the latter part. Attached are two clips at the times Karel suggested, at 2337 and 0002, this is the closest I got to ID. Can any of you catch anything conclusive or familiar?

(Mauno Ritola-FIN, wwdxc BC-DX TopNews May 4)

UAE Some VT Communications changes:

FEBA Radio in Somali

1700-1730 NF 5935 DHA 250 kW 215 deg to EaAF, ex6180#

# to avoid VORO/IRIB in Tajik

(R BULGARIA DX MIX News, Ivo Ivanov, via wwdxc BC-DX TopNews May 10)

UK IBRA Radio in Arabic

1800-1945 NF 12070 WOF 300 kW 137 deg to CeAF, ex11650\*

\* to avoid China Radio International in German

(R BULGARIA DX MIX News, Ivo Ivanov, via wwdxc BC-DX TopNews May 10)

15220 at 0732-0742 UT Cotton Tree News radio via Rampisham-UK 500 kW, in English with talk about the environment and Islam SIO 444, May 5th.

(Costa Constantinides-CYP, wwdxc BC-DX TopNews May 5)

USA 17920.4v KVOH whining spur audible April 30 at 2006 UT, from strong 17775 kHz. As usual the match on 17629.6v kHz was much weaker, but same pitch of whine detectable. They really need to adjust the spurs so they are of equivalent strength.

(Glenn Hauser-OK-USA, dxld May 6)

15550-USB WJHR audible May 8 at 2008 with usual preaching. How much longer can they keep up this charade, programming without authorization, and running low power instead of minimum required 50 kW.

15620 and 15600, spurs from WEWN 15610 quite strong at 2006 May 8, bothering WYFR 15600 in Polish.

9265, it seems that WINB is encroaching into airtime reserved for the long-silent WMLK on same: May 8 at 2015 with hymn and nothing on 13570, WINB's normal mid-day frequency. It's // 9385 WWRB, so the Brother Scare service, as soon IDed by himself at 2018. I hope no one list-longs this as WMLK.

Axually WINB staying on 9265 all day Saturday instead of 13570 worx out fine, since the late Elder Jacob O. Meyer piously took Sabbaths off when WMLK axually transmitted, so its official imaginary registration is for 16-21 Sun-Fri, while WINB has it 15-21 on Saturdays only. Sabbath is special for both preachers but they observe(d) it oppositely! Stair adds more frequencies and times than ordinary days.

Mark Taylor, WI reported an unID on 7449.4, so I checked the next day, May 9 at 0031. There is a very weak spur on 7449.4 from WWCR 7465, preaching and gospel music, along with a match the same 15.6 kHz displacement above, on 7480.6. These spurs are old hat from this transmitter; does the same thing after the QSY to 3215. But they are quite weak so you won't always hear them. On this date, 7465 started QSY announcement at 0058 and went off at 0058:35; 3215 came on about 20 seconds later during the steel drums.

Meanwhile, WWRB, which had been on 3215 before then, broke into Brother Scare at 0057:35 to instruct "retune to 3145", ID, back to BS for a few sex, off at 0058:15. Thus there was a 40-second gap from one 3215 station to the next, well-coordinated. I did what Dave told me to do, on one receiver, and waited and waited. Finally 3145 came on at 0102:20 JIP, after forcing me to miss almost 5 minutes of BS!

As for WWCR transmitter status, at 2011 May 8, 15825 is JBA; at 2023 I find 12160 inbooming with Pat Boone; 13845 has PMS but much better on Anguilla 11775; 9980 is missing.

After 0100 May 9, besides 3215, 4840 and 5935 are also on with separate programming, but 9980 is still missing as it was earlier on May 8.

7415, WBCQ, UT Sunday May 9 at 0039, Ted Randall with "Outlaw Gospel" show plugging prayforme.com. VG signal, no CCI audible. The current WBCQ schedule claims it's QSO with Ted Randall, Sat 18-20 and UT Sun 00-03; and still shows QSO Tue 21-23, plus his Radio Disclosure Wed & Thu 21-23.

The WBCQ website anomaly page has this:

"Schedule updates, May 5, 2010 There are a number of new shows and schedule changes on WBCQ 7415 on Saturdays; here is the new line-up.

- \* Saturday 2-4 pm (1800-2000 UT) 7415 QSO Radio Show
- \* Saturday 4-5 pm (2000-2100 UT) 7415 The Medical Conspiracy
- \* Saturday 5-7 pm (2200-2300 UT) 7415 The Human Food Factor
- \* Saturday 7-8 pm (2300-0000 UT) 7415 Radio Timtron Worldwide
- \* Saturday 8-11 pm (0000-0300 UT) 7415 QSO Radio Show
- \* Saturday 11-12 m (0300-0400 UT) 7415 The Overcomer Ministry

The Good Friends Radio Network expands programming on WBCQ 9330 to 9 am-midnight eastern time (1300-0400 UT). The Overcomer Ministry is also in Tuesdays 7-8pm (2300-0000 UT) on WBCQ 7415 in addition to airtime noted earlier."

(Glenn Hauser-OK-USA, dxld May 8)

Summer A-10 schedule of WEWN Global Catholic Radio:

Spanish

0000-1000 on 11870 EWN 250 kW 155 deg to SoAM  
1000-1700 on 12050 EWN 250 kW 155 deg to SoAM  
1700-2400 on 13830 EWN 250 kW 155 deg to SoAM

Spanish

0000-0500 on 5810 EWN 250 kW 220 deg to CeAM  
0500-1300 on 7555 EWN 250 kW 220 deg to CeAM  
1300-1800 on 11550 EWN 250 kW 220 deg to CeAM  
1800-2400 on 12050 EWN 250 kW 220 deg to CeAM

English

0000-0300 on 11520 EWN 250 kW 085 deg to WeAF  
0300-0500 on 9455 EWN 250 kW 085 deg to WeAF  
0500-0900 on 6890 EWN 250 kW 040 deg to WeEUR  
0900-1300 on 11520 EWN 250 kW 040 deg to WeEUR  
1300-1600 on 13835 EWN 250 kW 355 deg to SoEaAS  
1600-2200 on 15610 EWN 250 kW 040 deg to NE/ME  
2200-2400 on 11520 EWN 250 kW 040 deg to NE/ME  
(R BULGARIA DX MIX News, Ivo Ivanov, via wwdxc BC-DX TopNews May 10)

URUGUAY 6045usb Radio Sarandi tentatively reactivated. Sp newstalk format in SSB mode only, noted 29 Apr and again 30 Apr at 0809 UT. I last had positive ident on this on 19 Febr and it has been missing on regular checks till now. Clear frequency but difficult reception due atmospheric static noise level.

(Bryan Clark-NZL, dxld May 6)

VATICAN STATE [target broadcast] 5915 R Dabanga, via Santa Maria di Galeria, Vatican State, at 0312-0357\* UT on Apr 20, various men in Arabic with news reports and discussions, 0357 UT ID, quick closedown ann, music segment and one time pip before carrier terminated. Poor to fair.

(Rich D'Angelo-USA, dswci DXW May 5)

VIETNAM 5925 VOV-2 [+ CNR-5], at 1638 UT on May 03, Vietnamese, seemed Japanese lesson ending with "Sayonara!", pop ballads & talk to 1659:48 UT carrier off. Dominated co-channel CNR-5 which then surfaced in Chinese. Reception would have been much more difficult if R Slovakia Intern'l hadn't been off 5920 kHz.  
(Martien Groot-HOL, dxld May 4)

ZAMBIA Frequency change of CVC International in English to WeAf:  
1900-2200 NF 9540 LUS 100 kW 315 deg, x5940 to avoid VOIROI via SIT  
(R BULGARIA DX MIX News, Ivo Ivanov, via wwdxc BC-DX TopNews May 1)

ALBANIA German, Austrian and Czech listeners  
on Radio Tirana tour 03 til 08 May 2010.

Click to <<http://albanien.wwdxc.de>>

Liebe Freunde, auch ich moechte mich gesund aus Bad Homburg zurueckmelden.  
Gegen 21.30 Uhr war ich am Sonntagabend zuhause.

Ich habe gerade einmal eine Auswahl meiner Fotos auf die Website des  
WORLDWIDE DX CLUBs hochgeladen.

Bei dieser Gelegenheit moechte ich noch einmal Astrit Ibro und allen  
anderen Mitarbeitern bei Radio Tirana recht herzlich danken, die diese  
Reise moeglich gemacht haben.

An alle Reise-Teilnehmer, die hoffentlich auch alle gut nach Hause  
zurueckgekehrt sein, ebenfalls herzliche Gruesse aus Bad Homburg.

Hier noch die komplette Namensliste zu dem Gruppenfoto:

back row from left: Fritz Schuette (Berlin), Dieter Feltes, Premysl Vins  
(Czech Rep), Michael Bethge (WWDXC Germany), Martin Schoech, Georg

Pleschberger (Austria), Drita Cico (Radio Tirana technical dept), Udo und Kerstin Scherbaum, Klaus Winter, Volker Willschrey (Germany), Hans Verner Lollike (Denmark).

front line from left: Horst Gloger, Astrit Ibro (Radio Tirana German service) and Fritz Andorf (Germany).

ARGENTINA 15345.157 kHz, RAE Buenos Aires in Sp at 2036 UT, SIO 344.  
(Nils Schiffhauer-D DK8OK, A-DX May 16)

ARMENIA 9890 Gavar Armenia, only 2200-0200 UT, En nx at 0000 UT May 15.  
S=9+45dB powerhouse like 500 kW Wertachtal or Rampisham signal level.  
(wb, wwdxc BC-DX TopNews May 15)

AUSTRALIA/NEW ZEALAND 13690 RA Shepparton sunday sports live coverage  
at 0435 UT May 16, S=5-6 fair. // 15240 tentat, S=1 under threshold. Also  
R NZi on 13730 heard at same 4-5 UT span, S=7 fair, but suffered by co-  
channel RNW sponsored R Dabanga via Al Dhabbaya-UAE 0430-0527 UT.

15415 RAustralia Shepparton non-sport remaining heard on S=7 level with  
feature progr, 0455 UT May 16.  
(wb, wwdxc BC-DX TopNews May 16)

AUSTRIA 9820 ORF Moosbrunn mit deutschen Nachrichten ueber die Bangkok  
Toten, um 0040 UT 15. Mai, S=9+10dB, sonorer professioneller Nachrichten  
Sprecher mit offensichtlich guter Sprechbildung.  
(wb, wwdxc BC-DX TopNews May 15)

BELARUS The reactivated 7265 kHz noted signing on sometime between 1445  
and 1455 UT on May 14. 6080 and 6115 kHz were also reactivated at about  
the same time as 7265 kHz, and sign on one or two minutes before 1500 UT,  
at this time (starting 1500 UT) with the Stalica programme in parallell  
with 7235 kHz. 6010/6070 and 6040/7280 kHz have regional programmes at  
1500 UT, at least on workdays. 7360/7390 kHz have a different programme.  
(Olle Alm-SWE, wwdxc BC-DX TopNews May 15)

Re BLR: This morning I made a quick check at 0340 UT. Not even a carrier  
on 7265 kHz, but 6190 was discernible with no delay compared to 7235 kHz,  
so appears to be co-sited.  
(Olle Alm-SWE, wwdxc BC-DX TopNews May 16)

Many thanks Olle, re-7265 kHz:  
BELARUS 2nd px outlet. When I woke up this night very early:

Noted this Belarus Radio 7265 kHz transmission with different program and  
excellent ID, surprisingly fine signal of S=7-8 strength at 0330-0400 UT  
this morning May 15th, when compared to different [1st?] progr relay on  
6010, 6040, 6070(hit neighbour DWL 6075 strongly), 7235, 7280 - latter the

most powerful signal in 0300-0400 UT slot.

Seemingly schedule in A-10 season at 0300-0900 UT and 1500-2100 UT.

7265 missed on May 16th again. In 0300-0800 UT slot noted 6010 6040 6070 7235, and best on 7280 kHz. 6040 and 7280 still on air at 0852 UT. Nothing on 6115 kHz anymore.

(wb, wwdxc BC-DX TopNews May 15/16)

BOLIVIA 4009 R. Eco, Reyes, on May 14 at 2302-2312 UT. Pop ballad music in Spanish, male announcements in Spanish, male talks to an audience reacting with laughter, 2307 UT romantic Spanish music. Partially readable, 35433.

(Lucio Otavio Bobrowiec-Brazil, hcdx May 15)

BOSNIA [SERBIA non] 9675 International Radio Serbia via Jabanusa near Bijeljina, Bosnia performed powerhouse S=9+40dB signal on 0010 UT, May 13. Nx read by woman, in a very speedy manner ...

(wb, wwdxc BC-DX TopNews May 13)

BRAZIL 4974.8 R. Iguatemi, Osasco SP, at 0454-0515 UT on 07 April, pops, time announcements (UTC -3 hrs), IDs and jingles. (The station on this frequency is often reported also as Radio A Nossa Voz). QSA: 2-3.

(Karel Honzik-CZE, wwdxc BC-DX TopNews April 7)

CANADA 9490 Radio Republica in Spanish via tentat Sackville site at 0002 UT May 13, S=9+20dB powerful, very weak Cuban hiss jamming poorly underneath. Less strength from Cuba wonders, because of stronger signals from Cuba on 11970, 15250, and 15380 kHz at same time span.

(wb, wwdxc BC-DX TopNews May 13)

9490 Radio Republica in Spanish (US sponsored vailed operation). Via Sackville-CAN S=9+35 dB, at 2350 UT May 14, noticias S=9+20dB at 0048 UT May 15. ... "sintonice .. doce de la noche .. en 31 metros ..."

9490 2300-0200 11 SAC 100 227 Sp CAN RMI RCI Mon-Fri

9490 2330-0030 41,49 WER 125 75 Burm D DVB DTK

On May 15th at 2330 UT only a tiny S=1 DVB Burmese program was heard, so Republica is only Mon-Fri on air.

(wb, wwdxc BC-DX TopNews May 15/16)

11930 Also powerful calibre S=9+20dB CRI via Sackville relay at 0035 UT May 15. Very sweet Chinese typical music 0000-0100 UT.

(wb, wwdxc BC-DX TopNews May 15)

CHILE [ECUADOR non] 9835 Radio HCJB Deutsch via Chile, SIO 252, 2300 UT. Leise aber direkt aus Suedamerika konnte mein Perseus gestern die deutsche Suedamerikasendung von Radio HCJB aus Quito aufnehmen. Das Signal ist von 23-00 UT gleichbleibend, zwar schwach aber ungestoert. Gesendet wird mit 50 kW.

Alle Details: <<http://www.hcjb.de/index.php?id=16>>

(Christoph Ratzer-AUT OE2CRM, A-DX May 15)

Here on 9835 kHz HCJB via Chile, ID in German at 2358 UT 14th May, S=9+10dB.

Portuguese HCJB via Chile also on 11920 kHz at 0020-0030 UT 15th May, S=9+10dB.

(Sei-ichi Hasegawa-JPN, NDXC HQ May 14)

Firedrake music on 13950 ! kHz 4-5 UT on May 16, poor S=4.

(31 to 16 mbands were open towards EaAS, SoEaAS and Indian subcontinent this morning, like all Chinese sites, Yamata, Khabarovsk, Kajang, Udon Thani etc.)

(wb, wwdxc BC-DX TopNews May 16)

CHINA [TIBET] Not only 4920 and 6200 kHz have been missing for some time, but also 5240 kHz.

(Olle Alm-SWE, wwdxc BC-DX TopNews May 15)

CHINA Voice of Shangri La on 6035 kHz. I've been monitoring this with fair to poor reception (via Global Tuners Hong Kong rx), from as early as 0945 UT on May 15 and as late as 1305 UT on May 14, with programming in Mandarin and Vietnamese. Some TOH ID's are in Vietnamese and English rather than Mandarin and English.

According to Yunnan PBS website (ynradio.net) this is primarily an external service and broadcasts for five hours a day, three hours in Vietnamese and two in Mandarin, using 50 kW on this sole frequency (from my observations, transmission time seems to be 0900-1400 UT).

There's also an FM service of the same name, on 99.0 MHz in Kunming and other FM frequencies (listed on the site) elsewhere, it's one of the seven live audio streams available on their website. However, this appears to be an entirely separate operation presented solely in Mandarin, and it was

not observed in // with the shortwave frequency.

There are audio clips of IDs for both these and seven other Yunnan PBS services available on the Interval Signals Online website - [intervalsignals.net](http://intervalsignals.net)  
(Dave Kernick-UK, BrDXC-UK, May 15)

COSTA RICA 5954.15 ELCOR. Heard after 0200 UT with good signal and moderate splatter from 5960 kHz playing Shakira songs as usual. Bet Mana songs are the alternative, altho I quit listening. No signal when I recheck near 0300 UT.

Still a mystery in this small country. Once someone told is situated in Guapiles, canton de Pococi, provincia de Limon, and there is a political party involved on this. Time will reveal.  
(Raul Saavedra-CTR, dxld May 13)

I've heard the ELCOR transmitter the past three nights (5/11, 5/12, 5/13 UTC) as early as 0225 UT all with sign offs 0357-0359 UT. All three nights the frequency is right on 5954.200 kHz on the G313e. There was a sign off announcement last night mentioning a test transmission which I had at 0357 UT. The s/off was so obscured by QRM from Sackville and Okeechobee that it was pretty useless.

Tonight there was Spanish heavy metal until 0234 UT, then a transition with a pleasant vocal which I believe was on about the same time all four nights to mellow trans national Latin ballads (the kind of music my Venezuelan and Colombian friends living here listen to.) After 0245 UT there is industrial music, one probably in English. (I find this music hard to hear the vocals in any language.) The party is still going strong at 0307 UT.  
(Mark Taylor-WI-USA, dxld May 13)

5954.18 Thanks Anker too [to DXplorer], as reported ELCOR Costa Rica widely in dxld in past week. Noted the station also easily yesterday night at 2330-2400 UT May 14th. S=7 signal in southern Germany.  
(wb, wwdxc BC-DX TopNews May 15)

CUBA 15250 Noted Nacional Venezuela ID at 2356 UT, via Quivican Cuba site, S=5 at 2355 UT May 12. Also RHC progr on 15380 kHz at 2358 UT.  
(wb, wwdxc BC-DX TopNews May 13)

La Habana noted on many channels tonight. 6110 and 12030 kHz in Spanish before midnight, 2300-2400 UT May 14, S=9+10dB. From 0000 UT May 15: 6110, 6000 S=9+10, 6060 somewhat stronger S=9+20dB, 11760 S=9+15dB, 15380 S=5-6 noisy hiss. But 11690 was silent tonight !  
(wb, wwdxc BC-DX TopNews May 15)

6000 RHC Arnie Coro in English noted around 0335 til 0352 UT May 16. Also again this morning in 5-6 UT slot on 6060 kHz S=9+15dB.

RHC Spanish service in 3-5 UT slot, May 16, on 6060 6110 11760, and at 0430 12020 on S=9 level !  
(wb, wwdxc BC-DX TopNews May 16)

CYPRUS 15488-15513 OTH radar pulses, May 15 at 2210 UT, presumed from here with typical 25-kHz bandwidth; Voice of Greece still audible poorly

on 15630.  
(Glenn Hauser-OK-USA, dxld May 15)

Re Cyprus radar.

CYPRUS CYP vv CYP at 0505 UT May 16. OHRadar system from Limassol on wideband 17638 to 17662 kHz hit BBCWS 17640 kHz to EaAF via Zyyi this morning. Radar S=9 but annoying vibrate rattle pulse signal, BBCWS back lobe S=9+10dB here in southern Germany.  
(wb, wwdxc BC-DX TopNews May 16)

GABON 9580 R. Africa No 1, Moyabi. On May 14 at 0920-0929 UT. Male alternating female in French talks. 25532.  
(Lucio Otavio Bobrowiec-Brazil, hcdx May 15)

GERMANY/BOTSWANA 7340/11905 Came across of strong VOA Kinyarwanda/Kirundi program on 7340 kHz at 0330-0430 UT today May 16, thought it was too strong for Iranawila propagation into Europe. But WRTH Update shows Lampertheim Germany relay instead, so my location was in the groundwave or somewhat vagabond lobe of the 132 degrees array at Lampertheim, some 107 kilometers away on 153 degrees angle. // fair on 11905 from Botswana at 0410 UT.  
(wb, wwdxc BC-DX TopNews May 16)

0330-0400 daily EAf 11905ira  
0330-0430 daily EAf 6095sao, 7340lam <<<<  
0400-0430 daily EAf 11905bot  
(WRTH Update May 2010)

GUINEA WeAfr UNID 4900 kHz.  
4900 Radio Familia, Conacry, NEW STATION, 2305-0005 UT on May 03 / 04, Fulah (?) talks, ID: "Familia" between local songs, weak to fair signal. Heard still at 0005 UT but found an empty channel when returned back at 0027 UT.

4899.96[.97] UNID station with African-like mx, mostly nonstop, then YL-talk 2326-cca 2340 UT, music, no change on TOH, then at 0002 UT: something like a jingle with "... One ..." ?; no signal at 0027 UT at frequency check.  
(Karel Honzik-CZE, wwdxc BC-DX TopNews May 4)

One source in West Africa told me that Familia FM (105.3 MHz) in Guinea is broadcasting on shortwave 4900 kHz. Station website is  
<[www.familiafm.com](http://www.familiafm.com)>

Briefly googling I found only one reference of them being on shortwave. At  
<<http://jamesgiroux.ca/adventure/guinea-day-5-timbi-medine/>>

There's a mention like this:

"The technology is cutting edge and doesn't even have a patent yet because to do so would make it public and they don't want to do that yet but it's very cool. I don't know much about it but they've been able to cut the number of watts needed and still hit a radius of about 700 miles with their shortwave signal.

It means that all of Guinea is able to receive the moral and spiritual

teachings broadcast everyday on Familia."

If Familia FM is indeed on 4900 kHz, I think it's unauthorized transmitter and no wonder if they keep low profile. Anyway, it's worth checking if there's Familia ID on 4900 kHz.

[later] Now on Familia FM website also appeared confirmation:  
Nouvelle Station Bientot ecoutez la radio Familia en ondes courtes sur 4.900 MHz dans tous le pays ... i.e. New Station - you'll soon be able to listen to Familia Radio on shortwave 4.900 MHz throughout the country ...

<<http://www.familiafm.com/index.php/home>> So, that's it. Jari  
(Jari Savolainen-FIN, May 14)

Thanks to Jari Savolainen this morning who has discovered the website of a station in Conakry, Guinea, Familia FM, which mentions using 4900 kHz. So this is very likely the Unid African on this frequency.

For several days I have been checking 4900 kHz to try and identify a mystery African station first reported by Carlos Goncalves in DXLD on 1st May.

The signal is extremely weak here in the UK, but a carrier can be detected most nights, peaking after 2200 UTC. On a couple of occasions it has been strong enough for traces of audio - lively music of the style popular in francophone West Africa, with some talk in what sounds to be vernaculars or possibly French.

Sign-off time is at 0000/0005 UTC. It is not // Mali (5995) or Guinea (7125 kHz) and does not sound like Chad which has used 4905 kHz in the past (the sign off time would also be too late for Chad which usually closes at 2230 UT).

I have heard a very tentative mention of Burkina, though it does not seem to be // Radio Burkina's internet audio feed and the station's home page site still lists 5030 kHz. Glenn Hauser says Carlos has heard clues pointing towards a possible reactivation of Cote d'Ivoire, which is certainly an interesting possibility. Both Ivory Coast and Burkina are neighbouring countries with national channels which sign off at 0000 UT according to WRTH. Observations continue...  
(Dave Kenny-UK, BrDXC-UK ng May 14)

Many thanks indeed!

I told Mauno the other day, that, to me, this stn "looks" like some local or regional stn (implicitly, gov., not priv.), not a natl. one. If this is what you mention, then it's priv. and low, probably vy. low powered.

Both the day before y/day and yesterday, May 13, the speaker during the usual news bulletins that starts at 2210 UT right after a jingle, was a male one, not the usual laddy, and this time a few more words could be understood, though nothing that specifically points to Guinea-Conakry, except perhaps "bureau politique", something typical of certain Afr. countries - maybe this could be a clue.

Yesterday too, together with the many references to the political bureau were also generals' names, and "Camara" is often heard. Names like those

in here

<[http://www.rtg-conakry.com/index.php?id=6&tx\\_ttnews\[pointer\]=1&cHash=9e4173e0cc](http://www.rtg-conakry.com/index.php?id=6&tx_ttnews[pointer]=1&cHash=9e4173e0cc)>

are perhaps worth retaining during some check.

As to R. Familia's webpage, I found no match for the 2210 UT news bulletins in:

<<http://www.familiafm.com/index.php/menu-nos-emissions/menu-informations>>

<<http://www.familiafm.com/index.php/menu-nos-emissions/menu-informations/94-artcile-infos>>

Prior to that 2210 UT newscast y/day, the sort of music was, apparently, untypical of countries to the south; it sounded more like the one heard on the Senegal, Guinea region which has more common ties with Mali. (Carlos Goncalves-POR, May 14)

Glenn, I was about to send an e-mail to say that I believe the station on 4900 kHz is from Guinea. Was able to see the latest dxld first to find that this is indeed the case. I was able to record several hours the other night and what I hear matches your reports from Europe. Reception is much poorer than good signal on 7125 kHz which is not in parallel.

Some highlights from recording on May 12:  
2157 very brief ID which does sound like "Familia"  
2220 news style jingle and international news in French (until 2240).

2245 announcement in local language mentioning several different names each preceded by "Radio" (perhaps this is a programme carried by several different stations?)

2301 few minutes of French talk with many mentions of "camara" and of "capitale Conakry" ending with musical jingle and the word "Familia"

2331 continuous music until 0004, tx off at 0005

By the way, I am still hearing Cameroon on 6005 during local daytime hours. (James MacDonell-NIG, dxld May 14)

Different web livestream to ? (wb)

They started the news bulletin at 2210 as usual, this time with the lady announcer back, but what's heard on <<http://familiafm.streamon.fm/>> is Guinean light music. (Carlos Goncalves-POR, dxld May 14)

GUYANA 3289.98 V.O. Guyana at 0824-0847 UT nonstop M vcl Hindi mx. A couple short tlks later. 0847 UT nice canned V.O. Guyana ID w/AM and FM stereo freqs by M over "Caribbean Queen" by Billy Ocean. 0848-0854 UT choral songs. 0854 UT ad, then what sounded like an inspirational tk segment w/a lot of voice-over chatter by live M anncr over the same Jazz song repeated over and over. 0908 UT farming PSA, then more of the same

voice-over tlk. Good signal but horrible lcl buzzing QRM and occas.  
thunderstorm static crashes. Nice to see this one back on.  
(Dave Valko-USA, hcdx May 11)

HUNGARY 6150 Hungarian Radio, 2010-05-08 \*0057-0104: Jaszbereny,  
Hungarian, fair, open carrier from tune-in, three second long high-  
pitched test tone at 0057:55, open carrier to sign on at exactly 0100:00  
UT, muddy/bassy audio, announcement by man, short band music then presumed  
news read by man; decent signal and alone, would be readable, if not for  
mushy audio. Get this one while you can - transmitter site switches to  
Germany at end of June, leaving Hungary off shortwave entirely!  
(Earl Higgins-MI-USA, dxld May 14)

INDIA [tentatively] 11715 Unidentified station, S=6 signal, English  
language newsreader at 0010 UT May 15. Many IND and PAK news items to  
identify. Probably - my guess - the Panaji Goa engineer missed to change  
from 11715 to 9705 kHz at 2245 UT. To the Asian audience: "is that a  
regular English transmission at 0000 UT ?"

Other user are Taiwan and Tinian on this channel on other times of the  
day.  
(wb, wwdxc BC-DX TopNews May 15)

INDONESIA 4789.97 RF RRI Fak Fak, first noted from 0600+ and again at  
2200+ UT with nice local music and occasional RRI News (not heard every  
hour), In the clear at 2200 UT but mixing with Radio Vision, Peru, at 0600  
UT. Nice to see this one on again. 13 May.  
(David Sharp-NSW-AUS, dxld May 14)

JORDAN 11960 Jordan Radio Amman in Arabic observed again 0340-0400 UT,  
powerful S=9+35dB, nothing in // on 11810 kHz empty. Noted at 0429 UT  
S=9+20dB on May 16.  
(wb, wwdxc BC-DX TopNews May 15/16)

KUWAIT 15515 Radio Kuwait in Arabic on air at 0457 UT, - til 0930 UT ?  
(wb, wwdxc BC-DX TopNews May 16)

MALI 5995 RTVM Mali, Bamako, on May 13 at 2210-2217 UT. Male talks  
sometimes eloquent seems in Vernacular, African music. 22432.  
(Lucio Otavio Bobrowiec-Brazil, hcdx May 15)

MEXICO 6185 well defined Mexican music noted here around 0005 UT May 15,  
S=4. Unheard here since half a decade or so.  
(wb, wwdxc BC-DX TopNews May 15)

6185 Radio Educacion, con musica instrumental a ritmo de Jazz "... Radio  
Educacion , 85 anos; voz de todas las voces..." Anunciando nuevos

Radio Educacion...".  
(Rafael Rodriguez R.-CLM, JPNpremium May 14)

MOLDOVA Radio Moldova International launches contest "Discover the  
Republic of Moldova. This contest is aimed to encourage the listeners from  
abroad to listen to the RMI station, motivate them find more information  
about the Republic of Moldova, familiarize them with the national values,  
promote in such a way the interest and the image of the Republic of  
Moldova in the world. The current year topic is Tourism in Moldova.

While participating in our contest, you will have the possibility to find out the most picturesque places and legends linked to Moldova. The winner of the contest will have the possibility to visit them, or the Grand Prix of the contest is a trip to Moldova. Only listeners of the RMI station from abroad are eligible to participate. This contest will take place in 15 stages during the period of 17 May to 12 July 2010 with each stage consisting of 3 questions.

The first refers to the general knowledge of the participants about Moldova. The second one is related to the tourist attractions of Moldova talked about over the year and the third one is from the stories aired in between the stages. The questions will be broadcast in Monday and Thursday programs and placed on the site  
<www.trm.md>

The answers will be sent by email within a week after they are announced, at the following address  
<moldovainternational @ gmail.com>  
<moldova-international @ mail.md>

They will be scored from 0 to 3 points, depending on correctness. The winners will be nominated, according to the points gained during those 15 stages. The Regulations of the Contest "Discover the Republic of Moldova" is on the following site  
<www.trm.md>

We invite you to participate in this contest, test your knowledge, find new things and you will discover an unknown Moldova. (Station Direct modified slightly by RAD). No longer on shortwave but clearly designed for "international listeners" presumably via Internet.  
(RAD via DXplorer May 11)

MOLDOVA [Russia non] 9665 VoRUS Grigoriopol Moldova English nx, ID, at 0300-0400 UT S=9+30dB. Powerhouse Gavar Armenia 9890 kHz relay closes much earlier at 0200 UT.

NIGERIA 15120 Voice of Nigeria (VON), Ikorodu, good reception of their French service from 0700-0757 and English 1500-1559 on Apr 18. Keeping an ear on 15120 I noticed that there was no evening broadcast of VON Apr 18 and no morning broadcast Apr 19 on that channel. Maybe they now switch to the new transmitter station?  
(Harald Kuhl-D, dswci DXW May 5 direct and via dxld)

15120 I am not hearing V. of Nigeria when I should be, such as around 0500 UT; or 1907 UT May 9. Airings have been constantly changing as they are bringing new Abuja transmitter online, so is there any reliable schedule? Has anyone else noticed them absent lately? Aoki showed Ikorodu on 15120 kHz was supposed to be in English at 05-07, 15-16, 17-21 UT.  
(Glenn Hauser-OK-USA, dxld May 12)

V of Nigeria was noted here today, 9 May, on 15120 kHz with a strong signal between 1500-1600 UT.  
(Alan Roe-UK-USA, dxld May 14)

This is the time & frequencies I have heard them on:

0900-1000 UT 9690 kHz  
1500-1600 UT 15120 kHz  
1800-1900 UT 15120 kHz  
1900-2000 UT 7255 kHz  
(Peter W Hansen, dxld May 9)

6089.85 Radio Nigeria, Kaduna, 2150-2203, May 8, talk in listed Hausa.  
Local tribal chants at 2202 UT. Weak but readable. Covered by Anguilla at  
their 2203 UT sign on.  
(Brian Alexander-PA-USA, dxld May 14)

PAKISTAN USAID sign \$8 million agreement for up-gradation of two AM  
transmitters for PBC.

Pakistan and US Agency for International Development (USAID) past Thursday  
signed an agreement worth \$8 million for provision of two AM transmitters  
to Pakistan Broadcasting Corporation (PBC) aimed at enhancing radio  
transmission coverage in Peshawar and Dera Ismail Khan. The United States  
Ambassador to Pakistan Anne W. Patterson, Director USAID-Pakistan Robert  
J. Wilson, Federal Minister for Information and Broadcasting Qamar Zaman  
Kaira and PBC Director General Murtaza Solangi signed the agreement on  
behalf of their respective governments.

The signing ceremony held at PBC headquarters was also attended by  
Minister of State for Information and Broadcasting Syed Sumsam Ali Shah  
Bukhari and other high officials.

On this occasion Minister for Information and Broadcasting Qamar Zaman  
Kaira said the signing of the agreement titled "Statement of collaboration  
between the Pakistan Broadcasting Corporation and the United States Agency  
for International Development" is an effort to upgrade AM transmitters in  
Peshawar and D.I.Khan.

He said the key objective of this bilateral collaboration is to expand  
radio broadcasts in the Federally Administered Tribal Areas (FATA) and  
Khyber-Pakhtunkhwa.

Kaira informed the participants of the ceremony that the Pakistan Peoples  
Party-led coalition government has dedicated 2010 as the Year of the  
radio. He thanked the US for extending this support to Radio Pakistan.  
Radio is a medium which has the largest numbers of listeners so we can  
approach maximum people with radio but unfortunately this sector was  
ignored in the past, he said.

The government priority is to improve performance and enhance capacity of  
Radio Pakistan to ensure its transmission reaches every corner of the  
country.

Kaira said with the introduction of TV channels, Radio was ignored but  
with the effective strategy of the people's government radio transmissions  
have been revived and FM channels are working effectively.

US government and the modern world is extending constant support to us for  
which Pakistan is grateful for them, he added. He said, "We firmly believe  
in the incredible power of this medium to help us reach every Pakistani no  
matter where he or she lives."

He said through this collaboration with Radio Pakistan, USAID has yet again demonstrated its commitment to help the people of Pakistan by assisting their democratic government to reach them through radio in some of the most far-flung and impoverished areas of the country.

The minister said at a time when Pakistan is fighting a most important war against extremism to bring peace to the country, "We want to send through our airwaves, not only timely and accurate news and information, but also, a message of hope, courage and resilience to those men, women and children who have been affected the most by this menace.

"I am quite confident that this important partnership will go a long way in meeting our common objective to bring peace and stability in Pakistan," he added.

US Ambassador Anne W. Patterson said US and PBC have had a very long and productive cooperation over the years so, "I am glad to sign this agreement to support PBC."

She said the agreement would help PBC upgrade its transmission system in Khyber-Pakhtunkhwa and D.I. Khan.

The ambassador said despite the introduction of modern technologies in the contemporary work, the Radio is still considered one of the major source of getting information while sitting in far-flung areas.

PBC DG Murtaza Solangi in his welcome address thanked the USAID for extending cooperation to install Medium Wave transmitters and equipping studios with modern broadcast facilities in the war torn province of Khyber-Pakhtunkhwa and Federally Administered Tribal Areas (FATA).

He said PBC is undergoing a much needed phase of upgradation of its broadcasting network across the country to bridge the gap between people of different areas of Pakistan.

Solangi said most of the existing broadcast facilities were planned, conceived and installed during the first democratically elected government of Shaheed Zulfikar Ali Bhutto.

He said the transmitters and the studio equipment provided by the USAID would not only help strengthen the writ of state in troubled areas but also serve the locals for their socio-economic uplift and congenial environment besides promotion of the rich cultural heritage of the area. Furthermore, there are plans for setting up 100 kW transmitters at Parachinar (NWFP) and Chaman (Baluchistan) along border with Afghanistan and at Gawadar near Iranian border. These transmitters are meant for sending signals to the neighbouring countries. (Jan 2008)

Radio Pakistan two NEW 100 kW shortwave transmitters. As per latest information obtained from Radio Pakistan, the work on installation of two new 100 kW shortwave transmitters at Landhi Karachi is underway. Out of the total allocated cost of US \$7.2 Million, 60% amount has been spent so far.

Similarly the projects of installation of 100 kW medium wave transmitters at Gawadar (Baluchistan) and Chaman (NWFP) are also underway and out of the allocated sum, 23% and 26% have been utilized so far. The project for installation of 100 kW MW transmitter at Parachinar (NWFP) is being processed.

Spurious of 15465 kHz. Powerful S=9+40dB in southern Germany. Noted today Saturday May 15th again, VoRussia French at 1715 UT on 15291.86 kHz, tiny S=2 signal. Nothing noted on symmetric 15638.14 kHz though.  
(wb, wwdxc BC-DX TopNews May 15)

SLOVAK REP Re Rimavska Sobota, Slovak Republic, Sudanese Miraya FM program.  
9740 - 9480/10000 kHz.

Miraya on 10000 kHz !!!! [c.f. bc-dx TopNews #962]  
Cland[???] to Sudan 10000 !!! ided as "Idaat ... raya" on 0416 UT today May 13th with a pop songs (a love to you) then with ID, program in Arabic. Then talks with many mentions to Sudan and steady signal on S=9 at 0427 UT with Horn of Africa song. Found to be // 9740 kHz, Eibi shows Miraya.  
(Zacharias Liangas-GRC, wwdxc BC-DX TopNews May 13)

Zach, may you can check symmetrical 9480 kHz too ? Even 9740 kHz doesn't propagate to my location in this morning hour. (wb)

TAIWAN/MALAYSIA 15290 R Taiwan Int in Chinese fade in around 0450 UT May 16, S=2-3 weak signal.

Much better next door like two-way reception carried some echo effect, RTM Kajang on 15295 kHz in believed to be rather Malay sce than scheduled English.  
(wb, wwdxc BC-DX TopNews May 16)

TAJIKISTAN 11510.04 odd With high summer looming, this outlet of VoRUS in Spanish via Dushanbe Orzu noted with poor signal in 4-5 UT slot. I could hardly identify Spanish idiom. Waste of money to keep this service on air so far east in CIS.  
(wb, wwdxc BC-DX TopNews May 16)

TUNISIA 9725 Tunesian Radio and TV, on 15 May 2010 at 0256 UT. A minute of strong empty carrier, finally YL in Arabic at 0257 UT. Main Theme from Star Wars, R2D2 beeping, Jabba saying "oh chuba," a dubbed Luke speaking in Arabic, followed by Augie's Great Municipal Band from Phantom Menace while YL mentions "Jedi." Top of Hour ID at 0301 UT, followed by YL with news.  
(Terry Wilson-MI-USA, dxld May 16)

UNIDENTIFIED 5980 DRM covering 5975-5980-5985 first noted May 08 at 2305 UT and then again May 10 from 2223 UT tune-in to 2330:00 UT off when WYFR & Myanma R became audible on 5985 kHz. Checked [www.drm.org](http://www.drm.org) but not listed there. No idea what this might be, some kind of test perhaps? If you can receive DRM please help.  
(Martien Groot-HOL, dxld may 11)  
M&B Nauen tx noted recently 9515drm at 1330 UT.

UK 15760 Rocks The World this Sunday.

Dear Listener, UK Rocks The World will be back on the air on Sunday 16th May at 1500 UT. Frequency: 15.760\* MHz. Target Area: North America (but reception reports worldwide gratefully received). Please tune in and record MP3's of your reception. We look forward to receiving your feedback.

ENJOY!!!

Regards The UK Rocks The World Team  
(via BrDXC-UK ng, May 13)

\* rent once again via Woofferton VT-group provider? wb.

UK Rocks The World will be back on the air on Sunday 16th May at 1500 UT. Frequency: 15760 kHz. Target Area: North America (but reception reports worldwide gratefully received). Started at 1457 UT almost immediately after carrier appeared. It's a poor and fluttery signal at my location in NW England.  
(Noel R. Green-UK, dxld May 16)

I am hearing Rock music, no announcements, two numbers. I tuned in at 1501 seeing your report Arnaldo. Its as strong as BBC or any other 444 with my log periodic beamed in the general direction of Europe. Will check more for an announcement.

On the Sony ICF 2010 and just only the whip 100% readable 333 some fading. What is the power, via Skelton UK?  
(Victor A. Goonetilleke-CLN 4S7VK, DXplorer May 16)

Hi Noel, hi Victor, I guess 15760 Woofferton-UK usually 250/300 kW, the back main lobe 110 degr goes towards Paris, Milan, Venice, Croatia, etc.

So minus 30 degrees is a fair S=6-7 signal here in southwestern Germany.

Similar calibre on same signal strength on ETON E1 display from the reverse direction: BBC Arabic from Zyyi Cyprus on close-by channel 15790 kHz. Only Deutsche Welle Kigali in Russian on 15620 kHz is a bit stronger like S=8-9 at same time span.

Similar action we had Radio Oeoemrang Amrum Germany on 15245 kHz Wertachtal 500 kW at 1557-1700 UT on Feb 21 only. Every year a single transmission. Also azimuth towards North America - CAN, ALS, USA, MEX.

73 wb df5sx JN48OR May 16

15760 Came on a few minutes early with ID and Tom Petty with Freefalling. Excellent signal, like a local here. 1459 UT frequency 15760 kHz.  
(Mick Delmage-Alb-CAN VE6IDX, dxld May 16)

Nothing special, so what is the purpose with this transmission?  
(73. Raúl Saavedra-CTR, dxld May 16)

WOF - they have only zone 11 target gear, at 238 and 250 degrees azimuth. But I guess for such a more or less SINGLE private action you may use a back lobe of 108 or 120 degrees array, back towards 290 - 310 degr target. Such reflector curtain barrier array is NOT leak-proof in back direction.

Two masts looks like in 348 degrees too:

<[http://maps.google.de/maps?f=q&source=s\\_q&hl=de&geocode=&q=+52%C2%B018%2744.29%22N+++2%C2%B043%2713.12%22W&sll=51.151786,10.415039&sspn=19.808511,57.084961&ie=UTF8&ll=52.313149,-2.716531&spn=0.002351,0.006968&t=h&z=18](http://maps.google.de/maps?f=q&source=s_q&hl=de&geocode=&q=+52%C2%B018%2744.29%22N+++2%C2%B043%2713.12%22W&sll=51.151786,10.415039&sspn=19.808511,57.084961&ie=UTF8&ll=52.313149,-2.716531&spn=0.002351,0.006968&t=h&z=18)>

BBC in 1995 year:

UZBEKISTAN [JAPAN non] 11965 Radio Japan Bengali service test frequency.

Due to continuous feedback of poor reception on 6155 kHz, Radio Japan Bengali service is testing frequency 11965 kHz from 1300-1345 UTC from 13-15 May 2010.

Reception reports are welcome by Radio Japan and can be sent to <nhkworld @ nhk.jp> or <bengali @ intl.nhk.or.jp>

(Swopan Chakroborty-IND, hcdx May 14)

Yes, 11965 via Tashkent UZB is the alternate frequ of 6155 in A-10, both 100 kW 131 degrees. wb.

Alokesh Gupta wrote: NHK Radio Japan is testing in Hindi language as per following schedule:

1345-1430 UTC on 9585 kHz on 13, 14 & 15th May 2010

Reports to: <nhkworld @ nhk.jp> Audio Files appreciated.

(Alokesh Gupta-IND, DXindia May 13)

Re NHK World via Tashkent-UZB.

9585 BBC 1345-1430 UT Burmese 100kW 340deg Kranji-SNG

Does BBC Burmese STILL use the very same channel at very same time ?

Does this work well ? I've my doubts. (wb., May 13)

Via Tashkent-UZB.

Looks like a direct collision with two other stations, per Aoki!

9585 BBC 1345-1430 UT Burmese 100 340 Kranji-SNG BBC

9585 FAMILY RADIO 1400-1500 UT Vietnamese 100 225 Paochung-TWN WYFR

The latter of course banned from HFCC, so NHK may not know it exist, only the listeners trying to sort out the three signals.

(Glenn Hauser-OK-UDA, dxld DXindia May 14)

New spring time PDF-file at WRTH website:

<<http://www.wrth.com/files/WRTH%20A10%20May%202010.pdf>>

WRTH Summer schedules file available to download, free of charge.

The WRTH Editorial team is pleased to announce that the Summer season broadcasting schedules file is now available to download free of charge from the WRTH website - click on <<http://www.wrth.com>> and follow the link "Latest PDF Updates".

The file is in PDF format (you will require the free Adobe Acrobat reader, v6 or above to open this file. If you do not have the Acrobat reader, please visit <<http://www.abobe.com>> to download and install it). The 100 page file is just over 400kB in size and contains the following information:

Summer / 'A' Season broadcasting schedules for well over 200 international and Clandestine/target stations; Frequency listing of the above stations to facilitate band scanning; Broadcasts in English, French, German, Portuguese and Spanish and International DRM broadcasts.

Please feel free to pass this information on so that we may reach as many SWL's, DX-er's and professionals as possible.

For contact details, transmitter sites and much more, please refer to the printed WRTH, which is available to order from the website.

We hope you find this a useful accompaniment to the printed WRTH.

On behalf of the publisher and editorial team at WRTH, happy listening!

(wb, wwdxc BC-DX TopNews May 22)

BELARUS Radio Belarus on-air time schedule puzzles me still.

\* see below. Noted signals this morning May 20th at 1000-1100 UT on 6010 6040 6070 7235, and 7280 kHz too.

Belarus seemingly schedule in A-10 season at 0300-0800\* UT and 1500-2100 UT. 7265 missed on May 16th again. In 0300-0800 UT slot noted 6010 6040 6070 7235, and best on 7280 kHz. 6040 and 7280 still on air at 0806 UT.

Nothing on 6115 kHz anymore.

(wb, wwdxc BC-DX TopNews May 16/20)

(Carlos Goncalves-POR, wwdxc BC-DX TopNews May 24)

BHUTAN Broadcasting in Bhutan. Bhutan Broadcasting Service (BBS) on 6035 kHz SW.

The 30 kW replacement transmitter at Sangaygang was regularly heard throughout Bhutan, although with many breaks. The 100 kW transmitter awaits repair by an Engineer from India. Heard in Bhutan at \*0000-0050 and 1019-1240 UT, Apr 22-27, with many attempts to get on the air with the usual programmes of a Buddhist Morning Mass, Dzongkha talks and national songs. Heard // 88.1, 96.0 and 98.0 FM. I took photos of the BBS Studio building and SW transmitting antenna.

BBS TV was studied at Phuntsho Pelri Hotel in Thimphu where I stayed. They signed on at 0000 UTC with a long Buddhist morning prayer similar to the broadcasts heard on FM // 6035 kHz, but not in parallel. On the screen was shown repeated films from a beautiful Bhutanese landscape with a temple and white monkeys. At 0030 an elderly Monk was seen reading the Tibetan texts in front of an audience of about 200 males and females sitting in rows on the floor. It ended at 0058 when a short religious dance was seen, followed by the morning news in Dzongkha.

This four star hotel offered satellite TV also with BBC World News in English, National Geographics, A Planet, Cartoon Network, Channel News Asia in English - and 53 Indian TV-Channels ! The diplomatic relations with China are very chilly, so no Chinese TV-programme was relayed!

Most better hotels offered access to the internet and in the biggest cities were several private Internet Cafes. (Petersen)

CHINA Lots of Firedrake jamming stations heard from China mainland tonight.

In 1900-2000 UT slot noted by quick check the channels  
7260 7355 7435 9355 9455 9865 9875 9905 11700 11785 13625[latter S=9+20dB]  
kHz  
were covered by unwanted signals occupation.  
(wb, wwdxc BC-DX TopNews May 24)

Are you referring to the traditional music-only jammers, or are some of these CNR1 network audio jammers, which are not music-only? I don't hear much of either during that time period, but it's unusual for Firedrake to be on some of those inband frequencies when I do hear jamming, e.g. 11785, around 1300 always with CNR1.  
(Glenn Hauser-USA, dxld May 25)

Firedrake traditional music noted only last night May 24th, as CHN jamming against US RFA. Chinese music type like Firedrake music 1-2 years ago ...

This morning May 25th the usual word-talk Chinese-only jammers in ECHO format appeared again.

CHINA Mainland jamming in A-10, Echo jamming, but Firedrake modes when marked. Times approximate.

(wb, wwdxc BC-DX TopNews May 25)

COSTA RICA [and non] 9630 REE relay, May 22 at 0530 UT Spanish conversation, // much weaker 5965 and 3350 kHz, so all three transmitters are on in analog now. Suspect 9630 kHz may be the new unit accounting for DRM tests earlier circa 15170, 17850 kHz.

(Glenn Hauser-OK-USA, May 23)

9630 Radio Exterior de Espana en DRM,

En este momento con una excelente senal estoy escuchando a Radio Exterior de Espana en DRM por los 9630 kHz, en // con las senales analogas de 6020 y 9535 KHz. Mas en <<http://dxdesdecolombia.blogspot.com/>>

[later] Presumo que la senal se origina desde Costa Rica; esta transmision no figura en el esquema de publicado a traves de la pagina de la organizacion en

<[http://www.drm.org/index.php?p=broadcast\\_schedule](http://www.drm.org/index.php?p=broadcast_schedule)>

(Rafael Rodriguez-CLM, condiglist yg via dxld)

So this confirms our suspicions that DRM is now up and running from the Costa Rica relay. In fact, REE has now registered one transmission in DRM via Cariari, 9625-9630-9635 kHz at 00-02 UT, 100 kW at 340 degrees to Mexico, Central America, Caribbean, eastern and central USA.

But not 15170 or 17850 kHz where I previously heard DRM. This is bad news for CBC Northern Quebec and its listeners on 9625 kHz; but then the Canadians have not even objected to WYFR on 9625 itself until 1300 UT.

(Glenn Hauser-OK-USA, dxld May 23)

9630drm REE Cariari is indeed running their new DRM transmitter on 9630

kHz, and how! Supposedly scheduled only at 00-02, but May 24 at 2351 tune in, it's already on covering at least 9625-9635, goodbye CBC NQ. Next check 0128, the DRM so strong it's audible all the way from 9620 to 9655!

DRM Consortium claims the bandwidth is strictly 'only' 10 kHz, dropping off sharply above and below that range. It probably would have been detected below 9620 if it were not for some strong AM signals there unlike the 9650 area. DRM is doubtless spreading to 9620, where it interferes with: REE direct from Spain!! Way to go.

The new DRM transmitter is still not functioning properly when in the AM mode (presumably this is the one, unless they still have the old one operational for a total of four now). May 25 at 1315 UT, very strong 15170 kHz has continuous crackle, which also produces the spiky spurs, this time audible depending on modulation peaks, roughly plus and minus 70 kHz, 15100-15240 kHz.

(Glenn Hauser-OK-USA, dxld May 25)

CUBA RHC in Spanish at 2220 UT May 24, 15370 S=9+20dB and two spurious on 15335-15341 / 15404-15408 kHz. 15380 S=7-8. 12030 S=7, speech to the crowd and accomp echo, words heard 1 second later underneath as repeat.

17705 2230-2300 UT in Guarani, S=4 towards Paraguay.

9640 S=9+10dB signal of Spanish program "Mesa Redonda" from La Habana, nx on CLM, BOL, PRU, MEX etc. at 2344 UT May 24. // 6000 kHz at S=9+20dB level.

(wb, wwdxc BC-DX TopNews May 24)

15370 - the RHC transmitter with the spurs in Spanish at 2100-2300 to Europe, is also on the previous hour, 2000 in Portuguese, 2030 in Arabic, so May 21 at 2042 UT I find its main whiny spur on 15409.5 kHz and a weaker one JBA around 15330.

At 2045 in Arabic mentioned Maximo Gomez, one of the original revolutionary figures who would later have a clandestine channel of La Voz del CID named for him. BTW, it should have been La Voz \*de\* CID as there was nothing masculine about it (Cuba Independiente y Democratica). But they were probably trying to evoke El Cid. A recent report from Cuba says CID is active in the DentroCuban opposition, but we wonder if it's now only a sham.

12060, DCJC pulsing at the rate of 4 times per second, fading in and out, the second harmonic of one of the jammers on 6030 against R. Marti but which?

5040, RHC missing at 0140 May 22, tho Rebelde 5025 was good as usual. On the DX-398 with reel-out antenna and AC power, I could hear RHC English weakly on 5070, so it took the huge signal on 5970 to produce such an image on this receiver; nothing else 900 kHz below other 49m frequencies was audible.

6000 also in English at 0149, but much weaker signal and much weaker modulation than 5970.

9580, supposed to be CRI Chinese via Habana, big open carrier with hash, no intelligible modulation, May 22 at 0205, and putting like hashy spurs

on 9570 and 9590 kHz just like the same transmitter does in the mornings, whether modulated or not, when on 9570, QRMing Australia on 9560 and 9580 kHz.

(Glenn Hauser-OK-USA, dxld May 20)

EGYPT 15800 This Morning May 23 observed Radio Cairo's General Arabic service to Africa one hour earlier from 0600 UT onwards May 23. Scheduled 0700-1100 UT. Suffered a little bit by co-channel Radio Sofia Bulgaria in Spanish 0600-0630 UT.

(wb, wwdxc BC-DX TopNews May 23)

And today I noted the presence of Radio Cairo in Arabic on 15800 kHz from 0600 UTC (x0700 UTC), with Radio Bulgaria in Spanish to 0630 UTC.

Coordination of Radio Cairo is 0700-1100 UTC, without comment ... that from April 30 will be 0600-1000 UTC. According to the program to cover a signal should not be a problem between the two stations - Radio Bulgaria and Radio Cairo. Coverage of Radio Bulgaria is stronger than that of Radio Cairo with 20 dB. Interesting what is the situation in Germany. I expect very soon and additional information from Spain.

(R BULGARIA, Ivo Ivanov, May 25)

Re 15285 Radio Cairo, Egypt.

Has something to do with DST in Egypt from April 30 ?

<<http://www.timeanddate.com/worldclock/city.html?n=53>>

<<http://www.timeanddate.com/worldclock/timezone.html?n=53>>

EGYPT [probably] 15285 Ahead of CNR/CRI jamming against BBC Kranji Mandarin co-channel, another strong Arabic HQ station noted with medium S=9 signal at 1505-1515 UT. Seemingly R Cairo Abu Zabaal, which scheduled later at 1600 UT. May 22.

1330-1530 on 15040 ABZ 100 kW 070 deg to WeAS in Farsi  
1430-1600 on 15065 ABZ 250 kW 070 deg to WeAS in Pashto  
1500-1600 on 15780 ABZ 250 kW 050 deg to CeAS in Uzbek  
1600-1700 on 15285 ABZ 100 kW 160 deg to EaCeAF in Afar  
1700-1730 on 15285 ABZ 100 kW 160 deg to EaCeAF in Somali  
1730-1900 on 15285 ABZ 100 kW 160 deg to EaCeAF in Amharic

(Roland Schulze-D and Anker Petersen-DEN, dswci DXW May 19)

ESTONIA Tartu Family Radio on 1035 kHz now 200 kW.

Switched On! It's happened, my friends! The transition from the 100,000-watt AM transmitter at the Tartu Family Radio station in Estonia to the new 200,000-watt AM transmitter has occurred. Now, more than 150 million people across this vast region which includes Western Russia, the Ukraine and Belarus can hear the Gospel of Jesus Christ in their heart language.

TWR Radio Partnerships Director John Summerville travelled to Estonia for this exciting event with TWR President Lauren Libby and WMIT's Jim Kirkland from the Billy Graham Evangelistic Association's radio station in Black Mountain, North Carolina. WMIT 106.9 The Light and its listeners partnered with TWR on the Estonia transmitter upgrade. In addition, many of you reading this today joined with us on this miraculous project (see JudyBlog post of April 29, 2009 "To Russia with Love").

Yesterday, John provided this brief update from Estonia: "Going out to the AM 1035 transmitter site, which is about 25 minutes outside of town [Tartu] along a single lane dirt road, we met Tom King and his team (Kintronics Labs, Inc. of Tennessee). Tom had just finished the conversion. Instead of 100,000-watts, the transmitter was now broadcasting 200,000-watts. We had a ceremony of flipping the switch, and we prayed."

For an inspiring report of this praiseworthy event, go to <[www.twr.org](http://www.twr.org)> and listen to TWR President Lauren Libby and WMIT's Jim Kirkland describe this grand occasion.

LW DLF Donebach 153 kHz 500 kW is off on regular annual maintenance May 25 to May 31, approx. 0515 to 1900 UT daily. (DLF, may 25)

GREECE BrDXC-UK ng meldet: Filia Radio 11645 kHz. Filia Radio announcer, Angelika Timms, said at the end of the English programme of Filia Radio at 0555 UT this morning (19 May) on 11645 kHz that the programme would not be back until Friday because of the general strike in Greece tomorrow (Thurs 20 May). Presumably this will affect all public service broadcasts in Greece.

I tuned in half way through Filia Radio's English hour on 11645 kHz at 0530 UT, so thought at first it was a new frequency for BBC WS as was relaying BBC WS news ( // 648 9410 kHz) then a "World Today" ID before reverting to mix of pop and news items read by Angelika Timms. Similarly at begining of French programme at 0600 UT on 11645 kHz it carried a relay of RFI news.

(Alan Pennington-UK, BrDXC-UK May 19)

Morgen[May 20] ist Generalstreik in Athen. Auch Filia Radio auf 11645 kHz ist mit dem deutschen Programm betroffen?

11645 9420 15630 kHz. Um 0800 UT gab es ein Einheitsprogram auf ERT5 VoGRC und Radio Filia, mit Wortmeldungen und viel Musik. Kein Programm in deutscher Sprache.

<<http://tvradio.ert.gr/radio/liveradio/voiceofgreece.asp>>

Delay. Das 9420 Programm und der Livestream im Internet differieren um 27 Sekunden.

(wb, wwdxc BC-DX TopNews May 20)

GUINEA 4900 Our station Familia SW just began broadcasting intermittently at the end of March. We had some equipment challenges and we have them repaired a week ago and now we can now have nightly stabile broadcasting. We are using what is called Low Power Short Wave. We use a 1000 watt transmitter built by HCJB Radio in the US. As far as I know there are only 3 stations like this in the world. The specifications say that our strongest signal would reach a 400 kilometre circumference around the antenna at midnight. We are using an antenna that is 40 meters X 60 meters - most being buried in the ground and reflecting upwards. It is a unique design.

Our goal is to broadcast in the languages of the country we originate in. That would be French, Pular and Maninka for the beginning. We are beginning from 6pm to midnight during our beginning period. There is no electricity where we are located, so we are using solar and wind generators. Having enough energy for our transmitter and air-conditioner is proving one of our larger challenges.

Thank you for letting us know we are being heard "out there". Mme Colette Baudais, Directrice Generale Familia FM.

(via Jari Savolainen-FIN, DXplorer, May 17)

4900v Sehr schwaches Signal aus Guinea gestern abend um 2205 UTC auf 4899,98 kHz. Bei der Afro-Musik ging's noch einigermaßen, aber bei den Wortbeitragen war gerade mal Maennlein von Weiblein zu unterscheiden - Sprache erkennen genauso unmöglich wie eine eindeutige ID. Dazu kamen noch Splatter vom Chinesen auf 4905 kHz.

(Patrick Robic-AUT, A-DX May 23)

GUINEA 4900 Familia FM, Conakry, 1937-2226, 21 May'10, Vernacular, Afr. songs,..., tradit. music, talks, interviews running at 2200, no news at 2210; 15332, better at 2200+, with a strgr. QSA. it was found much better the next day, 22nd May, at around 2200.

7125 R. Guinee, Sonfonya, 2133-2152, 21 May'10, Vernacular, talks; 35444. Sole audible BC stn 7100-7200.

(Carlos Goncalves-POR, wwdxc BC-DX TopNews May 24)

INDIA [Darjeeling, Sikkim, Bhutan] DXpedition to Eastern Himalaya  
On April 16-27, 2010, I joined the first Danish guided tour by the Albatros Travel to visit Eastern Himalaya with stays in Darjeeling and Kalimpong (West Bengal, India), Gangtok (Sikkim, India) and Puntsoling, Thimphu, Punakha and Paro. (All cities in the Kingdom of Bhutan).

With stays at hotels in these seven cities, I was able to monitor the broadcasting situation in this remote area. My receiver was a portable Sangean ATS909 with a whip antenna, often supported with an eight metres longwire put out of the window for shortwave (SW) reception.

Daylight SW reception

Band scans at 0200-1200 UTC in Darjeeling, Gangtok, Thimphu, Punakha and Paro.

Only audible stations on 60 mb: SINPO

(Karel Honzik-CZE, wwdxc BC-DX TopNews May 23)

KUWAIT 17550 surprised to hear some ME music here at the late hour of 2240 UT May 16, soon followed by Arabic including ID for Kuwait. Good but with deep fades from S9+10 peaks. Mostly talk afterwards; at 2300 recheck still in but much weaker with flutter, 2301 ID again and music, program theme followed by more talk. Last check as 2326 UT could still detect the carrier.

17550 is another new frequency, scheduled 2000-2400 UT at 350 degrees for western and central USA, e.g. OK! A daring idea, considering it's the nightmiddle from the originator, but obviously somewhat successful and should get even better with a little help from the sunspots and as Solstice approaches making the transpolar path mostly lit.

17550 is missing from Aoki and WRTH Update, but it was in dxld and EiBi has it. The first semihour should clash with VOA French via Bonaire eastward, which I happened to tune across earlier and did not notice any co-channel.

15540 May 17 at 2058 UT just in time to hear R. Kuwait signing off in English still claiming to be on 11990! 2059 UT brief NA by military band, finished in time for accurate 5+1 timesignal to 2100 UT as checked against WWV. (One has to do that since so many other SW services broadcast inaccurate timesignals and think nothing of it.) And into news theme, Arabic news for a minute or so // 17550, the Arabic-only frequency for C&W NAM, then 15540 cut off while 17550 kHz continued. By 2211, however, the latter had faded to quite weak and fluttery between S3 and S9.

15540 R. Kuwait, May 18 at 2058 just caught sign-off announcement for "11990", timesignal 2100 UT and a bit of Arabic news before cutoff. Poor signal today, while 17750 kHz Arabic to NAM was JBA and still so at 2134 UT.  
(Glenn Hauser-OK-USA May 20)

LIBERIA Star Radio re-activates its SW service on 4025 kHz.

4025 Liberia's Star Radio reactivates its shortwave service.

The Management of Liberian station Star Radio has announced the re-activation of its shortwave service in the Country. Station Manager James Morlu says the station has begun test transmissions on 4025 kHz. Mr Morlu said he believes that, as the country strives towards its recovery process, it's prudent to have a viable information dissemination channel like shortwave.

The Star Radio Station Manager was speaking as the UN Refugee Agency UNCHR symbolically transferred assets to several of its partners in Liberia including Star Radio. Mr Morlu hopes the three motorcycles provided to Star Radio will help enhance the work of some of its correspondents, but said more was needed.

<<http://www.starradio.org.lr/content/view/15968/380/>>

(Star Radio; via Andy Sennitt-HOL rnw mn May 23)

4025 Wanted to let you know that Star Radio is conducting tests on 4025 kHz. The transmitter I built is small, 2500 watts, but I tried to make up for it with antenna gain, as they had specific areas they wanted to cover. I didn't have to go to Monrovia, because the whole transmission system was designed as a "kit". They all came to the factory and I took them step-by-step thru the transmitter install, tower erection, and tuning the antenna system.

Here are the details of the system. The transmitter is a Solid State Class E modulated via a Pulse Width Modulator. Power out is continuously adjustable from 0 to 2500 watts. The antenna is a "Bow-Tie" dipole, fed with Open-Wire Line, and a Link-Coupled Antenna Tuning Unit. Antenna height is approximately 50 feet. It was to be oriented broadside East / West. I don't know the exact Geo coordinates. I'm going to get on the site and look for reports on Star Radio. Please tell everyone I said Hi, and thank them for the reports. Talk to you later.

(Jamie Labadia-USA, dxld May 23)

MYANMAR 7200.0 Myanma Radio, ex:7185.75v, 1322 UT on May 25. In

vernacular; at 1330 UT became // 5915 kHz and the start of lectures provided by the Minorities and Distance Learning Services. Much better audio than former frequency, as this only had one audio feed, instead of two different audio feeds at the same time, which I assume was due to former frequency being from Yangon and 7200 kHz being from Naypyidaw; fair, but pre-1300 Korea dominates. I know Myanmar operates this frequency during other time periods, but this is the first time I have heard them here!

May 24 was the first day that 7185.75v kHz was missing.  
(Ron Howard-CA-USA, dxld May 25)

NIGERIA Voice of Nigeria, 15120 kHz, dicht an SIO 555, 15:48 UTC  
(Nils Schiffhauer-D DK8OK, A-DX May 20)

15120 VoNigeria noted today 1500-1600 and 1800-1900 UT, also Arabic at 1730-1757 UT. Latter in different direction of probably Saudi Arabian peninsular, NE/ME. Only much fluttery S=7 signal into southern Germany. TX cut off midst on progr at 17.57:50 UT.

But came on air again with different more powerful signal of S=9+20dB at 18.02:54 UT, midst on nx in English, newsreader in progress.

PAKISTAN 9340 Radio Pakistan Hindi service was monitored in Lahore today at 9340 kHz from 1045 UT. The signal was poor at the start of transmission, SINPO was 15111, was barely audible and the transmitter hum was higher than usual. At 12:24 UT [sic] the signal strengthened and attained SINPO of 55555 within a few minutes and transmitter hum disappeared. Such a strong signal is quite unprecedented for API-3 transmitter which is more than 40 years old. The signal remained stable at SINPO of 55555 till commencement of Gujrati service at 1145 UT on the same frequency and remained strong till close of Gujrati Service at 1215 UT, May 15.

(Aslam Javid-PAK, dxld May 15)

11575 R Pakistan Islamabad distorted signal of Urdu service 1330-1530 UT, at 1520 UT S=9+20dB.

(wb, wwdxc BC-DX TopNews May 22)

Pakistan's PBC launches emergency coverage.

The Pakistan Broadcasting Corporation (PBC) has begun emergency coverage from an area in the north of the country where a lake could overflow, the Daily Times reports.

Attabad Lake was formed when landslides blocked a river in January.

Officials have said it could overflow within the next week.

The PBC control room in Hunza has set up a hotline to pass on timely and accurate information about latest developments.

A PBC official said the control room would coordinate with civil and military authorities engaged in relief and rescue efforts.

He said Radio Pakistan also planned to install a transmitter in the area on an emergency basis. The transmitter, meant for the live broadcast of news from the area, would be operational in a day or two.

"Radio remains an effective medium for people of this far-flung area after their displacement due to the lake formed by the landslide and it keeps them informed about latest happenings," the official said.

(ABU, Asia Pacific Broadcasting Union, May 21)

PAPUA NEW GUINEA I can receive it today now, likely New station of Papua New Guinea.

UnID station in English and Pidgin? seeming to be Pacific station on 5960 kHz from May 18 at +0930-1100 UT (blocked out on CRI 5955 kHz) with

received by many Japanese DXer. However, this frequency neighborhood is polluted by the jamming from North Korea. After Urumqi on 5960 kHz s/off of 1800 UT, I can receive non-stop music station seeming to be the same station, QRMed on VoTurkey.

Audio file: May 20 at 0900 by Taku in Akita  
<[http://ani.atz.jp/DX/mp3/20100520\\_1800\\_1805\\_5960kHz.mp3](http://ani.atz.jp/DX/mp3/20100520_1800_1805_5960kHz.mp3)>  
(Sei-ichi Hasegawa-JPN NDXC, May 22)

5960 Unidentified. Tuned in at 2320 to hear traditional island music. In fact, the entire program was local music, except for the one pop song, "Kokomo" by the Beach Boys. Scant talk by English-language woman announcer, in fact I only heard two talk breaks prior to 0000: one at 2340 and another at 2352. Difficult to copy, as she was soft spoken and the station was suffering deep fades (all daylight path between my QTH and PNG). Hoped for a clue at 0000 UT but I didn't hear the expected NBC National News theme. In fact, it seemed to go across top-of-hour with no ID but it could have easily been missed during fade.

Have to think this is NOT a second frequency for Wontok Light. Can't see that station running a secular format on a local Sunday morning. Also, for what it's worth, this station has the NBC "sound." Strangely, I have heard the same Beach Boys song on many NBC regional stations perhaps it's one of a few "approved" pop songs for their playlist? Anyway, if I had to place a bet, I'd wager it IS the NBC and probably in the Port Moresby area. Late morning reception also indicates it would probably be running around 10kW. Reception of this strongly correlates to midday reception, years ago, of the now-defunct NBC 9675 outlet. 22 May.  
(David Sharp-NSW-AUS, dxld May 23)

Radio Fly, in Tabubil. 24 hrs. on 5960 kHz PNG. Probably I think that it is this station. Cf. DXLD 2004 4-150  
(Sei-ichi Hasegawa-JPN NDXC, dxld May 22)

[later] I have seen "Radio Wai", and also "Radio Fly." I think it is "Radio Karai" (which is the name of the NBC national service). Looks like this one may need a little more work.  
(David Sharp-NSW-AUS, dxld May 23)

As of May 24, many Japanese DXer watched 5960 kHz. I received Radio Fly on 5960 kHz at +0845-1058(B/out) UT on 5960 kHz. The Pops DJ program title is "Super Hit program" by male, station jingle and ID as "103.8 FM Radio Fly". It seems that community FM of Radio Fly started SW newly. First noted on May 18 at 0920 UT.

Audio file: at 0958 UT on May 24 by Noda  
<[http://nodatec.air-nifty.com/blog/files/100523\\_1858\\_5960.mp3](http://nodatec.air-nifty.com/blog/files/100523_1858_5960.mp3)>  
(Sei-ichi Hasegawa-JPN NDXC, dxld May 24)

Reply from David Sharp (NSW Australia):  
So, it is a community broadcaster! Good work on the ID, as 'Radio Fly' and 'Karai' can sound similar (at least to my ears). More info from the Radio Fly website:

Radio Fly is a community radio station which is funded and operated by Ok Tedi Mining Limited. It provides a vital community information service to isolated areas of the North Fly region, parts of West Sepik, the rest of

Western Province and some areas along the border of West Papua. It broadcasts in English and Tok Pisin. The isolated location of Western Province means that access to mainstream media is very limited, but Radio Fly fills that void.

The station is vital for the Community Mine Continuation process, informing villages of visits from community relations officers, and keeping them apprised of the environmental conditions and mine activity. A large chunk of the programming is focused on health and education messages as well as sustainable development, which is a topic very close to the listeners' hearts.

As well as playing a wide range of music and entertainment, Radio Fly serves as a medium for dissemination of relevant information. The Tok Save (announcement) service is widely used by people all over the province, to announce social and business gatherings such as government visits, sports meets, women's training sessions, weddings, funerals, and workshops.

Legal, health, farming and business-oriented programs are widely heard, and children's and religious shows are very popular with regular listeners. Volunteers with a particular interest often come into the studio to present their own programs, and there is a three-times-daily news bulletin, which covers local, national and international stories. The Fly Weekly Top 10 Hit Parade is a compilation of the most popular requests and dedications of the week...

(David Sharp-NSW-AUS, dxld May 24)

New PNG Shortwave Operation Audible on 2 Frequencies.

Radio Fly, a community FM broadcaster funded and operated by Ok Tedi Mining Limited in Papua New Guinea is now being heard here on 2 shortwave frequencies - 3915 and 5960 kHz. Japanese DXers first reported the latter frequency on 18 May.

Noted here in the evening at 0800 UTC. Both frequencies provide poor to fair reception, not helped by above average atmospheric static levels. The 75 metre band frequency additionally suffers from radio amateur QRM at times.

I have also heard Radio Fly 5960 kHz at 2000 UTC, through co-channel China Radio International.

I received a quick email QSL from evening announcer Jobby Paiva. He is on the air between 6pm and 10pm PNG time (0800-1200 UTC) and he says he will provide updates on Radio Fly via his blog (easily located by a Google search).

(Bryan Clark-NZL, DXplorer May 25)

One source at Radio Fly told me some time ago that these shortwave transmissions started early May. He said there are two transmitters on sw, one at Tabubil and one at Kiunga. He didn't specify which site is on 5960 and which on 3915 kHz. I wonder what output power these transmitters are?

[later] I got recently some more info about Radio Familia 4900.

The sw transmitter is located some 400 km inland from the capital, Conakry. They stream the audio from Conakry online to Canada and from there up to satellite and the audio is picked

up at the tx site. SW is scheduled 1800-0000 but if solar/wind power lacks, they may sign off earlier. Plans are to add more wind generators and extend broadcast hours 1800-0300.

(Jari Savolainen-FIN, DXplorer May 26)

PHILIPPINES 6170.39 PBS Radyo Magasin - DZRM (possibly); 1239+1353 UT, May 14. Recently have been checking here when RNZI is not on. Today had the strongest carrier yet, but still no audio. It also helps now that CNR-1 is off the air on 6175.0 kHz.

(Ron Howard-CA-USA, dxld May 20)

SAUDI ARABIA 17785 BSKSA Riyadh "early pre-French piece" in English at  
0752 til 0800 UT, May 25. S=9+5dB towards WeAF. Featured presented from  
the press "donation of the Kings family..." at 0755 UT, and En final  
anncmt at 0757 UT. Exact time signal at 0800 UT, French section start.  
(wb, wwdxc BC-DX TopNews May 25)

Observed different use of 9715 and 11785 kHz:  
May 11th: 0300-1455 UT feat. from 0955 UT with "Bzz" on 9715 and 11785 kHz  
was silenced and 17615 kHz not in use. Also with "bzz" was 15380 kHz at  
1230 UT.

May 12th: 1100-1200 UT on 17615 kHz with "bzz" and "bzz" spurs on +/-18  
kHz on 17597 and 17633 kHz heard. At 1050 UT on 11785 kHz was on the air  
clearly and 9715 kHz was only till 0955 UT on air. All above prgrs were  
with "Qoran Qerim Prgr" (as they called Holy Quran).  
(Rumen Pankov-BUL, wwdxc BC-DX TopNews May 17)

13710 Wunderliche Modulation: BSKSA Riyadh 13710 kHz.

Manche BSKSA-Sender sind ja beruehmt fuer ihre wunderliche Modulation. Der  
auf 13710 kHz machts ganz drollig und sendet gleich drei Traeger:  
13710 kHz (maessig verbrummt) und plus/minus 5360 Hz, die jeweils  
frequenz(?)moduliert sind. Mal eine Abwechselung nach dem asymmetrisch-  
kaputten Signal.  
(Nils Schiffhauer-D DK8OK, A-DX May 19)

SLOVAK REP 9740/10000/9480 kHz Miraya to Sudan in Sudanese Arabic til  
0600 UT.

9480 Zacharias Liangas in Thessaloniki Greece also noted symmetrical 9480

spurious signal, til 0600 UT May 18.

Miraya on 3 freqs!! Tnks to Wolfgang Bushel I found today May 18, that Miraya FM could be heard on 9480 (QRMed by another) // 10000 (clear at S9) in // to main 9740 kHz (S=9+10) on 04xx UT. Please notice that my computer is still out of order.

(Zacharias Liangas-GRC, wwdxc BC-DX TopNews May 18)

May you can inform the colleagues in Rimavska Sobota transmitter station, that fair spurious signals on 9480 and 10000 kHz are widely heard in all Europe mornings of fundamental 9740 kHz outlet to Sudan til 0600 UTC. (wb to Mr. Cip, May 17)

Yes, I will certainly let know my colleague Edita to have a look into the problem of the spurious radiation from Rimavska Sobota.

(Friendly greetings, Oldrich; HFCC May 18)

IRRS Milano spurious ... mit lauter ID auf 10.000 kHz, abgeschaltet um 0600 UTC. Mischprodukt? Oder sahen die vier Nullen so schon auf den Knibbelschaltern des Sendeoszillators aus?

(Nils Schiffhauer-D DK8OK, A-DX may 18)

SOLOMON ISLANDS 5019.96 SIBC at 1153-1201 UT on May 25. Pop mx pgm hosted by YL in English; final comments at 1158 UT, followed by closedown anmt and anthem at 1201 UT. Fair.

(John Wilkins-CO-USA, DXplorer May 25)

SOUTH AFRICA 4880 Surprised to find Channel Africa on unscheduled 4880 kHz last night at 2230 UT in Swahili (I think) followed by French at 2300-2355 and English from 0000 UT (i.e. the same sequence of languages they carry in their scheduled broadcasts). Couldn't stay awake to check further into the night! Fair strength signal on a clear frequency with moderate fading here - SIO 353.

Channel Africa is not scheduled on their own or Sentech's website at this late hour. Meyerton does use 4880 of course for SW Radio Africa but earlier in the evening.

Wondered if this was just a test or maybe Channel Africa is extending broadcasts with the World Cup in South Africa approaching in June?

(Alan Pennington-UK, BrDXC-UK May 17)

TAJIKISTAN 7245.016 Voice of Tajik, 1100+ UT. Hindi with talk by a woman and fantastic Central Asian music. Brief silence at 1200 UT and into Arabic. General comments by a man, some music, then talk by a woman from 1210-1220 (news?). Fair at 1100 but fading up nicely for 1200 program. Again, lots of fantastic local music. Sadly, absolutely KO'ed by CNR-2 at 1300, HOWEVER, I could hear snippets of English during quiet periods of CNR's program. Prior to 1300, this was about S=9+20 (S=9+30 on peaks), so it would get out if China wasn't co-channel. With fewer stations on the air, I'm amazed at how many train-wrecks we still see on HF, many of them the result (in my opinion) of poor frequency planning by Chinese (and other) broadcasters. 24 May.  
(David Sharp-NSW-AUS, dxld May 25)

TANZANIA 11735 Nach den Planungen fuer die Wintersaison haette die SAUTI YA TANZANIA ZANZIBAR abends auf 11735 kHz ungestoerter hoerbar sein. Tatsaechlich ist der Sender auf 11735 kHz seit Anfang Dezember 2009 ausser Betrieb. Am 10. Dezember 2009 wurde das Seekabel, das Strom vom Festland nach Sansibar fuehrt, unterbrochen, und noch ist unklar, wann es repariert oder ersetzt wird. Das Kabel wurde 1975 verlegt und sollte eine Lebenszeit von 25 Jahren haben, so dass es zehn Jahre laenger gehalten hat als erwartet.

Derzeit betreibt die Stimme Sansibars mit Notstromgeneratoren die Mittelwelle 585 kHz und die UKW-Frequenz 97.4 MHz. Die Kurzwellenanlage in Dole, etwa 10 km nordoestlich von Sansibar City, wird erst wieder auf Sendung gehen, wenn die regulaere Stromzufuhr gewaehrleistet ist (ibid., ADDX Kurier 4-2010)

THAILAND 17655 Radio Thailand in English via Udorn Thani site, 0530-0600 UT May 23, S=7-8 in Germany, meant to Moscow Russia and Scandinavia target. Featured food and spicy rice, nx at 0548 UT. Migration of Thai mobile workers in maritime sector, ID at 0551 UT, Thailand in prospect. Muslim community in Thailand, took part on Muslim World conference in Dushanbe Tajikistan. Efforts to create a Palestine state in Palestine, Gaza and West Bank. Thai Airways celebrate 50 years air traffic with Hong Kong target.

From 0558 UT Udorn signal suffered by s-on 500 kW powerhouse of Kashi-CHN on adjacent 17650 kHz.

(wb, wwdxc BC-DX TopNews May 22)

UNID 7370 Unidentified 860 Hertz tone transmission noted May 22 at 1600-1730 UT, but from 1730 til 1754 UT only 'empty' carrier. What a waste of main power. Seemingly Grigoriopol-MDA transmission, equal level of accompanied co-channel IRIB Kamalabad in Turkish, which sound could well separated from Hertz tone procedure. 7410 AIR was much, much weaker, so I guess no AIR sound could be heard here on 7370 on this time span.  
S=9+10dB.

15545\* UNID S=6-7 at 1525 UT, May 22.

(wb, wwdxc BC-DX TopNews May 22)

\* 15545, poor at 1318 UT, // 16100 kHz. Nothing to jam in the April 26 edition of Aoki, but V. of Tibet likely upshifted from 15540 kHz, via

Tajikistan at 1300-1400 UT in Tibetan and Chinese.  
(Glenn Hauser-OK-USA, dxld May 22)

UNID 15105 not traced any ID of this English language station at 0615 UT, S=3 poor here in Germany. Some Horn of Africa / Saharan music? Left the air around 0658 UT. Some Sudan Sunday special ? No //s found on BBC Africa Sat/Sun specials. Ascension outlet ? Spurious ?  
(wb, wwdxc BC-DX TopNews May 23)

UK Dear Listener, UK Rocks The World will be back on the air on Sunday 16th May at 1500 UT. Frequency: 15760 kHz. Target Area: North America (but reception reports worldwide gratefully received) Please tune in and record MP3's of your reception. We look forward to receiving your feedback.  
ENJOY!!!  
E-mail: <ukrockstheworld @ gmail.com>  
The UK Rocks The World Team (Tom Taylor-UK-USA, May 13)

Nice signal in Buenos Aires, Argentina. QRK=3, I'm listening "Yoshua's tree" by U2. (Arnaldo Slaen, hcdx May 16)

UKRTW 15760 - Already on air when I tuned in at 1459 UT, blasting here, 59+20db, site?  
(Alokesh Gupta-IND, dxld May 20)

Started at 1457 UT almost immediately after carrier appeared. It's a poor and fluttery signal at my location in NW England.  
(Noel R. Green-UK, dxld May 20)

I am hearing Rock music, no announcements, two numbers. I tuned in at 1501 seeing your report, Arnaldo. It's as strong as BBC or any other 444 with my log periodic beamed in the general direction of Europe. Will check more for an announcement. On the Sony ICF 2010 and just only the whip 100% readable 333 some fading. What is the power, via Skelton UK?  
(Victor Goonetilleke-CLN 4S7VK, DXplorer Feb 21)

Hi Victor, I guess Woofferton-UK, the back lobe 110 degrees goes towards Paris, Milan, Venice, Croatia, so minus 30 degrees is a fair S=6-7 signal here in southwestern Germany.

Similar action we had Radio Oeoemrang Amrum, Germany 15245 kHz, Wertachtal 500 kW at 1557-1700 UT on Feb 21 only. Also azimuth towards North America - CAN, ALS, USA, MEX. 73 wb df5sx JN48OR, DXplorer May 21

WOF - they have only zone 11 target gear, at 238 and 250 degrees azimuth. But I guess for such a more or less SINGLE private action you may use a back lobe of 108 or 120 degrees array, back towards 290 - 310 degree target. Such reflector curtain barrier array is NOT leak-proof in back direction. [I'll say! gh]

Two masts looks like in 348 degrees too:

<[http://maps.google.de/maps?f=q&source=s\\_q&hl=de&geocode=&q=+52%C2%B018%2744.29%22N+++2%C2%B043%2713.12%22W&sll=51.151786,10.415039&sspn=19.808511,57.084961&ie=UTF8&ll=52.313149,-2.716531&spn=0.002351,0.006968&t=h&z=18](http://maps.google.de/maps?f=q&source=s_q&hl=de&geocode=&q=+52%C2%B018%2744.29%22N+++2%C2%B043%2713.12%22W&sll=51.151786,10.415039&sspn=19.808511,57.084961&ie=UTF8&ll=52.313149,-2.716531&spn=0.002351,0.006968&t=h&z=18)>

History - BBC in 1995 year:  
7325 0000-0230 smtwfS Skelton 300 260 WSE AMERICAS C AM

7325 0000-0330 smtwfws Rampisham 500 300 WSE AMERICAS N AM

7325 0000-0330 smtwfws Woofferton 250 320 WSE AMERICAS N AM

9825 0245-0300 smtwfws Rampisham 500 285 BBC ENGLISH C AM

9825 0300-0345 smtwfws Rampisham 500 285 SPANISH C AM

9825 0345-0400 ..twfws Rampisham 500 285 SPANISH C AM

6190 0245 0300 smtwfws Woofferton 300 294 BBC ENGLISH C AM

But VT group Rampisham has a lot more arrays towards CAN/USA, Carrib. Skelton serves other parts of the world, but not Americas.

(wb, wwdxc BC-DX TopNews May 22)

S-9 +10 to +20 at 1513 UT, in Carrollton, Texas, USA (near Dallas).

Beautiful signal. Great music, too!

(Jim K5JG, dxld)

"UK Rocks the world" now on 15760 kHz, 1518 UT. Very good here in Sweden.

(Claes Olsson, Cumbredx mailing list via DXLD)

I just heard UK Rocks the world playing rock music at 1528 UT on Sunday, May 16, 2010 using a Sangean ATS 818ACS receiver and 100 ft Coax dipole antenna. Signal was good at my QTH in TN. Announcer female accent giving name of transmission, followed by email addy, inviting reception reports, off by 1601 UT. A Great catch on Sunday DXing.

(Noble West-TN-USA, dxld May 20)

15760, "UK Rocks the World" tested again Sunday May 16; did not check it here until near the end, 1555 with ID, more music; if there was any sign-off, I missed it since already gone at 1558 as I was comparing signal level to some other frequencies. 15760 was VG, somewhat stronger than Portugal 15560, about equal to Sackville/CRI 15220, and weaker than WHRI 15195.

The site continues to be confidential, why? Other reports of good but spotty reception in North and South America, Europe and South Asia, but Noel Green in NW England found it "poor and fluttery", i.e. in skip zone, make a UK site likely. And what's the point? There is not enough rock music already everywhere, including from the UK?

BTW, the correct spelling of the name is "UK Rock's The World". I know this because I see an e-QSL reproduced in May World DX Club Contact on page 22, from Greg Majewski, CT. So it really means, "UK Rock Is the World". The card also says Belfast UK, so it should really be UKOGBANI. (Glenn Hauser-OK-USA, dxld May 20)

15760 UK Rocks the World - Woofferton (?), \*1458-1558\* May 16, Opened with Tom Petty "Freefalling", numerous IDs and asking for reception reports to ukrockstheworld @ gmail.com Woman with slogan "more music, less talk". Off with final ID. Fair to good with fading.

(Rich D'Angelo-PA-USA, NASWA Flashsheet via dxld)

UK 11875 Die Suchmaschine hilft nicht weiter, stn ID nicht aufnehmbar: 11875 kHz ca 1900 UT mit relig progr in zuerst Westafrikanischer, dann einer in Mali gesprochenen Sprache, empfang O=4. Hast du eine Idee, wer das sein koennte?

(Dieter Krumbach-D DL5NFZ, May 21)

Da die Angaben zusammenpassen, handelt es sich wohl um Sendungen

DX-Camp dieses Jahr wieder in Doebrich!

Das DX-Camp des UKW/TV-Arbeitskreises und der AGDX hat letztes Jahr noch in Schwangau am Fuss der bayerischen Koenigsschloesser Neuschwanstein bzw. Hohenschwangau stattgefunden. Auf der AGDX Web Site sind hierzu zwei Berichte nachzulesen, einmal aus der Fachzeitschrift REFLEXION des UKW/TVArbeitskreises, und aus "Radio-Kurier - weltweit hoeren".

Auch dieses Jahr wird das DX-Camp wieder veranstaltet, allerdings gibt es

hier nun eine wichtige Aenderung:

Entgegen der fruerehen Meldung findet dieses DX-Camp dieses Jahr nicht (!)  
in Schwangau/Bayern statt, sondern dieses Jahr wieder

in Doebriach am Millstaettersee in Sued-Kaernten, Oesterreich.  
Der Termin bleibt gleich, 10. bis 25. Juli 2010.

Weitere Informationen hierzu ueber die Web Praesenz der AGDX:

<<http://www.agdx.de>> bzw.

auch ausfuehrlicher bei <<http://www.dxcamp.org>>

SOUTH AFRICA Radio RSA history. Former RSA German service presenter  
Norbert Taferner and his wife [both Austrian nationals] crashed on recent  
aircraft disaster in Tripolis Libya.

<<http://justrecently.wordpress.com/2010/05/14/obituary-norbert-taferner-1ae0-2010>>

Obituary: Norbert Taferner, 1940 - 2010, By just\_recently, May 16

Norbert Taferner, a retired South African civil aviation official, and his  
wife Paula died in a plane crash in Tripoli, Libya, on Wednesday. Norbert  
Taferner was known among amateur radio operators as ZS6ANL, and as a  
presenter of a technical media program on Radio RSA (now Channel Africa)  
in the 1980s and the early 1990s. Paula and Norbert Taferner were  
originally both Austrians. He reportedly took the South African  
citizenship some time since the 1960s while she remained Austrian. Irish  
author Bree o'Mara also died in the crash.

The only survivor, a nine-year old boy from the Netherlands, was scheduled  
to be flown back to the Netherlands today.

Responses to "Obituary: Norbert Taferner, 1940 - 2010"

1. Heidi Mueller Says:

Norbert was a dear colleague at Radio RSA.

More recently, we would speak at length on the phone once a year or every  
two years, but never lost touch completely - the last time was during his  
extended stay in Albania. He was loyal, which was much appreciated. He was

very modest also - only once in a while did one get a glimpse of his vast specialised knowledge.

I was greatly shocked at the news seen on TV by chance.  
My heartfelt condolences to his sons and families.

Thank you for commenting. I knew your name right away when I saw it in the commenter thread - I used to listen to Radio RSA as a teenager, and I learned the basics of antenna construction from Norbert Taferner's programs. He seemed to be a natural born teacher.  
(just\_recently, May 16)

... ich habe soeben die traurige Nachricht erhalten, dass Norbert Taferner und seine Frau Paula kuerzlich bei dem Flugzeugabsturz in Tripolis ums Leben kamen. Vielen hier duerfte OM Norbert noch gut als Redakteur des DX-Programmes "Kurzwellenreiter" beim deutschen Dienst von Radio RSA bekannt sein.  
(Mathias-Weber-D, A-DX May 22)

<<http://www.poertschach.net/zeitung.php?id=200409>>

Poertschacher im Ausland:

Diese Artikelserie will sich mit Poertschachern, die im Ausland leben beschaeftigen. Unlaengst wurde ueber das Internet Kontakt mit Norbert Taferner in Suedafrika geschlossen.

Norbert Taferner:

Norbert Taferner geb. 1940 stammt aus einer alten Poertschacher Familie. Vater Taferner war Moar auf der grossen Werzer Hube - heute Bauhof. In frueheren Zeiten hatte die Hube bis zu 30 Bedienstete und versorgte den Hotelbetrieb mit allen baeuerlichen Erzeugnissen.

Norbert Taferner besuchte die Poertschacher Volksschule und kann sich auf das Lehrpersonal Frau Slamnig, Oberlehrer Fratt und Lehrer Sunitsch noch gut erinnern. Nach seiner Lehrzeit bei der Pressefabrik Stossier verbrachte er fuenf Jahre beim Bundesheer in Linz-Hoersching.

Norbert Taferner ist 1965 nach Suedafrika gezogen und arbeitete dort zuerst fuer zwei Privatbetriebe, dann 28 Jahre fuer das Suedafrikanische Bundesamt fuer Zivilluftfahrt. Nach Umgestaltung verschiedener Bundesaemter wurde er 2001 pensioniert. Seine Frau Paula, geb. Queder ist auch eine Poertschacherin, die 1967 nach Suedafrika kam.

Nach der Pensionierung hat Norbert Taferner eine eigene Firma gegruendet, die spaeter zusammen mit einem Flugzeugbesitzer in eine KG umgewandelt wurde.

Sein eigentlicher Beruf ist Flugzeugtechniker. Im Bundesamt war er Betriebsleiter in der Flugzeugwartung, jetzt ist er Manager. Er hat seine Firma mit zwei Angestellten begonnen, nun sind es 20. Eine weitere Betriebsvergroesserung ist bereits vorgesehen. Norbert Taferner hat auch 13 Jahre freiwilligen Reservistendienst bei der Polizei geleistet und fuer 15 Jahre Rundfunksendungen produziert, die in Deutsch und Hollaendisch ueber Radio RSA fuer Europa ausgestrahlt wurden. Nebenbei unterrichtet er auch Piloten und Flugzeugtechniker. An Sonntagen ist er in der Kirche zu finden, wo er Bibelstunden abhaelt.

Norbert Taferner, der in Solheim, Germiston in Suedafrika wohnt, besucht Poertschach und seine hier ansaessige Familie oefters.  
(Mathias-Weber-D, A-DX May 22)

A well-known Russian DXer and prolific writer

Pavel Mikhailov, RV3ACC,

passed away in his down-town Moscow condo on May 23, 2010. The preliminary cause for his death is a heart attack. He was 63.

Pavel was a founder and long-time host of Klub-DX and other popular shows at the Russian World Service of Radio Moscow/VoR. Active in DX-hobby since 1960s, he arguably was the most famous DXer in the Russian-speaking world. Many Russian DXers picked up the hobby, thanks to his personal encouragement.

Pavel left Voice of Russia in 2004 due to his failing health but continued preparing a monthly column for Radio Magazine, publishing a weekly MediaCom Digest on electronic media, writing articles for general Russian press and actively corresponding with his numerous DX-friends.

Pavel was born and grew up in Latvia. An engineer by training, he was a true intellectual from the Soviet past - a bright, passionate and articulate man (married with no kids) who easily made both friends and enemies.

He viewed himself as a product of Kruschev's political and cultural Thaw. Not incidentally Ottepel' (Thaw) was a title for one of his most popular radio programs at the Voice of Russia. The emotionally charged broadcasts consisted of popular songs from 1960s and Pavel's memories of joys, loves, discoveries and friendships from that time.

In Open\_DX forum one of his friends is quoting Pavel's email written just four days before his death: "It's important to take a good care of a person while he's still alive instead of singing praises to him after his death."

I knew Pavel personally since the end of 1980s. I will always remember our long phone conversations, his radio broadcasts and the Russian newspapers that he often mailed to me in pre-Internet times when I lived outside of Russia.

Pavel's photo can be found at MediaCom Digest's site:  
<<http://www.mdigest.ru/>>

(Carlos Goncalves-POR, wwdxc BC-DX TopNews May 30)

15800 kHz - R Bulgaria Sofia also worried about 0600-0630 UT in Spanish? I sent them also RR from Carlos in Lisbon on this matter, since Radio Cairo Arabic co-channel opens an hour earlier. Sofia registered alternatives now on 13600, 15200, 15400, instead. Sofia also increased DRM power, now 50 kW (ex20kW).  
(wb, wwdxc BC-DX TopNews June 2)

CENTRAL AFRICAN REP According to my sources Radio ICDI night-time frequency will be 3390. Web-blog of Dan Anderson at <<http://danhcjb.org/>> tells us that another transmitter will be installed by HCJB engineers as a gift for Radio Centrafrique at Bangui-Bimbo site. Frequency not yet announced but probably 5035. The website also has photos of antenna installation at both sites. these two transmitters are low power, rated only as 1 kW.  
(Jari Savolainen-FIN, dxld via WDXC Contact)

CHINA CNR-1 Beijing 572 TXsite reactivated. 4460, 6030, and 6175 kHz of CNR-1 Beijing 572 TXsite reactivated from 1955 UT on May 31.  
Hiroshi  
(Sei-ichi Hasegawa-JPN, dxld June 1)

ETHIOPIA Voice of Tigray Revolution. Now can be heard on 5950 kHz.  
// 5940 kHz, 1500-1900 UT.  
(Sei-ichi Hasegawa-JPN, dxld May 27)

6030 R. Oromiya, Adama, via Geja Jawe, 1844-1900\*, 29 May'10, Oromo (listed), local songs, talks; 44333, weakish audio during speech, not music, adj. QRM.  
(Carlos Goncalves-POR, wwdxc BC-DX TopNews May 31)

5940, Voice of Tigray Revolution, Addis Ababa, \*0257-0325, May 30 and 31, New frequency, ex-5980. Sign on with IS. Vernacular talk at 0300, Horn of Africa music at 0301 UT. Very weak. Stronger on // 5950 kHz - but mixing with Okeechobee.

6030, R Oromiya, Adama, via Geja Jewe, Addis Ababa, \*0321-0340, May 24 and 31, xylophone-type IS. Talk in listed Oromo at 0330, Horn of Africa music. Fair signal strength at sign on, but dropped down to a weak signal after 0330. Some noise on frequency, but otherwise in the clear with R Marti and jammer off the air on UTC Mondays.

(Brian Alexander-USA in Dexplorer, via dswci DXW June 2)

7210 R Fana, Geja Jewe, Addis Ababa, \*0258-0335, May 21, ex-6890, // 6110  
- weak under Cuba. Sign on with IS. Vernacular talk at 0301. Horn of  
Africa music. Fair, but weak under the BBC at \*0300-0330\*. And covered by  
Voice of the Broad Masses of Eritrea at their 0355 sign on on 7210.  
(Brian Alexander-USA in Dexplorer, via dswci DXW June 2)

Also heard at \*1521-1529, May 19, suddenly on with their usual repetitive  
xylophone-like IS. 1529 too weak to make out any audio; 1532 seemed to be  
Horn of Africa music mixing with Calgary's C&W music; IS was in the clear,  
but weak. This reception made possible by the continued absence of CNR-1.  
(Ron Howard-USA, via dswci DXW June 2)

Nice email though in broken English from Gameda Geleto, a news reporter  
for the Oromia Radio and Television organization, in reply to a 2009  
report with MP3 recording.

He indicated listening to my MP3 and acknowledges it was their signal.  
Says, in part, "our radio wave Adama middle wave (MW) 1035 kHz. finifine  
(Addiss Ababa) short wave 6030 kHz, you listen 2009 October and I can hear  
on your MP3."

Indicates the ORTO studios are in Adama "in east of ADDISS ABABA," as is  
the MW xmtr but the SW xmtr is at Finifine, which I am a bit confused is  
eiher another name for Addis Ababa or is a suburb district of Addis Ababa.  
Geleto works mostly on the TV side of OROMIA RTV Organization, and says  
soon it will be "dissminat in Canod and America," I presume that would be  
via the Internet.  
(Don Jensen-USA, DXplorer)

GEORGIA [Abkhazia] 9535 Caucasus. Abkhaz Radio from Soukhimi has  
appeared again on the frequency of 9535 kHz and was heard at 0730 hours in  
a local language and at 0800 hours in Russian. The station possibly have  
other programs but until 0500 hours the frequency was occupied by Radio  
Exterior de Espana and from 0500-0700 hours by Radio Algeria [via  
Issoudun-F].  
(Rumen Pankov, R. Bulgaria DX May 21  
<<http://bit.ly/anG7UV>> via Yimber Gaviria-CLM, dxld May 26)

GERMANY Unidentified 15545 Checking the new Aoki schedule file, just a  
couple of changes today: There's an unID entry on 15545 kHz at 1500-1600  
UT.  
(Dan Ferguson-SC-USA, May 23, shortwavelistenng yg via dxld)

15545 UnID 1500-1600 .....7 EGR a10 May 22 Means European Gospel  
Radio, i.e. via IRRS via SLOVAKIA, Saturdays only, but what?  
(gh, dxld)

That seems new to me: 1500-1600 UT Radio Liberty to Caucasus 3 x 20 min  
each, in Avar, Chechen, Circassian language, see Aoki list. Lampertheim  
15545 kHz and Wertachtal 11810 kHz.

15545 from Lampertheim at 1520 UT June 2, S=6 poor, my receiving post in  
dead zone. Chechen service of R Liberty also in // Wertachtal 11810 kHz,  
S=8, also in dead zone.  
(wb, wwdxc BC-DX TopNews June 2)

War der Sender Heilbronn in DRM auf 711 KHz schon gestern on air?  
Jedenfalls heute [May 31] mehrfach beobachtet, in DRM on air. Trotz  
SNR 30dB hat die Sendung staendig Aussetzer, das kommt wohl vom SWR.  
Mal sehen ob das kuenftig besser wird. [...]

711 kHz SWR cont.ra Hier im Nordwesten gerade (1937 UT) in DRM mit  
SNR=19dB. Immerhin treten die SWR-Leute ja mit 19.68 kbps ganz robust auf.  
Wird mit DRM+ sicherlich noch besser ...  
(Olaf C.Haenssler-D, A-DX May 31)

Das grosse Loeschen beim WDR, und sowas passiert im Kulturland  
Deutschland.

80 bis 90% der Beitraege auf WDR Online muessen jetzt im Juni fuer den  
Zugriff im Internet geloescht werden. Fast alles aus neun Jahren WDR.de  
muss nun geloescht werden. Viele Inhalte sind demnaechst verboten, andere  
nur fuer ganz begrenzte Zeit im Internet zu sehen, obwohl sie laengst  
durch Rundfunkgebuehren aller Buerger finanziert worden sind.

Dies im Gegensatz zu dem, was in der ganzen Welt des Internets gilt:

was dort einmal veroeffentlicht wurde, vergroessert die universelle  
virtuelle Bibliothek im Netz. Jeder Nutzer des Internet hat so freien  
Zugang zu vielfaeltigen Informationen, zu Entwicklungen aktueller und  
vergangener Ereignisse ueberall auf der Welt.

Damit sind die Interessen der kommerziellen Medienhaeuser an Telemedien  
und Videotext gewahrt. Ohne das grosse Loeschen haette der WDR seine  
Internet Angebote total am 1. September 2010 abschalten muessen.

Siehe unter

<[http://www.wdr.de/themen/kultur/medien/staatsvertrag\\_zwoelfter/verweildauer.jhtml](http://www.wdr.de/themen/kultur/medien/staatsvertrag_zwoelfter/verweildauer.jhtml)>

(wb, June 1)

GUINEA 4900 Nach laengerer Recherche identifizierten prominente DXer  
eine Kurzwellenstation, die seit April 2010 abends auf 4900 kHz zu hoeren  
war. Wie schliesslich auch mithilfe der Website <[www.familiafm.com](http://www.familiafm.com)>  
bestaetigt wurde, handelt es sich um Familia FM 105,3 MHz. Die Station hat  
einen 1-kW-UKW-Sender von HCJB Global erhalten, der gut 400 km von Conakry  
entfernt im Inland aufgestellt wurde. Gesendet wird 18.00-24.00 Uhr  
Ortszeit=UTC in Franzoesisch, Pular und Maninka.

Nach Angaben der Stationsdirektorin Colette Baudais war man bereits im  
Maerz auf Sendung, hatte aber noch Probleme mit dem regelmaessigen  
Betrieb. Da man vor Ort keinen oeffentlichen Strom hat, ist man auf die  
eigene Erzeugung durch Solar- und Windstrom angewiesen. Wenn der nicht  
reicht, werden die Sendungen frueher beendet; mittelfristig will man bis  
3.00 Uhr senden. Die Zufuehrung des Programms erfolgt online von Conakry  
nach Kanada und dort via Satellit zur Sendeanlage.

In Europa und den USA wird die Station vor allem +/- 22.00 Uhr gemeldet,  
da hier um 22.10 Uhr haeufig Nachrichten in Franzoesisch zu beobachten  
waren. Der Empfang ist insgesamt schwach und leidet auch unter  
chinesischer Interferenz von 4905 kHz (Xizang PBS). Die urspruenglich  
naeherliegende Theorie war, dass Fischer vor der westafrikanischen Kueste

zu ihrer Unterhaltung eine lokale UKW-Station wiederausstrahlten. Die Hauptempfangszeit in Mitteleuropa war am späten Abend bis zu einem Sendeschluss gegen 00.00 Uhr.

(Jari Savolainen-FIN 14., 17., 26.5.2010 u. a., Anker Petersen 19.5., Carlos Goncalves 21.5., Patrick Robic 23.5. A-DX, Dr. Hansjoerg Biener, ntt May 26)

GUINEA Rep. 4900.00 I got recently some more info about this station. The SW transmitter is located some 400 km inland from the capital, Conakry. They stream the audio from Conakry online to Canada and from there up to satellite and the audio is picked up at the transmitter site. SW is scheduled 1800-2400 UT but if solar/wind power lacks, they may sign off earlier. Plans are to add more wind generators and extend broadcast hours 1800-0300 UT.

(Savolainen in Dexplorer, May 26; via dswci DXW June 2)

GUYANA In regards to Guyana's transmitting site, I remember it was located outside of the town of Demerara. We had to cross the river on a large pontoon bridge. Then travel // to Canal #5 for a bit. The site has two antenna systems, a vertical 1/4 wave for 560 kHz, and the horizontal array for H.F. The array for H.F. is easy to spot because the support towers are tilted outwards at a 45 degree angle. I mention this because I have received a few E-mails from people in Guyana who want to confirm they are seeing the site when they drive by ???

(Jamie Labadia-USA, dxld May 23)

INDIA All India Radio G.O.S. heard this evening, 26 May, on unlisted and unannounced 9940. This for the 1745-1945 UT broadcast (which I caught at 1934 with their Commentary, followed by film songs). The frequency continued from 1945 to 2045 in Hindi, and is still continuing for the English broadcast from 2045-2230. Schedule for 1745-1945 UT announced at 1945 close as follows: 11935, 7400 and 9415 to East Africa; 9445, 7410 and 6120 to West & North Africa; Europe frequencies not given. 6120 seems to be a new frequency, but I was not able to hear it. Schedule for 2045-2230 announced at 2045 open as follows: 7550, 6280, 9445 and 9950 to Europe; 9910, 11620 and 11715 kHz to Australia.

(Alan Roe-UK, wwdxc BC-DX TopNews May 26)

A visit to All India Radio Headquarter's, New Delhi. (summary) By T. R. Rajeeesh

All India Radio (AIR) is one of the world's largest radio networks still going strong on shortwave. Currently All India Radio has 54 shortwave transmitters, 149 MW transmitters and 172 FM transmitters. All India Radio broadcasts in 11 Indian and 16 foreign languages.

I had an opportunity to visit the All India Radio Headquarters on 28th April 2010. My good friend and famous Dxer based in New Delhi Alokesh Gupta arranged this visit. We also had a great DX friend with us-the Chairman of Danish SW Clubs International Anker Petersen for visiting the station. We also visited All India Radio High Power Transmitting Station at Khampur, Delhi, which is one of the largest Antennae Fields of AIR located in 255 hectares in the swamp outskirts of Delhi.

... At first we were introduced to the Spectrum Management Division where a young handsome gentleman who is the Deputy Director of Engineering welcomed us. Alokesh introduced Anker Petersen and me to Mr.B.K.Oberoi, the most cheerful person having a real helpful mind for Dxers (Incidentally he also issued several direct QSLs from Regional AIR Stations when he was Station Engineer). ... There we had very interesting as well as exciting talk on the shortwave medium, its challenges and future.

Anker Petersen gave his tropical band monitor survey of Regional AIR stations and showed the threat by Chinese SW stations which blocks or even jams AIR transmissions of regional transmitters in the North East India. They told us that nothing can be done at HFCC Conference and related forums. Also China put another transmission over the entertainment channel Vividh Bharati (9870 kHz) SW broadcast.

The verification policy of AIR also discussed with Mr. Ansari and Mr. Oberoi. The common complaints for not having a steady verification or neglected reception reports are introduced over there. They have lot of pending reports held with them for verification. As currently the verifications are done through a particular official channel. When a reception report is received by the SMS Division they sent the report with the note of the Director SMS to concerned language departments or regional stations for verification of programme contents. After verification the concerned section after verification of the programme content shall send back the report with a note whether it is eligible for verification with QSL Card.

Regarding verification policy they said that they plan not to QSL Medium Wave and FM broadcasts in future. Mr. Ansari also stated that a quick way to dispose the reception reports by directly verifying by the SMS division is also under consideration. The DDE (SMS) Mr. Oberoi told that reception reports for AIR General Overseas Service mostly came from Finland, Germany and U.K from the European target area. It is from the U.S most reports are received, even though they are not targeting to North America. Incidentally All India Radio rarely receives reports from listeners from European countries other than those mentioned above.

We talked about DRM transmission experiment by AIR. Alokesh Gupta monitors regularly for AIR on DRM transmissions. They told that AIR will convert some transmitters (nearly 10%) to DRM capable in the near future. Also DRM capable MW transmitters and in DRM plus on FM is also planned for next phase. All India Radio is very keen to know the results of their 1745-2230 DRM transmissions to Europe on 9950 kHz in English & Hindi.

... In the New Broadcasting House, we met the Superintending Engineer in charge of the Studio Complex Mr. P.K.Jain. In front of him there was an Audio Monitoring system through which the programmes from 12 studios can be simultaneously monitored. He asked about our hobby, the scope of DRM and explained about the studio facilities in the building.

We also visited the External Services Division where the Deputy Director Ms.Nayyar Sadrudin received us. She enquired about the broadcasts we listened to and when Anker handed her a recent reception report from of a recent General Overseas Service, she called the announcers he mentioned in the report! Mr. Kaushik Roy the frequent hosts of mailbag programme "Faithfully Yours" and Mr.Sanjiv Baruah came to the room. We had very

enthusiastic talk over there for a long time.

... We were amazed to find that Mr. Sanjiv Baruah is the son of former All India Radio Director General Mr. U.L. Baruah, who wrote the one and only authoritative book on AIR "This is All India Radio" published back in 1983! They also presented a big colorful folder of AIR external services & some AIR brochures as a souvenir to us.

Our thrill of watching AIR High Power Transmitting Site at Delhi Khampur may be written in another article in the upcoming editions.

Direct E-mail ID for General Overseas Service:  
<goesdair @ yahoo.co.in>

This email id is informed by Mr. Sanjeev Baruah during the visit for writing directly to AIR External Service. This can also be used for requesting frequency schedules and programme comments.

The Spectrum Management Division of All India Radio welcomes reception report from European target area and reports and monitoring observations for DRM transmissions are especially appreciated. AIR is using DRM mode transmission to U.K and Europe via Delhi Khampur with 35 kW (250 kW output is not used!) from 1745-2230 UTC on 9950 kHz in English & Hindi. The analogue General Overseas Service in English can be heard in U.K and Europe from 1745-1945 on 6280, 7550 kHz and from 2045-2230 UTC on 6280, 7550 and 9445 kHz. The reports may be mailed to: The Director, Spectrum Management & Synergy, All India Radio, Room No.204, Parliament Street New Delhi-110001, INDIA. Email reports are welcomed to:

<spectrum-manager @ air.org.in>

(Carlos Goncalves-POR, wwdxc BC-DX TopNews May 31)

KUWAIT There has been a two year delay in installing a 600 kW medium wave transmitter for US broadcasts to Iran. The \$5.2 million project was initially meant to be operational by May 2008. Existing medium-wave transmitters in Kuwait can only reach a narrow band of the western portion of Iran. Testing and final commissioning of the transmitter is scheduled for May 2010 and the transmitter should be ready to go operational by the autumn of 2010. The delays hurt US efforts to broadcast news and information to Iran in crucial periods during the 2009 election and the following civil unrest.

(CNN via kimandrewelliott.com via dxld, via WDXC Contact June 1)

Erection of MW station for Radio Farda Kuwait relay 1386 kHz service, remove of ex600 kW Harris MW sender unit from Kavalla Greece to Kuwait site and to erect newly 3-mast antenna in north-easterly corner of the area too.

Channel selection 1386 kHz is still in question, due of powerhouse MW from IRAN co-channel. (wb)

LIBERIA 4025 Star Radio SW Test Txn Schedule. STAR radio is broadcasting on 104 FM & 4.025 MHz (mega-hertz) Short Wave in the 75-meter Band. For now test transmission on the Short Wave runs from 5 to 9 LT in the morning and 6 to 9 LT in the evening. Call us on 077577142, 077018797 or 06857000.

FM frequency 104 in Monrovia and affiliated community radio stations throughout Liberia.

<<http://www.starradio.org.lr/>>

Times in UTC <<http://www.timeanddate.com/worldclock/converter.html>>

0500-0900 UTC on 4025 kHz

1800-2100 UTC on 4025 kHz

(Alokesh Gupta-IND, wwdxc BC-DX TopNews June 2)

4024.985, June 2, cd 2108 UTC, tent. logging of Star Radio, Monrovia. This evening at 2108 UTC an English speaking station signed off after newscast and announcement. Too disturbed by Utility stations to get a proper ID. QSA 2. Acc to website transmission times between 0500-0900 and 1800-2100 UTC on this frequency. Good hunting.

(Thomas Nilsson-SWE, DXplorer June 1)

4025 Star Radio. On June 2 had a definite signal on the Perseus and intermittent traces of audio at 0630 UT tune with the Wellbrook loop pointed at Liberia ... nothing seen at 0530 UT so tonight will record from 0530 to 0715 UT (flying to NYC today). I suspect I would have done better at 0600 UT. Even the visual signal indication faded quickly after 0700 UT.

(Bruce W. Churchill-CA-USA, DXplorer June 2)

4025 Star R (presumed), Monrovia, 2037-2058 UT on May 28, talks and African music. At tune in only a carrier and something more, but enhanced around 2051-2055 UT, deteriorating after this time to an imagination level. At peak 25522. (Otávio). The Management of Liberian station Star R has announced the re-activation of its SW service in the country. Station Manager James Morlu says the station has begun test transmissions on 4025. Mr Morlu said he believes that, as the country strives towards its recovery process, it is prudent to have a viable information dissemination

channel like SW.

The Star R Station Manager was speaking as the UN Refugee Agency UNHCR symbolically transferred assets to several of its partners in Liberia including Star R. Mr Morlu hopes the three motorcycles provided to Star R will help enhance the work of some of its correspondents, but said more was needed.

MYANMAR Myanma Radio noted with two different mx prgrs on May 27th: on 5986 kHz 0005-0020 fade out and on 7200 kHz 2325-0026 UT (when blocked by Iran).

Recently MR was on 7186 kHz, but now is back on 7200 kHz.

(Rumen Pankov-BUL, wwdxc BC-DX TopNews May 28)

NETHERLANDS ANTILLES 15755drm The Disco Palace, 26 May at 2030 UT.

Lovely stereo audio of scary old disco tunes, with nearly local FM quality, when the signal can be decoded, which is intermittently, with constant dropouts and not even 15 seconds passing before the non-stop disco action farts into deadness while waiting for the next decodable bit to make it through the aether, and this is in the target zone, the targets being the USA and Canada. If I can't even decode the signal reliably here, then it will be exactly as poor in Ontario and presumably worse Northwards.

If this really is a US station, why is it broadcasting from Bonaire? Wouldn't it be more effective stateside? Why is it broadcasting from 2000 to 2100? Who is listening? Who is the target audience? The frequency of 15755 is barely within the MUF limit for today's solar flux, so wouldn't something in the 22 meter band be more wise? As it is, I'm having a horrible and truly tortuous listening experience.

Thanks for proving yet again what a fiasco broadcast digital radio and television are. They are unreliable even when they're local, so what chance do they have when they're two F-hops away? And switching off the broadcast mid-song at 2100 sharp? I can't express how heartily that encourages me to attempt listening again.

(Terry Wilson-MI-USA, dxld May 26)

NIGERIA This is a good time for AM Nigeria here in Cape Town. Over the past few nights I've identified: 594 FRCN Kaduna, 612 Kwara State BC, 729 Kano State BC, 756 BC of Oyo State, 917 Radio Gotel, 918 Radio Benue, 972 Katsina State Radio and TV Services (tentatively) and 1026 Jigawa BC.

Through the evening hours from greyline (1700) to sign off (around 2300) this group gives you pretty much the full gamut of Nigerian radio. There's news in English, Hausa, other local languages and pidgin, Christian evangelism, Muslim chants, hootenanny and Irish folk music, many local music styles and instruments, bleeding heart phone-ins, local education announcements, ads for internet or vitamins and political discussions in vernacular. The only one I haven't been able to identify clearly is 972

Katsina but have heard the name mentioned, with the accent on the first 'a'. 756 Ibadan (Oyo State) sometimes runs English news at 2000 but starts just before the hour.

Strengths vary and fading can be quite extended but 594 Kaduna (listed with 200 kW) is so strong at times it nearly matches the only local AM station, 567 Cape Talk. 917 R Gotel and 918 R Benue are right on top of each other but easily separable using SSB. In fact, I was unaware of R Gotel initially. There's also a Nigerian on 747 (listed as Nagarta Radio, Kaduna) but only 'Nigeria' has come up so far and no English heard. Nigeria has 36 states plus the capital territory but quite a few state AM stations are reported as inactive.  
(Graham Bell-AFS, dxld May 23)

**PAPUA NEW GUINEA** Listeners in countries such as Japan and New Zealand have been reporting reception of new shortwave broadcaster R Fly in recent days. R Fly is a community radio station operated by the Ok Tedi Mine management in the isolated Western Province of Papua New Guinea, about 800km west of the capital Port Moresby.

According to Jobby Paiva, who hosts the evening show on R Fly, the station operates from two FM transmitters [95.3 at the port town of Kiunga and 103.8 in the main company town of Tabubil about 90km inland] and recently started SW relays on 3915 and 5960 kHz.

English news is scheduled 7am-7.30am Tue-Sat and again at 7.30pm-7.45pm Mon-Fri [local times] and the 6am-10pm [2000-1200 UTC] broadcast day is divided into the Breakfast Shift 6am-10am, Mid Morning/Mid Afternoon Shift 10am-2pm, Afternoon Drive 2pm-6pm and the Night Shift 6pm-10pm closedown.

He tells us that the transmitter power details for the SW outlets will be available shortly and they are delighted to be getting emails in from a growing number of listeners around the world. Station details will be included in the 2011 WRTH: R Fly studios are on Dakon Street, Tabubil.

Mailing address: P.O.Box 1, Tabubil, Western Province, Papua New Guinea.  
Team Leader: Michael Miise. Telephone: +675 649 3924. Fax: +675 6493023.  
Email: <jobby.paiva @ oktedi.com>

Jobby has previously been a broadcaster with Nau FM and other commercial stations in Papua New Guinea and maintains a regular blog where updates about R Fly can be found: <[www.jobbywalk-about.blogspot.com](http://www.jobbywalk-about.blogspot.com)>

Tabubil is the site of one of the world's largest copper mines [previously gold mining] about 20km from the border with Indonesia and just over 300km from Jayapura. Annual rainfall is around 315 inches [8 meters] and the township is located in extremely dense jungle.

A road links Tabubil with a port at Kiunga where the copper slurry is taken by pipeline, and the port mainly exists to service Tabubil. Both Kiunga and Tabubil are in the highly mountainous North Fly District of Western Province. R Fly serves a combined Tabubil/Kiunga urban population of about 25,000 [estimated] and began broadcasting on FM in 2004. For more information about R Fly and the Ok Tedi mining operations see:  
<[www.oktedi.com](http://www.oktedi.com)>

(R Heritage Foundation, May 27; via dswci DXW June 2)

RUSSIA 11655 Man hat beim deutschen Dienst von R Moskau realisiert, dass fuer die sehr traditionelle 1100 MEZ/MESZ Aussendung die MW Sendungen nicht auslangen. Und die DRM Sendungen werden nur von ganz wenigen Hobbyisten gehoert.

Jetzt gibt es wieder eine AM Sendung um 0900-1000 UT auf 11655. Kommt hier mit S=9+40dB herein.

Another SW change ... is that VoR German can be heard from 0900-1000 on 11655. [in past decade mostly from Moscow 15455 kHz] (Sergei Sosedkin)  
Yes, powerful S=9+40dB signal noted today at 0910 UT.  
(wb, wwdxc BC-DX TopNews June 2)

RUSSIA/UKRAINE [tentat] 7440 Voice of Russia New Frequency for North America. Good morning, noted Voice of Russia on 7440 kHz in "our deep night" this June 1st/2nd, most uncomfortable monitoring time here in southwestern Germany.

2348-2350 UT, TX was already on air for opening check, when logged at 2348 UT, much fluttery signal of S=9+15dB.

Next check at 2352-2357 UT, TX was OFF air. TX came on air after all at 23.57:20 UT. 23.59:00 UT start of Kremlin chimes interval signal.

June 2nd at 0000 UT ID "This is Moscow, you are tuned to the World Service of Voice of Russia". Female newsreader, Israel's air strike against Gaza strip in Palestine, 19 peoples killed on Israel marine action on international water. 600 human rights activists brought food and good aid to Palestins at Gaza in Palestine. But were forced by Israeli marins on international water area... etc.  
(wb, wwdxc BC-DX TopNews June 2)

I just found out that VoR is back on Sosnovy transmitter starting from June 1! Acc. to DXing.ru, it's in Russian 1300-1500 and 1700-1900 UT on 1170 for "Europe and Belarus." Another SW change (in addition to VoR English using 7440 0000-0200 for its NA coverage) is that VoR German can be heard from 0900-1000 on 11655 kHz.

VoR used to run an AM/MW relay in Vilnius for its Russian service. But that was stopped a few months ago due to financial difficulties. More notably, an AM relay in Belarus was also discontinued. (Many DX publications still list Belarusian tx on 1170 as being used by VoR).

Albania is indeed a "very" old Soviet friend as the Soviet-Albanian relations were severed during Khrushchev. The Russian service of R. Tirana was jammed heavily through most of its existence. The relations between two countries are rather cold to these days.  
(Sergei DX, dxld June 2)

7440 VOR has a surprise new frequency for English to North America at 00-02: 7440, first noted by Harry Brooks in England on UT June 1. So I was standing by for it before 0000 UT June 2: carrier on between 2357 and 2358; open carrier until 2359 VOR IS, 0000 opening WS of VOR, no frequencies ever announced, of course; 7440 is only a fair signal, little better than 9890 which is still on, but 7440 has no ACI unlike 9890 from the Cuban/American radio war on 9885. 9735 also came on at 0000 in VOR

Spanish via Guiana French.

The question is, what is the site for 7440 VOR? Until a couple months ago this was the super-power frequency of Radio Ukraine International, including English to North America at 0000-0100, nominally 600 of the rated 1000 kW via Lviv site. SW from RUI was suspended but they keep claiming that is temporary and they will resume. But with Russia on their frequency???

Are we in for a big collision when RUI come back?

Or has VOR axually reached a deal with the new pro-Russian Uke government to use the Lviv transmitter, just like the good old Soviet days? As Wolfgang Bueschel also speculates, this could be a temporary measure to keep the transmitter site in business if RUI itself can not afford to use it.

(Glenn Hauser-OK-USA, dxld June 2)

7440 could be Lvov tx in Ukraine again from June 1st ? Because the election winner in Ukraine is much more Russia connection friendly now. Could be high power transmission to North America 7440 LV 600 kW 303 deg.

And RUI Kiev can pay for their own main power debts then ... Russia is 'hard up' of functioning antennas towards North America from Europe. Old friends on the southwards Balcan in Bulgaria and Albania are now independent. And to lease powerful TCI antenna at Sitkunai-Lithuania, may avoided by injured Russian ego.

(wb, wwdxc BC-DX TopNews June 2)

Were it really financial difficulties that brought an end to the VOR relays via Vilnius and Sosnovy? Or was it just a strategic decision, a result of considerations if and where money should still be used for AM transmitters?

And shortwave to the western hemisphere is apparently just no priority anymore. VOR would have no need to search for new facilities, the German partners (if not friends) can not only provide another option for transatlantic shots but also arrange relays via Montsinery over there.

Now this 7440 relay: I suspect it must have been offered to VOR proactively. But by whom? Was it the transmitter operator RRT? Or is it NRKU itself who now leases this slot to VOR, probably this way avoiding a permanent loss of its access to the RRT shortwave facilities, especially for the current conditions?

(Kai Ludwig-D, dxld June 2)

They were friends at least in 1945 - approx. Dec 1961 era.

<[http://en.wikipedia.org/wiki/Albania\\_-\\_Soviet\\_Union\\_relations](http://en.wikipedia.org/wiki/Albania_-_Soviet_Union_relations)>

Even in Sept 1967, when I visited Albania for the first time, I could see many typical USSR goods like soviet "Pobjeda" driving cars on the street, which car factory was once reparation remove from OPEL Olympia General Motors Brandenburg Germany installations after WW II.

Albanian R Tirana Kashar site 1359 kHz 50 kW erected March 1952 by USSR.

At 0715 QRM from R Rebelde 5025 kHz.  
(Bolland, Hauser, Sellers, and Wilkins in Dexplorer; via dswci DXW June 2)

SPAIN [Basque] 1386 Euskadi Irratia, Bilbo, 2203-2214, 26 May'10, Basque, talks (presumably news) followed by music prgr; 55444. I should not be reporting on a stn from Spain unless perhaps something odd, unusual was going on - extremely weak modulation on a vy. strg. carrier. That was more than enough to observe that Guinea's R. Rurale, Labe, is not heard, or if it is still active, then power must be very low.  
(Carlos Goncalves-POR, wwdxc BC-DX TopNews May 26)

SRI LANKA Spurious emissions of SLBC transmitter on 11905 kHz noted on 11853 & 11957.5 kHz since last fortnight. Cross talk of SLBC Hindi & English noted on both the spurious channels. Thanks to Jose Jacob for tracking down the 2nd spurious channel.  
(Alokes Gupta-IND, dx\_sasia yg via dxld May 20) 0000-0500, 0800-1530

TAIWAN New program of the Taoism via RTI on 7460 kHz. New program of the Taoism was started on May 1 at 1100-1157 UT on 7460 kHz via RTI for North China and Manchurian, and 1200-1300 UT on 1098 kHz for Central China and South China. I cannot hear the station name. The reception condition on 7460 kHz was good. Opening announcement by female, Programs are all lectures in Chinese by male.

<[http://ani.atz.jp/DX/mp3/20100529\\_2000\\_7460kHz.mp3](http://ani.atz.jp/DX/mp3/20100529_2000_7460kHz.mp3)> at 1100 on May 29.  
(Sei-ichi Hasegawa-JPN NDXC, dxld May 30)

The first Taoism shortwave broadcasting called "Takai Shinlingde Suo Chi

(the spoon to open the chain of spirit)" was started on May 1 from Taiwan via CBS transmitter site.

1100-1200 7460 kHz Huawei 100 kW to North East China.

1200-1300 1098 kHz Koufu 300 kW to Central and South China.

The program is produced by the newly-risen Taoism Organization "Ikuantao"(IKT), and consists of 1 hour Taoism lecture in Chinese everyday. The corresponding address of IKT is:

No. 766 Tongping Road, Taiping City, Taichung County, Republic of China (Taiwan)

URL: <<http://www.ikttv.org/>> <<http://ikt.webu.com.tw/>> (in Chinese only)

Telephone: +886 4 2278 2091

Taoism is the ancient religion in China, influenced Korea and Japan, but was persecuted and deadly destroyed in Chinese mainland during "Great Cultural Revolution" in 1960-1970's. They have been recently revived in China and Taiwan.

(Takahito Akabayashi-JPN, wwdxc BC-DX TopNews June 2)

TAJIKISTAN Tajik Radio was heard in Sofia with a weak signal in English at 1345 hours on 7245 kHz with a political commentary on Pakistan and Afghanistan. This is the only broadcast in English from this country – from 13 to 14 hours. Tajik Radio is received regularly with a local program after 16 hours on 4765 kHz.

(Rumen Pankov, R. Bulgaria DX May 21

<<http://bit.ly/anG7UV>> via Yimber Gaviria-CLM, dxld May 26)

[see also 7440 under Russia/Ukraine] Usual 7440 kHz Voice of Russia at 2100-2200 UT June 1, in Portuguese, 500kW at 300 degrees via Dushanbe-Orzu TJK site. A very weak and audio muffled signal, of S=6-7 strength only at 2100 UT.

(wb, wwdxc BC-DX TopNews June 1)

TURKEY TRT Voice of Turkey in Arabic noted today June 2. 1400-1455 UT on 11825 CAK 250 kW / 152 deg to NE/ME, instead of 9540 // 17770 EMR 500 kW / 252 deg to NoAF.

(R BULGARIA DX MIX News, Ivo Ivanov, via wwdxc BC-DX TopNews June 2)

I guess, the Turkish engineers forget to move to 9540 kHz. TRT Turkmen at 1200-1230 uses 11825 kHz. (wb)

UNIDENTIFIED 261 Silent carrier, 2132-2135\*, 26 May'10, on/off tone signal; 35353, strgr. than BUL which I was starting to observe. Could this be in some way related to a 27 May'10 rpt. in DXLD yg on R. Caroline adventuring on LF [but on 279]?

(Carlos Goncalves-POR, wwdxc BC-DX TopNews May 26)

U.K. 15105 Unidentified last week at 0600-0700 UT, is BBC WS to WeAF via Rampisham, 500 kW at 168degr.

BBC English to Africa is being heard (on the 27 and 28th) via unlisted 15105 at tune in 0625 to off at 0700. I can hear weak parallels via ASC on 6005 and 7310 and MEY on 12015, but I cannot trace ASC on listed 9410, where I had heard it operating previously.

I thought initially that 15105 may be a replacement for 9410, and it may

be just that, but I think it's out of the UK, and probably Rampisham.  
Remarkably today the signal for a time was a steady 40dB over 9, and a quick check of the Hausa service via listed RMP on 15515 showed an identical signal, and way over Kuwait. Incidentally France 15300 was also very strong too, indicating possible short skip conditions.  
(Noel R. Green-UK, wwdxc BC-DX TopNews May 28)

UNID 15105 not traced any ID of this English language station at 0615 UT, S=3 poor here in Germany. Some Horn of Africa / Saharan music? Left the air around 0658 UT. Some Sudan Sunday special ? No //s found on BBC Africa Sat/Sun specials. Ascension outlet ? Spurious ?  
(wb, wwdxc BC-DX TopNews May 23, 2010)

UZBEKISTAN 11825 NHK Radio Japan Hindi Frequency Change wef 14th June 2010:  
1345-1430 UTC on 11825 kHz (ex 5975) Daily  
(Alokesh Gupta-IND, wwdxc BC-DX TopNews May 31)

Shepparton 11825 kHz is NOT propagating to EUR today. Channel is empty. 11830 kHz had strong usage of RRI Bucharest in Arabic S=9+20 dB, 11820 kHz is - always - poor on back lobe from BBC Cyprus in Arabic, only S=7-8.  
(wb, wwdxc BC-DX TopNews May 31)

ZIMBABWE 4828 Voice of Zimbabwe, Guinea-fowl, 2134-2147, 28 May'10, English + Vernacular, int'l. pops, few talks; 35422.

(Rumen Pankov-BUL, wwdxc BC-DX TopNews June 2)

Aedalaetin Saesi Radiosu 9677.64 kHz 0458 UTC.  
Aedalaetin Saesi Radiosu war heute morgen um 0458 UTC (s/on) mit recht brauchbarer Signalstaerke auf 9677.64 kHz zu hoeren. Die Modulation ist nach wie vor grauenhaft, aber es war doch etwas verstaendlicher als noch zu Jahresbeginn. Nach ID in Russisch und Nachrichten gab's dann aber wohl Probleme beim Sender, denn um 0515 UTC brach das Signal mitten im Programm ab.  
(Patrick Robic-AUT, A-DX June 5)

Rumen auf dem Empfangsbalkon in Sofia berichtet so von 25 bis 28 Minuten Empfaengen. Also 17 Minuten sind dann auch nicht so ungewoehnlich ?

WRTH Update:

AZERBAIJAN Voice of Justice in Stepanakert, Mountainous Karabagh has retimed its evening transmission on 9677 kHz Tuesdays and Saturdays: from 1500-1530 to 1300-1330 UT.  
(wb, wwdxc BC-DX TopNews June 5)

BELARUS 6010, 6040, 6070, 7235, and 7280 kHz have been on the air

throughout the day since these transmissions were reactivated. They appear to be more or less 24 hrs, but the period 2300-0200 UT is hard to confirm. 6190 kHz can be heard here at BLR sunrise when Germany is still in darkness.

6080, 6115, and 7265 kHz only heard evenings (from appr. 1500 UT) with sign off at 2100 UT or even earlier. On May 26 I heard 6010, 6070 kHz identifying "Radyo Brest" at 1530 UT.  
(Olle Alm-SWE, wwdxc BC-DX TopNews May 27)

BELARUS 1170 (via Socnovy) 800 kW, 244 Azimut, 1300-1500 and 1700-1900 UTC. From 1 June 2010. Voice of Russia.  
(Alexander Mazgo-BLR, RUSdx June 6) see also under Ukraine.

BENIN 1566 TWR, Parakou, 1907-1928, 06 Jun'10, French, Afr. songs, rlg. propag., Vernacular heard at 1915 though French prgr again later; 45444.

BRAZIL 9564.576 Super Radio Deus e Amor, Curitiba Brazil. Female talks in Portuguese. More than 800 Hz lower than usual.  
(Maurits Van Driessche-BEL, hcdx May 27)

9587.11 SRDA (Super Radio Deus e Amor, ex Globo), Sao Paulo, SP, at 2100 UTC on 2 + 3 May. Extremely weak signal on 2 May but a bit stronger on 3 May which allowed me to confirm that the program was in // with 9565 kHz (SRDA in Curitiba).

11829.96 R. Daqui, Goiania GO. This frequency was not in use for a longer time, then on 17 May I heard what probably was a TX test because they switched it off at 5:13pm local time. From 2 June, so already for 3 days in a row, there is a regular transmission which ends at 6pm local time (2100 UTC). They always play musica sertaneja with a lot of IDs after each song.

(Carlos Goncalves-POR, wwdxc BC-DX TopNews Jun 8)

CENTRAL AFRICAN REP Hank Zeck here at the HCJB Global Technology Center here in Elkhart, Indiana.

Curt Bender and Dan Anderson and myself went to Central African Republic in April of 2010 to set up two new shortwave stations.

One is in Boali for ICDI where they were currently broadcasting on 6030. The new transmitter will broadcast on 3390 kHz during the evening hours. I understand they were in the process of getting official permission for this new frequency but we were able to do some test broadcasts with Lazy H antenna at 1 kW.

The other station was for the government site at Bimbo near Bangui where they currently have a Chinese built shortwave transmitter operating. We used another 1 kW transmitter with Lazy H antenna from a small room at this facility. The frequency there was 5035. The government was able to do one test broadcast before we left at the end of April but they still needed to put the airco in the room.  
(Hank Zeck, Osceola-IN-USA, dxld June 2)

Hank, tnx for the first hand info, clearing up some contradictory info from HCJB publicity. Please keep us informed about such details on any further projects involving SW.

According to TDP <<http://www.tdp.info/caf.html>> the original SW transmitter was a 100 kW Thomson from 1970, and then a 20 kW from 1980, with no 'year out' shown, tho it's been off the air

for several years. 1 kW will hardly serve as a replacement with nationwide coverage, but will at least get them back on the air.  
(Glenn Hauser-OK-USA, dxld June 3)

CHINA 7280 Firedrake music noted on IBB Tinian channel 7280 in 1700-1900 UT  
slot, June 7th. But usual echo jamming on June 8th.  
(wb, wwdxc BC-DX TopNews June 7)

CHINA/CANADA 7415 Though first it was a phantom.  
7415 RCI English and French via Kashi or Urumchi ? at 1856 - 1900 UT.

But RCI English service  
1800-1859 KAS 9530, SKN 11765, SAC 17735, SKN 17810

noted in 1856 to 1900 UT slot June 7th on CRI Urumchi site outlet 7415 kHz, S=9+20dB, with listener letter request and Montreal address at 1858 UT.

RCI interval signal til 1859 UT, into RCI French ID til 1900 UT, and suddenly at 1900 UT switch into CRI Czech service announcement, scheduled on 7415 kHz regularly.

So, the 9530 Kashi satellite feed from Beijing was put on air via Urumchi gear, or even the satellite feed used for CRI Czech service from 1900 UT?  
(wb, wwdxc BC-DX TopNews June 7)

CROATIA 6164.95v Croatian Radio via Deanovec little 50 Hertz odd, S=9+20dB. June 5th at 1640 UT.

Produced a hum hiss against China Radio International exact even frequency, at Urumchi Xinjiang, in Turkish language co-channel.  
(wb, wwdxc BC-DX TopNews June 5)

CUBA ?Radio Nacional Argentina? - Hallo, ich habe heute 7. Juni morgen (02:30 UT) auf 6060 kHz eine spanische Sendung gehoert - nur leider habe ich keine ID vernehmen koennen. Laut Eibi sendet um diese Zeit nur Radio Nacional Argentina in Spanisch auf dieser Frequenz ...  
(Micha, A-DX June 7)

Warum nicht RAE, dort ist ja Winter und die Signale schaffens auch nordwaerts?

Aaaaaaber, am besten 6060 mit anderen Frequenzen vergleichen, weil ja La Habana Cuba taeglich hier zu hoeren ist:

5040 6060 6110 11760, und auch 12020 kHz !  
RHC um 0500 in English auf 6000 und 5970.

Und empfehlenswert ist auch das vorzuegliche WRTH Update vom 19. Mai zu lesen.  
(wb, wwdxc BC-DX TopNews June 7)

Re 6060 kHz.  
Am 8. Juni waren sehr lausige Bedingungen und nichts auf 6060 kHz um diese Zeit zu hoeren.

Heute am 9.Juni:

Radio Habana Cuba mit mehreren Identifikationen gehoert, zwischen 0400 und 0430 UT auf  
6060 S=9+15dB  
6110 S=9+5dB  
9525 aermlisch S=6  
11760 S=9+20dB, am besten  
12020 S=9+10dB  
15380 vielleicht gar nicht auf Sendung, jedenfalls nur China zu hoeren.

Englisch um die gleiche Zeit aus Cuba:

6000 S=9+10dB, und sehr duenne auf 5970 S=5-6.  
(wb, wwdxc BC-DX TopNews June 9)

EQUATORIAL GUINEA 5005 RNGE/" R. Bata", Bata, 1859-1918 UT on 04 Jun'10, Castilian, Afr. pops, newscast 1900 UT; 35343; vy. weak modulation till it was almost gone (2040).  
(Carlos Goncalves-POR, wwdxc BC-DX TopNews Jun 8)

FRANCE/TAIWAN 6155 RTI English service via Issoudun powerhouse towards GB & IRL, 1800-1900 UT, S=9+10dB - but I guess much stronger signal on the isles target, 1835 UT on June 7th. Enjoyed sweet Taiwanese music in 1835 to 1845 UT slot, June 7th.  
(wb, wwdxc BC-DX TopNews June 7)

SWR 711drm. Die Schulferien sind bei uns vorbei, und die SWR Ingenieure haben den DRM Sender heute morgen um 9 Uhr wieder auf Sendung gebracht. Vielleicht war es auch nur eine zu sensitive Senderabschaltung bei den Gewittern im Umkreis von Obereisesheim, die auch schon frueher im AM Betrieb berichtet wurde.

(wb, wwdxc BC-DX TopNews June 7)

Inspektion DLF Langwelle Donebach 153 kHz. ... und heute ist der DLF auf 153 kHz wieder ganzaetig on air, der erste Tag seit dem 25. Mai 2010. Die jaehrliche Inspektion ist also abgeschlossen, vom 25.5. bis - auch sonntags - 6.6.2010. Dann gehts bald auch in Aholming oder Oranienburg los

...

(wb, wwdxc BC-DX TopNews June 7)

Nachdem ich gerade eben nach einem \*HUST\* anderen DRM-Sender Ausschau gehalten habe, dachte ich, schaust du mal auf 711 kHz vorbei und bitte: 15dB vom SWR und sogar stabiles Audio, Uebernahme von MDR Info, Bericht ueber Kuehe, Wetterbericht. Und jetzt (2300 UTC) brichts waehrend der huebschen Pausenmusik aber auch wieder auf 8 dB ein, um dann wieder auf 12 zu steigen usw usw...

(Douglas Kaehler-Kiel-D, A-DX June 8)

603 The German radio station Oldiestar, which broadcasts to Brandenburg and Berlin on 96.7 and 104.9 FM as well as on DVB-T, has added a mediumwave service on 603 kHz for Berlin. The station's website says it is using a 20 kW transmitter at the Zehlendorf transmitter site in Oranienburg, with a 129 metre high antenna. The station plays hits of the 60s, 70s and 80s.

A video, if you have luck and can access it:

<[http://www.youtube.com/watch?v=\\_9h9q-CNPfw](http://www.youtube.com/watch?v=_9h9q-CNPfw)>

Luck because it uses music, and this is a very good method to get videos geoblocked.

I like especially the shot of the control panel, with only a single transmitter on air, as the missing levels on the other meters reveal. (One channel of the stereo program level meter indicates the transmitter input while the output of the modulation monitor is plugged into the other one. It's the same at Nauen, too.)

(Kai Ludwig-D, dxld May 29)

Hi dear Jeff,

GERMANY [GAMBIA non] From: "Radio Miami International"  
Sent: Sunday, June 06, 2010  
Subject: Re: UNID via Media & Broadcast 15225, RMI provided ?

Hi Wolfgang.

This new program for the Gambia began on May 22. It's 15 minutes per week,  
and the program is in various local languages as well as English segments.

The organization which sponsors and produces the program is the Save the  
Gambia Democracy Project. Their website is <[www.savethegambia.org](http://www.savethegambia.org)>

All the best.

Jeff

Das Save the Gambia Democracy Project <[www.savethegambia.org](http://www.savethegambia.org)> hat seit dem  
22. Mai 2010 wieder eine Kurzwellensendung: 1815-1830 UT: 15225 (Nauen  
125kW, 221 degr) Samstag. Englisch und afrikanische Sprachen. Die  
Sendungen sind die Wiederaufnahme eines frueheren Exilprogramms. Nach  
Testsendungen im April 2005 hatte das Save the Gambia Democracy Project  
von Juni 2005 bis Maerz 2006 eine woechentliche halbe Stunde aus Juelich.

Die Sendezeit wird erneut ueber den Sendezeitmakler Radio Miami  
International bei Media Broadcast angemietet.

Die Exilgambier stehen der politischen Lage im Gambia natuerlich kritisch  
gegenueber, haben aber fuer dieses Urteil aber auch  
Menschenrechtsorganisationen auf ihrer Seite. In einem Ranking, den  
Freedom House und andere Medienrechtsorganisationen im Mai 2010 zum Tag  
der Pressefreiheit veroeffentlicht haben, liegt Gambia mit 81  
Negativpunkten gleichauf mit Russland auf Platz 175 von 196 bewerteten  
Laendern und Gebieten. Zum Vergleich: Deutschland hat 17 Minuspunkte; das  
bestbewertete afrikanische Land ist Mali mit 25 Negativpunkten.

HONG KONG/CHINA 675 "Talked to a friend of mine at the RTHK (Radio Television Hong Kong) technical department over the status of 675am used by the BBC in Hong Kong. He told me that with the Sino/British Joint Declaration over HK signed in 1985 China is to maintain 675am until 2047. He told me if the Mainland had it there way they would turn it off, but cannot do it. So instead they lowered the power so much that at the moment less than 8% of the territory has reception. The government has said that if the transmitter was to break it would not be repaired or replaced.

This is the same case with the English channels from Hong Kong Commercial Radio and Metro Radio Plus. These two only maintain English frequencies and carry programs from international stations like VOA, DW and RFI. But again they also lowered power and have become nothing more than a computer playing file after file."

(Brett Graham, Hong Kong, dxld April 21, ARC MV-Eko, Olle Alm-SWE, June 2)

INDIA 17510 Re: audio quality on AIR/BES outlets a.s.o.

AIR Vividh Bharati on 17510 kHz, 4th June 2010.

AIR Vividh Bharati (VBS) on 17510 khz when checked at 8.50 hrs. Relaying the "Manchaahe geet" programme. At 9.00 male announcer - "Vividh bharati ke Shrota'n kaa hum shortwave 9870 khz mei swagat hai" (We welcome VBS listeners to shortwave 9870 kHz). Opens to a special programme on songs filmed on yesteryear superstar Dharmendra. At 9.04 abruptly changed to instrumental music intro followed by scheduled Indonesian (?) service. Quick check at the VBS usual frequency of 9870 kHz, which continued with the regular VBS programme.

Either AIR is testing new frequencies for VBS or (more likely) the usual goof up by the transmission technicians.

(ashok\_satpathy, DXindia June 4)

> (more likely) the usual g o o f u p by the transmission technicians.

Sorry to say, thats trueness at least on Delhi and Goa tx sites, which engineers produce 'own goals' each week. Except the excellent engineering team at Bangalore 500 kW site to praise, which works on very professional level.

(73 wb df5sx, wwdxc, DXindia June 4)

I understand technicians at Delhi have a more complex work of sorting and sending correct feeds to various TX location. Still its inexcusable and only demonstrates incompetency.

On a good day, transmissions from Bangalore are excellent. The national channel at 9425 ex BLR is great most days. Such a shame that the studio feed from Delhi is so muffled. They can at least invest in a few good microphones and better acoustics.

(AK bht5180, DXindia June 4)

I don't think the problem with studio acoustics, (You can try listening them via satellite) actually the problems lies in feeder system, and transmitter, BES is the consultant they are now very busy to pushing

purchase of some new DRM transmitter but no body is working to upgrade the old transmitters in use, the txrs should be replaced with digital ones, the audio feeding and modulation units needs to be replaced and obviously we need to replace few technicians too. But this all things are very hard here as we have a democracy of unions and strikes ...

1386? kHz [c.f. bc-dx #966] - 29 31 17.36 N 47 41 24.74 E  
Two-year delay in installing 600 kW medium wave transmitter for US  
broadcasts to Iran.

CNN, 17 May 2010, Charley Keyes: "A 'high priority' part of U.S. efforts  
to reach out to Iranians has been silenced because of a two-year delay in  
building an important radio transmitter, according to a new government  
report. The State Department inspector general's report says the delays  
hurt U.S. efforts to broadcast news and information into Iran in crucial  
periods during the 2009 Iranian election and the following civil unrest.

...

The 600,000-watt transmitter designed to reach a high priority audience in  
Iran was initially slated to be operational by May 2008. But a two-year  
delay of the \$5.2 million project meant 'the powerful transmitter was not  
available following the June 12, 2009, disputed election in Iran, and it  
remains unavailable,' the inspector general report notes. 'Existing  
medium-wave assets at the Kuwait transmitting station can reach only a  
narrow band of the western portion of Iran,' the inspector general's  
report continues. Iran's government has increasingly limited internet and  
media access inside Iran. ...

'The contracting challenges at the Kuwait Transmitting Station have been  
resolved. Acceptance testing and final commissioning of the transmitter is  
scheduled for May 2010,' Broadcasting Board of Governors spokeswoman Tish  
King told CNN in an email response to questions. 'If the tests go as  
expected, the transmitter should be ready to go operational by the autumn  
of 2010.' The Kuwait site has been operating since 1983 and there already  
are already eight U.S. transmitters there." (kimandrewelliott.com via

LIBERIA 4025 Star R, site? (Monrovia?), 2048-2106, 05 Jun'10, Vernacular, talks, news in English at 2101; gone at recheck 2115; 44343, adj. RTTY QRM. Noted s/off at 2108 on 06 Jun'10.

(Carlos Goncalves-POR, wwdxc BC-DX TopNews Jun 8)

LITHUANIA 9635 / 6130 [JAPAN non] NHK Radio Japan in Russian today was on new 9635 (in A-10 was 6130) kHz, 0430-0500 UT.  
(Rumen Pankov-BUL, wwdxc BC-DX TopNews June 2)

Re NHK. I guess NHK relay not on new frequency. The engineer in Sitkunai forgot to switch the transmitter frequency from RLiberty 9635 kHz to NHK 6130 kHz frequency at 0427-0457 UT ...

RFE/Radio Liberty, Tatar/Bashkir  
9635 0300-0400 100 79 Sitkunai LTU IBB/RFE  
9635 0500-0600 100 79 Sitkunai LTU IBB/RFE  
(wb, wwdxc BC-DX TopNews June 2)

MADAGASCAR 17690 Came across of a very strong carrier just at 1214 UT. Madagascar on air here very early, S=9+15...25dB only carrier. Realized regular scheduled NHK French service from 1230-1300 UT, booming in then.  
(wb, wwdxc BC-DX TopNews June 6)

MADEIRA RTP "Antena 1 Madeira" - this is current status of their transmitters. 603 Pico do Areeiro (Madeira island) awaits a new monopole to replace the one that collapsed back in FEB '10, i.e. if the RTP administration doesn't choose to shut this channel too. I suppose a decision won't be known in many months as the cost of such an antenna may easily surpass that of a 10 kW tx.

1125 Ponta do Pargo broke down, so it awaits replacement of a damaged part.

1332 Senhora do Monte is the only active transmitter at the moment. From the set of MF transmitters. used by the RTP Antena 1 Madeira, only one is solid state.

PEF-Posto Emissor do Funchal, Funchal: They are still active: 1017 Santana, 1 kW 1530 Funchal, nominal 10 kW

The planned move to Chao dos Balcoes (this is not far from RTP's Pico do Areeiro site) has not materialised so far, so 1530 is still at reduced power so as to avoid QRM on neighbouring households. According to the station, no new transmitter. will be installed on the new site where a new tower has already been installed; they'll be moving the old valve transmitter. instead... On a quiet receiving place, both 1530 & 1017 are audible during daytime, particularly the latter despite adj. QRM (de E), but 1530 is putting a terribly weak signal that's clogged by noise albeit audible at night time when it must fight QRM de CVA & STP (VoA).  
(Carlos Goncalves-POR 13.4.2010 via Ydun Ritz-DEN medium wave info, ARC MV-Eko, Olle Alm-SWE June 2)

MAURITANIA 783 R. Mauritanie, Nouakchott, 2052-2112 UT on 06 Jun'10, Arabic, vy. fast reading of names - don't know how the speaker managed to keep such rhythm! -, prayer at 2100 UT; 54444, adj. QRM only; // 4845 kHz.

4845 R. Mauritanie, Nouakchott, 0921-0940 UT on 05 Jun'10, Arabic, talks; 25442. QSY 7245 kHz shortly after the end of the obs.  
(Carlos Goncalves-POR, wwdxc BC-DX TopNews Jun 8)

MYANMAR 5915 Myanma Radio - Minorities and Distance Learning Services, 1331-1345, April 9. All in English with lecture analyzing poems for

meaning; even with CRI QRM was able to understand some of the lecture, as per the audio attachment.

5985.78v, Myanma R., 1351-1352, April 9. In vernacular; usual theme music at start and end of this often heard standard slogan; in English it would be something like:

Only with stability and peace will the nation develop. Only with stability and peace will democratization process be successful. Anarchy begets anarchy, not democracy. Riots begets riots, not democracy. Democracy can be introduced only through constitution. We favor peace and stability. We favor development. We oppose unrest and violence. Wipe out those inciting unrest and violence. VOA, BBC sowing hatred among the people. RFA, DVB generating public outrage. Do not allow ourselves to be swayed by broadcasts designed to cause trouble.

Clear mention of "VOA, BBC" and "RFA, DVB"; have often heard this slogan in English during their English segment after 1530; poor-fair.

5915, Myanma Radio - Minorities and Distance Learning Services, 1418-1430, April 14. All in English; continuing the lecture about the themes found in poetry. Found that 5985.78v was off the air at this time.  
(Ron Howard-CA-USA, dxld April 15)

NIGER 9705 La Voix du Sahel, Niamey, 1148-1220 UT on 07 Jun'10, Vernacular, Afr. songs, talks; 15431. The propagation conditions must have been quite adverse, too tiny signal, and I bet they're on reduced power, but then the usually strong Mali 9635 kHz was also too bad.  
(Carlos Goncalves-POR, wwdxc BC-DX TopNews Jun 8)

# co-ch AIR in English from 1330

& co-ch RRI in Romanian till 1655

+ co-ch CRI in Turkish/Russian and Radio Belarus in German/English

\* co-ch Radio Belarus in English/Russian

(R BULGARIA DX MIX News, Ivo Ivanov, via wwdxc BC-DX TopNews May 17)

As Dave Kenny also wrote recently: I was able to confirm VoNigeria in English on 9690 kHz from 0900 to 1500 UT as per the announcement monitored by Tony Rogers. The signal here was very weak and at times barely audible, but I have no doubt that Nigeria was there in English throughout this period.

(Yes, noted on June 8th around 10-11 UT on our noon, same weak level, wb.)

6089.9 R. Nigeria, Kaduna, 2228-... UT on 04 Jun'10, Vernacular, talks;

54433, noisy carrier, adj. QRM.  
(Carlos Goncalves-POR, wwdxc BC-DX TopNews Jun 8)

540 More MW heard: Sokoto State Broadcasting on 540 kHz heard at 2255 UT on 1 June for the first time - male speaker in Hausa (I think) with animated talk followed by another more soft-spoken announcer with close-down information. Orchestral anthem sign off at 2301 UT, short and sweet. This is the most north-westerly of the Nigerian states, bordering Niger. Also, Jigawa State BC on 1026 kHz heard with anthem sign-off at 2319 UT on 26 May. I've got that anthem pretty much off pat now!  
(Graham Bell-AFS, dxld June 3)

756 R. Oyo (pres), Ibadan, 2112-2124, 06 Jun'10, Vernacular, talks, tribal tunes; 44433, QRM de POR, viz. the tiny Antena 1 tx at Lamego 1 kW.  
(Carlos Goncalves-POR, wwdxc BC-DX TopNews Jun 8)

PAKISTAN Delay in complete installation of NEW shortwave transmitters at Landhi, Karachi, Pakistan.

Radio Pakistan is in the process of installation of two new shortwave transmitters at Landhi Karachi. The transmitters are of 100 kW. Owing to fund constraints, further delay is expected in completion of the project and bringing the transmitters in operation. An amount of Rs 64.812 million has been provided for financial year 2010-11 and further amount of Rs 13.929 million will be provided in FY 2011-12. Total cost of the project is Rs 433.469 million. An amount of Rs 354.728 million has been spent on the project so far. So we will have to wait for two more years to hear any clear signals from Radio Pakistan.  
(Aslam Javaid-PAK, dxld May 26)

Hello Aslam and Glenn, This is sad news - let us hope that the four remaining transmitters at Rewat will continue to operate, and that the two new units will still be in a useable condition by the time they are required to operate. What sort of "planning" was this when the necessary antennas were available at Rewat, but at Landhi the old ones were not?  
(Noel R. Green-UK, dxld June 3)

SOLOMON ISL SIBC 5020. By the way, I think that SIBC Honiara is leaving  
their transmitter on 5020 kHz on overnight unmodulated. I don't check  
often, but over the last week I have checked twice and there is certainly  
a strong carrier there. I thought they couldn't afford the electricity  
bill and dropped BBC overnight? Very strange if it is them. Trouble with  
their transmitter remote control units perhaps? ...  
(Pacific downunder mail via William Hague-UK, NWDXC June 5)

SOUTH AFRICA 3320 SAUK / R. Sonder Grense, Meyerton, 1835-1856 UT on 04 Jun'10, Afrikaans, light songs; 35333, but deteriorated enormously towards 1900 UT; vy. good at 2200 UT.

SWEDEN Swedish yachters petition the minister of culture, Mrs. Lena Adelsohn Liljeroth, to intervene in order to rescue the overseas transmissions of Radio Sweden. The background is that two months ago the management of Swedish Radio (SR) decided to cancel the traditional short- and mediumwave transmissions. From November 1 listeners are referred to the web service of SR, so that in practice a computer with an Internet

connection is required instead of a broadcast receiver. This could become expensive both for yachters and ordinary tourists.

UGANDA 4976 R. Uganda, Kampala, 1855-1915 UT on 04 Jun'10, English, Afr. pops, talks; 44343.

(Carlos Goncalves-POR, wwdxc BC-DX TopNews Jun 8)

UKRAINE [BELARUS/RUSSIA] I just found out that VoR is back on Sosnovy transmitter starting from June 1! Acc. to DXing.ru, it's in Russian 1300-1500 and 1700-1900 UT on 1170 for "Europe and Belarus." Another SW change (in addition to VoR English using 7440 0000-0200 for its NA coverage) is that VoR German can be heard from 0900-1000 on 11655 kHz.

VoR used to run an AM/MW relay in Vilnius for its Russian service. But that was stopped a few months ago due to financial difficulties. More notably, an AM relay in Belarus was also discontinued. (Many DX publications still list Belarusian tx on 1170 as being used by VoR).

Albania is indeed a "very" old Soviet friend as the Soviet-Albanian relations were severed during Khrushchev. The Russian service of R. Tirana was jammed heavily through most of its existence. The relations between two countries are rather cold to these days.

(Sergei DX, dxld June 2)

7440 Voice of Russia New Frequency for North America. Good morning, noted Voice of Russia on 7440 kHz in "our deep night" this June 1st/2nd, most uncomfortable monitoring time here in southwestern Germany.

2348-2350 UT, TX was already on air for opening check, when logged at 2348 UT, much fluttery signal of S=9+15dB.

Next check at 2352-2357 UT, TX was OFF air. TX came on air after all at 23.57:20 UT. 23.59:00 UT start of Kremlin chimes interval signal.

June 2nd at 0000 UT ID "This is Moscow, you are tuned to the World Service of Voice of Russia". Female newsreader, Israel's air strike against Gaza strip in Palestine, 19[sic] peoples killed on Israel marine action on international water. 600 human rights activists brought food and good aid to Palestins at Gaza in Palestine. But were forced by Israeli marins on international water area... etc.

11655 Man hat beim deutschen Dienst von R Moskau VoRUS realisiert, dass fuer die sehr traditionelle 1100 MEZ/MESZ Aussendung die MW Sendungen im deutschen Relais nicht auslangen. Und die DRM Sendungen werden nur von ganz wenigen Hobbyisten gehoert.

Jetzt gibt es wieder eine AM Sendung um 0900-1000 UT auf 11655 via Lvov Krasne-UKR Sendezentrum. Kommt hier mit S=9+45dB herein.

(wb, wwdxc BC-DX TopNews June 2)

7440 could be Lvov tx in Ukraine again from June 1st ? Because the election winner in Ukraine is much more Russia connection friendly now. Could be high power transmission to North America 7440 LV 600 kW 303 deg.

And RUI Kiev can pay for their own main power debts then ... Russia is

'hard up' of functioning antennas towards North America from Europe. Old friends on the southwards Balcan in Bulgaria and Albania are now independent. And to lease powerful TCI antenna at Sitkunai-Lithuania, may avoided by injured Russian ego, but renting fares on latter are much higher and doubled recently at LTU.  
(wb, wwdxc BC-DX TopNews June 2)

A bit down the page the second table, "Liste der Senderstandorte" ("list of transmitter sites"). The first table has not been updated so far, but this one has, with 11655 quickly added at the bottom. And it clearly says "Lwow".

What should perhaps be explained, too: "Very same transmitter" than 7440 because usually the newest one, finished around 1992, is in use at Krasne. They have a second one from 1972, but reportedly they do not use it for regular operation at present, since never more than one frequency is on air since 2007, after nothing was on air at all between 2002 and 2007.

Another musing: So it's not just about 7440, since at least one further transmission (perhaps even further ones have been added and are just not known yet) for VOR started. Looks indeed as if RRT, the organization in charge for the broadcasting transmitters in the Ukraine, actively offered the transmitter to VOR.  
(Kai Ludwig-D, dxld June 6)

Thanks to Sergei - Another SW change ... is that VoR German can be heard from 0900-1000 on 11655 via Lvov-Krasne-UKR. [in past decade mostly from Moscow 15455 kHz]  
(Sergei Sosedkin, dxld)  
Yes, powerful S=9+45dB signal noted today at 0910 UT.

See  
[http://german.ruvr.ru/radio\\_broadcast/frequenzen/](http://german.ruvr.ru/radio_broadcast/frequenzen/)

shows location Lwow Krasne in Ukraine

but  
[http://english.ruvr.ru/radio\\_broadcast/schedule/](http://english.ruvr.ru/radio_broadcast/schedule/)  
shows only new 7440 kHz, but no location Lvov Krasne.

Here is my log of proper stations heard here in 0900-1000 UT slot June 6th in southwestern Germany.

11645 AVL S=9+10dB  
11655 LV-UKR S=9+45dB  
11740 SMG S=9+30dB  
11830 GAL S=9+35dB  
11995 SIN S=9+25dB  
12020 LIS S=9+20dB  
12060 MSK S=9+20dB  
(wb, wwdxc BC-DX TopNews June 6)

... Has VOR axually reached a deal with the new pro-Russian Uke government to use the Lviv transmitter, just like the good old Soviet days? As Wolfgang Bueschel also speculates, this could be a temporary measure to keep the transmitter site in business if RUI itself can not afford to use it.

(Glenn Hauser-OK-USA, dxld June 2)

... there is no any Voice of Russia AM program being transmitted by our Moscow Taldom transmitters now. The amount of AM programs had been extremely reduced by the end of March. Voice of Russia ordered us only DRM transmissions for 6 hours. Such the crisis influence.

(wb, wwdxc BC-DX TopNews June 7)

UKRAINE [RUSSIA non] Additional frequency for Voice of Russia:

0000-0200 on 7440 LV\* 600 kW / 303 deg to NoAm in English WS

0900-1000 on 11655 LV 600 kW / 303 deg to WeEu in German

\* probably tx

U.K. 5910 Special Dutch broadcasts this week.

On Tues-Fri this week we have been broadcasting a special relay of a popular Dutch domestic network Radio 2 programme from NCRV on 5910 kHz at 1500-1700 UTC towards the French Alps. The programme is called Knooppunt Kranenburg. This week it includes reports from Alpe d'Huez in France where famous Dutch people are climbing the best-known mountain in the Tour de France to raise money for the fight against cancer. Technical arrangements have been made by RNW as follows:

Station: Rampisham

Dates: Tuesday 1 June - Friday 4 June (four days)

Time: 1500-1700 UTC

Frequency: 5910 kHz

Power: 500 kW

Azimuth: 140 degrees

(RNW Programme Distribution; RNW MN newsletter 3 June;

via Dave Kenny BrDXC-UK June 4)

5910 Dutch domestic network Radio 2 programme from NCRV on 5910 kHz at 1615 UT June 4th, strong Rampisham signal of S=9+15dB here in Stuttgart.

Slight fading, two sports reporter mens report about 'fitjes'. Both adjacent channels free.

(wb df5sx, wwdxc BC-DX TopNews June 4)

U.K./SRI LANKA According to the Ofcom Radio Broadcast. Update May 2010 published on 1 June 2010. IBC Tamil Ltd which used to operate on short wave too ceased to exist. On the other hand there is a new "Sathy Media Ltd" licensed to provide news, information and music for the Tamil community under the former brand name. A google search for "Sathy Media Ltd" showed no hit except for the Ofcom item.

<[www.ofcom.org.uk/radio/ifi/rbl/rbupdates/update0510/](http://www.ofcom.org.uk/radio/ifi/rbl/rbupdates/update0510/)> of 1 June 2010

Commercial Radio

Licences issued in this period.

Licence Type Licensee Service Name/description.

Local DSP Sathy Media Ltd IBC Tamil / A service comprising news, information and music for the Tamil community.

RLCS Sathy Media Ltd IBC Tamil / A service comprising news, information and music for the Tamil community.

\*Digital Sound Programme service  
\*\*Radio Licensable Content Service

Services which have ceased to be licensed (handed back or revoked) in this period.

Service Name Licensee Location Type of service.

IBC Tamil Tamil Media Ltd\* satellite RLCS\*

\* Radio Licensable Content Service

\* This licence ceased to exist upon dissolution of licensee.

DAB station Format Changes

The following multiplex Format changes were agreed in this period:

Change Multiplex

Addition of IBC Tamil - A service comprising news, information and music. for the Tamil community. London III.

#### Inside The Air Force's Secret PsyOps Plane.

OFF THE EASTERN SEABOARD - Name a recent U.S. military operation, and you can pretty much guarantee that a specially modified Air Force plane was somewhere in the vicinity, trying to influencing the minds of the people below. It's called the Commando Solo. Ordinarily, civilians are not allowed on board.

The 193rd Special Operations Wing operates a fleet of three of these EC-130J aircraft, cargo haulers that have been converted into flying radio and television stations. These "psychological operations" aircraft can broadcast their own signal over AM and FM radio, UHF and VHF television bands - or override broadcast stations on the ground, something they apparently did during operations in Bosnia and Iraq.

I recently accompanied a Commando Solo crew on a training mission. It was an unusual opportunity to see the crew at work testing their radio and

television equipment at full power.

The crew calls it "200-mile work": In order to avoid interference with domestic frequencies - the aircraft can crank up to 1,000 watts of effective radiated power - the aircraft flies more than 200 miles off the East Coast. . .

By Nathan\_Hodge May 27, 2010 - Air Force  
(via kimandrewelliott.com via dxld June 3)

VANUATU ... 1715 UTC on Friday 4 June ... had a quick listen to 60 meters. Mostly quiet, but there was an unmodulated carrier on 5020 kHz (presumably SIBC) and Vanuatu was absent with their overnight unannounced music programme on 3945 & 5055 kHz. Dunno yet if that's permanent... (Pacific downunder mail via William Hague-UK, NWDXC June 5)

ASCENSION ISL Radio Broadcasting on Lonely Ascension Island

The BBC ATLANTIC Relay Station.

Last week here in Wavescan, we presented the story of the several different radio stations, mediumwave, FM and communication, all located on lonely Ascension Island, out there in the central Atlantic Ocean, halfway between South America and Africa. We take up the Ascension story again this week, and this time, it is the tale of the BBC Atlantic Ocean Shortwave Relay Station. Here is what happened.

During the year 1961, the BBC sent a team of technical personnel to Ascension to conduct a feasibility survey; and during the following year, the British government gave approval for the setting up of a shortwave relay station on Ascension Island for use in rebroadcasting the programming from the BBC in London to the many countries in Africa & South America.

During the following year, as a preliminary to the construction of the station, Cable & Wireless, C&W, set up a small shortwave station in a caravan, a trailer home, at English Bay and transmitted a series of test broadcasts. It is probable that these transmitters were amateur or communication transceivers with a power output of 1 kW or less.

However, in spite of the low power, these test broadcasts were noted by international radio monitors in Europe & North America. Unfortunately, C&W stated that these test broadcasts were of a private nature and they indicated that they would not issue any QSLs in confirmation.

Work on this massive new project on ascension Island began during the next year, 1964, and we should remember that everything had to be imported from England and elsewhere. Ascension was once uninhabited and everyone on the island has come in from another country. Even children born on the island are not granted Ascension citizenship, they are considered to be citizens of their parents' country.

This huge new BBC shortwave station was constructed on the edge of English Bay, located at the northern tip of Ascension Island. The original plans called for four transmitters at 250 kW each and a series of twenty reversible curtain antennas.

Monitoring reports during that era tell us that the first transmitter was taken into service two years later again, on July 1, 1966 in the BBC service into Africa. Six months later, the second transmitter was activated, and early in the following year, all four transmitters were fully operational. To honor the occasion, the local postal authorities issued a series of four postage stamps depicting various scenes at the new station.

A QSL letter from the station in May 1989 stated that another shortwave transmitter at 250 kW had just been activated, the fifth, and that the sixth would soon be operational. These two latter transmitters were

previously on the air at the large and historic BBC shortwave station at Daventry in England, and when Daventry was closed these two units were removed and shipped for installation on Ascension Island.

The original BBC Receiver Station was installed at Butt Crater, three miles from the transmitter station, and it contained six receivers and two rhombic antennas beamed for reception from England. However, a quarter of a century later, a satellite receiving dish was installed at the English Bay transmitting station, and Butt Crater was then maintained for standby usage.

In addition to the two radio stations, transmitter & receiver, the BBC also operates support facilities for its personnel, and these include a school, hospital, farm, and power generators, as well as local radio broadcasting stations. Currently, it is stated, the British government owes Ascension Island more than one million pounds, and this places the entire island and all of its activities and its nine hundred imported workers into bankruptcy.

Over the years, the BBC Atlantic Relay Station has re-broadcast the programming from other well known international radio organizations. In 1994, the first of these new relay services began with the programming from the Voice of America. Twenty years later, RAI Italiana took out a relay from the BBC shortwave station on Ascension Island.

Since then a dozen or more other international broadcasting organizations have increased the international coverage of their programming with relays from the Ascension Island shortwave station. Among these extended relay services from the BBC shortwave station on Ascension are the following:-

Government Stations NHK Tokyo Japan RCI Montreal Canada CRI Beijing China  
Radio Prague Prague Czechia RFI Paris France RTE Dublin Ireland

Religious Gospel Stations HCJB Quito Ecuador FEBA England WYFR Oakland  
California USA

During the events associated with the brief 1982 war in the South Atlantic, the usage of the Ascension shortwave station was commandeered by the British Ministry of Defence for the relay of two different forms of programming beamed to the Falkland-Malvinas Islands.

Beginning at 2300 UTC on May 19, a program service identified as Radio Atlantico del Sur was broadcast daily via Ascension Island. At times two channels were noted in parallel. The final broadcast of Atlantico del Sur was a little less than a month later, on June 15.

The other program service beamed to the South Atlantic during this short era was on behalf of the BFBS, the British Forces Broadcasting Service. These two program services originated in London and they were relayed to Ascension Island via communication transmitters located at Daventry.

An additional BFBS program relay was on the air during the Gulf War in 1990. It is known that feeder transmitters in England relayed the programming to another transmitter location, and research would suggest that this was also located on Ascension Island.

QSL cards, and at times letters, have been issued by many of the

organizations whose programming has been relayed over the Ascension Island shortwave station, and these would include:- Voice of America Radio Canada International NHK Tokyo Radio France International As well as the BBC itself and the two program series, Atlantico del Sur & BFBS London.  
(Adrian Peterson-IN-USA, AWR Wavescan script May 30 direct and via dxld)

AUSTRALIA/MALAYSIA Broadcast Australia and RTM Malaysia order Continental Electronics DRM Transmitters.

Broadcast Australia has asked DRM member company Continental Electronics to supply two new DRM-ready 100 kilowatt transmitters for two of its short-wave stations. The purchase represents the first step in Broadcast Australia's plan to enhance its digital short-wave (HF) broadcast capabilities throughout its network of transmitters. The state-of-the-art Continental Model 418G-DRM transmitters will enable Broadcast Australia to transmit programming in analogue AM and digital (DRM) modes from both stations, Tenant Creek and Shepparton. Both transmitters are expected to be on the air and fully operational by late summer.

Radio-Television Malaysia (RTM) has chosen the same Continental model for its new short-wave transmitters. The three 100 kilowatt DRM-ready HF transmitters from Continental, along with other associated equipment, are to be installed in the RTM transmitting station at Kajang, and will enable RTM transmissions in digital DRM format as well as conventional analogue AM. RTM's new transmitters are expected to be on the air and fully operational before the end of the year.

BRAZIL 5990 R. Senado, Parque do Rodeador DF, at 2132-2201 UT on 14 Jun'10, selection of Braz. rhythms & songs, a short report on legislation, TC, freq. announcement (5990 kHz + VHF-FM chs., one of them still testing), then A Voz do Brasil started at 2200 UT but it was interrupted by a short s/off announcement. The tx was left on for a minutes' time carrying some noise like signal.

(Carlos Goncalves-POR, wwdxc BC-DX TopNews June 15)

CHINA Voice of Shangri La. Kunming, Yunan 6035 kHz. Shangri-La is Yunnan People's Radio Voice, is the launch of our existing three independent radio stations covering the external one, is the only province's foreign broadcast media, the party and the government's "mouthpiece" Programs adhere to contemporary and border, Yunnan features, for the Southeast Asian Chinese, language, target country and the Chinese border line of 25 people over the age of its audience.

Vietnamese and Chinese is now operating two radio language. Internal structure as a director of division level and the two Zheng Keji editing broadcast sector. Use short-wave frequency 6035 kHz, 50 kW transmitter power. Two antennas can be effectively covered Vietnam, Laos, Burma our border counties (cities) and in Hanoi, Vietnam, Bangkok, Thailand, Southeast Asia as the center of the seven South Asian countries and regions.

Target audience, covering about Announcers at work. 8,000 Vietnamese people, Chinese target audience (ethnic Chinese) about 1700 people. Signals can also affect the West Asia, Asia Pacific, Europe and America countries and regions.

Broadcast 5 hours a day, of which 3 hours Vietnamese, Chinese 2 hours. Via Ynradio net website.

<<http://www.ynradio.net/guoji/>>

Identifies in English at the top of the hour as "This is the Voice of Shangri-La brought to you by Yunan Radio". Scheduled 0900-1400 UT daily. Editor.

(NZL DX Times magazine, June 2010)

CHINA/ALBANIA Switch error in Radio Netherlands Studio. If I remember correctly, in the pre-satellite days Bonaire relayed news/current affairs from an off-air pickup; the rest of the programming was shipped from Hilversum on tape and played back from the relay site.  
(David R. Alpert, dxld June 12)

A particular mystery were the Radio Beijing relays via Albania. I have been told that it has been never really figured out what the audio source was.  
(Kai Ludwig-D, dxld June 12)

Re Radio Beijing relays via Albania.

As Olle Alm from Sweden, the China specialist on many WRTH issues explained often in the past:

During VIETNAM war time SZG Shijiazhuang powerful 600 kW site in China was used as on-air feeder of Radio Peking in English, and relayed at Albania relay on 7120 and 9780 towards North America at 0100-0200 and 0300-0400 UT. Spanish was also relayed 7120 and 9507/9500 kHz at 2300, 0000 and 0200 UT.

CHN Shijiazhuang 2 x 500/600 kW, 6 x 100/70 kW  
3 big antenna arrays in G.E., 2 x foreign service, 1 x domestic service

SPAIN [non] The new DRM transmitter of REE at the Cariari de Pococi, COSTA RICA relay is still bleeding far beyond the legal 10-kHz bandwidth so touted by DRM as making it a good neighbor to analog signals. June 14 at 0004, shortly after opening of 2-hour transmission centered on 9630, I can hear the DRM at least as far as plus and minus 20 kHz, not 5 kHz, i.e. down to 9610 and up to 9650, or slightly beyond both.

Yes, the major brunt of this DRM is in the 9625-9635 band, but instead of cutting off sharply at the edges, it progressively becomes weaker, and I can imagine what it would look like on a spectrum analyzer.

So 9625 CBC Northern Quebec is totally blocked for two prime evening hours so much for Randy Bachman's Vinyl Tap and Saturday Night Blues and their fan in Costa Rica. It probably bleeds even further than 20 kHz in proximity to the transmitter.

Plus, REE itself direct from Spain, presumably // programming on 9620 is degraded by the DRM jamming; not much I can detect on other 9610-9650 channels.

This and all other DRM transmissions should be moved OUT of the analog SW broadcast bands, where they cannot possibly be good neighbors, into the fixed bands, e.g. for this to the middle of the 10 MHz band, where there is plenty of open space; just ask Sound of Hope and Firedrake.

DRM proponents originally decided that in order to get noticed, they should be mixed right in there with the analogs. They certainly succeeded in that, especially here, right smack dab in the middle of the 31m band, despite the overwhelming negative PR it causes for the entire idea.

BTW, the 00-02 DRM transmission to NAM could easily contain English for the first hour, but I suppose it does not, as the CR relay has never condescended to do that even in analog.  
(Glenn Hauser-OK-USA, dxld June 15)

Hoerertreffen am Rande der  
HAM RADIO in Friedrichshafen am 26.06.2010

Die auf der HAM RADIO anwesenden Hoerer von KBS, Seoul und Radio HCJB,  
Quito, treffen sich am Abend des "Messe-Samstags" (26.06.2010) ab 20.00  
Uhr Ortszeit im

Hotel Koenigsaecker  
Zeppelinstrasse 299  
88048 Friedrichshafen-Fischbach

gleich bei der Bushaltestelle "Hotel Mayer" in  
Friedrichshafen-Fischbach  
und zwar schraeg gegenueber vom Hotel Mayer,  
ca. 200 m Richtung "stadtauswaerts"

Wir treffen uns dort auf der Gartenterrasse (bei Regen im  
Fruehstuecksraum). Ab 19.00 Uhr Ortszeit koennen bereits anwesende Hoerer  
gemeinsam das DX-Programm von Radio HCJB hoeren. Um 22.00 Uhr Ortszeit  
soll dann gemeinsam die Hoererpost Sendung von KBS gehoert werden.

Als Empfaenger sind vorhanden:  
SONY ICF 2001 D (plus kleiner Wurfantenne)  
und als Reserve-Empfaenger: SONY ICF 7600 D.

Die Gartenterrasse wird bewirtschaftet, so dass niemand verhungern oder  
verdursten muss. Das kleine Hotel Koenigsaecker ist bequem mit PKW oder  
Bus (Busse ab Friedrichshafen Innenstadt) zu erreichen, Parkmoeglichkeiten  
sind um das Hotel herum ausreichend vorhanden.

Dieter K. Reibold

ASCENSION ISL/U.K. Last year BBWS had a special midwinter shortwave broadcast to Antarctica on Sunday 21 June 2009 at 2130 UTC.

It's apparantly on every year. I've googled around, but can find no reference to this year's broadcast. So, one to search for. Last year it was on 5950 and 7295 via Rampisham and 7360 via Ascension.  
(Alan Roe-UK, BrDXC-UK June 21)

Look out for BBCWS special broadcast to Antarctica on June 21. BBC World Service at last has some details on the special half hour Antarctic Midwinter Broadcast tonight:

<[http://www.bbc.co.uk/worldservice/programmes/2010/06/100621\\_antarctic\\_midwinter\\_special\\_2010.shtml](http://www.bbc.co.uk/worldservice/programmes/2010/06/100621_antarctic_midwinter_special_2010.shtml)>

The broadcast can be heard in the South Atlantic on Monday 21 June at

2130-2200 UT on the following short-wave frequencies:

RMP 5950 kHz (49 metre band)

RMP 7295 kHz (41 metre band)

ASC 7360 kHz (41 metre band)

First broadcast 21st June 2010.

(can also listen to the programme via this link)

BBCWS special broadcast to Antarctica from Media Network blog

<<http://blogs.rnw.nl/medianetwork/>>

BBCWS to conduct special midwinter broadcast to Antarctica June 19th, 2009

- 11:56 UTC by Andy Sennitt

The BBC World Service will be making a special midwinter shortwave broadcast to Antarctica on Sunday 21 June at 2130 UTC. The broadcast is directed to members of the British Antarctic Survey, and will be on the following frequencies:

a.. 5950 kHz (from Rampisham, UK)

b.. 7295 kHz (from Rampisham, UK)

c.. 7360 kHz (from Ascension Island)

(Source: Travellin' South blog: <<http://alloutput.com/blog/>>

(Alan Pennington-UK, BrDXC-UK June 21)

Didn't even try the other two (7295 and 5950), since 7360 was fine (Rampisham or Ascension?). Brought back happy memories of BBC Calling the Falklands. Tnx Alan Pennington for alert and very 73 de (Anne Fanelli-Elma NY-USA, dxld June 21)

Yes memories on Calling the Falklands and also German Christmas greetings concert on Deutsche Welle, Norddeich and Ruegen Radio maritime services in the 50ties, 60ties, 70ties.

Powerhouse like local radio from Rampisham:

today June 21 at 2130 UT in southwestern Germany:

5950 S=9+40dB

7295 S=9+20dB

7360 20% audio underneath of R Belarus Minsk which is S=9+20dB, - but understandable BBC program content from Ascension.

Midwinter greetings from 2131 UT, with many phone-ins from all over GB and IRL.

(wb, wwdxc BC-DX TopNews June 21)

Strong signals heard here on 5950 (best) and 7295 kHz. Audible on 7360 kHz mixing with Belarus.

Thanks to Alan Pennington-UK for confirming the frequencies

(Alan Roe-UK, BrDXC-UK June 21)

GERMANY [GAMBIA non] This new program for the Gambia began on May 22. It's 15 minutes per week, and the program is in various local languages as well as English segments. The organization which sponsors and produces the program is the Save the Gambia Democracy Project. Their website is <www.savethegambia.org> (Jeff White-FL-USA, RMI, wwdxc BC-DX TopNews June 6)

15225 As reported by Glenn Hauser in this week's World of Radio, there is a targeted broadcast by the "Save the Gambia Democracy Project" - just 15 minutes a week, at 1815-1830 UT on Saturdays on 15225 kHz, via the Nauen site in Germany. In the UK we'll only be getting a signal off the side of the beam. (Chris Greenway-UK, BDXC-UK yg, June 12)

I was able to check for the broadcast from Save the Gambia Democracy Project. 15225 heard well on June 12 from 1815 until 1830 UT. I wasn't able to listen to the entire 15 minutes, but it seemed to be one speaker in a local language (Mandinka?). I didn't hear any English, nor a clear ID. (James MacDonell-NIG, dxld June 13)

I missed the very start of what I presume was the STGDP transmission on 15225 on 12 June, tuning-in to a talk in a West African-sounding language at 1817 UT and listening through to the close at 1830. Just talk, didn't hear any ID, address, mention of Gambia, or anything else to say that this was STGDP, although it wasn't getting my full attention at the time, but undoubtedly it was them. No English. Good reception here. (Tony Rogers-UK, ibid.)

Yes, I heard it too - same to report as Tony. Strong and very clear signal in Kent. Audio a bit "clipped". (Chris Greenway-UK, June 16, ibid.)

GERMANY 810mw 6005sw

Funkhaus Euskirchen broadcast 1000 to 1030, and 1530 to 1600 UT, 30-minute special program from MW 810 kHz Koenigs Wusterhausen and via SW sender Kall (Eifel) on 6005 kHz, daily 26 June to 04 Juli 2010.

Gemeinsame Pressemitteilung von "Funkhaus Euskirchen e.V." und dem Foerderverein "SenderKW" e.V.

Sehr geehrte Damen und Herren,

anbei erhalten Sie die gemeinsame Pressemitteilung von "Funkhaus Euskirchen e.V." und dem Foerderverein "SenderKW" e.V. zum Thema "Die KULTA 20|10 erobert Europa" mit der Bitte um Veroeffentlichung.

Mit der Ausstrahlung des ersten Weihnachtskonzertes am 22. Dezember 1920 wurde Koenigs Wusterhausen zur Wiege des Rundfunks in Deutschland. Acht Jahrzehnte bestimmte der Rundfunk das Geschehen im Ort wenige Kilometer suedlich von Berlin. Seit 15 Jahren ist es nun still auf dem Funckerberg - zumindest was die Ausstrahlung von Radiowellen im Mittelwellenbereich betrifft.

Anlaesslich der Kulturtag "KULTA 20|10" wird vom Funckerberg in Koenigs Wusterhausen in historischer Weise ein Mitmach-Hoerfunkprogramm auf der

Mittelwellenfrequenz 810 kHz unter dem Namen "Welle370" gesendet.

Ab dem 26. Juni 2010 wird in Zusammenarbeit des Foerderverein "Sender Koenigs Wusterhausen e.V." mit den Funkamateuren der Clubstation DL0KWH der Sendebetrieb von diesem historischen Standort fuer eine Woche wiederbelebt.

Allerdings sind die Sendungen nur einige Kilometer im Umkreis von Koenigs Wusterhausen empfangbar. Darum unterstuetzt der in Euskirchen ansaessige Verein "Funkhaus Euskirchen e.V." dieses Projekt. Christian Milling, Vorsitzender des Funkhauses: "Wir finden es fantastisch, dass es Menschen gibt, die sich auf die Wurzeln der Rundfunkuebermittlung besinnen und die Tradition der klassischen Tonuebertragung ueber Mittelwelle aufrechterhalten. Auch wir strahlen unser Programm "RADIO 700" in sogenannter "Amplituden-Modulation" aus. Zwei Vereine also mit dem gleichen Ziel. Da lag die Idee einer Zusammenarbeit natuerlich nahe."

Das Funkhaus Euskirchen uebertraegt in der Zeit vom 26.06.2010 bis zum 04.07.2010 taeglich zwischen 12:00 bis 12:30 sowie 17:30 bis 18:00 Uhr eine je 30-Minuetige Sondersendung aus Koenigs Wusterhausen ueber den Kurzwellensender Kall (Eifel) auf 6005 kHz.

"Die Kurzwelle hat den Vorteil, dass sie eine grosse Reichweite bei kleiner Leistung aufweist", erklart Milling weiter. "Wir strahlen aus Kall die Rundfunksignale gen Himmel ab, dort werden sie reflektiert und kommen viele 100km weiter wieder auf dem Boden an, wo sie empfangen werden koennen. Auf diese Weise reisen unsere Funkwellen bis nach Skandinavien im Norden und Nordafrika im Sueden.

Selbst Leute aus Indien haben sich bereits gemeldet, die das Programm auf Kurzwelle 6005 kHz gut empfangen konnten."

Das Programm der "Welle370" widmet sich waehrend der KULTA -Woche taeglich in der Zeit von 09:55 bis ca. 22:00 Uhr dem Funckerberg und der Stadt Koenigs Wusterhausen, erklart Rainer Suckow, Vorsitzender des Vereins "Sender Koenigs Wusterhausen e.V.":

"Gesendet werden Hinweise zum taeglichen KULTA Programm, Live Uebertragungen der Veranstaltungen oder Beitrage von Interessantem ueber die Rundfunkstadt Koenigs Wusterhausen. Ganz nach dem Motto "Rundfunk fuer jedermann" moechten wir vielen die Moeglichkeit geben, am Rundfunk ueber "welle370" teilzuhaben. Das betrifft nicht nur das Empfangen und Hoeren des Programms, sondern auch das Produzieren und Abstrahlen. Die Besucher der KULTA 20|10 sollen mit einbezogen werden - und so hoert man vielleicht auch Freundin, Nachbar, Schwiegermutter, die gerade live on AIR sind."

Und auch RADIO 700 wird mit kurzen Einblendungen auf der Mittelwelle 810 kHz in Koenigs Wusterhausen zu empfangen sein.

Fuer den Empfang von Kurz- und Mittelwellensendungen eignen sich einfache "Weltempfaenger", wie man sie bei Discountern oder im Fachhandel bekommt. Aber auch Autoradios, das Kofferradio im Keller und Opas alter Roehrenempfaenger sind fuer den Empfang geruestet.

Um welle370 zu hoeren wird das Radio auf den Mittelwellenempfang umgeschaltet - dieser ist meistens mit den Buchstaben AM (fuer Amplitudenmodulation) gekennzeichnet. Wer waehrend der KULTA 20|10 in und

um Koenigs Wusterhausen die Frequenz 810 kHz einstellt ist ganz nah dran am KULTA Geschehen.

Fuer den Empfang von RADIO 700 wird der Empfang im Kurzwellenbereich eingeschaltet - auch hier sind Tasten AM, aber auch KW (fuer Kurzwelle) und SW (fuer Short Wave) die Richtigen. Nun wird das Signal auf 6005 kHz gesucht - und RADIO 700 gefunden.

Probieren sie es einfach einmal aus - Sie werden erstaunt sein, welche Programmvielfalt auf diesen Wellenbereichen noch heute, 90 Jahre nach den ersten Toenen im Aether, zu finden ist.

KOREA Rep of 9785 DW Kimje Relay Full Transmission on June 16. I am pleased to inform you, that there was the full transmission of DW in Chinese via Kimje at 2300-2400 UT on 9785 kHz on June 16 with good signal strength.  
(Takahito Akabayashi-JPN, wwdxc BC-DX TopNews June 17)

Nach meiner Kenntnis ist das die erste Aussendung eines DWL Bonn Programms ueber Sendeanlagen in Suedkorea. Oder gab es solches schon mal in der Vergangenheit?

Durch die englische VT-group und DWL Zusammenarbeit seit dem Weggang letzterer von T-system M&B auch fuer die Anlagen in Sines, Kigali, Trincomalee, Taiwan, Singapur, Moosbrunn, Al Dhabayya, Suedafrika und HRI, um nur einige zu nennen, tuen sich neue Relaismoeglichkeiten auf.

KOREA-South/PORTUGAL 9620 But could also be triangle exchange business, ??? VT-group provider / KBS / DWL. Due of DWL Chinese via Kimje-KOR 9785 relay now at 2300-2400 UT, compensated by KBS Arabic 9620 kHz 2000-2057 UT via Sines Portugal.  
Delete 15365 1900-2000 37,38W RMP 500 168 KBS Ar, see below.  
(wb, wwdxc BC-DX TopNews June 22)

Unid on 9620 kHz till 2057 UT, June 20.

Dear Dxers, while listening to SW radio via GlobalTuners receiver in Imperia, Italy on June 19 at 2052 UT on 9620 kHz, I heard music and then YL in Arabic, and then again music, and then at 2057 UT tx was switched off.

The music and the accent sounded like Korean, but when checked aoki, eibi, bcl, df schedules, there is nothing in Arabic on 9620 kHz at this time segment. I further checked KBS World Radio website, and there is no Arabic xmission at 2000-2100 UT at all!

I've checked 9620 kHz at 2000 UT on June 21 and it is KBS World Radio in Arabic!  
(Dragan Lekic-SRB, dxld June 20/21)

Someone at VT-group played with the feederline ? WRN at this time KBS in Arabic.

Arabic registered at 1900-2000 15365 (Rampisham) Middle East/Africa (wb, wwdxc BC-DX TopNews June 20)

KBS Arabic Unid on 9620 kHz till 2057 UT. Probably either Sines, Kigali or Trincomalee, considering the cut-off at 2057 UT, also considering that using own transmission capacity appears to be more likely for DW's new airtime exchange with KBS.  
(Kai Ludwig-D, dxld June 22)

According to the web site of the Arabic section of KBS, they started using 9620 kHz starting the 15th of June replacing the old frequency of [RMP] 15365 kHz, the transmitter site is the ex DW relay station in Sines Portugal.  
(Tarek Zeidan-DEN, dxld June 23)

KOREA Rep of DW 9785 via Kimjae Korea. Ref. DW Customer Service request to monitor 9785 kHz Chinese transmission via Kimjae, South Korea. June 21, 2010 2317-2330 UT talk by YI and OM, IS and ID on 2321 2324 2328 and 2330 (incl. <chinese @ dw-world.de> ).  
(Tony Ashar-INS, dxld June 22)

KUWAIT Radio Kuwait 13650 f/d "card" (8x10 certificate) in 22 days for rpt in EE and Arabic by mail. Gorgeous BIG full color, full data QSL Certificate signed by the Asst. Under Secretary for Engineering Affairs. Lots of goodies - CD-Rom with Kuwait facts and figures, station stickers in Arabic, two colorful postal cards, nice personalized letter and a full-color glossy pamphlet with sked, program guide and Facts & Figures.  
(Bruce Jensen-CA-USA, dxld June 18)

MADAGASCAR 13600 R. Dabanga via Madagascar in African-accented Arabic at 0445 UT on Jun 17. M w/ nx, clear ID at 0450 UT incl mention of internet. ID includes tribal chorus where "Radio Dabanga" is repeated multiple times. Surprisingly strong.  
(Mike Bryant-KY-USA, dxld June 17)

7105 (USB + carrier mode), RTV Malagasy, June 16 continues on with daily World Cup coverage; randomly from 1317 to 1503\* UT, mostly fair for the whole time. Segments with commentary before the match started, then coverage of the action on the field followed by many phone calls taken live; Hi-Li music before sign off with no announcement; // 5010 kHz (poor

in USB + carrier mode) and 6134.9v kHz (poor). Day after day with incredibly fine reception here!

(Ron Howard-CA-USA, JPNpremium June 18)

MEXICO 6009.92 Radio Mil, at 0434-0453 UT on June 15. It has been a long time since I last checked here, back when Voz de tu Conciencia totally dominated; was nice to find R. Mil completely in the clear now with almost a fair signal, except for summertime QRN. Played mostly pop songs; promo for Classic Futbol; many IDs.

6184.95 XEPPM, R. Educacion 0356-0406, June 15. EZL music; Spanish and English IDs (something like: This is Radio Educacion, shortwave from Mexico City, XEPPM, 6185 kHz. in the International Band of 49 meters, with 10,000 watts of power); promo in Spanish and English for new series "discovery of Inca gold, on XEPPM Radio Educacion shortwave from Mexico City". If one listens long enough here, one is bound to hear some English.

(Ron Howard-CA-USA, JPNpremium June 18)

MOROCCO 711 RTM-"R", Laayoune (or whatever spelling El Aiun may have), 1336-..., 21 Jun'10, Arabic/ch. 1 relay, phone-ins, discussion; 35454.

It seems R. Marocaine is decreasing the number of active MF txs; these were the only ones audible during a midday obs.:

207 Azilal, Tahadart 540, Oujda 595 (not 594 as listed on the WRTH 2010, p. 279) (today, 21/6 on 595 once again though, but this just happens on occasions), Sebaa-Aioun 612, Laayoune 711v, Agadir 936 and Sebaa Aioun 1044.

So Sebaa Aioun 702, Rabat 819, Oujda 828, Beni Makada 1053, Casablanca 1080 & 1188, Marrakech (check above page of the WRTH'10) are not to be heard, and they would be at this distance, day or night, but then as I seem to remember 702, 828 1053 & 1188 are not noted for quite a long, long time.

(Carlos Goncalves-POR, wwdxc BC-DX TopNews June 21)

NETHERLANDS [non] RNW World Cup live coverage. Radio Nederland Wereldomroep via additional frequencies today, the 19th, for World Cup football The Netherlands v Japan. Heard at 1230 UT +

7235 ISS 65deg peaking to fair to good strength  
9455 BON 320 there was a signal on this frequency but too weak to ID -  
not even the trumpets  
9595 WER 300 30dB over 9 and very loud on that beam  
9620 NAU 11 10dB over 9 and good for those in the lands of  
the midnight sun  
13700 WER 120 a fair to good signal co-channel with a much weaker unid.  
15755 BON 80 audible, but only a weak signal (I missed GUF on this  
frequency til 1229)  
21485 MDC 45 no trace of anything here  
21590 ISS 150 trace of a weak signal here which I think was RNW.  
(Noel R. Green-UK, dxld June 19)

**NIGERIA** Whilst I have no interest in football, for the record I did note on 12 June that Voice of Nigeria was relaying English World Cup commentary of the Nigeria/Argentina match from 1500 UT on 15120 kHz when programming switched to this frequency. This seemed to me like a relay of a TV commentary rather than the ball-by-ball commentary normally associated with radio commentary. However, what would I know! Anyway, for those who're interested in such matters, I guess that VoN may also relay other World Cup matches involving Nigeria.  
(Alan Roe-UK, dxld June 17)

### 35. HAM RADIO in Friedrichshafen

Die 35. HAM RADIO laedt vom 25. bis 27. Juni auf das Messegelaende nach Friedrichshafen am Bodensee ein. Erwartet werden etwa 170 Aussteller aus 30 Laendern. Neben einem grossen Flohmarkt - diesmal in den Hallen A3 bis A5 - und dem Ausstellerangebot bietet das 61. Bodenseetreffen zahlreiche Vortraege. 60 Jahre Vereinsbestehen nutzt der ideelle Traeger DARC e.V. zudem, um sich im Foyer nahe der Aktionsbuehne mit einer Ausstellung zu praesentieren. Umfassende Informationen wurden bereits in den vergangenen Ausgaben des Amateurfunkmagazins CQ DL veroeffentlicht. Der DARC wuenscht eine gute Anreise und ein erfolgreiches Messesgeschehen.  
(DARC Rundspruch)

ps. Leider musste ich den Besuch auf der Ham Radio 2010 kurzfristig absagen. (wb)

AUSTRALIA 2368.5 Radio Symban returns to SW in third reincarnation.  
Re Radio Symban returning to SW:

I can confirm that Radio Symban is now back on air 2368.5 kHz from its third SW transmitter site in Sydney's SW (Leppington). Noting the station on air today June 26, 2010 at 0125 UT. I'm unsure of the exact date this station came to air, but it is within the last 6 or 7 days. Also the SW antenna was removed from the former Marrickville SW site between May 10th & June 15th, 2010.  
(Ian Baxter-AUS, SW TXsite ng June 26)

CHINA 17560 Seemingly CNR Chinese live coverage via Kashi superpower  
site, S=9+25dB at 1408 UT, June 28, of Netherlands Oranje team against  
Slovak Rep noted with superpower signal. Robben goal at 1418 UT - World  
Cup 2010 South Africa, Slovak Rep against Holland team.  
(wb, wwdxc BC-DX TopNews June 28)

CENTRAL AFRICAN REP Curt Bender and Dan Anderson and myself went to  
Central African Republic in April to set up two new shortwave stations.  
One is in Boali for ICDI where they were currently broadcasting on 6030  
kHz. The new transmitter will broadcast on 3390 kHz during the evening  
hours. We were able to do some test broadcasts with Lazy H antenna at 1  
kW.

The other station was for the government site at Bimbo near Bangui where

they currently have a Chinese built shortwave transmitter operating. We used another 1 kW transmitter with Lazy H antenna from a small room at this facility. The frequency there was 5035. The government was able to do one test broadcast before we left at the end of April but they still needed to put the air-conditioning in the room.  
(Hank Zeck-IN-USA, HCJB Global Technology Centre, via WDXC Contact June 30)

CHINA/CYPRUS/THAILAND/U.K. 17695 CNR jamming against BBC Uzbek at 1300 UT. BBC Uzbek service loud and clear via Rampisham-UK 500 kW beast, 1308 UT July 1st, S=9+40dB.

But in contrast via // 17515 Zyyi-CYP relay and 15330 Nakhon Sawan-THA, which both totally covered by CNR Chinese jamming.

17515 S=7-8 fair level at 1305 UT, But very bad mixture on 15330 kHz of three CNR Chinese, Chinese BUZZ jammer tone, and BBC Uzbek also, deep fades and fluttery of S=9 ... S=9+10dB strength. Lousy condition on 41, 31, 25 mb today.  
(wb, wwdxc BC-DX TopNews July 1)

COSTA RICA 5954.143 I haven't bothered checking in about a week with the Cuba jammer present last check but ELCOR Radio Republica is in the clear right now, on June 26 at 0020+ UT, 5954.16 kHz. Odd that it is not jammed.  
(Terry L Krueger-FL-USA, DXplorer June 26)

5954.143 kHz seemingly the one at 0050 UT.  
(Robert Wilkner-FL-USA, DXplorer June 26)

CROATIA 6164.75 Verry odd signal from Croatian Radio Deanovec at 1610 UT, July 1. English section on tourism items, ID "The Voice of Croatia", S=7-8 poor signal, Temperatures forecast 20 to 25 at night, 28 to 33 centigrade at daytime. Thunderstorms in Slavonia. Scheduled 1400-2030 UT. Recently 50 Hertz odd, but today at least 250 Hertz on lower side.

Move to 3985.03 kHz at 2205 UT, deep fades, S=8 up to S=9+10dB. At 0435 UT on 3895.05 kHz.  
(wb, wwdxc BC-DX TopNews July 1/2)

FRANCE 15410 QSL Radio Y'Abaganda

Hi all, I received yesterday a full detailed e-confirmation from the clandestine Radiyo Y'Abaganda (Baganda Radio), 15410, via Issoudun-France, in 3 weeks after a couple of f/ups. My original report was sent to <info @ ababaka.com> but answer came from <ababaka.com @ gmail.com>

The text of the e-mail is:

"Dear Mr Artur Fernandez Llorella,  
Thanks for your letter. Your reception report is correct. So, we can confirm that on 29 May 2010, at 1700 UT and on 15410 KHz, you listened to Radiyo Y'Abaganda, via Issoudun, France.

Sorry for the delayed response, but things tend to get super hectic over here. The Radio is called Baganda Radio, you can get more information about who we are from our website

<www.Ababaka.com>

Our short wave broadcast is fed directly from our internet radio live show every Saturday at 1700 UT and for one hour. The language spoken in our programme is Luganda of the Baganda people. We are about 8-10 million strong, inside a country called Uganda in East Africa.

Once again we apologize for taking this long to write back. Please find attached our station cards.

Regards  
Alex Kalazani Kigongo  
For <www.Ababaka.com> Admin. Team"  
(Artur Fernandez Llorella-ESP, hcdx June 25)

FRANCE [MONACO non] Google Earth imagery. Some high resolution place. Another GE image update.

Radio Monte Carlo 1467 / 3AC Monaco radio / Radio France Info 1557 / Radio Orient 1350 / TWR SW / CRI 702.

Col de la Madone)  
<<http://pagesperso-orange.fr/tvignaud/galerie/am/06col-madone.htm>>

Der Standort liegt als einziger ueber der Baumgenze, daher recht klar in GE auszumachen.

<<http://pagesperso-orange.fr/tvignaud/galerie/am/06fontbonne.htm>>

Die Distanz zwischen dem suedlichsten TX house aus 1947 (TWR) bis zur Monte Carlo Grenze sind es 1.750 Meter.

Mt Agel liegt ganz oben - noerdlich mit drei neueren Anlagen, auch schon in G.E. in 2002 zusehen.

Darunter etwas suedlicher am Berg die aelteren Anlagen Fontbonne, d.h. RMC aus dem Jahr 1947 - mit der Mussolini-Nazi architecture (schon auf QSL aus 1968 zu sehen) und TWR dann ab 1959.

Da gab es bis jetzt schon jede Menge alte Masten,

als Reserve fuer LW 216 kHz RMC,  
MW 1557 kHz Radio France Info Nice,  
1467 kHz RMC-R Marie,  
1350 kHz Radio Orient,  
702 kHz RMC-RCI und diverse.

Die zwei Doppelmasten, sowie der Einzelmast mit den log-periodischen SW Antennen von 3AC ganz oben hinter dem Mt. Agel noerdlicher, nennt sich De Cabanelle.

(Kouji Hashimoto-JPN, JPNpremium June 17) probably via Issoudun-F, wb.

GERMANY Germany will change the licence fee for public TV and radio broadcasters into a flat-rate universal household payment. This decision was made by the prime ministers of the federal states on June 9 in Berlin.

The payment obligation, which has been subject to the existence of a suitable reception device in a household, will thereby be turned into a fee which has to be paid independent of the existence, type and number of reception devices. The new scheme will come into force on January 1, 2013, until then the current system will remain intact.

Through the change, ARD, ZDF and national public radio broadcaster Deutschlandradio will be put in line with cultural and educational institutions such as schools, universities and theatres for which every citizen has to pay a contribution - whether they use them or not...

(John Babbis-USA, dxld June 24)

The programs of ERA5 "Voice of Greece" will be modified for Monday, June 28, and Tuesday, June 29, due to the 48-hour strike to be launched by the IFJ for journalists at ERT seeking a solution to the problem of contract negotiations in the direction of full and stable employment. To convert their contracts into permanent ones, the 24-hour strike on Tuesday, June 29, is to determine the GSEE and ADEDY POSPERT reaction to the measures advocated by the government and labor insurance.

(ERA website? Via John Babbis-USA, dxld June 26)

Greek singer noted continuously on all three ERT Voice of Greece channels this morning June 28th. No FILIA foreign language programmes on air. Interspersed by strike announcement at x.00, x.15, x.30, x.45 min, and frequency change announcements at 0350, 0450, and 0550 UT.

GUINEA 4900 Radio Familia from Guinea launched on 4900 kHz shortwave.

A new shortwave station has begun broadcasting from Guinea in Western Africa. Radio Familia, a station previously only heard on the FM band, has begun shortwave transmissions on the frequency of 4900 kHz in the 60 meter shortwave band. The station began broadcasting intermittently in the end of March from the town of Timbi Madina.

Radio Familia is using a 1-kilowatt transmitter built by HCJB Radio. Radio Familia broadcasts at 1800-2400 UTC in the French, English, Susu, Kpele, Pular and Maninka languages.

The station was observed by Carlos Goncalves in Portugal and by other DXers in early May. Electricity for the remote transmitter is provided by

solar and wind generators.

Future plans include extending evening transmissions to 0300 UTC. Radio Familia (105.3 FM) was launched in December 2006 by AFEG, Actualite Feminine En Guinee, a local NGO.

(DXing.info, via Mike Terry BrDXC-Uk ng June 14 / July 1)

HUNGARY Radio Budapest transmitter sites.

Radio Budapest ceased their shortwave service on June 30th for ever.

All RBP services as registered with WER - marked July 1st - in A-10 were missed from today July 1st.

(wb, wwdxc BC-DX TopNews July 1/2)

Although information was always somewhat vague, it was generally thought that June 30 would be the last day for shortwave transmissions from the Jaszbereny site for Radio Budapest, with Media Broadcast sites in Germany taking over on July 1.

I checked Radio Budapest's 0100 transmission on 6150 on UT June 29 and 30, and it was coming in with a listenable signal both nights. But checking 6150 at 0100 on July 1 I'm hearing nothing. Other European signals are at good strength. Is MB late with the switchover? Or is the information wrong and something else has happened; perhaps even a shutdown of Radio Budapest on shortwave?

(Steve Luce-TX-USA, dxld June 30)

Re: Radio Budapest transmitter sites.

Did another check of 6150 kHz at 0100 UT July 2 ... still nothing there.

I, too, get the feeling that Magyar Radio has pulled the plug.

From what I gather on various news sources the recently elected government in Budapest is pushing its own version of the "new European austerity."

MR might have bowed to the inevitable and canceled the deal with Media Broadcast, if such an arrangement actually ever existed.

(Steve Luce-TX-USA, dxld July 2)

For a check of the late night transmission on 3975: Nothing either. So it indeed appears that MR on shortwave can be written off.

The noon transmission on 6025 kHz was missing, too. And the Szueloefoelduenk programme aired last night on 3975 kHz ended with pronounced references to the online services of Magyar Radio. So I suspect the planned Wertachtal transmissions (already shown in the operational schedule, issued May 27) will not start and Magyar Radio simply dropped the whole affair instead.

In detail what was presumably the last ever transmission from Jaszbereny: Carrier on 3975 kHz already on when first tuned in at 2057 UT, modulation started at 2100 UT with opening of Szueloefoelduenk service. Towards the end both the wrap-up of a certain programme and some kind of continuity announcement prominently referred to online services, as discussed above. Then one more time the old multilingual loop with all the voices that have been fired three years ago. Towards 2200 the loop was accurately faded down. Carrier dropped for good about five seconds later.

Here is a photo of the Jaszbereny site:

<<http://ww2.legifotok.hu/photoviewer.php?currentID=17795>>

Another one is included in the TDF Group photo gallery at

<<http://www.tdf-group.com/sites.html?start=18>>

And a photo collection:

<<http://www.postamuzeum.hu/exhibitions/gallery/5/1060.html>>

As well-known Jaszbereny was also in use by IBB since 2003. IBB left in September 2008, at this time moving all affected transmissions to Biblis and Lampertheim. One has to wonder if IBB transmissions ceased because Antenna Hungaria told them that the site will be closed, or if perhaps it was the other way round and IBB put the final nail into the coffin by abandoning Jaszbereny. It certainly goes without saying that a mere five frequency hours per day were not enough to keep the facility alive.

Perhaps almost forgotten by now are the relays of Radio France Internationale in the early nineties. Probably they replaced a transmitter complex at Issoudun that has been shut down and demolished to clear the space for the new ALLISS transmission units. If so it would explain why these relays ceased again after a few years.

(Kai Ludwig-D, dxld June 30)

INDONESIA 9525.889 at 1303- UT, Voice of Indonesia on June 30. Lovely signal from VOI in English. Excellent modulation, but marred by a intermittent ute noticeable on USB only. News to 1310 UT by YL, with lots of interesting facts about Indonesia. 70% of Indonesian gas production is for export, for example. This is preferred to kerosene or firewood. This followed by a jingle, 'Voice of Indonesia, let's make the world green'.

(Walter Salmaniw-B.C.-CAN, DXplorer June 30)

9525.87 Voice of Indonesia in Arabic noted 1600-1700 UT, July 1. S=9 strength, but much fluttery signal.

(wb, wwdxc BC-DX TopNews July 1)

IRAN/ISRAEL/ZIMBABWE 4880 June 23 around 1830 noted again jammer on 4880. This was not the Iranian bubble jammer against Mossad numbers station occasionally on the frequency but the melodic "bagpipe" sound that was used by Zims earlier. SW R Africa could be heard in the background. 4895 ZCR was not jammed. Something cooking again?

(Jari Savolainen-FIN, DXplorer June 24)

Zacharias Liangas in Greece has this Israel log:

6985 Mossad 1939 UT is jammed! with bubble jammer.

(wb, hcdx June 24)

KUWAIT/U.K. Tnx to tip from Bruce Fisher who heard 15305 as an unID, and to Ivo Ivanov who explained it, R. Kuwait June 25 at 2234 in Arabic talk and music, testing relay via VTC, or whatever it's called this week, Skelton UK site. May have come on late as did not find it at 2200, but now S9+20 and much better than // 17550 direct, about 3 seconds behind 17550. 15305 went off at 2359:30\*. (GH, Bruce Fisher, Ivo Ivanov-BUL, dxld June 25)

Effective June 23. Radio Kuwait conducted tests transmissions in Arabic to North America via VT Communications on the following schedule:  
2200-2400 on 15305 SKN 300 kW / 290 deg to NoAm Arabic Wed/Thu/Fri  
0000-0200 on 11720 SKN 300 kW / 290 deg to NoAm Arabic Thu/Fri/Sat  
0200-0400 on 9855 SKN 300 kW / 290 deg to NoAm Arabic Thu/Fri/Sat

No idea whether these emissions will be broadcast in next week, as regular.
