The sportscast continued past 0900 UT at the same S3 lvl. The programming was very similar to other "official" PNG stations, especially the woman ann. The signal started at S-2 but improved to S-3 by 0820 UT or so with only light QRN. Some strong adj-ch splatter QRM but not really bothersome. No trace of the Chinese station here. Nothing usable hrd on the 3915 kHz channel. In searching Google for info on Radio Fly, I found the following:

"Radio Fly is a community radio station which is funded and operated by Ok Tedi Mining Limited. It provides a vital community information service to isolated areas of the North Fly region, parts of West Sepik, the rest of Western Province and some areas along the border of West Papua. It broadcasts in English and Tok Pisin. The isolated location of Western Province means that access to mainstream media is very limited, but Radio Fly fills that void.

The station is vital for the Community Mine Continuation process, informing villages of visits from community relations officers, and keeping them apprised of the environmental conditions and mine activity. A large chunk of the programming is focused on health and education messages as well as sustainable development, which is a topic very close to the listeners' hearts.

As well as playing a wide range of music and entertainment, Radio Fly serves as a medium for dissemination of relevant information. The Tok Save (announcement) service is widely used by people all over the province, to announce social and business gatherings such as government visits, sports meets, women's training sessions, weddings, funerals, and workshops.

Legal, health, farming and business-oriented programs are widely heard, and children's and religious shows are very popular with regular listeners. Volunteers with a particular interest often come into the studio to present their own programs, and there is a three-times-daily news bulletin, which covers local, national and international stories. The Fly Weekly Top 10 Hit Parade is a compilation of the most popular requests and dedications of the week, as made by listeners."

(Bruce Churchill-USA, DXplorer June 30)

5960 at 1143- UT. Radio Fly on June 30. Very good reception with non-stop western vocals. The edge in signal strength goes to // 3915 kHz, though, as 5960 kHz does suffer from slight adjacent splatter, whereas 3915 kHz is totally in the clear. 'Radio Fly' ID by a woman at 12:00:30 UT. Still going strong at 12:20 UT with a John Denver song, then, 'It's so easy to fall in love', 'Give me that old Rock n Roll', etc. 3915 kHz still preferred due to a lot of adjacent splatter on 5960 kHz. ID and time check at 12:31 UT.

(Walter Salmaniw-B.C.-CAN, DXplorer June 30)

5960 R. Fly QSL. E-mail QSL from Jobby Paiva rcvd on June 30 for June 26 reception. Report included a 7 min recording referred to in the e-mail and a screen shot of the Perseus spectrum during reception at the same time period on June 30. I won't be holding my breath on the QSL card, Hi! These days, an e-mail QSL is pretty much all you can count on. E-mail rcvd read as follows (answers the location question but not the station's power for which I will query Jobby):  
(Bruce W. Churchill-CA-USA, DXplorer July 1)

Quote - Dear Bruce,  
Greetings from Tabubil in the Star Mountains of the Western Province of Papua New Guinea. Thank you for your email which I received yesterday. I must apologise as I didn't get around to replying most of my emails yesterday but am going through them today.

I confirm that you were listening to Radio Fly. We are an FM radio station but only expanded into shortwave about a month ago. 5960 kHz & 3915 kHz. What you were listening to was the service announcements by Beri Pius. She is a journalist who does mainly news but tries a bit of broadcasting or Disc Jockeying as well. She usually does the Friday & Saturday nights as we are also short staffed. Thanks for your detailed report which I will forward to our technical personnel. Unfortunately we haven't designed a QSL card yet. Once we do, we will send you one.

(Jobby Paiva-PNG, Radio Fly  
P.O.Box 1, Tabubil, WP, PNG. Phone: 6493924 Mob: 72385942  
Email: <Jobby.Paiva @ oktedi.com> <jobby.paiva @ gmail.com>

If you use Jobby's gmail.com address, you will have to respond to his e-mail filter service request before the e-mail is forwarded, but that is quick and easy (and safe). (DXplorer July 1)

RUSSIA We just came to know the Voice of Russia (VOR) Khabarovsk staffs of Japanese language department are to resign and close the branch in August. Khabarovsk branch has been known to us very friendly and has heart warming programs. It seems the policy of the VOR has been changing to more News oriented station, after a new head (Mr. Bistrisky) came in to the station in 2008. VOR programs, as appreciated by PWBR and nominated to Ten of the Best Shows of the year for many years supported by abundance of musical archives, has been known with its excellent music programs. Alas, many of those music programs are vanishing and a kind of entertainment programs are going to be less day by day. We concern even the listeners letter corner is to be cut off. The SW transmission is only one frequency this season. They had 3-4 frequencies in the past.  
(Toshimichi Ohtake, Kamakura-JPN, JSWC / dswci DXW June 27)

6085 Radio Krasnoyarsk in Siberia was received in Sofia at 2345 UT on 6085. The station schedule is 2100-1700 UT relaying Radio Russia Moscow with local programmes Sunday through Thursday 2315-2400 UT, Monday through Friday 0510-0610 and 0910-1010, Saturday and Sunday 0100-0210 UT.

SAINT HELENA On Mar 30, 2010, the flagship of the Cunard Line, the RMS Queen Mary 2 anchored in James Bay before Jamestown , St. Helena, for the

very first time. Gary Walters, the station manger, and Tony Moore from R St. Helena were at the waterfront all day with the RSH mobile studio van and interviewed many people. The St. Helena Herald newspaper (Apr 01, pp.1,12-13,24 ) reported on the special event that saw 2195 of the 2439 passengers of the QM2 "invade" St. Helena for the day.

One of the passengers was Mr. Joe Buch of West Palm Beach, Florida, USA. Once ashore, Joe walked straight over to the RSH van and introduced himself to a very surprised Gary Walters. Joe Buch is 72, has been an amateur radio operator since 1952, has the US HAM call-sign N2JB (as in Joe Buch ), is a keen radio listener, and is a fan of R St. Helena. Joe made an audio recording of his interview with Gary Walters, and this can be listened to on the above mentioned web page of the RMRC. During the interview, Joe Buch made some good public relations for the internationally appreciated RSH broadcast on shortwaves known as Radio St. Helena Day. Both Gary and Tony said that they were quite amazed at meeting someone who actually had heard the RSD shortwave broadcasts. Thanks go to Joe Buch (N2JB) , Bruce Salt (ZD7VC), and Gary Walters (Radio St. Helena) for providing and giving permission to use various material used in this article.

More information can now be found on the web pages of the Rhein-Main Radio Club (RMRC) of Frankfurt in Germany. The web address is <[www.RMRC.de](http://www.RMRC.de)> and the link to "St. Helena Info" (in English) can be found on the left side of the page.

(Robert Kipp-D, dswci DXW June 30)

I visited St. Helena on March 30 aboard the Queen Mary 2 which visited the island for the very first time. I went straight from the launch to the Radio St. Helena broadcast van where I was interviewed and got a big plug in for the annual shortwave broadcast.

Several photos, and the audio of my interview are at <<http://bit.ly/dnDzQn>>

The station is targeting the first Saturday in October for the annual Radio Saint Helena Day on 11092.5 kHz. They are hoping that propagation will be better on the earlier date.

SAUDI ARABIA Continental Electronics will supply a quantity of 4 each 250 kW HF DRM-ready transmitters and associated equipment to the Saudi Arabia Ministry of Information (MOI) ... The new high-power HF DRM-ready transmitters will enhance the Saudi MOI's digital broadcast capabilities and can reach targeted audiences at long distance ranges with a clear, high quality signal. The DRM-ready transmitters are similar to those recently supplied to Broadcast Australia and to Radio-TV Malaysia ...

(David Sharp-NSW-AUS, dxld June 26)

Saudi Arabia to acquire DRM. Ready High Power 250 kW HF Transmitters.

Continental Electronics will supply a quantity of 4 each 250 kW HF DRM-ready transmitters and associated equipment to the Saudi Arabia Ministry of Information (MOI) through First Gulf Company of Riyadh. First Gulf will construct an entirely new HF station where the transmitters, antennas, and other equipment will be installed at the existing Al Khumra site outside Jeddah. The Al Khumra station was constructed by Continental Electronics and its civil contractor between 1978 and 1980, and the site presently

accommodates multiple 2-megawatt and 1-megawatt Medium Wave transmitters.

The new high-power HF DRM-ready transmitters will enhance the Saudi MOI's digital broadcast capabilities and can reach targeted audiences at long distance ranges with a clear, high quality signal. The DRM-ready transmitters are similar to those recently supplied to Broadcast Australia and to Radio-TV Malaysia, employing Transradio's latest DRM exciters with its unique pre-correction features.

The transmitters will be delivered in the latter part of 2010 and the station is planned to be fully operational by mid-2011.

(wb, wwdxc BC-DX TopNews July 2)

UKRAINE E-mail from Dana Smolyak, Chief Political correspondent, Radio Ukraine International June 9: "We hope to return to shortwave in the near future. No way, RUI is not permanently gone."  
(Kraig Krist-VA-USA, dxld WDXC Contact)

The two announcers on the June Hello from Kyiv, where their future on shortwave was discussed a lot, said: "We still don't know exactly when and how Radio Ukraine International is going to broadcast on shortwave. We all hope that Radio Ukraine International will be back on shortwave bands.

He (a listener who wrote in) is worried about the absence of Radio Ukraine

International's shortwave signal and all we can tell him is that we're worried too. Hopefully shortwave transmissions will reach North America soon.

(Mike Barraclough-UK, WDXC-UK Contact magazine)

RUI Kiev Ukraine is back on SW as I hear their English program now, July 1 at 0900 UTC on 11620 kHz. Up to 09 UT I heard Ukrainian.

(Erik Koie-DEN, dxld July 1)

UKRAINE back on SW. Very weak station here at 1145 UT on 11620 kHz, so weak could not even identify the language. The rest of the 25 metre band is virtually dead here too. Tried Global Tuners receivers in Germany and Austria, similar.

Global Tuners Greece receiver just has China Radio International. On previously used schedule should be Ukraine still on air in English.

[later] Radio Ukraine International strong at 1700 UT on 7440 kHz, clear channel, German programme.

(Mike Barraclough-UK, dxld July 1)

Radio Ukraine heard in English at 1948-1953 UT with a fairly strong signal but fighting with similar strength co-channel station presumably China. Totally unlistenable.

The VoR schedule, <[http://english.ruvr.ru/radio\\_broadcast/schedule/](http://english.ruvr.ru/radio_broadcast/schedule/)> has been amended to show only 0100-0200 UT for 7440 kHz to North America[via Lviv-Krasne-UKR relay].

(Harry Brooks-UK, dxld July 1)

Yes, German noted on air at 1709 UT, parliament report in German language, S=9+20dB here in Germany. Checked 9420 kHz Ukrainian towards Siberia and CIS states twice at 1300-1700 UT but heard ERT Avlis Greece only.

Thanks Erik and Mike for Radio Ukraine International shortwave logs of July 1.

Noted also terrible CRI Xian in Hungarian co-channel on 7440 kHz at 1900-2000 UT. And most terrible covered and occupied RUI 6145 kHz in German at 2000-2100 UT, by co-channel CRI Issoudun-France relay in Polish, latter S=9+45dB.

Log July 1/2, differs somewhat of RUI official schedule, see below

11620 0700-1000 Ukr, Ukr, Ukr[not English]

S=9+30dB strength, TX s-off at 09.59:53 UT.

QRM co-channel at 0900-1000 UT by CRI Xian 500 kW beast in English.

7440 1700-2000 Ge, Ukr, En

6145 2000-2400 Ge, En, Ukr, Ge

7440 2300-0100 Ukr, En

7440 0100-0200 scheduled VoRussia English relay via Lviv-Krasne UKR.

but Kai Ludwig says RUI in Ukrainian instead, July 2.

7440 0200-0400? Ukr, Ukr, En

9840 0500-0700 En, Ukr S=9+10dB strength

7440 23-04 UT is Lviv Krasne site 600 kW, others Kharkov 100 kW.

VoRussia German via Lviv Krasne site at 0900-1000 UT, July 2nd, with

powerful S=9+50dB, compared to Kharkov at S=9+20 .. 9+30dB level.  
(wb, wwdxc BC-DX TopNews July 1/2)

So please confirm whether it's really RUI in English again at 0000-0100 on 7440 kHz instead of VOR. Reception here too poor to tell at 0015 UT July 2 check.  
(Glenn Hauser-OK-USA, dxld July 1)

Yes, it was. 2300-2400 UT and now again from 0100 RUI in Ukrainian was carried on 7440 kHz, too. The transmission appeared to be pretty undermodulated, but this could have been a deception, caused by the signal being rather backscatter than direct reception here, just a bit more than 600 km from the transmitter location.

Earlier 6145 kHz carried the scheduled programming until 2400. It is supposed to be followed by 7420 kHz, beamed to western Siberia, after 0000 UT, but no trace of such a signal here. Until 2400\* UT 6145 kHz was pretty strong, so at least a faint trace of a transmission on 7420 kHz should have been audible here.

Now the interesting question is whether the new 11655 kHz relay of VOR German 0900-1000 UT still exists or has again been bumped as well. It could be that I will still be asleep at this time, so if someone else could check it out...

Poor reception? I find the other way round WBCQ on 7415 amazingly strong here, relaying the big sponsor of North American shortwave broadcasting, only interrupted by a canned WBCQ ID at 0100 hourtop. Also pretty good are Greenville with Radio Marti on 7365, Bonaire on 6165 and 6190, Cuba on 60 and 49 metres. Also WWCR on 4840 and 5935 kHz comes in. Sackville is remarkable for a just barely readable CBC North on 9625 kHz, something I never heard before.  
(Kai Ludwig-D, dxld July 2)

Der ukrainische Rundfunk bekommt nach vielen Jahren einen neuen Generaldirektor:  
<<http://www.nrcu.gov.ua/index.php?id=475&listid=121824>>  
Das duerfte nicht ohne Auswirkungen bleiben.  
Here is the A-10 schedule, taken from dxld March 20. 73 wb

UKRAINE. Radio Ukraine International

1800-1900 7440 KHR 100 kW 290 deg to WeEu  
2200-2300 6145 KHR 100 kW 290 deg to WeEu  
2300-2400 7440 LV 600 kW 303 deg to NoAm

English  
0000-0100 7440 LV 600 kW 303 deg to NoAm

0300-0400 7440 LV 600 kW 303 deg to NoAm [see note below]  
0500-0600 9840 KHR 100 kW 290 deg to WeEu  
0900-1000 11620 KHR 100 kW 277 deg to WeEu  
1100-1200 11620 KHR 100 kW 277 deg to WeEu  
1900-2000 7440 KHR 100 kW 290 deg to WeEu  
2100-2200 6145 KHR 100 kW 290 deg to WeEu

#### German

1700-1800 7440 KHR 100 kW 290 deg to WeEu  
2000-2100 6145 KHR 100 kW 290 deg to WeEu  
2300-0000 6145 KHR 100 kW 290 deg to WeEu

#### Romanian

1700-1730 657 CRN 25 kW to ROU  
1930-2000 657 CRN 25 kW to ROU  
2100-2130 657 CRN 25 kW to ROU

As you can see, most of frequencies for transmissions to Russia and Europe were changed in opposite to the previous summer seasons. I have my doubts that these changes are apt because of possible considerable interferences.

Real schedule can be changed taking into consideration the financial troubles. First of all it concerns the [high] power transmission to North America, which from February 22 has been shortened by one hour at 0400-0500 UTC (the second English language transmission to North America). (Alexander Yegorov-IKR, dxld March 20)

UNID - probably CYPRUS. 6155 UNID, but well known VT-group Cello music noted between 1603 and 1607 UT, with many breaks in well known Cello audio music, noted July 1st at 16.03:50 UT for 10 seconds only. From 16.04:30 UT, and then from 16.05:55 again. Probably antenna check of the engineers at Zyyi-CYP relay site. BBC Dari service scheduled from 1700 UT, // 6090NAK, 13610SKN.

9595 need further check at 1630-1700 UT slot, S=9+10dB, sounded like CeAs/Subcontinent language, - apparently NOT AIR Delhi Russian service. But could be 1615-1730 UT AIR Persian ? (wb, wwdxc BC-DX TopNews July 1)

UNIDENTIFIED When I check 4025 kHz for carrier from Liberia, I also check 6025 kHz with BFO on, compared to 5025 kHz Cuba, and June 23 at 0620 there was a very weak signal slightly on the low side matching 4025-, and some JBA music. If R. Amanecer, Dominican Republic, were running late again, I would expect more of a signal from them, and anyhow has been measured about 50 Hz on high side.

Enugu, Nigeria, is supposedly inactive, and propagation rules out Iran or Malaysia. Bolivia? Does R. Illimani / Patria Nueva ever stay on all night? It could also be a spur, tho by now most of the bigger signals on 49mb have finished. Bonaire is sleeping. Cuba? Unlikely since all their frequencies end in -0. For sure it's not the imaginary KTMI in Oregon, which some lists display on 6025 kHz from registrations as if it axually existed. (Glenn Hauser-OK-USA, dxld June 23)

On June 23 I was listening to R. Amanecer at 0248 UT and distinctly heard another station off set (about 6024.95 kHz) underneath them, playing EZL

songs, while R. Amanecer had just straight talk. Clearly was a different station, so some likelihood was R. Illimani/Patria Nueva. After I was finished with R. Marti on 6030 kHz after 0400 UT, I returned here only to find that BOTH R. Amanecer and my UNID had signed off, with no trace of any other station around 6025.

So your UNID was not R. Amanecer running late and it must have started sometime after 0400 UT.

(Ron Howard-CA-USA, dxld June 23)

USA [non] Additional txions of WYFR Family Radio in English:

1700-1900 on 7560 UNID transmitter to WeEu, test

1800-1900 on 9600 UNID transmitter to SoAf, test

1800-1900 on 9880 UNID transmitter to SoAf, test

1800-2000 on 9925 UNID transmitter to SoAf, test

2100-2300 on 9715 DHA 250 kW / 330 deg to WeEu, cancelled

(R BULGARIA DX MIX News, Ivo Ivanov, via wwdxc BC-DX TopNews June 30)

UAE/CHINA 9555 Heavy CNR echo jamming against RFA Uighur service via Al Dhabbaya relay site, 1600-1700 UT, S=9+10dB. // 9350-IRA, 9370-TJK, 11750-IRA.

(wb, wwdxc BC-DX TopNews July 1)

USA 5070 kHz test transmission. I wanted to let you know that WWCR will be running a test of 5070 on transmitter #4 Sunday morning 4am-6am (0900-1100 UT). The test transmission will replace 5890 during this time frame.

9980 will sign on at its usual 7.00am (1200 UT).

(Dr Jerry Plummer-USA WWCR, dxld June 26)

I sent an e-mail via Pastor Peters,

<<http://sfawbn.com/contact.php>>

reporting on WTWW. Received no detail card in 22 days from WTWW picturing "President of WTWW George McClintock in front of the 100,000 watt shortwave transmitter".

WTWW address on card is: 6611 Ormond Dr, Nashville TN 37205 USA, but is postmarked Cheyenne WY 820.

(Alan Pennington-UK, BrDXC-UK Communication via dxld)

ZAMBIA Miriam Mtonga, Public Relations Manager for the Zambia National Broadcasting Corporation (ZNBC), says that the Corporation is in the process of procuring the replacement parts for the shortwave transmitter[s] which broke down earlier this year rendering no service to most parts of the country. She said the tender process of procuring the replacement parts has been concluded and a contract has been signed with the supplier for the purchase of the parts at a cost of US\$130,000.

"Delivery of this will take about five months and during this time we regret that Radio One and Two will remain off air in the affected areas of the country," Ms Mtonga said. And the ZNBC Public Relations Manager said ZNBC with the support of government, has embarked on a rural FM Project to install FM radio transmitters in some districts to supplement the shortwave transmitters.

(Lusaka Times June 23, via Andy Sennitt, via Dexplorer; via dswci DXW)

The SW transmitters on 5915 and 6165 have not been heard by DX-ers since November 2009.

(Anker Petersen-DEN, dswci DXW June 30)

ZIMBABWE Workers at the Zimbabwe Broadcasting Corporation (ZBC) are said to be threatening strike action after accusing management of looting licence fees and splashing out on luxury cars, while failing to pay salaries on time. Reports say workers got their April salaries 4 weeks late (around the 20th May) and the same situation is anticipated for the May salaries.

Its alleged top managers at the state propaganda station have splashed out on luxury vehicles worth more than US\$1 million. In addition they are being accused of buying generators and plasma screen televisions using money looted from licence fees. This money is meant to finance the operations of the broadcaster, including paying salaries.

Chief Executive Officer Happison Muchechetere denied the allegations as mere 'bar talk' and asked if those making the allegations were auditors. He admitted buying generators, but argued these were used by his managers to monitor their programmes when there was no electricity. He also boasted that ZBC had the highest paid employees in the country.

ZBC now relies on licence fees to fund its operations after most advertisers shunned the station owing to its annoying and relentless ZANU PF propaganda. Zimbabweans in urban areas, who have the money, have installed satellite dishes to watch foreign television channels.

HAM Radio 2010 Friedrichshafen, Germany.

My little tour in 84 pictures of this weekend's Ham Radio 2010 is now attached to my website:

<<http://www.ratzer.at/ham2010.html>>

Enjoy!

73 Christoph, OE2CRM <[www.a-dx.at](http://www.a-dx.at)> DXplorer June 27

see also

<<http://www.darc.de/aktuelles/ham-radio-2010/>>

Die Freude an der Kommunikation mit Menschen aus aller Welt hat Funkamateure aus ganz Europa auf die HAM RADIO gelockt: Drei Tage lang war die 35. Auflage der internationalen Amateurfunk-Ausstellung Anziehungspunkt fuer 16.800 Besucher. 185 Aussteller aus 29 Laendern praesentierten ihre Produkte. Fuer Hoehepunkte im Rahmenprogramm sorgten zahlreiche Jubilaeumsaktionen zur Feier des 60-jaehrigen Bestehens des Deutschen Amateur-Radio-Clubs e.V. (DARC), wie die Ballonmission und eine Tombola. "Mit dem DARC haben wir einen Partner, mit dem wir gemeinsam die gute Entwicklung der HAM RADIO fortsetzen koennen", betont Messechef Klaus Wellmann. "Wir kombinieren abwechslungsreiche Aktionen mit hoher Fachlichkeit. Das bietet keine andere Amateurfunk-Ausstellung in Europa." (DARC newsletter)

ALASKA 11765 at 1700-, KNLS (not) July 7. Despite of information from the station, I heard neither the English broadcast at 1200 UT nor the Russian broadcast at 1700 UT, so I guess they're still having issues to work out before the newer transmitter returns to the air. (Walt Salmaniw-BC-CAN, DXplorer July 8)

KNLS off the air, but should return tomorrow. Explains why I haven't heard them for a few days. I'll be listening tomorrow for their return!

Dear Mr. Salmaniw, You are correct in assuming that both transmitters have been off the air. We appreciate your listenership and apologize for the problems. One of the two transmitters has been off line since late March. It's a 25 year-old transmitter, and it's taken some time to get rebuilt parts for it. The older transmitter carried the bulk of the English and Russian hours.

The newer transmitter has been off since last week because an electric transformer malfunctioned. We hope to have the transformer and thus the newer transmitter back in service by tomorrow.

The English Hour should be available at 1200 UTC (5:00 a.m. PDT) on either 7355 or 9680 kHz. The Russian Hour should be available at 1700 UTC (10:00

a.m. PDT) on 9920 kHz.

You can also listen to a podcast of the English at any time of day on our website <[www.knls.org](http://www.knls.org)>

Thanks again for your interest and listenership.

Best regards, Rob Scobey, Senior Producer, English Language Programming  
KNLS

(via Walt Salmaniw-BC-CAN, DXplorer July 5)

ALBANIA 13755 R. Tirana open carrier from Shijak is already on at tune-in 1418 UT June 29; some ACI from DPRK in French on 13760 kHz, splash from CRI/Cuba 13740 kHz. 1428:40 the RT IS starts, 1430 UT sign-on with A-10 schedule including 0230 UT on 7425 kHz, but weakening now. Another check at 1450 UT, was ending mailbag (Tuesday) with a report from USA for 7425 kHz, 1451 UT into music fill.

(Glenn Hauser-OK-USA, dxld June 30)

ANGOLA 7216.7 Radio Nacional de Angola, 2007, presume this is the open carrier that's throwing a strong het against 7215 kHz. No carrier noted on 4950v kHz. 2 July.

(David Sharp-NSW-AUS, dxld July 8)

ARMENIA/KAZAKHSTAN/MADAGASCAR/RUSSIA/SOUTH AFRICA WYFR Family Radio TEST.

More and more test transmissions of WYFR Family Radio in English.

0000-0200 on 11720 SKN 300 kW / 290 deg to NoAm Thu/Fri/Sat  
0200-0400 on 9855 SKN 300 kW / 290 deg to NoAm Thu/Fri/Sat  
(R BULGARIA DX MIX News, Ivo Ivanov, via wwdxc BC-DX TopNews July 7)

BENIN [and non]. TA on the west coast??? The 1566 kHz carrier faded out rapidly between 0525 and 0532 UT, after having been pretty consistent for the past half hour. Benin sunrise is at 0524 UT, rather incredible given that this is pretty much the shortest night of the year.  
(Nick Hall-Patch-BC-CAN, IRCA via dxld June 24)

BRAZIL 9645.343 at 0339- UT, Radio Bandeirantes, Sao Paulo July 6. Good reception on this off-frequency channel in Portuguese. Bandeirantes heard. Can also hear them weakly under Dr. Gene Scott on 6090 kHz.  
(Walter Salmaniw, Masset-B.C.-CAN, DXplorer July 7)

CANADA 6069.951 CFRX-Toronto, 0814 UT, interview between two men about some reality TV show, bumper music and into ad string at 0820 UT. Very steady S=9+20dB signal but peaking at S=9+40, about the strongest I've ever had them. 7 July.

6160.014 CKZU Vancouver, 0801 UT, CBC news by man, with several mentions of "Toronto". In the clear and with no het, so presume (only for geographical reasons) that this is Vancouver. HOWEVER, the grey line at this hour favours BOTH St. John's and Vancouver. 7 July.  
(David Sharp-NSW-AUS, dxld July 8)

CENTRAL AFRICAN REP 7220, R. Bangui, (tent) Bangui. June 28, 0645-0712 UT male and female talks in vernacular, rap in French, female in French "Afrique", African music, male in French, High Life music back male. Degrading, stronger than 2008 listenings, 24432.  
(Lucio Otavio Bobrowiec-BRA, dxld June 30)

5035.6 Radio ICDI, at 1731 UT June 26, presumed, French, talk by a man, clear mentions of "Centrafricaine." Under heavy CODAR QRM.

7220 Radio Centrafrique, at 1828 UT July 6, French, really pleased to hear this one, and at a good level (averaging S=9+30dB), with talk by a man (news or similar) with several references to "Bangui." First time heard, after several days of trying. 5035 kHz (presumed R. ICDI) also in, but threshold. 6 July.  
(David Sharp-NSW-AUS, dxld July 6)

Nice logs. Radio ICDI is supposed to be on 6030 and new 3390 kHz, with R. Centrafrique on 5035v and 7220 kHz. If you hear both 5 and 7 at same time, can you tell if they are // ?  
(Glenn Hauser-USA, dxld July 7)

CHINA [and non] A big puzzle for me are the following observations on

directly reportages from Soccer/Football WCS in South Africa as follows:

June 27th 1400-1430 Germany-England 11665, 11710, 11925, 11975, 15285, 15330 & 17560.

June 28th 1500-1530 Netherlands-Slovakia 11585, 11665, 15285, 15495 (not on 11975, 15330, 17560)

June 29th 1830-1900 Spain-Portugal 7435, 11785 and 1900-1915 also 13625.

July 2nd 1830-1900 Uruguay-Ghana 9355, 9540, 11540, 11700 etc.

At all times and on all frequencies the commentaries were in Chinese language plus Echo jamming from Beijing. Some of the frequencies are of Radio Free Asia in Mandarin. So the radiostations on SW which had live bcs from Championship were: Netherlands; UK (BBC); RFI; DWL; REE; RFA and Gabon.

(Rumen Pankov-BUL, wwdxc BC-DX TopNews July 3)

CHINA Google Earth imagery. Some high resolution place. Another GE image update: CHN Shijiazhuang.

The GE (Google Earth) folk have just released another imagery update. Plenty of known SW TX sites with fresh imagery for such countries as: Bulgaria, India, Bangladesh etc.

For the first time detailed imagery (if not for the for the man-made smog) of the Chinese Shijiazhuang SW site that Alan Davies identified for us in recent times. The site coordinates are: 38 13 17 N 114 06 22 E.

Was previously of low resolution, but now antenna masts clearly seen including a newly revealed curtain array located at these coordinates: (Ian Baxter-AUS, SW TXsite July 5, 2010)

Thanks for that. Yes, not much time for site-hunting! However, I do see Huikou now in high resolution, about 4 km south of Huikou proper:

WB > CHN Shijiazhuang Huikou {Pingshan County. Station 723}  
buildings around 38 27 52 N 113 59 06 E

6 x 100 kW, type 146 antennas

WB > 3 curtains, 037 / 217 degrees  
curtain arrays at 38 27 43 N 113 59 22 E

WB > single curtain, 037 / 217 degrees  
38 27 41 N 113 59 12 E

WB > 2 curtains, 037 / 217 degrees  
38 28 00 N 113 59 12 E etc.

WB > single curtain 165 degrees  
38 28 00.32 N 113 59 01.07 E

WB > single dipol, 165 degrees  
38 27 45.54 N 113 59 05.11 E

Also domestic HF sites from GE updates in previous months (not sure if you have these already):

Xichang, Sichuan (Sichuan Station 505): 27 48 47 N 102 13 49 E

WB: > 2 MW mast at 27 48 32.55 N 102 13 43.82 E

big MW mast at 27 48 42.21 N 102 13 46.24 E

SW array 180 degrees 27 48 46.83 N 102 13 48.76 E

AOKI says stn #520, 2135/2155-1600 UT, 6060/7225 kHz 10 kW, non-dir antenna.

- much better visibility than previously in June imagery update

Yushu, Qinghai: 33 00 00 N 97 00 01 E - post-earthquake imagery for this area (15 Apr 2010) is visible in "historical" view.

WB: > CHN Gyego [Jiegu], Yushu, Qinghai. 882 kHz, ex6075 kHz 15/50 kW (Alan Davies, - comments by wb., SW TXsite July 5, 2010)

and a communications feeder tower too, at  
38 12 49.92 N 114 06 15.50 E

Yes, we had these three sites according G.E. and Terraserver in July 2008:

The latest GE update puts all of Hebei Province and some surrounding areas into medium resolution which should include the two Shijiazhuang SW sites.

I think the CRI site 951 Nanpozhuang is around 38 12 58N, 114 06 16E, with a complex of buildings extending into the hilly area southwards and also some buildings and roads/tracks extending northwards into the plain, and hints of antenna arrays also. The location fits various descriptions on the web, but the GE images aren't really clear enough to see for sure whether it's really a transmitter site or not.

There should be another SW facility in Pingshan County (Station 723) with about six 100 kW units for CNR-1, registered with beams 037, 165 and 217 deg. The listed location is Huikou, but I can't see anything interesting there.

(Alan Davies-Surabaya-INS, via Ritola-FIN, SW TXsite; comments by wb, wwdxc BC-DX TopNews July 24/25/27, 2008)

Yes, tx center-A 38 13 16.75 N 114 06 21.84 E  
HFCC SZG 500 kW 315 degr entry ? towards Europe.

tx center-B 38 13 09.50 N 114 06 15.67 E  
HFCC SZG 500 kW to zones 33,34 at 37degr

and a domestic tx center too?? at 38 13 11.68 N 114 06 28.71 E  
(maybe Station 723??) 217 degr, ITU antenna type #146  
Also located 8 kilometers westerly of Pingshan suburb, so called also "Pingshan county" - seemingly ???

Fallingrain nearest settlement located 2 kilometers North/Northwest:  
Donghuishe, Other names: Hui-she-chen, Hui-she  
38 15 11 N 114 04 32 E

My former .KMZ file contains an entry:

CHN SZG Shijiazhuang 2x500/600 kW at 38 14 00.00 N 114 05 00.00 E

SZG Shijiazhuang 2x500 / 600 kW was erected in the late 60ties, when Radio Peking in English fed the Tirana-Albania relay on 7120, 9457 and 9780 kHz towards North America. During hot war time era in Vietnam ...  
(comments by wb, wwdxc BC-DX TopNews July 27, 2008;  
wb, SW TXsite July 5, 2010)

CONGO 6115 Radio Congo, at 1812 UT July 2, French, ID by woman, into hilife. Not the usual news program I've come to expect at this time. Best in LSB, with someone about 300 Hz on the high side (though this one seems to be very close to nominal).  
(David Sharp-NSW-AUS, dxld July 6)

CUBA I have been hearing RHC on 5040 kHz with good signal here in Rio de Janeiro, the first time I got it was during the DX program, by the way, with info about contests and new frequencies. Signal good. My question is, what's the point with this frequency, propagation issues affecting higher frequencies?  
(Sarmiento Campos-BRA, condiglist yg via dxld)

Sarmiento, Arnie Coro's explanation was that 5040 kHz is for better close-in coverage of the Caribbean and Cuba itself, much like R. Rebelde on 5025 kHz, with the same kind of high-angle antenna. It replaced 13790 kHz at least for the English broadcast at 2300 UT, and 13790 kHz would certainly have a much larger skip zone, altho it should be propagating OK in our summer. However, as we all know, both 5025 and 5040 kHz are not restricted at all to "near-vertical incidence skywave" but reach far beyond as long as there is darkness. They do hold up during the daytime at shorter ranges.  
(Glenn Hauser-OK-USA, dxld June 30)

ETHIOPIA 7110 Radio Ethiopia, on 24 June at 0310 UT. Big S=9+20 signal of OMs in presumed Amharic. YL announcements swamped in reverb and echo.

Lively musical theme while segueing to new topics. Talk until song at 0329

UT. No adjacent hams, but heavy lightning static from southwards line of

storms. ANL on the Frog actually reduces the static, and the analog kHz

drum reads the correct frequency. Who needs digital anything? :)

(Terry Wilson-MI-USA, dxld June 30)

GABON 9580 Africa No. 1, Moyabi. Football at 1830 UT, direct reportage

on Netherlands vv Cameroon on June 24 that match was aired in live on

9 frequencies of BBC WS in English, 4 frequencies of RFI in French and

2 or more of Radio Nederland (heard after 1820 UT on SW!!!).

(Rumen Pankov-BUL, July ARDXC ADXN direct and via dxld)

GEORGIA [ABKHAZIA] 9535 Abkhaz Radio is not on the air daily, noted on 23/6 at 0700 with news in Abkhaz, at 0800 news in Russian and 1 minute for relaying of FM Avto Radio and close/down at 0814. No broadcast was on next day and on 25/6 the broadcast was 0700-0730 only.  
(Rumen Pankov-BUL, July ARDXC ADXN direct and via dxld)

GERMANY 6190 at 0234-0259 UT on June 26, Deutschlandfunk, in German. Classical music. At 0235 UT male talks and ID. 0236 UT opera style music in male and female voice. 0246 UT short male talks and more music. Help in ID via link  
<<http://www.dradio.de/streaming/dlf.m3u>>

Very weak signal with better audio during the music. At 0259 UT signal completely covered by Radio Nederland in the same frequency.  
(Jorge Freitas-BRA, dxld June 30)

But unfortunately DLR-DLF Berlin Britz 6190 kHz had mainpower transformer problems from July 2nd til July 4th. 'Ancient' like 17 kW transmitter of 1951, pre-USIA United States Information Agency issue with VOA and RIAS {American Sector of} Berlin programmes to Germans in central Europe, also heard well by many German nationals in adjacent Poland, CSSR and Hungary.

At 0800 UT this morning July 4, 49 mb was totally free from 6090 to 6195 kHz here in southwestern Germany. Thanks to mails from Olle Alm and Kai Ludwig.

Antenna next to the Britz TX house  
52 26 50.57 N 13 25 49.93 E

> Die Modulation war ja eh die letzte Zeit recht wenig, ...

Das kommt auf den Standort an. Hier in Stuttgart war das tagsueber immer {auch zu RIAS Zeiten auf 6005} eine sehr durchdringende und presente Modulation zu verzeichnen, bevorzugte Keule Nordost bis Baltikum, Suedwest bis Riviera/Mallorca.

Anfang der Woche habe ich mich noch ueber das bis zu S=9+15dB Signal am puren Noon Mittag gewundert.  
(wb, wwdxc BC-DX TopNews July 4)

6190 - Well, look here:

<<http://www.senderfotos-bb.de/britz.htm>>

The line "Kurzwellen-Faltdipol" shows the 6190 kHz facility. The shabby shack is the transmitter building, a provisional one from the earliest RIAS days. If I recall correct (it's 15 years since I was there) the vertically mounted fluorescent lamp behind one of the windows is in the very room of the shortwave transmitter. Otherwise there is only an ancient FM transmitter in this shack, if I recall correct.

The other transmitters are in what the webpage calls "Hauptgebaeude". The

antenna of the broken S4001 transmitter is the one labelled as "Kurzwellen-Antenne noerdl. des Hauptgebaeudes". I understand that each antenna is "hard-wired" to the related antenna, i.e. a swap is not possible. Originally cover has been provided by the complete 20 kW transmitter/antenna combination. When the separate 6190 kHz service started in 1999 the concept changed in as far as transmission breaks during maintenance or equipment failures are just accepted now.

"Teil des demontierten Kreuzdipols" was a vertical incidence antenna with circular polarization for nighttime service on 990 kHz, now dismantled. At some point in the nineties further use of this antenna has been banned, because it produced too high fieldstrengths in the neighbourhood of the station. Since then mediumwave transmissions are limited to the two guyed masts, one of them carrying the 89.6 MHz antenna, too (the second RIAS FM frequency, 94.3 MHz, has meanwhile been moved to the TV tower).

And a word about the transmitters: The remaining shortwave transmitter, the one in the shack, is rated at 20 kW and has been delivered by Telefunken in 1950, it is by far the oldest broadcasting transmitter in everyday use in Germany (and perhaps well beyond).

The newer shortwave transmitter is or was an S4001, different from the ones used by Media Broadcast in as far as it got no SSB capability and has not been equipped for automated fast tuning. This transmitter suffered a failure of the transformer that produced the plate current in 2007, no such transformer was in the Juelich spare sparts stock due to the design variants (at least I understand this has indeed been checked) and a replacement would cost about 100,000 Euro, an amount nobody was willing to invest into the DX hobby (that's pretty much the reality now).

The mediumwave equipment consisted 15 years ago of a 100 kW solid-state Nautel for 855 kHz, an S4003 (300 kW mediumwave version of the PANTEL series PDM transmitters, housings similar to the S4005 shortwave transmitter; this one was the first PANTEL ever delivered) for 990 kHz and an S4002 (PANTEL 100 kW mediumwave, looks like its shortwave brother S4001) as aux. Nowadays two Transradio TRAM transmitters are used as mains.

And meanwhile word has it that in the last days there were some power supply problems with the 6190 kHz facility, but some necessary repairs have been done and now the old tranny should again happily churn away. (Kai Ludwig-D, SW TXsite July 6)

I hear a weak signal from Belarus Radio on 6190 kHz at midday, but aside from that the upper part of the 49 mb is now totally empty. (Olle Alm-SWE, wwdxc BC-DX TopNews July 4)

I assume you think this site has said its last good bye for SW Txions on 6190? (Ian Baxter-AUS, SW TX site, July 4)

Not definite yet. It was always a toy of the engineers, to spend this unit alive on air. Maybe they wait for spare parts at Berlin Britz shortwave service site now?

Some guy of German DXers scene will ask former Britz pensionist engineers soon, who worked at the site in the past ... Wait and see.

I heard 6190 very strong this week on Monday through Wed, but missed the signal on Fri and Sat too. This signal of the 17 kW set of 1951 RIAS Berlin era was always strong here in Stuttgart - due of the steep fountain antenna characteristics, some 750 kilometers away of the Berlin Britz site.

(wb, SW TX site July 4)

DLR-DLF 6190 BACK on the air now July 4 at 1515 UT. The signal appears to be much reduced. Perhaps a standby facility.

(Olle Alm-SWE, wwdxc BC-DX TopNews July 4)

Kommando zurueck. DLF Berlin Britz 6190 kHz ist wieder auf Sendung. Etwas mufflige Modulation zwar, aber immerhin S=9 um 1520 UT. Next door BBC 6195 kHz in Persian S=9+15dB.

(wb, wwdxc BC-DX TopNews July 4)

DLF Berlin Britz 6190 is in full activity today too, but the signal is weaker and it suffers from fading. It seems that they are using a different antenna instead of the fountain antenna.

(Olle Alm-SWE, wwdxc BC-DX TopNews July 5)

Here 6190 has just the splash from the BBC's European service in Persian, Pashto and Dari on 6195 (what's the purpose of that, by the way? Wonder why IBB has no such service on air, too.....). All I can make out is either a faint, wobbling carrier or, more likely I think, two faint carriers a few Hertz apart, hetting each other.

No standby facility exists (unless someone brought in ham-level gear), only the vintage 20 kW Telefunken transmitter from 1950, the original 6005 kHz transmitter. It is in use on 6190 since 1999 and has not been retuned to its original frequency when the damage of an expensive transformer knocked the new 6005 transmitter off air three years ago.

Reduced power operation is very well possible; around 2003 the transmitter was already run at only 6 kW due to technical problems.

Remarkable anyway that apparently engineers bother to repair the transmitter even on a Sunday.

(Kai Ludwig-D, dxld July 4)

Video Footage Juelich Transmittersite. On the following link:

<<http://www.mediafire.com/?sharekey=7176fc907a9de144ab1eab3e9fa335ca3bd7a7f49d97f7a8>>

You find a nice video covering the Juelich transmitter site. In clear pictures you see the transmitter hall, antenna switches, slew switches outside and coax feeders. - Have Fun !

(Jan Oosterveen-HOL, SW TX site July 7)

<<http://www.savethegambia.org>>

Report with S/on, music, announcement and identification, music. Very long

talk by female, ID in English! as: "... This is Save the Gambia Democracy Project... ", 34443.

(Arnaldo Slaen-ARG, dxld June 30)

Public Broadcasters asked to shut down AM transmitters.

KEF, the body responsible for determining the financial needs of the public broadcasters in Germany, asks both Deutschlandradio and ARD member institutions to close down LW, MW and SW transmitters. They expect statements on this subject for a meeting in September. KEF will audit if the continued operation of these transmitters is still economical.

<<http://www.infosat.de/Meldungen/?msgID=59065>>

which I understand is a copy of a KEF release, issued today. It otherwise deals with new requests for DAB+ projects, which have generally been accepted, in particular Deutschlandradio is now authorized to start negotiations with Media Broadcast. They are expected to report the results in September, and in preparation for the next full-scale KEF report, to be issued in 2013, KEF will audit if these projects are still economical.

In particular the Deutschlandradio project has to be coordinated with DAB+ projects of ARD and commercial broadcasters, and the Deutschlandradio DAB transmitter network is to be rolled out only at sites that will be used by ARD institutions, too, a measure KEF expects to cut back the operational costs (and which makes it quite likely that full coverage of Germany will never be achieved).

(Kai Ludwig-D, dxld June 25)

ARD Publikationen. Uebrigens das gedruckte Monatsheft SWR (frueher SDR Stuttgart und SWF Baden-Baden Hefte) Magazine wurde im Juni eingestellt. War mir 40 Jahre ein Begleiter, jetzt bleiben noch das WDR Print, HR Frankfurt, DLF-DLR Programmheft und das monatliche Heft vom Saarlaendischen Rundfunk uebrig.

Open Day - Bayerischer Rundfunk Sender Muenchen Ismaning, July 10, 2010

<<http://www.br-online.de/unternehmen/veranstaltungen/radio-sammlerboerse-ismaning-ID1276528369497.xml>>

Senderanlage Ismaning. Sammlerboerse fuer Radio-Liebhaber.

Der Bayerische Rundfunk laedt Fans alter Roehren-Radios, Schellacks und sonstiger Raritaeten der Funkgeschichte am 10. Juli zu einer Sammlerboerse in die BR-Senderanlage Ismaning ein. Die letzte Veranstaltung dieser Art ist zwei Jahre her - hoechste Zeit fuer eine Neuauflage.

Die Sammlerboerse - gleichzeitig ein Treff von Gleichgesinnten, die hier prima fachsimpeln koennen - wird wie in den vergangenen Jahren gemeinsam mit der Gesellschaft der Freunde des Funkwesens (GFGF e.V.) veranstaltet und findet an der Garagenhalle der Senderanlage Ismaning des Bayerischen Rundfunks statt.

Eigenes Hoerfunkprogramm fuer Radiofans. Selbstverstaendlich wird auch heuer wieder ein im engsten Umkreis um die Senderanlage empfangbares Sonderprogramm ueber einen kleinen Mittelwellen-Ortssender auf 585 kHz waehrend der Veranstaltung ausgestrahlt.

Veranstaltungstermin: Samstag, 10. Juli 2010 [times in MESZ - CEST]

07.00 Uhr Einlass fuer Aussteller

08.00 Uhr Beginn der Sammlerboerse im Garagenhof des Senders

10.00 Uhr Oeffnung des Sendergebaeudes bis 14.00 Uhr

15.00 Uhr Ende der Veranstaltung

Anschrift

Senderanlage Ismaning

Senderstrasse 57

85737 Ismaning

<[http://maps.google.de/maps?f=q&source=s\\_q&hl=de&geocode=&q=+48%C2%B015%272.78%22N+++11%C2%B045%276.12%22E&sll=51.151786,10.415039&sspn=19.752995,57.084961&ie=UTF8&t=h&z=16](http://maps.google.de/maps?f=q&source=s_q&hl=de&geocode=&q=+48%C2%B015%272.78%22N+++11%C2%B045%276.12%22E&sll=51.151786,10.415039&sspn=19.752995,57.084961&ie=UTF8&t=h&z=16)>

Besucher koennen wieder an einem Rundgang durch die Senderanlage teilnehmen. Ausserdem werden Imbiss sowie Getraenke erhaeltlich sein.  
(BR via Herbert Meixner-AUT, A-DX July 9)

INDIA [SIKKIM] 4837.22 AIR Gangtok, 1828 UT, on late with World Cup coverage. Parallel to several other AIR outlets. Presume this is the site (drifting off nominal). 2 July.  
(David Sharp-NSW-AUS, dxld July 8)

INDIA Random check on AIR regional transmitters.  
Leh 4760 - 59+20 dB this morning, heard regularly during mor/eve. Port Blair also heard here at 0000z onwards before Leh signs on at 0130z.

H'bad 4800/Kolkata 4820/Chennai 4920 & few others - Co-ch qrm from China going on since ages. Several verbal/written complaints to AIR, nothing happened.

Sri Nagar 4950 - 59+30 dB here last night. Heard regularly.

Ranchi 4960/5985 - Off air since Oct 2006

Jammu 4830/5965 - Off air since Oct 2006

Kohima 4850 - Off air, heard only on special occasions.

Gangtok 4835 [4837.22v] - Off freq due to problem in synthesizer unit, Partha Sarathi from Siliguri spoke to the stn engineer y'day, expected to be rectified by this week.

Kurseong 4895 - Was noted back on air after being off air due to repairs, not checked recently.  
(Alokesh Gupta-IND, DXindia July 8)

INDONESIA 9525.9 Voice of Indonesia at 1307-1340 UT on July 9. Live coverage of some sort of Islamic commemoration live from the presidential palace; Koran recitations and talks; English interpretations by VoINS ancr; occasional breaks for pop music from the studio.  
(John M Wilkins-CO-USA, DXplorer July 9)

KAZAKHSTAN 9950 at 1432- UT, Golos Pravoslavyya [Voice of Orthodoxy] July 6. I can just make out this twice weekly religious program through a

huge ute smack on the channel. Otherwise, I suspect the signal would be just fine. LSB seems to only way to hear anything.

(Walter Salmaniw, Masset-B.C.-CAN, DXplorer July 7)

NETHERLANDS [non] RNW - Tour de France Prologue from Rotterdam. Bicycle Tour de France on Radio Netherlands Wereldomroep. Nauen site signals about one third second late ...

Statt World Cup aus Suedafrika laeuft bei RNW heute eine Radsportsendung mit Sonderfrequenzen fuer die HOL Camper in Europa. Aus Rotterdam wird der Tour de France Prolog uebertragen. Die zwei Aussendungen auf 5955 und 9895 kHz aus Nauen sind eine gute Drittelsekunde hinterher. Die Wertachtal und Issoudun Sendungen sind synchron.

5955 NAU 500 210 S=9+40dB  
7235 ISS 250 040 and  
7235 ISS 250 065 S=9+20dB  
9595 WER 250 300 S=9+15dB  
9620 NAU 500 011 S=9+25dB  
9895 NAU 500 230 S=9+15dB  
13700 WER 500 120 and  
13700 WER 500 240 S=8-9 (due of Dead Zone)  
(wb, wwdxc BC-DX TopNews July 3)

PAPUA NEW GUINEA 3905 R. New Ireland at 1200-1220+ UT on July 6. YL ancr speaking briefly, then, interestingly, an acoustic/semi-classical guitar version of "Dixie" lasting until 1205 UT; five minutes of a male announcer (news?) was followed by assorted vocal music, including a selection by Men at Work. Fair but deteriorating. Not sure of language. (John M Wilkins-CO-USA, DXplorer July 9)

PERU 4939.96 Radio San Antonio, 1131, "las noticias" read by a man and several mentions of "Lima", but no ID. Talk by a second man after 1138 UT. Fair to good. 7 July.  
(David Sharp-NSW-AUS, dxld July 8)

4826.55 UNID LA. [tentatively] I heard the same station on 4826.55 this morning (July 04) at 0145-0225\* UT with a preacher in Spanish, sometimes shouting. A few numbers of instrumental music was heard in between. SINPO 23222 with CODAR QRM.

It may be R Sicuani in Sicuani 135 km south of Cusco, Peru which is reactivated after been off the air since July 2009.

Actually I passed the station with a tourist bus on Nov 16, 2006. The station is located in the middle of a big village in the flat highlands at about 3.000 meters altitude with the antenna tower located on a nearby mountain.  
(Anker Petersen-DEN, DXplorer July 4)

Anker, Thanks for the info. I made a recording tonight with my Perseus between 2255-2305 UTC but no ID was heard.

But the station was positively IDed at 02 UTC by Torolf Johnsson at his summer QTH 20 km west of Uppsala.

Check out <<http://www.delegum.se/dx/Ljud/Sicuani.mp3>>

By the way Torolf has one of best QTH you can find in Sweden, without mains supply ,only battery power for his receivers. He has also a fantastic beverage antenna park at disposal.

Check his website <<http://www.delegum.se/dx/>>

His recording has very quiet background with only low static where my recording suffers heavily from thunderstorm static over Jutland in Denmark.

It also must be exciting to hear stations from places you once visited.

(Thomas Nilsson-SWE, DXplorer July 4)

RUSSIA Radio Moskau / Stimme Russlands aus 2003, zwar etwas aelter, aber trotzdem interessant.

<<http://www.dradio.de/dlf/sendungen/hintergrundpolitik/125351/>>

<[http://german.ruvr.ru/radio\\_broadcast/4002860/10013786/](http://german.ruvr.ru/radio_broadcast/4002860/10013786/)>

(wb, wwdxc BC-DX TopNews July 6)

RUSSIA 9680 VOR (site?), at 1437-1454 UT on July 8. When did this start? In English; program VOR Treasure Store with dramatization of "The Signal" by Vsevolod Garshim; celebration of his 155 birth year anniversary; RRI buried underneath. Noted VOR going off at 1600 UT.

(Ron Howard-CA-USA, dxld July 9)

Voice of Russia 9680 kHz at 1400-1600 UT to zone 41, Petropavlovsk Kamchatsky, 250 kW at 265 degr to Indian subcontinent, from July 1st ?

RUSSIA 15110 at 0410- UT, Tatarstan Wave July 7. Transmitter already on at 0400 UT check with test tones, and at 0410 ID in Tatar, then Russian for the program Tatarstan Wave. Good reception, although with pretty deep fades/flutter. Haven't heard this one for some time. Wasn't there some talk of the Samara site being closed down a year or two ago?.

(Walt Salmaniw-BC-CAN, DXplorer July 8)

Opens often around 0352 UT. Rather refurbished their faulty units some two years ago. Samara site now in regular service for various programmes, also TDP towrds East Africa. wb.

SOUTH AFRICA [FRANCE non] From July 1 RFI launches emissions in Swahili as follows:

0430-0458 on 7360 MEY 500 kW / 005 deg

0530-0558 on 9835 MEY 100 kW / 015 deg

1500-1558 on 12015 MEY 250 kW / 007 deg,

co-ch VOKorea in Russian on 12014.6 kHz.

(R BULGARIA DX MIX News, Ivo Ivanov, via wwdxc BC-DX TopNews June 30)

Swahili broadcasts have been launched on July 5th

<<http://www.rfi.fr/contenu/rfi-lance-son-antenne-swahili>>

(Jean Marie Aubier-D, dxld July 5)

SWEDEN 1179 Video footage of the Soelvesborg Medium wave transmitter site in Sweden. On the following link :

<<http://www.mediafire.com/?sharekey=7176fc907a9de144ab1eab3e9fa335ca7087f04a4a3cd7a8>>

You can download 2 videos about constructing the Soelvesborg Medium wave transmittersite in Sweden. Pictures can be seen about constructing the antenna's, building the earthing under the soil and testing the transmitters, Also the offidial opening is covered. - Have fun!  
(Jan Oosterveen-HOL, SW TX site July 7)

TAJIKISTAN 7245 Voice of Tajik. Heard with bad modulation especially when a lady is reading. Political comment about Kyrgyzstan and the role of Tajikistan at 1324 UT after native song, more songs. At 1400 IDs in several languages, beginning with "Insedaye Ovoi Tajik" and feat. also in English and in Russian (Zdravstvuite daragie slushateli, v ephire Golas Tajikistana Hallo Dear Listeners, on the air is Voice [of] Tajikistan), next song and talk in presumed Tajik language on June 23 - with fair signal, but on June 24 and 25 low level signal. No other stations on 7245 kHz at these times.  
(Rumen Pankov-BUL, July ARDXC ADXN direct and via dxld)

TAJIKISTAN 15500 Bible Voice BCN via Dushanbe-TJK 100 kW at 71 degrees, in Japanese 1230-1300, Suns only. Followed by Voice of Wilderness in Korean 1300-1330 UT Suns only, - acc to Aoki entries.  
(July 4)

UKRAINE RUI Kiev Ukraine is back on SW as I hear their English program now, July 1 at 0900 UTC on 11620 kHz. Up to 09 UT I heard Ukrainian.  
(Erik Koie-DEN, dxld July 1) c.f. BC-DX TopNews #970

Log July 1/2, differs somewhat of RUI official schedule, see below  
11620 0700-1000 UT Ukr, Ukr, Ukr[not English].  
S=9+30dB strength, TX s-off at 09:59:53 UT. Replaced Kharkov Taranovka site by Mykolaiv Luch Posad-pokrovskote site, 118 kilometers east of Odessa. 250 kW at 312 degrees.  
QRM co-channel at 0900-1000 UT by CRI Xian 500 kW beast in English.

6145 RUI Kharkov? {maybe Mykolaiv Luch site too?} and 7440 Lviv Krasne in English at 2200 UT to Europe, powerful signal. But sign-on 7440 kHz RUI IS before 2158 UT, starts Lviv Krasne at 2200 til 0400 UT, 500 kW towards NoAM. Latter suffers by heavy adjacent signal of RRI Bucharest English service on 7435 kHz at 2200 UT.  
(wb, wwdxc BC-DX TopNews July 2/3)

So please confirm whether it's really RUI in English again at 0000-0100 on 7440 kHz instead of VOR. Reception here too poor to tell at 0015 UT July 2 check. - 7440 Lviv Krasne 500 kW 2200(ex2300)-0400 UT, wb. -

& Mykolaiv Luch-UKR site, north of Crimea, wb.

7440 at 0148- UT, Radio Ukraine International July 6. I'm hearing RUI weakly in Ukrainian at this time. Normally in Masset, reception is far better than in Victoria, so I sure find it hard to believe that it's actually 500 or 600 kW. Sounds to be more like 100 kW from Kharkiv, but I guess the experts suggest that it's back to the Lviv-Krasne center.

Strange, but they went into English at 02:00 after the IS. This is different than normal, which used to always have English at 00 and 03 or 01 and 04 depending on the season. Now that's strange. I was certain that it was RUI initially at 02:00 but now rechecking at 02:09, it's VORWS with News and Views.

(Walter Salmaniw, Masset-B.C.-CAN, DXplorer July 7)

UNIDENTIFIED 9715 First noted on June 28th after Iran in Kurdish at 0429 UT on 9715 kHz with talks in ?Amharic? and Horn mx songs. Most likely Eritrea (which was at this time on their new 7177 kHz) - the progr cont around 0620 UT, when the signal was almost =0. Also heard on June 28th and 30th (but no on June 29th). Jammed with typical noise (as DRM like) since July 1st.

Saudi Arabia Holy Quran in Arabic is not on 9715 kHz already two weeks. Maybe Oromya from 6030 kHz? The jammers in range 7100-7200 kHz are already with noise similar like DRM mode with around 14-15 kHz width.

(Rumen Pankov-BUL, wwdxc BC-DX TopNews July 3)

UNKNOWN 9680 at 1245- UT on July 7. A difficult channel. I was searching for the return of KNLS. Nothing on listed English on 7355 kHz. On this frequency are two cochannels. RRI Jakarta is hear with their 4th program on 9680.053 kHz at strong level. There's another on 9680.003 kHz playing 'What a friend we have in Jesus'. I see that Radio Taiwan International is also scheduled at this time in Mandarin, but I wouldn't expect them to be broadcasting any religious music, unless for WYFR. By 1255 UT spoiled by the splatter from 9675 kHz, CRI in Russian at monstrous levels.

(Walt Salmaniw-BC-CAN, DXplorer July 8)

USA Frequency change of WYFR Family Radio to WeEUR:

1600-1800 NF 21485 YFR 100 kW 44 deg, ex21455 in English

1800-2000 NF 21485 YFR 100 kW 44 deg, ex21455 in German / French

(R BULGARIA DX MIX News, Ivo Ivanov, via wwdxc BC-DX TopNews July 7)

15550 at 1910- UT on July 7. WJHR Milton Fl. Fair to good reception on an otherwise pretty dead SW band with old canned preaching.

(Walt Salmaniw-BC-CAN, DXplorer July 8)

VIETNAM 12019.419 at 1444- UT, Voice of Vietnam July 5. Tentative logging on this off-frequency channel, noted at very good level with ?Bahasa Indonesian. English is scheduled at 1500 UT, so will confirm

Vietnam. Confirmed, as 9840 kHz is in // (actually 9839.897 kHz), also at good level, but with some splatter from 9845 kHz (CNR). Sure enough in English when rechecked after 1500 UT, but suffering from lots of splatter from both 12015 (Voice of Korea in Russian) and 12025 kHz (Radio Free Asia in Mandarin from Saipan at very strong level, with both short/long path echo). The 9 MHz channel is stronger for English, but also suffers from some splatter.

(Walt Salmaniw-BC-CAN, DXplorer July 7)

Radio Netherlands usurping 13640 kHz frequency today with World Cup special (presumably via Bonaire{rather Sackville-CAN relay, wb.}). I was not monitoring it at 2000-2030 UT, but it's on the list below, and it was certainly on the air, extremely strong signal before and after 2100 UT, and no doubt had totally blocked R. Tirana (also 1845-1900 UT).

There are countless other frequencies they could have picked on 13 MHz or other bands, and there is no excuse for 13640 kHz as you are clearly registered there, also to North America. The same thing is likely to happen on the final match assuming it is in the same time period.

(Glenn Hauser-OK-USA, July 6)

RNW is using 13640 only for special World Cup broadcasts involving Netherlands, and there will be only one more, coming Sunday. I was not aware of the date for that, but if that is the case, since R. Tirana does not broadcast English on Sundays, there should be no problem then, unlike yesterday.

But RNW should be restricted from using 13640 for any further broadcasts during this time period on weekdays, e.g. Tour de France or any other specials.

I doubt RNW had any interest in capturing R. Tirana audience on 13640 kHz, but were simply negligent, and evidently with inadequate monitoring and consultation of HFCC registrations beforehand.

(Glenn Hauser-OK-USA, July 8)

I see these 22 mb channels at 1700-2200 UT, not occupied in NoAM, so RNW via Sackville relay can use either

13585 13600 13605 13670

13715 - at best choice?

13735 13795 13810 13855 13860 kHz. wb.

Frequencies for Netherlands-Uruguay on 6 July.

<<http://blogs.rnw.nl/medianetwork/frequencies-for-netherlands-uruguay-on-6-july>>

Additional RNW mediumwave/shortwave frequencies will be operating on 6 July for live coverage in Dutch of the World Cup semi-final between the Netherlands and Uruguay. The match kicks off at 1830 UTC, and if the score is level after 90 minutes there will be 30 minutes extra time and, if necessary, a penalty shoot-out. Frequencies will operate at 1800-2100 UTC, extended to 2200 if necessary.

ALASKA 7355 1201-, KNLS Jul 8 Finally back! Excellent reception with English. Overview of upcoming hour, and then into Lady Gaga and Beonce.

9920 1344-, KNLS Jul 8 Excellent reception in Chinese, but with a frequent click noted. I don't think this is coming from my end as all my antennae are affected by this clicking. Apparently a story about Canada's abortion laws. At 13:58 gave a URL as <[www.smzg.org](http://www.smzg.org)> then 'Bye,Bye'. I could hear FEBC Manilla underneath. Retuned to 7355 to hear them again at excellent level, and this time without any apparent clicking, with their IS and into Chinese again. Same www given as last hour.

11765 1700-, KNLS (not) Jul 7 Despite of information from the station, I heard neither the English broadcast at 12:00 nor the Russian broadcast at 17:00, so I guess they're still having issues to work out before the newer transmitter returns to the air.

11870 1148-, KNLS Jul 9 Chinese here at excellent strength. Sign-off announcements at 11:54. Transmitter cut just before 12:00, and switched to 7355 a few seconds later with IS and 'This is Alaska calling, The United States of America'. Also excellent. Lucy Grant host for this Friday edition. Broadcasting from the top of the world ... Rob Scobey is the cohost. Coast guard station from Kodiak and DX Corner to be presented.

(Walt Salmaniw, Masset-B.C.-CAN, DXplorer July 10)

ANTARCTICA 15476 1349-, LRA36 Jul 8 Good/very good reception this morning again with lively Spanish music. Usual deep fades.

15476, 1318-, LRA36 Jul 9 No sign of them this morning.

(Walt Salmaniw, Masset-B.C.-CAN, DXplorer July 10)

ARGENTINA 11710.4 RAE, General Pacheco, 1318-1433, 03 Jul'10, Castilian, talks on the [f/ball] World Cup being held in the RSA, interviews and then a f/ball match report from RSA; 24443.  
(Carlos Goncalves-POR, wwdxc BC-DX TopNews July 9)

ARMENIA 6195 BBC July 10 at 0128 UT. Close of Pashto program with ID, into Dari, using BBC music stingers during news, English about downloading podcasts at 0159 UT "Wherever you are, you're with the BBC", into English, "The World Today".

(Ralph Brandi-NJ-USA, DXplorer July 11)

AUSTRALIA QSL Information - HCJB Australia

Dear DX-friends all parts of the world,

Hear is a piece of information on very unique QSL-card. The Japanese service of HCJB Australia is currently issuing different QSL-cards every month. These cards are not issued by the station HCJB in Melbourne, but by the Yodobashi Church in Tokyo. The address for reception reports would be mentioned at the end of this e-mail.

Now, July edition of its QSL-card is featuring an DX-pedition held from 25th to 27th of last June. The participants of this DX-pedition are six Japanese men and held on a small island called "Katsurashima". You can see on this QSL card the group photograph of these participants taken near the pier of the ships.

Front row left: Gakuji Masuo, right: Masao Hosoya / Back row from left: Shin-chi Shiraishi, Kazuhiko Iwasa, Nobuya Kato, and Koichiro Ito.

This island, Katsurashima is located in the bay of Matsushima, near Sendai, one of the major cities in the Northeast of Japan and apart from Tokyo approximately 350 kilometers. As this island is under noise-free environment, so we hold DX-pedition once or twice every year.

This QSL-card would be issued for the reception reports in July, but if you miss to receive the broadcast within July, I suggest that you ask the Yodobashi Church to issue the July edition even after the reports in August.

Program schedule:

Japanese service of HCJB Australia:

2230-2300 UT on 15525 kHz, Friday / Saturday only.

The address for reception reports:

HCJB c/o Yodobashi Church,

1-17-8 Hyakunin-cho, Shinjuku-ku,

Tokyo 169-0073

JAPAN

AUSTRALIA Video: A Chat with Peter Homfray by Jonathan Marks.

Jonathan Marks has just finished producing a superb video interviewing Peter Homfrey, former Managing Director of Radio Australia. In the interview, which occurred in 2004, Peter initially talks about his early military life.

The second half of the video is devoted to his working involvement with Radio Australia & discusses such topics as the Christmas Island SW relay station that never was & the snubbing by former Australian Prime Minister Gough Whitlam. Jonathan includes some imagery of the areas discussed & incorporates usage of Google Earth indicating areas of Peter's travels.

Peter is revealed as a fascinating gentleman & I found the entire video engrossing & enjoyable. I highly recommend it to all members. Video length is around 35 minutes from memory. You can find the video here:

(Christoph Ratzer-AUT OE2CRM <[www.a-dx.at](http://www.a-dx.at)> July 16)

BENIN 1566 0525-, TWR Jul 9 Nick Hall-Patch mentioned hearing a carrier on 1566 kHz during the summer that must be TWR Benin. Sure enough, I see the carrier and hear it weakly, but way too weak for any audio. Only seen on my QDFA which is aimed towards Europe and Africa. At the same time, my

South Pacific aimed Wellbrook array sees a weak carrier on RFO Tahiti on 738 kHz. Nothing else noted.

(Walt Salmaniw, Masset-B.C.-CAN, DXplorer July 10)

CANADA/France/FR GUIANA/GERMANY/MADAGASCAR/NETH ANTILLES/PHILIPPINES RNW, various, Silverstone car racing, football fan zone Amsterdam, - and bicycle Tour de France report this afternoon

weaker reception today July 11 football final in Johannesburg, compared to July 3

5955 NAU 500 210 S=9+40dB

7235 ISS 250 040 and

7235 ISS 250 065 S=9+15dB

9595 WER 250 300 S=9

9620 NAU 500 011 S=6-7

9895 NAU 500 230 S=8-9

13700 WER 500 120 and

13700 WER 500 240 S=7

(wb, wwdxc BC-DX TopNews July 11)

Combined live reports noted from Silverstone England formula-1 race car

series, as well as Andre Haas' ORANJE hymn sung by crowd from Museums place in Holland, as well as bicycle racing tour report from France mountains.

Typical dead zone reception on 31 and 22 mband today, and much deep fluttery fades.

5955 NAU RNW S=9+40dB.

{compare DWL 6075 kHz only noon suffered S=6-7, rather poor, not that power of JUL/WER/NAU/MOS/ISS.

DLF Berlin S=9+15dB, at 1300 UT}

7235 ISS RNW, two 250kW units, Vuvuzela blast even on Amsterdam museum plain fan mile. 1310 UT, July 11.

13700 RNW, S=7 signal only. Suffers by co-channel Lingshi-CHN national radio at 1325 UT.

(wb, wwdxc BC-DX TopNews July 11)

World Cup RNW REE.

For the World Cup final match SW transmissions, REE/R. Nacional provide me louder reports on higher frequencies during the first minutes of the event. One example was Noblejas 17595 kHz with 54455 around 1700 Z. At this time RNW signals was very low on 17535 kHz Bonaire and 9895 kHz Nauen. Only RNW GUF gave us 54344 on 15475 kHz on that first period.

In the course of the time conditions increased for Nauen signal, from 43344 at 1943 Z to 55555 at 2045 Z; while REE higher frequencies fell dramatically. RNW MDG 5915 kHz was loud around this later time with 53444.

Also heard the match in EE by BBC ASC 15400 kHz with 55545 and 11810 kHz for the extra game time with 55555. In FF by RFI Issoudun 15300 kHz with 54444. In GG by DW Woofferton 17610 kHz with 43344, Kigali 15275 kHz with 55545 and SS by RAE/R. Nacional 15345 kHz with 55545. Unfortunately many emissions s/off before the match be concluded.

For RNW informed sked:

1800-2200 5915 MDG 250 kW 255 deg to South Africa > 53444 later

1700-2200 5935 PHL 250 kW 200 deg to INS, AUS > strong adj-ch B

1700-2200 5950 WER 500 kW 210 deg to Europe > strong adj-ch B

1700-2200 9895 NAU 500 kW 230 deg to SW Europe > vy weak to 55555

1800-2200 11670 WER 500 kW 120 deg to SE Europe > vy weak

1800-2200 11905 SAC 250 kW 240 deg to US East Coast > Nihil

1800-2200 13640 SAC 250 kW 272 deg to US and Canada > vy weak

1800-2200 13685 NAU 500 kW 165 deg to Central and E Africa > vy weak

1700-2200 15310 BON 250 kW 320 deg to Caribbean and Florida > not logged

1800-2200 15475 GUF 500 kW 196 deg to South America > 54344

1700-2200 17535 BON 250 kW 080 deg to West Africa > vy weak to 31222

(Flavio Archangelo-BRA py2zx, wwdxc BC-DX TopNews July 12)

Football World Cup final. The final Netherlands-Spain began with live reportages of:

Netherlands on 5950, 9895, 11670, 13640, 13685 kHz.

REE 7275, 12015, 17595, 17755 kHz.

AIR in Hindi 9425, 9470, 1566 kHz

Filia in Greek 9420 etc, 981, 1008, etc.

Radio Romania Actualitatea in Romanian 9625 etc., 558 etc  
Gabon ANO 9580 in French.  
Nigeria 15120 in English.  
RFI 15300, 11705 etc. in French.  
BBC WS in En 15400, 12095 etc.  
DW in German 6075 and all exc 6150 and Sofia FM 95.7 MHz.  
RFA 7280, 9355, 9455 etc. in Mandarin plus accompanied Echo CNR1 jamming.  
(Rumen Pankov-BUL, wwdxc BC-DX TopNews July 11 at 1830 UT)

#### CANADA/NETH ANTILLES {Bonaire}/PHILIPPINES

Here are the freqs I heard for the FIFA final match.  
BONAIRE RNW 15310 at 1723 w/interview in Dutch. Fair to moderate.  
CANADA: RNW 11905 at 1803 in Dutch. Good at S5. // 13640 kHz solid S9.  
Tnx to Wolfy for the RNW sked.  
(Liz Cameron-USA, dxld July 11)

5935 Radio Nederland at 1700- UT on July 11. Dutch language special broadcast for the FIFA world cup final between Holland and Spain. Fair level on this 250 kW [Tinang-PHL] transmitter aimed 200 deg to Indonesia/Australia/ and the Indian Ocean. Parallels noted include 15310 via Bonaire (250 kW 320 deg to Caribbean and Florida) at excellent level, and 17535 also Bonaire (250 kW 080 deg to Atlantic Ocean and West Africa) at fair/good level. Not heard were 5950 and 9895 via Germany.

I rechecked at 18:00 and noted the following: 5915 MDG (not heard), 5935 PHL: there was nothing there, then a few seconds after 18:00, they were definitely there at fair/good level, so either I was mistaken that they came on initially at 17:00, or they were off, and then returned. 5950 WER very poor, 9895 NAU weak carrier only noted, 11670 WER very poor, 11905 SAC fair/good, 13640 SAC excellent, 13685 NAU good except for an audible hum, but hum gone when rechecked at 18:10, 15310 BON excellent, 15475 GUF poor, 17535 BON fair/good. Lot's to choose from!  
(Walt Salmaniw, Masset-B.C.-CAN, DXplorer July 12)

CENTRAL AFRICAN REP. 7220 R. Centrafrique, Bimbo, 1022-1315, 03 Jul'10, Vernacular, folk music, ..., French, news at 1300 UT when their signal was already vy. poor; 25432. They were noted on at 1915 UT.  
(Carlos Goncalves-POR, wwdxc BC-DX TopNews July 9)

CHINA 7270 PBS Nei Menggu on the air again. PBS Nei Menggu, 1208, July 14. Has returned again with a good signal; // 6040 and 9750 kHz; QRM from very faint Wai FM underneath. Was great fun to be able to clearly hear Wai FM/Limbang FM (Sarawak) during their absence. Aoki's list confirms my observation that PBS Nei Menggu went off the air here on July 8.

The PBS Nei Menggu frequencies I heard (//6040 7270 9750) would have been in assume scheduled Mongolian. I neglected to check for their scheduled Chinese broadcasts on their other two frequencies.

Thanks to Mauno Ritola (Finland) for finding on July 14: "I can hear 9520 kHz now at 2200 and I checked also 7420 kHz via a Japanese web rx and it is //."

Now we know that all their frequencies have been reactivated!  
(Ron Howard-CA-USA, dxld July 15)

Fotos Ismaning & Wertachtal.

Nach den sehr schönen Fotos von Christoph hier noch meine. Da ich es immer noch nicht geschafft habe, eine eigene Internetseite zu gestalten, habe ich die Fotos öffentlich ausgestellt.

<<http://picasaweb.google.de/ferienradio/Ismaning2010#>>

Da das Wertachtal auf meinem Weg gelegen ist, habe ich mir die Zeit genommen von allen Richtungen mal die Sendeanlage zu fotografieren.  
<<http://picasaweb.google.de/ferienradio/Wertachtal>>

Viel Spass.

(Sandro Blatter-SUI, A-DX July 11)

IRELAND LF 252. However, I can get Eire 252 Summerhill's signal with nil or almost nil QRM, depending on the conditions, thanks to the K9AY.

By the way, does anyone know the genuine name for the Irish tx location listed as being located at Summerhill - what on earth is this for a true Irish name?! It should be Goidelic, not English!  
(Carlos Goncalves-POR, wwdxc BC-DX TopNews July 16)

The Irish LW station is located NW of Dublin in County Meath and really is adjacent to the town/village of Summerhill. There's probably an Irish name for it - as there is in Wales and parts of Scotland for various places - but reference is to Summerhill. On You Tube ask for >Atlantic 252 Station Launch 01-09-89< and you will see a shot of the mast which seems to be just beyond someones back garden. Transmitting sites are usually named after the nearest town or village - 198 isn't within Droitwich but some way south of that town. Moorside Edge really is built on the edge of a moor and is not the name of a town or village. Wolfy could no doubt give you the actual geographic location of the Summerhill station.  
(Noel Green-UK, wwdxc BC-DX TopNews July 16)

a n d

17740 S=9+5dB, little bit stronger than 17735. 180degr?

Time pips exact at 11.02:00 UT.

See also Swahili program start below.

2000-2157 9880 S=9+10dB, much weaker than 11850 kHz. 230degr?

11850 S=9+25dB at 2128 UT, July 13. 180degr?

English

July 13

1400-1557 15235 a n d 15240 kHz. Both S=9 in Germany,

adjacent QRM 15245 kHz by DPRK in French at 1400 UT, S=9+10dB. 15240 130degr?, and 15235 180 degr?

July 14

1400-1406 17735 S=7 still at 1406 UT, 130degr?

a n d

17740 little stronger S=8 at 1406 UT, 180degr?

Swahili program lasted late til 1400 UT, announcement in French by lady "La Voix de Africa", and later ID in English 1400-1557 UT service too, both still on 17735 and 17740 kHz til 1405:30 UT. Changed txs very late around 1406 to 15235 and 15240 kHz.

1406-1557 15235 S=7-8, probably 130degr?

Underneath co-channel poor Vatican Radio to India at 1505 UT.

15240 S=8-9, probably 180degr?

July 14 ID at 1600 UT, and TX off at 16.00:13 UT.

French

July 13

1700-1757 9880 S=8-9 due of co-channel DRM Bolshakovo-RUS. 230degr?

11850 S=9+25 to 30dB, 180 degr?

July 14

TX off at 1600:13 UT on 15 MHz, and TX on at 1604:02 UT on 9880 and 11850 kHz. 1605 ID and frequencies announced in English

1600-1757 9880 S=7 due of co-channel DRM Bolshakovo-RUS. 230degr?

11850 S=9+10dB, 180 degr?

Underneath at 1601 UT YFR hymn, co-channel YFR En via Al Dhabbaya UAE to Asia.

Hausa

1800-1900 9880 Voice of Africa in Hausa from 1800 UT. Suffers ahead of Bolshakovo DRM signal. 230degr ?

11850 Voice of Africa in Hausa from 1800 UT. 180degr? Suffers hefty by BBC Somali from Zyyi, Cyprus at 1800-1830 UT.

1900-1957 9880 Voice of Africa Sabrata in Hausa from 1900-2000 UT, S=9+20dB. 230degr?

Suffers by adjacent 9875 channel signals, Chinese Firedrake[!] music, and RFA Tinian in Mandarin Chinese, both also S=9+20dB.

11850 Voice of Africa Sabrata in Hausa from 1900-2000 UT, S=9+25dB. 180degr?

Adjacent 11845 is free, 11855 signal from Ascension YFR program in Yoruba, S=6 fair signal.

Swahili

Sabrata carried only HEAT AIR on July 14 at 12-14 UT:

1200-1357 17735 S=7 at 1355 UT, 130degr?

a n d

17740 little stronger S=8 at 1355 UT, 180degr?

At 1200 UT 1000 Hz tone til 1201:40 UT, July 13.

July 14

Only tx carrier noted at 1200 UT on both channels, Swahili program missed.

Programmes start never exact on the hour, rather 1-4 minutes later.

At 1211:56 only two seconds long program feed modulated, than program break again til now 1321 UT, July 14.

Co-channel QRM 17735 by YFR UAE Al Dhabbaya relay.

Female announcer of Voice of Africa Sabrata in Swahili now on air, started very late from 1321:40 UT. Break from 1200 to 1321 UT, only pure TX carrier on air.

Swahili program lasted late til 1400 UT, announcement in French by lady "La Voix de Africa", and later ID in English 1400-1557 UT service too, both on 17735 and 17740 kHz til 1405:30 UT.

Changed txs very late around 1406 UT to 15235 and 15240 kHz.

(wb, wwdxc BC-DX TopNews July 14)

MADAGASCAR 7105 (USB + carrier mode), RTV Malagasy. I still believe this must be something new/different that they are doing for World Cup (WC) coverage. It is just too consistently good from anything I had ever heard here in the past. The vastly improved daily reception started with the beginning of the WC coverage. July 1 was off the air, as there was no WC match. July 2 randomly from 1315 to 1459\*. Phone in show; WC/football Madagascar promos; Hi-Li music; coverage of WC match; Hi-Li music and suddenly off. July 3 randomly from 1352 to 1502\* basically same format. Most days can hear // 6134.9v with weak signal, but 5010 (USB + carrier mode) is harder to hear.

(Ron Howard-CA-USA, JPNpremium July 11)

MALI 5995 La Voix du Mali, July 10 at 2228 UT local music, extended talk in French 2230-2245 UT, back to music, ID at 2300 UT "Vous ecoutez La Voix du Mali".

(Ralph Brandi-NJ-USA, DXplorer July 11)

As to Mali, the only used fqs as far as I can tell are 5995 kHz evenings, 9635 kHz day time; 7285v kHz isn't heard for quite a number of months now - and 4785v or 4835v kHz, well, it's almost ancient history now.

Right now, at nearly 2100 UT, there's a strong signal carrying some prgr in Russian on 5995 kHz, so MLI is choked by this. An obs. on the SW coast via the Beverage would provide a different picture.

(Carlos Goncalves-POR, wwdxc BC-DX TopNews July 15)

MAURITANIA 4845 R. Mauritanie, Nouakchott, 1802-1840, 06 Jul'10, French, newscast, Arabic after that, interviews & talks; vy. good; // 783 rated 44444, QRM de E. At least as far as my obs. are concerned, it's not common to listen to some French from this stn.

(Carlos Goncalves-POR, wwdxc BC-DX TopNews July 9)

MOROCCO 9575 R Medit Internat Nador signal is very weak since July 2010.

RMI Morocco was not on air via 9575 kHz at 0600 UTC, and is still off almost three hours later. The transmitter has been low in modulation recently so may be under repair. Africa #1 on 9580 kHz was fair to good and clearly heard for a change.

(Noel R. Green-UK, wwdxc BC-DX TopNews July 15)

MRC - Radio Mediterranee Int'l, Nador (2000 - rather 1600) - 0500-0400: Arabic and French transmissions; SW parallel: 9575 kHz (Boel List).

Yes, I noted the poor signal and wobbling modulation on Radio Medi Internat 9575 kHz in past week too.

Thomson Thales etc. company has won to built up new 171 kHz longwave station Nador 1600 kW, - item appeared some two years ago. So I guess they are NOW on reshuffling action of the tall longwave masts and also SW TX site antennas on very same location. That could be the reason to use a wobbling sound backup unit ...

(wb, wwdxc BC-DX TopNews July 15)

NEW ZEALAND 6170 R. NZi, Rangitaiki, 0929-1030, 08 Jul'10, interview,..., newscast at 1000, talks; 25432. Their signal was already vy. faint at 1030.

11725 ditto, 2134-2150\*, 07 Jul'10, interview, Pacific regional news, fq ann., IS prior to fq change (13730); 45433.

(Carlos Goncalves-POR, wwdxc BC-DX TopNews July 9)

NIGERIA 917 R. Gotel (pres), Yola, 2216-2214, 03 Jul'10, English, int'l., music; 33442, adj. QRM de E 918.

6089.9 R. Nigeria, Kaduna, 2204-..., 02 Jul'10, Vernacular, talks in a presumably Koranic prgr; 44433, adj. DRM QRM.

(Carlos Goncalves-POR, wwdxc BC-DX TopNews July 9)

PAKISTAN/CHINA A Memorandum of Understanding between Pakistan Broadcasting Corporation and China Radio International has been signed in the presence of President Asif Ali Zardari in China,said a press release here Thursday.Under the MoU,both the broadcasting institutions of friendly countries will extend maximum cooperation with each other in technical field and programmes to enhance the standard of their broadcasts in the region.

The PBC will relay programmes of China Radio International on its network which will help further promote friendship of both the countries.It is worth mentioning that Director General Pakistan Broadcasting Corporation Murtaza Solangi during his visit to China a few months ago had held talks with the administration of China Radio to finalise the MOU. The PBC during the last two years has substantially enhanced its collaboration with international radio organisations to promote public broadcasting in the country and specially to improve overall performance and coverage of Radio Pakistan.

A\_P\_P Pakistan's Premier NEWS Agency, July 8. <<http://bit.ly/9L5wS6>>  
(Yimber Gaviria-CLM, JPNpremium)

PALAU 9960 1430-, Furusato no Kaze July 9. Strongly jammed but audible otherwise at good level in Japanese.

(Walt Salmaniw, Masset-B.C.-CAN, DXplorer July 10)

PNG 3915 1319-, Radio Fly July 9. About the best I've heard them since last week. Good level, but lowish modulation, it seems. Non-stop music. Later when rechecked at 13:54 UT, 5960 kHz is better, but still suffers from a lot of adjacent splatter.

(Walt Salmaniw, Masset-B.C.-CAN, DXplorer July 10)

RUSSIA/USSR History material of USSR schedules in the 70ties.

In "Specialized Resources" (under "DX Newsletters"): The USSR High Frequency Newsletter was published by Roger Legge of McLean, VA beginning in November 1976. UHN dealt mainly with Foreign Service transmissions from the former Soviet Union and its constituent Republics. The newsletter was useful because of the frequent changes in Soviet frequencies and the Soviet policy of showing transmitter sites on QSLs when requested. We have posted two issues of UHN: March 1977 (No. 4) and November 1980 (No. 30). (John Herkimer-NY-USA, DXplorer July 11)

RUSSIA 15110 0410-, Tatarstan Wave July 7. Transmitter already on at 04:00 UT check with test tones, and at 04:10 UT ID in Tatar, then Russian for the program Tatarstan Wave. Good reception, although with pretty deep fades / flutter. Haven't heard this one for some time. Wasn't there some talk of the Samara site being closed down a year or two ago?.

(Walt Salmaniw, Masset-B.C.-CAN, DXplorer July 10)

9680, VoRUS (site?), 1437-1454, July 8. When did this start? In English; program VOR Treasure Store with dramatization of "The Signal" by Vsevolod Garshim; celebration of his 155 birth year anniversary; RRI buried underneath. Noted VOR going off at 1600 UT.

(Ron Howard-CA-USA, dxld July 14)

9680 kHz, 1400-1600 UT to zone 41, P.K., 250 kW, 265 degrees, RUS VOR GFC from Kamchatskiye to Indian subcontinent, from July 1st?

(wb, dxld July 14)

SOUTH AFRICA 3320 SAUK / R. Sonder Grense, Meyerton, 1911-..., 03 Jul'10, Afrikaans, [f/ball] World Cup match report; 35342.

**SRI LANKA/CHINA** China Radio International (CRI) held a ceremony here on Friday to celebrate the launch of a radio channel in the Sri Lankan capital of Colombo. Sri Lankan Prime Minister Dissanayake Jayaratne told the ceremony that China and Sri Lanka have been enjoying traditional friendship. Jayaratne said in the era of "Global Village", the launch of the radio channel will provide a new bridge for the two peoples to understand each other.

Wang Gengnian, director general of CRI, said Sri Lanka is among the countries where the CRI has the largest number of audience and receives most letters. "With the support of our friends in Sri Lanka and China, the Colombo FM channel will play an important role in promoting the bilateral relationship and the two countries' cooperation in broadcasting," said Wang.

Formally launched on April 23, the Colombo FM 102 channel broadcasts 19 hours of news and culture programs in Sinhala, Tamil, English and Mandarin every day. The channel covers Western Province, the island's political, economic and business center with an area of 3,700 sq km. Founded in 1941, CRI aims at promoting understanding and friendship between the people of China and people throughout the world. CRI's programs include news, current affairs, and features on politics, economy, culture, science and technology.

(Yimber Gaviria-CLM, JPNpremium)

**TAIWAN** 7460 I-Kuan Tao (presumed).

Presumed I-KUAN TAO 7460 via HUWEI, TAIWAN in Chinese at 1100 to 1157 UT on July 10. Opened with Asian vocal & instrumental music; a woman spoke briefly; then a man spoke until transmitter went off at 1157 UT. Fair signal. This is a regular here at 1100 but usually fades out by 1120 UT. (Wendel Craighead-KS-USA, DXplorer July 14)

**TAJIKISTAN** 11560, 1513-, Radio Free Chosun July 9. Tentative on this one and difficult to copy due to utility (or perhaps a jammer). Best on LSB.

Listed in Korean, and previously from Armenia. Fair at best.

(Walt Salmaniw, Masset-B.C.-CAN, DXplorer July 10)

15572 odd channel VoTibet via Dushanbe-TJK, and accompanied CHN Firedrake music on even 15570 kHz 1300-1400 UT, July 11. Both signals equal level S=6-7 here in Europe. July 11.

(wb, wwdxc BC-DX TopNews July 11)

**TURKEY** 21125 OHR signals now also from Turkey.

Zu den Ueberhorizontradaren der Briten auf Zypern und Russen gesellt sich ein weiteres System aus Antalya/Tuerkei. Es sendet ebenfalls 50 Pulse pro Sekunde und ist daher fuer Funkamateure nicht vom Zypern-Radar zu unterscheiden, da es aus der gleichen Richtung kommt. Nur die Bundesnetzagentur mit ihrem Peilnetz kann den Sender ermitteln. Er sendete am 12. Juli um 08.30 Uhr auf 21.125 MHz mit einer Bandbreite von 10 kHz. (DARC DL broadcast message, July 15)

**UKRAINE** 7440 0148-, Radio Ukraine International July 6. I'm hearing RUI weakly in Ukrainian at this time. Normally in Masset, reception is far

better than in Victoria, so I sure find it hard to believe that it's actually 500 or 600 kW. Sounds to be more like 100 kW from Kharkiv, but I guess the experts suggest that it's back to the Lviv-Krasne center. Strange, but they went into English at 02:00 after the IS. This is different than normal, which used to always have English at 00 and 03 or 01 and 04 depending on the season. Now that's strange. I was certain that it was RUI initially at 02:00 but now rechecking at 02:09 UT, it's VoRUS Moscow WS with News and Views.  
(Walt Salmaniw, Masset-B.C.-CAN, DXplorer July 10) 2200 UT RUI En.

Re: Radio Ukraine, antenna type. RUI 11620 07-10 UT

Distance Mykolaiv Luch-UKR to NoEa England is about 2600 kilometers, like 12060 Moscow and 11655 Lviv at same time slot 9-10 UT, but latter have both stronger signals.

Maybe the Mykolaiv ant #206 type in 25 mband is not much effective towards Europe.

11620 206 AHR(S)4/2/0.5

11655 298 AHR(S)8/8/1.0 or 288 AHR(S)8/4/1.0

12060 158 AHR(S)2/4/1.0

Curtain antenna, half-wave dipole array, multi-band, centre-fed, aperiodic screen reflector

Designated: AHR(S) m/n/h

m number of half-wave dipoles in each horizontal row

n number of rows spaced half a wavelength apart one above the other

h height above the ground in wavelengths of the bottom row of dipoles.

Possible slew and the design frequency are entered in separate requirement fields.'

According to a report in Media Guardian, BBC Monitoring (BBCM) faces  
budget cuts and significant job losses as part of the coalition  
government's austerity measures. Chris Westcott, director of BBCM, told  
employees in a briefing on Monday that the "situation is grim" and the  
organisation is at a "tipping point". It could even be closed down, he  
warned.

BBCM employs about 450 people in the UK and overseas, with a main base at  
Caversham Park in Reading. It tracks and translates press, TV and radio  
reports from 150 countries in more than 100 languages. The organisation's  
role and funding is being examined by the government as part of its  
strategic defence and security review, the first for 12 years.

BBC Monitoring, a little-known section of the corporation which listens in  
on 3,000 media sources from around the world, is facing swingeing budget  
cuts as a result of a drop in its government funding which could lead to  
its closure.

For nearly 70 years, workers at the former stately home in Caversham, near  
Reading, have monitored publicly available material in more than 100  
languages to provide a running digest of global journalism for senior  
civil servants, ministers and commercial clients.

It uses a "United Nations" of 400 staff based in a Victorian mansion in  
Berkshire, and the organisation's work has given it a front-row seat at a  
series of global events, including providing the translation of an obscure  
radio broadcast by Nikita Khrushchev which ended the Cuban missile crisis  
when it was rushed to the White House. It also broke the news to British

audiences of the death of President John F Kennedy.

But BBC Monitoring now faces an uncertain future after it emerged that the £25m annual government grant from the Cabinet Office, which provides the vast majority of the unit's funding, is set to be slashed in this autumn's spending review, potentially tipping it into insolvency unless it makes extensive cuts in its services.

At a briefing to all staff last week, Chris Westcott, the director of BBC Monitoring, told employees that the "situation is grim" and confirmed that failure to accommodate the government's cuts could lead to closure. Managers are likely to be asked to find savings of £3.2m during the next two years, making the trimming of key services inevitable, according to managers.

The monitoring operation, which does not receive any licence-fee funding, has been the subject of a financial squeeze for the best part of a decade, making efficiency savings of 7 per cent a year since 2001. Last year, it made a profit of £2.5m on its total income of £28.8m, supplemented by deals with commercial customers and foreign governments.

A BBC insider said: "We have got two options: either we cut some of the core operational services and devalue the business, or we try to stick together and look for a way through this. But we are already cut to the bone and if we have to cut more, we are in deep trouble. There is a risk of closure if the cuts go too far. The situation is quite dire."

The current five-year funding settlement for BBC Monitoring is due to come to an end this year and with its main customers - the Cabinet Office, the Foreign Office and the Ministry of Defence - facing 25 per cent cuts in their budgets, the prospects of maintaining funding at its current level are understood to be negligible.

The role of the unit is also being considered as part of the Strategic Defence Review. Part of the work undertaken by Caversham, whose regional units include a central-Asian listening station in Uzbekistan, is transcribing broadcasts by Afghan radio stations sympathetic to the Taliban, offering an insight into the thinking of the militant Islamists.

It was a similar need to gain insight into the mindset of implacable enemies and uncertain allies which led to the founding of the BBC's monitoring operations during the Second World War. A colourful team of sound engineers and linguists, including the Austrian-born art historian Ernst Gombrich, was assembled in camouflaged huts in the ground of a stately home in Worcestershire to listen to German, French, Italian and Russian radio broadcasts.

Gombrich later recalled that the rudimentary wax cylinder recording technology made it difficult to discern whether the reedy, faint voice of a foreign broadcaster was saying "send reinforcements, am going to advance" or "send three and four pence, am going to a dance".

The operation moved to Caversham Park, the one-time home of Elizabeth I's treasurer, in 1942 with a remit dedicating its staff to "reporting foreign news media comprehensively and accurately, without bias or comment".

It is a global burden shared with the Foreign Broadcast Information

Service, which was once part of the CIA, but is now transferred to the US government's Open Source Center. It keeps a number of staff in the slightly idiosyncratic surroundings of Caversham Park, where gardens partly landscaped by Capability Brown host a dozen satellite dishes. The staff canteen is housed in the old orangery.

Over the years, BBC Monitoring's staff - currently standing at about 450 worldwide and recruited from diverse backgrounds, ranging from university graduates to former asylum seekers - has maintained a constant vigil, listening at any one time to 37 television stations and 100 radio services. Since the 1990s, it has also sifted through newspapers and websites, with the internet now accounting for about a third of its activities.

Such is BBC Monitoring's reputation for absolute accuracy, President Kennedy accepted at face value a translation of a radio address by Khrushchev in 1962 to a domestic audience announcing the withdrawal of Soviet vessels carrying nuclear missiles to Cuba. Without waiting for confirmation from US intelligence sources, Kennedy responded to the Kremlin's overtures immediately.

The Cabinet Office, which oversees government funding of BBC Monitoring, said: "We are involved in regular discussions with the BBC over expenditure in this area and nothing has been put to ministers to decide. No decision has been taken [on future funding]."

In a statement, the BBC said it would be approaching the funding discussions with "vigour and confidence" but added it was "acutely aware that the prevailing economic climate will bring huge challenges and tough choices".

Sightseeing on IBB Lampertheim transmitting site.  
Friday August 20, 2010, 0800 UTC / 1000 hrs CEST  
Prior registration required, take an ID card with you.

Einladung: Besichtigung der IBB Anlagen in Biblis und Lampertheim

Hallo Radiofreunde,  
der Rhein-Main-Radio-Club laedt ein zum Besuch mit Fuehrung der  
IBB Sendestellen Biblis und Lampertheim  
am Freitag, den 20. August 2010 ein.  
Wir treffen uns um 10.00 am Eingang der

address:  
International Broadcasting Bureau  
Transmitting Station Lampertheim  
Ausserhalb 6  
68623 Lampertheim / Germany

Dass der Besuch schon um 10.00 Uhr beginnt, war ein Wunsch der IBB,  
wahrscheinlich da die Station am Wochenende automatisch laeuft und kein  
Personal fuer eine Fuehrung zur Verfuegung steht.

Da die IBB eine amerikanische Einrichtung ist, bitte anmelden und  
Personalausweis mitbringen.

Alle sind herzlich eingeladen.  
Der Besuch ist fuer RMRC-Mitglieder kostenlos, Nicht-Mitglieder 10 EUR.

Aktuelle Informationen unter <[www.rmrc.de](http://www.rmrc.de)> - Bereich Termine.

Harald Gabler  
RMRC Vorstand  
(via Lutz Winkler, A-DX July 5)

(Kouji Hashimoto-JPN, JPNpremium July 16)

AUSTRALIA 2368.5 R Symban, Marrickville, Sydney, 1153-1253, Jun 30,  
Jul 01 and 09, They are back! At good level with Greek music after a brief  
call-in segment. Best I have ever heard them as well! Into Greek ann at  
1159:15, then back to Greek music. Nice ID at 1235 noted, and still going  
strong. By 1244 starting to fade-down. One thing I have noticed, is that  
the AOR 7030+ is outperforming the Perseus SDR by a substantial margin  
with A/B tests using the same antenna.  
(Walt Salmaniw-CAN, Dexplorer via dswci DXW)

6230u Australia, VMW ID by om at 1008 after wx update. 21 July.

2310 VL8A Alice Springs NT 1000 weakest of the three, 22 July.  
2325 VL8T Tennant Creek NT 1000 some audio, 22 July.  
2485 VL8K Katherine NT 1000 strongest of the three, 22 July.  
4835 Alice Springs, NT 0735 on 19 July, nothing on 4910 kHz.  
(Robert Wilkner-FL-USA, DXplorer July 24)

AUSTRIA/GERMANY 6110 TOM US religious program at 1300-1500 via  
Wertachtal site; but 1500-1600 UT via Moosbrunn-ORS Austria site.  
(MBR July 21)

BOLIVIA 4795.92 R Lipez, Uyuni, 0239, July 24, Spanish ann mentioned  
" .. fin de semana..", indigenous songs to past 0315 when tune-out. Weak  
but completely in the clear. Tentative only, seems unusually late for  
them? Had previously heard this July 17 at 0247 to 0305 UT which is  
roughly the same time that Karel Honzik was listening, cf. dxld under  
UNIDENTIFIED.  
(Martien Groot-HOL, dxld July 24)

4699.9 Radio San Miguel, Riberalta, 2208-2213, July 12, locutor,  
comentarios en espanol. Muy debil. 15321.

5952.5 Radio Pio XII, Siglo XX, 2201-2208, July 12, locutor, espanol,  
comentarios; "Los momentos mas importantes con nuestros oyentes". Mejor en  
LSB 13221.  
(Manuel Mendez-ESP, hcdx July 21)

6134.82 R. Santa Cruz 1055-1100+ Jul 19. Religious program ending; man  
with canned ID at 1056 announcing freqs of 960, 6135 kHz, and 92.? FM  
"desde Santa Cruz de la Sierra, Bolivia"; flute mx to 1100 UT, then into  
another program. Fair but deteriorating quickly.

(John Wilkins-CO-USA, DXplorer July 24)

3309.98 Radio Mosoj Chaski, Cochabamba yl under t storms hash 1000 UT on 23 July.

3380 UNID at 0215 UT on 20 July.

3390.01 Radio Emisoras Camargo, Camargo seems irregular 2330 to 0030 UT.

4409.8 Radio Eco, Reyes 0000 UT on 21 July.

4451.2 Radio Santa Ana, Santa Ana de Yacuma 2350 UT on 21 July.

4700 Radio San Miguel, Riberalta 1000 and 0000 every day!

4716.19 Radio Yura, Yura 1000 and 0000 UT, every day.

(Robert Wilkner-FL-USA, DXplorer July 24)

5952.4 R. Pio XII, Siglo XX, 2216-2225, 17 Jul'10, Quechua, talks often mentioning "sindicato" [trade union], songs in Castilian; 34432, adj. QRM.

(Carlos Goncalves-POR, wwdxc BC-DX TopNews July 22)

BOSNIA-HERCEGOVINA 612 BH Radio 1 OFF air via Sarajevo on 612 kHz.

Dear Mr. Robic,

unfortunately, our transmitter is off-air for 6 months. We have to repair our transmitter. Thank you for this mail.

Best regards Senada Cumurovic - director of BH radio 1, July 19

(Patrick Robic-AUT, A-DX July 19)

Google Earth imagery. Some high resolution place. Another GE image update.

Sarajevo - new picture in G.E ?

(Carlos Goncalves-POR, wwdxc BC-DX TopNews July 22)

CANADA 6030 CFVP Calgary at 1148 UT with Country music, 1150 UT "AM 10-60" ID. Poor-fair with co-channel QRM.

6160 CKZU Vancouver at 1144 UT with BBC's "The Strand" arts program. Good.  
(Harold Sellers-BC-CAN, DXplorer July 20)

Sackville mixing products. Right now at 0108 UT JULY 18, I am hearing Radio Sweden on 6010 kHz and Voice of Vietnam on 6175 kHz, both from Sackville and 165 kHz away from each other. I am also hearing their mixing products. Radio Sweden is audible on 6175 + 165 kHz, or 6340 kHz. Voice of Vietnam is on the lower image frequency of 5845 kHz.  
(Rik van Riel-NY-USA, hcdx July 18)

CANADA [COSTA RICA - probably from CTR site] 9489.92 odd signal of Radio Republica in Spanish, on July 21, 0000 UT.

From Costa Rica too ? Spanish phone in, very smallband phone line audio, only 3 kHz or less, S=9+15 dB here in Germany. In background warbling jamming sound from Cuba.

Probably via former Faro del Caribe, San Jose site ?  
Or is the former CIA, then UNR TIRWR Cahuita site reactivated?

see UNR site at Google Maps

<[http://maps.google.de/maps?f=q&source=s\\_q&hl=de&geocode=&q=++9%C2%B045%2723.38%22N++82%C2%B053%270.85%22W&sll=51.151786,10.415039&sspn=19.253434,57.084961&ie=UTF8&ll=9.756885,-82.88227&spn=0.003685,0.006968&t=h&z=18](http://maps.google.de/maps?f=q&source=s_q&hl=de&geocode=&q=++9%C2%B045%2723.38%22N++82%C2%B053%270.85%22W&sll=51.151786,10.415039&sspn=19.253434,57.084961&ie=UTF8&ll=9.756885,-82.88227&spn=0.003685,0.006968&t=h&z=18)>  
(wb, wwdxc BC-DX TopNews July 20-21)

Rather CANADA: 9490 kHz Republica has been overtly via Sackville:

9490kHz 2300-0200 UT 11 SAC 100kW 227deg Mon-Fri CAN RMI RCI

And I think Sackville is quite capable of running 80 Hertz off frequency. Usually very strong signals from RR on 9490 kHz, surely not little Cost Rican transmitters.

(Glenn Hauser-OK-USA, dxld July 21) Thanks Glenn.

CHINA CRI English service has improved in speaker sound, a handful of new locutors origin from the Western World, with British like BBC, NZL/AUS like R Australia, and US Maine-NY accent. Noted 7420 CRI English tonight and thought first - it was Radio Australia program.  
(wb, wwdxc BC-DX TopNews July 20)

[TIBET - Xizang] 7240 (Xizang Chinese channel), reported as silent, is not so. Is and has been a regular at my location. The westerly beam of this one and 7385 kHz gives good reception here.  
(Olle Alm-SWE, wwdxc BC-DX TopNews July 23)

Firedrake bandscan July 15: none at all found 19-8 MHz - between 1305 and 1310 UT.

Firedrake July 16: 14700, JBA at 1255. No others found 8-18 MHz. However,

15285, at 1256 July 16, open carrier, 1257 B-B-C- chimes IS in the clear, so I stayed tuned to hear the jamming start. At 1259:50 Firedrake cut on

briefly over BBC sign-on, but at 1300 switched to CNR1 jamming with Mandarin IDs, way over BBC.

15571, at 1348 July 16 making het with equally weak 15570 signal. Signs of the radio war between the ChiCom and V. of Tibet via TAJIKISTAN, scheduled on 15570 at 1330-1430, per Aoki.

Also could hear a lower-pitched het from 15266 additional ChiCom jamming vs Taiwan 15265.

Firedrake July 17: 7280, fair at 1121, // 8400 but not 9040. Unlike the others, 7280's victim is also audible, a 300 kW Sound of Hope via Taiwan at 11-13. Otherwise, it's unusual to hear any FD below 8400 8400, good at 1118, not // 9040; also after 1205 and at 1237 9040, good at 1118. This one is not // the others. Also after 1205 but gone at 1237 9380, fair at 1157, // 8400 and 7280, not 9040. Also after 1205 but gone at 1237 UT 10500, good at 1159 UT; also after 1205 but gone at 1237 UT. No others found up to 18 MHz.

CNR1 jamming, besides usual spots 9605, 11785, 11805, 12040, etc., also vs RTI on 11710 [see KOREA NORTH] making SAH of some 10 Hz, and // 15795 an echo apart, July 17 at 1241 vs All India Radio's Chinese service, which the ChiCom must also block from reaching the People. (Glenn Hauser-OK-USA, dxld July 21)

There is a strong Firedrake jammer on 11560 kHz this evening (17 July 2010). First noted at 1755 UT, off at 1800. But was there again at 1850 recheck, off at 1900, back at 1904.

Not sure what is on this frequency at this time that would warrant Chinese jamming. Nothing audible during Firedrake pauses on the hour. Any ideas? (Tony Rogers-UK, BDXC-UK yg via dxld)

In such cases the default assumption is that usually inaudible Sound of Hope peanutwhistle jumped to the frequency, drawing the wrathful overkill jamming. Or maybe RFA moved from 11540 kHz? (Glenn Hauser-OK-USA, dxld July 21)

Thanks to David Towers and Steve Calver who confirm Firedrake again this evening (20 July 2010) on 11560 kHz at 1650 and 1731 UT respectively. I tuned in at 1745 and again noticed breaks on the hour at 1800 and 1900 UT before resuming approx 4 minutes later.

Did a quick check this evening at 1800 and Radio Free Asia in Mandarin was jammed by CNR-1 on all of its frequencies: 7355 9355 9455 9540 9865 11540 11700 and 13625 kHz, whereas last night between 1800-1900 all frequencies were accompanied by Firedrake. (Tony Rogers-UK, BDXC-UK yg via dxld)

Firedrake July 18, all // today when checked: 8400, inaudible at 1215, but very poor at 1217 9040, fair at 1215 and 1315 10500, good at 1218 // 9040 and 8400; poor at 1312 13100, fair at 1225 and 1311 13970, good at 1222; gone at 1310 14700, unheard at any of these times 15555, poor at 1307 15795, very poor at 1226 mixing with AIR Chinese and/or CNR1 jamming. Still very poor at 1308 15850, poor at 1226. By 1308, 15850 FD had risen to very good. Aoki does not have anything near this frequency, so we can only assume Sound of Hope had jumped here

15285, CNR1 and BBCWS Mandarin via Singapore fighting it out at 1310  
15330, motorboating noise at 1309 and CNR1 Chinese vs BBC Uzbek via  
Thailand.

Firedrake July 19: 9040, fair at 1254 10500, good at 1256 // 9040 14700,  
fair at 1259, gone at 1347 No others found up to 16 MHz by 1300

15520, CNR1 jamming plus motorboating noise, July 19 at 1349; CNR1 was  
// but a reverb apart from 15285 vs BBC.

15520 kHz must be today's landing spot for V. of Tibet via Tajikistan at  
1330-1400 UT, which in Aoki list dated 19 July is shown on 15530 kHz  
with \*jamming.

Firedrake July 20, all // : 8400, JBA at 1258 10500, good at 1336. At this  
point in every hour there is a relatively quiet, slow melodic passage,  
with drums beginning to come back at :37 15140, poor at 1255, no others up  
to 16 MHz before 1300; vs SOH 100 W 15520, fair with het at 1336, very  
poor at 1355; vs V of Tibet via Tajikistan 15670, poor at 1337, very poor  
at 1354; vs RFA in Tibetan via UAE.

[and non]. Firedrake July 21: 15545, poor at 1235; a bit earlier I was  
just hearing a tone/het. The 20 July Aoki shows "15547\*VOICE OF TIBET  
1230-1330 1234567 Tibetan 100 131 Dushanbe-Yangiyul TJK 06848E 3829N VOTi  
a10" No others found down to 8 MHz by 1300.

CNR1 jamming, in time order, no doubt also against V. of Tibet:  
1334 on 15530, CNR1 + motorboating noise. Aoki has VOT in Chinese, not  
Tibetan at 1330-1400 via Tajikistan on 15530, but it's a real jumper

1335 on 15520, Chinese not // 15530, het but no further jamming. I guess  
this was V. of Tibet via Tajikistan, momentarily escaping the jamming  
which was on 15530, but not for long

1336 on 15430, CNR1 // 15285 mix. VOT in Tibetan via UAE is on 15430 per  
Aoki, at 1330-1400. UAE site may not be as adept at jumping around but  
I think this one has also done that in past

1338 on 15560, CNR1 + motorboating has jumped here from 15530, but cuts  
off at 1340\* \*1340 back to 15530 the CNR1 + motorboating but only until  
1341:30\*

\*1342 now on 15570, CNR1 + mb + het. This time it seems to stay put past  
1400 when the het is still heard but VOT should be finished.  
(Glenn Hauser-OK-USA, dxld July 21)

CONGO Dem.Rep Very interesting article about HCJB & Radio Kahuizi in

Democratic Republic of Congo.

HCJB Global Partner Radio Kahuzi has launched a cutting-edge spiritual outreach to young pastors and youth in Bukavu, Democratic Republic of Congo (D.R.C.). The program, only two months old, is interactive with instant feedback via SMS text messages.

"Even though there are no land lines in eastern D.R.C, there are cell phones," explains missionary Richard McDonald in a Web site report. "Like young people in America, African youth are learning how to utilize this new method of communication, and in this case, for the glory of God!"

Young pastors, young people and adults are hungry for answers to life's perplexing questions about "how to live righteously and godly in a perverse generation," said McDonald who serves at the station with his wife, Kathy. "Each one of these young people has lived through horrific experiences over the past 18 years of war, famine and disease. Yet they are hopeful and hungry for the Word of God and for contact with believers in the outside world."

In the first two radio Bible studies aimed at and developed by this audience, there were exhortations against imprudence in the Christian community in Swahili, discussing 1 Corinthians 6:15-20 and Ephesians 6:31, with "very positive ratings." Suggested follow-up topics were received via SMS text messaging from young pastors and youth up to 300 miles away.

The next topic developed for broadcast was suggested by a young man who leads one of the local Bible studies in Bukavu. "Improving Youth Participation in the Lord's Work," based on a passage in 1 Timothy, was the theme. It was followed by discussion and SMS feedback.

"There are so many obstacles Satan seems to put in the way," McDonald added. "But the recognition that God is not willing that even one of these beautiful young people should die without the knowledge of His Son makes it all worthwhile."

Though Radio Kahuzi reaches millions in eastern D.R.C., in many territories such as Kambabari it is the preferred radio station for more than 70 percent of that area's 262,000 residents. Now the ministry is making plans to install three additional FM relay sites.

Help to put these relay sites on the air is coming from many sources. The Kahuzi Radio Club in Stephens City, Va., for example, reported on Facebook that the youth in their daily vacation Bible school had raised \$1,000 to help purchase an FM relay transmitter from Galcom for the outreach in D.R.C.

Radio Kahuzi, one of HCJB Global's partner ministries, is owned and operated by Believer's Express Service, Inc. (BESI). Started in 1992, the station broadcasts via shortwave and FM in English, French, Kikongo, Mashi, Lingala, Tshiluba, Kinyarwandan and Swahili. <mnnonline.org> (via Arnaldo Slaen-ARG, wwdxc BC-DX TopNews July 17)

CROATIA 3985.00 Croatia 3985.00 even. Croatian Radio Deanovec was back on EVEN channel July 19, at 2305 UT, S=9+10dB. NXcast in Croatian.

Previously TX wandered down up to 250 ... 500 Hertz in past months. Also

[Gambia non] The Save the Gambia Democracy Project broadcast on 15225 did not appear on 10 July until 1821 UT. It was a new programme in an unidentified language but sounded like it was produced in the USA. Talk (sounding like stock market reports or commercials?) over music, followed by a speaker in phone-line quality. 1826 dead air until 1828, ID which I didn't catch but mention of "Maryland" and several mentions of something like "Gambat". Transmitter cut off at 1830 UT.

The following week, 17 July, transmission was as normal from 1815 to 1830 UT with a new programme in a local language identifying as "Baati Rewmi".

(James MacDonell-NIG, dxld July 18)

Sats only at 1815-1830 UT via MBR(exDTK) Nauen site 125kW at 221 degr.

6140 Radio Mecklenburg-Vorpommern, via Wertachtal, \*0906-0930, Sun Jul 04, German pop songs (carrier was on from 0900 UT, but audio first abruptly on from 0906 UT), German ann transmitter: Wertachtal with 250 kW, 0915 RMV news in German from Hamburg, Schwerin and Rostock, 45544.

6190 Deutschlandfunk, Berlin-Britz, 2100-2110, Jul 04, German news, ID: "Deutschlandfunk", comment about the presidential election in Poland. Still on the air! 55555.

(Anker Petersen-DEN, dswci DXW July 14)

6085 / 801 BR Munich Ismaning. The 8/2010 issue of the Radio-Kurier magazine will include an interview with the head of the Ismaning station.

Herein he officially confirms that 6085 kHz will be shut down at the end of October due to insufficient listeners numbers. In October the public broadcasters will have to give reasons for keeping AM transmitters on air, and on this hearing they will have to quote such figures.

For some time the 6085 kHz signal was on air around the clock, with silence as audio content between midnight and 6 AM local time. Since 2007 they now switch off the RF signal overnight because this saves a lot of operational costs and it has been found that the transmitter can be switched on every morning without problems.

For 801 kHz it is under discussion to use it for Bayern Plus, a music station for elder people, instead of the currently aired on3radio, a youth station that basically is just a jukebox, with little live programming which recently has been further cut back (not that Bayern Plus would be much different in this regard). But no decision about a date for such a switch-over has been made so far.

BR folks had good contacts to their IBB neighbours. One day they got a phone call that "we have to told you that we'll be gone in three months". The satellite uplink, the last thing that remained there after 1197 kHz

had been shut down, has been moved to Kuwait. A few other pieces of equipment went to Lampertheim.

Critics comment that BR has simply to blame itself for the insufficient listener numbers, arguing that all these people that purchase a shortwave radio for ten Euros would be at least a potential audience if 6085 kHz would still run in AM. And making such a science of turning off the plate current overnight is quite remarkable as well.

<<http://www.ratzer.at/Ismaning2010.html>>

<<http://picasaweb.google.de/ferienradio/Ismaning2010#>>

The ex-1107 kHz [Continental] transmitter is, as can be seen, still there. (Kai Ludwig-D, July 17, shortwavesites yg via dxld)

Attempt to save Putbus transmitter. The media authority of Mecklenburg-Vorpommern tries to save the 729 kHz transmitter at Putbus on Ruegen island from being dismantled, writing that "it would be the end of mediumwave broadcasting in Mecklenburg-Vorpommern". Thus they are looking for "interested parties who have a general interest in mediumwave broadcasting" and would like to "discuss the possibilities of digital mediumwave transmissions" with them.

<<http://www.medienanstalt-mv.de/news/pressrelease/125.html>>

The Putbus transmitter was from 2001 til yearend 2009 in use for DRM test transmissions by Deutschlandsradio. Previously Norddeutscher Rundfunk had abandoned it in 1996. In 2008 some announcements about testing the transmitters had been posted by a foreign party, but no such activities followed.

Two pictures of the mediumwave antenna and new equipment container:

<<http://www.biener-media.de/0729-MV.html>>

Another photo of the transmitter site, also including the former FM tower:

<<http://www.deutsches-drm-forum.de/Putbus1.jpg>>

The FM facility was rather a filler, used for Ferienwelle and DT64 programming. First all transmissions were mono only, since no stereo-capable feed circuits were available. Later a microwave or probably rather UHF or whatever radio link has been established, but reportedly its signals often sunk into the noise and again monaural service could be offered only. Meanwhile the whole installation has been replaced by a new FM site at Garz:

<<http://www.senderfotos-bb.de/garz.htm>>

(Kai Ludwig-D, dxld July 25)

96.5 MHz 35 kW Langenberg. Naeheres zum Frequenzwechsel BFBS - Deutschlandradio:

<<http://umschalten.dkultur.de/frequenzwechsel>>

(Klaus Spielvogel-D, A-DX July 16)

Frequenzwechsel? - An Rhein und Ruhr auf einer Welle.

Umschalten ist ab dem 2. August angesagt. Denn Deutschlandradio Kultur kann seine Reichweite in Nordrhein-Westfalen ganz gewaltig steigern. Mit der neuen UKW-Frequenz 96.5 MHz erreicht das profilierte Kulturprogramm des bundesweiten Hoerfunks kuenftig mehr als zehn Millionen potenzielle

Hoerer an Rhein und Ruhr. Bislang war das Programm im bevoelkerungsreichsten Bundesland fuer lediglich 1,2 Millionen Menschen in wenigen Ballungsraeumen ueber ein Geflecht von leistungsschwachen Frequenzen technisch einwandfrei empfangbar.

Ueber den Sender Langenberg werden mit einer Leistung von 35 Kilowatt neben dem Ruhrgebiet auch weite Teile Westfalens und des Rheinlandes versorgt.

Deutschlandradio Kultur ist dann zwischen Coesfeld im Norden, Arnsberg im Osten, der hollaendischen Grenze im Westen und bis hinter Koeln im Sueden in bester Empfangsqualitaet zu hoeren, zum Teil sogar noch weit darueber hinaus.

Warum der Frequenzwechsel?

Der Sender, der vom WDR betrieben wird, steht auf den Hoehen oestlich der Stadt Velbert. Von dort wurde auf der Frequenz 96.5 MHz bislang das Programm BFBS Radio 1 ausgestrahlt, das sich an die in NRW stationierten britischen Truppen richtet.

Der beschleunigte Rueckzug von Rheinarmee und Airforce auf einige wenige Standorte im Rhein-Ruhr-Gebiet ermoeeglichte jetzt einen umfangreichen Frequenztausch: Das Deutschlandradio erhielt Langenberg und aus den bisherigen Frequenzinseln von Deutschlandradio Kultur wurde ein massgeschneidertes Sendernetz geschaffen, ueber das die Briten kuenftig nur noch ihre unmittelbaren Garnisonsstaedte versorgen.

Moeglich wurde dieser Frequenztausch durch das grosszuegige Entgegenkommen der Regierung in London unter tatkraeftiger Unterstuetzung von Sir Peter Torry, dem ehemaligen britischen Botschafter in Berlin. Umgesetzt wurde der Tausch letztendlich durch eine konzertierte Aktion der NRW-Landesregierung, der Landesmedienanstalt in Duesseldorf sowie der Bundesnetzagentur.

Was passiert mit anderen Frequenzen?

Insgesamt gibt das Deutschlandradio an Rhein und Ruhr 13 kleinere Frequenzen ab. Sechs davon werden ab dem 2. August 2010 vom BFBS genutzt:

Borken (92.5). Duesseldorf (106.0). Hueckeswagen (106.0). Recklinghausen (101.9). Rheinberg (105.1). Viersen (104.0 MHz).

Die restlichen sieben gehen zurueck an das Land NRW und stehen dann fuer den regionalen Hoerfunk zur Verfuegung:

Bochum (89.3). Dorsten (97.0). Essen (88.3). Hagen (89.4). Koeln (89.9). Krefeld (90.5). Muelheim (93.7 MHz).

GREENLAND 3815 KNR Tasiilaq, 2105-2214, Jan 25, Greenlandic and Danish. I sent two reception reports to KNR on this broadcast. One to the Coastal Utility station directly which, was answered within seven days with a full data QSL-card signed by

Chief of Operations Mr. Bo Mogensen  
TELE Greenland A/S  
Teleservicecenter Aasiaat  
Postboks 217  
DK-3950 Aasiaat

Greenland.

The other report was sent to KNR studio in the capital Nuuk, from where I on Jul 07 received a nice letter in English thanking me for the reception report signed by Ms. Nauja Broens. She advised me to check these webpages to learn more about KNR and Greenland at:

<[www.knr.gl/radio](http://www.knr.gl/radio)> <[www.knr.gl/billedgalleri](http://www.knr.gl/billedgalleri)> and  
<[www.greenland.com/content/english/tourist](http://www.greenland.com/content/english/tourist)>

Their address is: KNR, Box 1007, DK-3900 Nuuk, Greenland.

E-mail address: <[info @ knr.gl](mailto:info@knr.gl)>

This QSL came after 160 days of waiting. DX-ers have to be patient!

weeks?

3340 HRMI Radio Misiones Internacionales, Comayagueela seems irregular  
lately, reduced schedule. 1109 UT on 15 July.

(Robert Wilkner-FL-USA, DXplorer July 24)

INDIA 5010 noted back 1445 UT. Today Thiruvananthapuram 5010 is off the air at 1400 UT. 5040 kHz is continuing to have serious audio problems. 4837.24 kHz Gangtok is continuing to be off frequency. During the heyday of tropical band activity on 60metres Indian regionals and Sri Lankans were a darn headache blocking out a good number of DX signals, but today they are a great welcome as well as the introduction of Leh, Gangtok, Aizawl which came later. With the recent problems on some of these transmitters and also such lovely stations like Kohima and Itanagar with limited or hardly any regular operations, I wonder whether AIR is abandoning its domestic SW coverage, like Sri Lanka did much to my disappointment. India is no banana republic, about the second fastest growing economy and there shouldn't be any lack of technical know how to fix these. Jose any comments?

I hope this message will get reflected as I am having serious problems with dx-india. I see my congratulatory message to Jose is still pending. (Victor Goonetilleke-CLN 4S7VK, DXindia July 23)

Re: Indian regional stations.

Dear Victor, about the AIR SW Regional Stations / transmitters my guess is that it shall continue be on air till it becomes unserviceable. Already SW transmitters in Jammu and Ranchi are off air for many years with no signs of returning. Several other SW transmitters which have already completed their normal service period is kept on the air although they are facing several technical and staff shortage problems etc.

I have not yet come across many proposals about replacing the Regional Transmitters although some DRM SW transmitters are going to be set up in Delhi, Aligarh & Bangalore etc.

It is a fact that with the influx of TV channels (cable & DTH) most people go in for TV rather than radio.

However, with the launching of private FM stations, there is indeed revival in listenership of FM stations. More and more FM stations are expected to come up in future also by AIR and Private parties.

Let us watch and and wait and monitor AIR SW Regional stations as long as the show goes on. Yours sincerely,  
(Jose Jacob-IND VU2JOS, DXindia July 24)

INDONESIA 4605 Reactivated RRI Serui. I confirm the reactivated of RRI Serui on 4605 kHz at 1000 UT on July 20 with fair signal. Local ID at 0959 UT and Jakarta news relay at 1100 UT.

<<http://www.max.hi-ho.ne.jp/a-ishida/ins/snd/04605-100720-0959.mp3>>  
I was not able to receive it since last May.  
(A. Ishida-JPN, via Sei-ichi Hasegawa-JPN, NDXC via dxld July 21)

4789.96 RRI Fak Fak, 1208-1228, July 10. Another Saturday (same thing noted on July 3) of not carrying the Jakarta news relay, whereas most days they do. Is it only on Saturday that they don't? Played pop Indonesian songs. Nice to see that Atsunori Ishida's blog (Indonesian Radio Stations) has been updated to reflect no JN at 1200 UT for July 3. Thank you Atsunori!

(Ron Howard-CA-USA, JPNpremium July 16)

9525.89 Voice of Indonesia 1300-1401 Jul 19. En xmsn, with program lineup, then news; the audio was lost around 1315 with just open carrier until 1345, when audio came back on (music); 1401 out of En and into Bahasa Indonesia with warta berita. Strong.

4749.96 RRI Makassar (pres) 1200-1210 Jul 23. SCI right at 1200, then Jakarta relay a half-minute later. Poor.

(John Wilkins-CO-USA, DXplorer July 24)

7289.78 RRI Nabire Jun 27 0822-0857\* 35333 Indonesian, Music, ID at 0846, 0857 UT sign off.

7289.82 RRI Nabire Jul 02 0827-0900\* 35322-35333 Indonesian, Music, ID at 0859 UT, Koran, 0900 UT sign off.

(Kouji Hashimoto-JPN, JPNpremium July 16)

4604.90 RRI Serui, 1233, July 22. Non-stop EZL songs in English; "Top of the World" by Carpenters, "The Ballad of High Noon", etc.; 1300-1310: song of the Coconut Isles and Jakarta news relay followed by choral National Anthem (Indonesia Raya); checked again at 1330 to found them off the air. Thanks to Atsunori Ishida's blog for the alert that they had returned. Atsunori noted them today with 1326\* UT. Was as strong as RRI Palangkaraya on 3325 kHz.

(Ron Howard-CA-USA, dxld July 22)

IRELAND 252 LF So one could speculate on whether neighbouring Eire 252 kHz could, despite a weaker signal that isn't so weak after all, perform equally well like Droitwich 198 kHz vis-a-vis its co-ch. ALG. In a way, it does, it's strong, but Algeria is closer to me and, above all, their tx is quite near the coast, otherwise I'm sure it would perform like the Bechar 153 kHz & Ouargla 198 kHz txs, i.e. poorly, so IRL never dominates the ch., at least down here.

However, I can get Summerhill's signal with nil or almost nil QRM, depending on the conditions, thanks to the K9AY. By the way, does anyone know the genuine name for the Irish tx location listed as being located at Summerhill - what on earth is this for a true Irish name?! It should be Goidelic, not English!

(Carlos Goncalves-POR, wwdxc BC-DX TopNews July 16)

Hello Carlos, Yes, there are interesting phenomena to be heard on LW - I've heard similar things myself, the most interesting being the Luxembourg effect. But the closer you are to a station the less you hear. Long Wave fades are not the same as we hear via MW. They are usually more prolonged, and the audio becomes distorted and mushy. I'm sure that the terrain does make a difference, but a large part of the path from Nador is over the Med to you. The BBC usually make an announcement before the Droitwich transmitter on 198 kHz is to be off for maintenance or any other reason because of it's use for other things besides broadcasting.

The Irish LW station is located NW of Dublin in County Meath and really is adjacent to the town/village of Summerhill. There's probably an Irish name for it - as there is in Wales and parts of Scotland for various places - but reference is to Summerhill. On You Tube ask for >Atlantic 252 Station Launch 01-09-89<

and you will see a shot of the mast which seems to be just beyond someones back garden. Transmitting sites are usually named after the nearest town or village - 198 kHz isn't within Droitwich but some way south of that town. Moorside Edge really is built on the edge of a moor and is not the name of a town or village. Wolfy could no doubt give you the actual geographic location of the Summerhill station.

Yes, 11620 hefty QRM to RUI, Mykolaiev transmission a little bit ahead and  
LBY underneath, but both on S=9+20 dB level. LBY // 11650 kHz.

I checked LJBC Voice of Africa only in 1030-1100 UT range, Saturday  
July 24, 17740 kHz replaced by new 17715 kHz today. On July 25 at 1308 UT,  
both only strong carrier, but no studio audio feed ...

Frequency change of LJBC Voice of Africa, July 24

#### Arabic

0900-1157 on 17735 SAB 500 kW / 180 deg to NEAf S=8-9

0900-1157 on 17715 SAB 500 kW / 130 deg to ECAf ex17740

little weaker S=7 strength.

Phone-in program in Arabic. At 10.39:20 UT program break, 1000 Hertz tone  
on both channels, no broadcasthouse feed anymore.

#### Swahili

1200-1357 on 17735 SAB 500 kW / 180 deg to NEAf, ex17725

1200-1357 on 17715 SAB 500 kW / 130 deg to ECAf, ex17740

When checked at 1355 UT again, Swahili program back on air on both 17735  
kHz S=5-6 strength only, at same time new 17715 kHz at S=7-8 signal level,  
many VoAfrica/Jamhiria IDs etc.

New 17715 kHz little co-channel QRM by weak YFR Al Dhabbaya UAE in Telugu til 1357 UT.

From 13.59 UT July 24 quick change from 17715 to 15240 kHz, also service to Ce&SoAF, S=9+10dB at 1359 UT, much stronger than 17715/17735 which were on air til 1358 UT. // 15235 kHz a little weaker at S=8 level to EaAF at 130degrees.

LJBC Voice of Africa in English, ID and schedule announced at 1402 UT, but STILL announced old spring time frequencies previously used til mid July.

Time pips, IDs and news mostly not on the hour, but xx.02 minutes later. (wb, wwdxc BC-DX TopNews July 24)

MADAGASCAR 11500 Radio Dabanga via Madagascar relay. July 09 at \*1529-1535 UT. 35333 Arabic, 1529 UT sign on with SJ, 1530 UT IS and SJ, Opening announce, Talk. 1530-1727 UT. (Kouji Hashimoto-JPN, JPNpremium July 16)

MALAYSIA 6174.435 UNID Station. Bis 1600 UT (danach Sendeschluss) konnte ich eine Station auf 6174.435 kHz mit Musik / Gesaengen aus eventuell HoA o.ae. aufnehmen. Die Signalstaerke war nicht ueberragend, in den Spitzen war das Signal aber gelegentlich gut zu verstehen. (Thomas Lindenthal-D, A-DX July 17) see below:

6174.43 1357- UT, RTM Suara Islam July 1. Tentative on this one. A very weak station audible under 6175 kHz using LSB mode. Koranic type chants noted at 1401 UT. No obvious ID at the TOH. Will need someone closer to confirm they're off frequency. (Walter Salmaniw-Masset-BC-CAN, dxld)

5964.91v Klasik Nasional via RTM, 1308, July 11. In vernacular with the news followed by PSA; many ads for a "Super Store"; "Radio Malaysia Klasik Nasional" IDs. Another day of exceptional receptions from Malaysia and also Sarawak! Klasik Nasional does very well up till 1400 UT, when covered by a strong CRI sign on (5965.0 kHz).

July 12 clearly noted Kuala Lumpur news relay in vernacular from 1303 to 1310 UT; ALL // on 5030 (Sarawak FM), 5964.91v (Klasik Nasional) and 7270 (Wai FM) kHz. After 1310 UT not //. (Ron Howard-CA-USA, JPNpremium July 16)

MALAYSIA [Sarawak] 7270.0 Wai FM via RTM. Randomly from 1213 to 1350 UT, July 9. PBS Nei Menggu continues to be off the air! In vernacular; pop songs; segment of indigenous chanting/singing; news; no Limbang FM relay today, instead from 1317 to 1350 UT a report from "studio Wai FM" about World Cup football; series of singing "Wai FM" jingles; mostly fair. AIR IS via Chennai again heard at 1258 UT. (Ron Howard-CA-USA, JPNpremium July 16)

7270.01 RTVM 1254-1330 Jul 23. Phone call (dedication?), followed by Eric Clapton song; two pips to ToH, then presumed news; long talk segment followed past BoH; sounded like Bahasa Malaysia but can't be sure. Generally fair. (John Wilkins-CO-USA, DXplorer July 24)

MALAYSIA 15295 0830-0855, Voice of Malaysia, Kajang, July 14, English,

YL talks including about woman and education with many mentions of "Voice of Islam", Malay pop song and folk male singing - fair with splashes from both sides (NHK and RFI).

(Mikhail Timofeyev-RUS, hcdx July 19)

MALI 5995 Radio Mali, Bamako, \*0556-0610, July 21, musica de sintonia, himno nacional, locutora: "Radiodiffusion TV du Mali, emettant de Bamako", frecuencias "5995 kHz", locutor, frances, comentarios, canciones africanas. 24322.

(Manuel Mendez-ESP, hcdx July 21)

MAURITANIA 4845 Radio Mauritanie, Nouakchott, 0907-0926, 21 Jul'10, Arabic, talk prgr with phone-ins and interviews; 24443, CODAR QRM. I was unable to keep listening until they finally moved to 7245 kHz; today, July 22, they were already on 7245 kHz prior to 0900 UT.

(Carlos Goncalves-POR, wwdxc BC-DX TopNews July 22)

RUSSIA Kuybyshev{Samara} Radio Center is Shut Down "forever" (Video).

Here's a link to a TV report in Russian. I can't believe they didn't even capture the collapsing radio mast ... The station was used not only for usual Soviet radio propaganda but also for jamming.

The local authorities are planning to build a stadium or suburban community on the grounds. The communication specialists are hoping for a

small radio museum.

<<http://www.ntv.ru/novosti/199591/>>

Sad but predictable TV news: Samara-Russia TX site has come to its end ...

Hello to all, just saw on Russian NTV news report about dismantling of Samara AM/SW TX site ("Radiotekhnicheskyy Tsentri imeni Popova"), also known by nearest village name - Novosemeykino. It was 65 years in service.

Btw, 4 masts left, still standing proud ... will be destroyed next week :(

(Vlad Titarev-UKR, DXplorer July 23)

Hi dear Vlad, Shut down service and move the LW 234 and MW 873 kHz sct from Novosemeykino to Samara, some 14.5 kilometers southwards has been discussed about in 2001 and 2007y.

Excellent photosnap set:

<<http://foto.cqham.ru/showgallery.php?cat=698&ppuser=2420>>

History - Samara txers.

Regarding this item in DXLD and BC-DX #520:

TV reporter visits Popov txing centre in Samara. [Presenter] The Radio Day is being marked today throughout Russia, including Samara Region which has a unique site - a tx which sends out signals to almost half the world etc.

As usual when journalists are describing technical facilities, the outcome is somewhat confusing.

The original Samara LW facility was constructed in 1942 on the basis of the RV-1 500 kW tx in Moscow, which was evacuated beginning Oct 16, 1941, and brought to Samara to escape the Hitler armies. Designed by Aleksandr Mints, the father of Soviet high power bcng, RV-1 originally became operational in April 1933 and consisted of 5 // 100 kW txers. The stn was reopened in Samara in Nov 1942, where this monster size txer was further expanded to 1200 kW.

An old Russian electronics textbook found by Bernd Trutenau shows a picture of the 1200 kW facility (with no site mentioned). Russian DXers going to Samara in the early '90s found a facility in good agreement with the published picture at Novosemeykino, north of Samara.

During WW II a SW stn using several 15 kW txers was also built near Samara. The exact location is not known. At the time of the visit by the Russian DXers, the site of the 1200 kW txer also included a MW facility and various rhombic antennas that could have been used by the 15 kW units.

The 1200 kW LW txer has since long been replaced by a new 2000 kW one west of Syzran.

{sic, its Russian terrestrial radio navigation system

<<http://en.wikipedia.org/wiki/LORAN>>

RUS RSDN Balasheyka Syzran GRI 8000 1150 kW Loran-C Chayka system, wb.}

This facility was confirmed by DXers passing by on the railway.

The replacement seems to have happened already before 1980. The current txer has the registration number RV-390, the number of the old txer must have been different as there were less than 150 txers on the air when it started in Samara. Apparently the old txer site has been preserved as a backup or perhaps as a museum.

The big SW stn in Samara is located in the northern outskirts of Samara city. It has a main section with dozens of curtain antennas and a second section with some more curtains.

(Olle Alm-SWE, wwdxc BC-DX TopNews May 15, 2001)

Die ursprüngliche Langwellenstation in Novosemeykino nördlich von Samara wurde 1942 errichtet, nachdem man 1941 den Moskauer Sender RV-1 abgebaut und vor dem deutschen Angriff dorthin in Sicherheit gebracht hatte. Mehr als 10000 Gefangene sollen am Bau beteiligt der Betonbunker gewesen sein und viele haben es nicht überlebt. Der Moskauer Sender, der aus fünf 100-kW-Einheiten bestand, war von Aleksandr Mints, dem Mentor der sowjetischen Hochleistungssendertechnik, geplant worden und hatte im April 1933 seine Sendungen in Moskau begonnen. Nach der Wiederinbetriebnahme in Samara im November 1942 wurde die Anlage bis auf 1,2 MW ausgebaut. Im Weltkrieg sendete die Station rund um die Uhr in 26 Sprachen. Die deutsche Luftwaffe soll versucht haben, die Station zum Schweigen zu bringen, die

Flugzeuge haetten aber nie den Standort erreicht.

Die Station wurde wohl noch vor 1980 von einer 2-MW-Anlage mit der Nummer RV-390 westlich von Syzran ersetzt. Ein Fernsehbericht am Rundfunktag 7.5. behauptete, die Station sei noch in ihrem urspruenglichen Zustand vorhanden. Der Langwellenstandort war im zweiten Weltkrieg moeglicherweise auch die Heimat von mehreren 15-kW-Kurzwellensendern.

Die heutige Kurzwellenstation von Samara ist am noerdlichen Stadtrand von Samara und beherbergt zwei riesige Antennenfelder. Die Geschichte der sowjetischen Senderstandorte ist schwer zu schreiben, da die Behoerden die Sender als Sicherheitsfragen behandelten, bei internationalen Eintragungen viel verschleierten und Veroeffentlichungen vor Ort recht vage waren. Recherche durch russische Hobbyfreunde war vor der Wende gefaehrlich, trotzdem sind ihre Erinnerungen daran, wo Sendeanlagen standen und wie sie von weitem aussahen ein wichtiger Anhaltspunkt. (ibid.; via Dr. Hansjoerg Biener-D, NTT via wwdxc BC-DX TopNews Jun 1, 2001)

Novosemeykino silent? Fascinating stuff:

A report about the Novosemeykino site northeast of Samara, inaugurated in 1942 with 1200 kW (so much for Erching being the world's largest transmitter when it went on air in 1953). Unfortunately I get only garbled characters on this page, but the pictures really speak volumes:  
<<http://www.retro.samnet.ru/zapstolica/rvs/index.htm>>

Note the RV-390 transmitter. Earlier it was believed that the more recent Samara high power LW/MW transmitters were located elsewhere, cf.  
<<http://www.angelfire.com/ok/worldofradio/dxld1070.txt>>

but at least without the text it appears that indeed Novosemeykino remained in use with upgraded equipment.

new Victor homepage address, thanks Mauno ...

<<http://victorcity.narod.ru/Cities/samara.htm>>  
gives Novosemeykino as site for both 234 and 873 with 2000 kW each, mentions a shut-down of this ancient site as recently as in 2005 (apparently in accordance with the feature I can't read) and speculates about the current site of Radio Rossii on 873, if it is still on air at all. 234 had been shut down already in the early nineties.

More photos of the Novosemeykino antennas:

<<http://phonecard.hobi.ru/img5>>  
(Kai Ludwig-D, dxld July 24, 2007)

Novosemeykino site to be DISMANTLED.

For looking up about Novosemeykino:

<<http://www.google.de/search?hl=de&q=novosemeykino+site%3Awww.w4uvh.net&btnG=Google-Suche&meta>>

And a new photo set:

<<http://foto.cqham.ru/showgallery.php?cat=698&ppuser=2420>>

The Samara branch of RTRS now announces that it will dismantle the Novosemeykino transmitter site, saying that it deteriorates further every year and that there is meanwhile a risk that the antenna towers could collapse.

<<http://samara.rtrn.ru/news.asp?view=10762>>

New Samara SW and MW location:

At the end of this news they also mention another dismantling project for tall objects, to be carried out in the second or third quarter of 2009, with the paperwork being under way at present. It's not specified what this project is about, but the first suspect would of course be the Radio Centre 3, i.e. the shortwave site in the northern outskirts of Samara.

Here is an extensive photo collection:

<<http://foto.mail.ru/inbox/yemel/21>>

And a nice view of the antenna farm at sunset:

<<http://www.panoramio.com/photo/4466573>>

UKRAINE 11655 noted today at 0900 UT s/on. Open carrier 0852-0856 UT, then off and back just before program start of Stimme Russlands. A background buzz similar to 7440 kHz indicates that this may well be Lviv as well. Fair to good signal, low modulation level. When Lviv was first used for high power transmission of the R Moscow midday German service in the 1970's they were on 31 mb frequencies around 9745 kHz. Propagationally probably a better choice.

[later] Additional observation. 11655 kHz went off at 1000 UT, and then I kept an ear on 7440 kHz. At 1007 UT a carrier appeared and then went on and off a few times before going silent. Again the background buzz points to Lviv. Same signal level as on 11655 kHz.

(Olle Alm-SWE, wwdxc BC-DX TopNews July 23)

11620 Luch (listed) clean audio (good modulation) and fair to good signal, but has FMing spurs with strong buzz at about +/- 64 and 2x64 kHz.

(Olle Alm-SWE, wwdxc BC-DX TopNews July 23)

11620 Various info about RUI: Another brick in the wall - 13 July 0725 UT a program called "Inside" of RUI in English I heard at 0725 UT on 11620 kHz.

(Rumen Pankov-BUL, wwdxc BC-DX TopNews July 15)

Already at 1508 UT July 20, Ivo has issued another update:

Revised schedule of Radio Ukraine International & Voice of Russia

0300-0500 on 7420 KHR 100 kW / 055 deg to RUS/KAZ Ukr, cancelled

0500-0700 on 9840 KHR 100 kW / 290 deg to WEu En/Ukr, cancelled

0700-1000 on 11620^SMF=250 kW / 312 deg to WEu En/Ukr/Ukr, ex Ukr/Ukr/Ukr

0900-1000 on 11655 LV 500 kW / 303 deg to WeEu Ge Voice of Russia

(R BULGARIA DX MIX News, Ivo Ivanov, via wwdxc BC-DX TopNews July 20)

^ Also Yes, 11620 kHz hefty QRM to RUI, Mykolaiev transmission a little bit ahead and LBY underneath, but both on S=9+20 dB level.

LBY // 11650 kHz.

= SMF{vailed USSR call} Mykolaiv Luch-UKR transmitting center site.

So, the new RUI schedule of July 5th [after the three months SW broadcast break] lasted two weeks til July 18th only ... as from July 18-20 changed now again.

Ceased totally:

- both Ukrainian outlets to RUSSIA/CIS states and primary to Ukrainians in Kazakhstan target,

- morning service to EUR 9840 05-07 UT and

- night sce to EUR 6145 21-24 UT ceased too:

July 19, 2300 UT R Ukraina in Ukrainian language on Lviv Krasne tx 7440 kHz, report from Azerbaijan, ties of both countries. S=9+30dB in Germany.

6145 RUI cancelled at 23-24 UT July 19. Heard CRI Beijing English via Sackville-CAN instead, S=9+25dB, but fluttery northern path signal.

July 20, 11620 SMF / Mykolaiv Luch-UKR transmitting center site outlet noted at 07-08 UT in English, 08-09 UT Ukrainian, variable S=8 noisy to S=9+10dB. But not as strong like Moscow Taldom or Armavir at same time. (wb, wwdxc BC-DX TopNews July 20)

Correction RUI. This schedule is based on directions of the Concern RRT to the transmitter centres of Ukraine valid from July 12. Maybe disorder in the operations of transmitters was because of Kharkiv transmitter used the frequencies from the previous schedule 7420 and 9840 kHz superfluous 4 days through July 15.

(Aleksandr Yegorov-UKR, wwdxc BC-DX TopNews July 19)

Radio Ukraine International from July 12:

0700-1000 11620 Mykolaiv 250kW 312deg to Europe

1400-1700 9420 Kharkiv 100kW 055deg to Russia

1700-2000 7440 Kharkiv 100kW 290deg to Europe

2000-2100! 6145 Kharkiv 100kW 290deg to Europe

2200-0200 7440 Lviv 500kW 303deg to North America

2100-2130 657

(Aleksandr Yegorov-UKR, wwdxc BC-DX TopNews July 19)

7440 RUI Kiev via Kharkov transmitter heard still tonight July 19 at 1700 UT.

Power strength S=8 ... 9 ..9+10dB variable. ID in German at 1701 UT, announced German schedule 17-18 7440, 20-21 & - [sic now ceased] - 23-00 UT 6145 kHz.

RUI Audio on demand

<<http://www.nrcu.gov.ua/index.php?id=774>>

Also Livestream

<<http://www.nrcu.gov.ua/index.php?id=307>>

on Media Player R Ukraina 4th program

<<http://89.187.1.165/NRCU4>>

7440 RUI pre-English sce, S=9+20dB, but at 18.58:55 UT another co-channel CRI Hungarian from Xian-CHN started at equal level up to S=9+25dB. When spoken pieces on CRI program I could easily follow both programmes, also RUI content.

6145 RUI German totally covered by CRI Polish via Issoudun France from 2000 UT. RUI 6145 kHz before 1958 UT S=9+15dB.

6145 ISS tx off at 20.56:40 at 60degrees, moved to 105 degr CRI Albanian sce from ISS. In the remove pause between 20.56:40 and 20.59:05 UT heard farewell text read by lady in German.

RUI Kharkiv 6145 tx off at 2100 UT ! Regarding RUI 6145 kHz channel today 20-21 UT tonight: 6145 Kharkiv left the air at exact 2100 UT after closing annmnt of RUI German service, so no 2100-2300 UT sce on 6145 kHz.

6145 ISS - Removing the ALLISS antenna took 2min 18sec, from 105 to 85degr, for CRI Hungarian sce between 21.26:35 and 21.28:53 UT

with lower power. Full power one minute later at 21.29:50 UT.

7440 Lviv tx. En nx of RUI at 2200 UT, S=9+10dB, low modulation, strong carrier. Unidentified program underneath from Almaty-KAZ ... help.

6145 - no RUI at 2200 UT, another signal Voice of Russia Armavir in Russian towards Near East on low level.  
(wb, wwdxc BC-DX TopNews July 19)

Re: Ukraine off SW again?

At 2258 UT recheck the English on 7440 kHz has turned out to be Radio Ukraine International, wrapping up programme, followed by Ukrainian from 2300 UT. Usual faint and fading, backscatter-like signal here.

6145: Described transmission wrapped up at 2259 UT, followed again by interrupted test tones. Then at 2300 UT out of the blue Sackville crash-started with CRI English, wiping out anything else even here in Europe.

[later] 6145. Frequency before 2200 completely covered by Issoudun, with remarkable buzz in the audio, presumably from the CRI studio. Cut off at 2156, unmasking a faint mess of fast SAH, with the dominating signal carrying Soviet-style run-up tones of a rather high pitch, which suggests that it could be indeed a Tbilisskaya signal. Programming started at 2200 UT, probably in Russian, but I can not tell real details.

Anyway there does not appear to be a transmission from the Ukraine, neither from a capable nor from a less capable facility, unless a now hopelessly deteriorated KHR site makes a futile attempt to transmit.

2200-0200 on 7440 LV 500 kW / 303 deg to NAm En/Ukr/En/Ukr

When first doing so at 2147 UT an open carrier was already on. At 2159 UT Voice of Russia program audio with interval signal emerged, then I switched to 6145 kHz to hear what comes on there (to no avail, see above). When returning to 7440 it had become an unrecognizable mess of two signals, almost drowned out by much stronger Galbeni on 7435 (which has some crackling in the audio; tsk, still old equipment in the chain)? At 2215 UT recheck I think that the mess on 7440 kHz contains a signal in Russian and one in English, but it's just impossible to make out program styles.

(Kai Ludwig-D, dxld July 19)

Radio Ukraine International and Voice of Russia English and German via Ukraine tx on July 19-20, 2010.

Hi Aleksandr, herewith included three recordings of tonight, of

- 1 - 7440 at 1900 UT,
- 2 - 7440 at 1957 UT,
- 3 - and 6145 kHz at 1959 ... 2001 UT.

7440 was totally covered by CRI Xian signal in Hungarian and from 1930 UT Romanian, and RUI English underneath.

Only at 1957...1958 UT a short piece of RUI Kharkiv signal was heard at S=9+5dB level, when Xian tx went OFF air.

6145 - first seconds originate from KBS Relay Skelton-UK around 1958...1959 UT, then covered by CRI Polish via Issoudun France relay at 2000 UT.

I guess the Ukrainian RRT Telecomm. Concern people has not much experience. At least selection and registration of RUI frequencies for A-10 is on very bad level, like co-channel QRM on 6145 (QRM de CRI Issoudun), 7440 (QRM de CRI Xian), 9420 (QRM de ERT Greece, CRI/CNR Lingshi).

(wb, wwdxc BC-DX TopNews July 20)

UNIDENTIFIED Unidentified French on 3289.25 kHz.

An unidentified broadcast in French, with a news-talk format was observed on 3289.25 kHz on 16 July between 1907 and 1920 UT. The signal level was poor, but generally better than I have heard previously with Madagascar's 90 metre outlet, which was on 3288 kHz // 5010 kHz when I last logged it on 25 April at 1830 UT.

Madagascar 5010 was not on air at this time, with its scheduled signoff at 1900 UT, so unclear whether I was listening to an extended transmission from Madagascar ... Any suggestions as to identity?

(Bryan Clark-NZL, dxld July 17)

UNIDENTIFIED Never heard such strong digital like signal on 11702 to 11709 kHz at 2347 UT, July 20.

(wb, wwdxc BC-DX TopNews July 20)

UNIDENTIFIED 11560 Unidentified FE Chinese Taiwan outlet ? At 2350 UT July 20, S=9+10dB. Or tentatively Clandestine Radio Free Chosun morning service in Korean ?

(wb, wwdxc BC-DX TopNews July 20)

UNIDENTIFIED probably BRAZIL 12174, July 20 at 0523 UT, David Miranda, the wacky wailing preacher of SRDA, poor signal vs CODAR, unstable carrier with its own rumble, presumably the 11805 R. Globo transmitter totally out of whack. However, inband 25mb Brazilians were not audible.

(Glenn Hauser-OK-USA, dxld July 20)

I was alluding to some previous reports from Brazilian DXers that the source of the distorted broadcast signal in the 12+ MHz range was the R. Globo, Rio, transmitter which was/is supposed to be on 11805 kHz. I also heard it a few days before on approx. 12175 kHz. No, I never hear it on 11805 kHz. We think 12175 kHz is not a spur of that but simply a very mistuned transmitter.

(Glenn Hauser-OK-USA, dxld July 20)

see also BRAZIL 12175, 11355, Super Radio Deus é Amor, 0125-0200+, July 24, unstable, slightly distorted but readable spurs from 11765 with Portuguese preacher and some religious music. Spurs +/- 410 kHz away from 11765 kHz. Best in AM mode. Very weak // 9564.57. Fair signal on 11765.

(Brian Alexander-PA-USA, DXplorer July 24)

UNID probably Brazil Best reception of an distorted audio noted around 2305 UT July 20 close to 12174 kHz, best on LSB mode, S=6-7 fair signal.

UAE Bald neues franzoesisches KW-Radar in Golf-Region?  
New French surface radar could detect ships at 400 kilometers.

Middle East states have been briefed on a new advanced French radar.

Industry sources said several Gulf Cooperation Council militaries have  
been briefed on France's new maritime surveillance radar. The radar,  
developed by the French aerospace research center, Onera, has been touted  
as a system that could detect ships at a range of 400 kilometers.

USA 11970 and 11930 IBB BBG Radio Marti in Spanish towards Cuba.

Warbling sound in background, audio 80% Marti / 20% Cuban jammer. Both

Greenville beasts at S=9+40dB level at 2337 UT July 20.

(wb, wwdxc BC-DX TopNews July 20)

An item to the RFE/RL schedule (that program is existing for some years):

Azatluk Radio in Russian.

Sundays UT 1335-1400 9465, 12005 and repeated:

Mondays UT 0135-0200 7215, 9750 - both instead of RL in Kazakh.

(Rumen Pankov-BUL, dxld July 23)

Logs of July 20 nighttime. Improved shortwave propagation, also 16 and

19mb wide open to SoAS, FE, Latin and South AM. Male Voice of WWV 15000 kHz time signal was on S=9+10dB level.

(wb, wwdxc BC-DX TopNews July 20)

USA/HAWAII WWV/WWVH, 15000, 1800-1810+, July 22. WWV (with WWVH weakly underneath) heard broadcasting tsunami test message at 1803 UT only, with WWVH appearing to broadcast it on every even minute. Curiously, WWV continued with normal continuous tones during the even minutes, no doubt QRming WWVH's announcement in many locations. Normal time pips and announcements heard from both stations on all minutes. WWV with usual Pacific storm outlook at 1808-1810, no mention of tsunami test.

(Mark Schiefelbein-MO-USA, dxld July 22)

VIETNAM 12020 Voice of Vietnam, Hanoi-Sontav, 2207-2228\*, Jun 26, broadcast in Japanese with weekly news, 2213 ID: "Kochirawa Vietnam no koe hosu kyoku desu", then request music program followed, 55444 very good // 9840 kHz not very good as the signal was not so strong.

(Nobuya Kato-JPN, dswci DXW July 14)

Jonathan Marks -

I'm sure many DXPers are aware of Jonathan Marks's recent postings some of his past work, but, if not, here is where you can find it.

(Jerry Berg-USA, DXplorer July 20)

Hi Jerry,  
Thought you might be interested in two projects I am doing in spare moments.

1. The Media Network vintage vault. I have digitized quite a lot of shows and I'm putting them up on a weekly basis.

<<http://jonathanmarks.libsyn.com/>>

2. I am posting radio related videos here like one on Capital Radio.

<<http://www.vimeo.com/11938989>>

Wolf Harranth's Dokufunk

<<http://www.vimeo.com/10320815>>

and Peter Homfray

<<http://www.vimeo.com/13249732>>

Bit of fun. Would be delighted if you can spread the word.

Kind regards

Jonathan Marks

ALASKA/MADAGASCAR KNLS Sendeplan - ab 31.Oktober 2010.

Paul Reinersch schrieb:

<<http://www.knls.org/broadcasting-schedule/next-schedule.html>>

Muesste einer der Ersten sein !?

Und wie auf der Website der Mutterorganisation World Christian Broadcasting

<<http://www.worldchristian.org/>>

zu lesen ist, hofft man, irgendwann im Jahr 2011 auch die Station auf Madagaskar in Betrieb zu nehmen ...

<<http://www.worldchristian.org/Updates/LatestNews/updates.php>>

Construction continues on the Madagascar World Voice station. In the fall of 2009, two much needed diesel-powered generators arrived after months of delay. Antenna #1 and #2 have been erected and tensioned on the towers. This will also be true of antenna #3 by the middle of September. The latest shipment containing important electrical wiring for the inside of the transmitter building has arrived in port in Madagascar and will be delivered soon to our station. We will then focus on raising the necessary funds to make the final payment and for the shipping costs for the three 100,000 watt transmitters that are already built, tested and packed in

three 40 foot containers ready for shipment from Houston, Texas. The very important audio equipment to link all of our stations and enable us to send and receive programs from stringers from all over the world has been installed in our studios in Franklin, Tennessee.

(Patrick Robic-AUT / Paul Reinersch-D, A-DX July 31)

Am kommenden Montag, 2.8. bis 5.8. beginnt im Zuericher Hotel die Planung fuer die B-10 Saison ab 31.10.2010

KNLS registriert sich immer einen Monat vorher in der US-FCC Tabelle, wie die vielen anderen privaten Religioesen auch. Mit dieser US Tabelle geht man in die HFCC Sitzung.

Die Station WCBC Mahajanga Madagascar 3x100 kW, 4 antennas, ist schon seit 2007 im Bau und wird irgendwann in 2011 auf Sendung gehen.

Hier noch mal die Newsletter, mit einigen Fotos von den Madagascar Antennenbauten:

"... But what about the rest of the world? The day is drawing closer that the rest of the world can hear. A new station off the east coast of Africa is almost complete. All the studios in our Programming Center in Franklin, Tennessee, have been upgraded and reconfigured to make them compatible with the new equipment at both stations. Kevin Chambers, our Director of Engineering, has overseen the installation at all facilities.

This means that we are edging ever closer to the original dream. Sometime in 2011 we hope to flip the switch to begin broadcasting to the "other" half of the world that we're not reaching now. Yes, this is being paid for by American money and being constructed under the supervision of American engineers. But our goal is not to promote Americanism. "...

(wb, wwdxc BC-DX TopNews July 20)

ALGERIA {Clandestine} 1550 MW Polisario Front, back on this fq on July 24 (had been on 700 kHz, their other MF outlet).

1550 Polisario Front, Tindouf-ALG, off again as check y/day, July 26, and no appearance on the "backup" fq (Tindouf too?) of 700 kHz; // 6297 kHz remains off.

(Carlos Goncalves-POR, wwdxc BC-DX TopNews July 26) Tindouf site.

ANGOLA 4950 R. Nacional Angola, Mulenvos. July, 25 at 0240-0250 UT, African music selections. Static noise, 35222.

(Lucio Otavio Bobrowiec-BRA, dxld July 25)

4949.742 Radio Nacional de Angola, 1856, Portuguese, 1856 UT, actually with full audio today. Nice local music to 1859 UT, time check and ID by a woman, into drum solo w/mention of "Luanda" by a man, followed by second "Radio Nacional" ID. Time tones to 1900, then third ID by a woman, and into news. 7216.76 kHz also in, but no audio on that freq. 23 July.  
(David Sharp-NSW-AUS, dxld July 26)

4949.7 R Nacional Angola, Mulenvos, 0240-0250 and 0550-0604 UT on July 24 and 25, pop music seems in vernacular, ann in Portuguese "Radio Nacional", English pop music, ID's: "Radio Nacional Angola", short Hilife music, 0600 UT time pips, ann "Bom dia!, 24 de julho de 2010. 15 degr reuniao africana .. cimeira de lingua portuguesa ..", outside talks, 35333.  
(Lucio Otavio Bobrowiec-BRA, dswci DXW July 28)

4949.7 RNA Canal "A", Mulenvos, 2114-2212, 23 Jul'10, Portuguese, talks, songs (both local & int'l.), short news bulletin at 2200 followed by more songs; almost normal modulation level this time, and also the following day, July 24; 35231.  
(Carlos Goncalves-POR, wwdxc BC-DX TopNews July 26)

AUSTRALIA 2368.49 R. Symban, First noted July 26 from 1002 at threshold level with music but lost by 1020 UT. Checked next day from 0930 and found signal had improved although still poor; music sounded distinctly "Middle Eastern" with brief anmts by man in lang. Finally today (July 28) from 0945 t/in with lively exchange between man and woman along with popular music that was clearly Greek. Stared to drop again at around 1015 UT.

A quick mp3 recording to <symban @ radiosymban.com.au> brought this reply in less than an hour: "Hi John, I can confirm that this is Radio Symban you are hearing and I am the dj playing old urban popular Greek songs form the 60s. Regards, Tom Tsamouras." I have asked Tom for current power as this has surely increased since last reports of 100 watts. Thanks to Ron Howard for his help with this one.  
(John Herkimer-NY-USA, DXplorer July 28)

2368.50 R Symban (pres) at 1152-1203 UT on July 27. Music definitely Greek-sounding, but no anmts heard. Fair/poor and faded away shortly after 1200 UT. First time I've heard any audio on this, so must be a power increase, as others have surmised.  
(John Wilkins-CO-USA, DXplorer July 28)

2325 VL8T, Tennant Creek NT, 2037-f/out 2105, 25 Jul'10, talks; 15231;  
// 2310 VL8A & 2485 VL8K both inaudible.  
(Carlos Goncalves-POR, wwdxc BC-DX TopNews July 26)

4920 Radio Australia, 1930 UT, En, very faint with Pacific Service. Tried every freq combo I could think of, but couldn't come up with a mixing product, which worked out to this freq. And I couldn't find an active freq that would produce a sub-harmonic here. Whatever was happening, I haven't heard it since. Interesting sidebar: wasn't this freq used for VLM4 (Bald Hills-Brisbane), many years ago? 19 July.  
(David Sharp-NSW-AUS, dxld July 26)

4920 kHz = Shepparton, 7240 kHz leapfrog over 6080 kHz, 1160 kHz lower. Or 2A minus B. Yes, I remember VLM4 Brisbane well, coincidentally.  
(Glenn Hauser-OK-USA, dxld July 26)

AUSTRIA/GERMANY Some Media Broadcast MBR changes:

New schedule of Brother Stair /TOM/ in English:

1300-1500 on 6110 WER 100 kW 300 deg to WeEu, new, but really not active

1400-1600 on 13810 NAU 100 kW 127 deg to SEEu

1500-1600 on 6110 MOS 100 kW 300 deg to WeEu, ex1400-1600

1500-1600 on 17485 WER 100 kW 160 deg to CSAf

Last txion of Ethiopia Adera Dimts Radio in Amharic on July 31:

1700-1800 on 13820 NAU 500 kW 140 deg Sat to EaAf, cancelled from Aug 7

(R BULGARIA DX MIX News, Ivo Ivanov, via wwdxc BC-DX TopNews July 26)

BELARUS Begging from stations I follow every weekend program "Letters to Editor" from Radio Belarus, where Larisa Suarez (as become my personal friend) read letters listening. It is a constant irritation to hear her - calmly and patiently - read up received begging, mostly from India and Pakistan. Unashamedly calls these "DXer" pennants, books, stamps, photo o.s.v. and this usually without any listening to the broadcast report. They claim to have material for exhibitions, Believe that want.

I believe that these beggar DXers guise is as great a threat for those who collect QSL as a gentleman in Italy (Is he still active, anyway?). Hustler certainly contributes to the destruction of all honest DXers. I've basically stopped collecting QSL in broadcasting; my reports to radio amateurs are treated and answered generally very positively, although fraud also occurs from listeners in that area. I find it extraordinary positive when I sent an e-mail report and may QSL direct from an amateur, something has happened countless times.

Those of you who visited radio stations and been able to watch the incoming reports (which I could do in Ankara a number of years ago) have seen the huge range between nearly perfect and reporting the opposite. It is not surprising if some stations are turning dx-backs, when too many non-serious players on the move.

(Ullmar, Norrkoeping-SWE, NORDX SW Bulletin July 25, translation for dxld)

BOLIVIA 6155.355 at 2303 UT R. Fides, La Paz Bolivia Sp news weak.

(Maurits van Driessche-BEL, Perseus measured, hcdx July 26)

3310.0 R Mosoj Chaski (pres), Cochabamba, 1010-1100, July 30, tune-in to long monologue by woman, low modulation and steadily fading.

(Brandon Jordan-TN-USA, hcdx July 30)

4865 R. Logos, Sta Cruz de la Sierra, 2153-2214, 23 Jul'10, Castilian, songs, newscast at 2200, music; 33342.

(Carlos Goncalves-POR, wwdxc BC-DX TopNews July 26)

BRAZIL 980 Empresa Brasileira de Comunicacao hat die seit zehn Jahren verstummte Hochleistungsmittelwelle 980 kHz wieder in Betrieb genommen. Wie Adriano Goetz und Toshihiro Kanegae von Operacoes EBC Servicos

gegenueber brasilianischen Dxm erlaeuterten, waren in der Zeit von Praesident Geisel zwei 300-kW-Sender von Brown Boveri angeschafft und zur Flaechendeckung // eingesetzt worden. Nach zehn Jahren hat Radio Nacional de Brasilia nun wieder einen 300-kW-Sender tagsueber mit 50 kW und nachts mit 230 kW in Betrieb.

(Marcelo X. Vieira-BRA, Lucio Haeser-BRA, dxld July 5 via ntt)

SPUR tent? 5993.204 0515, July 30, threshold audio, tough signal due to slop from WYFR 5985 and het from unid on 5995 kHz. Could this possibly be the R Bandeirantes spur reported by Jorge Freitas back in Feb?

(Brandon Jordan-TN-USA, hcdx July 30)

4885 ZY Mash Up, 0647-1000, July 30, 3 Brazilians here: 4885.017 kHz Radio Clube do Para and 4885.028 kHz Radiodifusora Acreana mixing at equal levels, and a much weaker 4885.031 kHz all with weak CODAR. Radio Clube do Para mainly excited talk by male announcer with slight reverb, Radiodifusora Acreana with ballads and tropical songs. Acreana finally dominant after 1000 UT with Para fading after Belem 0919 UT sunrise. Third signal perhaps Radio Maria?

4914.964 Radio Difusora, Macapa AC, 0547-1007, July 30, long ballads, male announcer between songs, many mentions of Macapa and Brasil. Lively talk after 0800 UT, ID's, sound effects. Mixing with co-channel R. Daqui from 0855 UT, with Macapa slightly dominant. CODAR.

4915.026 Radio Daqui AM, Goiania GO, \*0855-1007, July 30, co-channel and mixing with Macapa, dominant after 0940 UT with low key male announcer with religious discussion, barely caught mention of Goiania at 1000 UT as signal had faded. CODAR.

4925.248 Radio Educacao Rural (pres), Tefe AM, \*0956, July 30, poor signal, sign-on announcements, talk by man then woman, weak in strong CODAR.

4964.96v R Alvorada (tent), Parintins AM, \*0847-1007, July 30, threshold audio with hgh noise. Could not determine language, this could possibly also be R Santa Monica in Peru.

(Brandon Jordan-TN-USA, hcdx July 30)

4974.8 R. Iguatemi, Osasco SP, 2201-2216, 22 Jul'10, natl. news magazine A Voz do Brasil; 15341.

5045 R. Cultura do Para, Belem do Para PA, 2205-..., 22 Jul'10, empty carrier; 45333.

9564.6 SRDA, Curitiba PR, 1412-... (still obs'ing. this as I compile today's report), 26 Jul'10, shouting preacher; 15341. No other 31 m band [Brazilian] stns audible at this hour. I have been trying 9695 kHz for R. Rio Mar, Manaus AM, which was typically heard at midday here on occasions, but no luck so far, be it at that time or other.

9630 R. Aparecida, Aparecida SP, 0918-f/out 1035, 27 Jul'10, chatter & music prgr O Canto da Terra, talks; 15431.

11855 ditto, 0923-1020, 27 Jul'10, cf. 9629 above; 25432.

(Carlos Goncalves-POR, wwdxc BC-DX TopNews July 26)

CANADA 6159.959 CKZN, 0450, July 30, nice signal with The World program, CBC ID at 0459 UT, local Newfoundland promo until signal destroyed by slop from R Nederland 6165 kHz 0500 UT sign-on.  
(Brandon Jordan-TN-USA, hcdx July 30)

CENTRAL AFRICAN REP 5035 ! 60 mb. Tentatively Radio Centralafrique heard on this frequency this evening - July 25. I tuned in at 1840 UT. Very typical African vocal music. Good modulation in spite of low signal level.  
S/off at 1905 UT.

6055 Sun 9-10 UT, 9585 Sat 18 UT. (Christian Science in German). Die AG Rundfunk der Christlichen Wissenschaft hat die deutschen Sendungen, die bisher am Sonntag 0900-1000 Uhr UT Weltzeit auf 6055 kHz ausgestrahlt wurden, im Juli "bis auf weiteres" eingestellt. "Nach einer notwendigen Umstrukturierung planen wir wieder auf Sendung zu gehen, gleiche Zeit, gleiche Frequenz. Die russischen Sendungen am Samstag um 1800 Uhr UT auf 9585 kHz laufen nahtlos weiter." Dies erlaeuterte

Michael Maennicke <csradio.d@gmx.de> auf Anfrage.

(Michael Maennicke-D, July 12, via Dr. Hansjoerg Biener-D, ntt July 29)

Die AM-Anlage in Ismaning bei Muenchen wird zurueckgebaut. Dies wurde bei einem Tag des Offenen Tuer bekannt. Die DRM-Kurzwellen 6085 kHz sendet nur noch bis Oktober; der alte 10-kW-Kurzwellensender ist bereits abgebaut. Der Nautel-Sender fuer die Mittelwelle 801 wird in die alte Sendehalle umgesetzt, wo der Sender von 1939 in Baelde abgebaut wird. Es mag wohl sein, dass auch die Mittelwelle in zwei oder drei Jahren ganz abgeschaltet wird.

Die Kommission zur Ermittlung des Finanzbedarfs der Rundfunkanstalten (KEF) hat die ARD-Sender, bis zum kommenden September "Aussagen zur Abschaltung ihrer Lang-, Mittel- und Kurzwellensender zu machen" bzw. ihren weiteren Betrieb zu begruenden. Wie es am Tag der Offenen Tuer hiess, waere die Kurzwellen bereits frueher abgeschaltet worden, haette es nicht die Moeglichkeit gegeben, DRM als Zukunftstechnik zu testen.

(Kai Ludwig-D, dxld, via Dr. Hansjoerg Biener-D, ntt July 29)

6155/6175 TOM Wertachtal. Several nights last week at around 1900 UT I heard stations in English on 5255, and 5275 kHz. One of them was WYFR I think. Does anyone know of any regular broadcasters between 5200 - 5300 kHz to Europe. These signals were very strong and I have not heard stations here before.

(Gary Drew-UK, BrDXC-UK July 27)

Mathematics. I guess you did overload your little receiver Eton G3 globe traveller - and {far too long} long wire fully extended from a wind up reel

-, and you've got an internal IF image reception - probably 2xIF 450 kHz lower band?

5255 + 2 x IF(900) = nominal 6155 kHz 1900-2100 UT  
= TOM-Brother Stair outlet from Wertachtal 100 kW 300 degrees towards Albion.

5275 + 2 x IF(900) = nominal 6175 kHz 1900-2100 UT Mon-Fri  
= TOM-Brother Stair outlet from Wertachtal 125 kW 300 degrees towards Albion.  
(wb, wwdxc BC-DX TopNews July 27)

[later] Hi Wolfgang, This is very interesting and I am using an Eton G3 globe traveller with a long wire fully extended from a wind up reel.

Just out of interest are there any broadcast stations from 5200 - 5300 kHz?  
(Gary Drew-UK, BrDXC-UK July 27)

6189.990 Deutschlandfunk, Berlin-Britz, 0250-0258, July 30, fair signal with program of classical music // web stream. Crushed by Radio Nederland 0258 UT sign-on.  
(Brandon Jordan-TN-USA, hcdx July 30)

GREECE Voice of Greece August program changes. The program of the Voice of Greece is amended for the month of August as follows: [all in Greek]

From Monday to Friday (except Tuesday) ERA5 will air your favorite shows from 0700-1400 UT:

UT

0700-0830 Greek Coffee

0830-0900 Mailman

0900-0905 News In Greek

0905-1000 Literary Programs

MONDAY Traveling With Art

TUESDAY (Maintenance Break)

WEDNESDAY History Of A Week

THURSDAY Traveling With Art

FRIDAY Person To Person

1000-1030 (Maintenance Break) Songs Of The Party (Only On Internet)

1030-1100 (Maintenance Break) Shipping News (Only On Internet)

1100-1200 Radionewspaper (Connection With NET 105.8)

1200-1300 Hello Little Greeces

1300-1400 ERA5 Network Without Borders

Every Tuesday the program is as follows

0700-0800 Greek Coffee

0800-1000 (Maintenance Break) Connection With NET 105.8

(Only on INTERNET)

1000-1200 (Maintenance Break) Program (Only on INTERNET)

1200-1205 Musical Program

1205-1300 Radionewspaper

1300-1400 Hello Little Greeces

Outside of these hours and on weekends Voice of Greece will be connecting with other ERA programs (NET 105.8 MHz, Second Program, ERA Sports).

(John Babbis-MD-USA, dxld July 31)

GUINEA 4900 Familia FM, Timbi Madini, was putting a superb signal obs'ed. after I sent my latest report, on July 22: never that good.

7125 R. Guinee, Sonfonya, has been inaudible for a few days' time. I tried this both this morning and mins. ago (1430 UT), and no signal.

7125 R. Guinee, Sonfonya, finally back on the air as obs'ed. y/day's evening; fair signal. Were absent during the day though, and are not audible now as I compile this, 1430 UT.

(Carlos Goncalves-POR, wwdxc BC-DX TopNews July 26)

INDIA 3957.97 AIR again off frequency. Jose, observe AIR on 3957.97 tonight 1645+ UT again drifting. But usually find them on 3945 kHz.

(Victor Goonetilleke-CLN 4S7VK, DXindia July 31)

INDONESIA 4604.93 RRI Serui at 1205-1300+ UT on July28. Jakarta program in progress // 3995.03 kHz and probably others. Back to local programming at 1234 UT, with segued vocals, some sounding like older US C&W standards; no anmts heard; 1300 SCI and Jak relay again but much weaker now. At tune-in and throughout the hour, was the strongest low-band Indo. Also noted on 27 July, so 3 days in a row now. Hope this indicates a permanent re-activation. Let's hope Manokwari, Pontianak, and others follow suit. (John Wilkins-CO-USA, DXplorer July 28)

3325 RRI Palangkaraya, 1311 UT, July 27. In BI; dramatization that ended with segment of indigenous songs; gave name of performers; clear ID; almost fair.

Attached audio is 20 seconds long with ID and indigenous songs.

4604.90, RRI Serui, randomly 1233-1445 UT, July 27. Their usual format, but also had a long segment of on air phone calls; they faded out and were lost about 1445 UT, so I missed their nice sign off at 1458 UT, as noted on Atsunori Ishida's blog, where he has an audio of it. July 28 they had the strongest signal heard so far, as also noted by Glenn. (Ron Howard-CA-USA, dxld July 28)

4749.96 RRI Makassar on 1200-1235 UT July 30. SCI, then Jakarta program // 4604.93, 3995.03 kHz, and probably others; back to local programming at 1227 UT with talk segment. Good signal, equal to Serui in strength.  
(John Wilkins-CO-USA, DXplorer July 30)

JAPAN Tokyo HAM Fair 2010.

This annual event is to be held on Aug 21 and 22 at Tokyo Big Site [Odaiba Island, Tokyo, wb.]. Japan SW Club will open our own booth to promote short wave radio listening. Our booth number is J-34. This is our club's 58th anniversary, and we will have a special lecture during the Fair. The topics to be presented are Delta loop antenna by Mr. Kageyama, who are expert of this antenna. and Topics of the World by Mr. Akabayashi of Gekkan Tanpa and A Hora Japonesa by Mr. Hirahara, an expert of Latin American DX writing about the Japanese language stations of the Brasil.

We will also have a lot of special goods from world band radio stations for distribution to those who are interested. Anyone who will be around Tokyo area at this period, please join us at this HAM Fair, which attracts 30,000 attendees every year.

(Toshimichi Ohtake/JSWC, Kamakura-JPN, dswci DXW July 28)

KOREA DPR 3560.053 Voice of Korea (tent), 1010-1235, July 30, mainly carrier level with occasional threshold audio around 1200 UT.

(Brandon Jordan-TN-USA, hcdx July 30)

KOREA Rep. of 9785 DW Relay Kimjae Korea 2300 UT.

DW Relay Kimjae, Korea um 2300 UT auf 9785 {6090 in B-10} kHz in Chinesisch. Sehr hilfreich fuer das Sammeln von Programmdetails, dass gewisse Sendungen auch in Deutsch angesagt werden, wie z.B. "Presseschau aus Hong Kong". 25432.

NIGERIA 756 R. Oyo (pres), Ibadan, 2207-2219, 24 Jul'10, Vernacular, talks; 23441, QRM de E.

(Carlos Goncalves-POR, wwdxc BC-DX TopNews July 26)

PAPUA NEW GUINEA 5960 Radio Fly at 1138-1203 UT July 28. Generally fair with good peaks; EG pops (Donna Summer, etc.), M ancr in En with ID's; short anmt at 1159:40 UT, then more mx past ToH. // 3915 kHz which for a while was just as good (using USB to escape Voice of the People on 3912 kHz). By 1200 UT, 5960 kHz was considerably better.

3290 R. Central (pres) 1141-1220+ Jul 29. Island & pop mx, M ancr in Pidgin (I think); bird call at 1202 UT was followed by what sounded like En news, but can't be sure; back to music at 1207. No ID's heard. Fair but deteriorating after 1200 UT.

3334.97 R. East Sepik 1223-1235+ Jul 29. Gal talking in En about "Free Radio Bible"; couldn't tell if that was the current program in progress or just a program note; a bit of music at 1230 was followed by more talk, still in En, I think. To my ears, Pidgin-accented English sounds a lot like English-accented Pidgin.

(John Wilkins-CO-USA, DXplorer July 28/29)

Band scan 1010-1100 UTC, all tentative except as noted:

3274.991 NBC Southern Highlands, Mendi

3289.996 NBC Central, Boroko. Slightly better and mixing with co-channel Guyana on 3289.983 kHz.

3324.997 NBC Bouganville, Buka

3334.963 NBC East Sepik, Wewak. Best signal in 90mb.

3344.966 NBC Northern, Popondetta

3364.983 NBC Milne Bay, Alotau

3384.995 NBC East New Britain, Rabaul

3905.000 NBC New Ireland, Kavieng. Fair to good signal by 1040 UT peak.

3915.000 R Fly, Tabubil.

(Brandon Jordan-TN-USA, hcdx July 30)

3335 NBC East Sepik, 1219 UT, July 28. Almost fair reception; mostly in Tok Pisin, but a few commercial announcements in English (rent a Post Office box for secure mail delivery); promo for "Free Radio Bible" program; local TCs (two minutes slow!); IDs with N.B.C. and frequencies (90.7 FM and 3335 kHz.); played mostly pop island songs; 1302-1306 UT "the last News Roundup of the day" in English. Enjoyable reception!

(Ron Howard-CA-USA, dxld July 28)

PERU 6019.269 Radio Victoria, Lima-PRU, SIO 233 um 0450 UT.

(Nils Schiffhauer-D, Excalibur & SDR-IP/GPS & Perseus measured, A-DX July 28)

6019.294 at 2300 UT R. Victoria, Lima Peru Sp speech by male and full ID as "R. Victoria" and 9th. symphony by Beethoven (short) fair.

5921.294 at 2301 UT R. Bethel, Arequipa Peru Religion talks in Sp by male weak.

(Maurits van Driessche-BEL, Perseus measured, hcdx July 26)

4789.96 R Vision, Chiclayo, 0547-1007, July 30, religious talk and music, significant dead air from 0900-0930 UT, nice Radio Vision ID by man at 0930.

4835.47v Radio Maranon, Jaen, \*0933-1007, July 30, sign-on announcements, lively music, would be a fair signal if not for the WWCR 4840 kHz slop,

very slight CODAR. Station drifted from an initial 4835.48 down to 4835.46 kHz by 1007 UT tune-out.

(Brandon Jordan-TN-USA, hcdx July 30)

SAINT HELENA According to Mr Kipp who is the project Manager of R St. Helena Day revival project, the first batch of R St. Helena Day 2009 QSL was shipped on Jul 15 aboard the Royal Mail Ship RMS St. Helena. The ship would reach Ascension island about two days, then the cards would fly from there to England, then to world wide. But the first batch is only 36 cards and remaining about 3 hundreds reports are still in process at St. Helena.

The QSL cards and envelopes of Radio St. Helena Day 2009 were sponsored by JSWC.

(Toshimichi Ohtake/JSWC, Kamakura-JPN, dswci DXW July 28)

Radio St Helena QSLs.

In an e-mail from Gary Walters, station manager, Radio Saint Helena, he reports that the first batch of QSLs from the 2009 Radio Saint Helena SW broadcast are on the way. Here is part of his message:

"Me and my family have recently returned from CT [Capetown] after spending 2 months away from the island. Last week (My first week at work) before the RMS sailed to Ascension, me and Cherry (My wife) sent a stack of QSL cards to Japan. We decided to start with Japan first as we have the most reports from them. Up to this weekend we have finished with Japan and are now concentrating with reports from USA. So we are really steamrolling ahead with this project."

Please pass this news to any DX groups you may think are interested.

15385.2 KJES is indeed this far off-frequency as previously reported by Mark Taylor as unID on July 24 at 1914 UT. Heard July 28 at 1937 UT registering S=9+20 but quite undermodulated, so I need to turn the volume almost up full for normal listening level. Hymn sung by OM in Spanish with gringo accent.

KWFR-Herbstcamp, Hallo zusammen,

Vom 15. September bis zum 19. September 2010

findet zum 6. Mal das

DX-Camp der Kurzwellenfreunde Rhein/Ruhr  
im Naturfreundehaus Holzerbachtal

statt. Das Haus liegt ruhig und verkehrsguenstig am Rande von Solingen,  
nahe der Autobahn A46.

Es koennen 10 DX-Plaetze aufgebaut werden. Der Verein stellt drei Antennen  
(HF30, YA-30, und Kelemen-Tropenbanddipol) ueber  
Antennenverteilverstaerker (RFT AVV01) und Internetzugang ueber UMTS /  
WLAN zur Verfuegung. Platz fuer eigene Antennen ist ebenfalls vorhanden.

Die Unterbringung erfolgt entweder in Ein- oder Mehrbettzimmern oder einem  
Matratzenlager unter Dach. Vollpension ist inclusive, es ist nur noch das  
eigene Empfangsequipment, Spass am Hobby und gute Laune mitzubringen.

Infos, Teilnahmebedingungen und Preise:  
Michael Wlochinski, <kwfr-web @ arcor.de>  
Tel.: 02161 - 696838 (AB)

73, Michael Wlochinski KWFR - July 25, 2010.

AFGHANISTAN [non] Al Muick reactivated from Afghanistan.

Hello all. Been a long time since I have had time for DX, but am back now permanently in Kabul, having been stuck in Kandahar for almost 9 months without equipment and spending almost 3 months in hospital after some wounding. Apologies to all whom I owe letters to, I will catch up as time permits.

In the few periods that I have had time to DX, reception has been much better. Our group moved to a new guest house and the local noise dropped by almost 18dB! I have been able to erect a new, albeit shorter, antenna and now have proper grounding pits dug, for better MW and LW DX. I am just signing on for a 3rd year (yeah, I know, I'm an idiot) and expect to be able to give much more time to the hobby.

I will be heading for R&R to Pattaya, Thailand on the 2nd of September and will do some DX from there as well. Hoping to get some South Pacific and Asian MW DX in from that location.

The QSLs reported below are from the last four months, but the information is still timely, so I have included them.

73 and good DX to all, Al

(Albert Muick-AFG, dxld/hcdx Aug 10)

QSLs, -- heard in Afghanistan.

CYPRUS CyBC, 963, f/d view of studios card in 42 days for En report and US \$2 return postage.

CYPRUS NORTHERN (TURKEY), Bayrak RTV, 1098, n/d thank you letter in 126 days for En report US \$3 return postage. V/s Arben Fetoshi, Director of RTK.

GERMANY Radio 700, 6005, 1 kW(!), f/d card of Spanish tourist destination they are recommending in 80 days for En report and US \$2.00 return postage.

GERMANY Deutschlandfunk, 6190, f/d studio card in 97 days for En report and US \$2.00 (returned).

GERMANY Bayerischer Rundfunk, 6085 DRM, f/d antenna card in 63 days for En report and US \$2.00 (returned).

GERMANY Suedwestrundfunk, 576, f/d logo card in 67 days plus branded post-it note pad and program guide for En report and US \$2.00 return postage. V/s: Udo Merzig.

GERMANY Evangeliums Rundfunk, 1539 (700 kW!), f/d Mainflingen antenna card in 54 days for En report and US \$5.00. V/s: Juergen Werth and Lothar Ruehl.

GERMANY DDK9 Deutscher Wetterdienst, 10100.8, n/d email QSL in 1 day for En email report of RTTY intercept. V/s: Wilfried Behncke.

ISLE OF MAN Manx Radio, 1368 (20 kW), date only large island view card in 54 days plus station pen for US \$2.00 return postage.

JAPAN Nikkei Radio Broadcasting Corp., 6055, f/d caricature of listeners card in 54 days for En report and US \$3.00 return postage.

MAURITIUS MBC 684, n/d email QSL in 73 days from Cyril Nankoo, Ag Chief Engineer. This was followed in a couple of weeks by an MBC gift pack with a pen, DVD about the extinct Dodo bird and an MBC polo shirt, which, sadly, is (I'm ashamed to admit) too small for me. All this for US \$5.00 return postage. I have a good correspondence going with Cyril and he informs me they are moving into new HQ there soon!

REUNION [FRANCE] FR3 Radio Reunion, 666, f/d "Rotatable Antenna in Issoudun France" card in 80 days for French report and US \$5.00 return postage. No V/s, however the comments section listed "surprising!" as the station's comment. Report was sent to Reunion, however reply came from TDF Radio Business Unit, Shortwave Department, Montrouge France.

(Albert Muick-AFG, dxld/hcdx Aug 7)

---

ALGERIA 700 Polisario Front switching frequency again. Clandestine 700 kHz Polisario Front, Tindouf Rabouni (?) -ALG, is absent on 1550 kHz today, and reactivated what seems to be an alternative frequency. It's rated 35443, avoidable heterodyne with R. Algerienne / R. Al Aghwat, Aghwat, on

702 kHz. the // 6297 kHz remains off.  
(Carlos Goncalves-POR, wwdxc BC-DX TopNews Aug 2)

ALG Laghouat 702 kHz 60d / 30n kW 70m mast; 1548 kHz 100d 10n kW,  
50m mast

6927.054 RASD Tindouf is back on 6297.054v.  
Arabischer Pop auf 6297 kHz. tent RASD at 1849 UT, O=2-3, oder treibt  
sich da ein anderer Araber rum?  
(Ralf Ladusch-D, A-DX Aug 5)

... wie die ID kurz puenktlich (!!!) zum stuendlichen Zeitzeichen um  
19:02:30 UTC auskunftete, geht das voll in Ordnung.

Frequenz 6927.054 kHz. Jetzt kann man ausrechnen, ob das in ppm die selbe  
Zugabe (+3,6 ppm) wie zur Zeit ist ...  
73 Nils Schiffhauer-D DK8OK, WinRadio, Excalibur & SDR-IP / GPS &  
Perseus, 96 m delta loop, 42 m windom; Aug 5)

6297.1 Western Sahara R surprisingly strong S=9+20 open carrier at 0555  
UT Aug 10, or rather not totally open as accompanied by a roaring sound.  
On exactly the same off-frequency as before, must be Radio Nacional de la  
Republica Arabe Saharaui Democratica, the Polisario Front clandestine from  
just across the border in Tindouf, ALGERIA. It's been missing for months,  
as seems to happen every year, but eventually revives. Last report of it  
in dxld was March 13 in issue 10-11.

At 0600:50 UT military band plays anthem for almost a minute, then YL  
announcement, language uncertain but unseems Spanish, then OM chanting  
until 0613 UT more melodic music mixed with talk. Unfortunately, a spur  
from one of Suddenlink's cable DTV converters lands right on same  
frequency, impeding copy!

Reactivation was first reported by Mike Barraclough, UK, Aug 7 past 2303  
UT.  
[(Ralf Ladusch-D and Nils Schiffhauer-D DK8OK, noted on Aug 5 1849 UT;  
A-DX)]

Previous sign-on time per Aoki and WRTH was 0700, a bit late for me, so  
I'm glad it's now 0600 UT. Because Morocco was observing DST of UT +1? Per  
<<http://www.timeanddate.com/time/dst2010.html>>  
that just ended Aug 8, in time for Ramadan, and there is no DST in  
Algeria. The final hour at 23-24 should be in Spanish.  
(Glenn Hauser-OK-USA, dxld Aug 10)

CLANDESTINE 700 Polisario Front, Rabouni (near Tindouf-ALG), is being  
heard on this alternative frequency daily since the 1st inst., // to 6297  
kHz which doesn't seem to be at its best though as the HF tx is often  
airing an empty carrier, or simply off, or then airing the noise like "IS"  
that's played prior to the start of their b/casts.  
(Carlos Goncalves-POR, wwdxc BC-DX TopNews Aug 7)

6297.07 kHz proper signal tonight, S=9+10dB at 2015 UT, Aug 10, wb.

ARMENIA Google Earth imagery. Some high resolution place and new additional photo images in Panoramio.

ARMENIA/GERMANY 7560 - ERV. Family Radio in Bulgarian 1800-1900 UT on  
7560 kHz on July 31: reading from the Bible and the main theme was When  
will be the end of our world ? Already I know it will be on May 21st,  
2011. The first hour 1700-1800 UT on 7560 kHz was in English.

7330 WER - In Romanian no signal at 1800 UT on 7330 and 9895 kHz but at  
1855 UT there was a prgr in Romanian on 7330 kHz.  
(Rumen Pankov-BUL, wwdxc BC-DX TopNews July 31)

AUSTRALIA 15160 Radio Australia Shepparton at 0715 UT, Aug 10.  
Scheduled 0500-0800 UT, heard with fair signal S=9 ... 9+10dB signal.  
Typical for mid August and September reception here in central Europe.  
(wb, wwdxc BC-DX TopNews Aug 10)

5025 05 Aug, 2150 UTC, Northern Territory Shortwave Service VL8K  
Katherine in En talks between YL announcer and OM interviewee,  
interspersed with light pop music. Positive ID at 2200 UT. Weak to fair  
sigs and no QRM except for an occasional RTTY blast on 5023 kHz causing  
issues.  
(Albert Muick-AFG, hcdx Aug 10)

BANGLADESH 4750 09 Aug, 1256 UTC, Bangladesh Betar, In Bengali with  
flute music until time pips and ID by man on the hour, then into news and  
call-in show. Fair reception and improving as dusk approached.  
(Albert Muick-AFG, hcdx Aug 9)

BOLIVIA 5952.43 Emisoras Pio XII, 1030-1045 UT, Noted a weak signal  
here with a male in preaching mode until 1031 when a second person  
comments in Spanish with program information it seemed. Signal was weak  
and poor with plenty of noise.  
(Chuck Bolland-FL-USA, hcdx Aug 3)

4716.698 Radio Yura (pres), Aillu Yura, Aug 4, 0030-0212\*, threshold  
audio strengthening by 0100 UT, long Andean vocals, occasional talk by  
man. Poor signal with occasional voice USB QRM.

4795.89 Radio Lipez (tent), Uyuni, Aug 1, \*0858-1034\*, threshold audio,  
perhaps abbreviated schedule for Sunday morning.

+ Aug 2, \*0848-1100 threshold audio, briefly peaking between 1030-1040z  
with monologue by male speaker, perhaps inspirational.

6134.825 Radio Santa Cruz, Santa Cruz, Aug 1, \*1049, late Sunday morning sign-on, brief sign-on announcement by woman, brief Andean vocal into religious service. Poor signal, noisy, fading rapidly.

+ 6134.81 Aug 3, 2345-0106\*, very nice signal by 0015, female and male announcers, lively music, announcements, canned ID by man at 0101 UT: "960 kilohertz onda media, 6165 kilohert ondaz corta, 92.3 megahertz, frecuencia modulada transmite Radio Santa Cruz, desde Santa Cruz de la Sierra, Bolivia", another canned ID at 0103 UT mentioning "Emisora del Instituto Radiofonico Fe y Alegria" followed by a song "Radio Santa Cruz". Open carrier from 0106 to 0143 UT.

+ 6134.82, Aug 4, \*0856, short monologue by man at sign on, then canned ID mentioning AM and SW frequency, flutes, "Radio Santa Cruz" vocal, more ID's and a variety of vocals. Good signal, starting to fade from 1000 UT. (Brandon Jordan-TN-USA, hcdx Aug 4)

5952.46 Pio XII, Siglo Veinte 1012 UT om and yl with clear signal, [no Cuban/Costa Rican "yo mama drama" jamming]. Children's voices, om over percussion solo, good AM lock on the R8. 5 August.

4795.85 Radio Lipez, Uyuni 0935 UT strong signal with flauta andina, locutor and music, "en Bolivia...kiloHertz" ID under t-storms 1000 UT Buenas Dias, music bridge stayed in till 1055 UT recheck, 5 August. Good AM lock on R8. (Robert Wilkner-FL-USA, DXplorer Aug 8)

BOTSWANA 4960 VOA, Moepeng Hill, Aug 1, 0430-0531\*, English to Africa, listed Hausa from 0500 UT, Yankee Doodle at 0530:30 UT. Modest peak at 0448 UT transmitter sunrise. (Brandon Jordan-TN-USA, hcdx Aug 4)

BRAZIL SRDA on 12175 kHz. SRDA, spurious signal probably from 11765 kHz, 0700 UT, August 5, no carrier, reception possible in AM only. Usual Miracles before 0700 UT, David Miranda's speech at 0700 UT. Nice signal, partly distorted, with rapid fadings. Still audible at 0745 UT but already very weak and fading out... (Karel Honzik-CZE, wwdxc BC-DX TopNews Aug 5)

5054.96 R Jornal A Critica, Manaus AM. "A Critica FM" relay heard with a nice signal. Radio Jornal A Critica reactivated 5055 kHz (5054.96 kHz). "A Critica FM" relay heard this morning (Aug 03, 0323-0530 UT) with a nice signal here in the middle of Europe. (Karel Honzik-CZE, BrDXC-UK / dlxd Aug 3)

Hi Karel, thank you for the report. I have been following this signal the past two nights (August 2 and 3), an overnight program of Brazilian and US pop and ballads. I haven't been able to pull an ID from it so far due to high static levels, but was working on the assumption it was possibly Radio Difusora, Caceres MT.

[later] Brazil 5055 reactivated. Definitely not a Cuban spur. The Brazilian is in now (0054 UT) on 5054.96 kHz. A weak signal so far, but enough to verify it isn't // either Rebelde or RHC. (Brandon Jordan-TN-USA, hcdx / dxld Aug 3)

5990 Radio Nacional da Amazonia, 0300-0311, Aug 09, Port TC as "... meia

noite em Brasilia...", then into news headlines: "Nacional informa...", 0304 UT "Madrugada Nacional". Quite strong on clear freq usually occupied by Radio Senado, first time noted here // much weaker 11780 kHz. After briefly trying 6195 kHz they now appear to be testing this NF, cf dxld.

5990 The "Madrugada Nacional" program on 5990 kHz I mentioned in my earlier report today, must have been a relay of Radio Nacional Brasilia on 980 kHz where scheduled 0305 to 0600 UT according to their website. (Martien Groot-HOL, dxld Aug 9)

3375.34 Radio Municipal Sao Gabriel da Cachoeira, upbeat music 0935 UT ID banda de 90 metros, good strong signal till 1005 UT tune out 7 August.

4754.9 Radio Imaculada Conceicao, Campo Grande, MS 0040 UT om in Portuguese 5 August. (Robert Wilkner-FL-USA, DXplorer Aug 8)

4914.963 Radio Difusora, Macapa AC, 0030-0616\*, Aug 4, fading up to almost fair level by 0100 UT, pop and ballads, "Radio Difusora de Macapa" ID by man, slight echo efx. No sign of the other Brazilians tonight, and Macapa transmitter cut-off at 0616 UT leaving channel empty.

+ 4914.978v Aug 4, \*0758, back on but threshold signal and slowly drifting downward, 4914.968 kHz by 0900 UT.

4915.028v Radio Daqui AM, Goiania GO, \*0900, Aug 4, s/on with full canned ID by man mentioning multiple frequencies, greetings by announcer directly into latin ballad. Dominant over co-channel Radio Difusora de Macapa causing a low rumble, strong CODAR. Drifting down to 4915.022 kHz by 1000 UT.

4964.960 Radio Alvorada (pres), Parintins AM, Aug 1, \*0846-1010, poor signal, low-key religious talk, inspirational music, very slight peak around 0953 UT Parintins sunrise.

4985.003 Radio Brasil Central, Goiania GO, Aug 4, 0030-0200, female DJ spinning pop Brazilian vocals, canned ID 0101 UT by man mentioning multiple frequencies then "Radio Brasil Central, Goiania, Goiania". Initially poor but rapidly improving to excellent by 0100 UT. Started fading after 0200 UT and remained at threshold level the rest of the night.

5044.984 Radio Cultura, Belem PA, Aug 1, 0430-1000, overnight music programs: Madrugada Cultura until 0600 UT then seamlessly morphing into Geracao MPB (Musica Popular Brasileira). Same laid back male announcer, variety Brazilian music, full "Cultura FM, Belem, Para, Amazonia" ID at 0611 UT, occasional "Cultura F-M" or program IDs between ever two or three songs. Huge signal all night despite RHC on 5040 UT, not fading until just before 1000 UT. (Brandon Jordan-TN-USA, hcdx Aug 4)

CHINA Voice of the Strait new QSL card. According to Chinese DXer Zhang  
Shifeng, Voice of the Strait (Fuchou) declared in their website  
<<http://www.vos.com.cn>>  
that they issued 2010 new QSL card on July 26. They welcome reception  
reports from DXers via S-mail  
P.O.Box 187, Fuchou, Fujian, 350012 China  
or E-mail <vos @ vos.com.cn>

In the reception report, write date, time, frequency, program contents, as  
well as the comments on their broadcast or programs. Reporters should also  
notice the requirement of QSL card in the report.  
(Takahito Akabayashi-JPN, wwdxc BC-DX TopNews Aug 7)

CHINA/TAIWAN 14980 at 1900 UT, Sound of Hope or CNR1 jamming?  
Jamming of Firedrake music for Xi Wang Zhi Sheng-Voice of Hope stopped  
from July 31. Clearly it can receive it at each frequency. What was there  
in China? 17660/17640, 15970, 15140, 14960, 14900/14700, 13800, 13680,  
13100, 8400 kHz.  
de Hiroshi

(Sei-ichi Hasegawa-JPN, dxld Aug 2)

14980 kHz, July 25 at 1900 UT, TWN, R Xi Wang Zhi Sheng, SOUND OF HOPE - talk, idioma similar mandarim, news (?) ate 1950 UT - 25322

<<http://www.youtube.com/watch?v=Xw5AxRk3n6E>>

(Sarmiento Campos-BRA, radioescutas yg via dxld Aug 2)

I've never heard anything but Firedrake all-music jamming on 14980. Your clip was certainly not FD. However, there's a good chance what you had was not a 100-watt Sound of Hope transmitter, but the ChiCom using hundred+ kW of CNR1 programming instead to jam SOH, which they sometimes do. Should seek // on numerous other CNR1 frequencies, preferably not used for jamming.

(Glenn Hauser, dxld)

And Sound of Hope is another interesting catch. Recently, to be more precise since last month, I have not heard any Firedrake jamming! That's weird and I don't know how to explain it. Crazy propagation?

Before I start logging, I usually scan all the bands, manually, in 5 kHz steps, AM mode, filter wide, including non WARC bands. If I catch something strange, I switch to narrow filter, maybe SSB (ECSS), try both dipoles using a switch box, and then start investigation.

And it was what happened with 6793 kHz and 14980 kHz.

On 14980 kHz, my initial thought was a CRI or regional emission from China, and I have scanned 25 and 31 meters to check for parallel, and I found nothing similar, just the classical CRI emissions, nothing compared to this. A woman talking a lot - for a long time - is a little bit different (completely to be more precise) than regional programming of China (lots of music, changing patterns, and so).

A German DXer who subscribes to my channel, has accessed the recording posted at Youtube, and commented he has already logged this emission. Of course I can not assure 100% that it was Sound of Hope, but probability is very high to match it.

(Sarmiento Campos-BRA, dxld July 28)

CUBA 5055 very poor signal in Spanish, music mix, Aug 2 at 0527 UT. Soon realized it was leapfrog of Cuba 5025 over 5040 kHz, and then confirmed by // audio. This might explain some unID on 5055, if both the Cubans are strong. Also lower leapfrog would land on 5010 kHz, leading people to hypothesize Honduras, dream of Dominican Republic or even imagine Madagascar. So always check for Cuban parallels, the dirty birds.

(Glenn Hauser-OK-USA, dxld Aug 3) see also under BRAZIL

CYPRUS If you please, I am looking for the current address for the BBC Limassol, Cyprus relay station. The 2009 address I have is apparently outdated or incorrect, the PO Box (209) no longer being correct. Thanks in advance.

(Bruce Jensen-CA-USA, dxld Aug 3)

Hi Bruce, curiously enough, the East Mediterranean relay station is listed among embassies and consulates (!) on the Foreign & Commonwealth Office web pages <[www.fco.gov.uk](http://www.fco.gov.uk)>

The address you are looking for is:

P.O.Box 54912, Limassol, Cyprus.

from

<<http://www.fco.gov.uk/en/travel-and-living-abroad/find-an-embassy/europe/east-mediterranean-relay-station>>

On the other hand, editors of Middle East on Shortwave, published by BDXC, point out that the box number is 4912. I trust both sources, and it's unclear which one is true...

(Dmitry Mezin-RUS, dxld Aug 7)

All latest Cyprus P.O.B. numbers contain five digits, but WRTH 2010, page 438 shows BBC Middle East relay stn address as P.O.Box 4912. 73 wb, Aug 3 - it's really P.O.Box 54912, Limassol, Cyprus.

ERITREA 7155 Voice of the Broad Masses [of Eritrea], Selai Dairo, 1742-1814 UT, 30 Jul'10, Arabic, talks, Arabic songs, ID, chatter; 45433. I believe this is the one I caught days ago on 7170 kHz.

(Carlos Goncalves-POR, wwdxc BC-DX TopNews Aug 2)

ETHIOPIA 6030 Radio Oromia, Addis Ababa, Aug 2, \*0321-0529\*, xylophone sounding interval signal, perhaps a lamellophone. ID by man at 0330 UT, brief talk by woman then Ethiopian vocal. This format of somber talks inter-spaced with lively music continued. Fair signal on the lower side band until a pulsing noise started up at around 0430 UT.

(Brandon Jordan-TN-USA, hcdx Aug 4)

7135 R. Ethiopia, Geja Dera, 1702-1727, 08 Aug'10, Vernacular, talks; 35332, only occasional amateur QRM; // 9704.2 kHz.

daraus das folgende entnommen:

BR laedt zum "Tag der offenen Tuer" ein.

Unser Sender auf dem Pfaffenberg im Spessart oeffnet seine Pforten - und Sie sind herzlich eingeladen: Am 25. und 26. September koennen Sie einen Blick in die Sendeanlage werfen, beliebte Moderatoren sorgen fuer Unterhaltung.

Der Sender auf dem 432 Meter hohen Pfaffenberg hat 1953 seinen Betrieb aufgenommen, ganz bescheiden mit Bayern 2 auf Ultrakurzwelle. Im Laufe der

Jahre kamen weitere UKW-Sender fuer alle fuenf Hoerfunkwellen des Bayerischen Rundfunks, fuer "Das Erste" und das Bayerische Fernsehen hinzu:

Seit Maerz 2000 ist der Pfaffenberg auch Teil des bayernweiten Sendernetzes fuer Digital-Radio (DAB). Technikinteressierte Besucher werden beim Tag der offenen Tuer also sicherlich auf ihre Kosten kommen. (Dr. Anton J. Kuchelmeister-D DK5TL, A-DX Aug 10)

Und auch in der Naehel:

GUYANA 3290 GBC 0940 UT flute instrumental usual om announcer, under t-storm " 60 million dollars" for something 0945 UT modern subcontinental music 7 August. (Robert Wilkner-FL-USA, DXplorer Aug 7)

HONDURAS 3250 Radio Luz y Vida, San Luis, 0035 UT om en espanol good signal 4 August, 1037 UT carrier on, no audio, 7 August. (Robert Wilkner-FL-USA, DXplorer Aug 7)

INDIA 4799.994 AIR Hyderabad (pres), Aug 2, \*0040-0050, threshold audio briefly heard at sign-on, talk by man then woman. (Brandon Jordan-TN-USA, hcdx Aug 4)

AIR Monitoring observations. Here are my latest monitoring observations of AIR.

1. AIR Aligarh, 9470 National Channel. Monitoring of 9th Aug 2010 shows that wrong feed was given for very long time as follows:

Around 1330 UT: Urdu Service (?) in progress instead of news. When I checked at 1425 UT GOS English was there with Faithfully yours program. GOS continued till 1500 UT. Then after test tone National Channel

program started from 1505 UT.

2. AIR Gorakhpur on 3945 kHz is noted drifting again. Yesterday 9th August at 1506 they were on 3946 kHz. At 1712 when I checked they were on 3944 kHz.

3. AIR Jeypore, Orissa is heard with very low audio only on 5040 kHz lately. Earlier they used to be very clear. They are noted off air on 6040 kHz also.

4. Now is the time to check for any clear signals of AIR Port Blair on 4760 as AIR Leh is off air on 4760 kHz.

5. AIR Delhi at 0030-0040 & 0100-0200 UT is now days noted on 7371 kHz rather than 7370 kHz.

(Jose Jacob-IND, DXindia Aug 10)

INDONESIA I can hear the following stations/frequencies hrd Aug 2nd to 5th in Bang Saen, abt 1 hr east of Bangkok on the coast; all stns as per DBS-12, no IDs hrd but definitely all Bahasa Indonesia.

3325 RRI Palankaraya, quite strong and clear, at 1225 UT "Indonesia Raya" f/in 1130 UT.

3345 RRI Ternate, much weaker than 3325 UT, but clearly BI, onLy once Aug 5 at 1200 UT.

3976 RRI Pontianak, Aug 5 at 1200 UT, male anncts under strong noise.

3995 RRI Kendari, strong and clear here.

4606 RRI Serui, f/in already 1130 UT, fair but clear.

4750 RRI Makassar, definitely there but most of the time drowned by Bangladesh Betar, which is strong here already almost 2 hours before sunset.

4790 RRI Fak-Fak, f/in around 1130 UT, but at 1230 UT already gone again.

Hopefully, there will be more stations when Ramadan starts next week on August 11.

(Gerhard Werdin-Bang Saen-THA, on the Gulf of Thailand, wwdxc BC-DX TopNews Aug 5)

4750 RRI Makassar, 1010-1020 UT, Noted a male reciting the Qu'ran. After a few minutes, popular music presented. Signal was fair this morning.

(Chuck Bolland-FL-USA, hcdx Aug 3)

4604.90 RRI Serui, 1204-1228, August 9. Back on the air again. Jakarta news relay and National Anthem (choral); // 3325 (RRI Palangkaraya), 3344.96 (RRI Ternate), 3995 (RRI Kendari), 4749.94 (RRI Makassar), 4789.96 (RRI Fak Fak - interesting that they would also resume broadcasting again on the same day that Serui returned) and 9680 (RRI Jakarta).

After 1228 UT no longer //. 1239-1300 C&W songs in English; 1300-1305 SCI, Jakarta news relay and National Anthem (choral) which was // 3325 (RRI Palangkaraya)

4789.96 RRI Fak Fak, 1212-1219\*, August 10. Did not carry the Jakarta news relay today, but had pre-Ramadan non-stop reciting from the Qur'an; tentatively went off the air at 1219 UT; weak with CODAR QRM.

9680 RRI Jakarta, after 1425 UT also noted this with pre-Ramadan non-stop

reciting from the Qur'an.  
(Ron Howard-CA-USA, dxld Aug 9/10)

4604.93 RRI Serui 1239-1301 Aug 2. Segued older En C&W songs, no anmts; SCI at 1259 UT; 6 pips to 1300:35 UT, then Jak program. Good signal. Is still irregular - noted off on July 31, August 3,6,7. Did not check on the 8th; back on today (9th).  
(John Wilkins-CO-USA, DXplorer Aug 9)

9525.9 VOI English, VG signal Monday Aug 9 around 1335 UT with Indonesian lesson, but we really need some visual aid. Still on the air at 1417 UT in Indonesian hour atop CRI Russian het on 9525.0 kHz.

9526- VOI, missed more than the first half of this Tuesday's "Exotic Indonesia" co-production with RRI Banjarmasin, but Aug 10 from 1335 UT, VG signal, no Music Corner, but continuous discussion between the mystery announcer and someone about Ramadan, puberty vs fasting, and the Ramadan Cake Fair in Banj which is about to kick off the month. Still talking at 1357:15 UT when CRI Russian carrier comes on 9525.0 kHz, shortly adding musical prelude, roughly equal levels so a huge collision. 1400 UT brief English ID, 1401 into warta berita.  
(Glenn Hauser-OK-USA, dxld Aug 9/10)

IRELAND 927 Unid station noted. The transmission was emanating from a transmitter which is situated between Mullingar (Co. Westmeath) & Longford (Co. Longford).  
(Sean Brady via Ydun Ritz-DEN medium wave info 30.6.2010)

1251 Atlantic Radio is testing from Ireland, apparently from Castlebar, Mayo. Also on shortwave.

Web: <<http://www.atlanticradio.ie>>  
E-mail: <studio @ atlanticradio.ie>  
(Steve Whitt-UK and Paul Logan, mwcircle 30.6.2010;  
ARC MVEko Olle Alm-SWE Aug 3)

ISRAEL 6973 08 Aug, 1838 UTC, Galei Tzahal, EZ listening and soft jazz music program with a male DJ. I was a bit surprised to hear the DJ say in English "This is from my personal collection." First English announcement I've ever heard on this station. Very good signal level and only summer noise to deal with. Slight to moderate fading.  
(Albert Muick-AFG, hcdx Aug 8)

ITALY 999 RAI 1 Piemonte, Volpiano-Torino, new frequency, ex 1062 kHz.  
(Play-DX via Christer Brunstroem-SWE;  
ARC MVEko Olle Alm-SWE Aug 3)

My former G.E entry: "ITA Rai Torino, new Volpiano site, exEremo site, 1062 1.5 kW, soon 999 kHz 50 kW".

I suppose, has something to do with Ramadan Festivity Month, which starts tomorrow this season.

It was like a test, when Libya extended a new schedule started on July 6th, 2010. Libya had never such professional schedule in Arabic, English, Swahili, Hausa, French etc. in past few years, like this July.

So, we have to wait and cross the fingers, what happens next in that muslim country radio service.

73 de wolfy df5sx

MADEIRA 1017 Posto Emissor do Funchal, Santana 1 kW (Madeira's NE) has been silent for a few weeks' time.

(Carlos Goncalves-POR, via Ydun Ritz-DEN medium wave info 31.7.2010; via ARC MVEko Olle Alm-SWE Aug 3)

MALAYSIA 15295 "Special Bahasa Malay Word Of The Day" feature for the English language audience at 0720 UT, Aug 10, S=9 signal. News commentary "43 years ASEAN - Association of Southeast Asian Nations, a geo-political and economic organization, formed 8 Aug 1967.

(wb, wwdxc BC-DX TopNews Aug 10)

5965 09 Aug, 1746 UTC, RTM Klasik Nasional, in Malay with Malay oldies, IDs and news on the hour. 100 kW with very good signal, but smashed by PBS Xijian on 5960 kHz.

(Albert Muick-AFG, hcdx Aug 9)

[SARAWAK] 7270.02 RTVM 1229-1316 Aug 9. Droning vocal by man; 2 pips at ToH followed by presumed news; pop vocals followed after the news at 1310 UT. Generally fair signal. Noted 5+1 pips way underneath at 1300 UT, pres, NMPBS.

(John Wilkins-CO-USA, DXplorer Aug 9)

[SARAWAK] 5030 Sarawak FM via RTM, 1418-1450, August 10. Pre-Ramadan non-stop reciting from the Qur'an; certainly not their usual programming; fair-good.

(Ron Howard-CA-USA, dxld Aug 10)

MAURITANIA 4845 Radio Mauretanie, Nouakchott, Aug 1, \*0552-0715, Salah of Fajr recitation in progress ending exactly at 0642 UT Nouakchott sunrise, followed by sermon. Greetings by man and woman at 0648 UT, mentions of Mauritanie, into long vocal accompanied by lute until 0700 UT. More Moorish music after the top of the hour. Excellent signal in USB to avoid WWCR.

+ Aug 2, \*0537-0645, morning prayer until 0631 UT, canned announcement by woman the long monologue by man. Signal fair to poor.

(Brandon Jordan-TN-USA, hcdx Aug 4)

7245 R. Mauritanie, Nouakchott, 1806-1821\*, 07 Aug'10, French, news bulletin, Arabic lang. prgr at 1818 UT, announcements, suddenly off the air, and supposed to emerge on 4845 kHz, their evening / early morning outlet, but 4845 kHz was only found on some time between 1903 & 1924 UT.

(Carlos Goncalves-POR, wwdxc BC-DX TopNews Aug 7)

MEXICO 6009.96 XEOI Radio Mil, Mexico City, Aug 2, 0830-0850, pop latin music, multiple 'Radio Mil' ID's, fair signal with noise.

(Brandon Jordan-TN-USA, hcdx Aug 4)

6010 Radio Mil, Mexico City 0953 to 1000 UT. ID, Disco music reminiscent of Whit Stillman films, 7 August.

<<http://www.imdb.com/name/nm0001775/>>

(Robert Wilkner-FL-USA, DXplorer Aug 7)

MOLDOVA/RUSSIA 999 / 6010 Voice of Russia, Russian mixture on 7009 kHz in ham radio band.

UNID 7009 mixture 1945-2010 UT, of 999 VoRUS Ru and 6010 YFR Grigoriopol in Italian language.

Der BC Sender auf 7009 kommt aus Rumaenien, QTF BNetzA um 1945 UT am 04.08.10.

(Wolf DK2OM via wb, wwdxc BC-DX TopNews Aug 4)

Subject: Re 7009 Spurious Mixture.

Hallo, mit Synchron detection Option und den CW-isten auszublenden versucht, habe ich auch gehoert:

Russische Sprache um 2003 UT, auch von Dr. Matthias Zwoch im Raum Dresden soeben gemeldet.

Mathematik + Kombination mit 7009 kHz:

nachdem das eine Frequenz ausserhalb des  $\dots/0$  kHz Raster ist, kommt nur eine Intermodulation mit einer Mittelwelle im Raum Rumaenien (BNetzA Meldung), oder Moldavien infrage.

ROU Galbeni Kurzwelle hat auch MW minus 1179 = 5830 kHz fundamental, - scheidet aber aus.

MDA Grigoriopol KW in Moldova - MW minus 999 = 6010 kHz fundamental, das passt, es gibt eine Reservierung fuer einen amerikan. relig. YFR Programm in italienischer Sprache in Grigoriopol Maiac in Moldova mit properen 300 kW Leistung,

<<http://s.appspot.com/panoramio-photos/original/2753512.jpg>>

<<http://www.panoramio.com/photo/2753512>>

das ITU Call aus Sowjetunion langlebigen Zeiten stammt, KCH-Kichinev, lautet:

6010 kHz 1900-2000 UT zone 28West KCH 300kW 270degrees MDA YFR RAM

Russian 0600-1800 UT 999 kHz Grigoriopol MDA 500 kW Europe, Moldova, UKR aber 1800-2000 UT auf 1413 kHz gelistet, aber auch 1730-2000 UT weiterhin auf 999 kHz.

Ru 2000-2300 UT 999 kHz Grigoriopol MDA 500 kW Europe, Moldova, UKR

Somit kommt es darauf an, dass beide Sender on-air sind:

a) 6010[bis nach 2005 UT?] und

b) 999 kHz.

Dies passiert wohl nur im Zeitraum circa 1900 bis 2005 UT ?

Vorausgesetzt die Theorie stimmt, muesste das russische Programm auf 999

u. 7009 kHz auch via

Kaliningrad 1143

Braunschweig 630

Berlin 693

Dresden 1413 kHz

zu hoeren sein, moeglich auch mit sekuendlicher Verzoeigerung durch den Satellitenfeed.

ps. theoretisch muesste es auch noch eine Symmetrische Mixtur bei 5011 kHz geben?

vy73 wolfgang df5sx

(wb, wwdxc BC-DX TopNews Aug 4)

5. August um 1953-1956 UT auf 7009 kHz: eindeutig gleiches russischsprachiges Programm wie Powerhouse Berlin Mittelwelle Oranienburg 693 kHz. Also Grigoriopol Maiac Moldova 6010 + 999 kHz passt sehr gut.

vy73 Wolfgang df5sx, ...und damit weg zum BBT Ham Radio Contest auf den Allgaeuer Bergen bis Sonntag nacht.  
(wb, wwdxc BC-DX TopNews Aug 5)

MOLDOVA/RUSSIA etc.: Grigoriopol Maiac Radio Center at 1800-2000 UT on MW:  
999 kHz 500 kW  
1413 kHz 500 kW  
1548 kHz 1000 kW

Used by TWR, DW and acc to their official info and VORUS.  
On 999 kHz DW and TWR, on 1413 kHz VOR, on 1548 kHz TWR.  
1730-1800 UT 999, 1413, and 1548 kHz are each by 500 kW, resp. VOR, TWR, CRI.

Yesterday Aug 5th with strong signal in the village on 4831 kHz was:

1930-2000 Voice of Russia World Service in Russian // 7310, 1089, etc.

2000-2100 Voice of Russia Evangelic Readings in Ru // only!! on 1089 kHz,  
VOR ER is using 2000-2100 UT 1089 Krasnodar and 612 Moscow acc to their announcement.

1089 kHz from Krasnodar heard on // 4831 kHz - usage:

1500-2000 VOR WS; 2000-2100 VOR ER, both services are in Russian.  
Registered with 1200 kW.

Which formula for 4831?  
{4831 + 1089 = 5920 kHz 2000-2200 UT to zone 37 200kW 280degr, wb.}  
(Rumen Pankov-BUL, wwdxc BC-DX TopNews Aug 7/8)

999 kHz 0500-0530, 1500-1600, 1800-1900 DW Russian  
0600-1500, 2000-2300 VOR WS Russian  
1900-2000 TWR Russian / TWR also in Belarus, Ukrainian  
- all with 500 kW

1413 kHz 1730-1800 TWR in Ukrainian, 1800-2000 VOR WS in Russian  
- all with 500 kW

1548 kHz 1530-1700, 2100-2230 VOR Serbian  
1700-1800, 2000-2100 CRI (all subject to check!)  
- all with 500 kW and  
! 1800-2000 TWR with 1000 kW!

At 1800-2000 UT 999 kHz 500 kW, 1413 kHz 500 kW, and 1548 kHz 1000 kW  
or ? 4txs x 500 kW?  
(Rumen Pankov-BUL, wwdxc BC-DX TopNews Aug 7)

MOLDOVA 9665 Radio PMR, 0008-0016 Aug 3, man with news in English with ID, schedule and contact information read at 0011 UT. End of English program followed by IS, ticking clock and opening of French program at 0312 UT. Good signal.  
(Rich D'Angelo-PA-USA, DXplorer Aug 3)

MOROCCO [Ceuta] 1584 Radiole, Ceuta, Poblado Marinero, Local 32, 51001 Ceuta, new address.

(Jordi Brunet via Christer Brunstroem-SWE, WRTH;  
ARC MVEko Olle Alm-SWE Aug 3)

MYANMAR 5985.8 Myanma Radio, Yegu, 2258-2316, 07 Aug'10, IS, ID in  
Bamar followed by a local tune (Natl. Anthem? - didn't seem so), talks;  
34432.  
(Carlos Goncalves-POR, wwdxc BC-DX TopNews Aug 7)

NETHERLANDS 828 Arrow Classic Rock heard 25.7.2010 at 0755 UT with ID  
in nulled Magic, Leeds; this was not audible when it was first reported  
back on 828 kHz. So I assume higher power now.  
(Steve Whitt-UK near York, MWCircle 25.7.2010;  
via ARC MVEko Olle Alm-SWE Aug 3)

PAPUA NEW GUINEA 3385 NBC East New Britain, 1224-1226\*, August 10. Pop  
song and suddenly off; weak.  
(Ron Howard-CA-USA, dxld Aug 10)

5960 Radio Fly, (TENT), 1040-1105 UT, Noted a male and female in comments  
in English, could really make it out with the noise. English is listed for  
this. At 1043 UT music presented. The music being played sounds like it  
was from PNG. Following the music the male talks more. Signal was poor but  
improves by 1105 UT.  
(Chuck Bolland-FL-USA, hcdx Aug 3)

PERU 4789.55v Radio Vision, Chiclayo, Aug 1, 0350-1115, generally poor  
overnight but much improved from 0800z onward. Typical La Voz del la  
Salvacion content, male preaching in what sounds to be a large, echoey  
auditorium. Appears to be local programming after 0800 UT with Andean  
vocals, Radio Vision ID at 0857 UT. Back to La Voz del la Salvacion at  
0930 UT.

+ 4789.56v Aug 2, 0115-0730, Aug 2, much better overnight but signal  
fading by 0730 UT and remaining generally threshold the rest of the  
morning.

4824.46v La Voz de la Selva, Iquitos, Aug 2, \*1048-1110, lively vocal at  
sign-on, greetings by low key male announcer at 1052 UT mentioning Iquitos  
and FM, into a monologue. Fair signal but poor modulation, fading rapidly.

4850.28 Radio Genesis (tent), Huanta, Aug 4, 0030-1130, overnight signal,  
threshold audio from 0100-0200 UT and then again at 1119 UT, just after  
Huanta sunrise, barely able to make out vocal. They appear to be off Aug  
1 to 3, this is the first sign of them I have seen.

4950.062 Radio Madre de Dios (tent), Pt Maldonado, Aug 1, \*1032-1110,  
only threshold audio noted and quickly fading from 1100 UT.

6019.26 Radio Victoria, Lima, Aug 2, 0559-0900, in the clear after  
Sackville QRT at 0559 UT until Australia 0900 s/on, preaching until 0601  
UT, La Voz de la Liberacion ID, Beethoven theme and Radio Victoria ID at  
0602 UT. Long La Voz de la Liberacion promo, children speaking. Good  
strength signal except for occasional slop from massive Cuba 6010 kHz.  
(Brandon Jordan-TN-USA, hcdx Aug 4)

4835.42 Radio Maranon Jaen 1021 UT with om and music under adjacent slop.  
5 August.

4955 Radio Cultural Amauta Huanta 1030 UT Excellent Peruvian vocals, Time check at 32 minutos by om, excellent signal. Enjoyable 7 August.  
(Robert Wilkner-FL-USA, DXplorer Aug 7)

PORTUGAL 1035 R. Club Portugues, Belmonte (Benavente) (+ a few VHF-FM fqs too) has changed its format, and is broadcasting Portuguese & foreign music from the 60s & 70 since approx. mid July. Just yesterday, 30.7.2010 when this tx was off once again, I got the information this current format is only temporary, and it is almost certain it will change a bit (again!), but my contact added it should remain an oldies station nevertheless. Current power level of their 100 kW Thales tx at Belmonte is about 1/3 due to budgetary limitations.

783 ditto, Avanca (Estarreja, near Aveiro), is stuck, probably for good as the vandalism that stroke this unmanned site back in early 2010 - which could have been solved with minor repairs on the copper elements that were stolen - met another break in causing extensive damage to the 100 kW Thales tx. My contact reported the administration is simply unwilling to spend lots of money with it, so it remains silent, and has been silent ever since everything was put in place and tested in order to be finally switched on // to 1035 kHz.  
(Carlos Goncalves-POR, via Ydun Ritz-DEN medium wave info 31.7.2010; via ARC MVEko Olle Alm-SWE Aug 3)

ROMANIA The daily broadcasts on short waves in Romanian language are from 0000, 0100, 0400, 1200, 1300, 1500, 1600, 1700, 1800, 1900 UT - duration 1 hour approx.

Observed 1-7 August: Radio Romania International prgr from 1200 and from 1600 UT; Radio Romania Actualitati prgr from 0400, 1300, 1500 UT, 1700 to 2000 UT;  
Not checked from 0000 and from 0100 UT. Maybe RRI staff are on holidays?  
(Rumen Pankov-BUL, wwdxc BC-DX TopNews Aug 8)

RUSSIA Latest news from Victor Rutkovsky-RUS, 15.7.2010 via Mauno Ritola-FIN:  
594 Vladikavkaz, E. is probably off.  
1053 Radio Rossi, Orenburg is off.  
1296 Irkutsk off.  
1332 Dobrye Pesni, Irkutsk 5 kW is now stable on the frequency.  
(Victor Rutkovsky-RUS, via ARC MVEko Olle Alm-SWE Aug 3)

Test on 13665 kHz, supposedly from Moscow Taldom site noted Tuesday at 0655 to 0658 UT Aug 10.  
Radio Rossii starts much later at 0822 til 1300 UT.  
(wb, wwdxc BC-DX TopNews Aug 10)

17685 As today Aug 10th observed raised propagation in 19 and 16 mb, when Voice of Russia Khabarovsk could be heard here well in central Europe. S=6 at 0700-0800 UT. Not much strong, but strong enough to understand the whole program, next to adjacent CRI Kashi powerhouse in Spanish on 17680 kHz.  
(wb, wwdxc BC-DX TopNews Aug 10)

(wb, SW TXsite Aug 2)

SAUDI ARABIA 15380 the BSKSA BUZZ tx signal is back, but not so intense like in past 5 years. Noted again today Aug 10 at 0720 UT S=9 strength, //

Holy Quran program much more tiny on 17895 kHz towards CIS, CeAS, Siberia, Tatarstan ... scheduled 0600-0900 UT.

(wb, wwdxc BC-DX TopNews Aug 10)

SERBIA 684 / 1008 c.f. BC-DX TopNews #974.

Darueber hinaus wurden auch die Sender Nis Aleksinac 1008 kHz und Belgrade

Zvecka 684 kHz in Serbien beim NATO ride in 1999 zerstört und mangels

Budget bis heute nicht wieder errichtet. UKW Versorgung herrscht auch dort

vor.

The TX power in Serbia is so minimal these days ..

(wb, wwdxc BC-DX TopNews Aug 1)

Die stehen aber beide im WRTH 2010 als aktiv. ?

(Guenter Lorenz-D, A-DX/NET-Radio Aug 1)

684 kHz kann ich als aktiv bestaetigen. 200 kW sind's aber sicher nicht.

Das WRTH listet 30 kW - das scheint mir aber auch noch etwas optimistisch,

auch wenn ab und zu das Signal mal ganz gut ist. Svetomir ist fuer die

Infos im WRTH zustaendig - kannst ja auch mal bei ihm nachfragen:

<mimis @ cuckovic.org>

(Patrick Robic-AUT, wwdxc BC-DX TopNews Aug 2)

Hi Dragan, discussion in Austrian newsgroup A-DX, do you know the power of

Nis 1008 n o w ?, destroyed in NATO bomb ride 1999. Boel says 2 kW low

power.

MW list says Beograd, not Nish.

Or is that used at Belgrade low power site ?

"SRB Belgrade Krnjaca 1008 or 1503, 10 kW in 2005year."

What about 684 kHz formerly Zvecka channel ? We hear nothing here in

Germany,- at least at my place.

684 - Boel list says new Boboviste location - 200 kW - far too much I guess...

- more likely 43 33 44 N 21 38 47 E

23 kilometers north of the destroyed former Aleksinac site, westerly of the E75 highway Autoput. In past 50 years[in my childhood] the super power Continental beast was always heard here in Frankfurt/Main area during daytime in spring/autumn/winter season ... to serve the very many YUG foreign workers here ...

(wb, wwdxc BC-DX TopNews Aug 2)

WRTH says Aleksinac 30 kW, and it sounds more like that.

(Mauno Ritola-FIN, wwdxc BC-DX TopNews Aug 2)

So Mauno, they ex-changed the locations now. 684 is Nis (Aleksinac-Boboviste) area, and 1008 the low power Belgrade Krnjaca site close to nearby Danube strand ?

Patrick on the Austrian border of YUG says, 30 kW at 684 kHz is too optimistic now. Maybe real 10 kW too ?

Distance Stuttgart to Zvecka (2000 kW) was 880 kms, to new Boboviste (10/30 kW) now 1350 kilometers distance ...

- btw. nothing visible in Google Earth yet, dimmly Boboviste village, the Aleksinac and Autoput area shows much better images ...

Prediction: once Serbia will join also EU European Union like Romania previously, they will get bulky budget funds from Brussels (and Thomcast / Transradio-Telefunken TX engineery) to erect powerful telecommunications gear then, {but not on former - totally destroyed - Stubline & Zvecka, or Aleksinac sites anymore}.

(wb, wwdxc BC-DX TopNews Aug 2)

Serbian Radio Belgrade - AM. Dear friends, last night I got your e-mails. Lot of disinformation and confusions. If you have questions, please ask me! I will give you last info regarding TX you mentioned in your respective mails.

Radio Beograd 1 on 684 kHz is located in village Boboviste couple of kilometers west from Aleksinac. Recent power is 10 kW. Somebody was right!

Radio Beograd 2 is located on outskirts of Belgrade at Krnjaca. Power is 0.5 kW.

That will be all. Please send a message with questions.

Yours, Svetomir Cuckovic Stari Banovci / Serbia.

(Svetomir Cuckovic-SRB, wwdxc BC-DX TopNews Aug 2)

SERBIA Beograd 1 on 1296 kHz at 1748 UT. Folklore and IDs "Prvi program Radio Beograda". 33333.

(Patrick Robic-AUT, A-DX Aug 7)

SOLOMON ISL 5019.9 SIBC 1010 UT some audio with Radio Rebelde in remission. 7 August.

(Robert Wilkner-FL-USA, DXplorer Aug 7)

SOUTH AFRICA Bahrain 6010, VoA spurs. Aug 4th 1910 noted spurs of VOA African service in English on around 6324 and 6340 kHz. FM like signal with traces of wobbling carrier. Checking around, noted similar but strong spur on about 5811 kHz, weaker one around 5836 kHz. Noted similar spur already on Aug 1st around 6318 kHz. Programming was // to 4930 and 4940 kHz. Just wonder where these spurs come from.

(Jari Savolainen-FIN, DXplorer Aug 5)

Re: Bahrain 6010, VoA spurs, Symmetrical could only be fundamental 6080 from Meyerton ?

WRTH spring update:

1800-1900 daily Af 9850bot  
1830-2030 daily Af 6080mey <<<<<<<<<<<<<<<<<<<<<  
1830-2100 daily SAf 909bot, 4930bot  
1900-1930 daily Af 9850sao, 17895ira  
1900-2000 daily ME 9630udo  
1900-2000 daily ME,SAs 7485ira  
1900-2030 daily Af 4940sao

6080 1830-2030 46,47,52,53 MEY 100kW 335degr AFS IBB  
(wb, wwdxc BC-DX TopNews Aug 5)

Hi Wolfy. You're right. Aug 8th I checked at 1844 UT and two rather strong spurs 5850 and 6310 kHz. So, the origin must be Meyerton transmitter on 6080 kHz.

(Jari Savolainen-FIN, DXplorer Aug 8)

SPAIN 900 COPE Alta Extremadura, Plasencia (relay). Probably 5 kW.

Apparently so far with no official permit.

1224 COPE Almeria, Padre Luque 11, 04001 Almeria, new address.

1224 COPE Lleida, Academia 14, 25002 Lleida, new address.

1575 SER Radio Pamplona, postal address: Apartado de Correos 71, ES-31080 Pamplona (Navarra).

(Play-DX via Christer Brunstroem-SWE;  
ARC MVEko Olle Alm-SWE Aug 3)

SURINAM 4989.984 Radio Apintie, Paramaribo, Aug 1, 0600-1000, occasional peaks with pop music, talk my man, woman. Minor but steady peak just after 0936 UT sunrise in Paramaribo with monologue by man in likely Dutch, religious vocals. Occasional QRM from Spanish chatter, perhaps Pescadores, on 4991.4 USB.

(Brandon Jordan-TN-USA, hcdx Aug 4)

SWAZILAND 4774.996 Trans World Radio, Aug 1, 0430, German service until 0500 UT, then English, religious programming. Good signal until 0510 UT, audio faded out by 0530 UT.

+ Aug 2, \*0341, IS, English ID into vernacular, German at 0400 UT, English

at 0430 UT. Leading the Way with Dr. Michael Youssef. Fair signal, better on Aug 1.

(Brandon Jordan-TN-USA, hcdx Aug 4)

4774.995 TWR, at 0420 UT on July 30, German language religious program, English at 0430 UT, ID, more religion, fair. Weaker on // 3200.0 kHz, strong het from WWCR spur on 3199.5v kHz.

(Brandon Jordan-TN-USA, bcdx via dxld Aug 4)

SWEDEN New radio and TV law in Sweden. On 15th July the Swedish parliament took a decision that the current radio and TV law is to be replaced by a new law with the same name.

The decision also means that the The Swedish Radio and TV Authority and the Swedish Broadcasting Commission will be replaced by a new authority for radio and TV from 1st August.

RAMADAN 1431

Is about to start; see TURKEY. And:

THE ASTRONOMICAL CALCULATIONS AND RAMADAN: A FIQHI DISCOURSE.

This book shatters the myth that naked-eye sighting of the new moon and completing 30 days in the case of weather-related or other obscurities are the only two valid methods of determining the month of Ramadan. The author explains that certainty, not actual sighting, is the real objective of the Shari'ah and that the Qur'an does not mandate physical sighting.

A careful analysis shows that those hadiths that seemingly require sighting actually require certainty. The assertion that all Muslim scholars prohibit the use of astronomical calculations, both in affirming or negating the month of Ramadan, is not correct. As calculation is now more accurate than naked-eye sighting, due to certain astronomical and scientific advancements, the use of calculation is the closest to the real objective of the Shari'ah and to the spirit of the hadiths.

(via gh, dxld Aug 9)

UKRAINE 11620 Radio Ukraine International, at 0740 UT, En, 05.08.2010.

Mit O=4 auf 11620 kHz, aber auch mit Nebenausstrahlungen auf {spurs} 11555 und 11685 kHz.

(Herbert Meixner-AUT, A-DX Aug 6)

UNIDENTIFIED 7219.981 at 0535 UT on July 30, weak to moderate carrier, no audio. I suspect this is reported Radio Centrafrique.  
(Brandon Jordan-TN-USA, bcdx via dxld Aug 4)

UNIDENTIFIED 6739USB 09 Aug, 1700 UTC, military station. Woman in English reading phonetic alphabet with numbers and occasionally saying "stand by." Definite US accent, and this is a known US military frequency. No IDs whatsoever.

6979 09 Aug, 1630 UTC, UNID, Woman with mellow announcing over subcontinental chanting/singing. Not sure of language. Didn't sound like Arabic or Farsi, but heard "Iran" mentioned several times. Not // to any Iranian MW outlet, and the transmitter kept faulting off. Station would come back at lower power, and gradually increase its power until it faulted off again.

Checked all possible harmonics that were close in frequency such as 1161 and 1395, but nothing there that matched. Put two 15dB attenuators in line to make sure it was not a mixing product in my gear, but it was still there and appropriately reduced.

At 1643 UT, two distinct separate programs could be heard on the same audio, so possibly some sort of mixing product at the transmitter(s) or an audio issue. Not // to the BBG local powerhouse on 1296 kHz either, so not a spur from there apparently. 1395 kHz does have an Indian 20 kW station on it in Bikaner. Did anyone else come across this? Poor to good signals depending on what stage of power the transmitter was at before faulting off.

(Albert Muick-AFG, hcdx Aug 9)

UAE 1269 03 Aug, 2258 UTC, UAE, Radio Asia with Malay and Indian slow ballads and occasional ID. Good signals, minimal QRM. Normal summer QRN and occasional deep fades. Second logging of these guys. Now if I can just get them to QSL!

(Albert Muick-AFG, hcdx Aug 10)

U.K. 765 BBC Essex now using toh ID as "Broadcasting live from the birthplace of radio, BBC Essex" (referring of course to 2MT from Marconi, Writtle, Chelmsford).

(Steve Whitt-UK, MWCircle 25.7.2010, via ARC MVEko Olle Alm-SWE Aug 3)

Last minute information: 567 Radio Albatross (a pirate from Suffolk) heard with relays of Radio Caroline in Belgium and UK.

(MWCircle 27.6.2010; ARC MVEko Olle Alm-SWE Aug 3)

BROADCASTING BOARD OF GOVERNORS

INTERNATIONAL BROADCASTING OPERATIONS

Appropriations, 2010 \$733,788,000  
Budget estimate, 2011 755,143,000  
Committee recommendation 743,925,000

The Committee recommends \$743,925,000 for International Broadcasting Operations, which is \$11,218,000 below the request, for the operating and engineering costs of VOA, OCB, RFE/RL, RFA, MBN, and the BBG.

Funds are allocated in the following table and subject to the requirements of section 7019 of this act:

INTERNATIONAL BROADCASTING OPERATIONS

[Budget authority in thousands of dollars]

Program

(1) Fiscal year 2011 request  
(2) Committee recommendation  
(3) Change from request

	(1)	(2)	(3)
International Broadcasting Bureau:			
Voice of America	206,776	205,594	-1,182
Broadcasting to Cuba	29,179	28,789	-390
Engineering and Technical Services	190,724	187,229	-3,425
Agency Direction	28,290	28,290	
IBB Management and Support	48,751	47,172	-1,579
Subtotal, IBB	503,720	497,144	-6,576
Independent Grantee Organizations:			
Radio Free Europe/Radio Liberty	95,557	94,488	-1,069
Radio Free Asia	38,404	37,679	-725
Middle East Broadcasting Networks	117,462	114,614	-2,848
Subtotal, Grantees	251,423	246,781	-4,642
Total, International Broadcasting Operations	755,143	743,925	-11,218

Afghanistan and Pakistan. The Committee recommends up to \$24,815,000 for Pashto and Dari broadcasts targeted toward Afghanistan and northwest Pakistan.

Broadcast Transmission and Distribution. The Committee does not support closing the Greenville Transmitting Station in North Carolina, or the request for expanded FM (including six additional FMs for Radio Sawa), digital, and new media efforts.

While the Committee does support the BBG's efforts to expand into new technologies, the Committee is concerned that closing Greenville may be

premature given the continued viability of shortwave in Africa, the use of shortwave for broadcasts to Cuba and Latin America, including surge broadcasts to Haiti, as well as Greenville's capacity to provide contingency and backup capabilities to the BBG network worldwide.

The Committee recommends \$650,000 within Engineering and Technical Services to support the upgrade of the Network Control Center.

Internet Programs. The Committee recognizes the BBG's efforts to expand access to information and communications tools such as collaborative media and social networking to Internet users worldwide, including in closed societies subject to monitoring and censorship, and encourages the BBG to evaluate emerging online broadcasting and communication methods to reach these audiences. The Committee provides \$1,000,000 to support expanded Internet anti-censorship efforts, in addition to funds otherwise made available for such purposes.

North Korea. The Committee recommends not less than \$8,000,000 for broadcasting into North Korea through RFA Korea Service and VOA Korea Service, which is equal to the fiscal year 2010 level.

Tibet. The Committee recommends sufficient funding to continue RFA and VOA Tibetan language services.

Cuba - The Committee notes that the joint statement accompanying Public Law 111-117 directed the BBG to submit to the Committees on Appropriations within 90 days of enactment of that act a multi-year strategic plan for broadcasting to Cuba to include an analysis of options for disseminating news and information to Cuba and a report on the cost effectiveness of each, and an analysis of the program efficiencies and effectiveness that can be achieved through shared resources and cost-saving opportunities between Radio and TV Marti and the Voice of America. The Committee has not received this report and does not support closing the Greenville Station, expanding TV Marti's transmission on DirecTV, or the request included under the Broadcasting Capital Improvements heading to expand and renovate the TV Marti studio until a strategy is submitted to the Committee, and the Comptroller General has conducted an assessment of the strategic plan.

Middle East Broadcasting Networks - The Committee provides \$114,614,000 for the Middle East Broadcasting Networks, \$2,848,000 below the request. The Committee is concerned with the steadily increasing costs of MBN operations and the sustainability of this program.

ZAMBIA 4965 CVC Christian Voice, Lusaka - Kaeni Ranch, 0430-0601\*, Aug 1, English pop Christian music inter-spaced with inspirational talk, nice peak in the 30 minute period after 0431 UT sunrise in Lusaka. Confirmed transmitter left the air at 0601 UT even though signal had faded to nothing more than a weak carrier.

(Brandon Jordan-TN-USA, hcdx Aug 4)

#####

OHR - CYPRUS + IRAN + TURKEY

Almost three different Over the Horizon radar signals noted on Aug 9th at 1000-1030 UT slot in //.

Most probably British airforce radar noted on 14517 to 14542 kHz at 1005 and 1030 UT.

Others from these ME countries like 14600 to 14622 and 14579 to 14583 kHz at 1010 UT, and a third one on 14888-14911 kHz S=8-9 signal at 1018 UT.

And also OHR on Aug 10 0703-0710 UT:  
14521-14541, 14689-14709, and 14988-15010 kHz, latter also covered across the 15 MHz time & normal frequency channels...

BRAZIL 5055 Critica or Difusora solved out ...

Hi, there are some doubts in our DX community whether I really heard Radio  
A Critica FM (Manaus, Brazil) on 5055 kHz. Some others report Radio  
Difusora.

I have a recording now uploaded here:

<<http://www.box.net/shared/a9vncjcdbl>>

You can hear the ID at seconds :05 and :38

At a second :05 there is a jingle (slowly spoken whispering) "A Critica  
eFe eMe". At a second :38 there is an ID and slogan: "A Critica FM - Uma  
radio feita para voce". This slogan is a part of their logo too:

<<http://www.acriticafm.com.br/>> Date and time of the recording: Aug 3,  
2010 - 0500 UTC. Date and time is also a part of the MP3 file name.  
(Karel Honzik-CZE, hcdx Aug 3)

Congratulations Karel Honzik-CZE. The station is really what you heard,  
the record is clear. Excellent DX and excellent recording.  
(Jorge Freitas, Feira de Santana Bahia, Brasil, hcdx Aug 13)

CHINA Firedrake August 14:

15795, a somewhat confusing situation here: AIR's Chinese service is 1145-1315 via Bengaluru, and the ChiCom must jam it, as noted many times before. Aug 14 at 1225 UT, Chinese music and talk, nothing Indian about it, but not // CNR1 jamming frequencies. 1230 UT 2-pip timesignal, on the half-hour, so does that point to India? But then CNR-type emphatic talk, with echo, so using some program other than CNR1? By 1245 UT, now I can tell 15795 kHz is // 11785 CNR1 jamming an echo apart, but 15795 kHz has become much weaker.

(Glenn Hauser-OK-USA, dxld Aug 14)

6060 7225 PBS Sichuan 2 program, lovely reassuring music with guitar and gamelan like parts at 2155 til 2230 UT Aug 15. Both S=7-8 fair signals.

GERMANY 6189.993 [Germany (EAST-sic)] Deutschlandfunk Aug 9 at 2357 UT, Music, News in German, ID at 0004 UT.  
(Ralph Brandi-NJ-USA, DXplorer Aug 16)

Sorry Ralph, small error: "<East> Germany".

If you like to count this silly - I guess? - NASWA list - behaviour ...  
I'll count the California and Texas/Arizona QSLs  
under Northern Mexico soon, or even Mohave-Apache Indian Community,  
ha, ha :-)

Berlin Britz suburb site was  
from June 1st, 1945 til 3 Oct 1990 US American sector of all-Berlin capital.  
{rather called West-Berlin as vernacular sound ...}

see blue coloured map on  
<[http://en.wikipedia.org/wiki/West\\_Berlin](http://en.wikipedia.org/wiki/West_Berlin)>

Exclave status from about May 1949 to reunification of both Germanys  
on 3 October 1990.

6190 kHz 17 kilowatt DLF unit at Britz site was formerly erected by USIA branch "RIAS Berlin" radio station on 7 August 1951 - always on 6005 kHz in 49mb under "West-Berlin" in NASWA list counting.

Meant for RIAS Berlin and VOA Washington program relays into East Germany (GDR - formerly Soviet Zone of Germany) and German nationals in Poland, Baltics, CSSR, Hungary and South Tyrol-Italy too.

Location of former RIAS/VOA 6005 / now 6190 antenna visible next to small building at

52 26 50.57 N 13 25 49.93 E

see green arrow at

<[http://maps.google.de/maps?f=q&source=s\\_q&hl=de&geocode=&q=52+26+50.57+N++13+25+49.93+E&sll=51.151786,10.415039&sspn=19.197937,57.084961&ie=UTF8&ll=52.447405,13.430529&spn=0.001136,0.003484&t=h&z=19](http://maps.google.de/maps?f=q&source=s_q&hl=de&geocode=&q=52+26+50.57+N++13+25+49.93+E&sll=51.151786,10.415039&sspn=19.197937,57.084961&ie=UTF8&ll=52.447405,13.430529&spn=0.001136,0.003484&t=h&z=19)>

Protected and well-tended like a jewel when tender and loving care by Britz engineers long term.

73 wolfgang df5sx - - -

See under "Kurzwellen-Faltdipol"

6190 kHz - Well, look here:

<<http://www.senderfotos-bb.de/britz.htm>>

The line "Kurzwellen-Faltdipol" shows the 6190 kHz facility. The shabby shack is the transmitter building, a provisional one from the earliest RIAS days. If I recall correct (it's 15 years since I was there) the vertically mounted fluorescent lamp behind one of the windows is in the very room of the shortwave transmitter. Otherwise there is only an ancient FM transmitter in this shack, if I recall correct.

The other transmitters are in what the webpage calls "Hauptgebäude". The antenna of the broken S4001 transmitter is the one labelled as "Kurzwellen-Antenne noerdl. des Hauptgebäudes". I understand that each antenna is "hard-wired" to the related antenna, i.e. a swap is not possible. Originally cover has been provided by the complete 20 kW transmitter/antenna combination. When the separate 6190 kHz service started in 1999 the concept changed in as far as transmission breaks during maintenance or equipment failures are just accepted now.

"Teil des demontierten Kreuzdipols" was a vertical incidence antenna with circular polarization for nighttime service on 990 kHz, now dismantled. At some point in the nineties further use of this antenna has been banned, because it produced too high fieldstrengths in the neighbourhood of the station. Since then mediumwave transmissions are limited to the two guyed masts, one of them carrying the 89.6 MHz antenna, too (the second RIAS FM frequency, 94.3 MHz, has meanwhile been moved to the TV tower).

And a word about the transmitters: The remaining shortwave transmitter, the one in the shack, is rated at 20 kW and has been delivered by Telefunken in 1950, it is by far the oldest broadcasting transmitter in everyday use in Germany (and perhaps well beyond).

The newer shortwave transmitter is or was an S4001, different from the

ones used by Media Broadcast in as far as it got no SSB capability and has not been equipped for automated fast tuning. This transmitter suffered a failure of the transformer that produced the plate current in 2007, no such transformer was in the Juelich spare sparts stock due to the design variants (at least I understand this has indeed been checked) and a replacement would cost about 100,000 Euro, an amount nobody was willing to invest into the DX hobby (that's pretty much the reality now).

The mediumwave equipment consisted 15 years ago of a 100 kW solid-state Nautel for 855 kHz, an S4003 (300 kW mediumwave version of the PANTEL series PDM transmitters, housings similar to the S4005 shortwave transmitter; this one was the first PANTEL ever delivered) for 990 kHz and an S4002 (PANTEL 100 kW mediumwave, looks like its shortwave brother S4001) as aux. Nowadays two Transradio TRAM transmitters are used as mains.

And meanwhile word has it that in the last days there were some power supply problems with the 6190 kHz facility, but some necessary repairs have been done and now the old tranny should again happily churn away. (Kai Ludwig-D, SW TXsite July 6, 2010)

GERMANY/UAE 13730 R. Dabanga via Dhabbaya on Aug 04 at 0513-0522 UT. 25232-25332 Arabic, Talk, IS and SJ at 0517 UT. (Kouji Hashimoto-JPN, JPNpremium Aug 13)

13730 R Dabanga // 11500 kHz talks in a Sudanese Vm language at 1700+ UT, but there is a 1.5 sec difference between both. 13730 kHz has a carrier QRM. Both are good.

ICELAND 189 Longwave radio mast Hellissandur, Iceland. A Facebook page has just been opened, search "Longwave radio mast Hellissandur".

"The Longwave radio mast Hellissandur is a 412 metre high guyed radio mast for longwave transmissions at Gufuskalar in the vicinity of Hellissandur on the peninsula Snæfellsnes of Iceland. This mast, which is the tallest structure in Western Europe, is insulated against ground and guyed in 5 levels by steel ropes, which are subdivided by insulators. It was built in 1963 as replacement for a 190.5 metre (625ft) tall LORAN-C tower, which was built in 1959, for the North Atlantic LORAN-C chain (GRD 7970). After the LORAN-C scheme was shut down on December 31st, 1994 the longwave radio mast Hellissandur was converted to an aerial mast for a longwave broadcasting transmitter of the Broadcasting Service of Iceland, for a transmission frequency of 189 kHz and a power of 300 kilowatts."

INDIA 4760 R Kashmir, Leh. About 80 people are killed and over 300 injured in late night flash floods due to cloud burst near Leh town. Death toll is likely to go up. Buildings of district hospital Leh and R Kashmir

have been completely damaged due to mud slides. More details in:

<<http://malayalams.com/News/80-killed-as-massive-cloudburst-triggers-flash-floods-in-leh-hindustan-times/>>

R Kashmir, Leh operates on SW with 10 kW as follows: 4760 Summer 0130/Winter 0213-0400/0413 /Sun 0430 1130-1700. On 6000, 0700(Sun 0630)-0930. Also 1053 MW with 20 kW and 102.9 MHz with 100 Watts. See its QSL at:

<[http://www.qsl.net/vu2jos/qsls/AIR\\_Leh.jpg](http://www.qsl.net/vu2jos/qsls/AIR_Leh.jpg)>  
(Jose Jacob-IND, dswci DXW Aug 11)

I contacted ex-official of AIR Leh Aug 07 who was in touch with the station yesterday:

- Fortunately, no casualties among AIR staff.
- Rain water and mud slushes entered inside the transmitter hall causing damage.
- There is no power supply in that area.
- Doordarshan is carrying extensive footage of AIR Leh.
- He indicated no damage to the AIR towers however one press report says Doordarshan tower has been damaged.

Excerpt from today's Hindustan Times, report titled "Leh turns ghost town":  
Just few meters ahead of the bus stand is the All India Radio building.

Water has gushed through, sweeping furniture and equipment helter skelter, and a dish on top the building is contorted beyond recognition - from the impact of a truck that was swept against it. Full report at:

<<http://www.hindustantimes.com/Leh-turns-ghost-town/H1-Article1-583714.aspx>>

(Lucio Otavio Bobrowiec-BRA, dxld Aug 12/13)

Answering my own question, Srinagar is on extended schedule for Ramzan (Ramadan) as in dxld. (Glenn)

As usual Radio Kashmir, Srinagar was noted today morning (11 Aug UTC / 12 Aug IST) with the special broadcast for Ramzan as follows in Kashmiri(?) consisting of tuning signal, sign on announcemnets, Koran chanting, prayers, songs, talks and advertisements.

4950 kHz 2215-2256 UT (3.45 am to 4.26 am IST) 444  
parallel to MW 1116 kHz which was very faint with co channel interference.

These special broadcasts will continue for one month till Ramzan festival around 10th Sept, 2010. However timings will vary slightly from day to

day.

(Jose Jacob-IND VU2JOS, dx\_india yg via dxld Aug 16)

4950 Radio Kashmir, Srinagar has decided to broadcast two news bulletins daily in the morning and evening for people of Ladakh region as transmissions of Radio Kashmir, Leh, has been disrupted due to cloud burst. More details in

(Lucio Otavio Bobrowiec-BRA, JPNpremium Aug 13)

LIBYA Ob da im Hintergrund in Tripolis eine Auseinandersetzung zwischen zwei Entscheidern ueber den Umfang der LJBC Schedule stattfand, kann man nur vermuten.

Von Ende Maerz bis 10. Juli wurde nach der A-10 LJBC Schedule mit 8 Stunden Sendezeit gewirkt. In den vergangenen 4 Wochen 11. Juli bis 5. August wurde dann mit einem anderen ausgedehnten 18 Stunden taeglich 0400-2200 UTC Sendeplan gearbeitet. Dies war aber nur ein Testbetrieb fuer die neue Sendeperiode B-10 ab 31. Oktober.

Ueberraschend sendet LJBC seit circa Montag wieder nach dem alten jahrelangen A-09/A-10 Sendeplan. Die ersten Beobachtungen wurden dann auch in den ng berichtet.

Aus Nordafrika gibt es immer wieder Ueberraschungen. Heute morgen im Ramadan hoerte ich RTT Tunis nur auf einer Kurzwellen-Frequenz.

In B-10 wird LJBC Voice of Africa dann nach einem neuen 18 Stundenplan mit Winterfrequenzen senden, gleichermassen wie im Juli schon mal getestet.  
vy73 wb

Und hier ist die alte / neue aktuelle A-10 File der LJBC Voice of Africa, Tripolis, ein Beitrag von Ivo aus Bulgarien.

Nicht so exakt nehmen, so an die 13-15 Minuten kann die Umschaltung der Frequenzen schon dauern ...

And very late change from 15215 kHz to 11600 kHz in Hausa, Aug 11.

15215 TX off at 19.12:44 UTC, S=9+15dB. 180degr

11600 TX on at 19.14:44 UTC, S=9+10dB. 180degr

11995 kHz 230degr, 17-19 UT French, 19-20 UT Hausa S=7 to 8.

(wb, wwdxc BC-DX TopNews Aug 11)

LJBC Voice of Africa heard on Aug 11/12 on old A-10/A-09 schedule:

#### Swahili

1200-1357 on 17725 SAB 500 kW / 180 deg to NEAf  
[Aug 13 S=8-9 signal]  
1200-1357 on 21695 SAB 500 kW / 130 deg to ECAf  
[Aug 13 weak S=4 signal]

#### English

1400-1557 on 17725 SAB 500 kW / 180 deg to NEAf  
1400-1557 on 21695 SAB 500 kW / 130 deg to ECAf

#### French

1600-1657 on 15660 SAB 500 kW / 230 deg to WNAf  
1600-1657 on 17725 SAB 500 kW / 180 deg to NEAf  
1700-1757 on 11995 SAB 500 kW / 230 deg to WNAf  
1700-1757 on 15215 SAB 500 kW / 180 deg to NEAf

#### Hausa

1800-1857 on 11995 SAB 500 kW / 230 deg to WNAf  
1800-1857 on 15215 SAB 500 kW / 180 deg to NEAf  
1900-1957 on 11600 SAB 500 kW / 180 deg to NEAf  
1900-1957 on 11995 SAB 500 kW / 230 deg to WNAf

Note: Start & end of transmissions varies between 3-5 minutes minimum.

MYANMAR Google Earth imagery. Some high resolution place.

New (Jan 2010) GE imagery over Yangoon - Yegu SW/MW site, somewhat clearer over many past images.

New GE imagery is now available of the new Myanmar capital: Naypyidaw.

Has the DX community located the new speculated MW/SW site in

Naypyidaw[Nay Pyi] on GE? GE Imagery is dated March 2010.

(Ian Baxter-AUS, SW TXsite Aug 13)

I look at the MOST WANTED TX locations every week. Like IBB Kuwait, or RTA new Harris 531 Ain Beida site, MRC Nador LW/SW reshuffling, Laos km49 MW, Son Tay-VTN shortwave site, NNN Nanning-CHN site etc.

I note n o t much difference against to images of past half year, at Rangoon and BRM Taunggyi images, at least on the server here in Germany.

Rangoon has better image resolution at least the MW masts on 22 Nov 2005.

Few SW lower masts visible very well on 02 Febr 2006 image.  
Baseplates seen on 8 Dec 2007.

83 meters respectively 90 meters distance, at 355 / 175 degrees, like 49 and 60 mb dipols.

2 SW masts at 16 51 47.54 N 96 09 42.84 E  
on the left side of the lower MW mast.

4 mast 60mb fountain like antenna, SW 5040 kHz Rangoon  
at 16 51 53.09 N 96 09 49.91 E  
{like Cuba 5025/5040 kHz type in Quivican-CUB.]

60 mb antenna visible 18 Dec 2006, and 8 Dec 2007 latest,  
!!! but disappeared in favour of a tall (southern) MW mast  
on 30 Jan 2010 image.

Suppose 5040 kHz masts moved to new Nay Pyi TX site in 2008 ... 2009y ?

4 masts with 3 SW dipol antennas at  
62 meters wide distance at 355 / 175 degrees  
like 41 mb

16 52 03.55 N 96 09 37.90 E  
16 52 03.81 N 96 09 39.95 E

50 and 61 meters distance wide  
000/180 and 005/185 degrees  
like 31 and 41 mb

16 52 03.81 N 96 09 39.95 E  
16 52 03.84 N 96 09 41.65 E  
16 52 03.76 N 96 09 43.67 E

New antennas, of 30 Jan 2010

2mast and new feeder line

45 m distance wide, at 355 / 175 degrees

25 or 31 mb  
16 51 57.24 N 96 09 41.78 E  
16 51 57.30 N 96 09 43.28 E

baseplates visible at best on 22 Febr 2007

2 new twice-mast antennas  
{8 masts - like China design at Kashi - }  
and new feeder line at  
88 m distance wide at 355 / 175 degrees  
49 mb

16 51 59.90 N 96 09 46.22 E  
16 52 00.28 N 96 09 49.19 E

137 m distance wide at 355 / 175 degrees

60 or 75 mb  
16 52 00.05 N 96 09 49.89 E  
16 52 00.60 N 96 09 54.48 E

and two tall MW masts  
the older one  
16 52 06.17 N 96 09 34.96 E

and the newer MW tall mast at  
16 51 46.47 N 96 09 49.69 E

But new Naypyidaw capital area has new 2010 G.E. images to visit.  
(wb, wwdxc BC-DX TopNews Aug 13)

NIGERIA 7255 Voice of Nigeria (tent); at 2246-2257:17\* UT on 4 Aug;  
Afro-chant to 2248 UT. Man unknown language commentary; 2253-55 UT D.A.  
[dead air]; back with more talk just at end of music; both talk segments  
had many mentions of Nigeria, Ghana & Senegal. Brief announcement at

(wb, wwdxc BC-DX TopNews Aug 13)

Als ich heute Nachmittag Olle Alm in Schweden die Footprint URL von Nils avisierte, schickte er mir noch diese Meldung:

"I am still not hearing Arkhangelsk 6160 kHz during the day, only in the late evening. This keeps puzzling me, since I used to hear them all day.  
(Olle Alm-SWE, wwdxc BC-DX TopNews Aug 14)"

Arkhangelsk 6160 kHz. Google Earth imagery. Some high resolution place. Today R. Rossii is heard on 6160 kHz at least at 0900 UT with good signal. Wolfy, are you sure about Arkhangelsk SW location? I thought it was in Koskovo co-sited with MW. I see some masts at 64 21 18 N 41 23 55 E.  
(Mauno Ritola-FIN, wwdxc BC-DX TopNews Aug 15)

Waren die Abschaltungen zu Fruehjahrenbeginn jemals mehr als ein Geruecht?  
Im April/Mai war 5930 kHz in Spitzbergen jedenfalls hervorragend zu hoeren, und auch die 6160 kHz aus Arkhangelsk, mitten am Polartag.

Z.B.: 30. April 2010, 2019 UTC, Radio Rossii gehoert in Longyearbyen - Svalbard: 5930 Murmansk: SINPO 54333, 6160 Arkhangelsk: 55333.  
(Eike Bierwirth-Spitzbergen, Apr/Mai 2010; wwdxc BC-DX TopNews Aug 15)

Archangelsk Koskovo site. From 60ties WRTH til 1993 on 5015 kHz Shortwave, from WRTH 1994 on 6160 kHz.

64 21 18 N 41 23 55 E Yes Mauno, you are right, two antennas of '101' type next to the two tall MW masts at Koskovo site.

That's the 6160 kHz antenna site.

- a) 64 21 18 N 41 23 55 E contain 3 masts, i.e. 2 dipols, 100m and 55m distance wide, 155 / 335 degrees direction 49mb and 25 mb antennas ?
- b) also at 64 21 54.65 N 41 23 07.86 E another single dipol one 100m distance wide, at 50 / 230 degrees direction. 49 mb antenna.

Da gabe doch in diesem Halbjahr eine Meldung, dass die verbliebenen Radio Rossii Aussendungen auf Kurzwelle ihre Leistung wegen Budgetproblem reduzieren sollen/muessen.  
(wb, wwdxc BC-DX TopNews Aug 15)

RUSSIA Intermodulation Krasnodar Armavir 7009 / 4831 kHz.  
Yesterday Aug 5th with strong signal in the village on 4831 kHz was:

1930-2000 Voice of Russia World Service in Russian // 7310, 1089, etc.

2000-2100 Voice of Russia Evangelic Readings in Ru // only!! on 1089 kHz,

VOR ER is using 2000-2100 UT 1089 Krasnodar and 612 Moscow acc to their announcement.

1089 kHz from Krasnodar heard on // 4831 kHz - usage:

1500-2000 VOR WS; 2000-2100 VOR ER, both services are in Russian.  
Registered with 1200 kW.

Which formula for 4831 kHz ?

{4831 + 1089 = 5920 kHz 2000-2200 UT to zone 37 200kW 280degr, wb.}  
(Rumen Pankov-BUL, wwdxc BC-DX TopNews Aug 7/8)

Hallo Wolfgang ! - Wolfgang Bueschel schrieb:

Der Nachweis der Intermodulation mit einem 1089 kHz Vergleich laesst sich wohl nur auf dem Balkan oder am Mittelmeer fuehren, weit weg vom U.K. 1089 Sender.

Dann meldet sich der Balkan halt mal zu Wort ;-)

Ich kann bestaetigen, dass das Signal jetzt kurz nach 2000 UTC auf 1089 kHz // zu 7009 kHz und 4831 kHz ist.  
(Patrick Robic-AUT, A-DX Aug 13)

SAINT HELENA Hello Listeners to Radio St. Helena, Gary Walters has just informed me that all the rest of the 266 QSL-cards for Radio St. Helena Day 2009 have been put aboard the Royal Mail Ship RMS St. Helena on 05. August and are now on the way to Ascension Island. From there, the QSL's go by air to England to be put into the international air mail service for distribution to SWL's around the world.

With best 73 to everyone, Gary Walters, Station Manager, Radio St. Helena.  
(via Robert Kipp-D, dxld Aug 5)

Gary Walters is trying to change the date for Radio St. Helena Day ("RSD") 2010 to either the 9th or the 16th of October. He is not sure about that yet, as Derek plans to go on holiday away from the island in October, but we do not know exactly when, and Derek is responsible for operating the shortwave station.

Broadcasting to Eastern North America: how about 2300-0030?

We have to consider that the good folks at Radio St. Helena will all be working a lot of overtime, just for fun, for our enjoyment, and for free during the evening of RSD 2010. That may involve up to 6 or 7 or 8 hours of overtime, depending on who we are talking about. The past has shown that they really do not want to stretch RSD to beyond 0030, if at all possible. I can see their point in that.

I have been working with the software VOAProp and W6ELProp to try to find the best times to broadcast to your region. Does NASWA have an "expert" for this propagation software?? If so, I would really appreciate him/her contacting me, so that we can share experience with the software.  
(Robert Kipp-D, August NASWA Journal via dxld Aug 12)

Radio St. Helena Day 2010: Date, Times, and Targets.  
RSD 2010 - will be on - Saturday, 9th October 2010

Target Region Times (UT) Beam Heading

EUROPE 1900-2030 UT 10 degrees  
INDIA 2030-2130 UT 70 degrees  
JAPAN 2130-2300 UT 50 degrees  
North America 2300-0030 UT 310 degrees

Gary Walters, Station Manager of Radio St. Helena, has just confirmed the above information, and, as usual, Derek Richards will operate the RSD shortwave transmitting facility.

There will be a special email-address exclusively for the evening of RSD 2010. As soon as Gary sets up this special email account, we will publish the account name.

The RSD 2010 QSL cards are being sponsored by the Danish ShortWave Club International. Reception reports for RSD 2010 should be sent with sufficient return postage to RSH using the special Airmail address - via Ascension and the United Kingdom - exactly the same procedure as for the RSD 2009 reception reports. ALL mail to RSH should use this procedure.

ALL 266 QSLs for RSD 2009 have been mailed and should now be arriving around the world.

The sunspot minimum between sunspot cycles 23 and 24 is the longest in history - much to the dismay of shortwave listeners everywhere. This minimum has lasted since 2007 and is still ongoing. There are not very many sunspots to "help" propagation, and there is no real sign of significant change. The UTC-times for broadcasting to the various target area have been very carefully selected to <try> to have the very best chance of good reception in each area. Also, we need to have the RSD broadcasts one after the other. After RSD 2009, it was decided to change the times somewhat and to move RSD from November to October (as was the case back in the late 1990's - Thanks, John). RSH hopes that everyone around the world has excellent reception conditions during RSD 2010 and is looking forward to your emails and also, if possible, to your telephone calls.

With very best 73, Gary Walters, Station Manager of Radio St. Helena  
(via Robert Kipp-D, dxld Aug 15)

R. St. Helena QSL. Many St.H. QSL cards arrived these days worldwide.

QSL finally received today for the disappointing Nov 14, 2009 Radio St. Helena Day broadcast. The card is similar to the 2008 design (showing ZD7RSD callsign) but with update for 2009 and a different thumbnail photos at the bottom right. With my report I sent an mp3 clip of the s/on and first 5 minutes of programming before it all went downhill. V/s G.G. Walters, card #163. Card is dated July 22nd and dispatched from St. Helena on August 3rd. Let's hope the upcoming Oct 9 RSH Day program is a success! (John Herkimer-NY-USA, DXplorer Aug 16)

SEYCHELLES I also received a nice QSL email from Jean-Paul Gamatis, Chief Engineer of the Seychelles Broadcasting Corporation, 1368 kHz after 114 days(!) for a paper report and US \$5.00. He also stated that they do not have QSL cards anymore since they rarely get such requests, but would see if they can get some made and send me one. I had replied that a f/d card made from a nice postcard would be fine, and he and I were chatting

about broadcast engineering. He told me they are going to be doing some work on their main mediumwave antenna soon which they hope will improve the signal.

In a follow up email, we were discussing ground conductivity here in Afghanistan and the merits of a 120/50 radial system. He also asked if I knew anyone who was using a CFA MF antenna system. I have written back to determine if they are looking to go to that system, or are using it now, but no answer as of yet. His email is <jeanpaul.gamatis @ sbc.sc> (Al Muick-AFG, dxld Aug 5)

Hasn't the CFA [crossed field antenna] been pretty well debunked by now? Or useful in certain applications (gh to Al, ibid.)

The CFA hasn't exactly been debunked, but it has fallen into disfavor. Jean-Paul sent me this email, excerpted below:

"My MF antenna is located at the sea front in mud water, excellent conductivity but Ant impedance changes with the tides. It goes from no water above the radial (low tide) to almost 1.7m at times. 50R to something like 60+j24 at worst.

"Was thinking of a raised counterpoise GND system to sort out this problem but now we have to relocate as too much interference to phones and other equipment. New site is located in a small valley next to a water reservoir.

"Was looking at CFA some time back. Had a rf specialist in Australia who was going to build one to do some test but then dropped the idea. Could not at that time find parts to build it. A colleague who went to Egypt says Radio Cairo has one on top of their Radio house.

"I think will stick to series fed tower 90 degrees, although I read that folded mono pole(shunt feed) works better than series fed over poor gnd system and can be set to 50R and no ATU required."

His current antenna was all over the j-omega scale because of the tides. That tells me they didn't put the antenna far enough out to where the tides would not affect it. All of the "sea antennas" I have ever seen are in places where the tide does not remove all the water. This is the reason they are killing all the phones and other things in the area.

The raised counterpoise is good if they have the real estate to put it on or it is out of the way. There is always someone who will come along and hurt themselves on it. The Government of South Sudan was trying to get me to assist them to install one for their 100 kW transmitters in Goomba (when I was with the UN), but they did not want to spend the money to fence it off and the place was crawling with children. I respectfully declined.

The folded monopole he is looking at would be good for him commercially, but would probably screw DX'ers because it greatly reduces the skywave content and converts it to groundwave, plus it has the added benefit of easy matching.  
(Al Muick-AFG, dxld Aug 8)

SLOVAKIA 7385 Miraya FM QSL, via IRRS via Rimavska Sobota, Slovakia.  
Card with full-data, except site, in 5 months for a report to Fondation  
Hirondelle, Avenue du Temple 19C, CH-1012 Lausanne, Switzerland. Upper  
left corner has orange & yellow Miraya FM logo, followed by info about  
Miraya FM, followed by "We are pleased to certify your reception of STAR  
radio Liberia."!!!

The card was folded in half and lightly glued, but I was able to open it  
(there was nothing on the back). The last card I received from Hirondelle  
was also folded but permanently glued. Each arrived in an envelope large  
enough to accommodate an unfolded card. I'm very happy to receive these  
cards so I'm not complaining; I'm just curious as to why they fold and  
glue their cards.

(Wendel Craighead-KS-USA, Aug 12, Cumbre DX via dxld)

SRI LANKA Radio Ceylon Calling India - 11905 kHz SLBC's new broadcast to  
India at 1530-1630 UT on 11905 heard here with good reception on 2nd and  
3rd August. It was only audible for the first 25 minutes or so, until the  
frequency is blocked by RDP which signs on in Portuguese at about 1555 on  
weekdays.

The broadcast starts at 1530 with IDs in English and Hindi, then music,  
mostly introduced in Hindi until approx 1546 when there is a short news  
bulletin in English followed by music introduced in English (at this point  
the frequency is blocked by RDP).

The English ID is "Radio Ceylon calling out to India". It seems to be a  
relay of a domestic channel with various FM frequencies announced,  
including 95.6 MHz in Colombo (WRTH lists this frequency for SLBC  
commercial service in English).

Reception is only possible here Monday-Friday at 1530-1555 as the channel  
is completely blocked by RDP in Portuguese on Saturday-Sunday.  
(Dave Kenny-UK, Aug 5, BrDXC-UK yg via dxld)

15745 SLBC Colombo on Aug 09 at \*0055-0103 UT. 25322 English, 0055 UT  
sign on with IS, Repetition of IS and the National Anthem, ID, Opening  
announce, News.  
(Kouji Hashimoto-JPN, JPNpremium Aug 13)

TAJIKISTAN 15557 odd Voice of Tibet via Dushanbe, 1230 UT, no jamming  
interference til 12.34:20 UT, when China tx on air with strong carrier on  
even 15555 kHz, and firedrake music started then at 1235 UT.

TURKEY TRT DX-Ecke mit Astrit und Ufuk.  
Am letzten Samstag hat TRT Ankara im Rahmen der DX-Sendung ein Interview  
von Dr. Ufuk Gecim, Leiterin des deutschen Programms von TRT und Astrit  
Ibro von Radio Tirana ausgestrahlt. OM Bernd Seiser aus Gaggenau war so  
nett, das Interview aufzunehmen. Die MP3 Datei ist ca 16.5 MB gross.

Das Interview kann unter folgender Adresse im Internet abgehört werden:

<<http://www.trt.net.tr/trtworld/Galeri/Media.aspx?MedyaKodu=3121ac72-ce72-4c2c-97de-c68957b10b72&KategoriKodu=379c2138-b4a4-4a9f-8310-9023565f0433&dil=de>>

(Volker Willschrey-D, A-DX Aug 16)

UGANDA/ERITREA/SOMALILAND 7195 kHz at 1702 UTC: Program in (British accent) English.

Dear Intruder Busters, just now, August 11, since 1702 UTC I can hear a program in (British) English voice with S=9 with QSB. I guess the tx-er is somewhere in Africa. Do you also listen? Tnx!  
(Uli dj9kr - Aug 11 INTRUDERALERT mailing list)

Dear Ted 5Z4NU, dear Victor 4S7VK, may you can check

- a) 7120 kHz today 1600-1730 UTC,  
is N'djamena Chad or Eritrea BC station ?
- b) 7145 kHz 1600-1700 UTC, is Somaliland BC station?

August 10th log:

7120 Chad 1617 til 1731 UTC, S=8,  
7145 Somaliland at 1620 til QRT at 1701 UTC.  
many thanks, vy73 de Wolfgang df5sx  
(wb, wwdxc BC-DX TopNews Aug 12)

E.H.M. Alleyne wrote: Hello Wolfgang,  
I hear this S=9+30dB but it is rather noisy. Part of this program was coming from Kabale in western Uganda, and broadcast from Kampala, Uganda.

I think I am right in saying that Hargeisa, Somaliland Republic (not Somalia) still uses 7145 kHz for broadcasts but is not always heard here.

Today I spoke to CCK yet again about the Kampala broadcasts on 7195 kHz, and they said they would refer it back to the monitoring service. The trouble is that Uganda is a separate country within the EA Community and go their own way, so there is no great hope of any rapid action.

I am sending copies of this message to colleagues in Uganda who may be able to raise it with their Authority.  
73, Ted 5Z4NU Nairobi (E.H.M. Alleyne-KEN, wwdxc BC-DX TopNews Aug 13)

7195 Kampala Uganda ia now on this freq, starting from 1600 UT - as verified on Aug 11. - with talks in English ie news at 1800 UT, mentions several phone numbers then a pop song. At 1816 UT with rpfrg in Vernac 33433.

(Zacharias Liangas-GRC, wwdxc BC-DX TopNews July 31-Aug 10)

R. Uganda just now 2040 UT on 7195 kHz?

Our colleague in Kampala, Bill 5X1JM, is investigating this station which has been on the air again. It is certainly in Uganda, but he is unsure of the origin, which sounds in some ways like Radio Uganda but could be one of the proliferating religious stations which are now being set up and which could be trying to establish itself on the frequency. He is taking it up with the Uganda authority and will inform us when he has anything of consequence to report.

73,  
Ted 5Z4NU - E.H.M. Alleyne, Nairobi, Kenya

USA VOA Greenville - Fifty Years of Shortwave to the World.

LBA\_Antenna Turns, by Chris Horne.

Tranquility Base, here. The Eagle has landed. The Voice of America had the world's largest audience ever when it reported in 46 languages man landing on the Moon. It earned trust when it reported on Watergate and the anti-Vietnam protests. In 1968, Czechs battled Soviet tanks in the streets. When Soviet troops forced a Czech dissident broadcaster to sign off, he told his audience to listen to the VOA. Czech broadcasting was never trusted again.

The phrase Voice of America (VOA) has always stood for a strong, powerful American broadcasting entity. The United States government intended the Voice of America to provide hope to people around the world and to counteract the propaganda espoused by America's enemies in war conflicts. In the mid 1990s the federal government began closing or consolidating some large VOA broadcasting facilities. The federal government would like to close VOA site B in Greenville, NC. I hope they choose not to for some several reasons.

Recently, I toured VOA Site B and observed first hand both the magnitude of the transmitting equipment and the value its broadcasting can add to the international community. The day I arrived at VOA-B, the hundreds of acres of tall expansive antennas made you feel you were entering another planet. The father of wireless, Guglielmo Marconi, would be proud to see such a place full of great engineering and information for the world. Many wire antennas meshed together to form a tall wide curtain were supported by tall 300 feet towers. Each tower is fed by elevated transmission line (1 inch conducting pipes) 15 feet off the ground. Once inside the transmitting facility, the same degree of largeness is apparent by several "truck size" transmitters...

#####

Log of this Aug 11 morning

6110 NHK Sackville relay, En nx at 0500 UT Aug 11, S=9+10dB.  
5025 and 5040 Radio Rebelde La Habana / RHC both Spanish, S=7 at 0502 UT.  
5955 RNW Sines POR, 0507 UT nx on Ramadan in Dutch, S=9+15dB.  
// 6015 RNW via Moosbrunn-AUT, 1/8th sec behind Sines. S=9+10dB.  
// 6125 RNW via Vatican relay SMG, which is ahead of SIN&MOS, S=9+20dB.  
5970 UNID, weak under threshold at 0512 UT.  
6040 BR Radio Minsk, surprisingly S=9 signal at 0515 UT.  
6080 NHK Bonaire Spanish service, at 0518 UT, S=8-9.  
6150 UNID, RHC?, rather RRossii Yakutsk?, S=9 at 0523 UT.  
6164.64 Croatian Radio Deanovec, S=8-9 at 0525 UT, but RNW Bonaire underneath 6165.00 kHz even.  
7275 RTT Sfax, Ar at 0530 UT, Aug 11. Ramadan singer, S=9+30dB powerhouse. only a single RTT service this morning, nothing heard on 7335 or 12005 kHz.  
7295 TDA Algiers via ISS, Arabic S=8 only, 0535 UT, // 9535 kHz S=6 poor.  
9369.88 US religious WTJC, S=9 at 0540 UT.  
9575 Medi 1 Nador, ID in French at 0545 UT, S=9+30dB powerhouse.  
9635 RFE/RL Tatar/Bashkir via Sitkunai-LTU, 05-06 UT, at 0547 UT S=9+20dB.  
9740 IRRS via RSO-SVK, Arabic to East Africa, S=8 at 0550 UT.

Also OHR from suppos. British Army from Limassol Cyprus 15114-15135 kHz at 1100 UT Aug 11.

Log of Aug 13 / 16 morning

9710 RA Shepparton, 0740 UT [scheduled 7-9], phone interview, only S=5-6 // 11945 sched 07-13 UT, 15160 05-08 UT S=7 signal. Aug 16.  
13660 DWL Sines Portugal relay in French to NoAF/NE/ME, side lobe S=9 at 1221 UT Aug 16.  
13685 IRAN - IRIB Tehran in Hebrew, 1200-1230 UT, S=9 signal at 1224 UT Aug 16. // much stronger 15240 kHz in 19 mb S=9+30dB powerhouse, here in Europe.  
15120 VoNigeria in French 0745 UT, S=9+20dB, powerful signal, but very low modulation level. En 05-07, Fr 07-08 UT. Aug 16.  
15120 RHC in Spanish, ID at 1124 UT, Aug 16, S=7-8, but increased to S=9+15dB level at 1230 UT. // 15380 S=8-9, and also 15360 kHz, but latter het by US Mashaal in Pashto from IBB Kuwait relay.  
15240 TRT Emirler in Ch at 11-12 UT Aug 16. S=7-8 signal here in Europe.  
15250 BSKSA Riyadh in En to WeAF, best QRM free time here in 1100-1230 UT slot, S=7-8 at 1125 UT Aug 16.

- 15341.00 RTM program via Nador-MRC relay site, S=9+10dB, little stronger signal today than usual at 1132 UT Aug 16.
- 15380 BSKSA Riyadh HQ progr to NE/No&NoWeAF, live prayer from mosque, at 1219 UT Aug 16. S=9+15dB. BUZZY transmitter here on air, both at 06-09 and 12-14 UT transmissions.
- 15450 TRT Emirler in English from 1230 UT Aug 16. Powerhouse, but 1236 UT audio off, tx off totally at 12.37:48 UT. Back on air at 1240 UT.
- 15510 VoRUS Samara site, with very early opening procedure at 1143 UT. Registered 12-14 UT to NE/ME/EaAF. S=9+15dB, side lobe into Germany. Usual behaviour at Samara SW site, to open 18-20 minutes earlier. Also like 3 x R Tatarstan relay opening procedure from same site in the early UTC morning.
- 15557 Voice of Tibet program via Dushanbe-Yangiyul-TJK at 1230 UT Aug 16. CHN mainland jamming tx on air started carrier on air at 1232:33UT, started late at 12.33:10 UT with BUT different SLOW Chinese mx jamming, not Firedrake like rhythm; and not like jamming against AIR Mandarin and/or RFA Tibetan distortion.
- 15560 UNID English religious program at 1147 UT Aug 16. S=8 signal only. WRTH spring update file under YFR page 46 mentions 11-12 UT Almaty-KAZ relay to East Asia. Missed in Eibi, Aoki and hfcc lists.
- 15770 AIR Aligarh in Tamil/Telugu 1100-1245 UT, S=9+10dB at 1157 UT Aug 16. Another example of lazy terrible technical sce level by Indian facilities. Feeder line totally distorted on low signal level, I could understand only fragments of words. Carrier strong though ... compare it with much better service signals from excellent Bangalore staff site on 15795 kHz ...
- 15795 AIR Bangalore in Mandarin at 1130-1315 UT, noted at 1205 UT Aug 16. // 11840[not propagate here] and Bangalore 17705 kHz too. 15795 and 17705 kHz both China mainland jammed. 17705 kHz also het by BSKSA Riyadh 1st progr co-channel towards EUR/NoAF S=9+10dB. Same jammer program noted against AIR of CHN-NatRadio program, like noted also against RFA Tibetan 13830TJK and 15670UAE relay. At 1228 UT the jammer played well known Elisabeth serenade ...
- 17520 UNID stn to PAK/AFG/IND target ? Mentioned "Lifeline Pakistan", tentat Pashto or Urdu ? S=7 signal at 0758 UT, but disappeared at 0800 UT. Maybe mis-typed 17720 kHz opening on Radio Pakistan Islamabad site at 0800 UT, - or antenna test by R PAK engineers ?
- 17570 BSKSA Riyadh, Holy Quran sce in Ar to Asia, poor S=4, 1100 UT Aug 16. // 17615 at 1110 UT Aug 16, S=8 to So/SoEaAsia.
- 17660 RFI Paris in French via SoAF Meyerton relay, nx at 1209 UT, S=9+10dB. Scheduled 12-13 UT. NX with "pilote accident, avion alarme...".
- 17705 BSKSA Riyadh General 1st progr towards EUR/NoAF S=9+10dB at 1220 UT Aug 16. Also China mainland jammed against co-ch AIR Bangalore in Mandarin, see 15795 kHz entry.
- 17725 UNID strong carrier of S=9 at 1108 UT lasted til approx. 1125 UT, 1000 Hz tone signal every minute. Most probably originate from Sabrata-LBY, due of signal strength. LJBC which signed on here with same tone procedure around 1155 UT. LJBC program started then at 12.00:52 UT.
- 17730 BSKSA Riyadh, 1st General sce in Ar, nx at 08 UT, S=9+10dB, Aug 16. To NE/NoAF/WeAF. But stronger // to Medit/Europe 17740 kHz S=9+20dB.
- 17740 Poor S=4 only signal from AIR Delhi in Thai sce. 1115-1200 UT, 1122 UT Aug 16. Though much stronger in 19 mb on 15410 kHz via Panaji site, S=8-9 signal strength.
- 17775 VOA Tinang-PHL. Surprisingly strong signals from Tinang and

Iranawila at 11-13 UT Aug 16. 800 Hz tone every minute, early at 1106 UT, registered VOA Burmese at 1130-1230 UT, S=9+20dB signal. // 15620 kHz also from Tinang site, S=9+10dB, both n o t jammed by Myanmar.

17780 BBC London in French 1200-1230 UT via ASC relay. very strong here in Europe today Aug 16 at 1214 UT, S=9+15dB.

17785 BSKSA Riyadh, in French to Ce/We/NoAF at 0805 UT, Aug 16, S=9+5dB.

17805 BSKSA Riyadh, 1st General sce in Ar, nx at 1105 UT, S=8, Aug 16.

// 15490 much stronger than in 16 mb at S=9+20dB, better modulation.

17845 DWL Singapore Kranji relay in German, Aug 16 at 1216 UT, at S=6-7 strength. "Focus Europa", "Hedge fonds disaster, global finance market...", schedule 1200-1400 UT.

17895 BSKSA Riyadh HQ progr to all Africa, live prayer from mosque, at 1210 UT Aug 13+16, S=9 ... S=9+10dB, // 17625 kHz to SoAS/SoEaAS at S=9 level Aug 13, S=7 on Aug 16.

21505 BSKSA Riyadh Gen 1st progr in Ar to WeAF/CE&NoAF, at 1208 UT Aug 13, S=9+15dB level.

Intruder 7.1 MHz

7120 Tentat N'djamena Chad 1617-1731 UTC, S=8, also on 6165.00 kHz at 1820-1900 UT, latter hit by co-channel Croatia odd 6164.64 kHz.

7145 Hargeysa Somaliland at 1620 til QRT at 1701 UTC. (wb, wwdxc BC-DX TopNews Aug 11/13/16)

DX MIXTURE On August 14th were observed the following DX programmes in time slot 1800-1900 hrs:

- 1800-1830 a wonderful "World of Radio" on 7290 kHz.
- 1820-1850 a good "Amigos de la Onda Corta" of REE on 17755 kHz and on 7275 kHz where KBS in En also talking about DX listeners.
- 1845-1902 VOTurkey in English only with a survey of listeners reports, but pretensionsly named "DX Corner", similar as in the boxer "corner" on 9785 kHz;
- 1845-1900 on 7290 kHz our friend Alan Graham in captivity of Bob Padula presenting an unpretending a short 41 m.b. scan and very well known HF turn over of info coming from Bulgaria.

Radio NZI in En on 13 Aug at 2035 UT on 11725 kHz only with utility countdown of nx in their so called DX in the Mailbox, ending with a survey of only five E-mails from Spain and USA only.  
(Rumen Pankov-BUL, wwdxc BC-DX TopNews Aug 16)

HFCC Meeting August 2nd - 6th, 2010.

The High Frequency Co-ordination Conference (HFCC) was recently held in Zurich, Switzerland. Over 110 representatives from international radio shortwave broadcasters, met to coordinate the frequencies for the Winter season that will start on Oct 31st 2010. The conference, organized by HFCC and ASBU, was hosted by DRM-Member Thomson Broadcast & Multimedia and DRM associate member NASB, the North American Association of Shortwave Broadcasters.

On Tuesday 3rd August, Ludo Maes and Mireya Martinez from the company TDP, gave presentations on a range of DRM topics including DRM-Monitoring systems and multi-standard digital radio receivers.

The next day, the participants went to the Thomson factory at Turgi where they had a guided tour of antennas, transmitters and equipment for scientific and medical purposes. This was followed by a dinner hosted by Thomson at Bottstein Castle.

Once again this conference has had many positive outcomes and demonstrates the benefits of bringing people together for this event.

## EINLADUNG ZUM ERSTEN HERBSFEST DES CRI-CLUBS

Liebe Freunde,  
endlich ist es soweit. Der CRI-Club feiert am 2. Oktober 2010 sein erstes Herbstfest. Hierzu eingeladen sind alle, die sich fuer China im Allgemeinen sowie China Radio International im Besonderen interessieren - unabhaengig von einer Mitgliedschaft im CRI-Club.

Auf dem Programm stehen unter anderem:

Direkte Begegnung mit Redakteuren der deutschen Redaktion von China Radio International

Ein Fotobericht von der Fuenfzigjahrfeier der deutschen Redaktion von China Radio International

Reiseerinnerungen in Bildern: Beijing, Shanghai, Huangshan 2010

Die junge chinesische Violinistin Sun Yu Qi praesentiert traditionelle chinesische Lieder.

Livepraesentation chinesischer Volkskunst

Und vieles mehr.

Ab ca. 1715 Uhr MESZ lassen wir uns von der Familien Won mit traditionellen Koestlichkeiten der chinesischen und kantonesischen Kueche verwoehnen.

Hier die genauen Daten:

Datum: Samstag, 02. Oktober 2010. Beginn: 14:30 Uhr

Abendessen: ab 17:15 Uhr. Ausklang gegen 21:00 Uhr.

Ort: Wong's China Restaurant  
Lehenerstrasse 134 / Ecke Berliner Allee  
79106 Freiburg

<info @ wongs-chinarestaurant.de>

Ich freue mich auf einen schoenen Tag mit Euch/Ihnen und mit CRI.  
Bitte meldet Euch / melden Sie sich verbindlich an unter  
<KONTAKT @ HELMUTMATT.DE> oder Tel. 07643 40530

oder per Post:  
CRI-Club  
Helmut Matt  
Schoerlinsmatten 5  
79336 Herbolzheim  
Deutschland

Herzliche Gruesse aus dem Breisgau,  
Helmut Matt <<http://www.helmutmatt.de>> (Aug 11)

New Klingenfuss products for 2011: A bright future for HF!

Dear friends,  
we'll soon close for holidays.  
In October we'll start working on our new products

- 2011/2012 Guide to Utility Radio Stations
- 2011 Super Frequency List on CD
- 2011 Shortwave Frequency Guide
- 2011 Frequency Database for the Perseus LF-HF  
Software-Defined Receiver

to be published on 10 December 2010.

Full-resolution title page graphics can be found at  
<[www.klingenfuss.org/g\\_2011.gif](http://www.klingenfuss.org/g_2011.gif)>  
<[www.klingenfuss.org/r\\_2011.jpg](http://www.klingenfuss.org/r_2011.jpg)>  
<[www.klingenfuss.org/s\\_2011.gif](http://www.klingenfuss.org/s_2011.gif)>

Needless to say, we'll again include the very latest screenshots  
using software-defined radios (SDRs) such as Perseus et al, feeding  
the legendary WAVECOM W-CODE digital data decoder.

If you are able to supply additional new frequencies and stations,  
your cooperation would be highly appreciated. Please let us have your  
data by 10 October 2010.

The continuously updated product Digital Data Decoder Screenshots on  
CD is highly successful and now covers more than 7,400 (seven  
thousand four hundred!) screenshots from 1997 to today. Feed your PC  
with this CD and the "slide show" will keep you busy for a few days -  
or weeks!

We're still in the never-ending sunspot minimum ;- ) and daytime MUF  
fluctuates between 15 and 17 MHz. Recently, HF propagation conditions

have been quite unfavourable for regular long-distance communication. Anyway, new HF e-mail services, stations, networks and frequencies continue to emerge on a regular basis. HF e-mail booms and service providers continue to expand. No other publisher considers this revolutionary development accordingly.

- - -

Latest references, - see <[www.klingenfuss.org/ref.htm](http://www.klingenfuss.org/ref.htm)>

Peter Boskos VK2EHQ, Australia - 29 June 2010: "WAVECOM W61LAN Digital Data Decoder Box ... I received the Wavecom unit this morning. Thank you for the excellent service."

Peter Hart G3SJX, Perseus SDR Review Editor, RSGB RADCOM, United Kingdom - 24 May 2010: "Thanks for the information and details on your website. Very interesting, you have a very comprehensive database."

B W Burt MM0GLX, Station Manager, Radio Monitoring Station, Greenock, Scotland, United Kingdom - 18 March 2010: "2009/2010 Guide to Utility Radio Stations ... 2010 Shortwave Frequency Guide ... 2010 Super Frequency List on CD ... Again you have surpassed yourself with the quality and accuracy of your latest editions ... Each year the data saves us hours of tedious listening and direction finding trying to identify stations that you have listed on the C.D. This is one of the best tools a Monitor can have at his disposal. Keep up the good work."

Helmuth W Kump KT3L, United States of America - 24 February 2010: "Passport to World Band Radio in Limbo ... I have found a worthy salve for my gaping Blue Pages wound, in the Klingenfuss 2010 Shortwave Frequency Guide, but at a somewhat dear price ... This is an excellent resource which includes utility stations and lots of supplemental information, including schedules by broadcaster as well as by frequency. You get what you pay for: the physical quality of the book is excellent. It will lie flat, and it's easy-to-read, with high-quality pages that can be thumbed through quickly. I highly recommend you view the online sample before purchasing to see if it is your cup of tea. Klingenfuss also offers its manuals in CD-ROM format, and although I have not tested this, you should be able to produce custom listings by filtering on language, time, country, etc."

John Collins, United States of America - 22 February 2010: "2010 Shortwave Frequency Guide ... 2010 Super Frequency List on CD ... 2009/2010 Guide to Utility Radio Stations ... Radio Data Code Manual ... The books and CD's are, as we have come to expect, are simply fabulous very nice work!"

Maciej Zycinski, Poland - 29 January 2010: "2010 Super Frequency List on CD ... Thank you very much for your e-mail confirmation and prompt shipment. I do hope to have a lot of enjoyment ... It is very encouraging to see that there are still some companies taking their business (and their customers) very seriously."

Peter Le Quesne ZL4TCC, New Zealand - 26 January 2010: "2010

Shortwave Frequency Guide ... 2009/2010 Guide to Utility Radio Stations ... some 25 years ago when I lived in Dunedin, I was in contact with you and bought several of your publications which I still have."

Dennis Brewer, United States of America's Broadcasting Board of Governors, Radio Free Asia, Relay Station Udorn, Thailand - 18 January 2010: "2010 Super Frequency List on CD ... Your frequency lists are incredibly good."

Anker Petersen, Chairman of Danish Shortwave Clubs International, in Shortwave News - January/February 2010: "2010 Shortwave Frequency Guide ... a comprehensive shortwave frequency list which for each frequency contains a line for each broadcast, practicably arranged in time order within each frequency. That includes exact times, transmitter site, language and target area. I prefer the Shortwave Frequency Guide when I scan the shortwave broadcast bands. In mid-December 2009 I listened to 50 broadcast stations at random in frequency band and time and identified them 100 %, no matter what language, and made a comparative analysis. WRTH 95 % correct, 2010 Shortwave Frequency Guide 96 % correct. - 2010 Super Frequency List on CD: This modern tool is very easy to use on a PC using Microsoft Windows and has excellent search functions for specific frequencies, countries, stations, languages, call signs and times - or any combination thereof!"

Mike Richards G4WNC, Decode editor of Radio User, United Kingdom - January 2010: "2009/2010 Guide to Utility Radio Stations ... time to turn to your trusty frequency guide. I use Klingenfuss as my main reference for two reasons - it's regularly updated and it allows you to look up utilities in several different ways."

- - -

Best wishes, Joerg Klingenfuss

(R BULGARIA DX MIX News, Ivo Ivanov, via wwdxc BC-DX TopNews Aug 23)

BELARUS Belarusian Regional SW tx. I checked this today at 1500 UT and yes, while 6040 and 6070 kHz carried "Hrodnenskoye Oblastnoye Radio" and "Radio Brest" respectively, 7235 kHz carried "Radio Stolitsa" // 6080,

6115 and 279 kHz. I couldn't hear 6190 kHz.

(Mauno Ritola-FIN, dxld Aug 23) strongest outlet here 7280 kHz, wb.

BOLIVIA 4699.97 Radio San Miguel, Spanish, at 1050 UT, good with Catholic mass. Slight CODAR QRM. 22 August.

4716.67 Radio Yura, at 1106 UT, tentative. talk by Spanish man but no ID or local references. Also, much weaker than San Miguel, peaking at only S9. 22 August.

(David Sharp-NSW-AUS, dxld Aug 23)

BOSNIA/SERBIA Dear DXers, I warmly suggest you to look at the following new video from International Radio Serbia, posted on YouTube:

<<http://www.youtube.com/watch?v=reFJ7QtiBrw&fmt=35>>

This short 4-minute video is only in Serbian, but you can see many pictures of International Radio Serbia's studio in Belgrade and [tx site] BIJeljina, Bosnia HF transmitting station.

It's interesting to notice in the middle of the video, during the speech of the new director of IRS, the picture on the wall behind him :)

At the bottom of this message you can see 16 pictures, taken from this YouTube video.

(Dragan Lekic-SRB, dxld Aug 18)

BRAZIL 4865.05 Unidentified, at 1142 UT, Portuguese, talk by man, poor with UTE QRM, but partially readable in LSB. Possibly R. Verdes Florestas? 20 August.

4885.01 Radio Clube do Para, at 2040 UT, Portuguese, football commentary or similar, many ments of "Brasil." Absolutely blown-away to hear this in my local morning, which is very rare. 21 August.

4914.95 Rdiff. Macapa, at 2056 UT, Portuguese, presumed with reverb commentary by M (perhaps soccer), too weak for ID. 21 August.

4985 Radio Brasil Central, at 2105 UT, Portuguese, fading up with news or similar by M (didn't sound like soccer commentary). 21 August.

Sidebar: This rare local morning opening to Brazil may have been an off-shoot of a fantastic opening to Africa, at the same time. While already in progress at 2040 UT, all of the Brazilians were gone by 2115 UT.

(David Sharp-NSW-AUS, dxld Aug 23)

9587.32 Super Radio Deus e Amor, at 0510-0530+ UT on August 14, Portuguese preacher. Weak but readable. // 9564.56, 11765 kHz.

(Brian Alexander-PA-USA, dxld Aug 18)

CHAD 6165 RNT N'djamena, at \*0427-0459 UT on August 20, sign on with Balafon IS. National Anthem at 0429 UT. Opening French announcements at 0430 UT. Afro-pop music at 0433 UT. Weak but readable. Covered by Radio Nederland sign on at 0459 UT.

6165 RNT N'djamena, \*0430-0459, August 21, abrupt sign on tonight with French talk. Local Afro-pop music after 0431 UT. Local tribal music. Covered by Radio Nederland sign on at 0459 UT. Poor to fair.

6165 RNT Ndjamena, 2220-2301\*, August 21, African hi-life music. Afro-pop music. French announcements. Sign off with National Anthem. Fair. In the past sign off was usually at 2230 UT.  
(Brian Alexander-PA-USA, DXplorer Aug 22)

CHINA Log 9170 kHz CNR 6 CHN at 1730 UTC Aug 23, SIO 333. Talk & Mx in Chinese; der Sendeanlage in Peking-Gaobeidian ist mit den Koordinaten 39.888245 N 116.577097 E zu sehen.  
(Theodor Averbeck-D, A-DX Aug 23)

Re: here look at the Beijing SARFT #491 transmitting center.

Yahoo maps, MS Virtual Earth, Google Earth imagery. Some high resolution place. VE Update - Google Earth V.5 historical image.

CHINA/TINIAN 15120 Both CRI Beijing in English at 0428 UT Aug 23, S=9+20dB, ahead of co-channel IBB Mandarin via Tinian site underneath. ID at 0429 UT. Announcement to download CRI programs from CRI website, URL and e-mail address given. At 0430 UT Aug 23 Frontline progr with news from real China started as weekly feature program.  
(wb, wwdxc BC-DX TopNews Aug 23)

CHINA/TADJIKISTAN 15635 On IBB Mandarin sce heard a single Firedrake music jammer 15635 kHz only against/ahead of co-channel Dushanbe relay, all other // channels suffered only by spoken national radio echo type

relay:

13760SAI, 15120TIN, 15615TIN, 17615TIN, 17880SAI, 21550TIN, 21690TIN.  
(wb, wwdxc BC-DX TopNews Aug 21)

CROATIA 6164.63v Croatian R Deanovec, logged Aug 19 at 0638 UT,  
interview in Croatian language. S=8 signal.  
(wb, wwdxc BC-DX TopNews Aug 19)

CUBA 6060 RHC La Habana in English at 0615 UT / 5-7 UT, best channel  
here in Europe on this time slot, S=8-9. Parallels much weaker.

5970 at 0619 UT, tiny S=3-4, 6150 at 0622 UT poor S=6. 0625-0628 sports  
news on soccer season.  
(wb, wwdxc BC-DX TopNews Aug 21)

EGYPT 11590 R Cairo in Arabic via Abis 2300-0430 to zones 6&7, 250kW  
330degr, heard at 0419 UT Aug 23 performing S=9+20dB. Holy Quran program.  
(wb, wwdxc BC-DX TopNews Aug 23)

ETHIOPIA 7210 Radio Fana, 0340-0350, August 21, local Afro-pop music.  
Amharic talk. Fair. // 6110 kHz - weak under Cuba.  
(Brian Alexander-PA-USA, DXplorer Aug 22)

9560 on 23 Aug at 1440 UTC, Radio Ethiopia (tent. - presumed) in Arabic  
with Ethiopian music and little talk. Very low modulation, but otherwise  
good and clear signal. No sign of KSDA which is supposed to be here  
according to AOKI .... CRI carrier flattened the neighborhood at 1500 UTC.  
(Albert Muick-AFG, hcdx Aug 24)

FRANCE/MONACO Hello Glenn, Here are details for Monaco's transmitters  
sites. Note that for ITU, even the sites in France are listed under Monaco  
(MCO)

The LW 216 kHz in FRANCE, Roumoules some 150 km north of Monaco.  
The MW 1467 kHz used by TWR in the evening is also in Roumoules.

Other sites near Monaco (no more than 20 km).

MW 1467 for Radio Maria daytime is in Col de la Madone FRANCE

MW 702 for China Radio International is in Col de la Madone FRANCE

SW for Trans World Radio is in Fontbonne FRANCE.

Marine Utility Monaco Radio SW antennas are also in Fontbonne FRANCE

You can have pictures:

<<http://tvignaud.pagesperso-orange.fr/galerie/fr-galerie.htm>>

In Fontbonne there are also two French MW transmitters:

1557 kHz France Info & 1350 kHz Radio Orient.

The ONLY transmitters in the Monaco soil are low power FM  
transmitters, in the Jardin Exotique (overlooking the Principality).

R. Maria 94.5

Radio Chine Int. 96.0

Radio FG 96.4

R. Capri 99.1

One Sud 102.4

R. Riviera 106.3

RMC1 107.3

And also the VHF transmitter is on the Rocher de Monaco.

Other FM stations (French & Italian networks, Radio Monaco, Radio Riviera) are in Col de la Madone (for most powerful) and Mont Agel (lower and TV).

So, all the stations you can hear anywhere in the world (LW, MW and SW) are definitely on the French soil. Regards from rainy Cote d'Azur.

(Christian Ghibaudo, Nice-F, dxld Aug 18)

But EDXC list shows this different:

F\_\_ 27 FRANCE incl. Corsica (Corse) island; excl. the Fontbonne and Col de la Madonne (Mt. Agel) transmitter sites of Radio Monte Carlo, cf. \*Monaco.

MCO 27 MONACO incl. the Fontbonne and Col de la Madonne (Mt. Agel) transmitter sites on adjacent French territory, not incl. the Roumoules site in France.

(EDXC Radio Countries list; via WWDXC DX Magazine Aug/Sept 2010)

FRANCE 9535 TDA Algiers program, sung on Ramadan in Arabic via Issoudun-F at 5-7 UT, S=8 southern lobe, but not on air // 7295-ISS

today !

(wb, wwdxc BC-DX TopNews Aug 21)

GERMANY 9850 NHK in French to AF, via Wertachtal, relay 0530-0600 UT, S=8-9.

(wb, wwdxc BC-DX TopNews Aug 21)

720 Westdeutscher Rundfunk [Langenberg], date/frequency "antenna tower" card in 97 days, with program magazine, stickers, lapel pins and frequency reference card for airmail report and US \$2.00 return postage.

(Albert Muick-AFG, hcdx Aug 20)

6189.993 GERMANY (EAST) Deutschlandfunk, Aug 9 at 2357 UT. Music, News in German, ID at 0004 UT.

(Ralph Brandi-NJ-USA, DXplorer Aug 16)

Sorry Ralph, minor error: "East Germany".

If you like to count this silly - I guess? - NASWA list - behaviour ...

I'll count the California and Texas/Arizona QSL under Northern Mexico soon

:-)

Berlin Britz suburb site was from June 1st, 1945 year til 3 Oct 1990 US

American sector of all-Berlin capital.

{rather called West-Berlin as vernacular sound ...}

see blue coloured map on

<[http://en.wikipedia.org/wiki/West\\_Berlin](http://en.wikipedia.org/wiki/West_Berlin)>

Exclave status from about May 1949 to reunification of both Germanys on 3 October 1990.

6190 kHz 17 kilowatt DLF unit at Britz site was formerly erected by USIA branch "RIAS Berlin" radio station on 7 August 1951 - always on 6005 kHz in 49mb under "West-Berlin NASWA" list counting.

Meant for RIAS Berlin and VOA Washington program relays into East Germany (GDR - formerly Soviet Zone of Germany) and German nationals in Poland, Baltics, CSSR, Hungary and South Tyrol-Italy too.

Location of former RIAS/VOA 6005 / now 6190 antenna visible next to small building at  
52 26 50.57 N 13 25 49.93 E

(wb, wwdxc BC-DX TopNews Aug 17)

See under "Kurzwellen-Faltdipol", 6190 kHz - Well, look here:

<<http://www.senderfotos-bb.de/britz.htm>>

The line "Kurzwellen-Faltdipol" shows the 6190 kHz facility. The shabby shack is the transmitter building, a provisional one from the earliest RIAS days. If I recall correct (it's 15 years since I was there) the vertically mounted fluorescent lamp behind one of the windows is in the very room of the shortwave transmitter. Otherwise there is only an ancient FM transmitter in this shack, if I recall correct.

The other transmitters are in what the webpage calls "Hauptgebaeude". The antenna of the broken S4001 transmitter is the one labelled as "Kurzwellen-Antenne noerdl. des Hauptgebaeudes". I understand that each antenna is "hard-wired" to the related antenna, i.e. a swap is not possible. Originally cover has been provided by the complete 20 kW transmitter/antenna combination. When the separate 6190 kHz service started in 1999 the concept changed in as far as transmission breaks during maintenance or equipment failures are just accepted now.

"Teil des demontierten Kreuzdipols" was a vertical incidence antenna with circular polarization for nighttime service on 990 kHz, now dismantled. At some point in the nineties further use of this antenna has been banned, because it produced too high fieldstrengths in the neighbourhood of the station. Since then mediumwave transmissions are limited to the two guyed masts, one of them carrying the 89.6 MHz antenna, too (the second RIAS FM frequency, 94.3 MHz, has meanwhile been moved to the TV tower).

And a word about the transmitters: The remaining shortwave transmitter, the one in the shack, is rated at 20 kW and has been delivered by Telefunken in 1950, it is by far the oldest broadcasting transmitter in everyday use in Germany (and perhaps well beyond).

The newer shortwave transmitter is or was an S4001, different from the ones used by Media Broadcast in as far as it got no SSB capability and has not been equipped for automated fast tuning. This transmitter suffered a failure of the transformer that produced the plate current in 2007, no such transformer was in the Juelich spare sparts stock due to the design variants (at least I understand this has indeed been checked) and a

replacement would cost about 100,000 Euro, an amount nobody was willing to invest into the DX hobby (that's pretty much the reality now).

The mediumwave equipment consisted 15 years ago of a 100 kW solid-state Nautel for 855 kHz, an S4003 (300 kW mediumwave version of the PANTEL series PDM transmitters, housings similar to the S4005 shortwave transmitter; this one was the first PANTEL ever delivered) for 990 kHz and an S4002 (PANTEL 100 kW mediumwave, looks like its shortwave brother S4001) as aux. Nowadays two Transradio TRAM transmitters are used as mains.

And meanwhile word has it that in the last days there were some power supply problems with the 6190 kHz facility, but some necessary repairs have been done and now the old tranny should again happily churn away. (Kai Ludwig-D, SW TXsite July 6, 2010)

RADIO 700 - Ihr Radio fuer die Region,

in Ostbelgien und der Eifel auf UKW 90.1 und 101.7 MHz  
europaweit auf Kurzwelle 6005 kHz  
und weltweit im Internet: <www.radio700.eu>  
(Christian Milling-D, A-DX Aug 22)

SWR MW Empfang bundesweit und auf Insel Ruegen.  
Grundig Satellit 500 und PERSEUS-Rx.

Bereits auf der Fahrt habe ich mit dem Autoradio getestet, wie weit die  
711 kHz Heilbronn Obereisesheim tagsueber nachweisbar war - das DRM-  
Rauschen war bis hinter Wuerzburg hoerbar.

Die 576 kHz aus Muehlacker konnte ich zu meiner Ueberraschung noch hinter  
Kassel empfangen - Respekt der neue Tx scheint gut zu arbeiten.  
[der neue Transradio Sender in Muehlacker ist nunmehr abwechselnd mit dem  
kanadischen NAUTEL Sender im Einsatz. Der alte Telefunken S-4004 300 kW  
Sender dient als Ersatzteiltraeger fuer die gleiche Anlage bei dem SWR  
Bodenseesender Rohrdorf. wb.]

Wir hatten eine Ferienwohnung auf Ruegen auf einem ehemaligen Bauernhof -  
wunderbar ruhige Lage sowohl akustisch als auch HF-seitig.

Als ersten Versuch habe ich mit dem Satellit 500 getestet, wie stark die  
MW-Signale vom SWR 1017 kHz und 576 kHz nachts zu hoeren waren.

Es stellte sich heraus, dass um 21 h Ortszeit die ersten SWR-Signale auf  
1017 kHz Wolfsheim zu hoeren waren, 576 kHz Muehlacker kam ab 22 h stabil  
durch - ab 0 h war das 576 kHz Signal etwa so stark wie die 666 kHz  
Rohrdorf tagsueber im Mittleren Neckarraum und dies ohne nennenswerte  
Gleichkanalstoerungen - das hat mich doch angenehm ueberrascht. Die QRG  
576 kHz ist inzwischen sehr ruhig und QRM-frei geworden - da wird es Zeit,  
dass man die Tips fuer den Urlaubsempfang ueberarbeitet, hi.

Gegen 1 h Ortszeit habe ich mit Staunen festgestellt, dass auf 711 kHz  
Obereisesheim auch ein DRM Rauschen zu hoeren war. Nach einigen Versuchen  
gelang es mir auch auf 1413 kHz Ulm Jungingen mit Q3 zu hoeren.

PERSEUS - ich konnte nachts die 711 kHz in DRM einlesen aber noch nicht  
Audio dekodieren - .SNR lag bei 8-10 dB - kein Audio. Am 13. / 14.8. konnte  
ich mehrfach das 711 kHz DRM Signal mit Audio dekodieren !! Das 711 kHz  
Signal war stark durch den 300 kW Sender in Rennes ueberlagert. Das SNR  
der DRM Aussendung lag bei 13-14 dB. Der Empfang war auf Ruegen im  
Zeitraum zwischen 23 und 03.17 UTC moeglich.

Ich war auch in Putbus auf Ruegen und habe mir den 729 kHz DRM faehigen  
Sender am oestlichen Stadtrand angeschaut - es steht noch Alles, bleibt zu  
hoffen, dass die Anlage erhalten bleibt.  
(Juergen, wwdxc BC-DX TopNews Aug 23)

INDIA 5040 20 Aug, 0028 UTC. AIR Kolkata in Hindi with music. Modulator  
shot. Beautiful carrier, but modulation distorted and unable to provide  
enough power to completely modulate the signal. Strong carrier, no QRM,  
but moderate fading.  
(Albert Muick-AFG, hcdx Aug 20)

INDIA [Srinagar] 4950 on 24 Aug at 1640 UTC, AIR Radio Kashmir. Hindi  
pops and PSA's/commercials in Hindi/Kashmiri. Very strong signals with

great modulation. Local line noise and summer static the only problems.

Hope everyone's well! My trek towards Pattaya Thailand begins in 8 days!  
There is no more beautiful sight than Kabul in the rear-view mirror!  
(Albert Muick-AFG, hcdx Aug 25)

INDIA Daytime 41 mb frequencies hrd here:

INDONESIA Start of Ramadan was quite disappointing, no additional stations hrd and only some of the ones reported earlier hrd in period Aug 12-15

3325 RRI Palangkaraya; f/in 1100 UT hrd throughout s/off at 1600 UT, the most reliable of them all; also hrd local morning at 2200 UT.

3345 RRI Ternate; not positively hrd again.

3976 RRI Pontianak; only once positively hrd Aug 12, at 1215-1445 UT, heavy QRM from appr. 3980 kHz which sound like a flock of WWII-Bombers.

3987 RRI Manokwari; not positively hrd.

3995 RRI Kendaki; hrd in period 1100-1445 UT; also local morning 2200 UT; on Aug 13 at 1100 UT blocked by Chinese stn with TS & ID "... gunagbo dientai", no splash from 3990 kHz, because diff voice, only this date.

4606 RRI Serui; not hrd again neither 1100-1500 UT period nor local morning 2200 UT.

4750 RRI Makassar; blocked by Bangladesh Betar 1100-1500 UT, but clearly Aug 13 at 2200 UT.

4790 RRI Fak-Fak; not hrd again neither 1100-1500 UT period nor local morning 2200 UT.

4870 RRI Wamena; as reported by others, but never hrd here.  
(Gerhard Werdin-Bang Saen-THA, on the Gulf of Thailand, wwdxc BC-DX TopNews Aug 22)

4604.93 RRI Serui has been silent for at least the last 12 days around the 1200 time frame. Drat. They were the best low-band Indo most mornings.

9525.96 VoIndonesia at 1300-1310 UT on Aug 19. Out of Japanese and into English xmsn with ID, program lineup, and news. ID as "Voice of Indonesia, the Sound of Dignity". Strong signal.  
(John Wilkins-CO-USA, DXplorer Aug 22)

Was very pleased to hear RRI Jambi at 1825 UT, lovely ID at 1830 UT on with music for Ramazan on 4925 kHz. Good audio and strength. So the TXer is in good shape altho not heard on the regular skeds for some months now. At the same time also heard 3325 kHz RRI Palankaraya similar format.  
(Victor Goonetilleke-CLN 4S7VK, DXplorer Aug 25)

4790 RRI Fak Fak - but I did hear 4925 with Koran at 1827 UT on Aug 20, Om chanting then yl talk weak. Here is a recording as I say weak (and noisy) early eve is usually pretty bad on the lower bands for qrm)  
<<http://www.box.net/shared/xnvilp9151>>  
(Mark Davies Ruby Anglesey, dxld Aug 21)

Re: RRI Fak Fak.

Hello Mark, That's quite remarkable reception of Fak Fak - I would not be surprised to learn that it is one of the first in western Europe. Possibly those further north in Scandinavia have heard it, but maybe no one further south.

I did try myself, but the noise level was just too high - though I did hear 4925 with Koran at a little after 1900UT, and could recognise Indonesian despite the noise. I think I could recognise Indonesian on 4790, so not an extended transmission from Rawalpindi.

Now keep your ears on 4605 and see if Serui becomes audible. It's on the same island as Fak Fak, but slightly further to the east, so around the same time - if it is on air early during Ramadan. This shows that darkness is not necessary to hear some 60m signals. I would guess grey line at our end, and the last reflection point being on it.  
(Noel R. Green-UK, dxld Aug 22)

Congrats to RRI heard here in EUR these days, on high noise level. For all other listen to "Song of the Coconut Island"

JORDAN 11960 Jordan Radio Amman, observed from 0400 til 0459 UT cl-down, Aug 23. S=9+30dB full power 500 kW at 350degr. Second strongest bc signal in 25mb at that time, only R Rossii Taldom Moscow on 12070 kHz is stronger. HFCC and WRTH Update time entries are wrong. Comment in Arabic, in western style with many jingles in between. News on Palestine and Israel matter, resp. Iraq and USA-Kuwait. 0448-0450 UT football soccer news on English Premier League teams.

NOTHING heard on 11960 kHz channel on Wed Aug 25th in 0400-0700 UT slot, no audio, no carrier, Amman was totally OFF.

(wb, wwdxc BC-DX TopNews Aug 23/25)

KUWAIT 1593 14 Aug, 2219 UT, Radio Free Iraq, with call-in show featuring female announcer and a male caller. The discussion (argument?) was getting pretty intense. Fair signals with moderate local noise and a slow fade.

(Al Muick-AFG, dxld Aug 18)

IBB Kuwait - Report of Inspection (March 2010)

MW [tentat]1386 kHz 600 kW to Iran delay.

Coverage map show the main lobe direction of Mashad-IRN and Asghabad Turkmenistan.

<<http://oig.state.gov/documents/organization/141121.pdf>>

<<http://oig.state.gov/documents/organization/146149.pdf>>

<<http://oig.state.gov/documents/organization/143919.pdf>>

"The bilateral agreement under which the IBB Kuwait Transmitting Station was established came about as one of the acts of a Kuwaiti Government grateful for its liberation on February 26, 1991, by a U.S.-led coalition during the Persian Gulf War. Kuwait had been under occupation since August 1990, when Iraq invaded it under the leadership of Saddam Hussein. The bilateral agreement leased to the United States, without cost, a 12-square kilometer tract of land approximately 48 miles north of Kuwait City for the purposes of transmitting international broadcasts.

The agreement included favorable rates for electric power, to be no greater than the rates charged to the Government of the State of Kuwait. That rate is currently just over one-half U.S. cent for each kilowatt hour. Consequently, the IBB Kuwait Transmitting Station is the most cost-effective Station in the BBG network.

[...]

When completed, there will be six shortwave transmitters available for operation. The {600kW} medium-wave project is discussed in the section below.

[...]

As part of a project to enhance broadcast capability from Kuwait, Engineering shipped two high power shortwave transmitters, two high power medium wave transmitters, antenna towers, associated components, and related materials and equipment from closed IBB facilities to the Kuwait Transmitting Station.

In addition, the Kuwait station has served as a holding area for additional broadcast equipment earmarked for other facilities. Kuwait's hot and dry environment makes an excellent location for storing transmitter equipment because tubes and other sensitive components are not subjected to high humidity levels or the multiple freeze and thaw cycles that can lead to component damage.

[...]

Construction of a \$5.2 million, 600,000-watt, medium-wave transmitter intended to reach a high-priority audience in Iran is far behind schedule. The expected completion date was initially May 22, 2008. As it is, the powerful transmitter was not available following the June 12, 2009, disputed election in Iran, and it remains unavailable. Existing medium-wave assets at the Kuwait transmitting station can reach only a narrow band of the western portion of Iran.

[...]

The reasons for the delay are multiple. Even though the station had been paying the contractor, the contractor defaulted on paying its local vendors and employees. The contractor then left the job without completing it. Shortly before he defaulted, the contractor was also debarred by the Department of Defense from other contracts.

IBB Washington, which let the contract, is seeking resolution of the issue with the contractor and vendors. During the inspection, IBB terminated the contractor responsible for the delays. IBB then negotiated with the manufacturer of switchgear needed to complete the project for its shipment. IBB is also in discussions with prospective contractors for installation of the switchgear. IBB hopes to simultaneously commission the transmitter and antenna system to complete the project.

[...]

The station manager is managing work on several major projects. One is the construction of a \$5.2 million, 600,000-watt, medium wave transmitter intended to reach a high-priority audience in Iran. This project is far behind schedule. The reasons for the delay are multiple. The main reason is that the contractor recently defaulted and left the job.

Shortly before he defaulted, the contractor was also debarred by the Department of Defense from other contracts. IBB Washington, which let the contract, is taking immediate steps to move forward with this high priority project. U.S. interests require the immediate completion of a transmitter that can reach all of Iran.

[...]

The expected completion date was initially May 22, 2008.

[...]

- a.. Management of the IBB Djibouti transmitting station.
- b.. 24-hour/day FM transmissions of Radio Sawa in Arabic (95.7 FM) and Voice of America in English (96.9 FM) from transmitters in Liberation Tower in Kuwait City.
- c.. 24-hour/ day, medium-wave transmissions of Radio Sawa in Arabic (1548 AM) into Iraq.
- d.. Management of FM affiliate contracts in the Middle East and Africa (see Appendix A).

e.. High power shortwave transmission in multiple languages for the Voice of America and for BBG grantee surrogate broadcasters (Middle East Broadcasting Networks, Radio Free Europe/Radio Liberty, Radio Free Asia) in Asia, Africa, Europe, and the Middle East (see Appendix B)

When the Ismaning, Germany, Transmitting Station was decommissioned in 2007, its equipment was sent to the IBB Kuwait transmitting station. At that time, the Kuwait station took on the new role of serving as a gateway in the global SIS.

When the IBB Morocco transmitting station was decommissioned, the Kuwait station took over management of the IBB Djibouti transmitting station, which had been managed from the Morocco station. It also took over seven Moroccan FM stations, as well as seven other African FM stations that had been managed by the Morocco station (see Appendix A). This is in addition to the 10 FM stations in the Middle East the station was already managing.

Most of this expanded mission has come since the last OIG inspection in 2003. Moreover, since the last OIG inspection, the Kuwait station has added four shortwave transmitters-three shipped from the Greece Transmitting Station in 2003 and a fourth from the Germany station in 2004. Four high-gain curtain array antennas for the shortwave were also installed in 2004. In addition to its three medium-wave transmitters that were operational in 2003 together with a system of transmitting towers, an additional medium-wave transmitter project and a shortwave expansion project are underway. Two new shortwave transmitters were received in mid-2009.

An 80 ton rotating antenna for the shortwave expansion project was under construction during the inspection. When completed, there will be six shortwave transmitters available for operation. The medium-wave project is discussed in the section below. The IBB Kuwait transmitting station and its current station manager have done an outstanding job of carrying out the station's expanded mission as demonstrated by its near perfect availability performance measure and managing the multiple ongoing projects, including security projects and projects for infrastructure augmentation.

[...]

Assets valued at \$31 million, including:

- two high-power, medium-wave transmitters (600 kW and 150 kW) and one smaller (50 kW) backup transmitter
- four 250 kW shortwave transmitters
- the station is the process of installing an additional 600 kW medium-wave transmitter and two additional 250 kW shortwave transmitters.
- An extensive satellite gateway system with multi-channel direct uplink/downlink capabilities to the Atlantic Ocean Relay, Indian Ocean Relay, AsiaSat, and Hot Bird satellites.

Source: Transmitting Station Manager - data as of Oct 7, 2009.

[...]

Inspection of International Broadcasting Bureau Kuwait Transmitting Station:

At all levels, IBB staff members were energetic, interested, and involved in their primary mission - that of broadcasting U.S. government programs to a foreign audience. Recent years have been difficult for the staff at overseas broadcasting stations as budgets and resources are continually shrinking.

In Germany, for example, as recently as October 2006, the station had three transmitting sites (Ismaning, Lampertheim, and Biblis) with a staff of 41. At the end of FY 2009, 20 staff members remained. During that same time, however, the number of annual shortwave broadcast hours has increased from 32,400 to 45,760. In addition, the Germany Transmitting Station has taken on numerous additional responsibilities for IBB operations in Tajikistan, Cyprus, and Afghanistan.

- also involved in ... 972 kHz Radio Aap Ki Dunyaa, Orzu Tajikistan, 990 kHz Radio Sawa, Cyprus, and 621 kHz Radio Mashaal, Khost Afghanistan operations.

[...]  
Fifteen IBB staff members were employed previously as technicians at the IBB Philippines Transmitting Station. The personnel files for these employees indicate that they were hired from abroad as third country national (TCN) employees, and brought to Kuwait at U.S. Government expense. Unlike non-Kuwaiti TCN staff hired in Kuwait, these employees, whether on tours of duty in excess of 1 year or for tours of duty for 1 year or less, were entitled under 3 FAM 7274.4-3 to benefits that may not be in the local compensation plan.

These Filipino TCN employees are covered under the local compensation plan, which includes salary in local currency,

[...]  
Due to its isolated location, the transmitting station provides two shuttle buses from residential areas to the station and back. The station's 48-hour work week includes two 12.5-hour days and three 8-hour days. The technical staff works rotating shifts, to cover nights, and the compensation plan reflects this arrangement.

[...]  
A spot check of the physical stock found 29 transmitting tubes, each valued at \$38,000. The inventory in the Stock Record System showed 19. BBG concedes that the inventory of these high-value items called tetrodes did not match, but states that the agency procedures are not to declare the fragile tetrodes to be viable components until in-service testing can be done.

In-service testing of such tubes is a time consuming process. With the broadcasting schedule of the Kuwait Transmitting Station, it may take up to 6 months to fully test a tube and declare it to be viable. Because of the large number of tubes shipped to the station, combined with the other workloads placed on the station, the station transmitter plant technicians have not been able to complete in-service testing of these tubes. "  
(William Hague-UK, NWDXC Aug 17)

KYRGYZSTAN 4010 on 25 Aug at 0125 UTC, Kyrgyz Radio. Very strong carrier with abysmal modulation. I could just make out the man and woman speaking. They need to turn up the dial on the modulator. No help even

from synchronous AM detection.  
(Albert Muick-AFG, hcdx Aug 25)

LIBERIA 3960.4 Star Radio? at 1934 UT, someone here with a threshold carrier, but not enough audio for anything close to an ID. If Star Radio is still on this frequency, has anyone given it an exact measurement?  
20 August.  
(David Sharp-NSW-AUS, dxld Aug 23)

LITHUANIA 9635 IBB Radio Liberty program to Tatar-Bashkiria, 5-6 UT, at 0545 UT Aug 21, S=9+10dB on backlobe of 79degr antenna in Lithuania.  
0559 UT endless loop "This is Radio Free Europe Radio Liberty Praha ..."  
til TX off at 06.02:40 UT.  
(wb, wwdxc BC-DX TopNews Aug 21)

MADAGASCAR 6134.938 Radio Malagasy, at 1350 UT, French, news or similar by a woman until 1400 UT, then into hilife. Excellent, near local level.  
Nothing on 7105 kHz. 20 August.  
(David Sharp-NSW-AUS, dxld Aug 23)

6134.91 R. Malagasy, Antananarivo. Surprisingly early, vocal group, rather distinctive, 1240 UT. French announcements 1245 UT, then music again. More announcements. 1247 UT, ID as "RNM" 1248 UT, and again at 1252 UT. Adverts, "Radio Madagascar" ID 1254 UT. Quite OK signal, first time I've heard this outlet, and no sign of 7105 kHz, July 30.  
(Craig Seager-NSW-USA, Aug ARDXN via dxld Aug 23)

MAURITANIA 4845 20 Aug, 0058 UTC. Radio Mauritanie in Arabic talk, staying on past supposed 0100 UT sign-off. Some Arabic prayer and French announcements after 0100 UT with male announcer. Probably on Ramadan schedule. Reasonably strong signal for this late in the morning, but modulation very low. QRM from CW UTE on 4844 kHz.  
(Albert Muick-AFG, hcdx Aug 20)

MEXICO [and non] 6185 at 0134 UT Aug 21, no Portuguese, just Spanish, so XEPPM, apparently remote report about Huapango, M&W conversing in the open, but audio cutting off and on, mostly off. There have been reports of RNA [Brazil] back on 6185 kHz, but not now, it seems, tho certainly there on 11780 kHz.  
(Glenn Hauser-OK-USA, dxld Aug 23)

MOLDOVA Mega-Streams aus Moldova. Hallo zusammen, gerade in Moldova gefunden. Die Streams des Staatssenders:

<[http://212.0.196.171:8000/PGM1\\_256kb](http://212.0.196.171:8000/PGM1_256kb)>

NETH ANTILLES [BONAIRE] Amateur Radio DXpedition to operate from  
facilities, Antennas of RNW BONAIRE.

The dissolution of the Netherlands Antilles in October will, per the rules  
of the ARRL, create several new radio "countries" for the purposes of  
award counting. Accordingly, a large-scale amateur radio DXpedition to  
Bonaire is planning to take to the airwaves as soon as the results of the  
referendum become official on Oct 10th.

From their press release:

Radio Netherlands.

With 6 locations around the island, there should be plenty of opportunity  
for a QSO. However, our premiere location is that of the short-wave  
transmitter site, Radio Netherlands. Bonaire is home to a large relay  
station and its impressive aerial park which provides up to 21 dBd gain.  
We are extremely pleased to announce that with the co-operation of the

World Service, our group of hams has been granted use of the antennas during their "dead hours" on the HF bands.

In addition to our other locations, we anticipate being active on HF daily between 1230 and 1830 UT from the Radio Netherlands facility. We expect to utilize this opportunity on 30, 20, 15 and 17 meters. Radio Netherlands is also expected to air a special program dedicated to the new status of the radio amateurs on Sunday, October 10th.

More information will be available on the Radio Netherlands' website <<http://www.rnw.nl>> or on DXpedition site <<http://www.bonaire2010.com>>

Contacts with schools.

Between October 11th-15th, the World Service's facility will also serve another purpose. A group of schoolchildren from Bonaire will be contacting another group of children in the Netherlands who will be the guest of Dutch ham PD1DX. This will provide an opportunity for the group of new Dutch country citizens to ask each other questions in order to get to know one other a little bit better.

full press release at  
<<http://www.bonaire2010.com>>  
(via Mark Schiefelbein-MO-USA, dxld Aug 17)

NIGERIA 15120 VoNigeria in En at 1510 UT Aug 20, powerful broadcaster at S=9+25dB level. Buzzy background audio. Female English announcer and some interviews given. 15-16 UT En scheduled.

VoNigeria started with crash start into Holy Quran prayer at 17.29:50 UT, Aug 20, S=9+20dB, Ar sce scheduled til 1800 UT.  
(wb, wwdxc BC-DX TopNews Aug 20)

6089.86 FRCN - Kaduna, at 0400-0435 UT on August 21, talk in listed Hausa. Qur'an. Poor to fair in noisy conditions. Anguilla 6090 kHz off the air allowing this station to be heard.  
(Brian Alexander-PA-USA, DXplorer Aug 22)

15120 Voice of Nigeria, 1803-1820+, August 22, tune-in to English news. Gave program schedule at 1805 UT. Afro-pop music. Off the air at 1815-1819 UT. Back at 1819 UT with talk about the Sudanese people. Poor. Weak in noisy conditions.  
(Brian Alexander-PA-USA, dxld Aug 23)

and BBC 702 kHz some 340 meters southwards too.

PAKISTAN Karachi site - no progress.

There is no progress in building up two new 100 kW SW transmitters and two revolving Thomcast antennas at Karachi Landhi site. Project started in June 2005 already.

Today discovered a new photo image, taken from N5 National Highway towards RP TX site:

<<http://commondatastorage.googleapis.com/static.panoramio.com/photos/original/20067956.jpg>>

Two tall - probably MW masts - visible in the background.

And another image taken across the railway from south-east

<<http://commondatastorage.googleapis.com/static.panoramio.com/photos/original/37011204.jpg>>

Present Google Earth image is of 23 May 2009.

Checked historical 21 Oct 2004 image and noted five(5) curtain dipole antennas, which are dismantled now, in 2008/2009?

1 x 138 / 318 degrees to CLN / resp. EUR, U.K.

2 x 120 / 300 degrees to IND/BGD/MLA, resp. ME/NE

2 x 96 / 276 degrees to CHN/LAO/VTN, resp. Persian Gulf/EGY

KAC Karachi

not found in B-01 season table. But found 50 kW with call 'APK' like Karachi, in Pashkevich and Ormandy files of the 90ties.

Only contain 96, 120, and 300 degrees entry, very limited usage of Karachi gear.

(wb, wwdxc BC-DX TopNews Aug 12)

[...] In 2009 - the two new transmitters were on site, and that the old transmitting hall was stripped of all of the old equipment. Preparations were being made to install the new transmitters when the work was completed. I don't know where the transmitters have come from, but like you, would guess that the revolving antennas will be French.

Since the, Aslam Javaid wrote earlier this year that the antenna system had NOT been ordered, and that approval was awaited before this could be done. I suppose the antennas will need to be constructed and then shipped to Karachi for installation, and this will take even more time. Yes, there are MW transmitters on the same site, and the masts visible in your excellent photographs will be them. The smaller self supporting tower looks like a communications system (it can be seen in both photo's), while the rest appear to be power lines.

Originally there was one MW, 2x10 kW SW and 2 x 50 kW SW. Call signs were APK for MW and APK-2-5 for SW. As far as I can remember, the two 10 kW SW were used only for internal services, and the two 50 kW were used towards India, Ceylon and BGD / the ME and Turkey and to WeEUR. I'm not sure now if the EaAfrica services (Swahili and Gujarati plus some English) came from Karachi or Rewat.

Perhaps the old antenna system at Landhi had been allowed to fall into disrepair, or would not have been suitable for the new 100 kW. And BTW, the "new" API-9 unit at Rewat was apparently one that had been delivered many years ago for Azad Kashmir Radio at a place called Mirpur and never used. This according to Aslam Javaid. It is no longer listed, so assumed to be inactive. When it was tested it put out a nice clean signal, but was only used for a few hours each day.

(Noel Green-UK, wwdxc BC-DX TopNews Aug 14)

PAKISTAN 11510 R. Pakistan, Islamabad. Weak reception of Koran chants and presumed Chinese explanations. A strange combination! Heard 1210 UT, June 28.

15100 R. Pakistan, Islamabad. Directly into English from Urdu with news at 1100 UT. Good signal but very muffled audio on June 22.

(Dennis Allen-NSW-AUS, Aug ARDXN via dxld Aug 23)

PAPUA NEW GUINEA 3335 Radio East Sepik, Wewak, at 1153 UT with Classic Oldies music, 1200 UT mention of NBC and man with news, sounding like it was in English. At 1235 UT host taking phone calls, speaking in Tok Pisin and English. Poor, Aug. 20.

(Harold Sellers-BC-CAN, dxld Aug 23)

SLOVAK REP 9740 Radio Miraya, at 0358-0412 UT on August 21, Arabic talk. English news at 0401-0411 UT about freedoms in Southern Sudan.

"Radio Miraya" IDs. "Miraya" jingles. Gave website :

<<http://www.mirayafm.org>>

Arabic talk at 0412 UT. Poor to fair with adjacent channel splatter.  
(Brian Alexander-PA-USA, DXplorer Aug 22)

SRI LANKA 5860 20 Aug, 0118 UTC. Radio Farda, caught in mid-music playing Uriah Heep's Lady in Black. Immediately into Middle Eastern music after ID. Now \*that\* is bizarre! That's about the last music I ever expected to hear on Farda! Surprisingly poor signals, no QRM, but heavy fluttery propagation.  
(Albert Muick-AFG, hcdx Aug 20)

SWITZERLAND Digitalradio in der Schweiz.  
In der Schweiz boomt jetzt DAB(+) richtig; in den letzten 12 Monaten wurden hier 700'000 DAB-Empfänger verkauft, somit dürften nun (zusammen mit den rund 400'000 Geräten die es schon vorher gab) nun über 1 Million Haushalte Digitalradio-Empfang haben; heute senden auch einige Privatradios in DAB(+), so z.B. Radio Eviva, Radio Top Two, Radio Basel und Radio Energy.

Wir haben hier in der Deutschschweiz 2 eigene DAB-Ensembles, zum einen das SRG-Ensemble auf 12C mit Programmen primär im normalen DAB und das private Swissmediacast-Ensemble mit primär privaten Programmen (14) im DAB+ Format. Zudem kann in weiten Teilen der Deutschschweiz auch das baden-wuerttembergische Ensemble (mit u.a. den 3 Deutschlandradios) empfangen werden. DAB ist also das Digitalradioformat, welches zumindest hier bei den Hörern wirklich Erfolg hat.

HD-Radio IBOC ist eine Liebhabelei eines Radioexperten, von Markus Ruoss; nur 3 Privatradioprogramme (R. Sunshine, R. Argovia und Capital FM) starten jetzt in den nächsten Monaten mit fünf Senderstandorten in diesem Digitalradiomodus; wer in HD-Radio IBOC sendet, belegt statt einer UKW-Frequenz fünf UKW-Frequenzen. Da unser UKW-Band mittlerweile total überfüllt ist, kann das hier nicht wirklich gut funktionieren.

HD-Radio IBOC wird also wohl nach wenigen Jahren wieder verschwinden.

<telsiz @ kiyiemniyeti.gov.tr>  
(Albert Muick-AFG, hcdx Aug 20)

UGANDA 4750 Dunamis Shortwave, Mokono. Nice African hi-life music 1833 UT tune/in, fair, announcements. 1901 to 1902\* UT, July 29.  
(Craig Seager-NSW-AUS, Aug ARDXN via dxld)

4975.95 Radio Uganda, at 2117 UT, English, good with hilife and talk by a man. First time I have heard this in many days. All alone with no sign of Voice of Russia relay. 21 August.

7194.99 Radio Uganda, at 1914 UT, English, presumed with news or similar (alter- nating stories between a man and a woman). Fair at best with poor modulation. Much weaker than 4976v kHz. 20 August.  
(David Sharp-NSW-AUS, dxld Aug 23)

7194.98 Radio Uganda, at 1932-2117 UT on Aug 19, English, DJ played western pop songs, among which Celine Dion: "The Power of Love", Elton John: "Candle in the Wind", late night musings. Pips at 2100 UT TOH while same program continued to abrupt 2117 UT s/off in mid-song. Just about reportable, badly splattered over by VOIRI & RFI at S=9+40dB on 7205 kHz.  
(Martien Groot-HOL, dxld Aug 20)

UBC Radio (Radio Uganda) heard this evening on its daytime channel of 7195 (instead of 4976) kHz. Heard with weak signal around 1700 UT tune-in improving to fair by 1830 UT when carrying phone-in discussion in English about the Ugandan elections. Still audible at 1950 UT, now with English-language pop music.

Thanks to a tip from Zacharias Liangas in Greece who reported Uganda on 7195 kHz after 1600 UT on 9-11 August[and German DXers on Aug 5].  
(Dave Kenny-UK, bdx-UK yg via dxld Aug 23)

R. Uganda just now on 7195 kHz.

Hello all, This intruder, Radio Uganda, has been reported to the Uganda authority and action has been promised. Details will follow when available.

Bill Musoke, 5X1JM of Kampala, Uganda has put in a formal complaint and reports:

"Today I had a very useful meeting with the Frequency Manager who made me write a formal complaint and he promised to follow it up with the field monitoring unit. He will also review the articles in the ITU manual that deal with the said band width. I am sending him e-mail to request him to give me a formal response which I will share with you."

73, Ted 5Z4NU, Nairobi  
(E.H.M. Alleyne-KEN, intruderalert Aug 25)

UKRAINE 11530 Denge Mezopotamya via Mykolaiv (Nikolayev) site in Kurdish at 0421 UT, Aug 23. 300kW at 129degr to NE/ME. S=9+10dB, though back lobe direction here into Europe. Rather funny Kurdish music/songs on Ramadan.  
(wb, wwdxc BC-DX TopNews Aug 23)

UNIDENTIFIED [tentat KAZAKHSTAN] 17545 YFR US religious program relay site at 1200-1300 UT at S=7-8 signal level.

First noted and reported by Ralf Ladusch in Austrian A-DX ng on Tue Aug 17.

Today Aug 19 at 12-13 UT logged YFR religious English sce "Open Air Forum" phone in program, not in // to 17555 YFR program in English too.

At 1227-1228 UT ID, YFR website announcement, URL and real audio 24 hrs service mentioned, as well as phone-in-# of

1 - 800 - 322 - 53 85.

I guess this 12-13 UT transmission is meant to East Asia too, via Almaty-KAZ relay site, like two others 11-12 UT 15560alm, 13-14 UT 13820alm, latter according to WRTH 2010 spring PDF file update. Not mentioned in Aoki, Eibi or HFCC tables.

17555yfr from Okeechobee Florida logged only with tiny S=3 signal here in Germany, at same time slot. Latter though 100 kW at 160 degr in opposite direction. HFCC list shows Spanish, but heard always in English at 1200 UT.

17545alm? is rather stronger on S=7-8 level.

Hymn at 1259 UT, TX off at 12.59:36 UT, and opening hymn on 13820alm then at 1300 UT even.

Always publication of YFR whole broadcasting schedule leaves a lot to be desired.

IRELAND/SOUTH AFRICA RTE Radio coverage of All Ireland finals 2010. SW freqs. [rather Sunday Sept 5th and 19th, 2010 wb.]

Shortwave to Africa: In Africa, where many Irish people live and work, often in relative isolation with poor communications, RTE is providing special transmissions on shortwave radio:

Rather

To South Africa: 1300-1700 UTC on 7265 kHz MEY 100kW 005deg

To East Africa: 1300-1500 UTC on 15400 kHz MEY 250kW 019deg

1500-1700 UTC on 11695 kHz MEY 250kW 015deg

To West Africa: 1430-1600 UTC on 15445 kHz MEY 250kW 330deg

1600-1630 UTC on 11805 kHz MEY 100kW 335deg

ALGERIA 6297 Polisario Front, Rabouni, near Tindouf, ALG, has been regular here, but the tx is often "stuck" with an empty carrier, or then it's off, or carries nothing but the sort of noise sound that seems to be their "IS" prior to the start of the prgr. Whenever there is no audio, or noise is what's heard, then their current // of 700 kHz MF exhibits the same; this less known fq is being used since 01 Aug'10. Their other outlet, 1550 kHz MF, is still off.

(Carlos Goncalves-POR, wwdxc BC-DX TopNews Aug 25)

ANGOLA 4949.7 RNA Canal "A", Mulenvos, 2204-2217, 14 Aug'10, Portuguese, phone-ins; // 1088 Mulenvos; 35231, fair modulation. Better on Aug 19, 2150 UT.

(Carlos Goncalves-POR, wwdxc BC-DX TopNews Aug 25)

AUSTRALIA 5025 VL8K, Katherine NT, 2204-2218, 16 Aug'10, talks, songs; 35332; VL8A 4835 & VL8T 4910 both carrying a different prgr. These two were obs'ed. on Aug 20 at 2140 UT, 34342 & 34231 ratings respectively.

(Carlos Goncalves-POR, wwdxc BC-DX TopNews Aug 25)

BOLIVIA 4700 R. San Miguel, Riberalta, 2202-2211, 21 Aug'10, Castilian (pres), songs; 25231.

6155.3 R. Fides, La Paz, 2225-2237, 20 Aug'10, Castilian, talks; 23431, adj. QRM.

(Carlos Goncalves-POR, wwdxc BC-DX TopNews Aug 25)

BRAZIL 11805 SRDA (Super Radio Deus e Amor), Rio de Janeiro, 2140 UT, August 25, reactivated. Week signal heard here in the middle of Europe but clearly in // to 11765 kHz.

Exact frequency: 11804.99 kHz. "A Voz do Brasil" relay at 2200 UT but covered by VoA. This frequency (ex Radio Globo) was inactive for about one year(?). Have been trying it many times but not even a carrier detected...

(Karel Honzik-CZE, wwdxc BC-DX TopNews Aug 26)

3325 R. Mundial, Osasco SP, 2221-2234, 14 Aug'10, talks, music, phone-ins; 15231, but much better on Aug 19 at 2115 UT, less static.

(wb, wwdxc BC-DX TopNews Aug 27)

CHINA/TINIAN BC-Stoerer 21410 kHz. Ich moechte eine Intruder-Meldung abgeben:

Um 0420 UT stellte ich auf 21410 kHz ein Mischprodukt zweier chinesischer Rundfunksender auf 21550 und 21690 kHz fest. Beide Sender haben den gleichen Modulationsinhalt (Sprache/Musik chinesisch). Das zugehoerige weitere IM3-Produkt befindet sich auf 21830 kHz. Beide Stoerprodukte haben einen Abstand von ca. 40dBc zu den Nutzsignalen.

(Hans, DL8MCG, Aug 25)

Ich werde in den naechsten Tagen ebenfalls die QRG 21410 kHz beobachten. Mal sehen, ob das Sender-IM3 wieder kommt. Ich schaue einfach nach den beiden QRGs 21550 und 21690, ob sie da sind ... Rein rechnerisch ist bei den beiden QRGs 21550 und 21690 kHz diese IM3 moeglich:

$21550 \times 2 = 43100$  minus  $21690 = 21410$  kHz.

(Uli, DJ9KR Aug 25 <[www.iarums-r1.org](http://www.iarums-r1.org)> <[www.iaru-r1.org](http://www.iaru-r1.org)> )

GUAM 12585 on 25 Aug at 1240 UTC, US Coast Guard Station NRV with SITOR / CW marker and fair signals, no interference.

(Albert Muick-AFG, hcdx Aug 26)

GUAM TWR Guam Transmitter Replacement Project.

Since 1977, God has blessed the Asia region with lasting fruit because of TWR's broadcasts from the island of Guam. Thirty-three years later, TWR-Guam is still utilizing the same four, 100-kilowatt shortwave transmitters. This equipment has far exceeded our expectations, but it has become apparent that we need to take immediate action to ensure that Asia continues to be adequately blanketed with the truth of the gospel.

Normally, new 100-kilowatt shortwave transmitters carry a price tag of over \$1 million each. Amazingly, the Lord has opened up an opportunity for us to obtain and install two used, but recently updated, top-of-the-line, 250-kilowatt transmitters for just under \$690,000! Believe it or not, this price includes shipment to Guam and all of the required building modifications necessary to install these transmitters!

In the interest of stewardship, TWR wants to raise the needed funds before we begin the process of putting these powerful transmitters into service. The installation process is a lengthy one. Our goal is to begin by November of 2010 and the project is estimated to take roughly a year to complete.

Will you join us in "loving Asia by radio" by giving generously to this critical project? Along with broadcasting with greater power and efficiency, these upgraded transmitters can broadcast in both analog and digital modes, positioning us to meet the needs of Asian listeners well into the future.

Watch the Video! - 2 x Thomson-CSF TRE 2326 units, 250kW class.

9525.93 VoINS Jakarta in Arabic, many ID's at 1620 UT Aug 28.  
(wb, wwdxc BC-DX TopNews Aug 28)

IRAN 1458 25 Aug at 2112 UTC, IRIB with national program. Good signals supposedly only 10 kW, peaking at S=7 and some deep fades. Completely blocking any chance at Mayotte. Got them earlier in the year when Iran was off for whatever reason.

1467 25 Aug, 2110 UTC, IRIB with national program. Fair signals.

1503 25 Aug, 2107 UTC, IRIB with national program of traditional music. Fair signal only with no QRM.

1512 25 Aug, 2103 UTC, IRIB Regional carrying national program with Iranian traditional music and soft talk. No sign of Saudi's BSKSA Quran program supposed to be here with 1000 kW from 1300-0300 UT.

1584 on 25 Aug at 2032 UTC, IRIB Maku, running national program with male and female announcers, // with just about every other outlet on the mediumwave band. Very strong signals with minimal QRM for only 10 kW.

(Albert Muick-AFG, hcdx Aug 26)

15240 IRIB Kamalabad in Hebrew 1200-1230 UT, S=9+30dB powerhouse, // 13685 Sirjan site S=8-9.

(wb, wwdxc BC-DX TopNews Aug 27)

7220 IRIB Sirjan in Armenian at 0300 UT Aug 31, strong and clear audio at S=9+25dB level.

(wb, wwdxc BC-DX TopNews Aug 31)

IRAN 702 / 3985 Voice of East Azerbaijan. After some discussion on the German-Austrian A-DX group, the conclusion seems to be that the Tabriz regional station of Iran's IRIB is broadcasting a special Ramadan programme on shortwave and mediumwave. Check next night; this is all somewhat still presumed status. Ramadan runs until around 9 or 10 September this year.

Presumably the schedule is:

2330-0130 UT 702, 1323, 3985 kHz

0130-0430 UT 702, 1323 kHz

Programme "Avbashdanlyq" (Voice of East Azerbaijan - IRIB Tabriz) in AZERI language. Plus FM outlets 90.4, 100.9, 105.5 MHz and Intel 902 satellite.

The website

<[http://tabriz.irib.ir/index.php?option=com\\_content&task=view&id=1646&Itemid=247](http://tabriz.irib.ir/index.php?option=com_content&task=view&id=1646&Itemid=247)>

announces this broadcast for the 2009 Ramadan, and the current observations indicate that the same is true in 2010. They say that the programme runs from 4 to 9 a.m. (=UTC+4.5 hrs), and "120 minutes" on the "overseas" service (that would be 3985 kHz). Thanks to Google Translate for improving my Farsi.

3985 kHz has about the strength as the Voice of Croatia on the same frequency. Reception on 702 kHz is good here in Leipzig-Germany, // 3985 kHz, but Patrick Robic in Austria reports a different Iranian programme which might stem from the Bushehr transmitter near the Persian Gulf, so beware which one it is you are getting. Yours truly observed 3985 kHz to disappear at 0130 UT though hard to tell for sure with the Croatian powerhouse interfering.

702 kHz is optimum reflection via the Kiashar transmitter on the Caspian Sea, usually in use for the external service for the Caucasus region.

4mast directional antenna 37 24 36.33 N 50 00 44.51 E (thanks wb)

Thanks to Patrick for bringing this up initially, and to Dirk, Wolfgang, and Mauno for greatly helping to solve this.

There is another Iranian 75mb channel on 3945 kHz (until 0100 UT). Regular Pashto service as registered??

(Eike Bierwirth-D, hcdx Aug 29)

702 / 1323 "Avbashdanlyq" from 4 am to 9 will be broadcast to religious education, Islamic Sufism, Islamic history and Miscellaneous items."

"Avbashdanlyq" from 4 am to 9hrs. - Das kommt dann auch mit der Nationalhymne zum Programmbeginn um 2330 UTC hin. Danke !

(Patrick Robic-AUT, A-DX Aug 29)

Yes, in the file 24th Aug 2330 UT I can hear 702 kHz with clear Tabriz ID // 1323 kHz, while 846 and 1026 kHz carried R. Iran. 1152 kHz seemed to be off, as it has been for some years now.

[...] these are special transmissions for Ramadan, 702 kHz and also some other frequencies have these. 702 kHz is NOT on the air normally at that time. Last year they carried Tabriz provincial prgr. at that time. I haven't checked 3985 kHz. I attach a recording from last year of 702 kHz.

You might check for // with 1026 kHz. Sounds like in your clip they read temperature report for Caucasus area, I think I hear Quba and Naxcivan mentioned. I have a couple of Perseus files from last week, I'll check them.

(Mauno Ritola-FIN, Aug 29)

Voice of East Azerbaijan. Some notes:

The 702 kHz facility, at a location also transliterated as Ami Kiasar or Ami Keyasar, has obviously been designed for transmissions to the then Soviet Union. It has two directional antennas of four masts each (a popular much-bang-for-money design), aiming almost due north, one at about 350 and the other at about 10 degrees. WRTH 1994 showed this facility on 702 and 1404 kHz with 800 kW. Apparently since then 1404 kHz has at some point been replaced by 1521 kHz and now the transmitter is not in use at all, while the power on 702 kHz is now listed as 500 kW.

3985 kHz is in use from Kamalabad for Russian 1700-1800 and 1930-2030 UT, so it appears to be safe to assume that this applies to the Tabriz special, too. Has Sirjan an antenna for 75 metres at all?

What originates from Sirjan instead are the regular foreign broadcasts in Azeri, at present 0330-0530 UT on 13710 kHz and 1430-1700 UT on 6000 kHz. It is well possible that the IRIB branch at Tabriz is involved in the production of these programmes, too, although I so far saw only vague mentions of IRIB studios outside Teheran preparing content for the foreign service, too.

(Kai Ludwig-D, dxld Aug 30)

3985 is registered for the scrapped Mashhad site - wb says in fact it's been via Kamalabad for 3 years; AOKI lists Sirjan.

There is another Iranian 75m channel on 3945 kHz (until 0100 UT).

Regular Pashto service as registered??

IRELAND RTE Radio coverage of All Ireland finals 2010 - SW freqs.  
Irish public broadcaster RTE has published details of its worldwide coverage of the All Ireland Finals on 4 and 18 Sept 2010:  
[rather Sunday Sept 5th and 19th, 2010 wb.]

Britain: Across most of Britain, listeners can receive coverage on Long Wave 252 kHz. In addition RTE Radio 1 is available on the UK free to air satellite platform Freesat on channel 750.

Worldwide: Across the world, the match commentaries will be available online at  
<[www.rte.ie/radio1](http://www.rte.ie/radio1)>

Shortwave to Africa: In Africa, where many Irish people live and work, often in relative isolation with poor communications, RTE is providing special transmissions on shortwave radio:

Rather

To South Africa: 1300-1700 UTC on 7265 kHz MEY 100kW 005deg  
To East Africa: 1300-1500 UTC on 15400 kHz MEY 250kW 019deg  
1500-1700 UTC on 11695 kHz MEY 250kW 015deg  
To West Africa: 1430-1600 UTC on 15445 kHz MEY 250kW 330deg  
1600-1630 UTC on 11805 kHz MEY 100kW 335deg

Satellite Radio: Across the world, the match commentaries will be available on satellite radios on WRN2, channel 328.

Intelsat Service: For the first time, RTE Radio is providing a dedicated

satellite radio feed of the finals. Full coverage from 1200-1600 UTC Irish time will be available on Intelsat (C Band) Channel 10: GAA Special. The coverage of the service is extensive - from western Africa over to Australia, as well as throughout most of Europe and Asia.  
(RTE web site via RNW MN Andy Sennitt-HOL, via BrDXC-UK Aug 25)

ITALY Italian private radio on 1512 kHz. My friend and DXer Alessandro Capra this morning (26 Aug) heard on 1512 kHz the Italian private station "Onda Media Broadcast" with "prove tecniche di trasmissione". Real good signal on the highway between Padova and Bologna (North Italy) fading out moving from Bologna to Reggio Emilia. They broadcast Classic, Jazz, Pop music. After the ID mentioned also DRM tests. It was heard also by other DXers in August.  
(Giampiero Bernardini-ITA, dxld Aug 26)

JORDAN 11960 wrong time - not really at registered 0500-0715 UT, rather 4-5 UT, but irregularly.

On Aug 25th and 29th Jordan Radio Amman 11960 kHz transmission was totally OFF.

On Aug 26th 0400-0500 UT, end at sign-off time 05.00:52 UT switched off.  
(wb, wwdxc BC-DX TopNews Aug 26-29)

KUWAIT 1548 / 1548.5 on 25 Aug at 2048 UTC, US Radio Sawa duking it out with Iran who insists on being 500 Hertz higher in frequency, causing a massive heterodyne on the channel. Both running bland talk.  
(Albert Muick-AFG, hcdx Aug 26)

LIBERIA 3960 Star R (pres), Monrovia, 2054-2106, 15 Aug'10, Afr. music; 14241, adj. QRM, stronger after 2100 UT.  
(Carlos Goncalves-POR, wwdxc BC-DX TopNews Aug 25)

MADAGASCAR 7395 NHK R Japan Swahili sce via Talata-Volondry relay site at 0317 UT Aug 31, scheduled 0315-0400 UT, surprisingly fair S=9 to +10dB level.  
(wb, wwdxc BC-DX TopNews Aug 31)

6134.94 Radio Malagasy, Antananarivo. 1350 UT, French, news or similar until 1400 UT, then into hi-life. Excellent, near local level. Nothing on 7105 kHz. August 20.  
(David Sharp-NSW-AUS, ARDXC ADXN Aug 31)

MAURITANIA 4845 R. Mauritanie, Nouakchott, 0916-0925\*, 14 Aug'10, Arabic, Koranic prgr; 33443, CODAR QRM; this time, there was an immediate change to their day time fq of 7245 kHz.

7245 R. Mauritanie, Nouakchott, 1411-1443, 18 Aug'10, French, news, Koranic progr at 1415 UT, Arabic afterwards; 45343.  
(Carlos Goncalves-POR, wwdxc BC-DX TopNews Aug 25)

MOLDOVA/RUSSIA 7285 VoRussia via Grigoriopol-Maiac Moldova, World Rossii sce, S=9+30dB powerhouse. 0230 UT, Aug 30. Technologic nowosti progr, new space center platform on Amur, new planned aerospace station.

// 7270 - same Russian sce via Yerevan Gavar Armenia, stronger than Grigoriopol at S=9+40dB level. 0250 UT Aug 30. Technology and science

program.

Compared level of VoRUS English sce via 7440 Lviv-Krasne-Ukraine only fluttering at S=8-9 strength.

(wb, wwdxc BC-DX TopNews Aug 30)

MOLDOVA [PRIDNESTROVYE] Pridnestrovye Moldova Radio (PMR) 9665 kHz at 0115 UT w/chime IS then German, heavily accented. Sked per EiBi is 0000-

0200 UT M-F in 15min blocks in the following languages- Eng/Fr/Ger/Eng/Fr/Ger/Fr/Ger. But English heard at 0130 UT on 29 August and Spanish at 0145 UT. Good reception.

(Liz Cameron-USA, dxld Aug 29/30)

MOROCCO 15341.00 RTM Nador in Arabic, at 1225 UT Aug 27, S=9+10dB.

(wb, wwdxc BC-DX TopNews Aug 27)

NETH ANTILLES [Bonaire] 6165 RNW Bonaire in Sp at 0300 UT Aug 30.

S=9+10dB. Report of Jerusalem Israel clinic.

(wb, wwdxc BC-DX TopNews Aug 30)

NIGERIA 918 R. Gotel (pres) Yola, 2207-2219, 20 Aug'10, English (tent), talks, seemingly some Koranic prgr; 32431, QRM de E 917 kHz.

(Carlos Goncalves-POR, wwdxc BC-DX TopNews Aug 25)

PAKISTAN 1332 25 Aug at 2153 UTC, PBC, call-in show, // 1341, 1404 kHz.

Stomping signal with 100 kW but having a real showdown with co-channel Iran at 300 kW. The resulting mix was fading up and down on about a cyclic 2-minute interval. One really has to question whether Iran really needs all these frequencies and high power transmitters.

(Albert Muick-AFG, hcdx Aug 26)

1341 25 Aug at 2150 UTC, call-in show with many Aleikum Salaam's and excited callers. Many mentions of Pakistan. Very good signals and occasional deep fade. Also only 10 kW per WRTH.

1404 25 Aug at 2134 UTC, PBC, Long-winded talks by male announcer with several telephone calls. Several ID's. Presumed on late for Ramadan or because of the flooding. Good signals and alone on the channel at this time. Some deep fades. WTRH lists as 10 kW.

(Albert Muick-AFG, hcdx Aug 26)

PERU 4955 R. Cultural Amauta, Huanta, 2239-2246, 23 Aug'10, Quechua, talks; 35342.

(Carlos Goncalves-POR, wwdxc BC-DX TopNews Aug 25)

PORTUGAL 13810 to 14200 kHz, DWL DRM Sines noise.

The DRM transmitter "Deutsche Welle" (on 13810 kHz) in Sines / Portugal is producing a strong noise shield up to 14200 kHz. Date: Aug. 31st - 2010

Time:

0945 UTC - signal strength on 14000 kHz: S9!!!

The German PTT has been informed. Attach: Perseus sonagram.

(Wolf Hadel-D DK2OM, intruder alert Sept 1)

15425 BBC London in French via Sines relay to We&CeAF, S=9+20dB. 1200-1230 UT Aug 27.

(wb, wwdxc BC-DX TopNews Aug 27)

SAO TOME E PRINCIPE 945 R. Nacional de Sao Tome e Principe, Pinheira (VoA facility), 2033-2110, 19 Aug'10, Portuguese, songs, TCs, chatter; 23441, QRM de AGL (!) + F.  
(Carlos Goncalves-POR, wwdxc BC-DX TopNews Aug 25)

SOUTH AFRICA 3255 BBC Meyerton relay, 2134-2200\*, 21 Aug'10, WS in English to Southern Africa, Middle East music show from London's Royal Albert Hall, prgr announcements prior to abrupt closure on the hr.; 45333.

3320 SAUK / R. Sonder Grense, Meyerton, 2115-2152, 19 Aug'10, Arfrikaans, prgr abt. the Ramadan which even included prayer, then light music; 55343.  
(Carlos Goncalves-POR, wwdxc BC-DX TopNews Aug 25)

Juergen Moebius, der beim deutschsprachigen Dienst von Radio RSA gearbeitet hat, ist tot. Er verstarb nach laengerer Krankheit am 27. Juli 2010 in Berlin, wo er seit einigen Jahren lebte. Radio RSA, das 1967 bis 1990 in Deutsch sendete, gehoerte in jenen Jahren trotz des Apartheidregimes zu den beliebtesten deutschsprachigen Auslandsdiensten.  
(Gerhard Maerz-AFS, via Dr. Hansjoerg Biener-D, ntt Aug 29)

SRI LANKA 11905 on 29 Aug at 1529 UTC, SLBC, start of Hindi program to India. Many IDs in English (!) by male and female announcers as: "This is Radio Ceylon calling to India." Male announcer gave local FM rundown and seemed to get a little lost as to where the tx'ers were located. Program went into Local music and Hindi. Powerhouse signals with very little interference way underneath and slight fading. Four years and I am \*still\* trying to get a QSL out of these guys. It's just complete non-response.  
(Albert Muick-AFG, hcdx Aug 29)

TUNISIA 9725 on 29 Aug at 1642 UTC, RTV Tunisienne, Sfax with long Arabic talk by man, mentioning "Iftar," which is the first meal after sundown, I believe, and also a mention of Pakistan and Tunis. Good signals, minimal adjacent channel QRM from Voice of Vietnam on 9730 kHz.  
(Albert Muick-AFG, hcdx Aug 29)

TURKEY 5975 TRT Emirler in English. Turkish female guitar singer. S=9+20dB to WeEUR/NoAM. 0320 UT Aug 30.  
(wb, wwdxc BC-DX TopNews Aug 30)

UGANDA 4976 R. Uganda, Kampala, 2115-2132 (gone at recheck, 2148 UT), 22 Aug'10, Vernacular, Afr. music; 45433.  
(Carlos Goncalves-POR, wwdxc BC-DX TopNews Aug 25)

Uganda daytime 7195, nighttime 4976v.  
Broadcast intruder which seems to be Radio Uganda again heard on 7195 kHz at 0915Z on Friday 27th August.  
73, Ted 5Z4NU (portable at Kilifi, 36 miles north of Mombasa). Aug 27.

Radio Uganda has left 7195 kHz, is now on 4975.9 kHz QSA5.  
Ted, Thanks for the additional information. We look forward to further confirmation that Uganda has indeed moved from 7195 kHz completely.  
73,  
Chuck Skolaut K+BOG Field & Regulatory Correspondent  
ARRL The national association for Amateur Radio <k0bog @ arrl.org> Aug 25

R. Uganda has left 7195 kHz, is now on 4975.9 kHz QSA5.

Hello Chuck, Many thanks for your kind remarks, but really credit is all due to Bill 5X1JM in Kampala, I merely passed on the news to him. He has now had a formal acknowledgement from UCC who are still investigating, and we are also awaiting their consent to amateur use in Uganda of the 7100-7200 kHz segment of the band. We have that in Kenya, thankfully, but as far as I know not yet in Tanzania, Burundi or Rwanda, who are all part of the EA Community.

73, Ted 5Z4NU Aug 25

Dear Ted, this is indeed very good news. Pse convey my best thanks to Bill Musoke 5X1JM as his complaints and reports to the Ugandan authorities worked: Effective 21 August 2010 UBC Radio Uganda has left 7195 kHz and QSY'd to 4975.9 kHz.

Already on August 20 I had sent emails and a FAX to the Ugandan Embassy in Berlin and to UBD in Kampala. Of course no reply, so far!

I have heard the tx-ions of UBC on 4975.9 kHz myself last night at 2104 UTC. The signal was S=9 with my 80- and 40-m-dipole (Inverted Vee and // to each other, favourite direction north-south). Modulation was hollow and always a bit distorted. Bcos of the "crooked" QRG it is easy to hit the correct frequency easily. Have a try!

Tnx agn for your effort, pse QSP to Bill 5X1JM, and all the best yours, Uli, DJ9KR Vice Coordinator of IARU MonSys Intruder Watch Region 1 (Intruder Watch Organisations)

UAE 1269 25 Aug at 2205 UTC, Radio Asia UAE with Hindi/Malay pops, several canned IDs and no DJ. Presumed automation. Poor signals this morning and a fluttery fade. 200 kW from Ras al Khaima.

1539 on 25 Aug at 2052 UTC, US Radio Aap Ki Dunya, with roundtable discussion in Urdu. Must have been a political talk because one of the participants was shouting angrily, and I could almost imagine him foaming at the mouth. Good signals with some moderate fading. Germany's 700 kW Evangeliums-Rundfunk heard occasionally underneath, but very weak.

1575 on 25 Aug at 2037 UTC, US Radio Farda, regional 800 kW powerhouse running ME pop music and occasional DJ patter. Good signals with occasional deep fades.  
(Albert Muick-AFG, hcdx Aug 26)

USA 7811usb AFN, Saddlebunch Keys FL, 2117-2144, 21 Aug'10, comment on US features; 25332; only // 12133.5usb kHz was audible.  
(Carlos Goncalves-POR, wwdxc BC-DX TopNews Aug 25)

7506.28v very odd WRNO New Orleans, heavy pop mx, at 0225 UT, Aug 30, S=9+15dB. On Aug 31 at 0322 UT heavy pop mx again S=9+20dB.  
Strong NoAM station at cross atlantic night time slot these season again!  
(wb, wwdxc BC-DX TopNews Aug 30/31)

5985 Unid Chinese music program, most probably mis-feed via YFR Okeechobee relay site. RTI CBSC Taiwan is regularly scheduled on 6875-then 6915 kHz instead at this slot 3-4 UT ...

Checked much strong 5985 kHz on Aug 31 at 0300-0400 UT again. Sure this is

RTI CBSC Taipeh in Mandarin via Okeechobee relay. Many IDs and mentioned Taiwan many times during newscast. S=9+10dB back lobe signal into Europe.

YFR scheduled on  
6875 kHz at 2100-0100 to zone 16, 100kW 160degr,  
6915 kHz at 0300-0500 to zone 11, 50kW 181degr.  
(wb, wwdxc BC-DX TopNews Aug 30/31)

ZIMBABWE 4828 Voice of Zimbabwe, Guinea-fowl, 2155-2208, 17 Aug'10,  
Afr. music; 25231. Weaker than in the past.  
(Carlos Goncalves-POR, wwdxc BC-DX TopNews Aug 25)

#####

Ham-Fest zur IFA - und Fest der Berliner Rundfunk-Hoerer.

Zur Internationalen Funkausstellung am 4. September organisiert der Distrikt Berlin (D) ein Ham-Fest. Ein Vortrags-Programm rundet die Veranstaltung ab. Das Treffen beginnt ab 15 Uhr Lokalzeit in der C-Base in Berlin Mitte, Rungestrasse 20, in der Naehue des S- und U-Bahnhofs Jannowitzbruecke.

Dieses Jahr beteiligen sich am Fest auch die Berliner Rundfunk-Hoerer, ab 1700 Uhr Lokalzeit.

Das Programm finden Sie auf der Webseite  
<[http://dk0bln.de/wiki/doku.php?id=darc:distrikt\\_d:ifa2010hamfest](http://dk0bln.de/wiki/doku.php?id=darc:distrikt_d:ifa2010hamfest)>

Die IFA feiert in diesem Jahr ihr 50-jaehrigenes Jubilaeum. Deshalb wird seit Maerz 2010 von Berliner OV-Clubstationen der Sonder-DOK IFA10 vergeben. DK0IFA ist seit dem 26. Juni QRV.  
Der Sonder-DOK laeuft bis 31. Dezember 2010.

#####

ALBANIA 13640 low modulation of Radio Tirana. Enjoyed Radio Tirana in English today Sept 9. Yes, Drita I'm sorry to report that I tried to listen at 2000 UT, but the modulation was so low that I tuned away; the carrier was asstrong as it usually is, though, and there was no transmitter hum. Hope this helps your engineers and All the best, Anne Fanelli-NY-USA, dxld and direct.

Haven't seen this reported elsewhere, but for the past few days the 2000 R. Tirana English broadcast on 13640 kHz seems to have been replaced by their domestic service in Albanian. Went to their website, but it's Albanian-only and I couldn't find a link to their external service to check for changes. Anyone have an email address for their English service? Hope this broadcast isn't gone for good, since reception quality is usually excellent here and it's a convenient time to listen (for me, anyway :-)). Tnx and very 73 de (Anne Fanelli in Elma NY-USA, dxld Sept 4)

Glenn, Yes, during the last days we had some technical problems with radio / relay link between studio and transmitting station in Shijak.

So, instead the transmitter is fed with FM signal of Radio Tirana 1-st program. Sorry for the trouble. All the best from lovely Tirana,

(Drita Cico, RTSH-Head of Radio Tirana Monitoring since 1981, & HF Manager from 2005, RADIO TIRANA, dxld Sept 5)

Glenn, Over the past week, the Albanian transmissions at 2030 and 2300 UT have been broadcasting continuous music with no sign of the news block that usually opens the broadcasts. The music continued straight through into the English segment at 0030 UT on 9860 kHz. First thought was maybe a strike but the technical problems mentioned must be the reason.

(Will Flynn-PA-USA, dxld Sept 6)

13755, checking whether R. Tirana is back in scheduled English Mon-Sat at 1430-1500 UT: Sept 6 at 1430 nothing audible vs Cuban overload from 13680, 13740, 13780; 1431 a carrier, and can barely make out Klara's voice with English transmission schedule. Registers S9 but also with low modulation, unusable. European propagation very poor today.

Last week, Anne Fanelli in NY found the 2000 UT English broadcast on 13640 kHz instead in Albanian. Drita Cico reports that there was a problem with their STL to Shijak for a few days so instead it relayed the domestic program I, picked up off the air.

Does this mean all English broadcasts were replaced by Albanian, even all foreign-language transmissions? Shijak should keep some evergreen recordings on hand to play back from there in such emergencies, or better yet, have a backup feed route.

(Glenn Hauser-OK-USA, dxld)

Hello, Drita, Thank you for answering my question, which Glenn Hauser forwarded to you. Although I enjoyed the FM programming in Albanian, it was good to hear the English-language program again today at 2000 UT on 13640 kHz. I live near Buffalo, New York in the northeast United States, and that broadcast is at a convenient time on a frequency with no interference and excellent signal strength; the 22-meter band is a fine choice. I have enjoyed listening to Radio Tirana for many years and hope to do so for many more. Wishing you all the best as we go into the fall season, I remain Sincerely yours,

(Anne Fanelli-NY-USA, Sept 7 via Drita Cico, Radio Tirana, dxld)

13755, R. Tirana, Sept 7 at 1427 UT carrier, 1428 IS, 1430 schedule announcement. Slightly improved from yesterday, holding up better versus the CubaRM, at S=9+12 but very undermodulated and not productive to keep listening.

(Glenn Hauser-OK-USA, dxld)

Sept 10th Radio Tirana external service in English still replaced by their domestic service 1st program in Albanian language.

13639.98 .. .97 odd channel noted at 2006 UT til sudden switch OFF at Shijak engineer midst on Techno Rock pop music at 20.28:25 UTC.

At 2007 UT comment talk on "...socialist ... Komsomolze ...". Only fair S=7 signal here in dead zone Germany, the real signal skipped over our head. Only signal by side lobe vagabunding fair signal. But should be real better in the U.K. GB and IRL, as well as in Northern America.

When switched my E1 receiver sudden to 6164.98 odd channel at 2029 UT, S=9+10dB signal, and // much better 9489.97 kHz S=9+20dB level, same FM

1st program relay of Techno Rock pop mx occurred.  
(wb, wwdxc BC-DX TopNews Sept 10)

ALGERIA 6297.05 RASD Tindouf, RTTY QRM at 2154 UT, Sept 7, S=7-8.  
(wb, wwdxc BC-DX TopNews Sept 7)

6248.32 RASD, \*0601-0620+, Sept 12, sign on with Western Sahara National Anthem. Qur'an at 0602 UT. Arabic talk at 0612 UT. Middle-Eastern type music. Slightly off their usual 6297 kHz. Was on 6248.38 kHz at sign on, drifting down to 6248.32 kHz by 0620 UT. This is my unidentified station that I recently reported. Fair but weak rtty QRM. Must use ECSS-LSB to avoid Equatorial Guinea on 6250 kHz.  
(Brian Alexander-PA-USA, DXplorer Sept 12)

ANGOLA Radio Nacional de Angola is being heard most evenings, generally on 4949.7. However on August 10 at 2356 they were on 4950 and seemingly only in AM/LSB as I couldn't detect an upper sideband. Time pips at midnight followed by what probably was the news. Poor copy at only SINPO 23321.

On August 20 at 2340 they were on 4949.7 with both sidebands audible, songs and a talk mentioning Luanda prior to time pips and Radio Nacional identification, SINPO 24322. I have heard the station around 2340 on this frequency on other occasions.  
(Arthur Miller-UK, Sept WDXC-UK Contact magazine via dxld Sept 2)

4949.7 RNA-Canal "A", Mulenvos, 2221-2236, 05 Sep'10, Portuguese, extensive sports news magazine; 34342, fair modulation but adverse conditions.  
(Carlos Goncalves-POR, wwdxc BC-DX TopNews Sept 7)

ARGENTINA 15345.02 RAE Buenos Aires in German, proper S=9+20dB signal. Tango music talk on East German listener, E-mail corner, letterbox. Letters read from Christer Brundstroem Sweden, Dieter Leupold Leipzig, Michael Mehnert Hainichen, Bernd Seiser. Tiny signal of co-channel Moroccan Nador underneath.  
(wb, wwdxc BC-DX TopNews Sept 7)

AUSTRALIA/SOUTH AFRICA 15400 The Sunday Sept.5th All Ireland final between Clare and Kilkenny started at 1300 UT. 252LW is on air loud and clear but 15400 kHz via Meyerton-AFS is only weak and under stronger co-channel HCJB Australia.  
(Noel R. Green-UK, dxld Sept 5)

15400 I have only a faint signal from Meyerton, just barely sufficient for making out what this should be. And nothing at all on LW 252 kHz, it gets completely overridden by local noise. But then neither 252 nor RTE via Meyerton are exotic anyway.

Btw, these RTE sports specials also used to include a DRM transmission to Europe from a UK site. Not so anymore. But this could be a simple result of a change of transmission providers/resellers, from what used to be Merlin/VT-group{next year Babcock call BAB} to WRN.  
(Kai Ludwig-D, dxld Sept 5)

Re: 5th Sept 1345 UTC 15400 kHz carrying commentary, 59+20 db with slight co-ch qrm from HCA Chinese. English news at 1400-1402 UT foll by

commercials of Toyota & Irish Red Cross Society requesting donations for Pakistan floods.

7265 kHz completely blocked by VOIROI Urdu & CRI Sinhalese at 1400 UT.

[...] 1504 UTC: 7265 - Blocked by CRI Chinese

11695 - 59+10db

11805 - Not heard

(Alokesh Gupta-IND, dxld Sept 5)

The reason why Alokesh is hearing RTE Meyerton 15400 kHz so well would seem to be due to the azimuth in use being 19 degrees to East Africa and onwards, while Kununurra is beaming at 340 degrees to East Asia.

The 19deg beam is not good for reception in Europe, while 340deg from KNX seems to reach Germany and the UK well.

RTE-MEY 15445 kHz is a much better signal from 1430 UT at 330deg to West Africa and peaking to 9+ on the meter.

BBC English via Ascension has taken over 15400 kHz from 1500 UT, and only fair at 27deg. RTE-MEY via 11695 kHz at 19deg from 1500 UT is not audible, and there is no trace of 7265 kHz either, so far.

(Noel R. Green-UK, dxld Sept 5)

RTE Meyerton 15445 kHz at 1545 UT signal S=9+10dB here in Barcelona Spain. (Tomas Mendez-ESP, dxld Sept 5)

11695 RTE Ireland with post game or intermission commentary of Hurling finals at 1630 UT tune in. Good, Sept 5.

(Mick Delmage-AB-CAN, DXplorer Sept 5)

15400 Instead of expected RTE Dublin live sports Meyerton-AFS relay, I heard HCA Kununurra Australia's religious program in English only. 1300-1330 UT, Sept 5th. English religious talk, poor S=7 fluttery signal.

At 1346 UT noted HCA Kununurra in Mandarin, scheduled 1330-1430 UT, fair S=8 fluttery signal.

Very tiny weak signal UNDERNEATH, probably RTE Dublin sports transmission via Meyerton AFS.

(wb, wwdxc BC-DX TopNews Sept 5)

Here's the reply from RTE recvd last week regarding the txn dates ...

- Quote -

The Hurling final is on Sunday 5th September. This game is uniquely Irish and is generally not known very well outside the Irish community. The game is played with a small leather ball and is hit by wooden sticks called 'hurleys' about the same length as hockey sticks but much different in shape.

For better images and information try <<http://www.gaa.ie>>

The Gaelic football final is on Sunday 19th September. This game is also an Irish variation, not related to soccer or rugby, but uses a big ball like a soccer ball.

Best wishes, Sean.

- Unquote - (Alokesh Gupta-IND, dxld Sept 6)

AUSTRALIA/GUAM The word from Radio Australia.  
Flooding of homes (at least) in Shepparton, Victoria. Just heard about it  
on the news. Google Shepparton floods for more, such as  
<<http://www.abc.net.au/shepparton/>>

So is the R. Australia transmitter site affected? Any transmissions  
missing? At its own website,  
<<http://www.abc.net.au/ra>>  
the top story is flooding in Pakistan!  
(Glenn Hauser-OK-USA, dxld Sept 6)

Flooding near Shepparton, any effect on R. Australia? I don't know where  
the antenna is.  
<<http://news.smh.com.au/breaking-news-national/up-to-700-homes-in-shepparton-at-risk-20100907-14yzd.html>>  
(Dan Say-BC-CAN, dxld Sept 7)

RA Flooding, Spurring, Jamming Hi Nigel, We are of course wondering  
whether the RA site is threatened by the Shepparton flooding, or is it on  
high enough ground?

This morning around 1216-1225 UT (Sept 7) I was getting a spur from RA on  
9634+ kHz, but could not tell which transmitter it was coming from, 9475,  
9560, 9580 or 9590 kHz. Later, one around 9535 kHz and some other spots.  
Matched the audio to 9580 kHz. Something out of order due to the water?

Also, Cuba has started heavy noise and pulse jamming against something on  
9965 kHz from 1400 UT. I.e. RA via Palau. I can't tell what else is there,  
but maybe clandestine Radio Republica.

Another thing have rumors that the deal to ship Darwin transmitters to  
Shep is off. Can you confirm? Regards,  
(Glenn Hauser-OK-USA, to Nigel Holmes of RA, via dxld)

Total bollocks (like most good rumours). A Continental 418E and a 418F  
both third-hand from Christian Voice ex-Cox Peninsula are being installed  
at Shepparton IHFTS. A new 418G is undergoing acceptance testing in the  
factory before being shipped to Shepparton. You can quote me.

The transmitting station at Shepparton is quite safe at the moment. It was  
flooded in 1993 year, but this time around it's only the flood channels  
adjacent to the rivers that are filling up. After ten years of drought, we  
need the water so we're not complaining.

Paste these co-ordinates into Google -36.3243 S 145.4235 E and you'll be  
centred on the Shepparton IHFTS. The Goulburn River is to the west (left)  
of the station by about 6 km and flows to the north. Zoom out to about  
50 km high and you'll see the station relative to the river and the town.

I'll have a look at the output of the tx at Shepparton and see if  
something is amiss. Usually the output is clean with the Harris/Gates  
senders except when slightly misaligned - then spurs will appear at +/-  
the pulse-duration modulation frequency. This is around 65-75 kHz (depends

on particular transmitter) above and below the carrier frequency.

Thanks for the advice on crap out of Cuba - something else to annoy us along with the CRI relay [9570 kHz]. Good listening. Kind regards,  
(Nigel Holmes, Transmission Manager, Radio Australia, GPO Box 428G Melbourne, VIC 3001, Australia, Sept 8, dxld)

[see above and below] The two new Thomson transmitters of the Cox ("Darwin") site were, guess what, TRE 2326. So the plans to move them to Shepparton have indeed been killed by lack of money for the transportation, as it has been feared.

What remains is the question about the destiny of the ex-Carnarvon transmitter (a somewhat older Thomson, model TRE 2320) and the Continental transmitters Christian Vision had brought in.

And has the CBC secured the old Collins gear as spare parts collection for Sackville (the only kind of reuse I could imagine) or did it just end up on the scrap yard (most likely I think)?  
(Kai Ludwig-D, dxld Sept 5)

The Collins and the 300 kW Thomson were sold as scrap metal. The Thomson was in good working order. Two of the Collins 821 were working with some effort. The fate of the two Thomcast senders is unknown to me. Broadcast Australia didn't buy them.  
(Nigel Holmes, Transmission Manager, Radio Australia, GPO Box 428G Melbourne, VIC 3001, Australia, Sept 9, dxld)

Cox/Darwin summary.

Let's sum up all the bites about the Cox transmission equipment, provided by various sources, since I fear merely reproducing them all is prone to result in even more confusion. In order of installation dates:

3 x Collins 250 kW from 1968:

Scrapped. Now Sackville should be the only site in the world still operating such transmitters. Cf.

<<http://www.transmitter.be/col-821a2.html>>

2 x Thomson TRE 2326 from 1993:

No definite confirmation, but there is ample evidence of these units being the Thomson 250 kW transmitters just obtained second hand by TWR for their Guam facility (Broadcast Australia did not take them, at the same time the model numbers match).

Thomson 300 kW, moved in from Carnarvon in 1996: Scrapped.

2 x Continental 100 kW:

moved in by Christian Vision from somewhere else (also the type numbers 418E and 418F, respectively, did not lead me to a suspected origin so far): Moved to Shepparton.

(Kai Ludwig-D, dxld Sept 10)

AUSTRIA Polish Radio 3890 - mix at Moosbrunn-AUT site.

Sep 7th at 1745 UT noted a station in English on 3890 kHz. After scanning the bands noted it was Polish Radio Warsaw in // with 9770 MOS. Both frequencies went off at 1800 UT. This must be a mixing product with 13660 MOS which is listed with BBC Arabic 1700-1900 UT. Another mixing product

should be on 17550 kHz 1700-1800 UT with Arabic or both audios. Moosbrunn has often these mixes, usually in the 6 MHz area when two transmitters are in use on that band.

(Jari Savolainen-FIN, DXplorer Sept 8)

**BELARUS** Radio Belarus new French Suns 1940-2000, Sp Suns 2000-2020 UT.

Laut Radio Minsk hat in Belarus am 01. Sept. die neue Rundfunksaison mit vielen neuen Sendungen und 2 neuen Sprachdiensten Franzoesisch und Spanisch begonnen.

Das 85. Radiojahrjubilaeum will auch anstaendig gefeiert werden. Franzoesisch soll jeden Sonntag ab 1920 UT ausgestrahlt werden und Spanisch jeden Sonntag ab 2000 UT. (Falls ich es richtig verstanden habe). Nun soll RadioBelarus mit 7 Sprachdiensten zu Gange sein.

Franzoesisch laeuft sonntags um 1940 UTC auf KW und MW. Damit wird die deutsche Sendung 20min kuerzer. Jedoch das rebroadcast am Montag auf der 6005 kHz ist komplett mit 120 Minuten.

Und es wird auch eine neue Stimme geben, so zwischendrin \*hust\*.

(Carlos Goncalves-POR, wwdxc BC-DX TopNews Sept 7)

BRUNEI 594 on 9 Sept, at 2107 UTC, Radio Television Brunei, in apparent Malay with Koranic chants by men and women, many mentions of Ramadan and Eid al Fitr. I have never heard chants done by a female before and their

chants were accompanied by drums. There were even modern pop songs about Ramadan, which I guess is kinda like Christian rock. It was an interesting listening experience. Several IDs during the course of everything. Signal strength was fair, overriding local electrical noise. Signal just followed the water path.

(Albert Muick Pattaya-THA, hcdx Sept 11)

CAMBODIA [poss.] 918 10 Sep, 2226 UTC, UNID, Rolled up on-freq at 2226 UT hoping to find NRK, but there was already a station on there playing light R&B. I know the sign on time is variable, so I sat listening and the same song was played in a loop until 2300 UT when there was some talk by a man. Signal was quite weak, so I was unable to clearly hear the language. Seems to me that if Phnom Penh was really at 120 kW, it would be a much better signal, unless a directional antenna. There is also a 100 kW Radio Thailand station on frequency, but this audio was not // to any of the other RT channels. I'll try again after sundown and see what I get.

(Albert Muick Pattaya-THA, hcdx Sept 11)

CANADA 6160 CKZN, St. John's NF, 2213-2226, 03 Sep'10, talks on several subjects; 34432, adj. QRM.

vy73 wolfgang

btw. on 7210 broadcast also a 20 kW small Vietnam station ... see Aoki list.

(wb, wwdxc BC-DX TopNews Sept 8)

Wolfie, This is possible, but I doubt it because it did not sound like Vietnamese or Chinese. I will check again tomorrow. The maps are nice, but do nothing to resolve the issue. If you speak Vietnamese or Chinese, I would be pleased to record a few minutes via MP3 and forward it to you.  
Best,  
(Al Muick, *ibid.*)

5050 10 Sep, 2327 UTC, Beibu Bay Radio, in presumed Mandarin (according to schedule) with man talking in soothing tones over classical music, then ID with many mentions of Beibu, into some light jazz music. Allegedly only 15 kW, but good signals with only a slight fade.  
(Albert Muick Pattaya-THA, hcdx Sept 11)

COSTA RICA 5954.22v ELCOR (Radio Republica relay), Guapiles. 2139 tune-in Aug 26. Programing already in progress. Big signal increase at 2151, ID at 2153, and Cuba jammer up seconds later. On August 27: excellent level 2121, off at 2128 recheck. On August 28: carrier up at 2100:15, Radio Republica programming up at 2100:23, abruptly off 2121, back on 2122, off again at 2135 UT and never returned. Cuba jammer up at 2158 UT.

On August 30: 2155 programming in progress, jammer up at 2158. Seemingly a second pulser jammer joined at 2159. So, Republica relay is currently up at 2100 UT daily albeit with lots of transmitter breaks before the jammer(s) are up. Well, that will be checked once Arnie reads this.

5954.22v (Clandestine) ELCOR (Radio Republica relay), Guapiles. 2110-2130 UT on Sept 8, 2010. The usual Spanish anti-Castro programming with some opera vocal breaks. Fair. Brought up on a couple of Paul's vintage valve rigs in the radio room. Time to finally Christen this as a clandestine.  
(Zecchino/Krueger at Zecchino's QTH, Manasota Key, FL. via Terry L. Krueger-FL-USA, dxld Sept 10)

5930 / 5970 Radio Exterior de Espana, Cariari de Pococi. 1306-1313 UT September 6, 2010. Presumed the site with Spanish news items. Both clear and fair, with 5970 kHz a little better.  
(Terry L. Krueger-FL-USA, dxld Sept 10)

CUBA 5005[rather 5025] R. Rebelde, Bauta, 1004-f/out 1025, 06 Sep'10, news, sports news at 1008 UT, talks; 15331.  
(Carlos Goncalves-POR, wwdxc BC-DX TopNews Sept 7)

6150 much stronger channel of RHC La Habana English service in 06-07 UT slot Sept 7th, at 0652 UT S=7-8 fade out, // 6010 kHz just above threshold S=4 tiny signal.

15370 RHC La Habana in Sp at 2133 UT. S=9+25dB. 2134 UT noticias, General Strike in Francia. // 15380 little weaker S=9+10dB.  
(wb, wwdxc BC-DX TopNews Sept 7)

6110 / 6150 / 6180 Radio Habana Cuba. 1203-1205 September 9, 2010. Noted in passing with Spanish on these channels in parallel, using up way too much unneeded space so close to each other.  
(Terry L. Krueger-FL-USA, dxld Sept 10)

CZECH REP Radio Prague Mailbox August 15 said that they broadcast in DRM twice a week in English and German via Rampisham between 2006 and 2009.

However, due to the budget cuts earlier this year, the broadcasts were discontinued and there are no plans at the moment to reinstate them.  
(Jonathan Murphy-UK, Sept WDXC-UK Contact magazine and via dxld Sept 2)

ECUADOR Stephan Schaa of VozAndes Media in Germany explained that after HCJB dismantled its shortwave transmitter site in Pifo, Ecuador, the equipment was donated to HCJB's German branch. This included a 100-kilowatt HC-100 HF transmitter, two 33-kilowatt Siemens linear transmitters which have been tested by HCJB with four kilowatts in DRM mode, and two 10-kilowatt regional shortwave transmitters, one of which is operating on 6050 kHz. The donation also included antennas and transmission lines.

VozAndes Media has a plan to build a new shortwave transmitter site somewhere else in Ecuador within 6 to 12 months, although a site has not yet been located. The plan is to broadcast in German, Spanish and Portuguese, as well as some regional South American languages such as Quichua. Broadcasts will be targeted primarily at Latin America, although there would also likely be broadcasts to Europe in German with the 100-kilowatt transmitter. Some DRM transmissions are planned.  
(From the Sept 2010 National Assn. of SW Broadcasters Newsletter via Jerry Berg-USA, DXplorer Sept 9)

ERITREA 7160 Voice of the Broad Masses (?), Selai Dairo, 1742-..., 28 Aug'10, Vernacular, talks; 43442, jammed.

7175 Voice of the Broad Masses, Selai Dairo, 1810-1847, 28 Aug'10, Arabic, news bulletin, ID at 1814 UT, jingle, local music & songs; 45433; still around after 1900 UT.  
(Carlos Goncalves-POR, wwdxc BC-DX TopNews Sept 1)

ETHIOPIA The Home Service is already on exact 9705 kHz, instead of 9704 kHz, but not on 7110 kHz. On 9705 kHz s/on on Sept 3rd was at 0555 UT and on Sept 4th at 0355 kHz. On Sept 3rd with prgr in En at 1200-1300 UT and cl/down at 1355 UT on 9705 kHz. QRM from CNR in ?Kyrgyz // 11975 kHz from 0600 UT.

GEORGIA/RUSSIA [ABKHAZIA] 9535 Has had time to find out transfers of  
the Abkhazian radio on SW on 9535 kHz. Almost daily, 0400-0505, till 0455  
UT under hindrances from Spanish of radio and from 0500 UT from under  
hindrances from Algeria. On Mondays, environments and Fridays in 0700-  
0815, at what from 0800 and to nearby 0810 UT in Russian and some minutes  
of the Avtoradio. On 1350 kHz there are also other programs.  
(Rumen Pankov-BUL, RUSdx Sept 5)

GERMANY VOA Tibetan via Lampertheim switching of two frequency on 15200  
(ex 15605) and 15425 kHz. 1400-1500 UT 7465, 11510, 11975 15200 (Su, Tu,  
Th, Sa) 15425 kHz (Mo. We, Fr). Countermeasures with China-Jamming?  
de Hiroshi  
(Sei-ichi Hasegawa-JPN, dxld Aug 30) replaced by Biblis Germany site now.

9490 Democratic V.of Burma via Wertachtal on Aug 26 at 2327-2334 UT.  
34333 Burmese, 2329 UT Opening music, ID, Opening announce, Talk.  
(Kouji Hashimoto-JPN, JPNpremium Sept 3)

GERMANY/CROATIA 9925 As noted on Sept 6 Croatia used 9925 for SAm and  
ECNA from 2200 UT; however on UT-Sept/7 I heard the transmitter for WCNA  
back on 7375 from 0100 UT. Tonight (Sept/7 and 8) 7375 will be used for  
the entire span at 22-05 UT. Why can't DTK make it easier for listeners  
and make the switch entirely on the same day and better yet, why not do it  
on the first Sunday in May and September?  
(Joe Hanlon-NJ-USA, dxld Sept 7)

Voice of Croatia via Germany 7375, GERMANY Voice of Croatia at 0201 UT on  
this new frequency (ex-9925) with a man and woman with news of "Croatia  
Today" - Very Good Sept 8.  
(Mark Coady-ON-CAN, Sept 8, NASWA yg via dxld)

Ah, so that's what it was! Thanks, Mark. I'd been following this one for a  
couple of days, at 7374.91 on the Eton E1+ANLP1, but couldn't snare an ID.  
They actually came out with NAm-accented English on 7 Sept at 0329 with  
"This program brought to you by (unintelligible)" and off-air sharp at  
0330. 0401 with news in (presumed Croatian I thought it sounded Czech-ish)  
and 0408 with big band set and various lounge-lizard music that faded into  
static by 0469 [sic] with another abrupt sign-off on 7 Sept 10.  
("Seur D'Armadilleaux", Stewart-Ont-CAN, ODXA yg via dxld)

Yep - the English accent from Voice of Croatia is much more North  
American-sounding than one would expect from a southeastern- Europe  
broadcaster. I find I tend to enjoy the broadcast more as a result because  
I don't have to work as hard to understand it.  
(Richard Cuff-PA-USA, dxld)

Wertachtal and Nauen outlets three TXs synchronized:

HONDURAS 3250.05 R. Luz y Vida at 1133-1140+ UT on Sep 2. Local off-key choral group, followed by man & woman with Spanish religious chat; quotes from Timoteo. Good signal but considerable static noise.  
(John Wilkins-CO-USA, DXplorer Sept 5)

INDIA AIR Jeypore 5040 back on air. Noted this evening with excellent strength when checked at 1445 UT. Good to see the audio modulation problem solved.  
(ashok\_satpathy-IND, DX\_India Sept 8)

4840 0010-0020 Sept 9 AIR Mumbai Marathi (tent) ann, Indian songs, QRM WWCR 43543.

4940 0020-0040 Sept 6 AIR Guwahati Assamese (pres) / Hindi / English Indian songs, news from Delhi // 4920 and 4965 kHz. Transmitter break down at 0024-0032 UT 25332.

4965.01 0025-0040 Sept 6 AIR Shimla Hindi ann, Sitar music, time signal, news in Hindi and English from Delhi about release of 3 hostages, test of supersonic missile with range 290 km 34333 QRM Zambia.

N5040 \*0023-0055 fade out Sept 9 AIR Jeypore Oriya (pres) ann after AIR IS, local traditional songs. Seems to be repaired. The transmitter had a break down 0030-0035 UT and there was noted some hum on the transmitter. R Habana Cuba with French (QSA 4) was disturbing Jeypore here, so it was heard best in USB with 32443.  
(Anker Petersen-DEN, DXindia Sept 10)

INDONESIA 3325 RRI, Palangkaraya, at 2140-2153 UT on 01 Sep'10, Indonesian, talks; 25241.  
(Carlos Goncalves-POR, wwdxc BC-DX TopNews Sept 7)

4750 10 Sep, 1134 UTC, RRI Makassar (tent.), long-winded Koranic singing with occasional prayer and talk. Sounded like Bahasa Indonesia, but unable to confirm via RRI live audio stream, and Makassar regional live audio not offered. Checked on Bangladesh website to make sure I didn't have them and they were happily playing light pop.  
(Albert Muick Pattaya-THA, hcdx Sept 11)

IRAN 702 MW, IRIB Tabriz, via Kiashahr, \*2327-0128\* UT on Aug 30, 31, Sept 01 and 02, Azeri Ramadan programme heard // 3985 kHz until 0128\* UT, when best: 54444.

1026 MW, IRIB Tabriz Regional, 0025-0045, Sep 1, Farsi talk, muslim song, 34333, not // 702 kHz MW.

3945 VOIRI Zahedan, \*2255-0059:35\*, Aug 30, 31, Sep 01 and 02, Tajik Ramadan programme, opening and closing ann mentioning Tajikistan and Tajik and two frequencies, 2300 UT 3 gongs and Iranian National Hymn sung by choir. The rest of the programme was Qur'an recitations, muslim songs,

prayers and conversation. Broadcast only during Ramadan. 55444 (S=9+30 !).  
VOIRI continued in Tajik \*0100-0230\* UT on 6175 kHz Kamalabad and 7285 kHz  
Sirjan - both under heavily QRM.

3985 VOIRI Kamalabad, \*2327-0210, Aug 30, 31, Sep 01 and 02, Azeri  
Ramadan programme opening with muslim hymn, 3 gongs and Iranian National  
Hymn by choir. The rest of the programme was Qur'an recitations, muslim  
songs praising Allah, prayers and religious talks, 53443 fighting with co-  
channel Croatia. Heard // 702 MW until 0128\* UT.  
(Anker Petersen-DEN, wwdxc BC-DX TopNews Sept 2)

7305 IRIB Sirjan in Serbian-Bosnian, distorted audio satellite feed. At  
2150 UT S=9+30dB, scheduled 2130-2227 UT.  
(wb, wwdxc BC-DX TopNews Sept 7)

15150 Voice of the Islamic Republic of Iran, Sirjan. 1318-1414 Ut on Sept  
9. Good. Arabic programming with man and woman punctuated by Iranian  
classical music bed brought up louder for a few seconds between items,  
into Quran recital from 1331 UT. Parallel very poor 13800 kHz Zahedan  
site, which co-channel someone with Spanish Jesus talk. Maybe still VOIRI  
the one, someone in Arabic at 1546 UT spot check.  
(Terry L. Krueger-FL-USA, dxld Sept 10)

ISRAEL 15760 I can confirm that Kol Israel in Persian is now on 15760  
kHz, noted around 1400/1410 UT with an endless monologue of a somewhat  
unsure announcer, reading out one item about Israel vs. Palestine after  
another. Strong signal with no trace of Iranian jamming. And no trace of a  
signal on 13850 or 11595 or 9985 kHz. A bunch of frequencies is registered  
for this service, but as far as I'm aware never more than two transmitters  
have been used for it.  
(Kai Ludwig-D, dxld Sept 5)

Re: Israel Persian.

15760 KOL in Persian the stronger one here in Germany, S=9+10dB at 1445  
UT, Sept 5. The other on 13850 kHz very tiny S=2 only signal, traced only  
when Eton E1 synchronous detection option locked on.

No Iranian jamming observed today, but IRIB 15150 kHz from Sirjan in  
Arabic was similar weak as Meyerton 15400 kHz S=3.  
(wb, wwdxc BC-DX TopNews Sept 5)

ITALY 1512/1503 Info about Ondamedia Broadcast 1512 kHz, Italy. Here  
is some information about Ondamedia Broadcast, the new Italian MW station  
on 1512 kHz.

The Mosfet transmitter has a power of 600 W, but currently its output is  
limited to 350-400 W into a vertical 1/8 wave antenna. In the coming  
future the ground system will be improved, with more radial wires. The  
transmitting site is San Pietro in Casale, between Bologna and Ferrara (in  
northern Italy). At present the station is operating from 0700 to 2330  
hours local time[0500-2130 UT]. The letterhead indicates also a frequency  
of 1503 kHz, possibly for the announced future DRM transmissions. Programs  
will be of local nature, with music, news and cultural contents.

The head of the station is Roberto Furlan, an engineer. The e-mail address  
is  
<ondamediabroadcast @ gmail.com>

Good listening  
(Fabrizio Magrone, Forli-ITA, mwdx Sept 2)

I can give more info on the 1503 kHz.

In the next few months the 600 watt transmitter will move to 1503 kHz. A 1200 watt transmitter will be used for 1512 kHz, probably with a new vertical 1/4 antenna. And according to the station owner, they are on the air 24hrs and not 0700-2330 LT. But that is something I cannot verify from here of course.

(Herman Boel-BEL, mwdx Sept 2)

KAZAKHSTAN 9950 V.of Orthodoxy via Kazakhstan Aug 31 \*1430-1435 35332 Russian, 1430 UT sign on with IS, ID, Chorus music, Opening announce, Talk.

(Kouji Hashimoto-JPN, JPNpremium Sept 3)

KOREA Rep of [Clandestine] 3912 Voice of the People, Goyang, KOR, 2135-2142, 04 Sep'10, Korean to KRE, talks; 13331, jammed; // 6518, 6600 kHz audible, but also terrible reception.

6600 ditto, 2132-2140, 04 Sep'10, cf. // 3912 kHz; 32431, jammed; // 6518 kHz was even worse.

(Carlos Goncalves-POR, wwdxc BC-DX TopNews Sept 7)

(Carlos Goncalves-POR, wwdxc BC-DX TopNews Sept 7)

MEXICO 6010 Radio Mil, techno rock at 0938 UT followed by two IDs by yl, espanol cover of pop music 2 September.

(Robert Wilkner-FL-USA, hcdx Sept 5)

MOLDOVA [PRIDNESTROVYE] 9665 Radio PMR at 0000-0200 UT on 1 Sept.

Language order tonight was En/Fr/Ge/En/Fr/Ge/En/Ge, unlike Spanish at 0145-0200 UT on Monday, 30 Aug. I certainly hope my ears were right on Monday. I did not get a chance to listen on 31 Aug.

The English programs are the same; on 1 Sept, a prg about the Russian army and the Church of the Assumption of the Blessed Virgin.

Just before 0200 UT, pretty jazz tune, then the V of Russia.

(Liz Cameron-USA, dxld Sept 1)

MOROCCO/AUSTRALIA Morocco is again missing from both 9575 and 15340 kHz today. I assume it's HCJB Australia that I hear at 1315 UT via 15340 kHz in an Asian language - listed as Malayalam on Sundays at this time, and Hindi from 1330 UT.

(Noel R. Green-UK, dxld Sept 5)

15341.1, Sept 6 at 1435 UT, poor with Arabic music. Not only is RTM off-frequency from 15340 kHz, it is off-the-off-frequency by about 0.1 kHz.

(Glenn Hauser-OK-USA, dxld)

Checked Sept 10th 1320 UT: 15341.14 odd kHz RTM[renamed SNRT organization instead since 2007] program, terrible het by HCA KNX from Australia in [suppos.] Punjabi service, S=9+25dB strong signal from downunder.

9575.00 R Medi One Nador even frequency as usual.  
Break has something to do with reshuffling Nador longwave unit 171 kHz ?  
(wb, wwdxc BC-DX TopNews Sept 10)

MYANMAR 5920 Myanmar minorities programme had moved from 5915 to 5920 kHz noted today for the 0930 past 1330 UT transmissions. Could be to avoid the evening BBC co-channel.  
(Victor Goonetilleke-CLN 4S7VK, DXplorer Sept 2)

Here is the complete schedule of the English transmissions of Radio Myanmar:  
9730 s/on 0230 UT with English px to 0330 UT, into Burmese px.

9730 English ID at 0700-0730 then again Burmese to 1000 UT s/off.

5985 close-down in Burmese at 1529 UT, into English ID 1530 to past 1615 UT, thus s/off presumed 1630 UT.

Programme consists largely of local and international news, sometimes followed by some slogans, weather and mostly music.  
(Gerhard Werdin touring in Kanchanaburi on the River Kwai, West-Thailand, wwdxc BC-DX TopNews Sept 3)

NICARAGUA 540.118 Radio Corporacion, Managua. 1054-1100 September 6, 2010. "Corporacion ... de la agraria ..." by man, into Spanish tenor vocal. Always makes a big het on 540 kHz.  
(Terry L. Krueger-FL-USA, dxld Sept 10)

NIGERIA 7275.00 FRCN Abuja, at 0628-0652 UT on Sept 03, English news reports fading out on clear freq. Appears to have been reactivated, last time I heard them here was on 7274.88 kHz in B-07 period. Can't remember

seeing any recent logs anywhere.  
(Martien Groot-HOL, dxld Sept 3)

7275 FRCN, Abuja, at 0628-0645 UT on Sept 5, Reactivated. Audible after Tunisia signs off at 0628 UT with English news. "Radio Nigeria" ID. Poor in noisy conditions. Thanks to tips from Martien Groot and James MacDonell. (Brian Alexander-PA-USA, DXplorer Sept 6)

7275 negative - not even a carrier traced from Abuja on Sept 7th ... 11th in 0635 to 0714 UT slot. RTT Sfax noted here around 0622-0628 UT, much stronger than // 7335 kHz to WeAF.  
(wb, wwdxc BC-DX TopNews Sept 7)

Re 7275 Gwagwalarda, Nigeria. HISTORY.  
Yahoo maps, MS Virtual Earth, Google Earth imagery. Some high resolution place. VE Update - Google Earth V.5 historical image.

MW 909 kHz, - 08 55 52.10 N 07 04 23.38 E

but two smaller - probably 41 mb SW masts - in south-north-angle visible on the lower left corner at  
08 55 44.42 N 07 04 22.33 E

<[http://maps.google.de/maps?f=q&source=s\\_q&hl=de&geocode=&q=08+55+44.42+N++07+04+22.33+E&sll=51.151786,10.415039&sspn=19.253434,57.084961&ie=UTF8&ll=8.928996,7.072792&spn=0.001847,0.003484&t=h&z=19](http://maps.google.de/maps?f=q&source=s_q&hl=de&geocode=&q=08+55+44.42+N++07+04+22.33+E&sll=51.151786,10.415039&sspn=19.253434,57.084961&ie=UTF8&ll=8.928996,7.072792&spn=0.001847,0.003484&t=h&z=19)>

The 3 new 250 kW Thomson TXs at Abuja Lugbe site are ready since mid Dec 2009, but not on air yet.

Studio installation at Abuja downtown were still in progress.

Thomson technician Bodo Fritsche 5NOCH / DU9 / DL3OCH told us in Nov 2009:

7275 kHz transmitter site is Radio Nigeria in Gwagwalarda. He visited that site in November 2009 and made an EXPERTISE on this site equipment for the Thomson management + VoNigeria. The site is in very bad shape. 2 x 100 kW transmitter need to be overhauled / repaired in January 2010 by Thomson engineer colleagues of his Swiss/Mannheim group, in transmitter and antenna division.

7275 Gwagwalarda shortwave site facility will get the same modern control system unit like at Lugbe site. He assume the 7275 kHz Gwagwalarda site will be ready in regular service again in mid 2010.

He feel not certain of exact date, but the Gwagwalarda site is out of service some years now, he guess they stopped service in late 2005?"  
(wb, wwdxc BC-DX TopNews / SW TXsite Dec 23, 2009)

Re Broadcasting aus Abuja, Nigeria.

Hi, I suppose Gwagwalada 7275 kHz is then co-sited with the MW 909, but the SW antenna is not visible.  
(Mauno Ritola-FIN, SW TXsite Dec 24, 2009)

NIG FRCN Abuja (Gwagwalada) 909 kHz.

#### History.

7275 ended approx. 12 Feb 2008, according Carlos Goncalves in Portugal  
12 Feb 2008 log.

Last log in my archive, 7275 at 0810 on Oct 31, FRCN Abuja, in English,  
easy talk. 33333.

(wb, visited Algarve cliff coast, Portugal, wwdxc BC-DX Oct 29-Nov 4,  
2006)

and Odd frequency [indicator] approx. 7274.86 kHz.

(wb, wwdxc BC-DX Jan 18, 2008)

QSL in 127 days. Radio Abuja 7275 kHz.

QTH: Broadcasting House, P.O.Box 377, Gwagwalada /

P.M.B.71, Gark1, Abuja, Nigeria. v/s Ben Obeta.

(Patrick Robic-AUT, A-DX Nov 8, 2005)

7275 FRCN-Abuja, nice looking date + fqy veri ltr confirming Abuja xmsn  
and giving hrs. as 0430-2130 UT (not sure if all on the same fqy) in En  
and Nigerian langs. V/S Ben Obeta for Exec. Director; in 20 wks. for CD  
rpt and \$1. Ltr is dated Aug 4 but postmark is illegible, so I can't tell  
if it was really en route for 3 mos. or not.

Address on ltr: FRCN Abuja National Station, Broadcasting House,

P.O.Box 377 Gwagwalada

P.M.B. 71, GARK1 ["GARK one"], Abuja, Nigeria. tel. 09-8821065 & 8821341

Fax 09-8821040.

(Jerry Berg-MA-USA, DXplorer Nov 6, 2005)

7275, Radio Nigeria - Abuja verified with a date/frequency letter in  
108 days from v/s Ben Obeta for the Executive Director. Address from  
letter:

Federal Radio Corporation of Nigeria (Abuja National Station),

Broadcasting House, P.O.Box 377 Gwagwalada, Nigeria.

P.M.B 71, Gark1, Abuja, Nigeria. The verie letter provided the schedule as  
0430-2130 UTC (0530-2230 Nigerian time).

(Rich D'Angelo-PA-USA, DXplorer Nov 13, 2005)

NIGERIA 6089.9 R. Nigeria, Kaduna, 1530-1552, 03 Sep'10, Vernacular,  
talks; 14341, adj. DRM QRM, co-ch. QRM at 1600 UT.

(Carlos Goncalves-POR, wwdxc BC-DX TopNews Sept 7)

6089.85 Radio Nigeria, Kaduna, \*0257-0330, Sept 3, sign on with test  
tone at 0257 UT. Drums IS at 0300. Choral anthem at 0301 UT. Religious  
recitations at 0303 UT. Talk in listed Hausa. Qur'an. Anguilla 6090 kHz  
off the air. Fair signal but slight QRM from Ethiopia.

(Brian Alexander-PA-USA, DXplorer Sept 3)

6089.86 FRCN, Kaduna. 2206-2213 Sept 11, 2010. Very good, albeit briefly,  
with exited male speaker in presumed Hausa, alternating with short (one or  
two lines) of Qur'an readings. Hummy audio and crappy remote audio feed,  
just what one would expect from anything Nigerian. Sadly, big open carrier  
up at 2111, into Mrs. Gene Scott mid-sentence rattling about from 2212 UT  
on 6090 kHz (University Network, Anguilla). Still audible via LSB, but

poor, thanks to the lady and her transmitter.  
(Terry L. Krueger-FL-USA, DXplorer Sept 11)

PAPUA NEW GUINEA 3334.96 R. East Sepik at 1302-1325+ UT on Sep 3.  
English news in progress; ID and disco mx at 1305 UT; chatty M anc  
between songs with occasional mention of East Sepik, still in English.  
Good signal.  
(John Wilkins-CO-USA, DXplorer Sept 5)

7325 7 Sep, 1010 UTC, Wantok Radio Light, with English / Pidgin  
religious programming but being hit hard by CRI in Japanese. Fair signal  
level.  
(Albert Muick Pattaya-THA, hcdx Sept 8)

7324.96 Wantok R. Ligth on Aug 25 at 0811-0835 UT. 25332-35333 Pidgin,  
Talk and music, ID at 0820 and 0833 UT.  
(Kouji Hashimoto-JPN, JPNpremium Sept 3)

PERU 5921.29 Radio Bethel, Arequipa. 1019-1024 Sept 10, 2010. Presumed  
the one with young-sounding Spanish female announcer in faced-paced talk,  
sometimes briefly joined by man. Clear and fair.  
(Terry L. Krueger-FL-USA, dxld Sept 10)

PORTUGAL Exposition Ham Fair in Lisboa, November 28, 2010.  
The A.R.V.M. is organizing his Exposition Ham Fair in Lisboa.  
D'ont miss one of the biggest events of Hamradio in Portugal,

(ARVM Sept 1)

RUSSIA 4831.01 intermodulation, Voice of Russia, Tbilisskaya, 1945-2010,  
Aug 26, Russian talk - still here with spurious signal (5920 minus 1089 =  
4831 kHz) although both signals on the original frequencies were QRM'ed,  
25232.  
(Anker Petersen-DEN, dswci DXW Sept 8)

Does anyone know where the transmitter location of Radio Rossii on 1026  
kHz at 0100 UT is located. As I'm cleaning up my new radio room, I put on  
some amazing Perseus SDR files I recorded from 1 January, 2010 while at my  
Haida Gwaii cottage. Good to very good reception with ID at 0105 UT as  
"Golos Rossii, Novosti". Very slight cochannel QRM. EMWG doesn't match.  
PAL mentions a 500 kW tx in Novosibirsk, not on the air, while EiBi lists  
Tajikistan. Anyone sure?

I'm blown away with the number of Euro/Central Asian/African stations  
which are heard on just about every frequency! All this was recorded using  
a QDFA array aimed due north (over the Pole to Europe). Right next door on  
1035 kHz is the Estonian family station in Russian, but weaker, and more  
co-channels. Love my Perseus!  
(Walt Salmaniw-CAN, dxld Sept 10)

Re Radio Rossii on 1026 kHz.  
Hi Walt, you mix R. Rossii (domestic sce.) and Golos Rossii (external  
sce.). Novosibirsk 500 kW is definitely on and carries Voice of Russia and  
Russian International Radio, see WRTH 2010.  
(Mauno Ritola-FIN, dxld Sept 10)

RUS VoRUS (Novosibirsk) Oyash 1026 kHz.  
Medium sized Srednyaya zarya antenna 2.35km long 165 degrees.  
main direction of Tibet, Ce&East India, Bangladesh, Myanmar, Sumatra.

(wb, wwdxc BC-DX TopNews Sept 5)

RUSSIA/MOLDOVA 9665 [PRIDNESTROVIA] Radio PMR. \*2350-0018 Sept 2-3, 2010. Carrier up at 2350 UT, slight Commie hum. Commie-era five-second test tones from 2354 UT, abruptly off 2355:29. Tones back up 2358:04, English ID 0000:26 UT, into lame news items (they like the word "informational" for some reason), with such exciting topics as corn

prices; Ukraine-bashing; East Slavs are good; nice things to say about other breakaway regions such as "Arkhangelsk" (not sure if they were referring to the Oblast or somewhere else). Amusing conclusion to the English program: "That's all for today. Our program is over." Into French at 0015 UT. Huge signal.  
(Terry L Krueger-FL-USA, DXplorer Sept 3)

Voice of Russia and Radio PMR via Grigoriopol Maiac Moldova 9665, 6240 kHz.

Would someone happen to have a QSL address for PMR?

I sent an email report to PMR to: <radiopmr @ inbox.ru> and a day or two after I got it verified by email. Good Luck. This night at 0000 UT I also heard Russia in En on 9665 kHz.  
(Erik Koie-DEN, dxld Sept 10)

Since the programming / stations carried on the 6240 and 9665 kHz Pridnestrovye transmitters have been so variable the last few nights, I made a point of checking again UT Friday Sept 10 (starting 2358 UT Sept 9):

5900, too weak in the noise level to confirm, but supposedly VOR English 2200-0200 UT, via "Armavir Krasnodar" Russia.

6240, at 2358 UT intermittent tune-up tones; 0000 Radio PMR in English. Could not check every quarter hour, but: 0032 UT in German, 0046 English, 0125 German, 0146 French and 0158 to "au revoir" at 0200\*. One may with some confidence fill in the blanks as 0015 French, 0100 French, 0130 UT English, but don't count on this every weeknight.

Since this was UT Friday, Radio PMR should be off for 70 hours, resuming at 0000 UT Monday. The question is whether 6240 kHz will be on the air with VOR English, or Russian during this bihour on UT Saturday or Sunday.

9665: 2358 VOR English, saying would continue on 31 and 41m [what? AFAIK it's on 49m, 5900 kHz]; Presumably has been on since 2300 UT. 0000 re-opening VORWS in English. Signal steadily declines; 0125 still VOR English; 0158 now it's so weak the Brazilian het is a problem, 0159 IS, 0200 UT still VOR English, I think.

Now, will VOR English stay on 9665 kHz from 2300 to 0400 UT every night? 24 hours earlier, UT Friday Sept 9, Mark Coady and I heard PMR back on 9665 kHz starting at 0000 but VOR had resumed before 0100 UT. And 6240 kHz I heard with some service in Russian during that hour.

9735: while we are straining to hear these weak signals in the noise, 9735 kHz is on from 0200 UT Sept 10 opening La Voz de Rusia in Spanish, excellent via GUIANA FRENCH.  
(Glenn Hauser-OK-USA, dxld Sept 10)

SPAIN 1386 Euskadi Irratia, Bilbo, again with extremely weak modulation level like on Aug 29, 2140-... UT, 02 Sep'10; 55343.  
(Carlos Goncalves-POR, wwdxc BC-DX TopNews Sept 7)

SRI LANKA 7189.72 Sri Lanka BC, 1222-1232\*, Sept 10. I have been reading about their new MW transmitter, but is this a new SW transmitter?

For one thing the signal strength was much stronger than ever heard here before (I think more than just good propagation); for another the frequency in the past was normally slightly above 7190 kHz. Perhaps Victor Goonetilleke in Sri Lanka can comment on this. In vernacular with subcontinent singing; believe they played their choral National Anthem (Sri Lanka Matha) at sign off.  
(Ron Howard-CA-USA, dxld Sept 10)

1125 Medium Wave Transmission from Sri Lanka. For clients wanting to be heard in Sri Lanka and southern India, a Medium Wave transmission is now available through WRN Broadcast.

The 50 kW transmitter represents a cost effective method of reaching local audiences in Sri Lanka during daytime and a far wider geographical area in the evenings and early morning. A free test can be provided to clients looking to trial the effectiveness of the transmitter prior to any formal agreement.

For more information, please contact the Sales Department on <sales @ wrnbroadcast.com> or call +44 20 7896 4026 (re:wired "News from WRN Broadcast" September 2010 via Fleur Nittolo, WRN, via dxld Sept 9)

WTFK? It's difficult to find any MW frequencies among all the FM domestic broadcasting for SL in WRTH 2010. I do see one on 855 kHz for SLBC, with 20 kW, reactivated, at Irattaperiyakulam with the Wannu service; what's that? Searching WRTH info only in print is of course not practical.

The comprehensive Radio Stations in Sri Lanka,  
<<http://www.asiawaves.net/sri-lanka-radio.htm>>

has everything in MHz except for kHz mentions of TWR 873 and 882; DW 1548 kHz, none of which are only 50 kW, but listed as 400 kW. It does not list 855 kHz.

Does WRN have a new MW transmitter there? Or is it one of these powered down, or up to 50?  
(Glenn Hauser-OK-USA, dxld)

Ampara 855 [x693] kHz was an old channel in Eastern Ceylon in the 90ties, (wb.)

1125 New 50 kW MW in Sri Lanka?

This one will be on 1125 kHz and was moved location and frequency from somewhere else in Sri Lanka. They say the installation will be completed next week and we can start to run tests.  
(WRN Broadcast, dxld Sept 9)

It is out of Puttalam, where the MW TWR programmes come from. 50 kW on 1125 kHz.  
(Victor Goonetilleke-CLN, dxld Sept 9)

Here are the details ...

THAILAND DAYTIME MEDIUMWAVE BAND SCAN FOR PATTAYA.

558 8 Sep, 0759 UTC, Thailand, Radio Thailand, (presumed Kanchanaburi due to distance and signal strength). OM and YL talks with ID and lively news program starting on the hour. Good signal strength. 10 kW.

594 8 Sep, 0808 UTC, Thailand, Phon. Por. Thor. Or. from Bangkok with great signals. Had like about 20 commercials and PSA's in a row. This one supposedly belongs to the military as well (Anti-Aircraft Artillery Division) with supposedly only 5 kW.

675 8 Sep, 0818 UTC, Thailand, Sor Thor Ror 2 (Voice of the Navy), Bangkok station with YL talk and interviews. Extremely strong signals here in Pattaya (S9+) so 5 kW power may have been increased or a directional antenna towards the South China Sea.

720 8 Sep, 0824 UTC, Thailand, Sor Thor Ror 5 (Voice of the Navy), Chon Buri station, about 20 km away, with YL talk show with many callers, ringing phone sounds, etc. Regional Station and NOT // 675 kHz above!  
Local strength signals, no QRM.

747 8 Sep, 0830 UTC, Thailand, Ror Dor, Territorial Defense Dept. Bangkok, with OM phone calls and some pop Thai music (actually quite nice!). A couple of slow, echoing dramatic IDs on the half-hour as well.

5 kW with good signals here in Pattaya.

792 8 Sep, 0841 UTC, Thailand, Wor Phor Thor Defense Energy Dept. Radio Station, with a long string of commercials and PSAs plus several canned IDs. S=9+ signal with 20 kW from Bangkok. It seems so strange for these military stations to have commercial announcements., but AFRTS does the same with PSAs and I guess funding has to come from somewhere. There was even a cool singing jingle at 0851 UT. During those 10 minutes it was nothing but commercials, IDs and PSAs. Finally a female announcer came on after the singing jingle and intro'ed a piece of really nice Thai pop music.

819 8 Sep, 0854 UTC, Thailand, Radio Thailand Program 2 Pathum Thani, with Long talks by a man with an incredibly raspy voice (move over, Lemmy!). Tone and ID on the hour. Then talks continue. Good signals with 10 kW.

837 8 Sep, 0905 UTC, Thailand, Radio Thailand, Educational Radio Program 2 (presumed) Pathum Thani with young lady in a long discussion with older-sounding man. No real breaks or IDs. Fair signals only at 5 kW.

873 8 Sep, 0910 UTC, Thailand, Wor Khor Thor Mor Bangkok Radio Station, with PSAs featuring children, into a spritely march piece sung by mixed children and adults (almost like a Disney piece!). Positive ID at 0912 UT then more commercials/PSAs. Good signals with 5 kW.

891 8 Sep, 0914 UTC, Thailand, Radio Thailand Saraburi. Woman in long talks. Excellent and constant reception, but this is a megawatt according to WRTH!

918 8 Sep, 0918 UTC, UNID, Two Thai stations listed here as well as National Khmer Radio with 120 kW. Right now there is a carrier but no audio even with synchronous mode on, so I am hoping that the Khmer station will materialize later tonight. There are a 100 kW Radio Thailand and a 10 kW Sor Wor Phor station here, but no sign of anything resembling them.

1071 8 Sep, 0923 UTC, Thailand, Sathaani Witthayu Rattasapha (Parliament Radio Station) Bangkok heard with a speech being given by a man and occasional clapping. Good signals with some power line QRM at 10 kW.

1107 8 Sep, 0925 UTC, Thailand, Mor Khor Samut Sakhon, Kasetsart University with traditional Thai music and occasional announcements in Thai. Good signals with 10 kW.

1143 8 Sep, 0941 UTC, Thailand, Or. Sor. Mor. Thor, Mass Communications Organization of Thailand "Modern Radio", Bangkok with male and female talks in monotone and occasional piece of traditional music. Only fair signal with cell site and power line QRM.

1161 8 Sep, 0945 UTC, Thailand, Wor. Sor. Thor. Educational Radio, Bangkok with traditional Thai music sung by a male/female duet and occasional announcements. 20 kW puts in a very strong signal here in Pattaya.

1251 8 Sep, 0951 UTC, Thailand, Thor. Or. 6 Royal Thai Air Force Bangkok, with long talk by woman and man in Thai. Good signal with only 5 kW despite cell site and power line QRM.

1287 8 Sep, 0955 UTC, Thailand, Sor. Or. Thor. Meteorological Dept. Radio, Samut Prakan (Bangkok) with a group of two men and a woman in talk with a lot of laughing, fading into some Thai pop music by a man. Very strong signals with 10 kW.

1386 8 Sep, 0958 UTC, Thailand, Sathaanii Witthayu Pheua Kaan Kaset, Agricultural Radio Station with Thai pop music, ID finally at one minute after the hour (they waited for the song to end!). 10 kW and strong signals here in Pattaya.

1440 8 Sep, 0545 UTC, Thailand, Wor. Por. Thor., Samut Sakhon with Thai talks and slow IDs about every 10-11 minutes. This is a pretty much local station with 10 kW, great signals. Apparently belongs to the Signals branch of the Royal Thai Army.

1467 8 Sep, 1003 UTC, Thailand, Radio Thailand (not sure which program) Pathum Thani, heard with talks and some Thai music. Into what seemed like a very bubbly female announcer who might have been reading something aimed at Children. 100 kW and very strong signal.

1494 8 Sep, 1010 UTC, Thailand, Or. Sor. Mor. Thor Mass Communications Organization of Thailand "Modern Radio", Bangkok with PSAs, commercials and jingles. // to 1143 kHz and certainly 100% more lively than they were at 0941 UT. Into argumentative discussion between group of men and women. 10 kW with a good strong signal.

1521 8 Sep, 1018 UTC, Thailand, Nor. Thor. Phor. Post and Telegraph Dept. Bangkok, with woman in Thai talk and traditional Thai music. 10 kW but only fair signal with power line QRM.

1593 8 Sep, 1022 UTC, Thailand, Radio Thailand Ratchaburi, with female announcer interviewing a very excited/upset young lady. 10 kW and strong signals without QRM.

I have discovered a cell site on the roof of the hotel next to me that causes some significant QRM until the early morning hours when it quiets down, as well as a slightly increased electrical noise when all the neon lights go on. Thankfully, this all dies down a lot after 2 AM local time.

I did this mediumwave band scan today and the electrical/cell site QRM wasn't too bad, but it could have been a lot better. I may have to be satisfied with QSLing all the local mediumwave stations. ;-) The 90 and 75 mb are pretty much a wash, but 60mb is OK as are the 49 and 41 mb. (Albert Muick Pattaya-THA, hcdx Sept 8)

TURKEY TRT-1 observed on Sept 2nd with prgr in Turkish on MW 702 // SW 5960 kHz with long list of SW spurs with strong levels of the signals with steps approx. +/- 29 kHz:

At 1700 on 5989, ... , 6104, 6133, 6164, 6193 kHz etc., and on 5931, 5902, 5873, 5844, 5815 etc. From 1900 UT a football direct reportage was heard on 702 and all above freqs and more. (On 927 and 954 MW there were native songs ). It is remind me on Voice of Vietnam's effect in the past, when VOVTN was heard on 10 freqs in the 22 m.b. - fundamental was 13740 kHz. (Rumen Pankov-BUL, wwdxc BC-DX TopNews Sept 6)

UGANDA [?] 7195 R. Uganda (?), Kampala, 1637-1655, 3 Sep'10, English (tent), talks, Afr. pops; 14341, occasional amateur QRM. This was off shortly after 1700 UT.

U.K. VT Communications [VT-group] Now Called Babcock.

At the Plenary Meeting, Gary Stanley of VT Communications explained that his company was recently acquired by a company called Babcock in the UK.

So VT Communications is now called Babcock, and the company's FMO (Frequency Management Organization) code for the HFCC will be changed from VTC to BAB.

They will use VTC through the B10 season, and will begin using the new BAB code as of the A11 season.

"It's business as usual for us," said Gary. "The only difference is that at the next conference we'll be in the front of the room!" (Delegations are seated in the meeting room in alphabetical order.)

7265 Polskie Radio in Hebrew. B-09 and B-10 1900-1930 UT via Rampisham 500kW 110degr, but also REE co-channel registered via Noblejas 250 kW in

Arabic and Spanish at 170 degrees.

(wb)

[POLAND non] DRM: The UniWave Di-Wave 100 DRM Receiver was reviewed very well in Popular Communications June 2010. It is no more: the manufacturer is gone.

I hate DRM, but want to help the Polish Radio Hebrew Service. So I was thinking of buying this DRM receiver, because I was told the Hebrew Service next season will be back on 6085 kHz where it was jammed, and WRTH informed us there is 'domestic' DRM there. So I wanted to hear that DRM. Polish Radio is served by the VT Group and they intend to solve the problem by using 500 kilowatts.

[Later:] About the frequency to be used by Polish Radio Hebrew Service in the coming winter 1900-1930 UT. Transmitters and frequencies are the responsibility of VT Group. Last winter the result was very bad. The frequency was 6085 kHz and it was jammed out all season long. WRTH informed me a station in Germany was broadcasting DRM domestic channel. How do you broadcast DRM domestic?

The head of Hebrew at Polish Radio is Michael Hermon and his job is only to prepare programs, but he wants people to be able to hear these programs on short wave. He does not want to use 6085 kHz again and 7265 kHz was suggested. I monitored it recently. My S-meter was very high. There is a co-channel station. There is a lot of noise and there are strong stations on 7260 and 7270 kHz. At 1930 UT China Radio International signs on with a very strong signal. SIO is 533 or 523 with voices interference and this is not good enough for me to listen to it for a whole half hour every day.

Should VT Group broadcast Polish Radio Hebrew with 300 kilowatts on 7265 kHz, they will murder the two adjacent frequency stations and commit suicide themselves? They won't do this because frequency managers are gentlemen. I suggested that 7505 kHz should be used. This is the frequency of WRNO. The 41 meter band needs to be enlarged and the way to do this is to use slightly out of band frequencies. This is the way the broadcast bands have been enlarged, when the frequencies were not being used by utilities: in time the illegal frequencies became legal. It is also the only way to give me good reception, and 100 kilowatts will do.

Cumbre off 17520 kHz? - without notice

Can anyone check 17520 kHz before 1630 UT, or even after? While DXing with Cumbre is on the WHRI1 webcast, I cannot detect even a carrier on 17520 kHz where it was heard for the last few weeks; and 16m is hopping with other signals.

[...] Then I check the WHR online sked and find that this transmission has been moved without notice to 21630 kHz. A signal barely detectable there, so I suppose DWC was on it from 1600 UT. Program wrapped up early at 1624 UT, but theme played for 5 minutes on webcast.

21630 kHz signal much weaker than Portugal 21655 kHz, even Spain on 21610, 21570 kHz.

(Glenn Hauser-OK-USA, dxld Sept 11)

21630 scheduled from Sept 5th, 2010, registered for A-10 already in Febr/March table. 1500-1900 UT (Sun 1600-1900) English to WestAfrica. (wb, wwdxc BC-DX TopNews Sept 11)

SW Radio Africa broadcasts jammed despite unity government

The audio clip above reveals what Zimbabweans heard yesterday when they tuned into SW Radio Africa (SWRA) to hear impartial objective Zimbabwean news. It is a further act of censorship, another effort to suppress free speech and the right of Zimbabweans to access information.

SWRA have done an incredible job ensuring news-deprived Zimbabweans still have access to impartial objective information despite the Zanu PF government's passing of repressive legislation like the Access to Information and Protection of Privacy Act (AIPPA). This oddly named piece of legislature has served to deny independent media sources permission to operate newspapers, radio or TV in Zimbabwe. SWRA, broadcasting from outside Zimbabwe on short wave, have managed to provide independent news to parts of the country that email and online news sources cannot reach. As such they have been a lifeline of information to oppressed Zimbabweans.

It has also made SWRA a thorn in the side for members of the political elite who feel most threatened by a critical and enquiring press that seeks to expose corruption and human rights abuses.

SWRA have been jammed before, but their article on their website about this instance conveys shock at the fact that, this time, the jamming is happening under the inclusive government which includes former opposition parties that have supposedly fought for democratic principles. In fact, just last week, the MDC-T party launched a new party card, describing it as the 'master card for real change'. What's worse, this is the second act of censorship occurring under the unity government this week.

Robert Mugabe's regime has resumed jamming news broadcasts from SW Radio Africa, despite the existence of the coalition government with the MDC, that is supposed to guarantee freedom of expression. On Wednesday evening the first half hour of our broadcast featuring Newsreel was drowned out by a heavy noise, sounding like a slow playing record.

SW Radio Africa listeners told us that soon after the news ended the jamming noise stopped and the rest of the broadcast featuring current affairs programming could be heard clearly.

Information Communication Technology Minister Nelson Chamisa [MDC-T] told Newsreel he was not aware of the jamming. He said; 'We will have to start gathering our facts on the matter before coming up with our position.' Deputy Information Minister Murisi Zwizwai's phone went unanswered the whole day. But a source told us the Central Intelligence Organisation, which falls under the President's Office, is running the operation.

It is sad that despite the fact Zimbabwe does have an inclusive government, where two of the parties supposedly whole heartedly support the notion of a free press and Zimbabweans right to information, that SWRA are once again being jammed.

In 2005 Mugabe's regime began jamming SW Radio Africa frequencies just before the controversial Operation Murambatsvina. It was reported that the jamming equipment and expertise was provided by China and at the time we spoke to a soldier who says he was sent to China to be trained in jamming techniques. The jamming was then extended to include signals from Voice of America's Studio 7, in clear violation of international laws.

In March 2007 then Deputy Information Minister Bright Matonga admitted they were jamming our broadcasts. Speaking in parliament Matonga boasted that the government was generating electronic interference to prevent reception of the broadcasts. "We cannot allow foreigners to invade our airwaves without our authority. We will continue to do it. We need to protect our sovereignty. If you go to England you will not receive any foreign radio station."

SW Radio Africa is run by exiled Zimbabweans who, because of repressive media legislation, were not allowed to broadcast from home. In 2000 the station, then called Capital Radio, challenged government's broadcasting monopoly and won its case in the Supreme Court. But after just 6 days of broadcasting from a local hotel the station was shut down by Mugabe using his presidential powers.

While the initial jamming in 2005 was done when Zimbabwe was under the

sole rule of Mugabe and ZANU PF, the situation is now different and, in theory, we have a unity government where responsibility must be shared by the MDC.

The national chairman of the Zimbabwe chapter of the Media Institute of Southern Africa Loughty Dube said; 'It's quite surprising because this inclusive government has made a commitment to promote a diversity of views and a diversity of media. It is imperative that they do not select which voice they want in this diversity.'

As for the MDC not knowing about the jamming Dube said; 'It clearly tells us they are junior partners in the government'.

In a related issue it was also this week that co-Home Affairs Minister, Theresa Makone, said she was unaware of an order issued by her Permanent Secretary banning paintings done by Bulawayo based artist Owen Maseko depicting the Gukurahundi era.

In an earlier e-mail today, SWRA wrote:

For the past few weeks we have been concerned that jamming tests were being carried out on our broadcasts as various radio hams around the world have been sending us regular reports of a faintly audible music loop.

Unfortunately it was confirmed that these were tests, as jamming began in earnest last night (1st September - attached please find an MP3 of the jamming). It appears to be specifically targeting our news bulletin. This could be because there are power shortages/lack of funds to target the entire broadcast.

Last time we were so severely jammed only ZANU PF were in power and we had no one to complain to. This time we have a 'unity government' and I do hope the jamming will be a topic for discussion at the media conference in Harare and that all media organisations - such as MISA/MAZ/MMPZ - will take this issue up at every government forum available to them.

We will, of course, be relentless in trying to get hold of the various ministers from both the MDC and ZPF to hold them to account for the fact that we are supposed to be moving forward to greater media and information freedom - we hope all other media will do the same and not let the matter drop.

SW Radio Africa news - The Independent Voice of Zimbabwe  
Mugabe regime resumes jamming SW Radio Africa broadcasts  
By Lance Guma. 02 Sept 2010  
(via Arnaldo Slaen-ARG, DXplorer Sept 3)

Andy Sennitt adds: There is a 25-second recording of the jamming on Sokwanele, the blog of the Zimbabwe Civic Action Support Group. I am not an expert on jamming, but I have never heard jamming noises like these before.

3 Comments on "Zimbabwe resumes jamming SW Radio Africa"

1. #1 Bill Whitacre on Sep 3rd, 2010 at 11:26 Yes, that is the 'usual'

sound of Zimbabwe jamming. You remember Radio Botswana's 'farmyard' IS? This is similar - car horns, street sounds, guy trying to sing, etc. I think it was probably made pretty quickly but it is effective.

2. #2 Andy Sennitt on Sep 3rd, 2010 at 11:45 Ah, that's what it is! Thanks Bill. Yes, I recall Radio Botswana's interval signal. I believe Jonathan played it on one of the Media Network shows. Having watched the World Cup from South Africa, I imagine vuvuzelas would do the job pretty effectively too :-)

3. #3 Keith Perron on Sep 3rd, 2010 at 18:07 Wow, I have not heard that in a while. It reminds me a type of jamming that once came from somewhere in the former Eastern Bloc that would use a tape loop running in reverse. (RNW Media Network blog comments via dxld Sept 8)

Einladung zum 46. DX Camp des Rhein-Main-Radio-Clubs

Das mittlerweile 46. RMRC - DX - Camp findet traditionell im Naturfreundehaus auf dem Wingertskippel in 63505 Langenselbold bei Hanau vom 27. September bis zum 3. Oktober 2010 statt.

Die ersten Camp-Tage sind wie immer vorwiegend zum Hoeren. Hier gibt es Grasnarben DX mit unterschiedlichen Antennen.

Der RMRC stellt eine Langdrahtantenne und einen Tropenbanddipol von Keleman zur Verfuegung.

Weitere Antennen koennen selbstverstaendlich aufgebaut werden.

Der RMRC bietet allen Teilnehmern des Camps Anschluss an die Antennen ueber einen Antennenverteiler.

Wir haben auch einen DSL-Anschluss (WLAN) und werden live im Internet zu sehen sein.

Zum geplanten Programm:

Fr. Abend: Dr. Dish berichtet ueber den Aufbau und den Kampf um DrDish-TV  
- dazu gibt es ein warmes und kaltes Buffet und Freibier.

Sa. Abend: Praesentation des neuen QSL-Kalenders 2011.

Einzelheiten sind auf der Webseite des RMRC unter der Rubrik DX-Camp zu finden.

Teilnehmer, die mit der Bahn kommen, koennen nach Voranmeldung vom Bahnhof Langenselbold abgeholt werden.

Anmeldung bitte ueber Email an <mail @ rmrc.de> oder telefonisch unter 0177 - 237 43 26.

Wir freuen uns ueber jeden DXer, der teilnehmen moechte.

Harald Gabler  
RMRC Vorstand  
(Sept 8)

AFGHANISTAN Promoting Truth With Commando Radio.  
If information is power then the commandos just became more powerful as their radio station here at Camp Morehead celebrated the opening of their new facility and increased coverage area with a ribbon cutting ceremony Sept 1.

(via Alokesh Gupta-IND, dxld Sept 8) WTFK? 95.1 FM

ALBANIA Low modulation of Radio Tirana. Sept 10th Radio Tirana external

service in English still replaced by their domestic service 1st program in Albanian language.

13639.98 .. .97 odd channel noted at 2006 UT til sudden switch OFF at Shijak engineer midst on pop light music at 20.28:25 UTC.

At 2007 UT comment talk on "..socialist ... Komsomolze ...". Only fair S=7 signal here in dead zone Germany, the real signal skipped over our head. Only signal by side lobe vagabunding fair signal. But should be real better in the U.K. GB and IRL, as well as in Northern America.

When switched my E1 receiver sudden to 6164.98 odd channel at 2029 UT, S=9+10dB signal, and // much better 9489.97 kHz S=9+20dB level, same FM 1st program relay occurred.  
(wb, wwdxc BC-DX TopNews Sept 10)

Enjoyed Radio Tirana in English today. Yes, Drita I'm sorry to report that I tried to listen at 2000 UTC, but the modulation was so low that I tuned away; the carrier was as strong as it usually is, though, and there was no transmitter hum. Hope this helps your engineers and

All the best, Anne Fanelli  
(Anne Fanelli-NY-USA, dxld Sept 9)

Haven't seen this reported elsewhere, but for the past few days the 2000 UT R. Tirana English broadcast on 13640 kHz seems to have been replaced by their domestic service in Albanian. Went to their website, but it's Albanian-only and I couldn't find a link to their external service to check for changes. Anyone have an email address for their English service? Hope this broadcast isn't gone for good, since reception quality is usually excellent here and it's a convenient time to listen (for me, anyway :-)). Tnx and very 73 de  
(Anne Fanelli-NY, dxld Sept 4)

Glenn, Yes, during the last days we had some technical problems with radio/relay link between studio and transmitting station in Shijak.

So, instead the transmitter is fed with FM signal of Radio Tirana 1-st program. Sorry for the trouble. All the best from lovely Tirana, (Drita Cico-ALB, RTSH-Head of Radio Tirana Monitoring since 1981, & HF Manager from 2005, RADIO TIRANA, dxld Sept 5)

Glenn, Over the past week, the Albanian transmissions at 2030 and 2300 UT have been broadcasting continuous music with no sign of the news block that usually opens the broadcasts. The music continued straight through into the English segment at 0030 UT on 9860 kHz. First thought was maybe a strike but the technical problems mentioned must be the reason.  
(Will Flynn-PA-USA, dxld Sept 6)

13755 checking whether R. Tirana is back in scheduled English Mon-Sat at 1430-1500 UT: Sept 6 at 1430 UT nothing audible vs Cuban overload from 13680, 13740, 13780 kHz; 1431 UT a carrier, and can barely make out Klara's voice with English transmission schedule. Registers S9 but also with low modulation, unusable. European propagation very poor today.

Last week, Anne Fanelli in NY found the 2000 UT English broadcast on 13640 kHz instead in Albanian. Drita Cico reports that there was a problem with

their STL to Shijak for a few days so instead it relayed the domestic program I, picked up off the air.

Does this mean all English broadcasts were replaced by Albanian, even all foreign-language transmissions? Shijak should keep some evergreen recordings on hand to play back from there in such emergencies, or better yet, have a backup feed route.

(Glenn Hauser-OK-USA, dxld)

Hello, Drita, Thank you for answering my question, which Glenn Hauser forwarded to you. Although I enjoyed the FM programming in Albanian, it was good to hear the English-language program again today at 2000 UT on 13640 kHz. I live near Buffalo, New York in the northeast United States, and that broadcast is at a convenient time on a frequency with no interference and excellent signal strength; the 22-meter band is a fine choice. I have enjoyed listening to Radio Tirana for many years and hope to do so for many more. Wishing you all the best as we go into the fall season, I remain Sincerely yours,

(Anne Fanelli-NY-USA, Sept 7 via Drita Cico, R. Tirana, dxld)

13755 R. Tirana, Sept 7 at 1427 UT carrier, 1428 IS, 1430 UT schedule announcement. Slightly improved from yesterday, holding up better versus the CubaRM, at S=9+12db but very undermodulated and not productive to keep listening.

(Glenn Hauser-OK-USA, dxld)

7465 R Tirana at exact 20.00 UT English program opening, annmnt of schedule and frequencies, between S=9+15 and +20dB varying, deep fades. // broadcast to CAN and USA on 13640 kHz in 22mb, only side lobe signal in dead zone Germany, above threshold, but could understand every word, S=6-7.

(wb, wwdxc BC-DX TopNews Sept 18)

ALGERIA 6297.09 RASD Tindouf was here, not 6248 kHz, on Sept 12, at 1820 UT. But KRE on 6250.49 kHz at 1829 UT, Sept 12.

(wb, wwdxc BC-DX TopNews Sept 12)

6297 Polisario Front, Rabouni, ALG, 2125-..., 13 Sep'10, Arabic; digital mode like QRM coming from E/NE, but his is typically a clean signal, over here that is, yet only 53443 this time; // 700 kHz. The usual prgr in Castilian is currently being aired at 0000 UT. Yesterday too, there were some periods of similar interference, so // 700 kHz was, despite weaker than the inactive 1550 kHz, the only alternative.

(Carlos Goncalves-POR, wwdxc BC-DX TopNews Sept 15)

ANDORRA RADIO ANDORRA I am pleased to send you the stamp recently issued in Andorra (May 24th 2010). TONY LEGENDRE

I also enclose some information about this station from the Internet re-written by Arthur Ward from Wikipedia and <<http://f5nsl.free.fr/andorre/>>

THREE MAGIC WORDS THAT CHANGED PEASANTS INTO RICH BUSINESSMEN.

This is the title of a long article published by "Le Journal de Geneve" signed Tibor Denes, We can't resist to the pleasure of quoting for you some extracts of this article. Presented with this poesy and this romanticism inspired by our Principality to most of our foreign visitors,

the history of our station is quite accurate and most of all, shown with humour.

"One day, the airwaves transmitted across the world the magic words "AQUI RADIO ANDORRA". The first commercial radio station in Europe was born. Andorra was an ideal place for such an enterprise. No railways, no planes, no industrial plants, no noise to break the silence of the mountains, or the voice of the speaker".

"Then, hour after hour, a little, everywhere in the world people were listening to these words: "AQUI RADIO-ANDORRA" and many opened their atlas to re-discover this little place, nearly unknown until now. The tourism managers, willing to serve their increasing number of customers, also looked at their maps. Their agents soon invaded the Co-Princes' kingdom: They discovered splendid mountain for skiers, radious sky, pure air, picturesque places and even, a fountain supposed to have health benefit effects, but hotels and comfortable rooms were missing, as well as souvenir shops, pubs, restaurants: in a word, most tourism facilities. But hopefully this was not to be missing for long.

"Something else: One day I was standing in front of the hill where the RADIO ANDORRA station is located. Many cars were passing by without stopping (one car for every three inhabitants). There were also pedestrians in the street; all were having a brief devotional look at this dark grey building as if it were a church. Actually the vassals of the Co-Princes will never forget that misery time ended the very moment when the world heard for the first time the magic words "AQUI RADIO-ANDORRA", since then no one will pronounce the name of Andorra without thinking of its miraculous radio station. That's the legend of the fifth smallest state on our continent"

Radio Andorra is the name of one of the oldest French private radios, which from 1939 until 1981 had a broadcast license in Andorra.

Broadcasting began on 7 August 1939 by Jacques Tremoulet, who was also the owner of the broadcasting company Radiophonie du Midi, which was already broadcasting in Toulouse, Montpellier, Bordeaux and Agen. Within the location of Andorra it bypassed the state monopoly on broadcasting by not operating on French soil. On its first broadcast Radio Andorra was exclusively a music program interrupted only by the famous greeting "Aqui Radio Andorra."

During the Second World War the music program was broadcast to soldiers in France and North Africa. Both German and Allied forces attempted to control the radio without success because the neutrality of Andorra served as a protective shield. By the end of the war Jacques Tremoulet was sentenced to death by the French judiciary because of collaboration. He first fled to Spain, then to Switzerland, and finally to France, where he was acquitted in 1949. During this time Radio Andorra was massively hindered as it was hard to receive transmissions in France. After a slow climb in the 1950s and early 1960s Sud Radio competed with Radio Andorra as it was supported by the French government since its foundation in 1968.

The last years of Radio Andorra were characterized by a lack of funds and a reduced transmitter power so that only in the vicinity of Andorra could it be heard. Because of the desire for the establishment of a separate broadcasting network the Principality of Andorra broadcasting license

expired in 1981. However, the transmission towers on the lake of Engolasters in Encamp are still standing.

QRM.

(Carlos Goncalves-POR, wwdxc BC-DX TopNews Sept 7)

AUSTRALIA 9500 R. Australia, Shepp. VIC, 2113-2148, 10 Sep'10, English to Asia, "AM" prgr followed by Saturday Extra at 2130; 34432, less adj.

QRM from 2125 onwards. Better on Sept 11 at 2130.

9660 ditto, Brandon QL (10 kW), 2115-2129, 10 Sep'10, English to the Pacific, "AM" prgr; 23431, adj. QRM.

11695 ditto, Shepp. VIC, 2111-2151, 10 Sep'10, English to Asia, same as above; 25422, so vy poor this time.

(Carlos Goncalves-POR, wwdxc BC-DX TopNews Sept 12)

AUSTRALIA Cox/Darwin summary Let's sum up all the bites about the Cox transmission equipment, provided by various sources, since I fear merely reproducing them all is prone to result in even more confusion. In order of installation dates:

3 x Collins 250 kW from 1968: Scrapped. Now Sackville should be the only site in the world still operating such transmitters. Cf.

<<http://www.transmitter.be/col-821a2.html>>

2 x Thomson TRE 2326 from 1993: No definite confirmation, but there is ample evidence of these units being the Thomson 250 kW transmitters just obtained second hand by TWR for their Guam facility (Broadcast Australia did not take them, at the same time the model numbers match).

Thomson 300 kW, moved in from Carnarvon in 1996: Scrapped.

2 x Continental 100 kW, moved in by Christian Vision from somewhere else (also the type numbers 418E and 418F, respectively, did not lead me to a suspected origin so far): Moved to Shepparton.

(Kai Ludwig-D, dxld Sept 9)

I think all the Collins transmitters at Sackville are long gone, replaced in two phases, 1992-94, and 1999. Thought the first replacements were ABB units, with the second wave being either ABB or Thales, or perhaps Thomson; not sure due to murky timeline with corporate mergers and acquisitions. Don't believe everything you see on transmitter.be or tdp.info as much of it is either out of date or simply wrong.

(Steve Luce-TX-USA, Sept 13, ibid.)

The primary source for information about this transmission facility are these remains of a broken webpage:

<[http://john20747.spaces.live.com/?\\_c11\\_BlogPart\\_pagedir=Next&\\_c11\\_BlogPart\\_handle=cns!C94213F4CD7EE1A2!205&\\_c11\\_BlogPart\\_BlogPart=blogview&\\_c=BlogPart&\\_c02\\_owner=1%3F%3F](http://john20747.spaces.live.com/?_c11_BlogPart_pagedir=Next&_c11_BlogPart_handle=cns!C94213F4CD7EE1A2!205&_c11_BlogPart_BlogPart=blogview&_c=BlogPart&_c02_owner=1%3F%3F)>

The latest gossip from Melbourne was that two of the old transmitters were

still in a just barely operational condition. This webpage says one has actually still been used, and in an earlier discussion it had been stated that in particular no automatic tuning was possible anymore.

The timeline appears to be that the predecessor of Broadcast Australia purchased two new transmitters from Thomson-CSF in 1993/1994 and moved in another one from Carnarvon in 1996. Then in 1997 the site has been closed.

Finally in 2000 Christian Vision took it over, and the referenced webpage revealed for the first time that they brought in two Continental 100 kW transmitters, now moved to Shepparton and specified as being 418E and 418F, respectively, models. It is said that these transmitters were not new but have been purchased used, which of course raises the question about their original location. This part of the story is still a mystery.

In recent years up to four frequencies were on air from Cox simultaneously. Obviously up to three would have been the Thomson-CSF transmitters, but there are two possibilities for at least the fourth one: Either it was indeed still one of the old Collins beasts (perhaps not always the same one), or this fourth frequency had been run with the Continental transmitters, thus with 100 kW only. All Cox/Darwin frequencies have always been registered as 250 kW, but here I would add "for what it was worth".

Concerning Asia Brown Boveri: When had Thomcast, which combined the transmission equipment businesses of ABB and Thomson-CSF, actually been founded? I understand that model designators starting with "TRE" point at the former Thomson-CSF product line, as opposed to SK... ABB. Correct me if necessary.

As a reminder: Later Thomcast had been purchased by Thales, a French armaments trust, but just some years later Thales repelled it and the whole thing came back to Thomson, which in the meantime had also purchased Grass Valley, a company focussing on TV equipment. It seems that they hardly use the Grass Valley brand anymore, and the report from the HFCC conference indicates that another restructuring is in the pipeline anyway.

And how about the identical Collins transmitters at Sackville?

<<http://www.j-hawkins.com/rci1.shtml>>

(Kai Ludwig-D, dxld Sept 14)

AUSTRALIA 2368.5 Radio Symban. For some time I have been trying to get some decent audio from this station, but back on the date of August the 23rd, one of the rarest openings for some time to make it to my location. Noted from 1207 to 1252 hours. The signal remain quite audible, and was further enhanced during local sun raise at 1218 hours. I managed to catch several IDs and the programming consisted of Middle-eastern flare of music ,what others say is Greek-style programming. I have sent a Postal report along with a recording and will see a reply will come about. This has been the one and only time I have heard them with such signal, since that date.  
(Edward Kusalik-Alb-CAN, DXplorer Sept 17)

BANGLADESH 4750 Bangladesh Betar Aug 30 1346-1414 33443 Bengali, Music and talk, ID at 1404 UT.

4750 Bangladesh Betar on Aug 31 at 1229-1247 UT. 33343 Bengali, Music, ID at 1245 UT.

(Kouji Hashimoto-JPN, JPNpremium Sept 3)

**BELARUS** Belarus Radio in Spanish and French.

The radio station Belarus will start broadcasts in French and Spanish on 1 Sept 2010, bringing the total number of foreign languages available to seven, BelTA learned from Belarus Interior Minister Vladimir Naum Galperovich, Senior Director for the Central Office for Overseas Broadcasts of Belarusian Radio.

The radio station Belarus also broadcasts in Russian, Belarusian, Polish, English, and German.

The radio station Belarus' broadcasts are available on short and medium waves, FM waves in more than 20 European countries as well as online broadcasts, including ten hours of webcasts in English.

With the broadcasts now available in Spanish and French, Naum Galperovich expects the number of listeners to rise. The radio station Belarus also signs agreements with foreign radio broadcasters to increase the number of listeners.

In particular, Belarus' broadcasts were made available in Germany as of 1 January 2010 via the radio station Radio-700 and in Bialystok as of 1 July via the Polish Orthodox radio station Ortodoksja. Belarusian news is sent to the European portal of the European Broadcasting Union. The EBU's top ten includes Belarusian news, said Naum Galperovich.

In the future the radio station Belarus plans to establish and enhance ties with radio broadcasting authorities of other countries. Negotiations with China Radio International are in progress, too.

{Belarusian Telegraph Agency}

(via Arnaldo Slaen-ARG, DXplorer Sept 18)

**BELIZE** Belize antennas were not rhombics but phased H polarized dipoles. There is an illustration in the TCI catalogue as they made them although they were actually designed by Carl Smith. Each was supported by 8 towers not poles. They were pointed in a southerly direction for skywave propagation into central American countries which were of concern to the U.S. government of the time. And they were on 1530 and 1580 kHz. (Ben Dawson-WA-USA, Hatfield & Dawson, dxld Sept 10)

**BJELORUSSIA 279 BR**, Sasnovy, 2103-2121, 09 Sep'10, Bielorrussian, news until 2110, weather (tent) rpt., pops; 35332. Evening reception of this one has been adverse for many, many weeks. And there is the already usual heterodyne with 280.2 (usually 280) - Turkmenistan off ch. and \*always\* running an empty carrier?

(Carlos Goncalves-POR, wwdxc BC-DX TopNews Sept 12)

**CANADA/AUSTRALIA** Cox/Darwin summary. I think all the Collins transmitters at Sackville-CAN are long gone, replaced in two phases, 1992-94, and 1999. Thought the first replacements were ABB units, with the second wave being either ABB or Thales, or perhaps Thomson; not sure due to murky timeline with corporate mergers and acquisitions.

Don't believe everything you see on transmitter.be or tdp.info as much of it is either out of date or simply wrong.

(Steve Luce-TX-USA, dxld Sept 13)

3 x Collins 250 kW from 1968: Scrapped. Now Sackville should be the only site in the world still operating such transmitters. Cf.

(Kouji Hashimoto-JPN, JPNpremium Sept 1)

ECUADOR Stephan Schaa of VozAndes Media in Germany explained that after HCJB dismantled its shortwave transmitter site in Pifo, Ecuador, the equipment was donated to HCJB's German branch. This included a 100-kilowatt HC-100 HF transmitter, two 33-kilowatt Siemens linear transmitters which have been tested by HCJB with four kilowatts in DRM mode, and two 10-kilowatt regional shortwave transmitters, one of which is operating on 6050 kHz. The donation also included antennas and transmission lines.

VozAndes Media has a plan to build a new shortwave transmitter site somewhere else in Ecuador within 6 to 12 months, although a site has not yet been located. The plan is to broadcast in German, Spanish and Portuguese, as well as some regional South American languages such as Quichua. Broadcasts will be targeted primarily at Latin America, although there would also likely be broadcasts to Europe in German with the 100-kilowatt transmitter. Some DRM transmissions are planned.

7210 Voice of the Broad Masses (pres), Selai Dairo, 1735-1802, 12 Sep'10, Tigrinya (listed), HoA songs; 33432, vy. strg. adj. QRM at 1800 UT. At the same time, 7175 kHz carries the prgr in Arabic.  
(Carlos Goncalves-POR, wwdxc BC-DX TopNews Sept 12)

ERITREA The BC on 7171.95 kHz with HOA music is R. Eritrea.

Dear fellow Intruder Busters,  
I have heard the signal myself from 1850 till 2000 UTC Sept 18 and trying to pick up some station announcement. The signal was S=9+30dB with my dipole and slightly varying in frequency. Maybe the chaps in ERI have a VFO, who knows. At 2000 UTC the BC was signing off with the National Anthem of Eritrea. It sounded like "... Eritriyah-Eritriya-Eritriya..." and so on. So it was R. Eritrea or at least a BC stn from ERI.  
[\*] HOA Horn-of-Africa, common expression of BCLs]  
(Uli Bihlmayer DJ9KR, IntruderAlert Sept 18)

ERITREA/ETHIOPIA/UGANDA On same day Sep 3rd at 1600-1700 UT on 7195 kHz I listened to Eritrean radio only // 9710 kHz. No traces of Uganda were. Eritrea is using now in several times three // txs on 7140, or 7165, or 7172, 7175, 7195, and 9710 kHz.

Ethiopia only 7165 and 9560, also 6030 and till Sept 3rd 9705 kHz, but since Sept 4th Ethiopia is not on the air on 5990, 7110 and 9705 kHz. The last En prgr was on 3rd Sept at 1200-1300 UT on 9705 kHz.

(Patrick Robic-AUT-A-DX Sept 16)

FRANCE Note on Radio France Int'l mailing address.

Recently I sent a reception report to Radio France Internat. at two  
separate addresses, both of which were listed as addresses for RRs and  
verifications in the last edition of Passport to WBR (2009):

Radio France International  
English Service  
B.P. 9516  
F-75016 Paris Cedex 16  
France

...and...

TeleDiffusion de France  
Direction de la Production et des Methodes  
Service Ondes Courtes  
10 Rue d'Oradour sur Glane  
75732 Paris Cedex 15  
France

The first address snagged me a response with a verification letter a  
couple of months ago (of sorts - very boilerplate). Today I just received  
my original \*unopened\* envelope from the second address with an affixed  
stamp that is checked "Refused" on it - so I assume that the second  
address either does not currently exist, or does not currently even want  
mail (at least from outside France).

(Bruce Jensen-CA-USA, dxld Sept 16)

Hi Bruce,  
I guess TDF has moved a couple of years ago, so use this address instead:

TeleDiffusion de France

106, Avenue Marx Dormoy  
92541, Montrouge Cedex  
France

They confirm reports with a QSL featuring the ALLISS rotatable antenna. By the way, you may also use this address for reporting reception of other stations' relays via Issoudun, not only RFI.  
(Dmitry Mezin-RUS, dxld Sept 18)

FRANCE 9800 QSLs received September 2010. Trans World Radio, TWR Monte Carlo in English, signed f/d card by airmail from Vienna, Austria, in 135 days for English report (2 May 2010). Photo of European "oldtown" cityscape. Handwritten apology by Kalman Dobos for delayed response.  
(Bruce Jensen-CA-USA, dxld Sept 14)

Some 1.81 kilometers north of Monaco-France border at  
<[http://maps.google.de/maps?f=q&source=s\\_q&hl=de&geocode=&q=+43%C2%B045%2751.32%22N+++7%C2%B025%2725.41%22E&sll=51.151786,10.415039&sspn=18.754035,56.293945&ie=UTF8&ll=43.76426,7.423732&spn=0.002631,0.006872&t=h&z=18](http://maps.google.de/maps?f=q&source=s_q&hl=de&geocode=&q=+43%C2%B045%2751.32%22N+++7%C2%B025%2725.41%22E&sll=51.151786,10.415039&sspn=18.754035,56.293945&ie=UTF8&ll=43.76426,7.423732&spn=0.002631,0.006872&t=h&z=18)>

GAMBIA 648 GRTS, Bonto, still with its powerful, clear modulation, 2140-2149, 04 Sep'10, Vernacular, talks; 54433, QRM de E.  
(Carlos Goncalves-POR, wwdxc BC-DX TopNews Sept 7)

GERMANY 207 DLF, Aholming, fair this day despite QRM from neighbouring Morocco, 2114-2125, 09 Sep'10, German (what else?), home news magazine; 34433.

By the way, DLF Donebach on 153 kHz was recently been obs'ed. too: 2122-2137, 08 Sep'10, 33442, QRM de ALG + ROU, but it can be surprisingly fair on occasions, with little QRM.  
(Carlos Goncalves-POR, wwdxc BC-DX TopNews Sept 12)

9490 Democratic V.of Burma via Germany Sep 06 at \*2330-2340 UT. 34333 Burmese, 2330 UT sign on with opening music, ID, Opening announce, Talk.  
(Kouji Hashimoto-JPN, JPNpremium Sept 6) {B-10: 5905}

GERMANY Number stations. Kurzwelle im Fernsehen.  
Das Pro7-Magazin Galileo ist bekannt fuer seine Reportagen a la die groesste Wasserrutsche im Weserbergland oder wie scharf ist die schaerfste Currywurst und muss man fuer dieses Experiment drei Lastwagen aus einer Boeing 747 werfen?

Nachdem ich im heutigen Tagesverlauf mehrmals darauf hingewiesen wurde, moechte ich diesen Tipp auch hier weitergeben: Das Magazin berichtete gestern ueber Kurzwelle, Radiosignale und Utility. Zuschauer aus Deutschland koennen sich den Bericht unter

<<http://www.prosieben.de/tv/galileo/videos/clip/30948-mysterioese-radio-signale-1.2010038/>> [starts after 32 seconds advertising ...]  
ansehen.

Ein ganz gut gemachter Bericht, wie ich finde. Nur meine ich mal gehoert zu haben, dass die Anlage in Frankfurt gar nicht mehr auf Kurzwelle sendet.

Aber was kann man in diesem verwegenen Bereich unseres Hobbys schon

glauben? ;)

Weitere Infos z.B. unter: <<http://www.spynumbers.com/numbersDB/>>  
Schoenes Wochenende!  
73, Douglas Kaehler-D, A-DX Sep 10

Ganz gut gemacht, das Video.

<<http://www.prosieben.de/tv/galileo/videos/clip/30948-mysterioese-radio-signale-1.2010038/>> [starts after 32 seconds advertising ...]

das meiste ist ja bekannt, der Sender im Wald steht bei Neu-Isenburg /  
Langen / Walldorf / Zeppelinheim. Langen Unidentified NSA Echolon site ?

**GUATEMALA YOUR REPORTS PLEASE.**

Greetings to all friends of Radio Truth (Radio Verdad). May I inform you that we started to broadcast on short wave today at 1:30 p. m. (Guatemalan time) [1930 UT]. These are temporary transmissions, with only 50 watts power. We are using a very small transmitter. We'll appreciate your reports of how you receive our signal. Send your report to:  
<radioverdad5 @ yahoo.com> or to Apartado 5, Chiquimula, Guatemala.

Referring to our large transmitter, it is already on function, but we are waiting for Eng. Ralph Borthwick to come from Canada, for completing its repair, by the middle of October, and be able to come on the air with our full power again. God bless you. PLEASE SPREAD OUT THIS INFORMATION.  
(Dr. Edgar Amilcar Madrid, Manager and Director, Radio Verdad-GTM,

dxld Sept 17)

See previous reports in

<<http://www.w4uvh.net/dxld1036.txt>>

<<http://www.w4uvh.net/dxld1032.txt>>

4052.5 kHz. Nominal program schedule shows: Mon-Sat 1100-0605; Sunday 1255-0605 UT, so best chance should be at sign-on or in the few hours before sign-off.

Started trying for it at 0057 UT Sept 18: nothing on 4052.5, but very weak instrumental music in noise level, sounds religious, on 4055; and an even weaker seemingly broadcast signal on 4050: 3 x 1350 KWMU Washington MO as usual? Or Kyrgyzstan.

At 0100 the 4055 signal increases a bit and at 0101 an announcement, made out a word or two of Spanish, including "nosotros". So suspect R. Verdad's low-power 50-watt substitute transmitter is really on 4055; is that right, Dr. Madrid? Reception should improve later in evening. It's just as well to be on 4055, further from the 4050 QRM.  
(Glenn Hauser-OK-USA, dxld)

Thank you, Glen[n], for your excellent report. It is very useful and encouraging to us. Yes, you are right, we're transmitting on 4055 kHz, instead of 4052.5 kHz. The new technician argued that that was the right frequency on which we should get on the air. Our authorized frequency is from 4.0475 to 4.0575 MHz, and, to my best knowledge, the middle is at 4052.5 kHz, and that is the frequency imprinted inside of our big transmitter; however, I could not convince the new technician. Anyhow, I am glad about his temporary help, because now we are on the air. Our low power is 50 watts, but I may increase it up to 100 watts, if the fount [power supply?] supports it. I forgot to include our new frequency in my e-mails.  
(Dr Madrid-GTM, dxld Sept 18)

Despite my spreading the word about this immediately to the major DX lists, few other reports have resulted. Manuel Mendez in Spain tried for it, and got an extremely weak carrier only on 4052.7-LSB until 0606\* UT Sept 18, but apparently that could not have been R. Verdad.

My further monitoring UT Sept 18: at 0449 UT reception had not improved, still too much storm noise, but now I compare the very weak signal on 4055 to 6055 kHz REE, and with BFO find that 4055 kHz is very very slightly to the low side. (Since Star Radio buried itself inside the 75m band instead of 4025-, have not been able to perform such comparisons.) R. Verdad no better at 0524 UT, as I give up for tonight. Things should be quieter if one be awake to monitor at \*1100 UT, except on Sundays it's too late at \*1255 UT.

(Glenn Hauser-OK-USA, dxld Sept 18)

GUATEMALA 4052.7 Radio Verdad, Chiquimula, 0550-0606\*, Sept 18, after Dr. Edgar Madrid, manager of Radio Truth, Chiquimula, announced the return of this station with a provisional low power transmitter (50 watts), I try to pick up the signal, and I noted a carrier signal on 4052.7 kHz, LSB, between 0550 to 0606\* UT, extremely weak signal.

Debido que la senal era extremadamente debil, no pude notar ni voz ni

musica.  
(Manuel Mendez-ESP, hcdx Sat 18)

GUINEA 7125 R. Guinee, Sonfonya: still not around.  
(Carlos Goncalves-POR, wwdxc BC-DX TopNews Sept 1)

4900 Familia FM, Timbi Madina, 2157-2216, 05 Sep'10, French, folk songs,  
a few announcements, pops, webpage info, no news bulletin at 2210 UT as it  
was more or less usual; 35332.  
(Carlos Goncalves-POR, wwdxc BC-DX TopNews Sept 7)

4899.97 Familia FM at 2352-0001\* UT, nothing but current-sounding African  
Dance Pop mx, no anmnts. The song was either turned down or ended (with  
fade) at 0001 UT, deadair for a minute or two, then off. Decent strength  
and plainly audible, but like everywhere else in 60 meters these days,  
CODAR was a big QRM problem. Have sent a "quickie" French report w/MP3 of  
song snippets to Laurent Koulemou (Directeur Technique) and Moriba  
Tavagueze Kolie (Technicien Freelance), and Marcel Loua (SW Website  
Administrator).  
(Dave Valko-USA, hcdx Sept 17/18)

JAPAN [non] Printed and e-mail QSL's from Japan SW Club.

We will start issuing e-mail QSL for the JSWC edited programs in Wavescan  
and DX Partyline. Our e-mail address for your report is  
<[jswcqsl @ live.jp](mailto:jswcqsl@live.jp)>  
The QSL card issued by the e-mail is the same design as the printed QSL.

We continue to issue the printed QSL by the same system as before. Your  
report should be addressed to: JSWC, P.O.Box 44, Kamakura, Postal Code  
248-8691, JAPAN. 1 IRC or 2 US dollars for return postage will be  
appreciated.  
(Toshimichi Ohtake/JSWC, Kamakura-JPN, Aug 31, Dswci DXW Sept 8 via dxld)

JORDAN 11960 Jordan Radio Amman from Al Karanah site in Arabic noted on air this morning Sept 13 when turning-on my Eton E1 set at 0405 UT, signal S=6-8 deep fluttery, at still local dark in Germany. At 0420 UT increased reception, signal up to S=9+20dB. Short break in transmission, feed-off at 04.30:45 UT midst in sentence, tx off from 04.31:20 to 04.32:20 UT.

50 minutes morning news program til 04.49:30 UT. International politics report by female and male announcer, as well as phone interviews and orchestra jingles in between. Politics with Hillary Clinton on Sharm El-Sheikh. 0445-0447 UT International sports report, European soccer leagues results, Tennis tournament New York report. 0450 UT start modern Arabic music til 04.52:22 UT, when TX at Al Karanah site switched off midst on music broadcast.

Jordan Radio Amman 11960 kHz came not back on air again, when checked between 0452 and 0515 UT.

Jordan on shortwave is not regular anymore at scheduled 0500-0715 UT. Rather noted - irregularly not every day - at 0400-0500 UT slot. (wb, wwdxc BC-DX TopNews Sept 13)

11960 Same format on Wed Sept 15. TX at Al Karanah site on at 03.58:46 UT, weak signal of S=6 to 7, up to S=9+20dB from 0435 UT, til TX cut off at 05.01:13 UT. (wb, wwdxc BC-DX TopNews Sept 15)

KOREA D.P.R. 621 Korean on 620.9579 kHz at 1340 UT on Sept 11. Up to 620.9601 kHz at 1338 UT on Sept 12. Judging from the harangue-type talk it is probably North Korea. (Albert Lehr-CA-USA, mwoffsets Sept 13)

POLAND Poland longwave 225 kHz is off the air. LW transmitter Bydgoszcz  
- Solec Kujawski 225 kHz is off the air for maintenance September 13-26.  
(Karel Honzik-CZE, mwdx / BC-DX-UK Sept 13)

Poland off:

<<http://polskaam.radiopolska.pl/>> Maintenance RCN in Solec Kujawski.  
Polish Radio this month planned maintenance of the Radio broadcasting  
center in Solec Kujawski.

Maintenance will be held:  
from 13 September to September 26 from 8:10 hours to 20:00 CEST.

At that time, a program broadcast on Polish Radio frequency 225 kHz will  
be suspended. Issuance of replacement is not planned in conjunction  
termination of the contract between the Polish Radio and the operator to  
use the TP Emitel RCN Warsaw / Raszyn.

A break from work in Solec Kujawski transmitter is connected with the  
maintenance guy ropes and ground infrastructure and the current  
transmission.

R. Rossii, Surgut-RUS 225 kHz heard weak at 1500 UT on 225.001 kHz.

RUSSIA 216 R. Rossii, Krasnoyarsk, Siberia, at 2230-2251 UT on 14 Sep'10, Russian, talks, music & songs; // 6085 kHz; 15341. The conditions were extremely poor at the start of the obs., with no chance of even identifying the language, but by 2245 UT they had improved enough to confirm it was indeed Russian as well as to check this against the HF fq which was found to be parallel. This stn is audible on occasions after MCO (F) 216 kHz signs off, and is normally rec'ed. via a 14 m, low noise, vertical LF/MF antenna.

225 R. Rossii (pres), Surgut, 2331-... UT, 13 Sep'10, carrier detected, just that; 15351. But like I said to Mauno Ritola after he pointed out co-ch. POL was off for maintenance (ditto y/day., Sept 13), what else, if not this Siberian tx?

(Carlos Goncalves-POR, wwdxc BC-DX TopNews Sept 15)

ST. HELENA We at Radio St. Helena are also VERY SAD to have to announce the cancellation of RSD 2010. The problems with the tower holding the 3-element Yagi antenna are such that we simply had no choice. There is no chance to fix the tower in the next six weeks, but RSH is quite confident that we will be able to broadcast a RSD 2011 program next year. At the moment, I am investigating the possibility of setting up a wire antenna as a temporary measure, but I am not at all sure whether we will be able to do that. The technical resources on the VERY REMOTE island of St. Helena are not so good. If anything needs to be ordered from England, then it takes a lot of time and effort.

posting a report to <qsl @ rfa.org>  
(Edward Kusalik-Alb-CAN, DXplorer Sept 17)

SAUDI ARABIA 11784.92-odd 11785 BSKSA Djedda. Today Sept 14th was one of the better days propagationwise.

After long pause noted BSKSA Djedda's 2nd program again. Though scheduled in WRTH spring update as 0600-1700 UT on 11855 kHz. But heard today with Holy Quran prayer between 1630 and TX off at 16.59:18 UT at S=6-7 strength level on 11785 instead.

Checked against Voice of Indonesia, Jakarta, but latter was still in 31 mb on odd 9525.97 kHz S=9+20dB seldom strong at 1645 UT.  
(wb, wwdxc BC-DX TopNews Sept 14)

11784.92 This afternoon Sept 17 at 1550-1610 UT I checked the DUBIOUS Holy Quran signal in 25 mb again. Though signal was weak as usual, but could follow the program with SYNCHRONOUS detection feature on Eton E1.

Undoubtedly(!) is was same program like BSKSA HQ program on // 13710, 15205, and 17560 kHz. On 11855 kHz NOT even a carrier traced, the channel was totally empty.

ARS 11785 BSKSA Djedda, Tonight Sept 15 sign-off at 16.59:37 UT.  
(wb, wwdxc BC-DX TopNews Sept 15/17)

ARS 11785 BSKSA Djedda. Sorry, I'm not sure that this odd 11784.91 signal was origin of Saudi Arabia. That odd frequency used by ARS in the past, in 2008 season.

I heard only a HQ program until 16.59:18 UT at S=6-7 strength level. I'm sure that at this time VoINS Jakarta (the other odd candidate on v11785) was much, much stronger on 9525.97 kHz.

So, you managed an equal signal from 0958 UT, which lasts - probably - til 16.59:18 UT. Only the old Jeddah site sets are odd frequency. And the tiny signal fits only to the Jeddah signals in 31 or 25 mb. In B-10 season BSKSA probably covered by other broadcaster co-channel, only small window opens at 12-14 and 15-16 UT.

All Riyadh signals, even side lobe directions in Bengali, Swahili, and English language to WeAF are usually much stronger compared to Jeddah signals.

Dr. Hansjoerg Biener covered an item in August NTT column, that US-firm Continental will replace old units by new SW transmitters in 2011/2012 at Jeddah site.  
(wb, wwdxc BC-DX TopNews Sept 15)

ARS 11785 BSKSA Djedda. Are you sure that it was the 2nd prgr. and from Jeddah? At least today Saudi R. signed on with rather good signal at 0958 UT definitely with Quran prgr. on 11784.91 kHz. At 0830 UT a weak carrier appeared on the long-time Saudi offset of 11854.94 kHz, but I couldn't get audio.  
(Mauno Ritola-FIN, wwdxc BC-DX TopNews Sept 15)

SOUTH AFRICA/IRELAND Sunday 19th, 2010

Special Coverage arrangements for All Ireland Finals 2010 by RTE.

RTE Radio coverage of All Ireland finals 2010 - SW freqs.

Irish public broadcaster RTE has published details of its worldwide coverage of the All Ireland Finals on Sunday Sept 5th and 19th, 2010 [wb.]

Britain: Across most of Britain, listeners can receive coverage on Long Wave 252 kHz. In addition RTE Radio 1 is available on the UK free to air satellite platform Freesat on channel 750.

Worldwide: Across the world, the match commentaries will be available online at

<[www.rte.ie/radio1](http://www.rte.ie/radio1)>

Shortwave to Africa: In Africa, where many Irish people live and work, often in relative isolation with poor communications, RTE is providing special transmissions on shortwave radio:

To South Africa: 1300-1700 UTC on 7265 kHz MEY 100kW 005deg

To East Africa: 1300-1500 UTC on 15400 kHz MEY 250kW 019deg

1500-1700 UTC on 11695 kHz MEY 250kW 015deg

To West Africa: 1430-1600 UTC on 15445 kHz MEY 250kW 330deg

1600-1630 UTC on 11805 kHz MEY 100kW 335deg

Satellite Radio: Across the world, the match commentaries will be available on satellite radios on WRN2, channel 328.

Intelsat Service: For the first time, RTE Radio is providing a dedicated satellite radio feed of the finals. Full coverage from 1200-1600 UTC Irish time will be available on Intelsat (C Band) Channel 10: GAA Special. The coverage of the service is extensive - from western Africa over to Australia, as well as throughout most of Europe and Asia.

(RTE web site via RNW MN Andy Sennitt-HOL, via BrDXC-UK Aug 25)

SPAIN 1386 Euskadi Irratia, Bilbo, continues with its extremely weak modulation level (on a strong carrier). Could this be some test to evaluate listeners' reaction in the sense that, if little or none is received, then the tx is therefore redundant?

(Carlos Goncalves-POR, wwdxc BC-DX TopNews Sept 12)

SWEDEN Don't forget to follow the results of the Swedish elections on Radio Sweden Sunday Sept 19th. Our regularly scheduled programs in English at 1830 and 1900 UTC will carry our running election night coverage, and

we'll be broadcasting live online between 1830 and 1930 UTC.

We'll also have special online half hour broadcasts of our election night coverage in Kurdish and Russian at 1830 UTC, Romani at 1900 UTC, Arabic at 2000 UTC, and Somali at 2100 UTC.

(Radio Sweden Website)

TANZANIA [ZANZIBAR] 6015 Zanzibar on 6015 kHz again?

RTZ (tentative), \*0301-0345 UT on Sept 15. Thanks to Dan Sheedy for originally alerting me to this. Heard with almost the identical format for the past two nights. 0301 UT suddenly able to hear an announcer; 0303-0306 reciting from the Qur'an (on the 14th was not sure if Qur'an or a chanting/singing from 0302 to 0306); announcer talking; a short musical selection at 0317; more non-stop talking till BoH music; 0331 more talking till 0341 Islamic sounding singing; lost by 0344. Best reception was about 0318, which would fit nicely with Grayline reception. Possibly the language was Swahili or Arabic, but a little too weak for me to confirm.

Brandon Jordan, who routinely listens to African stations, also monitored here on Sept 15 and he feels "very confident that this is indeed Zanzibar". So the general consensus by those of us who have heard this is that it probably is Zanzibar. Would help to have others monitoring this as well.

(Ron Howard-CA-USA, dxld Sept 14-16)

Electricity supply, carried from the mainland by submarine cable, broke down Dec 10, 2009. So main power break lasted - probably - til Sept 14, 2010 ?

(wb, wwdxc BC-DX TopNews Sept 16)

The SW transmitter at Dole, 10 kms North-East of Zanzibar City (commonly known as 'Stone Town'), is off at the moment, but will return to the air once the blackout is over.

Dec. 10, 2009, will no doubt go down in Zanzibar's history as 'Black Thursday'.

On that day the electricity supply, carried from the mainland by submarine cable, broke down. Since then the retailers of generators and fuel have become quite rich, but the blackout has left most Zanzibarians angry, desparate and frustrated. It will still take many months before the cable will have been repaired or replaced. The authorities are still only in the negotiating stage with foreign companies willing to solve the problem.

R Zanzibar has generators for the 585 kHz MW transmitter and 97.4 MHz FM.

TANZANIA R Tanzania, Dar es Salaam, known locally as 'RTD' or 'TBC' is located at Nyerere Road, a few km's from the city centre. The studio building was constructed by the British in 1954. There I met 4 friendly engineers who told me a lot about Tanzania's long SW broadcasting history. With nostalgia they spoke about the last SW transmitter, 'the fifty-fifty' (i.e. 5050 kHz) which was taken out of service in 2006 because spare parts were no longer available. A few years earlier 6105 had 'died' too. Just 1 km away from the studio building is the transmitting station where these oldies are now collecting dust and rust. RTD meanwhile has adequate MW coverage and FM is available from 11 sites throughout the country.

Three programmes are broadcast:

TBC Taifa (= 'National', supposedly only on MW),

TBC FM in Swahili, and

TBC International in English for the capital city area on 90.0 MHz FM.

Dec. 10, 2009, will no doubt go down in Zanzibar's history as 'Black Thursday'.

On that day the electricity supply, carried from the mainland by submarine cable, broke down. Since then the retailers of generators and fuel have

become quite rich, but the blackout has left most Zanzibarians angry, desperate and frustrated. It will still take many months before the cable will have been repaired or replaced. The authorities are still only in the negotiating stage with foreign companies willing to solve the problem.

R Zanzibar has generators for the 585 kHz MW transmitter and 97.4 MHz FM.

The SW transmitter at Dole, 10 kms North-East of Zanzibar City (commonly known as 'Stone Town'), is off at the moment, but will return to the air once the blackout is over.

The 10 kW transmitter at Chumbum on 585 kHz will be replaced by a new 50 kW Chinese unit.

I was given the following schedule:

585 at 0900-2100  
6015 at 0300-0600  
11735 at 1500-2100  
on FM at 0300-2100 (Unguja 97.4 and Pemba 90.5 MHz)

The 11735 kHz outlet is regarded as an international frequency for coverage of the mainland and the vast Swahili-speaking region of East and Central Africa. By the way, Zanzibar is the collective name of all islands under the autonomous Revolutionary Government, part of the United Republic of Tanzania. Zanzibar Island is now commonly referred to as Unguja. (ibid., Benelux DXC Bulletin, via wwdxc March 4, 2010)

TANZANIA 11735 Nach den Planungen fuer die Wintersaison haette die SAUTI YA TANZANIA ZANZIBAR abends auf 11735 kHz ungestoerter hoerbar sein.

Tatsaechlich ist der Sender auf 11735 kHz seit Anfang Dezember 2009 ausser Betrieb. Am 10. Dezember 2009 wurde das Seekabel, das Strom vom Festland nach Sansibar fuehrt, unterbrochen, und noch ist unklar, wann es repariert oder ersetzt wird. Das Kabel wurde 1975 verlegt und sollte eine Lebenszeit von 25 Jahren haben, so dass es zehn Jahre laenger gehalten hat als erwartet.

Derzeit betreibt die Stimme Sansibars mit Notstromgeneratoren die Mittelwelle 585 kHz und die UKW-Frequenz 97.4 MHz. Die Kurzwellenanlage in Dole, etwa 10 km nordoestlich von Sansibar City, wird erst wieder auf Sendung gehen, wenn die regulaere Stromzufuhr gewaehrleistet ist. (ibid., ADDX Kurier 4-2010)

Einladung zum 46. DX Camp des Rhein-Main-Radio-Clubs

Das mittlerweile 46. RMRC - DX - Camp findet traditionell im  
Naturfreundehaus auf dem Wingertskippel in 63505 Langenselbold bei Hanau  
vom 27. September bis zum 3. Oktober 2010 statt.

Die ersten Camp-Tage sind wie immer vorwiegend zum Hoeren. Hier gibt es  
Grasnarben DX mit unterschiedlichen Antennen.

Der RMRC stellt eine Langdrahtantenne und einen Tropenbanddipol von  
Keleman zur Verfuegung.

Weitere Antennen koennen selbstverstaendlich aufgebaut werden.

Der RMRC bietet allen Teilnehmern des Camps Anschluss an die Antennen  
ueber einen Antennenverteiler.

Wir haben auch einen DSL-Anschluss (WLAN) und werden live im Internet zu  
sehen sein.

Zum geplanten Programm:

Fr. Abend: Dr. Dish berichtet ueber den Aufbau und den Kampf um DrDish-TV  
- dazu gibt es ein warmes und kaltes Buffet und Freibier.

Sa. Abend: Praesentation des neuen QSL-Kalenders 2011.

Einzelheiten sind auf der Webseite des RMRC unter der Rubrik DX-Camp zu  
finden.

Teilnehmer, die mit der Bahn kommen, koennen nach Voranmeldung vom Bahnhof  
Langenselbold abgeholt werden.

Anmeldung bitte ueber Email an <mail @ rmrc.de> oder telefonisch unter  
0177 - 237 43 26.

Wir freuen uns ueber jeden DXer, der teilnehmen moechte.

Harald Gabler  
RMRC Vorstand  
(Sept 8)

Very sad news:

GABRIEL IVAN BARRERA, passed away on September 14, 2010.

"The saddest news of Radio that happened to me in my life is to share with  
you, the news on the sudden death of our comrade and friend,  
GABRIEL IVAN BARRERA.

He arrived in Santiago to share the celebrations of the bicentenary of his  
dearly beloved CHILE.

The land of his birth has also sought today to be the departure.

It happened tonight, September 14, at 23:15 Chilean Time due a fulminant  
heart attack.

It was among antennas and radios in my shack, Internet sharing and  
enjoying our passion.

Thanks to each and every one of you, who shared with and felt my best

friend.

73 compadre, from where you deliver us your wisdom that one day you shared with me.

I love you infinitely.

<[http://www.youtube.com/watch?v=M2TZf-Ta\\_Mc](http://www.youtube.com/watch?v=M2TZf-Ta_Mc)>  
(PlayDX Sept 15)

Sad news indeed. He joined Numero Uno in June 1990, when John Herkimer was editing, and stayed with us in DXplorer. "GIB," as he was known, was the editor of the "Onda Corta" bulletin among other DX publications, and he was always a reliable reporter.

R.I.P.  
(Jerry Berg-USA, DXplorer Sept 18)

This is a shock. I had the good fortune of meeting Gabriel while in Buenos Aires in 1985. He made connections for me to visit RAE and invited Theresa and I over to his apartment for dinner. He was a real gentleman. I was hoping to reconnect in three or four years when I journey to that part of the world again.  
(Don Moore, DXplorer Sept 18)

I knew GIB mostly by reputation, although on several occasions in the past he helped me directly with considerable information. His sudden passing is very sad. He surely will be missed greatly.  
(Don Jensen-USA, DXplorer Sept 18)

TX center and masts erected already in 1965.

Inauguration de la Nouvelle station de radiodiffusion OM a Sidi Hamadouche (S.B.A).

Introduction:

La nouvelle station de radiodiffusion Ondes Moyennes de puissance 600 kW du Centre Rahal Zoheir du site de Sidi Hamadouche (W. Sidi Bel Abbes) a ete mis officiellement en marche le lundi 25 janvier 2010 par Monsieur MIHOUBI Secetaire d'Etat aupres du Premier Ministre, charge de la Communication, en presence de MM le Wali de Sidi Bel Abbes et des Directeur generaux de TDA et de l'EPRS. Cette station remplace l'ancienne existante sur le meme site.

Cette realisation importante fait partie du projet de «Realisation de deux (02) stations radiodiffusion en Ondes Moyennes a Ain Beida et a Sidi Bel Abbes+ visant le renouvellement des deux stations principales diffusant le programme Radio CHI en Modulation d'Amplitude et couvrant essentiellement les deux regions Est et Ouest de l'Algerie.

Pour rappel, ce projet de renouvellement vise le remplacement des equipements des stations d'emission de 600 kW en service depuis 1965 dans les deux regions Est et Ouest. Depuis les annees 90, ces stations sont devenues tres vetustes et obsoletes et n'emettent plus qu'a puissance reduite en raison de la degradation de leurs caracteristiques.

2. 531 kHz new location F'kirina Wilaya d'Oum El Bouaghi, 279 m mast.  
(former Ain Beida, 93 kms south of Constantine; formerly much TOO close of the Ain Beida airport, some 7 kilometers apart).

(R BULGARIA DX MIX News, Ivo Ivanov, via wwdxc BC-DX TopNews Sept 25)

AUSTRALIA 2325 VL8T, Tennant Creek NT, 2105-2115, 19 Sep'10, English, [unreadable] talks, music at 2106 UT; 15331, and gradually lost under static. VL8K 2485 kHz was not audible, VL8A 2310 kHz was audible, and probably // to VL8T, but it was impossible to confirm that; this one was also gradually fading until it became like the VL8T's signal. Both were best received via a 6x12x6 Ewe and my new K9AY now fitted with two extra loops, so it became an eight position antenna.

(Carlos Goncalves-POR, wwdxc BC-DX TopNews Sept 20)

AUSTRIA 6155 / 17620 Sondersendung AMRS Moosbrunn

Das oesterreichische Bundesheer stellt seit seiner Neuaufstellung Kontingente zu Friedensmissionen ab. Die nichtmilitaerische Verbindung zwischen der Truppe und der Heimat wird im Amateurfunk durch den "Heimatkfunk" hergestellt.

Dem OeVSV gehoert neben dem neun Landesverbaenden (der neun oesterr. Bundeslaender) die AMRS an, die Austrian Military Radio Society, in der die lizenzierten aktiven und ehemaligen Angehoerigen des Bundesheers vereint sind.

Die AMRS produziert anlaesslich des 40. Jahrestags ihres Bestehens eine Jubilaemssendung, die vier Mal mit 100 kW ueber Moosbrunn ausgestrahlt wird:

7.11.2010 1000-1030 UTC 6155 kHz Europa

7.11.2010 1600-1630 UTC 17620 kHz Nordamerika Ost

Wiederholung am 14. 11. 2010 mit den gleichen Parametern.

Bestaetigungsverkehr nach jeder Sendung (Europa auf 7120+-, Amerika auf 14210 +- kHz). QSLs ueber <oe4rgc @ amrs.at>

Weitere Details siehe <<http://www.amrs.at>>

**BAHRAIN** 6010 QSL: Radio Bahrain, partly detailed letter of confirmation for an old reception report.

Address: Box 1075, Manama, Bahrain. v/s Abdulla Al-Baloushi, Director Technical Affairs.

New radio country verified! Thanks to info published by Jim Evans-TN-USA.

You can see some images of these QSLs in my blog:

<<http://maresmedx.blogspot.com/>>

(Artur Fernandez Llorella-ESP, hcdx Sept 17, dxld)

**BOLIVIA** 4699.951 R. San Miguel, at 1007 UT, good with Spanish talk by a man, time check, into huaynos. 15 Sept.

(David Sharp-NSW-AUS, dxld Sept 22)

**BRAZIL** 5044.981 Radio Nacional da Amazonia on 5045?

I'm hearing Radio Nacional da Amazonia program on 5044.981 kHz, // 11780

kHz with a full ID at TOH. I thought this frequency was Radio Cultura do

Para, but that's not what I'm hearing.

(Ralph Brandi-NJ-USA, DXplorer Sept 25)

**CANADA** 6160.01 CKZU, at 0908 UT, CBC news by a man, good 'till NHK s/on with IS at 0902 UT. Presume this is Vancouver and not St. John's. 10 Sept.

(David Sharp-NSW-AUS, dxld Sept 22)

9624.91 CBC Radio One, "Randy Bachman Vinyl Tap" oldies program. Caught

CBC ID at 0330 UT on 11 Sept. // CBC 91.5 Internet stream. SW audio was

two seconds ahead. QRM splatter from 9620 kHz. This signal distorted,

weak, and off frequency.

(Dave Valko-PA-USA, hcdx Sept 18, dxld)

**CHINA** 21410 BC interference. 0600-0700 UT. Intermodulation of China mainland jamming against 21550 kHz RFA Mandarin, 21690 kHz RFA Tibetan

Hallo zusammen, hier eine BC-Stoerer-Meldung:

06:20 UTC: IM3-Produkt auf 21,410 MHz aus China-BC-Tx auf 21,550 MHz und 21,690 MHz mit ca. -40dBc.

(Vy 73 de Hans Schlecht, DL8MCG; to <bandwacht @ darc.de> Sept 19)

**COLOMBIA** 5910.024 Marfil Estereo, 0820 UT, Spanish, talk by a man, into traditional ballad. Good, despite t-storm QRM. 10 Sept.

(David Sharp-NSW-AUS, dxld Sept 22)

**CONGO** 6115 Radio Congo, 1755 UT, French, Talk by a woman, African music bridges, ID as "Radio-Congo." Strong signal but running low mod. 10 Sept.

(David Sharp-NSW-AUS, dxld Sept 22)

**COSTA RICA** [and non] 5954.18v ELCOR (Radio Republica relay), Guapiles.

Here is a multi-day (September, 2010) tracking of their activity.

Currently back in the clear the first hour, and worth noting that the Cuba jammers come up almost always to the second often, indicating they must be on timers:

Sept. 13 - 5954.18, 2122, down to 5954.14 at 2153, back to 5954.18 2156.  
Cuba jammer #1 up at 2158:25, second jammer a few seconds later.

Sept. 14 - 5954.18, 2126, Cuba jammers up 2158:25.

Sept. 15 - 5954.18, 2137. Cuba jammers up 2158:08 and 2158:25.

Sept. 16 - 5954.18 at 2117, 5954.14 at 2152.  
Cuba jammers up 2158:20 and 2158:25 UT.

Sept. 20 - 2150, no trace of ELCOR, but the first jammer blindly  
showed at 2158:16 UT.  
(Terry L Krueger-FL-USA, dxld Sept 22)

I heard ELCOR / Radio Republica on Sept 18th, at 0345 UT on 5954.173 kHz.  
They s/off at 0348 UT after a very clear ID. No jammers, clear channel.  
(Arne Nilsson-SWE SM2EJB, Northern Sweden, DXplorer Sept 21)

2859.8 tnx to a tip from Brian Alexander reminding us of the harmonic,  
last heard 6+ months ago, it's still there, and oncoming fall / winter  
conditions should audiblize it better. Sept 23 at 1117 UT I hear some  
Mexican music, stronger than North Korea 2850 kHz; 1119 UT a brief  
announcement may have mentioned San Carlos, for this is surely R. San  
Carlos, off-frequency as before, 2 x 1429.9 kHz.

WRTH 2010 says it's TIRDVC, 3 kW on 1430 UT from Ciudad Quesada at 1115-  
0200 UT, but no mention of the harmonic! making this CR's only active SW  
station, if you don't mind fudging HF a bit below 3 MHz. By 1135 UT, it  
had become weaker than 2850 and bothered by intermittent local line noise  
bursts.

[later] There is of course also ELCOR, 5954+ kHz, with Radio Republica,  
believed to be from Costa Rica, lacking any hard confirmation, and it's  
absent from WRTH 2010, altho it was in 2009 but lacking details, not even  
a number) address entry.  
(Glenn Hauser-OK-USA, dxld Sept 24)

CROATIA 6164.65 odd frequency, Croatian Radio Zagreb Deanovec at  
0620 UT on Sept 25, S=9+10dB, Talk in Croatian language.  
(wb, wwdxc BC-DX TopNews Sept 25) see also HRT CR relay via M&B Germany.

CUBA Is this already known? <<http://www.ecured.cu/index.php/Radiocuba>>  
Seems to me worth to check out if this data is plausible, since it looks  
like real stuff.  
(Kai Ludwig-D, dxld Sept 23)

No, that R. Cuba MW list is new to me, and very interesting. Since it's  
jpg and uncopyable I started to hand copy all the locations for 1180 kHz  
(really to jam Radio Marti), until I realized there were several in almost  
every province!

Totaling about 35, R. Rebelde except for one R. Reloj, in Marti(!),  
Matanzas, and some 'emergency' listings. If all these are really on the  
air, there should be an even bigger mess on 1180 kHz than Florida monitors  
are hearing. Of course most are low power and do their job only in a  
limited radius around their towns. Listings for Holguin and Santiago de  
Cuba are blurred, so any entries for 1180 or 1620 kHz there may have been

missed.

1620 outlets definitely listed, only two, and ta-dE1, here are the locations:

1620, Ciudad de La Habana, Guanabacoa, Radio Cadena Habana, 5 kW 1620 kHz, GuantEInamo, GuantEInamo, Radio Rebelde, 1 kW

However, I don't think the former programming has been reported on 1620 kHz, just two (or more) unsynchronized Rebeldes.  
(Glenn Hauser-OK-USA, dxld Sept 23)

EQUATORIAL GUINEA 6250 R Dif. de Guinea Equatorial, Malabo, 0558-0603, Sep 07, Spanish, 0600 UT informacion matinal, "Radio Nacional de Guinea Equatorial" ID, Panorama nacional, utility beep QRM. Was expecting major newscast, but at 0603 back to hlife music. Had faded out by 0633 into equatorial daylight.  
(Glenn Hauser-OK-USA, dxld via dswci DXW)

ERITREA TX usage of Eritrea on 7 MHz. I have made investigation on the 3 transmitters of Eritrea using 7 MHz. Their offsets are: tx "A" -10 Hz, tx "B" +5 Hz and tx "C" +20 Hz.

Tx A is usually on 7175 (7172) kHz, tx B on 7165 kHz and tx C has most variable frequency.  
(Pekka Kempainen-FIN OH2BLU, intruderalert Sept 25)

FRANCE/GERMANY 15160 YFR in Oromo language replaced via Media&Broadcast Nauen 500 kW 140 degrees by Issoudun 500 kW 130 degrees.  
(WYFR Sept 20)

GERMANY 15225 Baati Rewmi R. ("Voice of the Nation" by STGDP) via Germany. Carrier came on 21 Aug at 1813:55 UT and dead air. 1815 UT start of program with drawn-out notes on wind instrument and opening by Male in local language. Possible ID and mention of Gambia but not 100% sure. Nothing but talk by M right to the end of the program. Same M heard in their Web audio stream. Ended the program with same wind instrument and off at 1830 UT. Tnx Brian Alexander logging. Someone needs to go to The Gambia and set them up with a SW transmitter.  
(Dave Valko-PA-USA, hcdx Sept 18)

M&B Nauen site on 15225 kHz 125 kW at 221 degrees 1815-1830 UT at Sats only. To zone 46W. RMI broker.

HRT Croatian Radio via M&B in S-09 from Sept 7th.  
Replaced Nauen by 3 x Wertachtal 100 kW reduced power outlets:

GUATEMALA Wayne Berger of TGN has died, in Jerusalem.  
May I inform you that the Engineer Wein from Radio Cultural TGN died today  
in Jerusalem. I am sorry, I don't know how to spell his family name. I  
suppose he went to a tourist trip to Israel in these days, but I am not  
sure about it. I heard the sad news at Canal 27, a Guatemalan Christian  
Channel. Please inform the other radio listeners. Blessings!  
(Edith Madrid-GTM, dxld Sept 21)

Yes, it's Wayne Berger, director of Radio Cultural. The notice has just  
appeared on the TGN home page:  
<<http://www.radiocultural.net/site/index.php>>  
(Glenn Hauser-OK-USA, dxld)

(David Sharp-NSW-AUS, dxld Sept 22)

7145 Lao National R., Vientiane, at 1346 UT on September 14. Local news in English; items about the Lao National Assembly; 1353 UT ID with AM frequency; International News; this was causing some QRM for hams. Happy to report this has been heard daily through September 18, since their reactivation 10 days ago.

(Ron Howard-CA-USA, dxld Sept 18)

MALAYSIA [SARAWAK] 5030 Sarawak FM via RTM, 1330-1340, September 16. Special coverage of "Malaysia Day"; interesting speech in English and in vernacular promoting national unity; theme: one Malaysia, one Sarawak and one people; 1343 UT ID for "Radio Malaysia Sarawak FM"; song about Malaysia followed by "Sarawak FM" singing jingle; fair.

Audio at <<http://www.mediafire.com/?t6cus98q6e7qr2s>>

On September 16, 1963, Malaya, along with then-British crown colonies of Sarawak, North Borneo (later renamed Sabah) and Singapore joined together to form Malaysia. This year is especially significant for Sarawak and Sabah because it is the first year that Malaysia Day is a public holiday.

In the past only the Independence Day of Malaya (on August 31, the original independence date of Malaya) was celebrated as such.

RE: Yakutsk 100 kW 7230 or 7345 kHz ?

Hello Wolfgang, Thanks for this information. 6150 is blocked by Cuba at 0600/0700+UTC but I still don't hear either 7200 or 7230 kHz around that same time period. I wonder if their transmitters are using reduced power as 7200 kHz in particular used to produce a good signal on many days, and 7345 kHz less strongly.

(Noel R. Green-UK, wwdxc BC-DX TopNews Sept 23)

END OF 64-YEAR-OLD JAPANESE PROGRAMME FROM RUSSIAN FAR EAST.

A Japanese announcer and his wife had their last recording on Monday of a long-running programme to be discontinued this week from the Japanese-language service of the Voice of Russia. The roughly 40-minute "Siberia Galaxy Station," produced for Saturdays by the broadcaster's Khabarovsk bureau as part of the two-hour daily Japanese-language broadcast, dates back to 1946, but will have its last airing time next Saturday night, Japan time.

Kazuya Okada, 49, has been the only Japanese announcer at the bureau, and his programme, which introduces Russian culture and the voices of its listeners, has attracted many devotees over time, with about 150 letters and e-mail messages arriving from all over Japan every month. Financial difficulties and reorganization have forced the program's termination. "I've come all the way thanks to my listeners," Mr Okada, who is from the city of Saitama, outside Tokyo, said after the recording. "With the last recording over, I have a sense of fulfillment, satisfaction."

The bureau's Japanese-language broadcast was launched by Radio Moscow, the Voice of Russia's predecessor, in 1946. It was a propaganda service during the Soviet era, but since April 1996, after the collapse of the Soviet Union, the bureau has aired the programme independently made by the Okadas.

The programme will end with its 222nd edition aired on Saturday during the Japanese-language service on mediumwave and shortwave frequencies from 9 pm to 11 pm Japan time, which itself will continue, with all its content produced at the broadcaster's head office in Moscow thereafter. The Okadas

were dismissed in August and rehired this month as temporary employees.

TAJIKISTAN 15582 VoTibet.  
15582\*VOICE OF TIBET 1407-1430 Tibetan 100 131 Dushanbe-Yangiyul TJK VOTi

Voice of Tibet noted Sept 24th with S=8-9 here in Germany, no China mainland jamming noted so far.

15568 odd at 1235-1307{Aoki} UT slot, Sept 25, not as strong as usual, only S=7 this afternoon. Also accompanied China mainland Firedrake music jamming on even 15570 kHz rather weak today at 1247 UT, Sept 25.  
(wb, wwdxc BC-DX TopNews Sept 24/25)

TIBET [and non]. UNIDENTIFIED. 15555 and 15556 kHz carriers causing weak het, noticed Sept 15 at 1423 UT as I was checking WJHR 15550 kHz. Typical behavior of ChiCom jamming vs V. of Tibet which have been tracked on numerous frequencies in the 15.5-15.6 MHz range, altho current Aoki does not show them near 15555 kHz.

15520, at 1301 Sept 20, V. of Turkey eastward signal poor, but unusually about as good as the // westward one in English on 15450 kHz. Plus, a het against 15520 but that went off at 1302\* UT before I could decide from which side.

Thus I suspect it is another ChiCom jammer in the cat-and-mouse game with V. of Tibet in this range, which probably just jumped somewhere else. Aoki does show VOT via TAJIKISTAN on 15521 kHz at 1330-1342 UT.

Then at 1302 I scan up toward 15600 kHz and find another off-frequency het, from 15568 kHz, vs R. Svoboda on 15565, Russian via Rampisham. The latest Aoki, dated Sept 18, does show VOT on 15568 via TAJIKISTAN at 1235-1307 UT.

And an hour later at 1406, a 15578 carrier makes a het against VOA Music Mix, Sao Tome on 15580. Aoki also shows 15578 kHz as VOT via TAJIKISTAN at 1330-1407 UT.

It's impossible to tell whether these weak carriers are VOT itself or ChiCom jamming, but my money is on the latter.  
(Glenn Hauser-OK-USA, dxld Sept 24)

USA/SUDAN [non] New program "VOA Sudan in Focus" of VOA started on Sept 23 at 1630-1700 UT on 9675NAU, 12015WER and 13825WER kHz. It was a Sept 20 start plan, but was able to receive only loop ID of RFE and RL in Sept 20-22 slot.

<<http://www.voanews.com/english/news/special-reports/world-and-regional/Sudan-Elections-in-Focus-86961342.html>>  
de Hiroshi  
(Sei-ichi Hasegawa-JPN, dxld Sept 23)

Unfortunately I was out, and missed that program this afternoon. But Herbert Meixner in Eastern Austria noted this log today.

12015 suffers by VoKorea Pyongyang in German co-channel, 9675 suffers by Tiganesti Romania powerhouse next door 9680. (wb)

Re: "VOA Sudan in Focus" - Zu Sendebeginn am 24.09. "RFE"-ID.

13825-WER Manchmal auftauchender Heulton in LSB, Fading, sonst ungestoert, AM mit O=3/4, langsam besser werdend/bleibend.

12015-WER VoKorea dominiert mit Deutsch-Sendung. Dann Russland auf 12010 (mit defektem Sender?), VoA leise im Hintergrund. Anfangs O=1/2, mit Russland O=0.

9675-NAU Anfangs mit O=3 in LSB [keine Chance in AM]. Schnell schlechter werdend und nur mehr zwischen O=2 und unhoerbar. Zu grosser Einfluss von RRI Tiganesti auf 9680 in French.

Um 1659 UT ohne Absage s/off.  
(Herbert Meixner-AUT, wwdxc BC-DX TopNews Sept 24)

USA WWCR-1 on 3255 kHz after 0400 UT ? The last two night I've observed that WWCR around midnight EST has been moving from 3215 to 3255 kHz. Is this a test or a scheduled change? I looked at their website and see nothing. I haven't actually heard the changeover but may try to tonight. Anyone else observing this? It's not my radio I think, my Degen 1103 shows other 90 Meter stations where they should be, WWRB 3185 kHz, CHU 3330 kHz.  
(Travers-USA, dxld Sept 24)

Maybe an antenna test for B-10 season, when 3255 kHz is used at 22-01 / 23-02 UT slot instead. (wb)

7811usb AFN, Saddlebunch Keys FL, 2218-2233, 18 Sep'10, interviews over the phone; 35443; // 5446.5 kHz poor, barely readable, 12133.5 kHz fair albeit noisy.

### INTERNATIONAL. TRENDS IN TROPICAL BANDS BROADCASTING 2010

A year ago I did forecast, that there will not be many Domestic broadcasting stations left on the Tropical Bands (120, 90 and 60 mb) in year 2020 and this trend continues.

As editor of the Domestic Broadcasting Survey (DBS) my task is, throughout the year until the next publication, to check the bands myself and follow the loggings from our members and other DX-ers around the world. For each frequency on the list, a note is taken of the months when it has been heard. If a station has not been heard by any DX-er during the past 12 months, it is deleted. By this measure, the DBS contains only the active domestic broadcasting stations. With this systematic registration of broadcasting stations on the Tropical Bands each year, it is possible to make some statistics, on how many frequencies were active in each region of the world and compare these numbers. International broadcasters, Clandestine and Pirate stations are not included in these statistics.

Domestic Broadcasting Survey 12  
You can read about the new DBS-12 at  
<<http://www.dswci.org/news/2010/1004/dbs-12.pdf>>

According to DBS-12, published in April 2010 by the DSWCI, 223 frequencies were heard in the frequency range of 2.200 to 5.800 kHz by DX-ers around the world during the past year. That are 12 frequencies less than the previous year.

Active domestic transmitters on 2200 - 5800 kHz

Region	1973	1985	1997	2010
Central Africa	102	76	40	12
Southern Africa	57	39	33	8
Middle East	9	4	1	0
Indian Subcontinent	62	45	45	30
South East Asia	40	29	21	4
Indonesia	171	105	65	10
China, Taiwan, Mongolia	119	110	75	32
CIS (former USSR)	61	59	47	7
Far East	38	28	28	12

Papua New Guinea	17	20	20	14
Australia and other Pacific	10	4	13	11
Central America, Mexico	21	23	24	3
Caribbean	29	3	3	2
Northwestern South America	98	41	19	3
Ecuador	47	33	22	4
Peru	78	69	78	25
Bolivia	35	42	25	11
Brazil	107	87	67	34
Southern South America	5	2	1	1
Total	1,106	819	627	223

Countries like Brazil, China, India, Peru, Papua New Guinea and Bolivia are still dominating the Tropical Bands. But during the past year Tropical stations have disappeared, especially in Central Africa, Latin America and Indonesia. The reason is that other media got higher priority than keeping an elderly Shortwave (SW) transmitter alive.

(Anker Petersen, DSWCI DX Window Aug 25, direct and via dxld)

### JAPANESE QSL COLLECTION ON WEB

My QSL collection from 1956 is now on the web. At

<<http://picasaweb.google.com/jswc5160?showall=true#100>>

you can see it. This page was exhibited by efforts of Mr. Koichiro Itou (member of Japan SW Club), Iwate prefecture. I am very happy that many old and young listeners over the world visit this page. By the way, this page is now on the way. The new QSL will be added.

(Shinichi Shiraishi, Sendai-JPN, Aug 28, dswci DXW Sept 8 direct and via dxld)

#####

### The loss of Gabriel Ivan Barrera.

A week ago DSWCI-member since June 1983, Gabriel Ivan Barrera suddenly was hit by a heart attack and passed away at an age of only 52. He was born in Chile, but when his father established an international trade business in Buenos Aires, Gabriel was employed there. He has been a keen DX-er since 1976 with special interest of Latin American and African stations on the tropical bands. By 1989 he had heard 180 countries and verified 145 countries. For about 30 years he has been DX-Editor of the DX-programme of Radiodifusion Argentina al Exterior and his last DX-Supplement was aired on Sep 17, 2010.

He wrote these words on a DSWCI Questionnaire on March 18, 1989: "I am very happy to be a member of DSWCI, principally because all the information is of first level around the world, always with the latest news and commentaries. For me, the DSWCI is the best DX club in the World. GIB."

Gabriel did visit my home in Denmark August 15, 1990 on a business trip. I visited Buenos Aires, hosted by Gabriel for a week in March 1995,

including a dinner at his apartment with his wife Beatrix and their two children, Ivan (8 years) and Fernanda (2 years) and a visit to his father's ranch near Coronel Vidal on the vast Pampas 320 kms south of the capital. A visit I will never forget. When I visited Hugo Lopez in Santiago de Chile in 2006, Gabriel called from Buenos Aires to say hello to me.

He flew to Santiago last Tuesday to share the celebrations of the bicentenary of Chile, but was hit by a heart attack when visiting his good DX-friend Hugo Lopez. Gabriel was cremated on Thursday and his ashes travel to Buenos Aires on September 25. It is a big loss to me personally and to the DX-Community all over the world and to RAE, as their DX-editor has passed away. May he rest in peace.  
(Anker Petersen-DEN, dswci DXW Sept 24)

This e-mail is to inform you, the death of our friend Gabriel Ivan Barrera as consequence of heart fulminant attack, the death was in Santiago, Chile. I received a phone call from Hugo Lopez at at 05.55 UTC informing me the sad news. GIB arrived yesterday to Chile. (Eramo)

Here is a rough translation of the e-mail text from DXer Hugo Lopez, CE3BBC Chile and has just being circulated in various DX reflectors: "The saddest news of Radio that happened to me in my life is to share with you, the news on the sudden death of our comrade and friend, GABRIEL IVAN BARRERA. He arrived in Santiago to share the celebrations of the bicentenary of his dearly beloved CHILE. The land of his birth has also sought today to be the departure.

It happened tonight, Sep 14, at 2315 Chilean Time due a fulminant heart attack. It was among antennas and radios in my shack, Internet sharing and enjoying our passion. Thanks to each and every one of you, who shared with and felt my best friend. 73 compadre, from where you deliver us your wisdom that one day you shared with me. I love you infinitely. Hugo Lopez Carmona. Contact: ce3bbc@hotmail.com . (Nigro)

Sad news indeed. He joined Numero Uno in June 1990, when John Herkimer was editing, and stayed with us in DXplorer. "GIB," as he was known, was the editor of the "Onda Corta" bulletin among other DX publications, and he was always a reliable reporter. R.I.P. (Berg)

He was a knowledgable DXer willing to go the extra mile for DXers, especially in securing RAE veries. I have his publication from 1990, "Latin American Radio World." (Herkimer)

I knew GIB mostly by reputation, although on several occasions in the past he helped me directly with considerable information. His sudden passing is very sad. He surely will be missed greatly. (Jensen)

Gabriel was one of my best friends. I was today with his father and a few minutes ago I visited Radiodifusion Argentina al Exterior to inform the Spanish Section Manager about this sad news. This is one of my sad days of my life. (Slaen)

My feelings by the death of Gabriel Ivan Barrera, a DX legend! Good bye Gabriel. (Otavio)

Very sad news, GABRIEL IVAN BARRERA passing. He was a good friend.

Condolences to his family and friends. (Wilkner)

His is a name that I have been familiar with for a long time, and particularly in connection with RAE. It is sad to read of his passing.  
(Green)

Thanks Anker, and I shall write in peace. Yesterday was his cremation and his ashes travel to Buenos Aires on Sep 25.  
(Lopez, Sep 17; all via dswci DX Window Sept 24)

Newly designed website at: <[www.knls.org/](http://www.knls.org/)>  
(Gupta-IND, via JPNpremium Sept 24)

ALBANIA 1458 Fllake tx splatter.  
1500 kHz strong distorted signal. Currently seeing around 1500 kHz a very wide modulated distorted signal. Very strong. Width ~20kHz. Seems to be a failing tx. I haven't found out what station it is as it is hard to understand. Sounds // 1458 kHz CRI via Fllake Albania.

Yes, it was them: s.off at 2230 UTC, and the spurs disappeared.  
(Guenter Lorenz-D, mwdx via wwdxc BC-DX TopNews Sept 30)

Hallo Wolfgang, kann man irgendwie den Sendertechniker in Albanien kontaktieren? Die 1458 kHz splatter seit ein paar Tagen die MW dicht, auf 1415 UT und besonders auf ca. 1500 kHz ist das extrem stark, wobei die Effekte von 1386 bis 1557 kHz nachzuweisen sind. Ich selbst wurde von Jurgen Bartels aus Norddeutschland "alarmiert", konnte den Effekt vorgestern und heute nachvollziehen.

(Guenter Lorenz-D, wwdxc BC-DX TopNews Oct 1)

Am 03.10.2010 um 00:15 schrieb Patrick Robic-AUT: 1458 kHz Fllake splatter z.Z. +/-100 kHz die Mittelwelle zu. ... und ich ueberlege was bei mir defekt ist, aber sowohl Perseus, LAN-SDR und die analogen konnten das. Dachte schon meine DX-One hat ein Problem. Danke Patrick!

ASCENSION ISL Ascension Economist Article and photos [4 attachments].  
Folks, pics just in from Ascension Isl and from a periodical an article re ASC.

Thought you might find the following article from the Economist about Ascension interesting.

<<http://www.economist.com/node/17082686>>

(Dave Porter-UK G4OYX, SW TXsite Sept 29)

Stories from the BBC Ascension Island shortwave relay station (now using wind turbines). Posted: 25 Sep 2010

The Economist, 21 Sept 2010, Correspondent's diary: "You can't get BBC television on Ascension. But you can get BBC electricity, and BBC water. The World Service transmitters at English Bay, at the northernmost tip of the island, can suck up megawatts of electricity as they broadcast news and more across Africa (and, for a short while each day, South America). As by far the largest consumer of electricity, it makes practical sense for the corporation's installation to be the island's main generator, too... .

The power for all this came, until recently, from a battery of seven V-12 marine engines, each of which delivers over a megawatt. Every 18 months or so a tanker moors off English Bay and delivers about 6000 tonnes of fuel to the tank farm there through a floating pipeline. This powers many of the island's cars, as well as the generators. But it is an expensive and troublesome undertaking, and recently the BBC invested in a big chunk of fuel-free generating capacity - five Enercon E-33 330 kilowatt wind turbines, spinning ceaselessly in the southeast trades, the whole system officially inugurated just a couple of weeks ago. ...

Here on the volcanic plains, already dotted with antenna arrays of various sorts serving not just the BBC but also a number of military communications systems, not to mention intelligence agencies, they are unquestionably magnificent, poised on their wave-splashed crags. But for all their shiny newness, sublime siting and green credentials, they are not the machines that inspire the most awe on a visit to the station.

Those are the two original Marconi transmitters that can between them suck up a megawatt or more of the power station's output. No one knows how old they are, but they were already in use at the BBC's then-main transmitter at Daventry before being shipped to the island in the mid 1960s. ...

The engineers look at them with pride and affection, as zookeepers might a dinosaur, aware that their day is mostly passed. Four of the original Marconis have already been replaced with modern transmitters from the Croatian company Riz that are far more efficient, and should in the long run prove more reliable, though whether they'll be still pushing out the megahertz in 50 years remains to be seen. ...

When the BBC was first here it built a village for its staff and their families. Now the operation no longer needs its separate receiver station, from which tapes would be ferried over for retransmission from English Bay, or the part time announcer it used to employ. The programmes come direct to English Bay by satellite downlink; shifts at the transmission centre have gone from nine people to two."  
<kimandrewelliott.com> via dxld Sept 29)

AUSTRALIA Volunteers help raise HIGH-GAIN antenna at Australia site.

Source: HCJB Global (written by Ralph Kurtenbach).

Pictures and text see on HCJB Australia Sept 2010 Newsletter.

<[http://www.hcjb.org.au/docs/138\\_Voice\\_and\\_Hands\\_Newsletter\\_HCJB\\_Australia\\_September\\_2010.pdf](http://www.hcjb.org.au/docs/138_Voice_and_Hands_Newsletter_HCJB_Australia_September_2010.pdf)>

(Alokesh Gupta-IND, dxld Sept 29)

A curtain rises in the outback of Australia, bringing to radio listeners across many nations an invitation to hear a message of one God, one Savior and one gospel-the gospel of Jesus Christ.

The curtain antennas used by shortwave radio broadcasters such as HCJB Global-Australia are less common than antennas that local broadcast outlets use to reach listeners or viewers.

Howard Jones, a volunteer at the mission's transmitter site, detailed the process in July of raising a curtain antenna between two 313-foot tall towers erected two years earlier at Kununurra, Western Australia.

In a recent newsletter he described how a team of volunteers followed the directives of HCJB Global engineer Steve Sutherland in assembling the front and rear elements of the antenna.

The front of the antenna consists of 16 dipoles\* which transmit the signal," Jones said. "The back reflecting screen, consisting of 83

horizontal wires suspended by nine vertical wires, acts like a mirror and reflects the transmitted signal forward."

"Forward," as Jones put it, means that Christian programming will be beamed to the Indian subcontinent and farther east, all the way to Japan. HCJB Global-Australia has been building an audience by adding language services since the station first began airing programs in 2003.

Five years later, in 2008, Sutherland and a volunteer staff began constructing the infrastructure (footings, guy wire anchors, etc.) for erecting high-gain antennas which carry a more concentrated signal.

After assembling the antenna's front and rear elements on the ground, the volunteers watched as a two-tractor-powered pulley arrangement hoisted the antenna up into place a section at a time.

HCJB Global-Australia Director Dale Stagg said afterwards that "words can barely describe the overwhelming sensation you get when standing underneath this structure which, when completed, will enable us to transmit a far stronger and more consistent signal than we do now."

The site has two HC100 shortwave transmitters built by staff at the mission's HCJB Global Technology Center in Indiana with two more similar units on the way. Also on the way is one of the crew's big challenges: seasonal rains that soften the ground of the antenna fields. The rains usually come each December and January.

Programs go out in 21 languages, airing a total of 105 hours per week. Languages include English, Mandarin, Japanese, Hindi, Urdu, Nepali, Chhattisgarhi, Indonesian (Bahasa), Kuruk, Bhojpuri, Tamil, Marathi, Marwari, Telegu, Gujarati, Malayalam, Malay (Bahasa), Rawang, Min Nan Chinese (Fujian), Eastern Panjabi and Hmar. The antenna arrays on the new site will increase the reach of these broadcasts.

\*A dipole is an antenna approximately one-half wavelength long, split at its electrical center for connection to a transmission line, its radiation pattern having a maximum at right angles to the antenna.  
(HCJB Global News Update for Week of Sept 20-24, 2010, via dxld)

Another version:

A REAL CURTAIN RAISER by Howard Jones.  
July heralded the installation of the long anticipated TCI Curtain Antenna between the two 96m tall towers erected in 2008.  
{formerly at Croatian Radio in Zagreb Deanovec Croatia site, but never assembeled before, wb.}

A great team of volunteers had arrived on site by plane, car and caravans from all over Australia to be part of the exciting task ahead. One young man even joined us from California! Under the direction of Stephen Sutherland, two groups were formed to assemble the front and rear elements of the antenna on the ground. When completed the antenna was raised a section at a time. It was exciting for the whole team to watch the antenna being pulled up in ideal weather conditions by two tractors.

The towers, between which the antenna is suspended, are 117m apart and the antenna's front and back elements hang from two cables 8m apart. These

cables are anchored at the base of each tower by concrete blocks weighing a total of 8 tonnes. by Howard Jones The front of the antenna consists of 16 Dipoles which transmit the signal. The back Reflecting Screen, which consists of 83 horizontal wires suspended by 9 vertical wires, acts like a mirror and reflects the transmitted signal forward.

A Slewing Switch enables the transmitted signal to be sent out in five different directions without turning the antenna, thus allowing the antenna to beam its signal in an arc from India all the way across to Japan.

As a Team we gave thanks to God for the completion of the antenna and the provision and safety of the volunteers who worked tirelessly to achieve a great result.

SHORTWAVE EXPANSION TAKING SHAPE, by Dale, CEO.  
HCJB Australia's new Broadcast Facility continues to progress. The front page of this newsletter features an article about our newly erected TCI 611 antenna, affectionately known as 'the Croatian antenna'.

I had the privilege of visiting our broadcast site at Kununurra in July and to watch the team complete the erection of this incredible piece of engineering. I have to say it's one of the highlights of my visit! Words can barely describe the overwhelming sensation you get when standing underneath this amazing structure which, when completed, will enable us to transmit a far stronger and more consistent signal than we do now.

It's called a 'high gain antenna' which means it will have a more concentrated signal. Can you imagine standing under an intricately woven 80 metre tall by 98 metre wide spider web (without the spiders!)? It has the versatility (via a slewing mechanism) to cover the whole continent of India right across to Japan. Incredible!

Update of Native Title negotiations.

As you know, we are waiting on the granting of permission for easements that will enable us to proceed with the High Tension Power Line to our new transmitter building.

Recently our Kununurra Site Manager, Peter Michalke, met with the traditional owners of the land and their legal representative to discuss this issue. These ladies later visited our site at Kununurra and spent time looking at our property and asking questions. The meeting went very well and they were pleased to share time with us. In the traditions of Aboriginal culture, we expect the ladies to discuss this more widely in their community before passing a decision to the MG Corporation.

This was a major step forward. Please give thanks that the meeting took place and pray for God's enabling for smooth passage through to the legal stages. Please continue to pray that this issue will be resolved quickly and favourably.

HC100 - Delivery in sight.

As many of you would know, we are also in the process of refurbishing an additional HC100 transmitter, which is currently at our Technology Centre in Elkhart, USA. We were excited to receive just this week photographs of some of its components undergoing some TLC. Word from our US colleagues indicates we will hopefully see this transmitter begin its journey to us

in March 2011. We are very thankful for our team in Elkhart that is overseeing the work on our new transmitter. Your support has enabled us to supply the funds necessary do this.

(Voice and Hands Australia [HCJB newsletter], Sept, via Alokesh Gupta-IND, dxld Sept 29)

Ausbau der HCJB Sender in Australien.

Die US-amerikanische Missionsgesellschaft HCJB Global verfolgt weiter den Plan, ihre Sendeanlagen in Australien auszubauen. Nach Angaben von HCJB befinden sich zwei Sender aus der Station Pifo in Ekuador, die ihren Betrieb im November 2009 eingestellt hat, derzeit zur Ueberholung in den USA und sollen anschliessend nach Australien verschifft werden. Dort betreibt HCJB seit Januar 2003 an einem Standort bei Kununurra eine provisorische Kurzwellenanlage.

Sie wurde im Mai 2006 um einen zweiten, aus Pifo hierher umgesetzten Sender ergaenzt. Bislang blieb es jedoch bei der provisorischen Anlage aus drei Antennen, die nur in eng begrenzten Frequenzbereichen um 11700 und 15400 kHz genutzt werden koennen, was die Einsatzmoeglichkeiten der Sendeanlage erheblich einschraenkt.

Daher wird sie durch eine neue, unweit des bisherigen Standorts entstehende Antennenanlage ersetzt. [15 47 54.45 S 128 41 07.88 E - leider zeigen bisher die Google Maps nicht eindeutig den neuen Standort, wahrscheinlich werden Sender und Vorhangantennen dann 2.7 km suedwestlich errichtet, wo eine Narbe von Bauarbeiten in der Landschaft erkennbar sind, wb.]

Zum Aufbau kommt dort eine Vorhangantenne, die HCJB gebraucht in Kroatien erwarb. Dort sollte sie auf der Sendestation Deanovec fuer Sendungen in Richtung Nordamerika errichtet werden.

Hierzu kam es jedoch nicht; Hrvatski Radio nutzt fuer seine Ueberseesendungen stattdessen die Kurzwellenanlagen der heutigen Media Broadcast in Deutschland, waehrend die bereits mit allem Zubehoer erworbene Vorhangantenne bis zum Verkauf an HCJB mehr als zehn Jahre lang eingelagert blieb. Darueber hinaus soll die neue Antennenanlage bei Kununurra zwei weitere Vorhangantennen sowie zwei logarithmisch-periodische Antennen umfassen.

Ebenfalls angekuendigt ist der Aufbau einer dreh- und schwenkbaren Antenne, die frueher in Pifo stand und dort bis zum 30.09.2008 auch fuer die Ausstrahlung deutschsprachiger Sendungen nach Europa verwendet wurde. Am neuen Standort werden auch die bisherigen Betriebssender der Behelfsanlage wieder aufgebaut. Von den dann insgesamt vier Sendern der HCJB-Bauart HC 100 sollen kuenftig drei staendig genutzt werden, waehrend der vierte Sender als Reserve fungiert.

Gegenwaertig laufen die HCJB-Sendungen von der provisorischen Sendeanlage bei Kununurra wie folgt, wobei die Ausstrahlungen fuer Suedasien zum Teil auch in Europa schwach hoerbar sind:

09.30-11.30 Uhr: 11750 kHz (fuer den pazifischen Raum)

12.30-16.30 Uhr: 15400 kHz (fuer Sued-/Suedostasien)

13.45-17.30 Uhr: 15340 kHz (fuer Sued-/Suedostasien)

00.00-02.30 Uhr: 15525 kHz (fuer Fernost)

02.00-05.00 Uhr: 15400 kHz (fuer Fernost)

AUSTRIA Correction. Item in BC-DX #981 was wrong.  
Transmissions to be carried during November 2010, not October, thanks  
Glenn for watchful.

Special transmission of Austrian Army Forces [Austrian Military Radio  
Society] with 100 kW via Moosbrunn Austria shortwave site.

7. Nov. 2010 1000-1030 UTC 6155 kHz Europe  
7. Nov. 2010 1600-1630 UTC 17620 kHz Northamerica East

Repeat on 14. Nov. 2010, same parameters.  
(wb, Sept 26)

There will be a special broadcast via the 100 kW transmitter at Moosbrunn  
to commemorate the 50th anniversary of the Austrian Military Radio Society  
formed for Austrian forces to use amateur radio to communicate during  
Peace Support Missions. The transmissions are on November 7 and 14 at  
1000-1030 UT to Europe on 6155 kHz and 1600-1630 UT on 17620 kHz to  
Eastern North America.

Amateur Radio station OE50ARMS will operate after the broadcast on 7120  
kHz for Europe, 14210 kHz for North America. QSLs via oe4rgc at amrs.at.  
The Austrian Military Radio Society website is <www.amrs.at>

(Mike Barraclough-UK, BrDXC-UK ng Oct 1)

Since, for me, most DXing observations are retrospective, these days, the  
special Austrian broadcast schedule to mark the formation of ARMS brings  
to mind another Austrian military radio operation.

After WWII, Austria didn't regain full independence until 1955. And five  
years later, it's young military began participating in world peacekeeping  
missions (in the Congo) in 1960. Later Austrian troops would serve on  
peace missions in Cyprus, the Middle East and many other places.

In this regard, I remember fondly OEY21, Schulungssender des  
Oesterreichischen Bundesheeres, the Austrian Army Radio which was  
headquartered in Vienna. At 1000 watts on 6255 kHz, they were REAL DX here  
in the central US. In early 1972 I was fortunate enough to catch them  
during one of their "occasional" Wednesday early morning programs, which,  
when used, was 0500-0700 UT. Normal regular sked then was Mon-Fri 1000-  
1200 and 1500-1900 UT. While this was called a "training transmitter" I  
always believed that a major purpose was to broadcast from home to their  
peacekeeping troops then in Cyprus.

Perhaps some of our European friends have additional background on this  
long gone but fascinating bit of DX, at least for me.

BRAZIL 5045 Radio Nacional Brasilia heard on this frequency on October 1, 2010 around 0400 UTC. Most probably relayed by Radio Cultura do Para - an unusual format here instead of the former regular musical program called "Cultura Madrugada". Frequent "Radio Nacional Brasilia" IDs.

(Karel Honzik-CZE, wwdxc BC-DX TopNews Oct 2)

12175 Super Radio Deus e Amor, at 2205-2230 UT on Oct 2, spur from 11765 kHz with Portuguese announcements, promos, ID at 2207 UT. Local religious music and preacher. Very distorted blob in SSB but a somewhat better signal in AM mode. Weaker spur on // 11355 kHz.

(Brian Alexander-PA-USA, DXplorer Oct 2)

5044.981 Radio Nacional da Amazonia Sept 25 0240 Excitable announcer talking in Portuguese, lots of mentions of Nacional, full ID as "Radio Nacional da Amazonia" at TOH and into news, then program "Madrugada Nacional"; didn't this used to be Radio Cultura do Para? (see next item)

// 11780 kHz.

5044.986 Radio Cultura Ondas Tropicais Sept 26 0403 MPB, ID at 0500 UT as Radio Cultura, program Madrugada Cultura; must have been airing a province-wide program when I heard them yesterday.

(Ralph Brandi-NJ-USA, DXplorer Sept 26)

CANADA [and non] 6070, CFRX still open carrier only, Sept 24 at 0113 UT check. When will they notice at HQ and get around to going out to the transmitter site to fix it?

6070, still open carrier only from CFRX, Sept 24 at 0607; and around 1245 UT mixing with North Korea audio.

6070, another day with no modulation from CFRX, Sept 27 at 1201 just carrier making fast SAH with VOK playing DPRK NA, 1203 re-opening final hour of Japanese. NK is not on 6071, as someone recently reported, but within SAH range of CFRX, one or both just a few Hz off 6070.

6070, still open carrier, obviously CFRX with the lost modulation still ignored, meanwhile burning up a kWh for over a week, as of 0531 UT Sept 29. It could be a very simple problem to fix. I wonder if Steve Canney of ODXA has noticed these reports, as in 2008 he was their liaison / QSL manager for CFRX and eventually helped to get them back on air in 2009 and modulating properly after long downtime. There was also a CFRX yg which I can no longer reach, deleted?

(Glenn Hauser-OK-USA, dxld Sept 29)

This is the latest. <<http://www.cfrx.webs.com/>>

CFRX Update: September 27, 2010.

It came to my attention via e-mailed reports that CFRX was transmitting a carrier but no audio. I alerted the Chief Engineer Ian Sharp about this and he said a technician would be at the site this week to check into it further. I was at the site today and called Ian on my cell phone to tell him what I saw. I followed his instructions over the phone to try and troubleshoot the audio issue but I couldn't get audio into the

transmitter. It would appear there's a problem with the audio processing unit and hopefully the technician coming in this week can resolve the issue. I just wanted to give an update on why you aren't hearing any programming on CFRX.

Steve Canney (via Harold Sellers-CAN, Sept 29, dxld)

I wasn't aware of that website; also history, photos, QSL info (gh, DXLD)

CFRX, 6070, noted with audio back on at 2320 check. Sept 29.

(Steve Lare-MI-USA, dxld Sept 29)

COLOMBIA The Colombian daily El Tiempo reported that among the 27 members of the FARC who were killed in an attack by the army on September 19 near the Ecuadorian border was Maria Victoria Hinojosa, alias Lucero Palmera who ran the FARC's clandestine radio station La Voz de la Resistencia. A journalist before she joined the rebel ranks, she broadcast under the name Mariposa Cano and was the girlfriend of a FARC leader who is currently in prison in the United States. She belonged to the 48th Front, which was responsible for killing eight policemen during a September 10 attack in the municipality of San Miguel, the newspaper said. (Marty Delfin-ESP, dxld Sept 24)

COSTA RICA Glenn, I just came across the 2008 thread about Radio Casino in Limon, Costa Rica (TIQ) [former occupant of 5954 gh]

I used to work for the same company as Jorge Pardo, and after I was terminated, Mr. Luis Grau hired me to rewire the recording studio console and the short wave transmitter.

That was back in 1984, and all three outlets (FM, MW and SW) were active and healthy from Cieneguita (Little swamp) which Sydney Walther used to call "SilverTown".

The fact that the transmitter locations were in the middle of a swamp, guaranteed a very effective ground plane for the MW antenna (base loaded + wave). The SW outlet had an inverted L.

Thanks for your site, and for the memories it brought back.

6085 Bayerischer Rundfunk Munich Ismaning closing 1st October.

German public broadcaster Bayerischer Rundfunk (Bavarian Radio) will end

its shortwave broadcasts on 1st October 2010. From 1949-2005, Bayerischer Rundfunk broadcast in analogue mode on 6085 kHz, and in 2005 this was changed to a DRM relay of the news channel B5 Aktuell. Bayerischer Rundfunk has now decided to cease shortwave broadcasting to save costs.

The decision was made taking to account that there is still a very small selection of DRM receivers, and the market has so far not developed satisfactorily. Reverting to analogue shortwave is not a practical alternative.

On 2nd May 2005, Bayerischer Rundfunk started broadcasting in DRM mode on its shortwave transmitter at Ismaning near Munich by converting its existing analogue shortwave transmitter to digital. The small financial outlay would be recovered from lower ongoing operating costs. B5 was broadcast at 06.00 to 00.05 local time. But a new DRM radio was required to receive the service.

Bayerischer Rundfunk was an early adopter of DRM, in the hope of assisting in its development. A number of other broadcasters have also made DRM transmissions, but the selection of suitable receivers has been limited to a small number of expensive devices, and only a small number have been sold.

Source: Bayerischer Rundfunk.  
(RNW Media Network, via BrDXC-UK Sept 30)

Bayerischer Rundfunk ENDS Shortwave Broadcasting.

ISMANING 6085 CLOSES ON THURSDAY Sept 30, the following news became informally known already during an open house day in July. Could it be that I missed to report it in English and so the following will be a surprise? Anyway:

Today Bayerischer Rundfunk issued a press release about the closure of the 6085 kHz transmitter, effective Oct 1st. It refers to cost-saving measures and further states that "this decision has also been taken in light of the very low numbers of digital shortwave receivers, both on the market and amongst listeners. Very few models are available, the market has not shown a satisfying development. (...)

Other broadcasters already transmit in the DRM standard, too. Nevertheless the choice of available receivers did not emerge from the situation of very few and expensive sets."

<<http://www.br-online.de/unternehmen/technik/kurzwelle-verbretung-radioempfang-ID1285240493191.xml>>

Postings in the German-language A-DX mailing list indicate that the DRM signal now includes a text message that advises of the imminent closure. (Kai Ludwig-D, dxld Sept 27)

Why can't programming that has been distributed digitally to the transmitter be transmitted in analog mode? There may be advantages to analog transmission.

BR's 6085 kHz facility is one of the last shortwave transmitters used for domestic broadcasting in Germany. While medium wave provided long distance reception at night, the 49 meter shortwave band allowed similar reception

during daylight. In the 1950s through 1970s, it was not uncommon for radios in Germany, especially in cars, to include the 49 meter shortwave band (and no other shortwave coverage).

(Kim Andrew Elliott, <kimandrewelliott.com> via dxld Sept 29)

Indeed, frequency 6085 is clear of DRM today October 1 at tune in 0930 UT. So which station will now be the first to "stake a claim" to it - hopefully not another DRMer. And when Junglister (LUX) goes off - I 'think' at 0800 UT - this area of the 49mb is now thankfully clear for listening. Bayerischer Rundfunk has been using 6085 kHz for more years than I can remember, and their music programmes were often enjoyed. A pity they decided to take the DRM option, and lose most of their listeners in the process.

(Noel R. Green-UK, wwdxc BC-DX TopNews Oct 1)

BR 6085 DRM kaputt. Da frage ich mich nebenbei: Hat die Kurzwelle 6085 kHz eigentlich irgendwas mit dem Versorgungsauftrag des BR zu tun?

(D. Kaehler)

Die Mittelwellen der Oeffentlich-Rechtlichen kann ich ja verstehen, die Kurzwelle 6190 kHz des Deutschlandradios ja sogar auch noch irgendwie.

Aber warum eine Landesrundfunkanstalt eine Kurzwelle brauchen koennte, erschliesst sich mir ja nicht.

Urspruenglich (d.h. vor 1989) wurde meiner Erinnerung nach die Notwendigkeit der Ausstrahlung von ARD-Hoerfunk-Programmen ueber Kurzwelle damit begruetet, auch die DDR umfassend abdecken zu koennen (insbesondere galt das z. B. fuer den RIAS Berlin).

Ansonsten war im uebrigen Europa die Ausstrahlung von Inlands-Programmen ueber Kurzwelle eher nicht ueblich; von daher war es schon erstaunlich, wieviele ARD-Sender mal auf Kurzwelle vertreten waren.

(Wolfgang Thiele-D, A-DX Sept 27)

European domestic programs on shortwave in past decades.

Da kommen mir aber auch einige in den Sinn, auch wenn sie in den sieben Jahrzehnten teilweise umorganisiert wurden.

(wb, wwdxc BC-DX TopNews Sept 29)

In anderen Teilen der Welt wuerde es freuen. Die Meldung 6085 wurde doch schon im Juli zum Tag der offenen Tuer / Roehrenradiotreff Ismaning berichtet. Deshalb konnte ich auch David Crystal im Kibbuz Israel darauf vorbereiten, dass sein

"OriginalDavidCrystal: 'DRM Stoersender'"

im Oktober aufgibt. Polskie Radio der Praesidenten Brueder sendete B-09 dort auch auf 6085 - RMP 500 kW - in Hebrew Richtung ISRAEL / Palestine, leider waren aber fuer David die 3 Kanaele 6080-6085-6090 damit AM tot.

B-09 6085 kHz 1900-1930 UT 38E,39 RMP 500 110 Hebrew G PRW VTC

Diesen Winter weicht man BR Ismaning aus, und sendet stattdessen auf 7265 kHz. Werde morgen gleich mal an David eine Snail Mail absetzen. Neben Galei Zahal, PRW und IRIB Tehran gibt es noch weitere Hebrew Kurzwellen ? Frueher sendete doch auch Radio Moskau darin ... oder wars der Zuendler P&P Moskau ?

Natuerlich war Ismaning (gut gewartet und superb steuerbare Antenne) ein Muss fuer den Urlauber oder Rentner mit dem Henkelmann in Suedeuropa bis Kanaren Straende etc. - da kommt aber auch FJS ins Spiel so um die 1975-1985, als er und sein Spezi aus Rosenheim oft in Westafrika (Viehhandel und Brauerei in Togo ? - Martin kennt bestimmt die Deutsch-Westafrika Biermarke? ) in Geschaeften weilten, und die 6085 und moeglichst auch MW 1602 kHz hoeren wollten. :-)

Als NWDR Norden-Osterloog und Radio Frankfurt aus F-Heiligenstock noch das 75 und 49 mb belegt, hatte man die Deutschen bei der Mittelwellenfrequenzkonferenz 1948 solide geknebelt, deshalb war man frequenz-erfinderisch beim ARD Sender und dies wirkte bis heute nach.  
(wb, wwdxc BC-DX TopNews Sept 28)

Demolition of Juelich Transmitter Site. Juelich demolition video.  
As I wrote earlier, the Juelich Transmittersite is in the process of demolition. On Sept 10 they started to take down the towers. I've put two pictures on the following links:  
<<http://www.dumpyourphoto.com/photo/view/41785/oFG>>  
<<http://www.dumpyourphoto.com/photo/view/42260/e5n>>  
(Jan Oosterveen-HOL, shortwavesites yg Sept 25)

Last weekend the local/regional radio station Radio Ruhr carried a report about Juelich. The report is 2'10" and is in German Language. It can be downloaded and listened to here:  
<<http://www.mediafire.com/?8b69w995k29wwks>>  
(Jan Oosterveen-HOL, shortwavesites yg Sept 27)

Perhaps this is of interest for WORLD OF RADIO. On Sept 10, Metallverwertungs Gesellschaft (MVG) started to take down 31 of the 34 antenna towers of the Juelich transmitter site. Earlier this year, all the curtains, earth net and coaxial feeders including the slew switches had already been taken away.

The last owner Christian Vision (CVC) who sold the site has handed over the premises in February / March to a consortium that plans to build a

holiday park and hotel facilities there. The demolition should be completed by the end of October. Three towers remain as well as one transmitter for a radio museum on the premises. Enclosed you will find two pictures of the work going on [same as linked above].

On September 29 WDR television broadcast a report which included footage of the demolition and old b/w footage of the opening in the 50's.

The report can be seen on this link:

<[http://www.wdr.de/mediathek/html/regional/rueckschau/2010/09/29/lokalzeit\\_aachen.xml?noscript=true&offset=569&autoPlay=true&](http://www.wdr.de/mediathek/html/regional/rueckschau/2010/09/29/lokalzeit_aachen.xml?noscript=true&offset=569&autoPlay=true&)>

Just copy the link in your browser and enjoy!

Kind regards/Met vriendelijke groet,  
(Jan Oosterveen-HOL, dxld Sept 30)

In der Aachener Zeitung gibt es einen Bericht ueber Juelich. Leider nicht erfreulich - es ist der Stand von letzter Woche

<[http://www.az-web.de/lokales/juelich-detail-az/1413570?\\_link=&skip=10&\\_g=Sendemasten-auf-Merscher-Hoehe-werden-verschrottet.html](http://www.az-web.de/lokales/juelich-detail-az/1413570?_link=&skip=10&_g=Sendemasten-auf-Merscher-Hoehe-werden-verschrottet.html)> ---

5980 Hamburger Lokalradio (HLR) will run a special, six-hour shortwave show on Sunday, October 3, from 06 to 12 UT, on 5980 kHz (Kall transmitter site) with a power of 1 kW. The station invites listeners to tune in and to send in reception reports. All correct reports will be answered with a special QSL card that will only be issued for that day.

Address: Hamburger Lokalradio, Kulturzentrum Lola, Lohbruegger Landstrasse 8, 21031 Hamburg, Germany.

E-Mail: <[redaktion @ hamburger-lokalradio.de](mailto:redaktion@hamburger-lokalradio.de)>

Return postage is appreciated.

The special show will focus on German Unification Day. Twenty years ago, on October 3, 1990, the German Democratic Republic ceased to exist. Five new federal states plus the eastern part of Berlin joined the Federal Republic of Germany. The HLR team will air a musical selection of bands and singers from the GDR; a sound collage (using audio material from various periods of German history); an interview with singer and guitarist Dieter Hertrampf, a.k.a. Quaster, who has been with one of the most popular GDR bands, the Puhdys; plus a look at several novels and non-fiction books that deal with the topic of German unification.

Hamburger Lokalradio has daily low-power broadcasts on 5980 kHz between 09-10 UT (10-11 UT winters). In addition, there is a show aired every first Sunday between 09-10 UT (10-11 UT winters) on 6045 kHz, with a power of 100 kW.

(Thomas Voelkner, Berlin, Sept 28, dxld)

6105 Trans World Radio Nauen site, on Sept 22 at 0740 UT. Amazing Grace on a wind instrument, talk in English about the Word of God, addresses being given, IS, then off.

(Ralph Brandi-NJ-USA, DXplorer Sept 26)

[to Sudan] New program "VOA Sudan in Focus" of VOA started on Sep. 23 at 1630-1700 UT on 9675NAU, 12015WER and 13825WER kHz. It was a Sep. 20 start plan, but was able to receive only loop ID of RFE and RL for Sep. 20-22.

<<http://www.voanews.com/english/news/special-reports/world-and-regional/Sudan-Elections-in-Focus-86961342.html>>

de Hiroshi

(Sei-ichi Hasegawa-JPN, dxld Sept 23)

Unfortunately I was out, and missed that program this afternoon. But Herbert in Eastern Austria noted this log today.

12015WER suffers by V of Korea Pyongyang in German co-channel, 9675NAU suffers by Tiganeshti Romania powerhouse next door 9680 kHz.  
(wb, dxld Sept 24)

Re: "VOA Sudan in Focus" - Zu Sendebeginn am 24.09. "RFE"-ID.  
13825WER Manchmal auftauchender Heulton in LSB, Fading, sonst ungestoert, AM mit O=3/4, langsam besser werdend/bleibend.

12015WER VoKorea dominiert mit Deutsch-Sendung. Dann Russland auf 12010 (mit defektem Sender?), VoA leise im Hintergrund. Anfangs O=1/2, mit Russland O=0.

9675NAU Anfangs mit O=3 in LSB [keine Chance in AM]. Schnell schlechter werdend und nur mehr zwischen O=2 und unhoerbar. Zu grosser Einfluss von RRI Tiganesti auf 9680 kHz in French.

Um 1659 UT ohne Absage s/off.  
(Herbert Meixner-AUT, wwdxc BC-DX TopNews Sept 24)

This SUEN Sudan South Program is only Mon-Fri. Friday 24 ZIP RAR Archive of RMS shows the best reception at Harrare and Johannesburg.

12015 kHz is USELESS due of KOREA D.P.R. Pyongyang program in German at same time, co-channel on most monitoring posts in Africa.

Sorry, couldn't open the RA real audio type file from Madagascar anymore.  
Was an ancient audio format, started some 16 years ago ...  
(wb, dxld Sept 29)

Zum Tag der Deutschen Einheit am 3. Oktober 2010 strahlt das Hamburger Lokalradio auf 5980 kHz 06.00-12.00 (MESZ 08.00) Uhr ein erweitertes Sonderprogramm aus. Programmschwerpunkte sind eine Hoercollage in Wort und Musik ueber die Geschichte der DDR von ihrer Gruendung bis zur Wiedervereinigung 1989/1990.

Ein Interview mit Quaster von den Puhdys darf nicht fehlen. Thomas Voelkner stellt in seiner Literatursendung "Schwarz auf weiss" folgende Buecher vor: Andreas H. Apelt: Schwarzer Herbst, Hans-Juergen Rusch: Gegenwende (Krimi), Christoph Nix: Rabenjagd, Andreas Platthaus: Freispiel, Christian Fuehrer: Und wir sind dabei gewesen, Oliver G. Wachlin: Wunderland (Krimi, Autoreninterview).

Empfangsberichte werden mit einer Sonder-QSL-Karte gegen Rueckporto bestaetigt.

Im Normalfall sendet das wortgepraegte Kulturprogramm taeglich 09.00-10.00 Uhr auf Kurzwelle. Das Hamburger Lokalradio wurde von der Medienanstalt MA HSH als bundesweite Kultursparten-Hoerfunkprogramm zugelassen. Im Herbst

2009 wurde ihm von der Bundesnetzagentur eine eigene Kurzwellenfrequenz fuer die europaweite Ausstrahlung zugewiesen.

Das Kurzwellenprogramm wird ueber das Internet an den Partner Radio 700 in Kall bei Euskirchen ueberspielt und mittels eines 1-kW-Kurzwellensenders SK1 von Rohde & Schwarz und einer Telefunken Breitband-Dipolantenne (A189) auf 5980 kHz ausgestrahlt. Mehr Infos zur Kurzwellenausstrahlung gibt es im Internet bei

<[www.hamburger-lokalradio.de](http://www.hamburger-lokalradio.de)>

(Kouji Hashimoto-JPN, JPNpremium Oct 1) in B-10 on 5905 kHz.

Deutsche Welle Radio presents a special show on 20 years German reunification.

How well has Germany come together since reunification? The end of the Cold War dramatically brought East and West Germany together as one country. Twenty years after reunification, Deutsche Welle explores just how united Europe's biggest country really is.

Twenty years ago, on October 3, 1990, a peaceful revolution culminated in the reunification of East and West Germany.

How much are the old divisions still visible in politics, the economy and society? We look at the winners and losers of reunification, taking you to the richest community in eastern Germany, as well as to "Little Berlin," a formerly divided village. We introduce you to couples bridging the East-West divide and to former East German diplomats. And we explore what young Germans know about their country's divided past.

A 55-minute Newslink radio special to mark this special anniversary will be broadcast on October 3 at 1605-1700 UTC. Listen in!

GUATEMALA 4055, Radio Verdad, 0255-0347, Sep 21. Thanks to Hauser tip  
noted with soft instrumental music, religious vocals and Spanish language  
talks by a man announcer. No ID noted. Poor for the most part with fair  
peaks with signal improving around 0310. If only 50 watts, not a bad  
signal considering. Nice to have back on the air.  
(Rich D'Angelo-PA-USA, NASWA Flashsheet via dxld)

I was unavoidably awake before 1100 UT Sept 23, so made the best of it by  
monitoring, starting with 4055 for R. Verdad, nominal sign-on 1100, but  
nothing heard at 1059-1104 and later chex. However, at 1124 it was on with  
prayer(?) or at least preaching in Spanish; 1127 music. BFO needed, but it  
was hard to tune exactly so the music sounded right, even by first zeroing  
in on Nikkei 6055 kHz.

Just about no carrier from TGAV at this time, and then like Bob Wilkner,  
I concluded at 1150 there was an FM element to the transmission, as during  
pauses there would be sort of a carrier, unstable. Still audible but  
almost gone by 1159.

I never heard the choo-choo SFX as used to air around 1130, despite "El  
Tren del Evangelio" still on the schedule for 1125-1200 Mon-Sat. Meanwhile  
I was also monitoring the harmonic from COSTA RICA, and the 90m from  
HONDURAS, q.v.

UT Sept 24 I checked for R. Verdad earlier than before, at 0200 UT. Music  
audible around 4055, and still at 0235, but lacking a reference carrier,  
it's very difficult to get it to 'sound right' with the BFO on, and once  
zeroed on Spain 6055, TGAV audio still is not clear, so it's slightly off,  
I think to the hi side, and mushy sounding with some FM component rather  
than pure SSB.

Dr Madrid confirms they are still running only 50 watts with the backup  
transmitter, but "we'll try to increase it a little bit tomorrow", and  
assures us they will be back on 4052.5 kHz when the big transmitter is  
reactivated, probably around the end of October.  
(Glenn Hauser-OK-USA, dxld Sept 29)

4055-usb, R. Verdad, 0235-0315, 9/24/10. Poor but increasing to fair with  
wide variety of music - everything from marches and pop songs to gospel  
tunes; seemed like an endless loop since I heard several songs more than

once; no IDs or any spoken words; USB only and with considerable distortion at that.

(Jim Ronda-OK-USA, NASWA Flashsheet via dxld)

GUINEA 4899.97, Familia FM, 2335-0002\*, Sept 24-25, French pops / ballads. Afro-pop music. French talk. Weak. Very poor with CODAR QRM. (Brian Alexander-PA-USA, dxld Sept 29)

PAKISTAN Some advice if possible Tonight was a good night on 19 meters. At 0130, during a bandscan, I came upon unID talk on 15490; at 0137 there was a brief unaccompanied song; then back to a long talk by a man; this was in a calm, conversational tone; at 0147 UT into Koran chanting; much

harder to copy by 0154; still audible at 0200 but no TS; nearly gone by 0202; I think but am not sure that the carrier was off at 0215 UT.

Aoki and the other lists indicate that this is R. Pakistan in Urdu with no other possible stations on this frequency at this time. I've seen no recent reports of this. If this was R. Pakistan it was the first time I've heard that station since I was in England some years ago.

[later] This was an exceptionally good evening on 19 meters with CRI-Beijing 15125; RFA-Tinian 15225; R. Australia-Shepparton 15240; BBC-Thailand 15360; VOR-Petropavlovsk 15425 all in the same 0100-0230 time period. I logged Pakistan in English fairly often while in the UK but this is a first time log here in OK.

(Jim Ronda-OK-USA, dxld Sept 23)

RUSSIA [Kaliningrad enclave] 7054 OTHR, abt 7054 kHz (Center) abt 4 kHz wide, 38 pps. Any more informations available?

(Peter-SUI - HB9CET, intruder alert Sept 28)

German Telecoms. authorities have pin-pointed the intruder to Kaliningrad, RUS.

The system is 38.47 pulses per second. Shame on RUS! Pse keep on watching the QRG and report to your national telecoms. authorities. Tnx! Regards,  
(Uli Bihlmayer DJ9KR, IARU-MonSys Region 1, intruder alert Sept 28)

Was strong also here, I measured 37.5 pps, abt 5 kHz wide.

(Pekka Kemppinen-FIN OH2BLU, intruder alert Sept 29)

RUSSIA The VOR Pashto/Dari service on 15510 via "Krasnodar" at 12-14 UT can provide some fine exotic music, if not from an exotic place; signal especially good Sept 23 at 1352 UT, then switching to the theme from "Love Story" at 1357, which I think I have heard them playing at same time before, rather off-topic. 1358 Pashto announcement spelling out website with English letters, VOR IS, and at 1359 UT overlapping with DW about to overtake the channel for Russian via Rampisham. I also heard a few words of Chinese, could not tell from which station, in a switching error! VOR carrier stayed on a few sec past 1400 UT, with its constant hum, then DW in the clear.

(Glenn Hauser-OK-USA, dxld Sept 29)

BR Munich Ismaning Germany freed the 6085 kHz channel.  
Radio Krasnoyarsk 6085 kHz at 1631 UTC Oct 1. Radio Krasnoyarsk (RUS) auf  
6085 kHz um 1631 UTC mit Jazz und ID "Vefiri Krasnoyarsk". 24332  
(Patrick Robic-AUT, A-DX Oct 1)

6085 - I also heard this programme of Jazz music at around 1645 UT on Oct. 1st, and I could hear announcements in the Russian language. But there was dreadful sideband splatter from DW via WOF on 6075 kHz spreading 20+ kHz on either side {DWL is NOT so strong here in Germany, I could always separate 6075UK and 6080BLR, wb} which made it almost impossible to hear the signal on 6085 kHz at times. The splatter decreased some after 1700 UT, but by then, the Russian had faded down. I tried this morning early but there were no signals audible on 6085 kHz - maybe later in the year?

Due to the splatter I couldn't ID what was using 6080 kHz, but there was some bouncy Russian style pop music there which might have been from Minsk, and another station mixing. On 6090 kHz the BBC was dominant in Farsi via Nakhon Sawan with what I assume ETH co-channel with typical HoA music.

LUX 6095 kHz is also off at at 1630 UT but the channel was clear. I think there was something on 6100 kHz, but weak, and virtually covered in splash from listed IBB via WER on 6105 kHz which became weaker after 1700 UT when LAM took over. I note that Belorussian is listed after 1700 UT in the latest RL sched that I have, but nothing in Russian or BLR (which it was) before 1700 UT. So a further check needs to be made on this one.

Anyway, it's nice to be able to actually hear AM stations on this part of the band.

(Noel R. Green-UK to wb, wwdxc BC-DX TopNews Oct 2)

TX sites in Krasnodar, Russia.

In diesen Mails zur YFR 12065 Armavir Tblisskaya Aussendung ist einiges korrekt wiedergegeben, anderes vollkommen falsch interpretiert worden. Der einzig richtige Kurzwellenstandort wird unten genannt.

Hinweise auf Sender-Standorte sollten hinkuenftig mehr Korrektheit erlangen, man sollte doch vorher in Google Earth, oder Google Maps, Bing Maps, Fallingrain, Wikimapia, FlashEarth, Geoportail, Terraserver, Kosmosnimki, maps.yandex.ru, die entsprechenden Standorte und die Art der Antenneninstallationen sich zumindest mal ansehen. Nur mit dem Zeigefinger in eine Tabelle einsteigen, ist oft nicht hilfreich.

Der KW-Senderstandort liegt real beim Dorf Tblisskaya, die naechst groessere Stadt ist Armavir. Beide liegen im Oblast-Kray[Kreis] Krasnodar.

Die Station Krasnodar-Armavir ist nach meinen Infos hier:

<<http://maps.google.de/maps?t=h&hl=de&ie=UTF8&ll=45.473735,40.106964&spn=0.090281,0.102825&z=13>>

Distanz Armavir-Tblisskaya 97 km u. Krasnodar-Tblisskaya 98 km.

<<http://www.fallingrain.com/world/RS/38/Armavir.html>>

<<http://www.fallingrain.com/world/RS/38/Krasnodar.html>>

<<http://www.fallingrain.com/world/RS/38/index.html>>

Bei der ITU Genf wurde vom sowjetischen Netzbetreiber schon in Sowjetzeiten, danach bei HFCC und WRTH auch, wurde Armavir fuer den Kurzwellen-Standort [Tblisskaya] registriert.

Dagegen verwendeten US-IBB, BBC-Merlin/VT-group, DWL, NHK, TWR, YFR, FEBA u.a. abweichend davon den Begriff Krasnodar [fuer Tblisskaya] in ihren

internen Sendep länen in den vergangenen 2 Jahrzehnten. Daraus r uehren auch die unterschiedlichen Ortsangaben in den diversen Auflistungen.

Technisch:

45.40269870584852 N 38.15852165222168 E

Distanz bis Tblisskaya circa 152 km.

Der Standort heisst RJH63 RDL / RSDN-20 Krasnodar Krasnoarmeyskaya auf VLF 25 kHz Laengstwelle.

Es ist ein Laengstwellensender der russischen Marine mit 7 Masten.

Entweder Alpha Navigation oder Beta Zeitzeichensystem.

<[http://de.wikibooks.org/wiki/Laengstwellenempfang\\_mit\\_dem\\_PC:\\_Galerie\\_von\\_VLF-Signalen](http://de.wikibooks.org/wiki/Laengstwellenempfang_mit_dem_PC:_Galerie_von_VLF-Signalen)>

Google ist voll von Informationen dieser Laengstwellensender.

Auch die Amateurfunker koennen gut stinken:

RUS Amateur Radio RN6BN 144 MHz

45 06 57.01 N 38 56 02.01 E

<<http://commondatastorage.googleapis.com/static.panoramio.com/photos/original/30543613.jpg>>

Der lokale MW Senderstandort Krasnodar ist mir nicht bekannt:

RUS Krasnodar 747 kHz 30 kW 170m mast, 927 kHz 20 kW

vielleicht mit am TV Mast-Standort angesiedelt?

Bei 20-30 kW durchaus technisch machbar; machten SWR und Telekom auch.

(Harald Kuhl-D, MWCircle yg Sept 28 via dxld)

Hi all, The date of the closure: 5 December 2010 at 2359 Local time:

<<http://www.2222.ch>>

(Franck F4LKC Baste-F, ibid.)

I have never been any good with languages, so I opened the <[www.2222.ch](http://www.2222.ch)> via AltaVista/ Babel Fish translation to back up what I could get the gist of.

The translation does not read well, but the website shows suggested ways

to keep listening via other services. Looks like they even ask which services listeners would prefer out of 11 options - none being AM.

Sorry, but Broadcasting this is not. Broadcasting is where you can listen from anywhere within signal range, and farther on MW at night, with a simple cheap to operate portable radio, without being tied to landlines or expensive CMR susceptible satellite driven equipment!

The digital age is nothing but coercion to buy unnecessarily complex equipment with all of the the electrosmog it now surrounds us with. It is illogical to replace what has been entirely satisfactory from before the time the people who are forcing through these changes were born, also with the expectation that listeners will tolerate inferior digital audio equipment which is already ruining AM and TV sound !

Sadly, imagination has never extended far enough to realise that closing down the present system will be like the closing down Broadcasting itself to so many listeners. It is the radio industry who should be making the effort, not them expecting listeners to purchase special and expensive equipment in order to listen to them with reduced long term reliability and portability. How arrogant and totally lacking of common sense is this? (Graham Maynard-UK, ibid. in dxld Sept 29)

TAIWAN/CHINA Gruss zum RMRC DX Camp nach Langenselbold.  
7105 kHz SoH Taiwan, heute hat es gegenueber anderen Weltgegenden sehr starke Signale aus China, zwischen 22 und 23 UT. Auf 7105 kHz ist auch Sound of Hope in Chinesisch unter dem CNR Jammer zu hoeren.

Letzterer stoert diverse US Tibetisch und BBC Mandarin Programme um diese chines. Morgenzeit um 2240 UT.

CNR Jamming: auf 5865, 7105, 7205, 7230, 7240, 7325 (2 tx echo, CNR regulaer + Jamming gegen BBC Mandarin), 7405 (2 tx echo), 7505, 9455, 9510, 9580 gegen BBC Mandarin via Korea, 9845, 9880 - eine spezielle sehr verbrummte Jammingeinheit, 9890, 11635, 11980 kHz.  
(wb, wwdxc BC-DX TopNews Sept 30)

9000 The Sound of Hope from Taiwan is currently making it into Germany, 30 Sep 2010, without communist jammers, on 9000 kHz (from about 2140 UTC). Checked on the Perseus at 2205 UT and found the // on 7105 kHz - with a strong signal but covered by CNR1 jammer // 4800 kHz. Possibly also on 9635 kHz but a mess of many signals there, so I'm not sure yet.

Greetings from the RMRC DX Camp Langenselbold!  
(Eike Bierwirth-D, hcdx Oct 1)

TAJIKISTAN 15582 V of Tibet. {Aoki:}  
15582\*VOICE OF TIBET 1407-1430 Tibetan 100 131 Dushanbe-Yangiyul TJK VOTi

Voice of Tibet noted Sept 24th with S=8-9 here in Germany, no China mainland jamming noted so far.

15568 odd at 1235-1307{Aoki} UT slot, Sept 25, not as strong as usual, only S=7 this afternoon. Also accompanied China mainland Firedrake music jamming on even 15570 kHz rather weak today at 1247 UT, Sept 25.  
(wb, wwdxc BC-DX TopNews Sept 24/25)

TAJKISTAN 4765fundamental / 14295hx. Lieber Ulrich,  
Seit Jahren hab ich mit grosser Interesse Deine Spalten in Funkschau  
gelesen. Mit Bewunderung hab ich auch die Information davon gelernt und  
die Resultaten besichtigt!

Ich bin ein Mitglied von einer Bruderschaft namens Rotarians of Amateur  
Radio. Wir haben unsere Treffen auf 14293 kHz jeden Sonntag um 0630z und  
um 1130z. Ausserdem habe ich meine QSO's auf der Frequenz mit meine  
finnischen Freunde am Donnerstags.

Seit Jahren gibt es ein Traeger auf 14295 kHz (SSB zero beat) der ist in  
Finnland, England und der Schweiz hoerbar und zwar bisweilen mit eine  
Staerke von S=9. Zeitweise ist der mit ein Taktpulse von etwa 1sec  
versehen. Er scheint mir von irgenwo in Zentral-Europa zu stammen.

Waere es moeglich ihn zu finden und zu erloeschen? Wie gesagt, wir haben  
Teilnehmer von allen Teilen der Welt (VK, ZL, W, VE, G und andere) und  
bisweilen ist die Kommunikation fast unmoeglich. Ich/wir waeren sehr  
dankbar wenn etwas dagegen gemacht werden koennte.

Mein Station ist Yaesu 1000 Mk5 mit Zweielement Beam. Wenn Sie etwas mehr  
von uns lernen moegen, bitte <[www.ifroar.org](http://www.ifroar.org)> schauen.  
Mit freundlichen Gruessen und Bewunderung  
Pertti Kause President von ROAR EA7GSU/OH1SH QTH in Andalusien, Spanien.  
(Pertti Kause-FIN/ESP, Badnwatch Sept 26)

Lieber Pertti, danke fuer den Bericht. Als ich "Taktpulse" las, war mir  
gleich bewusst, dass es sich um Radio Tajikistan aus TJK handelt. Der  
Sender sendet auf der Grundfrequenz 4765 kHz. Was man hoert, ist die 3.  
Harmonische. Und der Traeger dieses Signals zeigt haeufig ein "Pumpen".  
Wenn man genau hinhoert, dann hoert man auch die (schwache) Modulation des  
Senders und findet diese // auf 4765 kHz.

Die Bandwacht des DARC hat schon lange die Bundesnetzagentur (deutsche  
Telecoms.) informiert, und diese hat eine Internationale Beschwerde nach  
TJK losgeschickt. Leider ohne Antwort. Der Sender ist auf 14295 kHz  
taeglich zu hoeren; erst vor 5 Minuten habe ich ihn dort mit S7 gehoert.  
(Uli Bihlmayer DJ9KR, IARU-MonSys Region 1, Sept 28)

USA Book Review - "Cold War Radio - The Dangerous History of American  
Broadcasting in Europe 1950-1989" by Richard H Cummings.

Richard was director of security at Radio Free Europe/Radio Liberty for  
15 turbulent years [1980-1995], covering the period when the Berlin Wall  
fell and Eastern Europeans again connected with their fellow Europeans.

A review is here <<http://www.radioheritage.net/Story184.asp>>  
(via Mike Terry-UK, dxld Sept 29)

Bis zum Sendestart der eigenen Kurzwellenstation in Madagaskar, die auch  
fuer Sendungen nach Lateinamerika eingesetzt werden soll, will World  
Christian Broadcasting Sendezeit bei WRMI Radio Miami International  
mieten. In einem Spendenaufruf sucht die mit den Churches of Christ

verbundene Radiomission Sponsoren fuer woechentlich 30 oder 60 Minuten bzw. eben 120 USD fuer die aktuell geplanten vier Halbstundenprogramme in einem Monat. Nach eigenen Angaben hat WRMI Miami in der Karibik Hunderte von auf 9955 kHz voreingestellten Radioempfaengern verteilt.  
(World Christian Broadcasting Website 21.8.2010 dxld, via ntt Sept 28)

USA 3255 WWCR again here instead of 3215, Sept 25 at 0414 check and this time with modulation, some preacher, presumably 3215 scheduled Fulcher, letting us overhear his prayer for a president that would appoint anti-RoeWade, anti-gay, etc., SCOTUS justices.

It seems that WWCR plans to use 3255 kHz in B-10 between 22 and 02 UT, give or take an hour depending on DST, so this may be a trial run, during only one different hour?  
(Glenn Hauser-OK-USA, dxld)

WWCR: Maybe an antenna test for B-10 season, when 3255 kHz is used at 22-01 / 23-02 UT slot instead.  
(wb, wwdxc BC-DX TopNews Sept 25)

I noticed that WWCR has announced on their web page about 3255 kHz test. WWCR is testing the frequency 3.255 MHz on Transmitter #1. From 2-8 October, WWCR will broadcast on 3.255 MHz INSTEAD of 3.215 MHz from 0100-0900 UTC.  
(Tom Nyberg-IA-USA, dxld Oct 1)

15419.760 WBCQ in USB mit Traeger ... so schoen melodisch, dass ich erst an die Station "Holy Q'ran" dachte ... SIO 454.  
(Nils Schiffhauer DK8OK, Excalibur& SDR-IP/GPS& Perseus, Oct 1)

VANUATU I haven't done much listening lately, but one thing I have noticed is that Vanuatu is missing from 5055 kHz, at least in our local evenings. I haven't checked in the mornings, but I suspect 5055 kHz isn't there then either. 3945 kHz continues as normal.  
(William Hague-AUS, NWDXC Oct 1)

#####

Kontestbeginn heute - Oct 1 - um 1700 UTC auf 9955 kHz.

Liebe Mitglieder und Freunde des RTI Hoererklubs Ottenau, liebe Hobbyfreunde,

gerne sende ich Euch eine Information ueber den jetzigen Diplomkontest des RTI Hoererklubs Ottenau mit Radio Taiwan International und Radio Bulgarien zu, der heute um 1700 UTC mit der ersten von 7 Direktsendungen auf 9955 kHz eroeffnet wird.

Der RTI Hoererklub Ottenau fuehrt aus Anlass des 24. Jahrestages der deutschsprachigen Sendungen aus Taiwan im Zeitraum vom 1. bis 19. Oktober eine neue Diplomaktion in Zusammenarbeit mit Radio Taiwan International und Radio Bulgarien durch.

Einzusenden sind bis zu 2 Empfangsberichte ueber die Briefkastensendungen von RTI am 1. und 8. Oktober um 1900 oder 2100 UTC auf den Frequenzen 6185 oder 3965 kHz, ausserdem bis zu 2 Empfangsberichte ueber die Direktsendung an den Sendetagen 1,2,3,8,9,10 oder 11. Oktober um 1700 UTC auf 9955 kHz, sowie 1 bis 2 Empfangsberichte ueber die Hoererkontaktsendungen von Radio Bulgarien, hier empfehlen wir die Sendungen Postecke, DX, Gruss- und Wunschkonzert oder Briefkasten.

Einzusenden sind die Empfangsberichte per e-mail an die Redaktionen in Taipeh und Sofia zu Erhalt der dortigen QSL-Karte, sowie zusaetzlich an den RTI Hoererklubsekretaer Christoph Preutenborbeck zum kostenlosen Erhalt des von Hoererklubmitglied Rudi Koehler entworfenen Diploms in der E-mailfassung.

Fuer Hoerer ohne Emailgelegenheit bietet unser Hoererklubsekretaer auch an, bei Beilage von Rueckporto, innerhalb Deutschlands 2 Euro und innerhalb Europa 3 Euro, in gueltigen Briefmarken, das Diplom auszudrucken und auf dem Postwege an die Teilnehmer zu senden. Die Berichte an Christoph moegen bitte in dunkler, kraeftiger Schrift abgefasst werden, damit sie nach dem einscannen bei den beiden Redaktionen auch noch lesbar sind, sonst koennen von dort keine QSL-Karten und eventuelle Sonderbeilagen verschickt werden.

Es werden wie beim letzten Kontest nur die auf dem Postwege eintreffenden Berichte weitergeleitet, E-mails bitte direkt an Radio Bulgarien bzw RTI einsenden, Kopie an Christoph bitte nicht vergessen. Die Postadresse von unserem Klubsekretar lautet:

OM Christoph Preutenborbeck, Strasserhof 20  
D-51519 Odenthal, Germany  
e-mail <preuti @ aol.com>  
Viel Erfolg wuenscht allen Teilnehmern Bernd Seiser.  
(Bernd Seiser-D, Oct 1)

ALGERIA 6297.09 kHz RASD from Tindouf refugee camp transmitter noted at 1945 UT Oct 9, S=7 poor signal. But not on 6248v kHz reserve unit on air. (wb, wwdxc BC-DX TopNews Oct 9)

6248.33 RASD at 0032-0033\* UT Oct 9, noticed off frequency again. Just caught the end of their transmission, signing off with their National Anthem. Fair to good. (Brian Alexander-PA-USA, hcdx 9)

RASD Tindouf back on its morning channel 6248.33 kHz at 0600 UT, but both RASD Tindouf areas are hit heavily by European NATO digital UTE stations, G7D transmission mode, with data modems of 2400 Baud Stanag signals. This Stanag reference on 6243-6249 and 6294-6299 kHz. West-Saharies will not be happy there. (wb, wwdxc BC-DX TopNews Oct 10)

I assume that the Stanag signals are maritime communications. Above 6200 is part of their band, but such signals can be heard in many frequency ranges, and some are known to emanate from the Inskip station not too far south east from me. I'm not sure if it is still a Naval station these days but the tall masts and at least one log periodic plus much more can still be seen in situ.

(Noel Green-UK, to wb, wwdxc BC-DX TopNews Oct 9/10) yes navy comm. wb.

ANDORRA ARTHUR WARD wdx-UK: Further to the item last month on Radio Andorra, here is a Radio Andorre Diary - translated by Philip J Ward (recent resident of Paris) from  
<[http://fr.wikipedia.org/wiki/Radio\\_Andorre](http://fr.wikipedia.org/wiki/Radio_Andorre)>

1935: Project to create a national radio station in the principality of Andorra. A franchise of 30 years is signed.

1936: Creation of regulatory body 'Radio Information'. The radio contract signed the previous year is extended from 30 to 60 years.

1937: Beginning of the construction of the transmitter for Radio Andorre, with official response from the French state with regulation on the power of the signal. France refuses signal strength over 200 watts.

1938: the colonel of the gendarmerie (armed police force) Baulard attempts to stop the construction works for the transmitter, the Andorrans support Jacques Tremoulet and Stanislas Puiggros against the assault coming from the French. After refusing to do so, France eventually gives authorization to Radio Andorre to construct the transmitter. However, the strength of the transmission is fixed at 60 kw long-wave and 1 kw shortwave.

1939: August 7th: the first transmissions go out where you can here the famous "Here, Radio Andorre" from Victoria Zorzano.

1940: The war having erupted in France, the transmissions are only made in Spanish and Catalan from July to October.

1946: Victoria Zorzano leaves the station to marry an owner of car dealership in the principality of Andorra

1948: Several incidents of interference of the station occur, and France prohibits border access [border sanctions] to discs and radiophonic material. Radio Andorre demonstrates and complains to the director general of the RDF, retrieving damages payments and interest.

1949: the measures taken the year before are recognised as illegal by the French state.

1956: Increase in the signal strength.

1960: The Marquet brothers take over the station that they will develop until its last broadcast.

1961: A radio contract of 20 years is signed with the SOFIRAD [the regulatory body].

1964: The station welcomes a stage of the Tour de France in the principality of Andorra

1971: Death of Jacques Tremoulet.

1975: A long-wave transmission project in multiple European languages is proposed and rejected, with Andorra using any resources to transmit this program project.

1980: The Conseil des Vallees announce that it does not want to renew the contract signed with SOFIRAD in 1961.

1981: April 2 - The station is called to end its transmission, which it did as of 21st October. Resumption of emissions on the 8th April at 12:00, but the final discontinuation of programs was on Thursday 9th April at 20:55 under order of the Andorran police at the transmission station. The next day, the sequestration of equipment takes place. The wages of personnel continue to be given out between their decommissioning and joining other national radio stations. Each member of the workforce still present follows their daily routine or occupies themselves by remaining loyal in the hope of a recommencement of transmissions. Unfortunately, in November, the Marquet brothers announce to the some 38 people who have remained loyal to their posts that Radio Andorre has conclusively ended. The studios are abandoned and left unprotected, but the transmitter at Lake Engolasters [Lac d'Engolasters] will never be taken down, remaining silent for good.

1991: A fire completely ruined the studios, destroying the archives and recordings abandoned since the closure of the station.

AUSTRIA/CROATIA 6155.00 Somebody on the Zagreb Deanovec staff 'slept'  
this morning, slipped on the keypad. Croatian Radio 5-8 UT broadcast 10  
kHz down on ORF OE1 Moosbrunn Austria frequency. A terrible sound mixture  
here in Germany. At 0615 UT ORF Moosbrunn ended their transmission now.  
(wb, wwdxc BC-DX TopNews Oct 10)

AUSTRIA Since, for me, most DXing observations are retrospective, these  
days, the special Austrian broadcast schedule to mark the formation of  
ARMS brings to mind another Austrian military radio operation. After WWII,  
Austria did not regain full independence until 1955. And five years later,  
its young military began participating in world peacekeeping missions (in  
the Congo) in 1960. Later Austrian troops would serve on peace missions in  
Cyprus, the Middle East and many other places.

In this regard, I remember fondly OEY21, Schulungssender des  
Oesterreichischen Bundesheeres, the Austrian Army Radio which was  
headquartered in Vienna. At 1000 watts on 6255 kHz, they were REAL DX here  
in the central US.

In early 1972 I was fortunate enough to catch them during one of their  
"occasional" Wednesday early morning programs,

which, when used, was 0500-0700. Normal regular schedule then was Mo-Fr  
1000-1200 and 1500-1900. While this was called a "training transmitter" I  
always believed that a major purpose was to broadcast from home to their  
peacekeeping troops then in Cyprus. Perhaps some of our European friends

have additional background on this long gone, but fascinating bit of DX, at least for me.

(Don Jensen-USA, dswci DXW Oct 6)

Yes indeed, I remember it also. Nice long QSL card with an abstract antenna logo. No power quoted on it, but 1 kW fits the memory (from WRTH?) also. My QSL was for a midweek broadcast after 1500 in October 1972.

The only new information I can add is that the card had 2 call signs printed on it along with the one frequency of 6255. The second call was OEY52. Perhaps OEY21 was their Clark Kent call. If that's right, I don't know what the conditions were for them to change to being Superman. (aumas-UK, DXplorer Oct 4)

6255, 5035, 3378. "Schulungssender des Oesterreichischen Bundesheeres" - Austrian Army Broadcast Training Station - was situated in a Vienna barracks with the call OEY21 (OEY being the Army call area). There was an outlet in Salzburg, OEY21, allocated but not active. It would have been activated in case of a national catastrophe or crisis that necessitated the evacuation of the government to an exclave nearby. Vienna studio, transmitter and aerial were located originally downtown later in the 12th district, not exactly in the outskirts.

Main purpose of the station was to train recruits of the telegraph corps to operate a bc service, particularly in case of emergencies when regular bc transmissions were interrupted. the national radio was occupied by enemy forces etc. But how can you run a station without a programme, without contents - which was not the main purpose of OEY21. They filled airtime with music, a morse code training, and occasional announcements (which misled Don to think they were destined to keep in touch with their peacekeeping troupes in Cyprus etc. In fact there was a separate service for that purpose, "Heimatfunk" - Calling Home.

The main problem of the station was that it had to transmit outband. To somehow find a solution, they stated regularly: "this programme is destined for army internal purposes only and not for public broadcasting". On the other hand it was important that every Austrian should learn about the existence of OEY21, in order to tune to the station in case of emergency. This conflict could not be solved, and consequently the station was closed down. For some time they operated into an artificial antenna. A broadcast studio was built in the inner caves of Salzburg mountain, the government retreat center. It is permanently manned but so far was never used. Enjoy the QSL scans.

(wb, wwdxc BC-DX TopNews Oct 5)

BELIZE Re: "Glenn, Belize antennas were not rhombics but phased H polarized dipoles. There is an illustration in the TCI catalogue as they made them although they were actually designed by Carl Smith. Each was supported by 8 towers not poles. They were pointed in a southerly direction for skywave propagation into central American countries which were of concern to the U.S. government of the time. And they were on 1530 and 1580 kHz."

Glenn, I was just triaging my e-mail file, and noticed I told you that this antenna was supported by 8 towers. That's actually wrong, I now remember, as it used 10 towers.

(Ben Dawson-WA-USA, dxld Oct 7)

Listened on 1580 kHz when I was on tour variously to Mexico and Guatemala. (wb.)

BONAIRE Amateur Radio DXpedition to Bonaire-ATN Oct 10-24.

As you may have read on the RNW website, on Oct 10, 2010 the Netherlands Antilles will cease to exist as a country within the Kingdom of the Netherlands and the status of the individual islands will change as follows:

\* St. Maarten and Curacao [sic] will become independent countries within the Kingdom and will be granted the same status that Aruba attained in 1986.

\* Bonaire, Saba and Sint Eustatius will be given the status of a public body (a kind of special municipality) in the Netherlands and will therefore fall directly under Dutch rule.

To mark the occasion, a group of 15-20 radio amateurs from several countries have joined forces to activate special transmissions from Bonaire between October 10-24, 2010. The primary focus will be all HF bands from 160 to 10 meters including the WARC bands. The team will focus on all modes including SSB, CW and various digital modes. Further information about the callsigns to be used will be published on the special website <[www.bonaire2010.com](http://www.bonaire2010.com)>

Various locations on the island will be used, but the primary location is the RNW shortwave transmitter site. Its impressive antenna park provides up to 21 dBd gain. The radio amateurs have been granted use of the antennas during their "dead hours" on the HF bands, between 1230 and 1830 UTC. It's planned to operate from the RNW facility on 30, 20, 15 and 17 metres.

Between 11 and 15 October, the RNW facility will also serve another purpose. A group of schoolchildren from Bonaire will be contacting another group of children in the Netherlands who will be the guest of Dutch ham PD1DX. This will provide an opportunity for the group of new Dutch country citizens to ask each other questions in order to get to know one other a little bit better.

All QSOs will be QSL'd through the services of Global QSL who will be responsible for printing and distributing cards to all QSL bureaus worldwide. If you do not use a QSL bureau or would like to send for a direct confirmation, all QSL information will be published on the website <<http://www.bonaire2010.com>>

CANADA 6159.98 CKZU Vancouver, 1246-1302 Ut on Oct 4. News, features, wake-up fare on "The Early Edition" (CBC Radio One); traffic at 1250 UT; weather at 1251 UT; mentions of 690 kHz AM (heard here in // with a good signal) and 88.1 FM; no mention of SW. Good signal.  
(John Wilkins-CO-USA, DXplorer Oct 6)

CHAD 6165 RNT, Oct 9 at 2254 UT, hilife music with French comments interspersed, considerably better signal than Lithuania; 2301 UT, "Ici Ndjamena, La Station(?) Nationale", brief NA by military band until 2302:30, carrier stayed on a while. I assume this is back to normal schedule following Ramadan, -2300 Sats, unlike -2230 otherdays. RN Venezuela did not reappear as it had once recently on this unscheduled frequency.  
(Glenn Hauser-OK-USA, dxld Oct 10)

CHILE 17680 CVC transmitter way out of whack, Oct 6 at 1345 UT, some distortion on fundamental, but putting huge splatter over most of the 16m band, detectable between 17400 and 17840, worst peaks around 17630 and 17730 kHz during Spanish talk, and then music, disrupting numerous other stations.

If at the transmitter site Calera de Tango, alarms are not going off, why aren't they monitoring it off the air back at Miami studios? Next check at 1620, however, splatter was gone.  
(Glenn Hauser-OK-USA, dxld Oct 6)

CHINA Xinjiang PBS reactivated, some frequency that stopped from April 28 reactivated from Oct. 9.

Xinjiang PBS reactivated frequency  
Chinese s/on at 2000 UT on Oct 9 on 4820 5935 6050 7450 7240 kHz  
Tibetan s/on at 2100 UT on Oct 9 on 4905 4920 5240 6110 6130 6200 7255 7385 kHz. de Hiroshi  
(Sei-ichi Hasegawa-JPN NDXC, wwdxc BC-DX TopNews Oct 10)

CHINA [and non] I notice very little 21 MHz loggings in CONTACT Magazine, probably a combination of long-going poor HF conditions (very

few sunspots) and much noise in urban areas. Anyway I keep a close listening watch across 21 MHz frequencies and hear regulars such as:

21470 21660 BBC WS  
21485 21525 Family Radio  
21540 21570 21610 REE Madrid  
21620 RFI Paris (English 1200) & BBC Africa (French 1200)  
21655 Portugal  
21695 Libya Arabic as well as other frequencies  
21780 Deutsche Welle (French & German).

but in recent days have noticed what seem to be Domestic Services in Chinese (mainland) some // to transmissions in the 17 MHz band. First noticed in mid-August at 0640: 21500 kHz two services at S7 clashing 21550 two services at S5, one definitely Chinese 21690 kHz again two services, one definitely Chinese

Why two programmes clashing? What services and target areas are these? Heard strong one day, later days down in noise. September 11 at 0850 UT on 21705 kHz two or three Chinese transmissions, two programs, at 0900 UT ads and time signal all off at 0902 UT. Also another Chinese on 21530 kHz with 4 time beeps at 1100 UT and off.

September 12 on 21705 kHz again and found same programme on 17890, 17855, 17605, 17580 and 17775 kHz. Why such high frequencies for domestic broadcasts?

Then this week to Spain [postmark looks like 20th - aw] with Sangean ATS receiver, 40 foot wire from bedroom window, lots of hash noise (plasma TV's ?) and at 0650 I again noted a number of 21 MHz Chinese with one network across 21500, 21550, 17650, 17615, 17565, 17550, and 17510 kHz; with other programmes on 21500, 21550 & 17565 kHz. Most ceased at 0700 UT. At 0705 UT I found 21705 kHz again echo or two transmitters, 0800 UT time signal and off suddenly at 0900.

At 0845 getting weak (in noise) on 17560, 17650, and possibly 17775 kHz. There are no 21 MHz frequencies for China in WRTH 2010, must check summer up-date. Anyone else hearing these early morning Chinese (could be another Chinese type language too, I cannot identify differences!).

I still hear slow pulse interference across shortwave 6.7 to 9 MHz, 10 to 13.5 MHz and 18.5 to 25 MHz. 5 pulses per second with about 6 dB variation every 39.4 kHz. Bad on 7 and 21 MHz. No one has solved it for me yet - source, technology or its use. A mystery network (DES WALSH on holiday in Alicante, Spain, using longhand text, as no computer facilities available, Oct WDXC-UK Contact magazine via dxld Oct 6)

All (or most of) this Chinese on 21 and 17 MHz Des was hearing in the mornings is jamming by China of Radio Free Asia. If you check their schedule, you will find most of the frequencies, coming from sites in the Northern Mariana Islands, Saipan or Tinian. I have often heard them around 0600 UT, even tho it's the middle of the night here. At this time the jamming isn't usually making it here.

Unravelling whether you are hearing RFA or the jamming requires close listening for IDs and/or comparing to other known frequencies of China and

RFA, plus the style of programming, musical cues used by RFA, etc.

The ChiCom MUST jam everything in Chinese and some other languages from R. Free Asia, and to do so they mostly employ the main homeservice program CNR1, often with double audio feed/echo to make it more annoying to listen to, sometimes also distortion, noise, off-frequency heterodynes, or additional jamming sources such as Firedrake music. But it's mostly CNR1 and you can find // programming on countless other frequencies on lower bands too, some of it axually intended for listening rather than jamming.

Of course the jamming transmitters are not listed as broadcasts in the WRTH. The Aoki online frequency list does a good job of keeping up with them, denoted by an asterisk next to the victim broadcaster.

(Glenn Hauser-OK-USA, reply for next CONTACT, via dxld Oct 6)

Re: 21410 kHz InterModulation of China R Internat mix 21550 and 21690 kHz.

DJ9KR reported: Dear fellow Intruder Hunters,  
Today I have agn heard at 0619 UTC and I am still hearing the IM3 of ChinaRI on 21410 kHz. It is an IM product of 21550 and 21690 kHz. You find the same px on all 3 QRGs. In addition there is a firedrake jammer on 21690 kHz.

The purpose of the transmission on 21550 and 21690 kHz is to jam western Tx-ers. Direction is 80 degrs. from Southern Germany. Pse listen yourself. Maybe you can hear the IM on 21410 kHz to report to your national telecoms. authorities. Pse listen also to the attached file. Tnx.

Right at the end, there may have been something to identify the content, but it was covered up by some noise that I am sure once Uli makes up a cable for his new radio, he will not have to make recordings by what sounds like acoustic coupling any more. ;^)

I can find no recent cluster spots of this intermod & no mention on the R1 MS logger, so maybe few know to even look for it.

Perhaps to protect us from somebody's incessant & unwanted propaganda, my country is being thorough & now also targets potential intermods (0300-0600 UT both 21550 & 21690 kHz are VoA from notoriously filthy Tinang in DU; 0600-0700 UT on 21690 kHz they continue from A6-land - both intended for reception here).

We here would be most grateful to help, should where this jamming signal is coming from be narrowed down a bit more, and try to get word through to them of a whole bunch of actual VoA intermods we also need to be protected from.

Happy China National Day to you all!

73, ex-VR2BG/p, Brett from Hongkong. (intruderalert Oct 1)

Re Demolition of Juelich transmitter site:

For new material it's also worth to keep an eye at this thread, with the link to an auction of stuff from the transmitter site being so far the latest entry:

<<http://forum.mysnip.de/read.php?8773,783048,page=4>>

(The photo at the top of this page in particular features the sloping wire antenna for MW 702 kHz.)

Concerning the number of transmitters: In a reconstruction project, carried out after 1985, the original transmitters from the fifties had been replaced by 10 Telefunken S4001 (PDM, 100 kW) units. Two further Telefunken transmitters, installed in 1968, have been kept.

Media Broadcast took away three transmitters prior to handing over the site to Christian Vision. Two ones went to the Wertachtal plant where they have been connected in the place of two old transmitters (one of the old ones has been dismantled to clear the space for the incoming two S4001, the other one still stands as dead corpse and is now cannibalized to keep the remaining old transmitters running).

The third one went to Nauen where it is now in use with the well-known steerable antenna that was until then idle since Deutsche Welle had terminated the transmission contract for the old 100 kW transmitter

(Funkwerk Koepenick-GDR, 1964y) in 2000.

At this point the 1968 vintage transmitters had been withdrawn from operations, as far as I know primarily because no spare tubes were available anymore. And so seven operational transmitters were to be counted in spring 2009.

(Kai Ludwig-D, shortwavesites yg Sept 30, also via dxld)

In the meantime I found that on Wed Sept 29 an auction was closed where 235 items of the workplace in Juelich were sold. No transmitters were on the list. The auction you'll find here:

<[http://www.surplex.com/en/auctions/all-auctions,auction-details,4,plant-closure-of-a-transmitter-station-in-juelich-138,9,1,10,show\\_auction.html](http://www.surplex.com/en/auctions/all-auctions,auction-details,4,plant-closure-of-a-transmitter-station-in-juelich-138,9,1,10,show_auction.html)>

Here you can download a catalog with all items.

(ibid.? - RNW MN blog comments via dxld)

IRAN Re UNID 7315 at 0427 to 0527 UT Oct 5. Thanks Mauno,  
Yes today Oct 6 heard IRIB Tehran too. Is actually n o t Radio Dabanga.

UNID on 7315 kHz 0430-0527 UT (Interval signal from 0427 UT) is 100%  
VOIROI/IRIB maybe in Kurdish // ?, ex0330-0427 UT on 7375 and 9715 kHz ?

VOIROI/IRIB in Kurdish for B-10 season at new time 0430-0527 UT on 6170  
and 9610 kHz. ex 0330-0427 UT on 3945 and 6145 kHz in B-09.

(wb, wwdxc BC-DX TopNews Oct 6)

7315 Unidentified maybe Arabic to Sudanese Darfur region again?  
0427-0430UT IS, regular Arabic from 0430 UT, Oct 5.

Hi OM, I checked it today and I think it was Kurdish from Iran.

(Mauno Ritola-FIN, wwdxc BC-DX TopNews Oct 6)

UNID 7315 Unidentified from 0427-0430 UT interval, regular Arabic from  
0430 UT, mentioned Sudan often, Oct 5, S=8-9 level in Germany. Most likely  
another Radio Dabanga relay like in B-09 season? in Arabic and Sudanese.

Is that like in B-09 season?

7315 0430-0527 ISS 500 143 PNW Mul Daily eAF

7315 0430-0527 47E,48,52E,53 ISS 500 143 0 211 251009-280310 Mul F PNW RNW

RNW website schedule shows these two entries only.

04 29 05 27 DHA 13730 255 28-03-2010 31-10-2010 500 PNW Mul Darfur

04 29 05 27 MDC 13600 330 28-03-2010 31-10-2010 250 PNW Mul Darfur

13600MDG under threshold, only carrier heard here.

13730UAE very weak, but program traced was not exact time // to 7315 kHz.

13730 channel suffers heavily by an unidentified carrier on 13729.00 even,  
seems disturbtion by Sudanese government to sent out interference tone of  
1000 Hz against Darfur broadcast?

LITHUANIA 6130 NHK R Japan relay in Russian via Sitkunai-LTU.scheduled 0430-0500 UT, but carrier heard very early around 0418 UT Oct 5. S=9+35dB very strong that day, only back lobe antenna signal.

(wb, wwdxc BC-DX TopNews Oct 5)

Special RMRC Broadcast via Sitkunai Lithuania site on 9 October.

The Rhein-Main Radio Club ("RMRC") of Frankfurt, Germany, will broadcast two programs concerning Radio St. Helena Day 2009 on Saturday, Oct 9, 2010 using the 100 kW transmitting facilities at Sitkunai in Lithuania.

Target Area Time (UTC) Frequency Language

Europe 1530-1630 9770 German

North America 2230-2330 6130 English

Each program will be hosted by the RMRC. There will be several audio clips taken from a studio recording of RSD 2009. Robert Kipp will comment on these audio clips and present other information about RSH and RSD.

QSL cards for these programs will be issued only by the RMRC. Do not send any e-mail or other reports directly to RSH.

Electronic reception reports to <mail @ RMRC.DE>

Postal mail reception reports to:

RMRC e.V.

Postfach 70 0849

60558 Frankfurt am Main

Good listening and best 73 de

Robert Kipp-D, Rhein-Main Radio Club <www.RMRC.DE>

(Robert Kipp-D in DXplorer Oct 1)

RMRC Broadcasts on 09. October 2010 concerning RSD 2009.

NO Return Postage needed for the RMRC QSL-card.

It is NOT required to send any return postage for a QSL-card from the Rhein-Main Radio Club for the broadcasts on 09. October 2010. A valid reception report and the name and address of the SWL are sufficient. It is also possible to send a report and receive a QSL by E-mail.

The Sitkunai-Lithuania transmitter broadcasts with "AM"-modulation. The RMRC hopes that these broadcasts can be heard all over the world.

With best 73, Robert Kipp  
(Rich d'Angelo-USA, DXplorer Oct 8)

9770 RMRC broadcast at 9.10.2010, 1530-1630 via Sitkunai site, 259 degrees lobe into Western Europe.

Wonderful strong signal of S=9+35dB, here in Stuttgart, Germany, centered in the main lobe of the 259 degrees outlet from Lithuania, no QRM.

China co-channel now heard at 1633 UT after Sitkunai ceased transmission, but CRI Hakka bcst weak in 212 degrees from Urumchi site, in direction of Bombay, Maledives/Seychelles, Madagascar and Eastern South Africa.

... and three seconds bargain of HCJB's German feed too, bcst on 9770 kHz instead of scheduled 5940 kHz from 1630 UT regularly.

Same excellent transmission signals from Sitkunai heard already 40 years ago on USSR era. But not that happening content ... :-)

[later] 6130 TCI-California antenna beamed in direction of 310 degrees serves a powerful signal in target zones 4,7,8,9,10,11 in North America.

6130 here in Stuttgart only co-channel CNR Lhasa Tibet in English (!) with typical Chinese dance music, S=9+10dB, 2230 UT Oct 9.

From 2234 UT onwards heard the St. Helena Happening broadcast TINY UNDERNEATH.

In an angle difference of 51 degrees ... to main lobe via TCI 8-dipol beamed at 310 degrees.

Danke RMRC und Harald fuers Ereignis. 73 wb  
(wb, wwdxc BC-DX TopNews / DXplorer Oct 9)

9770 kHz RMRC St. Helena special.

In Freising hab ich die zweiten Haelfte der Sendung mit dem Tecsun PL-380 am Kuechentisch gehoert. SINPO 55544, auch bei 6 kHz Bandbreite kein QRM. Ein Synchrondetektor haette aus dem P=4 ein O=5 gemacht. Um 1630 UTC kurze deutsche ID von HCJB, dann Stecker gezogen. Danach leise asiatische Klaenge auf der Frequenz.  
(Guenter Lorenz-D, A-DX Oct 9)

The special broadcast on 9770 kHz at 1530-1630 UT also well heard with some buzz in the audio at my location in NW England. There was an announcement from an HCJB German broadcast at the end of transmission! Signal strength 20dB+ over 9 with co-ch QRM during at least the last half hour, so probably CRI Urumchi in Hakka. Heard at fair strength when Sitkunai left the frequency.  
(Noel R. Green-UK, dxld Oct 9)

9770 RMRC - Excellent in Toronto, Canada at 1625 TI!  
(Tony Ward-TN-CAN VE3NO, NYAA Starfest, <<http://www.nyaa.ca>>  
DXplorer Oct 9)

9770 RMRC - Great signal from RMRC at 1625 UT, no QRM.  
[later] 6130 Fabulous signal throughout the entire honor; I'd give it a  
SINPO 5 5 5 4 4-5.

6130 Rhein Main Radio Club (via Sitkunai Lithuania), special on RSHD and  
other topics; carrier on at 2229 UT Oct 9, ID, talk about SW calendar,  
RMRC DX camp and other activities, mx ("Like A Drug," "Can't Stop the  
World," "Down Yonder," etc.); into talk about RSHD history, many studio-  
quality audio clips of the 2009 RSHD program at 2302 UT; gave postal, e-  
mail addresses and RMRC URL at 2327; closing anmt, tuning melody, off  
2332:30 UT. Excellent signal. Also fair during the German broadcast at  
1530-1630 UT on the same day, 9770 kHz.  
(Jerry Berg-MA-USA, DXplorer Oct 9)

9770 - R. Saint Helena Day [non] imminent from Lithuania. In Barcelona,  
Spain no problem all over hour sinpo 45444 varies very little. No QRM, no  
interference. I have audio clip to upload from podomatic in a while.  
Cordialmente,  
(Tomas Mendez-ESP, <<http://www.amarantadx.net>> dxld Oct 9)

Generally fair here from \*1530 UT on 9770 kHz with some readable peaks. A  
recording of R. St Helena with ID heard clearly just prior to 1600 UT.  
Hopefully the 2230-2330 UT beam to NoAM on 6130 kHz will make it through.

[later] Huge signal on clear freq 6130 kHz at \*2230 UT with Rhein-Main  
Radio Club English program to NoAM.  
(John Herkimer-NY-USA, DXplorer Oct 9)

Rheinland - Hallo in die Runde, also hier kommt die Sendung auf 9770 kHz  
mit mit 45554 ausgezeichnet an. Zur Zeit laeuft ein Bericht von Robert  
Kipp ueber den St. Helena Day.  
(Reinhard Meier-D, A-DX Oct 9)

Oesterreich - Mein Ergebnis ist aehnlich, 45544. Wobei "P" bei mir  
zwischen 4~5 schwankend ist.  
(Heiko Mandel-AUT, A-DX Oct 9)

Re 9770 - Ein Highlight fuer DXer, HCJB wieder mal auf 9.7 MHz zu hoeren.  
So wie seinerzeit taeglich fruehmorgens.  
S = 9+50dB in Salzburg. So gut hatte ich St. Helena hier noch nie.

Dem RMRC ein herzliches Danke fuer die hoerenswerte Sendung!

73 Christoph Ratzer OE2CRM, A-DX Oct 9  
<<http://www.ratzer.at>> <<http://a-dx.at/facebook/>>

RMRC to NoAM on 6130-LTU.  
RMRC, 6130 kHz, 2228-2332 UTC. Strange enough but reception here (South-  
Eastern Ukraine) was comparatively good (34433) on my Degen DE-1103  
(telescopic aerial). Slight interference from CNR Lhasa, Tibet. Thank you,  
RMRC. It was truly a wonderful broadcast.  
(Aleksandr Diadischev-UKR, dxld Oct 10)

Rhein-Main Radio Club via Sitkunai on October 9:  
1530-1630 on 9770 SIT 100 kW / 259 deg to WeEu. SINPO 54554, with slight interference till 1600 UT by Deutsche Welle in Swahili and from 1600 UT by China Radio International in Hakka.

2230-2330 on 6130 SIT 100 kW / 310 deg to NoAM. SINPO 44554, with slight interference by PBS Xizang in English/Tibetan.  
(R BULGARIA DX MIX News, Ivo Ivanov, via wwdxc BC-DX TopNews Oct 10)

6130 kHz Rhein-Main Radio Club, at 2252 UT tune in talking with Robert Kipp about the history of Radio St. Helena Day. Into Eagles tune at 2258 UT. Very Good.  
(Mick Delmage-AB-CAN, DXplorer Oct 10)

Powerful signal from carrier on at 2228. IS, ID into pgming, which continues strong at 2350 UT.  
(Don Jensen-WI-USA, DXplorer Oct 10)

RMRC 6130 - S=59+15dB on Perseus to K9AY at 2315 UT from Whitby ON (25 mi NE of Toronto). Nearly as strong at s/on; carrier on at 2229 UT on the button... A very enjoyable program! Good copy on a barefoot CCrane-SW.  
(Tony Ward (VE3NO), NYAA Starfest <<http://www.nyaa.ca>> DXplorer Oct 10)

Rhein-Main Radio Club special RSH 2009 broadcast via Sitkuani-LTU on 6130 kHz, 2230-2330 UT - English with clips of RSH 2009 broadcast, comments, QSL details. Initially poor but improving to fair by 2330 UT. Transmitter left on until 2332 UT.  
(Brandon Jordan-TN-USA, Perseus SDR, Wellbrook K9AY, Welbrook ALA330S. <[www.bcdx.org](http://www.bcdx.org)> <[www.dxtests.info](http://www.dxtests.info)> hcdx Oct 9)

6130 RMRC made it's appearance [in CAN] here from about 2308 to 23:30\* UT with Robert Kipp's commentary, noted a ID at 2310 UT, dialogue, and the close their closing annmts with e-mail address/website information, with some sort sign-off ballad. Signal was just audible initially and gradually improved to about s3 at sign-off. I agree with James Ronda, if they had stayed on for another hour it would have made better copy, especially at local sunset conditions.  
(Edward Kusalik-Daysland-Alb-CAN, DXplorer Oct 10)

Die englischsprachige Sendung des RMRC auf 6130 kHz ab 2230 UT ist im Zielgebiet [Kanada und oestlicher Teil der USA, wb.] nach ersten Meldungen sehr gut zu hoeren, hier dominiert das englische Programm Holy Tibet aus Lhasa, Tibet, China.  
(ibid. Oct 9)

Das ueberrascht mich. Nachdem ich das deutschsprachige Programm am Nachmittag leider verpasst hatte, war die englische Sendung in der Nacht auf 6130 kHz hier an der Unterweser gut zu hoeren. Zwar konnte ich im Hintergrund auch den Sender aus Lhasa wahrnehmen, aber das Signal aus Sitkunai war eindeutig dominant. Nach 2300 UTC wurden die Tibeter dann lauter, trotzdem liessen sich die Audioclips von Radio St. Helena noch gut verfolgen. Danke fuer die Sondersendung!  
73 aus der Naeh von Bremerhaven,  
(Felix Riess-D DL5XL {ex Antarctica stn}, A-DX Oct 10)

RMRC Sondersendung zu St. Helena.

Hallo Freunde, ein ganz kleiner Trost fuer alle, die weder die deutsche noch die englische Sendung hoeren konnten:

Wir werden die Sendung am kommenden Samstag 16.10.2010 nochmals ausstrahlen, dann allerdings per I-Radio ueber Straemerp2p Rmrc Radio 1 ab 21.00 UTC deutsch und anschliessend English.

Auf die Seite <streamerp2p.com> gehen und click RMRC Radio 1, evtl. streamer runterladen und installieren, dann ist RMRC radio1 in der Liste der Online Radios zu finden.

Empfangsberichte zur RMRC KW-Sendung ab dem 16.10.2010 werden dann in jedem Fall nur noch mit einer mail-QSL Karte bestaetigt.

ist nur ein Trost, ich weiss, ist keine Kurzwelle, dafuer in guter Qualitaet. beste 73  
RMRC - Dr. Harald Gabler, A-DX Oct 10

(wb, wwdxc BC-DX TopNews Oct 9)

NIGERIA 7350 FRCN Abuja, Radio Nigeria, Abuja (domestic). Formerly as  
Odd frequency [indicator] approx. on 7274.86 kHz, silenced from 12 Feb  
2008 til Sept 28, 2010.

UNIDENTIFIED. The unID I reported to you on 7350 kHz is still being heard  
- audible might be a better word to use. But on the 29 Sept. at 0633 UT it  
was better than usual, and a man and woman were heard speaking in English.  
But I could only copy occasional words due to a still weak signal and  
local noise. I tried to compare with other broadcasts that have English at  
that time but didn't find anything comparable. The signal descended into  
the mush around 0640 UT or so, and has not been as well heard again since.  
It was traceable today at 0615 UT but didn't improve.  
(Noel Green-UK, dxld Oct 1)

UNIDENTIFIED 7350 kHz - Noel Green in England has been hearing a weak  
unlisted station in English at 0630 UT, so I start checking for it earlier  
Oct 5: at 0542, 1 kHz tone test, 0558 open carrier, marred by intermittent  
"running water" ute bursts; 0559:30 music and announcement, more H2O, 0601  
M&W intonation sounds English, but just too weak, still so at 0615 UT.

EiBi lists on 7350, RRI in Romanian until 0500 UT; Iran in Arabic until  
0530 UT, but nothing in the following sesquihour. Aoki agrees except for -  
0457\* and -0527\* UT. I suppose this could be a mixing product, perhaps  
from a major station, if we could just pull enough audio to recognize or  
// it. Then Noel replies:

"The station using 7350 kHz is no longer unID. It was heard again this  
morning (Oct 5) at around 0630+ UT but again too weak in local noise for  
me to identify. Mauno Ritola-FIN was on hand, and he heard it via his own  
equipment and then identified it by using a remote receiver as "Radio  
Nigeria National Service".

It was not // with V of Nigeria 15120, Mauno says, and so it's assumed to  
be the Abuja transmitter formerly using 7275, which frequency now appears  
empty. 7350 kHz is audible - just - through the hour at 0700 UT but it  
cannot be ascertained whether it continues or not. The WRTH lists FRCN  
Abuja as 0430-2130 UT on SW, but that has to be confirmed. Noel R. Green  
(NW England)".

Why in the world don't SW stations moving to a brand new frequency notify  
the DX world about it? But then that would deny us the thrill of  
discovery, even if it take a while.

7350, R. Nigeria National Service, presumably Abuja ex-7275 kHz, as IDed  
by Mauno Ritola via Noel Green, again Oct 6 at 0612 UT very poor signal,  
but they did pick a nice clear frequency; just needs more oomph.  
(Glenn Hauser-OK-USA, dxld Oct 6)

Glenn, The Radio Nigeria Abuja National Station has been missing from 7275 for about 3 weeks now. This morning I heard it on a new frequency of 7350:

7350 kHz - 6 Oct at 0629 UT, Radio Nigeria Abuja, with Radio Nigeria Network News. 0700 UT, ID as "The Voice of Unity", followed by scheduled programme in Pidgin English. 0730, show from the network service, "Consumer Speaks". 0800 UT, programmes in Hausa.  
(James MacDonell-NIG, dxld Oct 6)

Hell dear Noel,  
Patrick from Austria heard Nigeria this morning Oct 9th on new 7350 kHz,

> Radio Nigeria at 0600 UT on 7350 kHz in Englisch ID and Nx. 24332 so seemingly VoNigeria new Abuja site, finnished by Thomson engineers already in November 2009, will now start regular broadcasts, - seemingly - after 11 months ?

Older Abuja site on 7275 kHz, refurbished by Thomson engineers too, heard also two weeks ago in our morning, - we had an item on DX scene already.  
vy73 de Wolfy, Oct 9

7350 Oct 9 at 0559 UT, JBA carrier from presumed R. Nigeria, Abuja; wonder if this will ever rise to audibility over here. Shame to have such a nice clear frequency, with pitiful peanut power. Is anyone in Europe hearing it in the evenings? But then it would collide with Russia, Moldova, Iran, China, East Turkistan. Maybe there are some gaps when it could be detected.  
(Glenn Hauser-OK-USA, dxld Oct 9)

7350 kHz - Radio Nigeria Abuja.  
I can hear 7350 kHz almost every morning around 0615/0630 UT, but always at a weak strength which means that I cannot copy only an occasional word of the transmission due to local noise levels.

But via remote receiver, Mauno heard the ID clearly as I wrote. It was not the external service but the internal - National - one, so we assumed it to be via the Abuja transmitter that had been using 7275 kHz. That's the old refurbished unit I understand, and on the old site. Do you know what type of antenna is being used?

When the new transmitters finally come on air I think we will hear them with a much louder signal via their beamed antenna's. The external service is of course 'Voice of Nigeria' and not Radio Nigeria.

Later this morning I wondered if what I heard on 6085 kHz could have been a test from the new Abuja site - but would 6 MHz propagate at 0700 UT? I'll have more time in the morning to listen to see if it is active again.

[later] 6085 was empty Oct 10 - nothing audible today. So I wonder if the African music heard on Saturday Oct 9 was a test of some kind. It may be worth checking again on weekdays.  
(Noel Green-UK, to wb, wwdxc BC-DX TopNews Oct 9/10)

Hello Noel, Patrick Robic from Austria heard Radio Nigeria this morning Oct 9th on new 7350 kHz,

> Radio Nigeria at 0600 UTC on 7350 kHz in Englisch ID and Nx. 24332

so seemingly Nigeria old refurbished Abuja site, which was due to come on air again. Older Abuja site on 7275 kHz, refurbished by Thomson engineers too, heard also two weeks ago in our morning, - we had an item on DX scene already.

Finnished new Abuja site by Thomson engineers already in November 2009, will now also start regular broadcasts soon?, - seemingly - after 11 months ?

(wb, wwdxc BC-DX TopNews Oct 9)

History - Ham operator Bodo Fritsche 5NOCH / DU9 / DL3OCH, took part on the common Thomson Switzerland / Schifferstadt action at Abuja, Nigeria in 2009.

7275 kHz transmitter site is Radio Nigeria in Gwagwalarda. He visited that site in November 2009 and made an EXPERTISE on this site equipment for the Thomson management + FRCN R Nigeria/VoNigeria. The site is in very bad shape. 2 x 100 kW transmitter need to be overhauled / repaired in 2010 by Thomson engineer colleagues of his Thomson Swiss/Schifferstadt group, in transmitter and antenna division.

7275 Gwagwalarda shortwave site facility will get the same modern control system unit like at Lugbe site. He assume the 7275 kHz Gwagwalarda site will be ready in regular service again in mid 2010.

[a little later, so Noel heard them on Sept 28 again ... wb.]

He feel not certain of exact date, but the Gwagwalarda site is out of service some years now."

(wb, wwdxc BC-DX / SW TXsite Dec 23, 2009)

Out of service from 13 Feb 2008 til Sept 28, 2010, all approx. acc listeners monitoring. (wb)

UNID 6085 - {another Nigeria station? wb.}

Today (Saturday the 9th) there was a station audible on 6085 at 0650 UT playing non-stop western/central African style music. Transmission went through the hour without any announcement, and unfortunately I had to leave at 0710 UT or so when it was still on air. Signal strength was fairly good, up to about 6 on peaks, and the music was similar to what I've heard via RASD on previous occasions. But of course it might not be that station. 6297 was blocked by a digital noise transmission, and I did not try elsewhere to hear RASD.

(Noel Green-UK, dxld Oct 9)

Our correspondent in Nigeria has already answered this question:

Since first hearing Radio Nigeria Abuja on new 7350 kHz, I've noticed the station absent in the afternoons and evenings and was even wondering if they are using a different frequency at those times. However, it turns out the announced schedule is only from 0530 until 1200 UT daily. They seem to be on continuously between those hours, rather than dropping off the air from time-to-time when the local power supply goes out.

7350, Sat 9 October at 0552, only a test tone, 0555 National Anthem and National Pledge followed by identification (frequency announced as old 7275) and promotions, then into Network News at 0600. Tune-in at 1150, Hausa programme, ended at 1155 followed by ID and music, 1157 Islamic call

to prayer, 1159 closedown announcement and transmitter off at 1200.  
Reception mostly strong but a little weak at sign-on suggesting that the transmitter power is probably not very high.  
(James MacDonell-NIG, dxld Oct 9)

So this explains why 7350 Radio Nigeria, Abuja is not being heard in our evenings, and why the signal is so consistently weak here in Europe. Maybe the full 100 kW is not being used, or could it be due to the type of antenna that they have. I had great difficulty in hearing 7275 when they used that frequency.

I also heard the RTTY signal near 7350 today - Sunday - and there was a signal on 7350, but very weak today.

As I wrote elsewhere, there was no audible signal here on 6085 today (Sunday).  
(Noel Green-UK, dxld Oct 10)

7350 Nothing heard here of Radio Nigeria Abuja this morning, at least on my post. Scheduled 6-12 UT. But 7350 kHz is covered by speedy RTTY signal on approx. 7348.11 kHz and around, S=7-8 level, ITU F1B telegraphy mode at 0627 UT Oct 10.  
(wb, wwdxc BC-DX TopNews Oct 10)

7274.86 kHz.  
7275 ended approx. 12 Feb 2008, according Carlos Goncalves in Portugal 12 Feb 2008 log. And Odd frequency [indicator] approx. 7274.86 kHz.

Last log in my archive, 7275 at 0810 on Oct 31 2006, FRCN Abuja, in English, easy talk. 33333. (wb)  
(wb, wwdxc BC-DX topnews Feb, 2008)

7350 is covered by speedy RTTY S=7-8 signal on 7348.11 kHz in F1B mode from Norway? 15120 Voice of Nigeria, recreative WeAF music, S=9+20dB at 0720 UT Oct 10.  
(wb, wwdxc BC-DX TopNews Oct 10)

RUSSIA 5930 Radio Rossii Monchegorsk, reklama program in Russian at 0407 UT Oct 5. Surprisingly S=9+10dB level. 4-5 UT is the best time slot here in Germany to listen to the domestic Rossii stns in Northern part of Russia, like Murmansk and Yakutsk. ... and even Belarus stations too.  
(wb, wwdxc BC-DX TopNews Oct 5)

Seldom heard Sp/Port sce of VoRUS Moscow to Iberian peninsula noted via Orzu TJK relay Oct 9 at 2000-2200 UT, IS & ID at 2000 UT. Co-channel CRI Beijing tx site in Chinese towards CE&NoEUR.  
(wb, wwdxc BC-DX TopNews Oct 9)

Yakutsk 100 kW 7230 or 7345 kHz ?  
7230 kHz seems to be regular now in the mornings, but 7200 kHz seems to be absent, more or less. 6160 kHz Arkhangelsk also seems to be back to its former self. I am also having a weak and fluttery carrier on 7320 and

5940 kHz.

(Olle Alm-SWE, wwdxc BC-DX TopNews Oct 7)

ST. HELENA Radio St. Helena Day am 09.10. oder nicht?

Werte Runde, leider bin ich ueberhaupt nicht auf dem Laufenden, was die Nachrichten ueber den Radio St. Helena Day angeht. Ich komme gerade von meiner Arbeit bei der wdr media group und habe den Kurier gelesen.

Was ist denn nun mit dem "Saenta Liena daei"? Gerne wuerde ich das in meiner DX-Laube monitoren, weiss aber nicht, ob dieses Happening ueberhaupt stattfindet.

(Silken Medert-D, A-DX Oct 7)

As reported previously, the broadcasts directly from Saint Helena have been cancelled this year.

Das Happening findet erst wieder im Jahr 2011 statt. (wb)

ST. HELENA We at Radio St. Helena are also VERY SAD to have to announce the cancellation of RSD 2010. The problems with the tower holding the 3-element Yagi antenna are such that we simply had no choice. There is no chance to fix the tower in the next six weeks, but RSH is quite confident that we will be able to broadcast a RSD 2011 program next year. At the moment, I am investigating the possibility of setting up a wire antenna as a temporary measure, but I am not at all sure whether we will be able to do that. The technical resources on the VERY REMOTE island of St. Helena are not so good. If anything needs to be ordered from England, then it takes a lot of time and effort.

(Robert Kipp-D direct and via dxld, Sept 11)

aber als kleines Schmankerl gibt es eine Aussendung ueber Litauen am morgigen Samstag 9. Okt. see under Lithuania.

SLOVAK REP Our B10 schedule will be frozen and online in a couple of weeks. The main change for our European, North Africa and Middle East listeners is that 9515 will be moved back to 9510 on Sat and Sun mornings CET to avoid mutual interference with another station that will be back to 9520 [R Liberty? wb.].

7290 will remain the same in the evenings (God help us and give us strength in the 41 m.b.!). All times in our schedule for all broadcasts to Europe will remain the at the same time according to CET, as we usually do. Please check

<<http://www.nexus.org/NEXUS-IBA/Schedules>>

for details and updates in the next few days.

[CET=UTC+2 in summer, CET=UTC+1 after Oct. 30, 2010]

As usual, we welcome your email and letters by email to:

<reports @ nexus.org>

Even if we do not have the financial and human resources to answer to all letters, we do reply to all e-mails sent to this e-mail address. Your letters and support really can keep our station alive in times when most other stations decide to shut down. Your letters and comments are of the greatest help to those who are able to finance our broadcasts, and keep us

on the air. Please get in touch with us or directly with those who hear on the air, and not only with reception reports (please!), but especially with comments and suggestions that are extremely useful to our program producers. Thank you!

(wb, wwdxc BC-DX TopNews Oct 5)

VENEZUELA In the 1980s I wrote my thesis about the Spanish dialect  
spoken in the Carabobo province in Venezuela and had the opportunity to  
travel the country for some months to do some field work. I also visited  
San Cristobal and met with Gregorio Gonzalez Lovera, who was not only the  
founder and owner of Ecos del Torbes, Radio Tachira and two other  
stations, but also one of the three radio pioneers of the country, the  
only one still alive when I visited him.

Ecos del Torbes' monster signal: on my Sony ICF 2001D, their signal  
occupied a range of 50-60 kHz in San Cristobal (i.e. 4950-5010 kHz) and  
I think the power of their boosted transmitter was at least 20-50 kW. But  
even more impressed I was by the dedication and love some technicians had  
with their low power transmitters.

Alfredo Poppert, a native German living in Valencia, the capital of  
Carabobo province, was really proud of keeping LV de Carabobo's 1 kW  
transmitter on the air using a 40-year-old Continental transmitter with  
four tubes and just a few meters of wire as a dipole. Their signal could  
be heard regularly here in Europe in those days.

Another story was my visit to R. Yaracuy. The gerente was proud that his  
station's signal could be heard worldwide and he showed me two huge  
baskets full of letters form listeners from overseas. Not a single one of  
those reception reports had been answered, but nothing was thrown away.

The "verie signer" in those days was someone working at the local post  
office who had nothing to do with the station [i.e. extracting the return

postage?? But nice of him to deliver the letters anyway gh]. The station's personnel did not even know him!

Another interesting thing was R. Valles del Tuy in Ocumare del Tuy on 6130v kHz. They were active in the 1980s but had such a weak transmitter that it was hard to get their signal even at a distance of a few km. They definitely had only a handful of Watts left to blow into the air; but they were still active on shortwave!

My favourite stations / programmes in that time were "Lo que esta noche recuerda" (night program of Ecos del Torbes) and the latin hitparade broadcast during the night on LV de Carabobo and on R. Yaracuy.

I visited almost every SW station which was active in Venezuela at that time. Nowadays it seems that not a single one is left on shortwave. (Michael Schmitz-D, editor-in-chief, "Radio-Kurier/WWH", Germany, via Oct naswa journal via dxld Oct 6)

#####

EDXC Conference in Ankara, October 2010, by Kaj Bredahl Jorgensen, on dswci SWN.

The 2010 Conference of the European DX Council was held last weekend in Turkey.

The annual EDXC meeting and conference was held on September 30th to October 2nd, 2010 in Ankara and sponsored by TRT, the Voice of Turkey.

Together with my wife I had the great pleasure to participate this annual event also this year. Unfortunately our Chairman, Anker Petersen could not attend this year due to an eye operation, so I was the only Danish delegate this year.

We left Copenhagen airport [...] to Hotel Dedeman in Ankara, which was the headquarters for the conference. This hotel is a five star international hotel with many facilities. In the lobby, EDXC Secretary Tibor Szilagyi greeted us. [...] At 1200, the registration in the hotel was opened, where Tibor and I sat in the lobby and registered participants. A few of those had already arrived on Wednesday. During the afternoon most of the participants arrived. In all 19 people from 9 countries participated. As usual the biggest delegation came from Finland with 7 participants, 2 from Japan, and then just one from Sweden, France, Italy, Russia, Germany, Denmark, and the United Kingdom.

By the way, most of those were DSWCI members! In the evening we had the usual informal get-together in the hotel, where many issues were discussed together with a beer or two.

Friday, October 1st:

At 0900 we left our hotel to drive to TRT, The Voice of Turkey's headquarter, situated about 45 minutes drive from our hotel... When we came to the big headquarter, we saw a big poster in the lobby made especially for the EDXC conference by TRT. There we were welcomed by, Mr. Mahmut Filiz, deputy director and Mrs. Ufuk Gecim, head of the German section as well as several other persons employed by the radio station. First we went through the domestic department, where we saw a little exhibition of old radio and TV equipment which has been used by TRT during

the years.

Afterwards we went to the office of Mr. Hasan Harman, broadcast Directing Manager, who welcomed us and he then told us briefly about the organization and the radio. There are 4.000 employees in the headquarters, and 3.000 employees in the different regions throughout the country, so quite a big organization. We were also told, that two new languages will be added in the near future for their foreign services, being Japanese and Mongolian[!]. Then we presented ourselves each other, and we were given a package with many different items from the radio.

Afterwards we walked through many long corridors to the international department, where we first saw some of the many different language offices. The Voice of Turkey is currently broadcasting in 32 different languages. After the meeting we went to the big IT section, where we saw the production of the various language sections was made for the internet. In this department no more than 140 men and woman were employed to make and up-date news every day for home page of each language. After the visit to the IT department, some of the EDXC participants were interviewed by the radio in different studios, to be broadcast later on in English, German, Italian, Russian and French.

Then we had a splendid typical Turkish lunch at the radio station together with the leading personnel, in the canteen of the radio, before we went to the Emirler transmission site situated about 50 km. outside Ankara. There we were greeted by the director of transmission, who was a very nice lady, and we had a thorough insight of this rather old, but still well working, transmitter as well as all the antennas. There was one big rotatable antenna, 28 (as far as I remember) different curtain antennas and some other different antennas. The reason why we didn't visit the Cakirlar transmitter was, that this site was under re-construction. During our whole stay at the radio station and at the transmitter site, we were photographed nearly all the time by a photographer from the radio. [...]

Saturday October 2nd

The conference itself began Saturday morning at 0930 in a big conference room at the hotel, where also some representatives from TRT were present. The secretary General, Tibor Szilagyι opening the conference with this speech:

"Dear DX Friends and Conference Participants!

12 months have gone since the closure of the EDXC Confernce in Dublin / Ireland. [...] As you probably know, the EDXC has today 12 members, 4 observer members and 4 individual members. Two individual members are from Sweden: the well known Swedish DXers Claes-W. Englund and Bengt Dalhammar, furthermore Torre Ekblom from Finland and Luca Tius from Italy. [...]

During the preparation work for this Conference I had the pleasure to enjoy the help of the following organizations and DX-Clubs:

1. First of all I had a lot of correspondence with Dr. Ufuk Gecim, Head of the German section of the Voice of Turkey, die Stimme der Tuerkei. At this point I wish to express my gratitude for her kind help. As you could experience yesterday, our visit at the Radio was organized very smoothly and we had an extra-ordinary warm hearty reception at the Radio. Thank You Dr. Ufuk Gecim for all the good work you have done for us!

2. Secondly I would like to mention the great help I got from Anker Petersen, Chairman of the Danish Shortwave Club International. He was extremely helpful at finalizing our programme for this Conference Day today. As you probably know, Anker Petersen had an eye-operation on the 22nd of September, and because of that, he cannot attend at this conference. He was scheduled to give us a lecture here on the subject: "Anker's Radio Trip to Northern Part of India and Bhutan."

3. Last but not least I wish to express my gratitude to Risto Vaehäkainu, who was always ready to give good advices and useful recommendations for this conference. [...] Thank you Risto for your kind support.

4. I also wish to mention that Dario Monferini also showed a very positive attitude for our conference and he was ready to contribute to our conference today with his own story: "2009 Radio Travelling in Russia and other Eastern European Countries. " Thank you Dario very much for that.

Risto Vaehäkainu from Finland, Anker Petersen and Kaj Bredahl Joergensen from Denmark, Dario Monferini from Italy, those are the people who are always writing to me. All other DX-Clubs show a significant silence. Why is that ?

[...] After the welcome, he gave the word to Mr. Turan Nurettin from TRT External Services, who among other things told us, that TRT started in 1936 and was reestablished in 1943. Nowadays they are broadcasting in 32 different languages with a total of 168 hours in the foreign languages each day, and 43 hours in Turkish each day. In March 2008 they added Dari, Pashto, Uzbek, Uyghur and Armenian to their service. They have 30 languages on Internet for the time being. In the near future they will also use DRM broadcast to their service. At the moment they got about 2.500 reception reports a month and 300.000-400.000 entries each week on their WEB pages.

Then Risto Vaehäkainu, Finland told about "EDXC conferences - past, present and future" giving a very good picture of the EDXC history and the background for founding the EDXC, which took place at Anker's home. He also briefly mentioned the next conference in 2010, where four possibilities came up: Bulgaria, Lithuania, Sweden and Washington DC, USA. More about this later in my article.

The next speaker was Toshimichi Ohtake, Japan who had a lecture about "Japanese Radio World" seen from the Japanese point of view. Toshi also showed two slides, the first about "Good Happenings" in the world of shortwave radio, and the second about "Bad Happenings". It was quite interesting and suggestive.

The third and last speaker was Dario Monferini, Italy who told about "2009 Radio Travelling in Russia and other Eastern European countries", with visits in St. Petersburg, Moscow, Kazan, Samara, Yalta and Kiev, to mentioning a few destinations, and where he also visited some Russian DX-ers, and was DX-ing in various places on his trip.

In the afternoon we all went on a guided sightseeing tour with an English speaking guide to the Kemal Atatürk museum and mausoleum in the center of Ankara. [...] After the visit to the Kemal Atatürks museum we went to the old part of Ankara situated in the very center of Ankara, on a high hill, inside an ancient castle area surrounded by a tall wall. Here the life was

completely different, than in the rest of Ankara, with very old houses and narrow streets. It was a big contrast to the rest of the city, but quite interesting to have a look of this part of Ankara.

Then we drove back to hotel to continue the conference, with the subject "The future of EDXC". Tibor started to say that he went to the Swedish DX Federation Annual General meeting earlier this year to make some PR for the EDXC, and to ask if there was a Swedish club that could organize an EDXC conference, but no club was interested. Tibor would then contact World Wide DX Club in Bad Homburg, if they could arrange the a EDXC meeting in the future. It was agreed by Tibor and Risto, that if the meeting should be held in Germany, it should not be such technical as it was in 2003 in Koenigstein. The future meetings should be mixtures of lectures, debates and cultural sightseeing's, as it has been the case for the last many years now.

Then Risto again raised the four possibilities for the meeting next year, being, Bulgaria, Lithuania, Sweden and Washington DC as told. He then raised the advantages and disadvantages for each country:

Vilnius in Lithuania was the preferred place, because Risto had some good contacts over there, and this was maybe the last chance we had to see the Sitkunai transmitter site, before it eventually will be closed down later in 2011. [!]

Bulgaria had also its advantages; our club has some good contacts with our two Bulgarian members employed at Radio Bulgaria. [...] Sweden was out of the picture as written above, and Washington D.C. was no good either because of the long distance to the EDXC, despite that we are all very sure that Radio Free Asia and A.J. will make a very pleasant stay for us over there.

A working group by Tibor, Risto and Arto was then arranged, in order to work for the possibilities as Vilnius for the meeting next year. There were some discussions of the date for the next meeting, but the solution was June 11-13 which is during the Whitsun.

Tibor then told about the lack of attendance in this year's conference compared with last year in Dublin, where there were 48 participants. [...] Tibor was also sorry for the lack of response from the member clubs. It was decided that we should have more activity on our WEB page with the latest news, which should be really news, and not just "old stories" that already was published within the DX Community. [...]

After a fruitful meeting, we had about an hour before all participants and two representatives from TRT went to the traditional, but very tasteful Banquet Dinner at the hotel. At the end of the banquet Tibor officially shortly closed this year's conference. [...] George Brown thanked TRT for their hospitality and so did I, saying that if TRT would continue with that speed of increasing languages in their foreign services, in a few years time they will be bigger and having more languages than Radio Japan and BBC.

Thank you very much to the Voice of Turkey's great hospitality during our stay in Ankara. I will surely remember those days in Ankara with great joy.

(Bredahl Jorgensen-DEN, dswci DXW Oct 6)

So at 0900 we met at the reception floor the 20 participants to the EDXC 2010 meeting and the TRT Turkey delegation, the Meeting has been organized by TRT Voice of Turkey...

Mrs. Ufuk Gecim, head of the German section welcomed us! I enjoy the mid morning visit at Voice of Turkey headquarter. We arrived with two mini bus in around 20 minutes.

The visit was very detailed showing the radio Television Museum with original items of the Story of 40 years of TV activities.

After we went to the office of Mr. Hasan Harman, broadcast Directing Manager located at 5th floor with a great view of the outside area. Next the visit to the Internet room service IT Section.

After we went down to the 1st floor to see the different redactions, so I met Miss Esra of the Italian Redaction. <<http://www.trtitalian.com>> and Miss Ambra of English <<http://www.trtenglish.com>>

Also the Spanish section wanted to do the interview with me <<http://www.trtspanish.com>> so I sent greetings to the friends in Argentina and to Spain. Finally to speaks so many languages my mind becomed look like a Babel Tower ...hi !!!

Then we went to the mess hall located down floor with typical Turkish food together with the leading personnel.

In the early afternoon we transferred to the Emirlir transmission site situated about 60 km. south to Ankara. We had a complete view of the building facilities. In that transmitting center operates 16 men with turnover to cover all the day operations. Cakes and Tea hot was served ... but luckily for me also mineral water and iced little blocks water glaced... cause it was quite hot.

I had some exchange of ideas with the Lady deputy Chief Engineer frequency controller, explaining the frequency and time of the Italian transmission can't be heard cause no propagation but the Lady sounded look like I was talking in Sanscrit language hi !!!

We returned at Hotel, quite pleased for the day spent at Voice of Turkey facilities, and we found Carpets with advertising materials with schedules, pennants, and Turistic booklets about the beauty places located in Turkey to be seen.  
(Dario Monferini-ITA, with Christian Ghibaudo-F, playdx yg via dxld Oct 7)

(RT Drita Cico-ALB, via wwdxc BC-DX TopNews Oct 15)

ALGERIA 6248.33 RASD, 0032-0033\*, Oct 9, noticed off frequency again. Just caught the end of their transmission, signing off with their National Anthem. Fair to good.

RASD, at 0610-0655 UT on Oct 10, once again heard on this frequency. Tune-in to Qur'an. Lite music and Arabic talk at 0613 UT. Middle-East style local music. Arabic talk. Poor. Weak with rtty-utility QRM and some QRM from a weak Equatorial Guinea on 6250 kHz. Somewhat better reception after 0635 UT.  
(Brian Alexander-PA-USA, DXplorer Oct 9/10)

Polisario Front 6297.09 kHz. The cland. stn of the Polisario Front in Rabouni, Algeria, started this evening's b/cast moments ago, Oct 10, 1658 UT: tune, ID at 1702 UT followed by the fq. announcement, TS at 1703 UT, "natl." anthem and then another ann. for prayer; 54443, QRM from the utility stn, identified by Wolfgang Bueschel.

Best reception (to decrease QRM level) via the K9AY beamed south. The NE beam gets the strongest sig. from that uty. stn.

At this early hour (for us down here anyway), their // outlet of 700 kHz is not audible yet except for carrier detection. It should be fairly audible on my SW coast place.  
(Carlos Goncalves-POR, wwdxc BC-DX TopNews Oct 10)

6297.15 Polisario Front, Rabouni-ALG, at 0736-0803\* UT on 11 Oct'10, Arabic, talks, music 6 songs, freq. announcement at 0758 UT when they seemed to list just one fq instead of two, song and into the "natl." anthem; 55444 with the K9AY.  
(Carlos Goncalves-POR, wwdxc BC-DX TopNews Oct 11)

RASD Tindouf back on its morning channel 6248.33 kHz at 0600 UT, but both RASD Tindouf areas are hit heavily by European NATO digital UTE stations, G7D transmission mode, with data modems of 2400 Baud Stanag signals. This Stanag reference on 6243-6249 and 6294-6299 kHz. West-Saharies will not be happy there.

6248.295-approx. RASD Tindouf at 1940 UT, Oct 11, in Maghreb? Arabic with Saharui mx and songs at 1935 UT, Oct 11, weak signal S=4 only on Eton E1 set. Best on SYNC mode, due of heavy STANAG digital maritime navy signal in range approx. 6242 to 6249 kHz.  
(wb, wwdxc BC-DX TopNews Oct 10/11)

I assume that the Stanag signals are maritime communications. Above 6200 is part of their band, but such signals can be heard in many frequency ranges, and some are known to emanate from the Inskip station not too far south east from me. I'm not sure if it is still a Naval station these days but the tall masts and at least one log periodic plus much more can still be seen in situ.

(Noel Green-UK, to wb, wwdxc BC-DX TopNews Oct 9/10) yes navy comm. wb.

RASD - Polisario Front Radio this morning Oct 12. They were back on 6297 kHz this morning. Maybe they're only using 6250 kHz evenings because of the QRM from the (NATO?) uty. stn on 6297 kHz, but I don't think they'll keep this daily changes; most probably, they end up choosing 6250 kHz or some other fq.

(Carlos Goncalves-POR, wwdxc BC-DX TopNews Oct 12)

RASD Tindouf Rabouni tonight Oct 12 on 6297.13 kHz at 1815 UT, accompanied digital STANAG maritime noise still on 6295.1 to 6299.3 kHz approx.

RASD Tindouf Rabouni on Oct 14 morning on 6297.17 kHz at 0630 UT.  
(wb, wwdxc BC-DX TopNews Oct 12/14)

Others keep reporting SASASAM on alternate frequency 6248+, but I keep missing it. Oct 11 at 2313 I do detect a poor signal talking on 6248.24 kHz approximately, using the 40-Hz steps with BFO on the DX-398, but margin of error could put it .1 kHz higher as colleagues have measured more accurately. And nothing on 6297.1 kHz. Next check at 0015 Oct 12, still poor and can't tell if it is Arabic, or as usually reported in final semihour, Spanish.

(Glenn Hauser-OK-USA, dxld Oct 12)

12174 SRDA is still putting out horrible loud extremely distorted spur, Oct 9 at 2246 UT, also much weaker 11356 kHz. Checking the fundamental 11765 kHz, seemed to be a YL gospel huxter alternating with David Miranda, and much lower modulation level.  
(Glenn Hauser-OK-USA, dxld Oct 13)

5990 Radio Senado, Brasilia DF, \*0851-0915, Oct 14, sign on with Portuguese talk and lite instrumental music. Local pop ballads. ID announcements at 0901-0902 UT and local pop ballads. Good. Strong.

9587.67 Super Radio Deus e Amor, 2335-2355, Oct 14, Portuguese religious talk. Announcements. Promos. Poor with adjacent channel splatter. //

11764.98, 6070. // 6060 - weak under Argentina. // 9565 - weak under noise. (Alexander-PA)

15190.49v Radio Inconfidencia? 2125-2150, Oct 14, Inconfidencia reactivated? Tentative with Portuguese talk. Brazilian style music. Was on 15190.49 kHz at tune-in, drifting down to 15190.12 kHz by 2150 UT. Fair signal. I was tuning around looking for Radio Africa but heard this instead. No sign of Radio Africa.  
(Brian Alexander-PA-USA, DXplorer Oct 15)

Inconfidencia back on 15190 kHz.  
Brazilian DXers in radioescutas are reporting that Radio Inconfidencia, Belo Horizonte, Brasil, has finally reactivated 15190 kHz, as of 1700 UT Oct 14. Reports, please. Possibly could be // to 6010 kHz if that be active.

15190 FAMILY RADIO 2200-2400 Portuguese 100 142 Okeech.FL-USA WYFR  
15190 FAMILY RADIO 0000-0100 English 100 142 Okeech.FL-USA WYFR

At 2352 UT Oct 14, there is definitely a het on WYFR, approximately 15190.2? kHz. Not there before and presumably R. Inconfidencia. (And YFR continues in Portuguese past 0007 UT, not switching to English at 0000 as in Aoki list). YFR should go off at 0045 UT, so can we hear Belo Horizonte then? BTW, HFCC is also wrong with YFR in Spanish at 2200-0100 on 15190 kHz.

[Later:] Yes, in the clear at 0046 UT as I hear a bit of classical music, seems Mozart, before announcement, and then more music. Now with WYFR out of the way it's easier to count the 40-Hz clix on the DX-398 once synched with WWVH 15000. It's about 15190.5 kHz. Poor signal, with fading.

Pleased to hear classical music on this! But it's not the full format.

AM 880 is indeed in a classical music hour, per schedule and then heard online:  
<[http://www.inconfidencia.com.br/modules/programacao/players/pop\\_am.php](http://www.inconfidencia.com.br/modules/programacao/players/pop_am.php)>

"Mestres da Musica, 21h as 22h, Com Pedro Lobato, Biografia e obras mais conhecidas dos grandes genios da musica classica."

Final piece of music sounded like someone's national anthem. I could even hear scratches on the LP (webcast, not SW). Outro at 0100 UT plugs this show as audible worldwide on the website, but no mention of SW!

Here's the AM 880 program schedule, but you have to click on each show to find out the times (UT -3). Seems to be a 'full-service' station with a little of everything, including news, sports, talkshows, and some other classical music. News and ads followed after 0100 UT.

Still listening to webcast, 0107 UT full ID includes ZYE521 on 6010 kHz AND ZYE522 on 15190 kHz, as well as 880 AM and 100.9 FM. (I suspect they have been announcing 15190 kHz all along despite years of inactivity.) There are separate AM and FM streams, and apparently different programming tho some of the shows are on both at different times. WRTH says AM 880 kHz is ZYL275, one of a handful of Brazilian MW stations rated 100 kW, while 15190 kHz is only 5 kW. Will it be running 24 hours? What is the schedule on 6010 kHz? It has big QRM problems from Canada, Cuba, Mexico, Colombia

for starters.

This is the only Brazilian active on 19mb, tho there have been occasional reports of 15325 kHz, R. Gazeta. It's also the highest Brazilian SWBC frequency, unless R. Cultura Sao Paulo ever reactivates 17815 kHz.

Link to the program schedules:

<[http://www.inconfidencia.com.br/modules/programacao/index.php?op=homePrograma&prog\\_id=10033](http://www.inconfidencia.com.br/modules/programacao/index.php?op=homePrograma&prog_id=10033)>

(Glenn Hauser-OK-USA, dxld Oct 15)

15189.65 R. Inconfidencia on 19 mb. They're now airing the folk music prgr Sertanejo Moderno. Fq. measured here 15189.65 kHz, rating 25433, // 6010 kHz under moderate to strong adjacent interference.

(Carlos Goncalves-POR, wwdxc BC-DX TopNews Oct 16)

Also 880, 6010 kHz AM.

<<http://www.inconfidencia.com.br/modules/liaise/>>

Radio Inconfidencia, Av. Raja Gabaglia, 1666 - Gutierrez - Cep: 30441-194 Belo Horizonte / Minas Gerais - Brazil. Telefax: (31) 3298-3400

TX location unknown yet. Radio Inconfidencia, 880, 6010, 15190 kHz ?? probably at 20 00 21.95 S 43 58 04.96 W

BULGARIA Google Earth imagery. Some high resolution place.

Shumen Salmanovo 747 kHz at 10 kW.

Could be at 43 09 N 26 57 35 E ?

(Mauno Ritola-FIN, wwdxc BC-DX TopNews Oct 13)

To astonish how many transmitters put on the NortEastern part of Bulgaria by the government.

I think Shumen Salmanovo is a radio navigation system for aircraft ?

Like VHF omnidirectional radio range

<[http://en.wikipedia.org/wiki/VHF\\_omnidirectional\\_range](http://en.wikipedia.org/wiki/VHF_omnidirectional_range)>

43 11 19.36 N 26 58 24.31 E or communications tower?

and the new 3mast aerial could also be an old jamming site against Radio Free Europe Bulgarian service, - or even RL Russian/Ukrainian for afternoon / night / morning jamming towards Black Sea coast area, Caucasus, Georgia, Abchasia, Ossetia.

BUL Shumen Salmanovo 747 kHz 10 kW, of 1987. 3 masts

43 08 55.22 N 26 57 37.09 E

(wb, wwdxc BC-DX TopNews Oct 13)

CANADA 6070 CFRX Toronto at 1209 UT with discussion of candidates for November mayoral race. Poor, but good at 1306 UT with "Your Money Watch", "Newstalk 10-10" ID and ads.

(Harold Sellers-BC-CAN, DXplorer Oct 14)

6070 CFRX modulation finally seems back up to par, Oct 14 at 0630 UT with talkshow phone number 877-876-PHIL --- yes, now carrying the syndicated Phil Hendrie Show, and I guess it's live, at 10 pm - 1 am PT, i.e. 05-08 UT, soon to be 06-09. However, signal soon faded. Next check at 1323 UT,

CFRX still audible over daylight path.  
(Glenn Hauser-OK-USA, dxld Oct 14)

6159.98 CKZU (presumed site), 0804, English, fair with CBC News. Best in LSB to escape weak het on high side. 6 October.  
(David Sharp-NSW-AUS, dxld Oct 13)

Similar tiny signal on 6159.98 kHz an odd signal of 20 Hertz at 0410 UT Oct 13. Russian Radio Rossii station are seldom odd frequency, so seemingly one of the two Canadian domestics slightly odd here.  
(wb, wwdxc BC-DX TopNews Oct 13)

It's the one from Newfoundland.  
(Rik van Riel-USA, hcdx Oct 13)

CHINA 6200 Xizang PBS via Lhasa, Tibet, 1530 UT on Oct 10. Thanks to Sei-ichi and Hiroshi for the timely tip about this reactivation! The "Holy Tibet" show with their usual format; starts with distinctive laughing/chant; "This is China Tibet Broadcasting English program, Holy Tibet. Holy Tibet will take you to visit the roof of the world. Holy Tibet is the window into the life of Tibet.

If you are interested in Tibet and want to learn more about the land, the people and the culture, please join us at Holy Tibet"; sanitized news; "A spokesman for the Tibetan Autonomous Regional Transportation Department said on October ..."; items about transportation projects in Tibet and the amount of "renminbi" being spent on them; segment of traditional Tibetan singing; 1548 UT "Tourism of Tibet"; followed by more Tibetan singing till program ended at 1600 UT; mostly poor with slow fading downwards; in a month or two this should have fair reception for those of us on the West Coast.

11605 with combination of Firedrake and echo CNR1 programming jamming against RFA (via Tinian Island); at 1358-1400\* UT on Oct 10. As I have noted before, when China seriously wants to prevent a story from being heard, they use this combination of both jammers, just to be positive no one gets the message. The RFA programming, in Tibetan, that they wanted blocked would certainly have covered the story of the Prime Minister of the Tibetan government in exile commenting about the significance of Liu Xiaobo's Nobel Peace Prize; the award is an encouragement for the Tibetans in Tibet. At 1400 UT clear ID in English for RFA and continued on in Vietnamese, with no jamming. China definitely did not want the folks in Tibet to hear this story.  
(Ron Howard-CA-USA, hcdx Oct 10)

900 CNR Burmese has been relayed since 16 Oct 2009 for listeners in Burma by Dehong PBS (900 kHz, 50 kW) in Yunnan Province, with three daily transmissions of one hour each at 0200, 0700 and 1400 UT  
(source: <[www.dehong.gov.cn/en/localnews/2009/1109/en-29501.html](http://www.dehong.gov.cn/en/localnews/2009/1109/en-29501.html)>

I can confirm hearing the 1400 UT transmission on 9 Sept 2010.  
(Alan Davies)

1098 A strong signal in Tibetan on 1098 kHz was noted in early Sep 2010, // with Xizang PBS Lhasa 594 kHz. It's possible that 1098 kHz is a new Xizang PBS frequency, or that it's something else and both it and Lhasa happened to be relaying CNR in Tibetan when I heard them. Perhaps 1098 kHz could be Golmud relieved from jamming duties and shifted from 1134 kHz, now that AIR's Mogra transmitter on 1134 kHz is inactive and no longer carrying AIR External Services in Tibetan.  
(Alan Davies)

1098 kHz noted at 1955 and 2145 UT with CNR1 and audio in reasonable synchronism with Golmud 4800 kHz. Also from 2155 and at 1530 UT with CNR11 in Tibetan, not in // with Lhasa shortwave. I agree with Alan that this seems be Golmud ex1134 kHz. The Russian stations in the Vologda region on this frequency seem to be off the air.  
(Olle Alm, ARC)

1134 The 1200 kW CNR-1 transmitter on 1134 kHz at Golmud seems to have been inactive for several months at least. My last note of hearing it is from Sept 2009. (Alan Davies) See above item - ed.  
(via Olle Alm, ARC MV-Eko Oct 13)

CHINA [and diverse] Firedrake and Echo jamming from China.  
11 channels of Firedrake (= FD) jamming noted today Oct 15th.  
EJ = echo jamming.

7365 TERRIBLE channel. 1500-1705 UT CBSC Taiwan sce, plus CNR1 regular program, plus 2 x EJ jamming, plus FD music !  
7595{!} FD mx, 5 kHz up against SOH via Yerevan-ARM 1530-1600 UT on nominal 7590, latter not heard here.  
9370 EJ at 1505 UT RFA Tibetan Dushanbe-TJK. Same bassy buzz jammer as of against BBC Uzbek 15330NAK 1300-1330.  
9415 FD mx underneath VOA Uzbek via Tinang 1500-1530 UT. Uzbek ahead, weak Firedrake mx underneath.  
9455 TERRIBLE channel. Three progs at least at 1500 UT, S=9+10dB, RFA Mandarin SAI 1500-2200 UT, CRI Kunming regular in Chinese, CNR echo jammer.  
9605 EJ at 1348 UT, BBC SNG Kranji in Mandarin, S=8-9.  
9670 EJ against VOA Uzbek via Udonthani-THA, 1500-1530 UT. But ahead of these noted Voice of Russia via Dushanbe-TJK in Hindi, S=9+10dB.  
9845 EJ at 1345 UT, S=9+10dB. VoA Mandarin SAI/TIN at 1000-1500 UT. S=9+10dB.  
9985 EJ at 1342 UT, S=7, VoA Saipan in Mandarin. 1300-1400 UT.  
11590 FD + EJ jamming S=7-8, against RFA Kuwait in Tibetan, 1200-1600. FD is weak, EJ is stronger.  
11605 FD mx S=9+10dB against RFA Tinian in Tibetan, 1100-1400 UT  
11665 RTI Taiwan Tanshui, covered by an echo jammer, S=8 at 1338 UT.  
11780 FD + EJ jamming, against VoA Uzbek Wertachtal, S=8-9 1500-1530 UT.  
11785 2xEJ jammer against VoA Mandarin Tinang-PHL 1100-1400 UT, S=8-9  
11805 2xEJ jammer against VoA Mandarin, UDO/TIN at 1230-1500, S=7-8.  
11990 2xEJ jammer against VoA Mandarin, 1000-1500 via TIN/NVS-RUS. S=9+15dB at 1335 UT.  
12040 2xEJ jammer, S=7-8, against VoA Tinang-PHL 1000-1500, 1333 UT.  
13755 FD + EJ jamming, S=9+30dB, nothing heard here of IBB KWT Uzbek due of sidelobe angle.  
14700 FD mx at 1020 UT, S=6-7 weak.  
15185 EJ at 1525 UT S=9+20dB, jamming against VoA Uzbek, which is low

underneath.

15250 EJ + some ignition spark like type jamming against VoA Mandarin from Tinang-PHL at 1055 UT Oct 16, S=9+20dB signal.

15265 EJ + some ignition spark like type jamming against CBS2 Taiwan Tanshui 1300-1400 UT, noted at 1320 UT.

15285 BBC Mandarin from Kranji-SNG. at 1318 UT, is totally covered by at least 2-3 EJ stations, S=9+20dB, 1300-1530 UT.

15330 BBC Uzbek from NAK-THA - but BBC Uzbek content not traced here. FD + EJ jamming - both S=9+30dB powerful. Special bassy buzz EJ jamming, later that day at 1500-1530 on 9370 kHz channel.

15548 VoTibet Dushanbe-TJK 1230-1430 UT, S=9+10dB at 1314 UT, stronger than FD jammer on even 15550 kHz. Only fair S=6-7.

15670 FD + EJ jamming, against VoA Tibetan from Al Dhabbaya at 1250 and 1315 UT. VoA is ahead of the jammers, S=9+20dB. // 13830DB-TJK

15850 FD mx, against SOH Mandarin at 1025-1100 UT, S=5-6. Also 1300 UT, S=4 tiny.

17515 BBC Uzbek from NAK-THA, EJ - both equal level, S=9+30dB powerful.

17695 BBC Uzbek from Rampisham-UK, not jammed, at least not here in EUR S=9 signal.

21705 EJ jamming, S=9 signal at 07-09 UT against VoA Mandarin via Udonthani-THA at 0850 UT Oct 16.

(wb, wwdxc BC-DX TopNews Oct 15)

CROATIA 3985.09 Croatian Radio from Zagreb Deanovec slight odd again. S=8 - 9+10dB at 0420 UT Oct 13, morning mass, Gregorian like singer.

(wb, wwdxc BC-DX TopNews Oct 13)

TV Tip: Funkstille.

RBB sendet am 21. Oktober um 22.45 hrs MESZ/CEST unter dem Titel "Funkstille" einen Bericht über die Geschichte des Radios in der DDR. Eine Wdh. von 2009, so die TV Zeitschrift "Hoer Zu".

(Hans-Juergen Karius-D DL4YBP, A-DX Oct 16)

BBC World Service can stay on FM in Berlin. They have even been allowed to add up to two minutes of commercials each hour to cover the transmission costs, at their explicit request I think, speaking volumes about the apparently bleak prospects of the service. But they will move away from 90.2 MHz, which is the oldest FM usage that still exists in Berlin, in force for more than 40, rather 50 years.

The new BBC frequency in Berlin will be 94.8 MHz from the Schaeferberg tower in Berlin-Wannsee, until now used by Radio Metropol, a commercial Turkish-language station. Radio Metropol of course seeks to reach the Turkish community in Berlin-Neukoelln and Berlin-Kreuzberg, thus wanted to move to 101.9 MHz which reaches these districts better although running a mere 0.5 kW.

Jazz Radio is still in business, with a new operator instead of the old one that went bankrupt, and will move from 101.9 to 106.8 MHz, where the merry-go-round completes: Radio Teddy moves from 106.8 to 90.2 MHz. However, both Jazz Radio and Radio Teddy (for which it is apparently a challenge to run its childrens format from advertisement revenues) got licences for two years only.

The MABB media release also states that they regret to not being able to offer new allocations, because some very interesting and promising concepts have been proposed. This could be read as a hint at RFI, which still occupies 106.0 MHz, since January violating the conditions of its licence by no longer offering the required programmes in German. The RFI licence expires in 2012, and under these circumstances their chances for getting a renewal in a competitive process appear to be non-existent.

(Kai Ludwig-D, dxld Oct 16)

GREECE NO RECEPTION ON 15630 / 7450 kHz.

Good afternoon Mauno et al:

For over a month, I have not gotten much of a signal from ERA 5, but a lot of noise, if there is anything on 15630 kHz, when I monitor it from 2000 until 2250 UT even though it is directed to Europe, The Atlantic, North America, The Panama Zone, and South America at an azimuth of 285 degrees. The same thing is true of 15650 kHz from 0000 until 0350 UT, but it is directed to Australia and The Middle East at an azimuth of 105 degrees and that is understandable. How is 15630 kHz doing in Finland and the other parts of Europe? Perhaps a frequency change is needed. Regards,  
(John Babbis-USA, hcdx / wwdxc BC-DX TopNews Oct 12)

From the below message that I sent to monitors of The Voice of Greece in Finland, Germany, and England, I have received the following responses which I have forwarded to Babis, but nothing from him, not even an acknowledgment that anything was wrong at Avlis. This disappoints me very much.

(John Babbis-USA, wwdxc BC-DX TopNews Oct 14)

The third transmitter unit of VoGRC at Avlis is totally OFF at present.

Nothing heard on 15630 kHz, nor 15650 kHz at 1805 UT tonight Oct 12 here in CeEUR. Switched the Eton E1 to SSB reception mode, not even a tiny carrier heard on 19 mb. I guess the 3rd tx in Avlis is OFF at present totally. At 1800 UT 9420 kHz heard loud and clear as usual, S=9+30dB powerful, and Thessaloniki regional on 7450 kHz too similar strength.

At 0355 UT noted 9420 kHz on air, fair S=5-6 signal increased steadily to S=9 at 0420 UT Oct 13.

VoGreece on 7475 kHz S=9+10dB signal at 0350 UT, scheduled 2300-0450 UT. From 0500-1000 UT I'll check 11645 kHz multi-lang R Filia channel.

3rd channel 7450 kHz scheduled 0400-0550 UT OFF air totally. Also scheduled 15630 0600-2250 UT, 15650 2300-0350 UT are out of service at present.

(wb, wwdxc BC-DX TopNews Oct 12/13)

John ... I made a check today (Wed, Oct 13) at 0945 UT and there is no trace of 15630 kHz. There is some weak station using 15650 kHz but it's not Greek. 11645 kHz is on air and sounds okay, but 9420 kHz may be faulty - there is a loud "bubbling/rumbling" sound causing distortion. I thought it might be a utility transmission of some kind, but no, it stopped when the transmitter was switched off a minute or so after 1000 UT. So they could have problems at Avlis. Will check later.

(Noel R. Green-UK, wwdxc BC-DX TopNews Oct 13)

Dear John, after an absence of some years here I am again assuming frequency management responsibilities.

On the current subject I was informed that indeed one of Avlis transmitters, the one assigned mainly to 15 MHz band frequencies, has been, since September 24,

**OFF THE AIR**

due to equipment malfunctioning. Maintenance colleagues estimate that the transmitter will be repaired and back ON AIR (hopefully) early next week.

I will keep you informed, accordingly.

Best regards,  
Demetri Vafeas, Dipl. Electrical Engineer  
Supv., Frequency Management Dept., R. & D. Directorate  
General Directorate of Technical Services, ERT S. A.

ITALY 1512 Ondamedia Broadcast is a new Italian MW station. The Mosfet transmitter has a power of 600 W but currently its output is limited to 350-400 W into a vertical 1/8 wave antenna. In the coming future the ground system will be improved, with more radial wires. The transmitting site is San Pietro in Casale, between Bologna and Ferrara (northern Italy). At present the station is operating from 0700 to 2330 hours local time [in winter 0600-2230 UT].

The letterhead indicates also a frequency of 1503 kHz, possibly for the announced future DRM transmissions. Programs will be of local nature, with music, news and cultural contents. The head of the station is Roberto Furlan, an engineer. The e-mail address is

<ondamediabroadcast @ gmail.com>

(Fabrizio Magrone-ITA, via MWDX Sept 2; via Olle Alm, ARC MV-Eko Oct 13)

In the next few months the 600 watt transmitter will move to 1503 kHz. A 1200 watt transmitter will be used for 1512 kHz, probably with a new vertical 1/4 antenna. And according to the station owner, they are on the air 24h and not 0700-2330 LT. But that is something I cannot verify from here of course. (Herman Boel-BEL, via mwcircle Sept 2; via Olle Alm, ARC MV-Eko Oct 13)

ITALY {ITALIAN SOCIAL REPUBLIC} (Historical): Glenn, I can confirm that the Italian fascists broadcast from Munich{Ismaning}, following Mussolini's rescue from imprisonment by German special forces. There was also for a time a 'black' version of this service run by the British in order to create confusion amongst fascist supporters.

The Munich broadcasts were reported in the BBC Monitoring Service bulletin "Daily Digest of Foreign Broadcasts", which is available in a number of UK libraries. I think the Munich broadcasts were a stop-gap measure by which Mussolini, by then virtually a German puppet, could get his message across to the probably small number of Italians who still supported him. Eventually, though, the Mussolini regime was able to resume broadcasting on Italian soil from the so-called "Italian Social Republic" (also known as the Salo Republic).

The above-mentioned BBC publication confirms that there was a foreign service on shortwave from Mussolini's rump "republic". Interestingly, one of the shortwave services was a clandestine station known as Radio Himalaya (or Himalayas), which broadcast to India in Indian languages and English and claimed to speak for an Indian liberation movement. This "station" had previously broadcast from Rome and was run by an Indian Moslem revolutionary known as Iqbal Shedai.  
(Roger Tidy-UK, dxld Oct 10)

More on the British 'black' version of the pro-Mussolini broadcasts from Munich Ismaning. Sefton Delmer, who was in charge of the operation, writes the following in his "Black Boomerang" (London, 1962, pages 104-106):

"Our counterfeit of the 'Radio of the Italian Fascist Republic' required much technical skill ... It was Goebbels himself who presented us with the opportunity for a try-out against the Italians. Otto Skorzeny and his SS commandos had recently rescued Mussolini from his Italian anti-Fascist captors and enabled him to set up a Fascist Republican Government in North Italy. Goebbels immediately provided him with a radio station so that he could continue to inspire the Italian public with his 'dynamism'."

Delmer goes on to explain that, using two Italian prisoners who had previously been professional announcers, the British broadcast their fake version of the station on a neighbouring frequency. While much of the material was a straight relay, at certain appropriate points they would replace the original programming with their own material but in such a way that listeners would not be aware of the switch. This was designed to turn the Italians against Mussolini and included material that was 'rude and hostile to His Holiness the Pope'.

According to Delmer, the original Munich broadcasts were on shortwave but, because of the British 'black' operation, Goebbels had them transferred to the regional medium-wave station at Munich, 'to the great indignation of the Bavarians who were furious at losing their own radio entertainment'.

MONACO Internationaler Partner des ERF sendet seit 50 Jahren aus Monte Carlo.

Am 16. Oktober 1960 strahlte TWR die erste Sendung aus.

Seit 50 Jahren sendet die Radiomission TWR ueber Kurzwelle aus Monte Carlo (Monaco). Am 16. Oktober 1960 wurde die erste Sendung ueber einen 100 Kilowatt starken Sender ausgestrahlt. Dazu nutzte TWR die einst von den Nationalsozialisten errichteten Sendeanlagen auf dem Mount Agel in Monte Carlo.

Wo einst politische Propaganda zu hoeren war, wird seitdem die christliche Botschaft verbreitet. Urspruenglich war der Sendebeginn fuer den 1. Oktober geplant, verzoegerte sich aber aus technischen Gruenden.

TWR, frueher Trans World Radio, wurde von dem amerikanischen Missionar Paul E. Freed (1918 - 1996) gegruendet. Vom Februar 1954 bis Ende 1959 sendete TWR ueber die "Stimme von Tanger" in Marokko. Als die internationale Zone in Tanger an Marokko zurueckgegeben wurde, musste TWR den Standort aufgeben. Bis dahin hatte TWR Sendungen in 24 Sprachen im Programm, darunter auch Deutsch. Bereits Mitte 1959 konnte Freed mit Radio Monte Carlo einen Sendevertrag abschliessen. Nach einem Dreivierteljahr Pause konnte das christliche Radio wieder europaweit auf Sendung gehen.

1952 nach der Gruendung von TWR lud Ralph Freed den deutschen Missionar Helmut Gaertner zur Mitarbeit ein. Gaertner arbeitete fuer die rund 30000 evangelischen Christen und ihre Gemeinden in Spanien. Da der Aufenthalt fuer Auslaender in Spanien nie fuer lange Zeit gewaehrt wurde, arbeitete er von Marokko aus. Gaertner erklarte sich sofort bereit, fuer die Radiomission eine deutschsprachige Abteilung aufzubauen. So kam es, dass ab 1956 auch in deutscher Sprache zunaechst aus Tanger gesendet wurde. Im Oktober 1959 gruendete sich auf Bestreben von Gaertner im mittelhessischen Wetzlar ein deutscher Zweig unter dem Namen "Evangeliums-Rundfunk" (ERF).

Die erste Sendung aus Monte Carlo in deutscher Sprache sollte mit dem Sendebeginn in Monte Carlo am 2. Oktober 1960 ausgestrahlt werden. Doch technische Probleme fuehrten dazu, dass erst am 5. Februar 1961 Sendestart fuer die Programme aus Wetzlar sein konnte.

Heute sendet TWR aus Monte Carlo in insgesamt 16 Sprachen. Deutsch wurde Ende Oktober 2007 nach mehr als 45 Jahren ueber Kurzwelle eingestellt, da der ERF inzwischen ueber andere Verbreitungswege wie Satellit, Kabel, Mittelwelle und Internet verfuegt.

Fuer weitere Informationen steht Ihnen der Pressesprecher, Michael vom Ende, zur Verfuegung,

MYANMAR 5770 on 16 Oct, at 1448 UT, Myanmar Defense Forces Radio, with talks by man in presumed Burmese interspaced with light female vocals. Fair signal with moderate fading, but only about 42% modulation as measured here. I had to use synchronous AM, and could still barely make out what was going on. No QRM. Supposed to be on until 1530 UT. Go get 'em! (Albert Muick-AFG, hcdx Oct 16)

MW Schedule of MRTV (Radio Myanmar) monitored in early September: National (Main Sce) on Yangon 576 kHz (200 kW) and Naypyidaw 594 kHz (200 kW): 0030-0730, 0930-1630 UT. English prgr: 0230-0330, 0700-0730, 1530-1630 UT. Yangon audio is delayed a second or two behind Naypyidaw.

Music Sce (Padauk Myay Sce) on Naypyidaw 711 kHz (400 kW): 2300-0130, 0730-1000, 1130-1530 UT. Also on Yangon 576 kHz 2300-0010v.

The Naypyidaw transmitter must be the one first reported by Jose Jacob in February on 693 kHz, now shifted to avoid interference with Dhaka.

Yangon Sce (I'm not sure what the official name of this service is) on Yangon 729 kHz: 2330-0530, 0730-1500 UT. I haven't seen any confirmation of the power for this transmitter, but the signal is similar in strength to 576 kHz so may well be 200 kW also. At 1330-1500 UT 729 kHz carries distance learning programmes in parallel with 5915 kHz. (Alan Davies-INS; via Olle Alm, ARC MV-Eko Oct 13)

NETHERLANDS [non] Radio Nederland Wereldomroep winter B-10 season  
RNW Dutch in total:  
<<http://cdn.sites.radionetherlands.nl/pdf/freq/RNW-NL-FreqFolder-Winter20101.pdf>>  
(Oct 13)

NETHERLANDS 828 Radio 10 Gold kehrt zurueck auf Mittelwelle.  
Eine kleine Ueberraschung von Radio 10 Gold: die senden ab Montag (ab 10  
Uhr 10) wieder auf Mittelwelle, und zwar auf der 828 kHz. Dafuer wird  
immer noch den Sender bei Heinenoord verwendet. Ich nehme an Tagsueber  
wird 20 kW gefahren und nachts 5 kW.

Empfang ist hier in Friesland recht gut (im Auto sowie auf dem Tecsun PL-  
380), aktuell ist der Sender on Air mit einer Testschleife von Arrow  
Classic Rock (seit Monaten).

Zwei Sachen interessieren mich: wird der Marktanteil von Radio 10 Gold  
jetzt steigen (aktuell 1,9%) und wird das Signal so kaputt komprimiert wie  
auf der 1395 kHz?  
Schoenen Sonnabend noch.  
(Wian Stienstra-HOL, A-DX Oct 16)

NIGERIA 7350 Radio Nigeria Abuja in En, SIO 252-3, at 0647 UT Oct 11.  
... from 0600 UT onwards difficult because of TWR 7355 kHz interference.  
(Nils Schiffhauer DK8OK, Excalibur& SDR-IP/GPS& Perseus, A-Dx Oct 11)

15120 Voice of Nigeria, at 0715 UT Oct 11, on S=9+20dB signal level. But  
audio feed is a little bit disturbed. Hard to believe that this distortion  
coming via new Thomson units at new Abuja site.  
(wb, wwdxc BC-DX TopNews Oct 11)

If 7350 kHz is the new Abuja site, why isn't it an overpoweringly strong  
signal? (gh, dxld Oct 13)

Glenn, I featured the refurbishing work at both Abuja sites in many items  
before.

Thomson erected a new station with 3 x 250 kW SW units and various  
antennas across the street at Abuja Lugbe, for Voice of Nigeria. Work  
finnished already in late November 2009 !.

Then they had also worked out an expertise for the old Radio Nigeria  
regional domestic SW site at Abuja Gwagwalarda with 2 x 100 kW domestic  
power - in 2010 -, at the MW 909 kHz location.

Some 33 kilometers westwards at 08 55 44.42 N 07 04 22.33 E

<[http://maps.google.de/maps?f=q&source=s\\_q&hl=de&geocode=&q=08%C2%B055%2744.42%22N+07%C2%B004%2722.33%22E&sll=51.151786,10.415039&sspn=18.754035,55.942383&ie=UTF8&ll=8.930162,7.073704&spn=0.003598,0.006829&t=h&z=18](http://maps.google.de/maps?f=q&source=s_q&hl=de&geocode=&q=08%C2%B055%2744.42%22N+07%C2%B004%2722.33%22E&sll=51.151786,10.415039&sspn=18.754035,55.942383&ie=UTF8&ll=8.930162,7.073704&spn=0.003598,0.006829&t=h&z=18)>

SW antenna mast seen on the lower left corner of the area.

According to the masts direction seen in Goggle Maps, the dipol direction  
of this domestic network is approx. 85/265 degrees, not the best angle to  
reach Europe properly. The Albions in GB&IRL have always a benefit to

listen WeAF stations, due of the long path on salt water anyway ...

Refurbishing work at Abuja Gwagwalarda SW installations by the Thomson staff ended now - seemingly - in Sept 2010.

Because Noel heard the station on new 7350 kHz on Sept 26, 2010 again.

73 wb

(wb, wwdxc BC-DX TopNews Oct 14)

UNIDENTIFIED. The unID I reported to you on 7350 kHz is still being heard - audible might be a better word to use. But on the 29 Sept. at 0633 UT it was better than usual, and a man and woman were heard speaking in English. But I could only copy occasional words due to a still weak signal and local noise. I tried to compare with other broadcasts that have English at that time but didn't find anything comparable. The signal descended into the mush around 0640 UT or so, and has not been as well heard again since. It was traceable today at 0615 UT but didn't improve. (Noel Green-UK, dxld Oct 1, 2010)

Ah, Ah ... so that's why 7350 kHz is only producing such a weak signal here in western Europe. The beam angle is ideal for most of Nigeria but not for Europe. And BTW - what can have happened to the other 100 kW transmitter at Abuja Gwagwalarda ? Perhaps dismantled for spares?

Thanks for this interesting information Wolfy. 73 from Noel.

(Noel R. Green-UK, wwdxc BC-DX TopNews Oct 14)

I guess one 100 kW unit is used in service, the other as operating standby reserve. (wb)

RUSSIA Test transmissions of KRTPC from Armavir/Krasnodar in DRM to WeEUR on 6050 kHz in various languages. Transmissions are not broadcast every day and are of varying lengths between 0400-1600 UTC.

(R BULGARIA DX MIX News, Ivo Ivanov, via wwdxc BC-DX TopNews Oct 13)

What's KRTPC? (Glenn Hauser-OK-USA, Oct 14)

KRTPC is the Krasnodar branch of the Russian transmitter operator RTRS. The DRM tests from their Tbilisskaya site run already for some time, earlier on 75 metres, with program content reportedly being Vesti FM. The DRM consortium apparently threatened this information as confidential for whatever reason, thus these Tbilisskaya tests remained widely unknown.

(Kai Ludwig-D, dxld Oct 16)

KRTPC is the short call of RTRS "Rossiiskaya Televisionnaya and Radioweshatelinaya Set" branch at Armavir Tbiliskaya, in Krasnodar Kray. Called at present under "Kubanskiy radiotsentr".

View of antenna array at Sura site.

<<http://sura.nirfi.sci-nnov.ru/Photogalery/Photogalery.html>>

The Sura Ionospheric Heating Facility, located near the small town of Vasil'sursk about 140 km eastward from Nizhny Novgorod in Russia, is a laboratory for ionosphere research. Sura is capable of radiating about 190 MW, effective radiated power (ERP) on short waves. This facility is operated by the radiophysical research institute NIRFI in Nizhny Novgorod. The Sura facility was commissioned in 1981. Using this facility, Russian researchers studied the behaviour of the ionosphere and the effect of generation of low-frequency emission on modulation of ionosphere current. In the beginning, the Soviet Defense Department mostly footed the bill. The American HAARP ionospheric heater is similar to the Sura facility. The HAARP project began in 1993.

Transmitter room at Sura facility.

The frequency range of the heating facility is from 4.5 to 9.3 MHz. The facility consists of three 250 kW broadcasting transmitters and a 144 crossed dipole antenna-array with dimensions of 300 m x 300 m.

At the middle of the operating frequency range (4.5 - 9.3 MHz) a maximum zenith gain of about 260 (~24 dB) is reached, the ERP of the facility is 190 MW (~83 dBW).

<<http://www.ann-geophys.net/15/issue7.html>> page 935. First HF radar

measurements of summer mesopause echoes at SURA. Page(s) 935-941.

<<http://www.ann-geophys.net/15/935/1997/angeo-15-935-1997.pdf>>

SURA radar for atmospheric studies. Observations of mesospheric echoes were carried out at the SURA facility of Radiophysical Research Institute (NIRFI, Nizhny Novgorod, Russia). It is situated a few kilometers from the small town of Vasil'sursk about 140 km eastward of N. Novgorod (geographical coordinates 56.13 N, 46.10 E). The Mesospheric radar was created at SURA using the heating facility antenna array designed for artificial modification of the ionosphere by powerful HF radiation. This antenna array consists of 12 x 12 crossed dipoles divided into three identical sub-arrays in the magnetic north+south direction (about 9deg to the east from the geographical north) and can be operated in the frequency range of 4.5+ 9 MHz with both left and right circular polarizations. It is steerable in the north+south direction up to 40deg from the vertical (Belov et al., 1983). The main parameters of the antenna array are shown in Table 1.

Each antenna sub-array is fully independent, and one of the sub-arrays is used as a transmitting antenna, while another is used as a receiving antenna. This same radar was used for magnetospheric sounding (Gurevich et al., 1992) with one of the main heating transmitters. These broadcast transmitters were designed for continuous operation and were not very suitable for our mesosphere investigations, due mainly to high electricity costs and limited pulse characteristics. Therefore another transmitter was connected to one of the antenna sub-arrays for mesosphere sounding, namely a pulsed transmitter with about 50-kW peak power. The transmitter parameters are shown in Table 2.

The radar receiver is a modified professional receiver with a wide filter bandwidth to operate with short pulses and with a quadrature detector that provides phase measurements.

<<http://sura.nirfi.sci-nnov.ru/indexe.html>>

<<http://esapub.esrin.esa.it/pff/pffv5n4/kloov5n4.htm>>

The facility at Vasil'sursk.

The laboratory was founded in 1965 in Vasil'sursk located at latitude 56 07 N, longitude 46 00 E, about 140 km East from Nizhny Novgorod. The low frequency facility has an antenna array, comprising three sections.

Figure 1 shows the system of 12 by 12 crossed dipole elements, which covers an area of 300 by 300 metres. Each of the three sections has an set of 4 by 12 elements; each section can be pointed independently. The beams may be steered manually or electrically, in steps of three degrees, to point at angles between 12 and 85 degrees. Each section has a 300-metre aperture, and its radiation pattern approximates to a  $\sin(x)/x$  shape. Radiated signals are circularly polarised.

Figure 1. The transmitting antenna system at Vasil'sursk.

A separate 250 kW transmitter is connected to each of the three antenna sections. Transmitter frequencies are stable to one part in  $10^{(exp 7)}$ . Amplitude or phase modulation (or both together) are available, and external synchronisation is possible. Emissions may be a continuous carrier or a pulsed emission whose shortest pulse is 50 milliseconds. The

operating frequency range is 4.6 - 9.3 MHz. Table 1 and Table 2 give the parameters of one antenna section whose beam points to a zenith angle of 34 degrees (the Sun position in July) and transmitting 250 kW.

Table 1

Frequency	Half-power beam width (calculated)	Time for Sun within the beam
9.05 MHz	6.3 by 22.8 deg.	18.5 minutes
9.31 MHz	6.1 by 22.1 deg.	18.0 minutes

Table 2

Frequency	Measured-Gain (using Moon)	Eff. area power	Eff. radiated
9.05 MHz	77 (+10%)	6700 sq m	19.2 MW (+1dB)
9.31 MHz	77 (+10%)	6400 sq m	19.2 MW (+1dB)

(VTC/BAB/BBC/DWL via ADDX Andreas Volk-D, wwdxc BC-DX TopNews Oct 15)

Check out <<http://www.dxaktuell.de>> for two items about the DRM  
transmissions of DW and BBC. One says that DW will cancel its complete DRM  
service after Oct 30. The other gives a tentative schedule for BBC WS in  
DRM as of Oct 31, showing only a few hours via Sines and Moosbrunn. This  
in theory leaves the possibility of more transmissions via Babcock  
facilities in the UK, so perhaps some clarification is still required  
here. But the end of the common DW-BBC DRM service appears to be a matter  
of fact, and it is said that it has been announced already at the HFCC  
conference for B-10.  
(Kai Ludwig-D, dxld Oct 16)

SRI LANKA Family Radio on 873 kHz via Puttlam, Sri Lanka. Today morning  
(14 Oct 2010) I followed TWR, Puttlam, Sri Lanka sign off on 882 kHz at

0130 UTC and then tuned to 873 kHz. Within a minute the carrier appeared and Family Radio program in Tamil started.

Thanks to the tip by Mr. C.K. Raman who heard them at 0230 UT in Malayalam at 0400 UT in English. Tamil & Malayalam are languages used in South India which is located just North of Sri Lanka.

I searched in the WYFR website but could not get any info on this new transmission.

(Jose Jacob-IND VU2JOS, <[www.niar.org](http://www.niar.org)> wwdxc BC-DX TopNews Oct 14)

TAIWAN/CHINA Firedrake music jamming.

15850 Heute frage ich nochmals nach der 15850 kHz. Ich hoere dort an der Grasnarbe, meistens drunter, sehr schwach einen Sender. RX der DE 1103, daher ist ein Produkt von ihm nicht auszuschliessen. Kann sein 1145 UT sign off. Vielleicht wurde in anderen Listen irgendetwas gemeldet.

(Ralf Ladusch-D, A-DX Oct 12)

UNID 15850 kHz, 12.10.2010, 11:40 UTC

Hallo, Ralf siehe hier

4750 Dunamis Shortwave, at 1830 UT, fair with a mix of English religious programs and hilife. Obliterated by sudden China sign-on at 2000. 24 Sept.

(David Sharp-NSW-AUS, dxld Oct 13)

UNIDENTIFIED UnID on 5840 kHz.

I received unknown language station which seemed to be Middle East / Central Asia station at 1650 (tune in)-1730\*UT on Oct 4 on 5840 kHz. Audio file: <<http://ani.atz.jp/DX/bbs1/img/8851.mp3>> at 1715 UT What station will it be? Oct 4.

I can't yet confirm it for poor condition and poor modulation. On-air on Mo., We. and Fr. only at \*1630-1730\*UT. The language is sound like Persian.

I can receive the other program on 5130 kHz. not // 5840 kHz. Oct 11.

There is not Radio Farda and IBB station. Maybe religious station, mainly sermons by OM.

[later] Acc. to the monitoring of Mauno Ritola and me, I seem to be new station for Iran. Mauno say "ID sounded something like "Radyoe Rahoye Iran" or similar. It must be via CIS txs, maybe Armenia." and "I think it is a political station, not religious. They talked all the time about Iran."

This station sends a intermittent test tone from 1625 UT and \*1630-1730\* UT mainly speech of the Persian by OM. It operates only on Mon., Wed. and Fri. Can not copy of ID with badly condition in Japan. I hope for additional information of DXer which can understand Persian.

On Oct 15 started at 1630 UT, too. ID as "Inja Los Angels, Radyo-e Rahoya Iran" by OM.

<<http://ani.atz.jp/DX/bbs1/img/9273.mp3>>

by Hiro in Akita at 1630 UT on Oct 15. Is this broadcast of a group of U.S. origin? Oct 15.

(Sei-ichi Hasegawa-JPN NDXC, dxld Oct 4/11/12/15)

Do you know the UNID stn name yet on WOF Woofferton item??, on three different beam directions, - see below.

regards de Wolfy df5sx

wwdxc germany bc-dx topnews (Oct 13)

Hi, Yes I can answer that question.

We have a fully automatic station at WOF now and when we are not there it can be controlled from the Babcock Control Room in the BBC's Bush House.

As well as that control room we have another site in London at our Media Management Centre at Blue Fin, Southwark.

The staff there have recently started to be trained in working WOF remotely and we have had some visit WOF to become acquainted with our equipment, these transmissions were for them!

There will be further training sessions over the next couple of weeks.

So no doubt these amendments will run again.

Anyway well spotted!

(via wwdxc BC-DX TopNews Oct 13)

11980 Polish Radio {via WOF} at 1237 UT, English, man and woman reading listeners' reports in "Multi Touch" program, ID. // 11675 UT via Austria was fair. Good.

(Harold Sellers-BC-CAN, DXplorer Oct 14)

U.K. BBC's DDG Mark Byford, ex WS director, made redundant. The BBC is expected to announce tomorrow that Deputy Director General Mark Byford, BBC World Service director when the North American shortwave service closed, is to be made redundant according to their own news website.

Their website links to the right wing anti-BBC Daily Mail who go into more detail and comment on his pension package.

Mitgliederversammlung der adxb-DL e.V. am 23. Oktober

Liebe Hobbyfreunde,  
am kommenden Samstag, den 23. Oktober 2010, um 14 Uhr  
im Kolpinghaus, Frauentorstr. 29, 86150 Augsburg  
findet die Mitgliederversammlung der Assoziation junger DXer e.V.  
(adxb-DL) statt.

Die Versammlung steht nicht nur den Mitgliedern, sondern allen  
Hobbyfreunden offen. Vielleicht befinden sich hier in der Liste  
Kurzwellenhoerer aus dem Raum Augsburg oder die sich gerade in Augsburg  
aufhalten, die wir hiermit gerne einladen. Augsburg ist aufgrund seiner  
Geschichte und Sehenswuerdigkeiten eine Reise wert.

Ihr koennt Euch auch gerne vorab telefonisch unter 0821 / 3102-2578  
(geschaeftlich) oder 01520 / 8591299 bei mir melden:

Wegbeschreibung zum Versammlungsort unserer Mitgliederversammlung:

Bahn: Vom Augsburger Hauptbahnhof ist das Kolpinghaus gut mit der  
Strassenbahn zu erreichen. Vom Hauptbahnhof mit der Strassenbahn 3  
(Richtung Haunstetten/Inninger Str.) eine Haltestelle Richtung  
Koenigsplatz fahren und dort umsteigen in die Strassenbahn 2 (Richtung P&R  
West). Die Haltestelle zum Aussteigen heisst Mozarthaus/Kolping und  
befindet sich direkt vor dem Kolpinghaus. Bei Bedarf kann der Vorsitzende  
Besucher der Versammlung vom Hauptbahnhof abholen. Bitte vorher  
telefonisch anmelden.

Auto: Autobahn A8 Anschlussstelle Augsburg-Ost - Richtung Stadtmitte ueber  
die Muehlhauser Strasse und Hans-Boeckler-Strasse - ueber den Lech mit  
nahtlosem Uebergang in die Stadtbachstrasse und nachfolgender Thommstrasse  
(die vorgenannten vier Strassen bilden eine lange Strasse, nur der Name  
aendert sich) - in die Fischerstrasse / Frauentorstrasse durch das

Fischertor links abbiegen - nach ein paar hundert Meter ist das  
Kolpinghaus auf der rechten Seite. Das Kolpinghaus hat ein preisgünstiges  
Parkhaus, das Tag und Nacht geöffnet ist.

Näheres auch unter <[www.adxb-dl.de](http://www.adxb-dl.de)>  
Auf Euer Kommen würden wir uns sehr freuen.

vy 73 Thomas Schubaur adxb-DL, via A-DX Oct 16

ARGENTINA 6060 R. Nacional, General Pacheco, 2211-2223, 16 Oct'10, f/ball match report; 33431, co-ch. & adjt. QRM; // 15345.19 kHz vy. good. (Carlos Goncalves-POR, wwdxc BC-DX TopNews Oct 19)

ARMENIA [probably] 5840 Radio Rahoye Iran.

UNIDENTIFIED UnID on 5840 kHz.

I received unknown language station which seemed to be Middle East / Central Asia station at 1650 (tune in)-1730\*UT on Oct 4 on 5840 kHz.

Audio file: <<http://ani.atz.jp/DX/bbs1/img/8851.mp3>> at 1715 UT

What station will it be? Oct 4.

I can't yet confirm it for poor condition and poor modulation. On-air on Mon, Wed and Fri only at \*1630-1730\*UT. The language is sound like Persian.

I can receive the other program on 5130 kHz. not // 5840 kHz. Oct 11.

There is not Radio Farda and IBB station. Maybe religious station, mainly sermons by OM.

[later] Acc. to the monitoring of Mauno Ritola and me, I seem to be new station for Iran. Mauno say "ID sounded something like "Radyoe Rahoye Iran" or similar. It must be via CIS txs, maybe Armenia." and "I think it

is a political station, not religious. They talked all the time about Iran."

This station sends a intermittent test tone from 1625 UT and \*1630-1730\* UT mainly speech of the Persian by OM. It operates only on Mon, Wed and Fri. Can not copy of ID with badly condition in Japan. I hope for additional information of DXer which can understand Persian.

On Oct 15 started at 1630 UT, too. ID as "Inja Los Angels, Radyo-e Rahoya Iran" by OM.

<<http://ani.atz.jp/DX/bbs1/img/9273.mp3>>

by Hiro in Akita at 1630 UT on Oct 15. Is this broadcast of a group of U.S. origin? Oct 15.

(Sei-ichi Hasegawa-JPN NDXC, dxld Oct 4/11/12/15)

Radio Rahoye Iran 5840 kHz 1629 UTC, Oct 18.

Gehoert zum s/on um 1629 UTC auf 5840 kHz in Farsi mit ID, langen Wortbeitraegen (Iran, Radio & TV wurden oft erwaeht) und Frequenzansagen und Ansage einer Webpage. s/off 1731 UTC. SINPO 34333  
(Patrick Robic-AUT, A-DX Oct 18)

A webpage was announced several times today, which I understand as

<[www.kriht.com](http://www.kriht.com)>

This leads to a not very productive page of a "Radio Iran Houston Texas".

(Patrick Robic-AUT to Mauno Ritola-FIN, Oct 18)

AZORES 1503 AFN, Base Aerea das Lajes, Terceira island, 2138-2156, 16 Oct'10, English, some talks, but mostly music; 22441, QRM de E. Reception of this one was quite regular if one had the means to receive the signal and "turn around" the QRM from the RNE 5 Todo Noticias tx in Galicia, but the adding of the tx at La Linea, near Cadiz, seriously compromised reception as no adequate nulling is achieved, so only propagation and the equipment can help here.

(Carlos Goncalves-POR, wwdxc BC-DX TopNews Oct 19)

BOLIVIA 3310.05 R. Mosoj Chaski, 1110 UT, weak but readable with talk by a man, flute music bridges, ments of "Cochabamba." 15 Oct.

(David Sharp-NSW-AUS, ARDXC ADXN Oct 21)

BONAIRE/U.K. 6195 R NederlandW in Sp, nx on Palestine-ISR hostility.

Via RNW Bonaire relay at S=9+20dB signal 0412-0430 UT Oct 21. BBCWS En via Skelton underneath at 4-5 UT slot.

(wb, wwdxc BC-DX TopNews Oct 21)

BRAZIL 11764.97 Super R. Deus e Amor 2355-2405 Oct 16. Religious program winding down; canned ID at 2359 UT, giving freqs of 1210, 9585, 11765, and 6060 kHz; into more PT religious talk and music at ToH. Fair at best on this freq; also heard on // 9587.72 kHz with fair signal and splatter; 6060 kHz was QRM'ed.

(John Wilkins-CO-USA, DXplorer Oct 18)

15190 Radio Inconfidencia, Belo Horizonte, MG, 1340-1400 UT, October 17, Portuguese. Announcement by male as: "... en cualquier parte do pais ligado no Radio Inconfidencia ...". Other ID & ann. as: "Inconfidencia apresento Delirio & Cia", Complete ID as 1400 UT: " ondas curtas da 19 metros 15190 kHz ... emissora da Rede Inconfidencia de Radio ...", SINPO: 34432. Best reception on LSB mode.

(Arnaldo Slaen-ARG, DXplorer Oct 17)

At 0820 UT Radio Inconfidencia noted on 15189.65 kHz, but heavily hit by 250 kW Radio Tatarstan signal via Radio Rossii provider at Samara Russia on 15195 kHz 8-9 UT, on powerful level S=9+20dB. Even with 2.6 kHz filter.

(wb, wwdxc BC-DX TopNews Oct 18)

15189.633 Radio Inconfidencia back 19 meters. Yesterday afternoon I had a carrier at 15189.633, but never enough signal to pull any audio. Nothing at all so far today.

(Dan Ferguson-USA K4VOA, <<http://www.naswa.net>>

Combined SWBC skeds spreadsheet - updated Oct 16 at 1500 UT:

<<http://www.hfskeds.com/skeds/>> )

BRAZIL 4885 R. Club do Para, Belem PA, 2135-2146, 16 Oct'10, advertisements, f/ball news; 35333; typically a lot better than this day,

but the conditions were poor on 14-15-16-17 Oct.

4915 R. Difusora, Macapa AP, 2137-2147, 16 Oct'10, f/ball match report; 24331, QRM de B, viz. R. Daqui.

4915 R. Daqui, Goiania GO, 2137-2152, 16 Oct'10, preaching, songs; 34332, QRM de B, R. Difusora in Macapa.

5035 R. Aparecida, Aparecida SP, 2140-2151, 16 Oct'10, mass; 25331; // 6135 poorly detected due to co-ch. QRM, 9629.9 kHz only good outlet, 11855 kHz weak, some QRM.

6135 ditto, 0842-f/out 0910 UT, 17 Oct'10, folk music, infos; 15331.

9587.7 SRDA, Sao Paulo SP, 2123-2144, 17 Oct'10, shouting preacher before a pathetically excited audience, Castilian translation after each sentence in Portuguese, but poorly audible because of the shouting. Back on 03 Sep, they were on 9587.4 kHz - maybe they slide to 9590 kHz some day ...

15189.65 R. Inconfidencia, Belo Horizonte MG, 2112-2225, 16 Oct'10, folk musc prgr Sertanejo Moderno, ..., advertisements, then pop oldies prgr Maquina do Tempo.

15189.65 ditto, 1352-1424, 18 Oct'10, lengthy segment filled with polit. propag. campaign aimed at the 2nd round of the presidential elections scheduled 12 days as from the 18th inst.

(Arnaldo Coro, Radio Havana Cuba.

<<http://dxersunlimited.blogspot.com/2010/10/rhc-tentative-b10-schedule-english.html>>

(via Yimber Gaviria-CLM, dxld Oct 19)

Major change is 6050 kHz at 0100-0700 UT, ex-5970 kHz. That will be bad

news for HCJB on its only remaining Ecuadorian SW frequency, on the air

until 0500 UT. RHC can certainly override it in CeNoAM, but will also

cause severe interference around Ecuador. What was Arnie thinking?

(Glenn Hauser-OK-USA, dxld Oct 19)

(from

<<http://dxersunlimited.blogspot.com/2010/10/radio-habana-cuba-spanish-language.html>> via dxld)

New or reactivated frequencies are 6140, 6095, 6050, 12040, 9770, 12010, 9820 kHz. As for English, 6050 kHz will partly collide with HCJB. Not yet researched are likely collisions of any of the others. Among the frequencies being left are 15370, 12030, 9660, 6110 kHz. Now what about all the other languages? Glenn

Major change is 6050 kHz at 0100-0700, ex-5970 kHz. That will be bad news for HCJB on its only remaining Ecuadorian SW frequency, on the air until 0500 UT. RHC can certainly override it in CNAm, but will also cause severe interference around Ecuador. What was Arnie thinking?  
(Glenn Hauser-OK-USA, dxld Oct 19)

5025 Radio Rebelde in Spanish, La Habana, Quivican steep angle signal, 0340 UT, Oct 20, S=9+10dB here in Germany. At same time slot also on same powerful level RHC Sp on 5040 kHz at 0350 UT Oct 20.

6000, 6060, and 6110 kHz Radio RHC La haban via Quivican Tital site heard powerful signals, all of S=9+20dB between 0350 and 0415 UT, Oct 21.

En on 5970 tiny S=6, 6000 super power at 0355 til 0430 UT Oct 21.  
Sp 5040 more than fair signal; 6060, 6110 kHz both latter powerful.  
(wb, wwdxc BC-DX TopNews Oct 20/21)

GERMANY B-10 of Radio Sadaye Zindagi.  
B-10 entries of Radio Sadaye Zindagi in Dari via MBR is registered under Bible Voice Broadcasting Network BVBN, not under FEBA 0230-0330 UT on 7410 WER 250 kW / 090 deg to WeAS, but from 0300-0315 UT co-ch BBC in Azeri via Moosbrunn-AUT.

Mon-Fri 1600-1630 on 11895 WER 250 kW / 090 deg to WeAS.

Just listened to Radio Sadaye Zindagi in Dari 1600-1630 UT on 11895 with an identification signal of Bible Voice Broadcasting Network BVBN in the beginning of the transmission.

(R BULGARIA DX MIX News, Ivo Ivanov, via wwdxc BC-DX TopNews Oct 21)

GERMANY/NETHERLANDS 720 / 1593 Wegen Umbauarbeiten sind die WDR-Sender Langenberg 720 und 1593 kHz abgeschaltet. Laut Nachfrage beim WDR soll das bis Freitag 1800 MESZ dauern.

WB: Das Team der Mastenfirma scheint vor dem Winter reih'um in der Bundesrepublik zu Wartungsarbeiten angetreten zu sein.

WB: Zuerst war DLF in Donebach 153 kHz und Aholming 207 kHz dran, dann auch DLF/SR Heusweiler 1422 kHz abgeschaltet, jeweils fuer eine Woche von 7-19 Uhr.

Auf 828 kHz laeuft jetzt Radio 10 Gold. Vorher kamen NDR und Testprogramm von Arrow etwa gleich stark. Jetzt ist R. 10 Gold deutlich staerker als der NDR zu hoeren.

(Juergen Lohuis-D, wwdxc BC-DX TopNews Oct 21)

GREECE HX 9935 / 19870 Bei guten Bedingungen hoere ich oefters ERA Thessaloniki via Avlis TX auf 19870 kHz, 2 x 9935 kHz, z.B. am 19. Okt.  
(Juergen Lohuis-D, wwdxc BC-DX TopNews Oct 21)

WB: 9935 kHz kommt heutzutage auch aus Avlis Mittelgriechenland, der 3. Sender dort wird zur Zeit repariert. Und ist schon seit 4 Wochen auf 7450, 15630 kHz ausser Betrieb.

Trans World Radio - Guam  
P.O.Box 8780, Agat, Guam 96928, USA  
(KTWR via ADDX Andreas Volk-D, Oct 8, 2010)

GUATEMALA 4052.5 kHz on the way from Guatemala.  
Great, Glenn, Our BIG Short Wave Transmitter was fixed today {Oct 20},  
after a very intense and difficult task. In a few minutes we will leave for  
CHIQUIMULA, and tomorrow, we'll start building a new antenna. So, we may  
come on the air very soon. Please spread the news.  
(Edgar Madrid, Radio TRUTH, dxld Oct 20)

HONDURAS 3250 Radio Luz y Vida, 1055 UT, noted as het against Pyongyang  
B.S. (on 3250.05 kHz. Partial copy of Spanish man in LSB. Pretty rare to  
get any copy on this at my QTH. 15 Oct.  
(David Sharp-NSW-AUS, ARDXC ADXN Oct 21)

ICELAND 189 RUV, Gufuskalar, 1345-1410, 18 Oct'10, jazz, newscast at  
1400 UT; 14452, adjt. QRM de D 183 kHz longwave.  
(Carlos Goncalves-POR, wwdxc BC-DX TopNews Oct 19)

INDONESIA 3995.023 RRI Kendari ... bereitet sich mit SIO 242 um 1538 UT  
auf einen furiosen Abgang vor ...  
(P.S.: die auf 1 Hz angegebenen Frequenzen sind mit GPS-Synchronisation am  
SDR-IP ausgemessen).  
DK8OK Excalibur& SDR-IP/GPS& Perseus, 96 m delta loop, 42 m windom  
(Nils Schiffhauer-D DK8OK, A-DX Oct 17)

3325 RRI Palangkaraya 1332-1400+ Oct 16. Mix of MoR vocals and one long  
indigenous song/chant; YL ancr took one phone call; organ IS at 1358 UT,  
then talk at 1400 UT. VG signal at tune-in but weak at 1400. Also VG next  
day (17 Oct) around 1315 UT. With Serui, Manokwari, and Makassar still  
off, Palangkaraya is now the best low-band Indo at this location.  
(John Wilkins-CO-USA, DXplorer Oct 18)

JAPAN 6135 Shiokaze \*1400-1405 Oct 15. Noted with usual Friday English.  
Also noted on Saturday with Korean and Sunday with Japanese. VG signal  
each day.  
(John Wilkins-CO-USA, DXplorer Oct 18)

KAZAKHSTAN "Orthodoxy voice". Automatic translation ...

Dear Listener, Radio station RADIO-AGENCY-M in Alma-Ata informs us that  
for the reason unsatisfactory audibility of frequency 7430 kHz during  
winter time, an announcement Our transfers it will be carried out on  
frequency 7515 kHz with [from] 31 Oct 2010. Please check up quality of  
audibility of this new frequency and, on possibilities, for comparison  
that occurs on former frequency in those hours, When we broadcast. We  
thank you and it is warmly welcomed.  
(Has sent Dmitry Kutuzov, Ryazan-RUS / "open\_dx", RUSdx Oct 17)

I can confirm that now transfers[transmissions] "Orthodoxy Voice" are conducted on Tuesdays and Fridays in 1430-1500 UT on frequency 9950 kHz Through a transmitting centre in Alma-Ata. Orthodox programs are broadcast.

In a coming nearer winter season the station plans to use frequency 7515 kHz in 1530-1600 UT also on Tuesdays and Fridays.

7515 kHz 1530-1600 to zone 30S via Almaty with 200kW at 312degrs.

(Igor Jaremenko-RUS, Novosibirsk / "open\_dx" RUSdx Oct 17)

KOREA DPR 2349.72 KCBS Sariwon, 1247 UT, very weak carrier and almost no modulation, but strong enough to // with very strong Pyongyang (2850.022 kHz). Also noted at this time: 3350.05 - Pyongsong, 3959.728 - Kanggye, 3970.55 - Wonsan, and 5700.044 - weak 2nd harmonic of 2850.022 kHz. 15 Oct.

(David Sharp-NSW-AUS, ARDXC ADXN Oct 21)

MALI 5995 R. Mali, Kati, 2100-2124, 17 Oct'10, Vernacular, talks, French at 2103 UT for a prgr announcement & ID, more talks and what seemed like chanting; 54433, audio with different levels; QRM de RFE in Belorussian until 2100 UT.

(Carlos Goncalves-POR, wwdxc BC-DX TopNews Oct 19)

MALTA Erich Bergmann was on holiday tour on Malta in September. He told me the PBS Radio Malta coordinates and locations.

4 finding result pages of Google search engine:  
hits at "Bizbizja, Malta" search.

But mostly only MW tx entries of 999 kHz unit. 'Bizbizja' - also in WRTH page 264 - is not a real village name -, rather an administration unit.

<<http://www.fallingrain.com/world/MT/00/Mosta.html>>  
see nearby villages in "Nearby Cities and Towns"

G.E. and Google Maps show only close-by village of Mosta

MLT PBS Radio Malta MW site 999 kHz 5 kW, at Mosta [not Bizbizja]  
35 54 47.36 N 14 24 41.14 E

and 4 kms eastwards

PERU 6019.3 R. Vitoria, Lima, 0840-0851, 17 Oct'10, Portuguese, whaling preacher; 24332; the signal was blocked by R. Australia shortly prior to 0900 UT.

9720.7 ditto, 2131-2153, 16 Oct'10, Portuguese, whaling preacher, surely "priest" David Miranda of IPDA with another relay of SRDA in Brazil. (Carlos Goncalves-POR, wwdxc BC-DX TopNews Oct 19)

PHILIPPINES 17830 Radio Veritas Asia since October, 1st has replaced time of broadcast of morning transfer in Russian on frequency 17830 kHz. Former time of translation 0130-0227 UT. New time of an announcement 0200-0257 UT. The information is received directly from technical department of station. (Feodor Brazhnikov-RUS, "open\_dx" RUSdx Oct 17)

PERU 3329.51 Ondas del Huallaga, 1047 UT, huaynos, then mensajes by a man. First noted as strong het against CHU, but readable in LSB. 15 Oct.

4774.959 Radio Tarma, 1027 UT, superb reception with huaynos and upbeat man and woman talking over the top of the songs. Peaking at S9+30dB. 15 Oct.

5120.48 Ondas del Suroriente, 1035 UT, comments by a man, local time check, into huaynos. Best in LSB to escape UTE, high side. 15 Oct.

5486.54 Reina de la Selva, 1042 UT, presumed with huaynos, talk by a man. KO'ed by Over-the-Horizon radar at 1045 UT. 15 Oct. (David Sharp-NSW-AUS, ARDXC ADXN Oct 21)

ROMANIA RRI Hoerertag 2010.

Liebe Hoererfreunde, Radio Rumaenien International Bukarest bereitet auch in diesem Jahr einen besonderen Tag vor. Es geht um den sogenannten Hoerertag, an dem wir unsere Sendungen anhand ihrer Teilnahmen gestalten werden. Sie koennen uns E-Mails oder Briefe schreiben, Sie koennen uns auch anrufen. Der 7. November 2010 wird also der Hoerertag sein. Es ist der erste Sonntag nach dem Tag des rumaenischen Hoerfunks. Am 1. November 1928 ist die erste Sendung in Rumaenien ausgestrahlt worden.

<<http://www.rri.ro/art.shtml?lang=7&sec=290&art=63442>>

Wir blicken mit viel Interesse Ihrer Teilnahme, Ihren Ideen und Meinungen entgegen. Sie koennen die deutsche Redaktion am schnellsten per E-Mail an <germ @ rri.ro> und <rri\_deutsch @ yahoo.com> erreichen.

Sie koennen uns auch in der Redaktion anrufen, unsere Nummer lautet 0040-21-303-1188. Per Fax sind wir unter 0040-21-319-05-62 zu erreichen.

Ihre Gedanken zum Hoerertag koennen Sie auch im unten stehenden Formular hinterlassen. Alle Zuschriften werden mit einer Teilnahmebestaetigung belohnt. Die Verfasser der schoensten 10 Essays erhalten als Dankeschoen jeweils eine vom Rundfunkverlag herausgegebene Musik-CD.  
(RRI, via Paul Gager-AUT, A-DX Oct 17)

RUSSIA 567 on 16 Oct, at 1754 UT, Radio Rossii from Volgograd, in Russian playing old showtunes, into time pips and ID in Russian on the hour. This is a 1000 kW operation according to WRTH. Good signal levels with moderate fading and very little QRM.

I think Iran on 531 must have been on low power, as normally they dominate the channel, unless it was just weird propagation conditions, which is also entirely possible! ;-)  
(Albert Muick-AFG, hcdx Oct 17)

RUS Volgograd 567 kHz 1000 kW, 810 kHz 500 kW, 1161 kHz 75 kW

SPAIN According to the information from Svetlana Demidovoj (REE), in the near future it is possible. There will be on Russian service of this station a program which will conduct Yina Krasnopolsky. The format, the maintenance and other details will be declared later. Yours faithfully,  
(Vasily Guljaev, Astrakhan, Rossija./"open\_dx", Oct 17)

WB: [probably well known Tina Krasnopolskaya from DWL Russian service Bonn? wb.].

Yes, it's she. Her previous DX program on Radio Slovakia International Russian service was cancelled in June 2006 (because of RSI decision to leave short wave). After that not too much has been heard from her (except few infos and interviews on DRM related topics to the Voice of Russia DX program called "Club DX"). Hope she will conduct DX program on REE Russian service. Actually, there are only 4 DX programs in Russian (presented by Voice of Russia, Radio Bulgaria, Radio Romania International and Trans World Radio).

(Aleksandr Diadishev-UKR, dxld Oct 17)

SUDAN 7200 SRTC, Ai-Aitahab, 1516-1529, 17 Oct'10, Arabic, news report; 24442, deteriorating, occasional amateur QRM.

Notes - We will have the following changes on our schedule:

1. Then morning English will change from 3200 to 6120 at 05h00 instead 06h00 LT.

2. The Zim broadcast from 1423 till 1525 will change to 6025 kHz from 4775 kHz.

3. The southern Mozambique broadcast from 14h55 to 15h25 LT will change to 4760 kHz from 3200 kHz.

(via ADDX Andreas Volk-D, Oct 8, 2010; via wwdxc BC-DX TopNews)

SWEDEN Radio Sweden Ends English on 31 Oct. 2010.

Swedish Radio's international broadcasts on short and medium wave will close down from October 31, 2010. This is part of a decision by Swedish Radio's management on our output and distribution announced on March 16 this year.

This means that from October 31, Radio Sweden's programming in English will be broadcast nationally (on FM), as well as available on the Internet, and our podcast will be available here and on iTunes for downloading.

"I want to strengthen our quality and competence, including in Arabic, which is the most important language for new arrivals in Sweden", says Ingemar Loefgren, head of SR International. "It is important to strengthen the broadcasts for the listener groups who need it the most, such as Somalis. In addition I want to give a higher profile to the official minority language Romani, which will shortly start daily broadcasts."

From the Fall Swedish Radio's output in immigrant languages will change, with resources concentrated on fewer languages than previously. This is the result of the latest review of SR International's programming. Swedish Radio will also be ending broadcasts in short and medium wave, and will instead concentrate on Internet webcasting.

"The number of languages broadcast by Swedish Radio has changed over time, in order to adapt to changes in the world around us," says Swedish Radio's Program Director Bjoern Loefeldahl. "This is the way it is now, and will be in the future."

"We have to be where the audience is, and today our audience in the rest of the world is on the Web," Bjoern Loefeldahl continues. "It doesn't feel relevant to broadcast on short or medium wave, and it isn't economically defensible or journalistically justified. Now the money can be directed to where it is needed."

After the latest review, Swedish Radio will broadcast in the following languages from October 31, 2010:

- English - FM and web
- Finnish - FM and web
- Meaenkieli (Tornedalen Finnish) - FM and web
- Sami - FM and web
- Romani - FM and web
- Arabic - FM and web
- Somali - FM and web
- Persian - FM and web
- Kurdish - FM and web
- German - web
- Russian - web

The following language services will close:

- Albanian
- Assyrian/Aramaic
- Bosnian-Croatian-Serbian

(Nils Schiffhauer-D DK8OK, Excalibur&SDR-IP/GPS&Perseus, A-DX Oct 26)

15189.65 R. Inconfidencia, Belo Horizonte MG, 0430-0505 UT on 26 Oct'10,  
an unexpected opening with a great signal (up to S7) and excellent  
modulation here in the middle of Europe. Almost inaudible at 0430 UT but  
improving with a peak at 0500 UT. Then going down again; at 0520 UT the

channel was clear! Frequent "Inconfidencia" pre-recorded IDs. At the TOH a complete ID ceremony with all frequencies incl. 15190 kHz, surprisingly in Spanish!

(Karel Honzik-CZE, wwdxc BC-DX TopNews Oct 26)

DIEGO GARCIA [BIOT - British Indian Ocean Territory] 4319 AFN, Los Angeles, 2345-2359 UT, Noted English news and comments as well as promos and public announcements. Signal was good which causes me to wonder if this is really Diego Garcia or another AFN station somewhere closer?  
(Chuck Bolland-FL-USA, hcdx Oct 22)

EQUATORIAL GUINEA 6250.0 Oct 23 at 0613 UT, weak talk could be Spanish, and presumably RNGE; some ute QRM. With sunrise underway, it really helps when they sign on a semihour earlier.

15190 R. Africa, which conveniently went missing last week just as ZYE522 reactivated 15190 kHz, heard again for the first time Oct 22 at 2008 UT, lo-fi gospel singer, S=9+18dB and no QRM, not even a het detectable during music. At 2013 UT YL preacher allowed a very lite het to be audible, but so weak I could not tell with BFO whether it was on the hi or lo side of R. Africa, which maintains a tight frequency, whatever its other failings, such as long periods of dead air between huxters...  
(Glenn Hauser-OK-USA, dxld Oct 23)

5005 R. Nacional, Bata. Oct 22 at 2131-2143 UT live music (Hilife) from outside in a poor audio, alternating short female announcements in Spanish. 34333.

6250 Equatorial Guinea, R. Nacional, Malabo. Oct 21 at 0635-0646 UT male and female in Spanish talks, news program, "buenos dias", outside talks by male "vamos ser patriotas..elecciones presidenciales..transparencia..la democracia", African music. 33333.  
(Lucio Otavio Bobrowiec-SP-BRA, hcdx Oct 23)

FRANCE 7220 RFI Paris French transmission in spring and autumn, S=9+25dB excellent signal here from Issoudun-F site, political news. 7220 0400-0500 UT to AF, 500kW at 140degrees, back since Sept 5th.

9490 Democratic Voice of Burma via Germany, on Oct 17 at \*2330-2340 UT.  
34333 Burmese, 2330 sign on with opening music, ID, Opening announce,  
talk.

(Kouji Hashimoto-JPN, JPNpremium Oct 22)

from B-10 on 5905 kHz, via Wertachtal 125kW at 75degr lobe.

MBR: 5905 2330-0030 UT WER 125 75 to zones 41,49 daily DVB

GREECE 7450 Oct 23 at 0538 UT VOG with Greek music, better here than  
// 9420 kHz. Gone at next check 0603 UT. Come to think of it, this  
frequency has been missing at night, like 15630 kHz has been in the  
daytime.

At 1310 UT, I find 15630 kHz is also back on the air, fair with Greek talk  
and music, better than Turkey 15450 kHz which was flutterier. Wolfgang

Bueschel also heard 15630 kHz again from 0600 UT after four weeks' downtime.

John Babbis says, "I think the set-up for that transmitter is:

0000-0350 15650 105

0400-0550 7450 323

0600-1000 15630 285

1000-1100 BREAK {started at 1049 UT afternoon see again, wb.}

1100-2250 15630 285

2300-2400 15650 105"

(Glenn Hauser-OK-USA, dxld Oct 23)

15630 After four weeks repair the 3rd TX unit is back on air, today Oct 23 at 0600-1000 UT on 15630 kHz pretty strong signal, well modulated, usual morning break between 1000 and 1049 UT.

At 1049 UT til 2250 UT also on 15630 to Atlantic. // 9420 kHz to EUR, and local domestic Thessaloniki programm on 9935 kHz too.

(wb, wwdxc BC-DX TopNews Oct 23)

7475 Voice of Greece on Avlis site in Greek at 0345 UT Oct 25, S=9+20dB, photographic matter discussion.

// 9420 kHz at 0348 UT more powerful channel, better propagation, S=9+30dB.

// 15650 opposite towards AS/PAC only tiny S=3 signal strength at 0350 UT.

Dropped down at 0354 UT, tx changed frequency to 7450 kHz, and appeared on air again at 03.57:50 UT S=9+20dB, but audio feed switched on little bit later at 03.59:31 UT. 7450 kHz is stronger signal than 7475 kHz.

(wb, wwdxc BC-DX TopNews Oct 25)

GUATEMALA 4055.0 R. Verdad, Oct 23 at 0549 UT reads S=9+12 with music, better than usual, fades, 0559 UT gets mushy and can't tell if NA is playing later. Still on standby 50 watts, but expects to reactivate refurbished main transmitter with new antenna and revert to 4052.5 kHz within a couple days.

(Glenn Hauser-OK-USA, dxld Oct 23)

4052.5 Dear Glenn: We have put up the new antenna of Radio Truth today. We also finished to build the new Match Box, and, God willing, we may come on the air with full power tomorrow Sunday. May God bless you (Edgar Amilcar Madrid-GTM, Radio Truth, dxld Oct 24)

That's exactly what I have been doing all Sunday evening periodically, starting at:

2313: nothing yet

0022: trace of carrier near 4052.5, also 4050 (KWMO), not 4055

0123: same

0228: carrier is a little stronger, but T-storm noise has been too high

0357: a little better still, but not enough

Previous Sundays has been reported closing down shortly after 0400 UT Monday, but will chek again in the 05-06 UT period in case still on. So far it does not seem like there has been a drastic power increase, altho the frequency has changed back to the original split.

(Glenn Hauser-OK-USA, dxld Oct 24)

4052.5 Re: Working Radio Truth

I am sorry, Glenn and Dave, we were not able to come on the air today Sunday, because we discovered some electrical difficulties which we have to fix. We were on the air several times during the day, sometimes with the small transmitter, and some other times with the big transmitter, but without audio frequency, just making many tests. We may come on the air tomorrow Monday (some time on the day). We are working too hard on it, but, the big transmitter is alright. Our problems are with a deficient ground.

(Oct 25)

[later] I am so sorry, Glenn and Dave, we have worked very hard today making many tests and tryouts, but we are not ready to come on the air yet (eventhough our transmitter is working fine already. The small transmitter too). May be tomorrow (?) we may come on the air (I hope). The electrical difficulties are still on. Two electrical line keepers came this afternoon and review and readjusted electric connections of the the power transformer. The problems are still on. Tomorrow I will report the problems to the electric company to see if this can be corrected soon. Just be expecting our signal. I will inform everybody as soon as we are permanently on the air. The Engineer has moved frequencies several times, but just for testing purposes. Our frequency will keep on 4052.5 kHz, as it has been before.

Our problem right now is that the Engineer was supposed to return to Canada tomorrow evening, and I think we'll have to postpone his trip (with some unconveniencies for him). He won't leave untill all difficulties are solved.

Thank you very much for your help. May God bless you  
(Dr. Edgar Amilcar Madrid-GTM, Radio Truth - Radio Verdad, dxld Oct 26)

GUATEMALA 4052.4 R. Verdad back close to its original frequency, a bit off nominal 4052.5 kHz, Oct 27 at 0518 UT fair with hymn, S=9+12 and one can certainly tell the difference between this 500 watts, and the temporary 50 watts which had been on 4055 kHz. However, it's still too weak for easy listening here, but should be good in the region, and maybe further with better conditions. 0529 UT sounded like Johnny Cash with hymn to the tune of "We Shall Not Be Moved", with guitar; modulation a bit muffled. Also audible around 1155 UT. We had just received the good news from Dr. Madrid.

(Glenn Hauser-OK-USA, dxld Oct 27)

GREAT, Radio Truth is on the air again on short wave, with 500 watts of power, at 4052.5 kHz, after over two years being off the air, due to the awful harm done by a lightning strike on the 21st of Sept 2008, thanks to Engineer Ralph Borthwick, from Canada.

We'll appreciate it if you report our signal during these days, on which we'll be making all necessary adjustments. Please distribute this information.

(Dr. Edgar Amilcar Madrid-GMT, Director and Manager, dxld Oct 27)

MALTA Holidaying with a portable.

I took my excellent little portable Grundig G8 with me on holiday to Malta (Malta is an island sixty km's off the coast of Sicily, Italy). On the hotel room balcony it performed surprisingly well with very little RFI to blot out the faint signals.

Shortwave had disappointingly little to offer - seems no one is broadcasting to Europe on SW anymore. A pity.

However the Mediumwave AM BC band proved interesting and I got a lot of stations that I was quite chuffed with. Five English stations some 2100km's / 1300 miles away from the hotel.

648 BBC Orfordness, UK.  
1089 Talk Sport, Brookmans Park, UK.  
1215 Absolute Radio, UK  
1458 Sunrise Radio London, UK.  
1548 "Gold" London, UK.  
Nice catches barefoot on the tiny G8

Also:

621 Wavre Belgium  
Eight German stations  
1440 Luxembourg  
Ten French stations  
The difficult "Big L" from Holland on 1395 kHz, also ID'ing as "Mighty KBC".

Of course the band was full of Italian stations that are just close by, but carefully working the band after sunrise, when the Italians faded, it was possible to get the distant English, German and French stations great fun.

As the hotel overlooks the sea, it was evident that the sea "gain effect" was strongly evident, as the distant signals persisted until well after sunrise. Have fun and good DX  
(John Plimmer-AFS, Icom IC-7600, Perseus SDR, Antenna's RF Systems DX 1 Pro Mk II, Datong AD-270, Kiwa MW Loop.

(Erich Bergmann-D, comments by wb, wwdxc BC-DX TopNews Sept 29)

MAURITANIA 7245 ORTM has been reported missing from 4845 kHz lately, but I hear an unexpected signal on 7245 kHz, Oct 23 at 0605 UT with soporific wakeup chanting rather like SASASAM's on 6297 kHz, and like we used to hear on 4845 kHz, and still going at 0615 UT. Surely it's Mauritania on its daytime frequency much earlier than the usual switch circa 0800 UT. Maybe it means they cannot operate on 60mb for some reason.

I rechecked 4845 kHz, and could not detect even a carrier in sideband of WWCR 4840 kHz. I check 41mb just about every night at this time, and am sure I was not hearing anything on 7245 kHz previously. Also inaudible on its MW 783 kHz, which more easterly North Americans often hear.

(Glenn Hauser-OK-USA, dxld/hcdx Oct 23)

My yesterday's observation of Radio Mauritanie on 7245 kHz.

1803-2337 UT on 23 Oct'10, French, news till 1820 UT, one adv. for a mobile phone network, Vernaculars at 1922 UT, talks, phone-ins at 1852 UT, ..., Arabic at 2000 UT, talks, music, newscast at 2200 UT ...; 55444, but 54444 at 2000 UT, with one of the interfering stns being Polish Radio in Polish, most of it with mass.

I stopped my obs. at the mentioned time, 2337 UT, before going to bed.

Somebody forgot to switch to 4845 kHz, but then their daytime/night time freq switches are irregular. They were audible on 4845 kHz the previous evening (Friday Oct 22) for instance. That was // to MW 783 kHz.

(Carlos Goncalves-POR, wwdxc BC-DX TopNews Oct 24)

[later] 7245 R. Mauritanie, Nouakchott, at 1803-2337 UT on 23 Oct'10, French, newscast until 1821 UT, one advertisement (for some mobile telephone network), jingle, segments in different Vernaculars as from 1822 UT, phone-ins at 1852 UT, ..., Arabic prgr at 2000 UT, talks, music, news at 2200 UT; 55444, but experienced some (nearly avoidable, thanks to the K9AY), QRM=4 at 1900 UT. Possibly, they didn't switch to 4845 kHz at all during yesterday's evening.

Today, Oct 24, I heard the usual 1800 UT segment in French, then into Vernaculars, and like yesterday they remained on 7245 kHz: still there as I write this, at nearly 1920 UT.

(Carlos Goncalves-POR, wwdxc BC-DX TopNews Oct 24)

I heard R. Mauretania on 23rd after 1800 UT on 7245 kHz, like Carlos, and also Sunday morning, 0640+ on 7245 kHz, sunday night 0005+ very strong and still on 7245 kHz, but no trace this morning, monday 25th, around 0730 UT.

(Thorsten Hallmann-D, dxld Oct 25)

MOLDOVA [PRIDNESTROVIE] 9665 Radio Pridnestrovie QSL. Radio Pridnestrovie via Grigoriopol. Full-color sheet with logo, map, and antennas, which appears to be the same as others have received via e-mail, from Anatoly Kirsa in 2 months. Full data, however frequency is incorrectly indicated as 6240 kHz.

QSL shows address as:

ul. Pravda 31, MD 3300 Tirasapol, Pridnestrovie, Moldova

which is approximately the address to which I mailed my report. As requested, I enclosed an addressed envelope, but it wasn't used. The QSL envelope, with Moldova stamps, has my address and on the back "Mr. Anatoly Kirsa" and station address-all handwritten.

(Wendel Craighead-KS-USA, DXplorer Oct 29)

MYANMAR 5985.858 MRTV, at 1128 UT Oct 15, noted as het against UnID on low side and presume Nay Pyi Taw site, due to unstable, warbly transmitter. Fair with local vocals and scant comments by announcer. Best in USB-mode.

(David Sharp-NSW-AUS, DXplorer Oct 27)

NETHERLANDS The new coalition government has moved the financing of Radio Netherlands Worldwide to the Development Co-operation department of the Ministry of Foreign Affairs. Up until now, RNW has been funded through the Ministry of Education, Culture and Science. RNW Director-General Jan Hoek is pleased at the change, which he believes is logical. He told staff that "It is good that the importance of an international broadcaster for an internationally oriented country like the Netherlands is recognized and acknowledged. 70% of every euro is earned abroad, so the Netherlands has a responsibility and an interest in maintaining an active presence on the international stage."

Hoek notes that with the Foreign Affairs Ministry needing to find EUR 1 billion of savings, it's possible that RNW's budget will be cut. {!}

(AIB Media Briefing 14 Oct via dxld Oct 24)

Maybe RNW budget cuts will occur in coming late March A-11 season?

And on the VAILED broadcaster transmissions scene of Africa/Zimbabwe/Dafur/Voice of Tibet to be also concerned? (wb)

NEW ZEALAND RNZI Transmitter Shut-Down, 24 October 2010.

On Tuesday 26 October due to antenna maintenance, short-wave services will be off-air from 1145-1800 approx NZT. (2230-0500 Mon/Tue UTC 25/26 Oct)  
<<http://www.rnzi.com/pages/whatsnew.php294>>  
(Mike Terry-UK, dxld Oct 26)

NIGERIA 7350 R. Nigeria, Abuja. Oct 21 at 0648-0704 UT male and female in English talks "economic competition..production lines..the option to develop .. production team", "R. Nigeria .. Abuja .. National Service"; 44333.

Oct 22 at 0640-0650 UT male and female, "education in the country", "R. Nigeria", canned male and female talks. 35333.  
(Lucio Otavio Bobrowiec-SP-BRA, hcdx Oct 23)

The Albions in GB&IRL have always a benefit to listen WeAF stations, due of the long path on salt water anyway ...

Refurbishing work at Abuja Gwagwalarda site by the Thomson staff ended now in Sept 2010. And Noel heard the station on new 7350 kHz on Sept 26, 2010 again.  
(73 wb - dxld Oct 14)

Ah, Ah so that's why 7350 kHz is only producing such a weak signal here in western Europe. The beam angle is ideal for most of Nigeria but not for

Europe. And BTW - what can have happened to the other 100 kW transmitter at Abuja Gwagwalarda? Perhaps dismantled for spares? Thanks for this interesting information, Wolfy. 73 from (Noel Green, ibid.)

WB: {2nd unit dismantled for spares - yes I guess so, wb.}

7350 - Oct 14 at 0622 UT, best audio yet from R. Nigeria, Abuja, 0624 UT tentative ID in passing. Slightly on the low side compared to signals on MW 1350. Wolfgang Bueschel explains the poor reception in Europe and North America: altho both near Abuja, this is separate from the new VON 3 x 250 kW site at Lugbe; Thomson also put in 2 x 100 kW for domestic service at the old site Gwagwalarda, some 33 km westward, same as MW 909 kHz. Looking at Google map, has dipole oriented 85/265 degrees.

(Glenn Hauser-OK-USA, dxld Oct 24)

7350 R. Nigeria, Abuja, carrier there when I checked at 0540 UT on Oct 24; what sounded like a pennywhistle IS at 0546 UT, then Nat Anthem hymn and "I Pledge to Nigeria My Country" (which I haven't hrd in an age). Talk by man at 0549 UT, probably an inspirational msg if they are following the old R. Nigeria pattern; TC, "Good morning," into news read alternately by M&W with various field reports. Sounded like an ad at 0609 UT, more talk, several IDs as R. Nigeria; I listened to 0620 UT. Signal was poor, slightly better from 0600 UT when presumably Lagos nx relay began. What power are they using?

(Jerry Berg-MA-USA, DXplorer Oct 24)

The Thomson engineer provided a maintenance expertise to repair 2 x 100 kW domestic site transmitters at FRCN Abuja Gwagwalada SW former 7275, now 7350 kHz. They set up same steering control system like on the new 3 x 250 kW Voice of Nigeria tx center in Abuja Lugbe. Started FRCN domestic service Abuja again on Sept 26, according observation log of Noel R. Green-UK. SW Antenna visible in Google Maps shows approx. 85/265 east-west direction lobe.

(wb, wwdxc BC-DX TopNews Oct 24)

PAKISTAN 9670 R. Pakistan, on Oct 17 at \*1157-1211 UT. 33433 Chinese, 1157 UT sign on with IS, Koran, ID, Opening announce, Koran and music.

(Kouji Hashimoto-JPN, JPNpremium Oct 22)

Chinese 9670 1200-1300 41,42, 43, 44, Islamab 250kW

Chinese 11510 1200-1300 41,42, 43, 44, do 250kW

PALAU 9965 Radio Australia relay via KHBN. In the process of checking for Republica, noticed a clear but fairly weak Radio Australia in English, // 9580 but with about a 3-4 second delay, 1151-1200 UT Oct 23. Site per

RRI's English language program to Western Europe, airing at 1800 hours UT  
winter time, is simultaneously transmitted by RADIOCOM in DRM system on

6065 kHz and in analogue system on 7415 kHz.

RRI also brings you a 30-minute program in English, broadcast in the DRM system, transmitted to the UK by the British provider WRN Broadcast, between 1800 and 1830 hours UTC, on 5895 [sic. 6020] kHz.

Our English morning program airing at 0630 UTC is simultaneously transmitted to Western Europe in the DRM system on 6020 kHz and in analogue system on 7370 kHz. Our English program airing at 2130 UT is simultaneously transmitted to Western Europe in DRM system on 6030 kHz and in analogue system on 7380 kHz.

RRI has also resumed a weekly podcast in English, with an RSS feed; RRI's programme, broadcast on Sunday at 1800 hours UTC, will be available on the WRN servers and also on podcast directories, such as iTunes and Juicer.

The schedules for the English shows, updated every week, can be downloaded from the World Radio Networks' web site at the following address:  
<[www.wrn.org](http://www.wrn.org)>

If you are looking for a fresh perspective on events and life in Europe you can listen to Network Europe, a weekly co-production of leading international broadcasters, Radio Romania International included, at  
<[www.networkeurope.org](http://www.networkeurope.org)>

via Alan Roe-UK , WDXC-UK Oct 25)

RUSSIA/MOLDOVA DWL license in Moscow, St.Petersburg, and Grigoriopol-MDA.

As noted by Russian DXers: it appears that according to this schedule, DW will be dropping its German and Russian MW relays in Moscow (693), St. Petersburg (1188) and Grigoriopol (999) from January 1, 2011. RFI is leasing 1188 from DW for an hour or two of its Russian and (presumably) French broadcasts in St. Petersburg.  
(Sergei S., dxld Oct 21)

DWL / RUSSIA telecommunication authority.  
I guess in past 15 years it happened twice, that license registration renewed for the MW relays after 1-2 months later. Maybe someone knows the present contract period on this matter ?  
(wb, wwdxc BC-DX TopNews Oct 23)

SLOVAK REP Re RSI schedule B-10 season.  
According to the French team, radio and television could merge. They think it's a bad news for the external services.

Yes, they could leave SW on Dec 31st. And their schedule is valid until the end of the year (and not until the end of March) they said in a announcement.  
(Jean-Marie Aubier-F, dxld Oct 27)

(REE, Oct 26)

Re: REE-B10. ENGLISH NoAM 0000-0100 daily 5970 kHz.

NOTE THE LAST, replacing 6055 kHz where it has been for decades. 6055 kHz was reported Oct 26 already in Spanish during this hour by Mark Coady, Ont., so did they make the change early?

Reason for this is unclear. The sked still shows 6055 kHz in use at 23-24 UT in French, and 01-06 UT in Spanish. And 5970 kHz also in French at 23-24 UT but to Europe rather than NoAM.  
(Glenn Hauser-OK-USA, dxld Oct 28)

REE 6055 might still be good for French at 2300 UT, but Havana has been coming on 6060 kHz at 0000 UT so maybe the change avoids my aforementioned slopover issue with REE English at that hour. Or a mistake on the sked?  
(Steve Luce-TX-USA, dxld Oct 28)

Maybe reason for this late change on 6055 to 5970 kHz is due of powerful Radio La Habana Cuba signal adjacent 6060 channel ???

Or is a mistake on the PDF sked?

In B-10

5970 2300-2400 to EUR 68 or 50 degr, French Sat/Sun  
5970 0000-0100 to NoAM 302degr, English [not 290 degr ! ]

6055 2300-2400 to NoAM 302degr, French

6055 0100-0600 to NoAM 290degr, Spanish  
[not 6055 0000-0100 to NoAM 302degr, English anymore?]

SWEDEN Radio Sweden Ends English on 31 Oct. 2010.  
<<http://sverigesradio.se/rs/english/>>  
(R Sweden, via Mike Terry-UK, BrDXC-UK ng Oct 22)

Radio Sweden closing down shortwave services and immigrant transmissions in Albanian.

The following message was sent to Glenn Hauser:

Dear Glenn, The closure of a number of services now offered by the Swedish Radio has been strongly criticized, both by representatives for immigrant groups, Swedish citizens abroad and sailors, who rely on radio broadcast when far away from the mainland.

I find it deplorable that the Albanian as well as the Bosnian-Croatian-Serbian service will close down. Among our immigrants many elderly people will become more isolated from Swedish society, since they do not understand Swedish well enough. Younger people are not affected, they rely on the internet and get all possible information about events in Sweden also through TV and newspapers. When going abroad I personally will miss the daily news bulletins from Sweden, which I could listen to at the seaside resorts in Italy, Croatia and Albania... To use computers when staying abroad is not always easy, radio here stands for constant access and flexibility!

English speaking listeners will no longer be informed via shortwaves about Swedish news and views via radio.

Generally speaking, the present trend with regard to international broadcasting give an impression re the situation in the international economic and political fields. We have to ask, after checking the situation on the shortwave bands:

Is China the world power number one?

Are USA, Russia and Western Europe second class powers?

The Chinese domination on shortwaves today is overwhelming.

Is this known in Washington, London and Moscow?

Could we as DXers deviate a bit from our normal course and inform the leading circles, the governments of USA, United Kingdom and Russia, the Senate and the House of Representatives, the British Parliament and the Russian Duma about this state of affairs, to create a debate on this matter?

Just an idea of mine!  
Kind regards,  
(Ullmar Qvick, Norrkoeping, Sweden to Glenn Hauser-OK-USA; Oct 25)

SWEDEN Think about the LAST QSL of 1179 kHz Soelvesborg Sweden, on Saturday night is final SHUT DOWN by Radio Sweden on the cliff.

Or is CRI on start there at Soelvesborg ????  
(wb, wwdxc BC-DX TopNews Oct 24)

Radio Sweden International will pay attention to the final transmissions during the Russian and English services on Sunday, Oct 31st, the final day of transmissions from Hoerby shortwave and Soelvesborg mediumwave (1179 kHz) transmitters. There will be no attention in the Swedish language transmissions as it is only a relay of program 1. There will be more information later on the webpage of Radio Sweden International.

There will also be a funeral feast at Hoerby transmitter centre after midnight local time on October 31st.

Elle-Kari Hoejeberg, Radio Sweden International via Bengt Ericson-SWE,  
Oct 23.  
(mediumwave.info via Mauno Ritola-FIN, wwdxc BC-DX TopNews Oct 25)

Last call: Radio Sweden, Kurzwelle ...  
... sperrt ja am 31.10.2010 zu, die Mittelwelle gleich mit (wie heisst eigentlich "Bisamberg" auf Svenska?). Eine gute Woche Zeit also noch, sich mit Dusel eine allerletzte Kusel zu holen. Etwa fuer einen Empfangsbericht der Sendung in Englisch zwischen 1700 und 1730 UTC auf 13870 kHz, wo ich die gerade mit SIO 353-4 empfangen. -- Sweden Calling DXers? Vorbei dann, das alles.  
(Nils Schiffhauer-D DK8OK, Excalibur& SDR-IP/GPS& Perseus, A-DX Oct 23)

Sweden Calling DXers? Vorbei dann, das alles ...  
Nicht nur Arne Skoog bei der ADDX im Rheinland oder auf der IFA in Berlin in den Siebzigern begegnet, auch Peter Reichel, der Schwabe aus Goepingen / Geislingen in Stockholm, alles schon lange vorbei.

Auch der kraeftige Telefunksender, oder die denkmalhafte Mast-Hardware in Soelvesborg Haellevik werden bald entsorgt.

(wb, wwdxc BC-DX TopNews Oct 23)

TAIWAN 864 Chung Sheng Broadcasting Co. will be closed. According to local online media, Chunsheng Broadcasting Co. (BEV52 / 864 kHz / 10 kW), Taichung will be closed at the end of October. The station commenced in 1953, as the first commercial broadcasting station in Taichung area. They broadcast Christian religious programs, supported by advertisements revenue from local Christians. The station has its transmitter site in the center of Taichung, and they have been complained by the residents around the site for its dangerousness. The station considered to move the transmitter site to the suburban area, but they at last gave up due to the high moving cost in the continuous decrease in income, and the decision of closing the station was done in the beginning of this year. 16 station staffs will be all dismissed. This is the first case of MW station closing since the new National Communications Commission(NCC) of Taiwan established 4 years ago. NCC ordered the station to announce the closing to the listeners and proper disposal of the tower and transmitter.

Their URL <http://www.864.com.tw>

They are using Harris DX-10 transmitter.

(Takahito Akabayashi-JPN, wwdxc BC-DX TopNews Oct 27)

TUNISIA 7275 RTT Sfax in Arabic at 0438 UT Oct 25, excellent S=9+25dB signal strength.

(wb, wwdxc BC-DX TopNews Oct 25)

17715 1200-1300 EMR 500 72 CHINESE AS  
17755 1230-1330 EMR 500 310 GERMAN EUR

[Note that there is no longer ANY TURKISH to AMs, but the ones to EUR are in same direxion as NoAM, and should carry onward, propagation permitting. There are also duplications in this list, e.g. English on same frequency to more than one target area. Perhaps someone would like to resort this into time order too. {gh} ]

(TRT xls via Mustafa Cankurt-TUR, Oct 27, transformed and tidied up by gh. [removing meter bands, Turkish time, DSB which applies to all entries, colons in times but not inserting leading zeroes; more useful would have been azimuths and transmitter sites] for dxld Oct 28; transformed to frequ sorted form file by wb. Oct 29)

UGANDA 4975.965 Radio Uganda ist auf 4975.965 kHz mit african mx um 2045 UT wieder recht sauber zu hoeren.  
(Ingo Hell-D, rx: Perseus, ant: 30m LW / ALA 1530, A-DX Oct 24)

U.K. 6075 DWL Rampisham 1000-1559 UT had terrible audio quality in 10-11 UT slot today on Oct 23, like faulty final stage tube - or more likely - antenna feed swinging during Atlantic storm at present ?

But now at 1235 UT the signal is a little bit better, maybe changed to another tx unit or different curtain antenna at Rampisham ?

(YFR, via ADDX Andreas Volk-D, via wwdxc BC-DX TopNews

transformed from PDF to TXT file format, Oct 20)

Another UNKNOWN YFR program logged recently by Erich Bergmann-D, still in A-10 season:

9850 kHz at 1900-2100 UT, recognized probably Swedish at 19 UT, Swedish or Norwegian language at 1930 UT. English from 2000-2100 UT.

This outlet comes from Krasnodar Caucasus, Russia.

(Bergmann-D, via wb, wwdxc BC-DX TopNews Oct 28)

UNKNOWN 9965.5 Radio Republica relay. Per Glenn Hauser tip that the Cuba jammer(s) target is this. Tune-in 1115 UT Oct 22, nothing (jammer or Republica relay) present. Recheck 1239 UT, jammers up and very weak Radio Republica audio present at 9965.5 kHz. On Oct 23, 1221-1234 UT, in the clear with Republica audio. On Oct 24, in the clear at 1227 UT quick check. Wonder where this is coming from. Old La Voz del CID transmitter reactivated? Weren't they on a frequency close to this, via Guatemala or Costa Rica? Inquiring minds want to know.

(Terry L Krueger-FL-USA, DXplorer Oct 25)

VANUATU 5055 A friend in Port Vila tells me that one of the shortwave transmitters is currently off air with technical problems. That is the one on 5055 kHz. A technician from Radio New Zealand is due to arrive this week to look at the problem and get the transmitters running at full power.

(William Hague-AUS, NWDXC Oct 24)

ZAMBIA CVC - 1Africa - B-10 schedule effective 31 October, 2010. Transmissions via Lusaka Makeni Zambia.

Tropical antenna, arrays of horizontal half-wave dipoles arranged horizontally, without reflector.

Designation: CT m/n/h

m = number of half-wave dipoles in each horizontal row

n = number of parallel rows spaced half a wavelength apart

h = height above the ground in wavelengths

Possible slew and the design frequency are entered in separate requirement fields.

"The Grand Tour across all continents" is the new name for the DSWCI annual contest compiled by Jaroslav Bohac. The DSWCI welcomes this new initiative and invites all DX-ers to take part in the competition.

THE DANISH SHORTWAVE CLUBS INTERNATIONAL  
Tavleager 31, 2670 Greve, DENMARK

First International DX Contest "The Grand Tour across all Continents".

This completely new contest is held from Friday 3rd December 2010, 0000 UTC, to Sunday 19h December 2010, 2400 UTC. It is open to all shortwave listeners regardless to their membership in any DX club.

Primary contest frequencies are from 2300 to 26100 kHz. Logs outside this range will be valued by half points.

The contest fee EUR 3.00 / IRC 4 / USD 5.00 shall be sent together with the contest form to:

Jaroslav Bohac, Svestkova 2828/7, 400 11 Usti n.L., CZECH REPUBLIC  
<trams @ volny.cz>

Deadline: 31st December 2010 (date of post stamp).

Each participant will receive a contest diploma with his / her classification and a list of participants with their results. The first three participants will be awarded non-cash prizes.

In Part 1 listen please to any BC station of the contest country, for 15 minutes at least. For one country one log only. Unofficial, pirate and clandestine stations are not allowed.

Scoring: 1000 points of each logged country will be divided by a number of logs and rounded to two decimal places.

In Part 2 you can raise your score by listening to any DX programme. The number of DX programmes is limited to 4! No particular country limit. Scoring in the same way as in Part 1, maximum point value 100 points for one DX programme.

We wish you good listening!

Receiver: Antenna:  
I logged all the following stations myself during the contest period.

---

signature

Part 1 countries

Albania, Austria, Belarus, Vatican State

Egypt, Ethiopia, South Africa

Saudi Arabia, Bangladesh, China P.R., India, Indonesia, Sri Lanka

Argentina, Australia, Guam.

Log Country/ITU, Station, Date, UTC, Frequency, DX program, language,  
program details.

Standard web form questionnaire see page 22-25 on Shortwave News,  
September/October 2010 issue.

Please download print-out

(R BULGARIA DX MIX News, Ivo Ivanov, via wwdxc BC-DX TopNews Oct 30)

ALBANIA [and non] Checking R. Tirana on new B-10 frequencies and times to North America:

At 1530 UT Nov 1, English on 13640 kHz, fair signal but undermodulated as usual. No co-channel interference (CCI), nor adjacent channel interference (ACI) tho there are very weak signals on 13635 and 13645 kHz. Aoki says 13645 kHz is AIR Gujrati service via Bangalore; nothing listed on 13635 kHz.

At 1945 UT on portable, English on 7465 kHz inaudible but not surprising as for Europe; 11635 kHz fair with correct new schedule, no CCI nor ACI. Should have been sufficient on home rig with longwire.

At 2100 UT on portable, English on 7530 kHz poor but better than very poor 9895 kHz; however, no ACI nor CCI. Which will do better should vary here depending on daily MUF fluxuations. Primarily for Europe, anyway.

At 2143 UT on portable, Albanian on 7435 kHz very poor but no ACI or CCI; inaudible vs noise level on 5970 kHz for Europe, 2130-2300 UT broadcast.

At 0002 UT Nov 2, Albanian on 7425 kHz better than 6130 kHz, both fair. Nothing on 7420, but something weaker in Russian on 7430 kHz which is VOR via Armenia to Europe, Central America, Caribbean and Mexico.

6130 kHz has only lite CCI, not sure what; adjacent channels not strong enough to bother, with Bolivia causing het to something on 6135 kHz presumably VOR to South America via Tajikistan, and two or three weak stations on 6125 kHz, mainly Spain to South America but quite poor and fluttery.

By 0058 UT, the unID CCI on 6130 was a little worse, possibly Laos or more likely Tibet, but we probably can't do better on primetime 49m than share with something on the other worldside.

At 0130 UT, 6130 kHz opens in English, fair signal and not hearing the CCI now. Not yet checked are 6130 kHz for English at 0245 UT; 6100 kHz for English at 0330 and 0400 UT, but on UT Monday, Tirana's night off, they seemed to be clear enough.

At 0130 UT, 6130 kHz opens in English, fair signal and not hearing the CCI now. At 0248, 6130 is good with no CCI or ACI. At 0343, 6100 is better with no CCI or ACI. At 0429, 6100 is still good with no CCI or ACI.  
(Glenn Hauser-OK-USA, dxld Nov 2)

ALGERIA 6295.15 kHz RASD Tindouf in Algeria. It's noon, and they're still on the air, which is rather unusual. Yesterday, the (evening only?) Castilian prgr started at 2303 UT; at 2336 UT, they were off the air:

700 kHz at 2258-2326 UT, 01 Nov'10, Arabic, music, announcement, jingle, Castilian prgr, with music & talks; 34433, adjt. QRM de ALG 702 kHz. // 6297.15 kHz.

Today, 3rd Nov, they did it again, i.e. aired an extended morning bcst only to close at 1300 UT, with the carrier [6297.15 kHz] removed off the air only at 1305 UT. It became quite fluttery at 1200 UT, and remained so until approx. 1230 UT, but then improved to the level experienced during the, say, 30 min. segment prior to noon; fair signal, no QRM.

Yesterday's evening, the 30 min. Castilian prgr ended at 2330 UT followed by what they may call "Natl. Anthem", so it was cut by half as compared to many of the previous years.  
(Carlos Goncalves-POR, wwdxc BC-DX TopNews Nov 1/3)

ARGENTINA RAE is at the crisis of closing shortwave transmission. Sr. Marcello Carvajal, Japanese section of RAE (Radiodifusora Argentina al Exterior), informed Toshimichi Ohtake of JSWC, on November 3 that RAE is now at a crisis of closing shortwave transmission. Their only shortwave transmitter (probably Harris SW-100 at General Pacheco installed in 1977) is had its day, and will be soon unusable unless proper repairing is done. But Argentine government does not admit the budget for repairing.

As it is, shortwave transmission will be closed after January 1, 2011. The director of RAE ordered all the sections to gather the mails from the listeners to protect their shortwave transmission. Those who are willing to continue RAE's shortwave service should send mails to

CAUTION: The PDF file is not clear as to whether days are local days or UT days. I have shown days above so they correspond with days as all agreed in WRTH, AOKI and EiBi, but which is inconsistent with the days showing in the PDF file. Therefore, it is possible that days shown in the U time period from 1300 to 2400 above may be local days.

 (ibid. via William Hague-AUS, NWDXC Nov 2)

AUSTRIA Reminder of special broadcasts from Austria Nov 07 and 14.

There will be a special broadcast via the 100 kW transmitter at Moosbrunn to commemorate the 50th anniversary of the Austrian Military Radio Society formed for Austrian forces to use amateur radio to communicate during Peace Support Missions. The transmissions are on Nov 07 and 14 at 1000-1030 to Europe on 6155 and 1600-1630 on 17620 to Eastern North America.

Amateur Radio station OE50ARMS will operate after the broadcast on 7120 for Europe, 14210 for North America. QSLs via <oe4rgc @ amrs.at>

The Austrian Military Radio Society website is <www.amrs.at>

(transformed format by Alexey Zinevich-BLR, dxld Nov 4)

BONAIRE [see also Bosnia] 6195 NHK World Radio Japon, Oct 31 at 0516  
UT in Spanish, ex-6080. The 0500 UT RNW Dutch relay via Bonaire on 6165 is  
gone, moved one hour later to 0600 UT. This means that there is no longer  
a possibility of a leapfrog mixing product on 6250 kHz confusing Spanish  
for Equatorial Guinea since 6195 kHz is the only Bonaire frequency on the  
air during this hour.

From RN's B-10 online schedule I have extracted all the 6 MHz-band Bonaire  
entries, to facilitate future computation of leapfrog mixing products  
whenever the times overlap, those could appear, most obviously if they  
fall above 6200 or below 5900 kHz:

2359-0027 6145 180 RNW Nld 1234567 sAMn/CAR  
2359-0157 6165 210 RNW Spa 1234567 cAM/sAMnw  
0059-0127 6190 341 RNW Nld 1234567 nAMe rather now 6195 also, wb  
0159-0357 6165 305 RNW Spa 1234567 MEX/cAM  
0229-0250 6040 341 VAT Fra 1234567 nAMe  
0259-0327 6100 335 RNW Nld 1234567 nAMc  
0329-0357 6195 210 RNW Nld 1234567 sAMnw  
0359-0427 6165 305 RNW Nld 1234567 MexECarSUSA  
0400-0430 6195 210 NHK Spa 1234567 sAMnw  
0500-0530 6195 290 NHK Spa 1234567 MEX

0559-0627 6165 320 RNW Nld 1234567 nAMw

0929-1000 6020 110 RNW Nld 234567 SUR  
1000-1030 6195 210 NHK Spa 1234567 sAMn  
1000-1200 5905 180 DWL Ger 1234567 CAR  
1059-1127 6165 320 RNW Spa 1234567 CAR/Florida  
1129-1157 6165 210 RNW Spa 1234567 Colombia  
1159-1227 6165 180 RNW Spa 1234567 Venezuela

If I have a spare moment, I might go ahead and compute all the possible leapfrog times and frequencies from this. The same thing could be done with Sackville on 49mb.

(Glenn Hauser-OK-USA, dxld Nov 4)

BOSNIA [SERBIA/BONAIRE] 6190 heavy CCI here with 4 Hz SAH between RNW Bonaire, 341 degrees in Dutch to ENAm, Nov 1 at 0106 UT, and something Slavic. Must be IRS. Fortunately, RNW finishes at 0127 UT, and then uncovers IRS, 0129 IS repeated for a minute on different instruments starting with piano, later synthesizer, guitar. 0130 UT opening English and right into news about Croatia. Surprised to hear IRS re-opening English at 0200 UT, still in the clear, and continued at least a few minutes. Presumed new additional broadcast, but next check 0216 UT it was gone and never came back, so must have been an overrun by mistake; presumably English repeats on the internet/program feed only.

(Glenn Hauser-OK-USA, dxld Nov 2)

RNW Bonaire replaced up to 6195 kHz channel.

CANADA Radio Canada International B-10 technical sked:  
07.11.2010 - 13.03.2011:

<[http://www.rcinet.ca/english/illustration/schedule/0frMGx\\_RCI-TECH-B10-ENG.pdf](http://www.rcinet.ca/english/illustration/schedule/0frMGx_RCI-TECH-B10-ENG.pdf)>

(Alexey Zinevich-BLR, dxld Nov 4)

IBB Spanish (i.e. R Marti) via Sackville Canada is now scheduled:

2000-2200 9565, 0100-0300 9825

VOA Portuguese to Africa:

1700-1730 (Sat/Sun also 1730-1800) 17740

(plus GB 17740 Mon-Fri only 1800-1830)

Before 2200 UT Sunday, 9565 had both Marti and VOA Music Mix! Plus jamming. Music Mix went off at 2159 UT. Greenville is scheduled from 2200 to 2400 with Marti, altho in A-10 it was on from 17 to 24; apparent lack of coordination.

9825 also has Greenville scheduled 0000-0300, so in the 0100-0300 period it could be one or the other (or both). The RCI/TRT swap was already canceled at the end of B-09 season.

(Glenn Hauser-USA, dxld Nov 4)

CHINA 5990 CRI Hohhot in Russisch.

Am 04.11.2010 um 00:23 schrieb Wolfgang Bueschel: Der Sender oszilliert so schoen - echt hoerenswert um 2310 UT. 73 wb

(wb, wwdxc BC-DX TopNews Nov 4)

Hallo, - ist das die Sendeanlage von 5990 kHz bei Hohhot CHN (nicht Huhhot!)

mit den Koordinaten 40.71789982386719 N 111.55518651008606 E Google-Maps?

(Theodor Averbeck-D, A-DX Nov 5)

Re: 5990 CRI Hohhot in Russisch

Ja, das weiss man nicht genau. Die Frage war schon Gegenstand von Diskussionen mit WRTH People in den vergangenen Jahren.

4 Stationen sind bekannt:

(1)

CHN Hohhot, das ist die Internat. Russisch/Mongolian SW site 100 kW 345/70/250deg, beim Ort Xigou - 46 km westlich von Hohhot, so lautet die Google info.

Die neuere der beiden Kurzwellenstationen, von der Station man zwar wusste, aber erst jetzt durch Google Earth und Google Maps nunmehr diese genau eingeordnet wurde.

Zeitschieberegler fuer historische Aufnahmen auf 11. Maerz 2006 ziehen, dann sieht man die Antennen sehr schoen

Das Senderhaus mit dem roten Dach bei

40 47 35.81 N 111 11 51.94 E

3 Antennen und 4 Doppelmasten der neueren Bauart fuer 345 Grad (dimmy wegen dem Braunkohlendunst? bei dem Schappschuss am 16.3.08) bei

40 47 46.70 N 111 12 05.97 E

und genau diese Antennen, sehr hoch gestockte Dipol haben gestern Abend dieses oszillierende Signal abgeliefert. 345 Grad passt auch schoen zu uns nach Mitteleuropa.

sowie 2 Doppelmasten / 1 Antenne fuer die Richtung 70/250 Grad

40 47 42.06 N 111 12 09.83 E

Das ganze ist etwas in den Bergen versteckt, das war(?) bei der Errichtung auch noch eine strategische Frage.

(2)

Die aeltere International und Domestic Station naeher bei Hohhot gelegen. Dieser Standort macht einen recht schmutzigen Eindruck einer Industriegegend. Dagegen sieht Juelich oder Wertachtal direkt elegant aus.

CHN Hohhot, domestic SW 11 curtains, 4000 4525 4620 4785 kHz  
7 Antennen aelteren Typs links von den gruenen Seen. Bei  
40 42 53.61 N 111 33 0.66 E

sowie sechs Antennen (7 Doppelmasts), aelteren Typs bei  
40 43 06.05 N 111 33 18.43 E

sowie zwei Antennen (3 Doppelmasts), sehr neuen Typs mit vielen Dipolreihen gestockt, war im Google image von 2004 noch nicht, aber dagegen im Snap von Maerz 2006 zu sehen.

40 43 14.35 N 111 33 10.12 E

(3)

CHN CRI Internat. Dienst Hohhot MW 963 kHz Richtung russischer Ferner Osten.

40 41 45.19 N 111 46 31.18 E

(4)

MW CHN Hohhot, Nei Menggu 675 / 1458 kHz 200 kW

40 44 13.02 N 111 28 28.84 E

(wb, wwdxc BC-DX TopNews Nov 5)

CHINA 4220 Reactivation of PBS Qinghai. PBS Qinghai (presumed), random checks from 1247 to 1509 UT, Nov 1. Reactivated again after being absent since May 1.

In assume Tibetan with indigenous chanting/singing. Outdated frequency schedule:

<<http://www.qhtb.cn/fujian/view.jsp?id=413&zt=0>>

with their main site at <<http://www.qhtb.cn/>>

4750, at 1510 UT (after Bangladesh signed off) heard TWO stations. One was CNR1 and perhaps the weaker station underneath them was the return of PBS Qinghai? Listening last week after 1500 UT clearly only heard CNR1 and nothing else. Needs more monitoring. Ironic that I was recently asking when PBS Qinghai was last heard here.

(Ron Howard-CA-USA, dxld Nov 1)

Thanks to Mauno Ritola (Finland) for his observations today (Nov 1) regarding the PBS Qinghai reactivation.

4220, with 2 minutes of instrumental music at 2234 UT, then test tone for five minutes and OC until 2250 UT, when NA and ID in Chinese and English and then into Tibetan programming. Weak.

4750, carrier on at 2143 UT, but no programming until 2200 UT, so that is the start time currently, not 2150 UT; Qinghai first announced Beijing time and then very briefly "Qinghai ..."; CNR1 on 4750.01 and Qinghai 4749.99 kHz.

I appreciate Mauno's confirmation! Very nice to have PBS Qinghai

broadcasting again.

(Ron Howard-CA-USA, dxld Nov 2)

GERMANY/CROATIA 7375 via Germany sites, leading up to 0300 UT Nov 1,  
three widely-spaced time pips, Croatian ID, opening Voice of Croatia in  
English with Croatia Today for 31 Oct. So the English segment has as usual  
shifted one UT hour later from 0200 UT in A-10. I suppose the earlier one  
is at 2315 instead of 2215, unconfirmed.

Between 02 and 04, all three Wertachtal transmitters are on 7375 kHz, at  
240, 300 and 330 degrees, for a total of 325 kW (one of them 125). Since  
Nauen is no longer in the mix, it should be easy to keep them  
synchronized.

& 11645 kHz on Nov 5th again, instead of 12105 kHz , which used  
Oct 31 to Nov 4th only. (wb)

GREECE VoGreece Nov 4th - third transmitter again OFF ?

After 4 weeks repair from Sept. til Oct 23 at Avlis tx center, the 3rd TX  
unit of Voice of Greece ERA-5 went on air again Oct 23.

Probably the TX is again OFF this morning Nov 4th. From 06.45-06.50 UT  
only two units on air:

7475 S=9+15dB BBCWS relay in En, rebroadcast of Radio Filia Athens.  
9420 S=9+20dB carried Greek ERA-5 program.

Night service on 7475 ended at 06.50 UT.

15630 kHz came on air at 06.53 UT, but had the multilingual service  
instead of ERA-5 Greek this morning. BBCMS English program on air til

06.59 UT, followed by R Filia ID in French at 07.00 UT and Relay from RFI Paris in French.

But on Nov 5th at 0800 UT back on air on all three tx units. Instead of previously used 12105 kHz, now registered 11645 kHz heard again with multiling sce, 06 En BBCWS relay, 07 Fr RFI relay, 08 Sp, 09 Ge, 09.30 UT Ru.

[later] 11645 Voice of Greece carries R Filia relay again, multiling sce 0600-1000 UT again on air. Appeared on Oct 31 to Nov 3rd on 12105 kHz instead.

But on Nov 5th at 0800 UT back on air on all three tx units. Instead of previously used 12105 kHz, now registered 11645 kHz heard again with multiling sce, 06 En BBCWS relay, 07 Fr RFI relay, 08 Sp, 09 Ge, 09.30 UT Ru.

Today at 0800 UT Spanish nx with S=9+20dB signal strength.

ERA-5 Greek service at same time only moderate on 9420 kHz - daylight damping. But much better on // Greek 15630 S=9+20dB.

[later] Nov 5th at 12.00 and 14.49 UT, - The Voice of Greece at Avlis is STILL in trouble with their positive working of the 3rd shortwave unit at Avlis transmitting center.

Today Nov 5th morning all three transmitter units were on air til my last check at 11.00 UT.

9935 kHz at 10.52 UT on air, carrier with S=9+10dB - always a little weaker in Germany than 9420, 11645/12105 - kHz etc.

Thessaloniki audio switched on the air with flute interval signal at 10.58:27 UT and started with Greek National Anthem hymn at 10.59:10 UT.

Greek services on scheduled 15650 kHz, powerful at S=9+25 dB level, at 14.40 UT S=9+20dB in southern Germany, well heard.

At further check at 12.00 and 14.49 UT ONLY TWO TRANSMITTER were ON AIR.

9420 kHz at S=9+20dB suffers hefty by co-channel CNR China National Radio in Mongolian and Kazakh.

9935 kHz WAS OFF AT 12.00 and 14.49 UT check ! So, repair is underway at Avlis this afternoon.

"OUR HOMELAND" - Szuelofoelduenk program.

Not real broadcast on air, stopped homeland service on June 30, 2010.

Is only a provisional registration entry, maybe change in Hungarian government will lead to bring "Szuelofoelduenk" service on air again sometime in future.

Nice cute broadcasting center on shortwave, here is a photo of the Jaszbereny site:

(IRIB via wwdxc BC-DX TopNews Oct 29)

IRAN 15390 IRIB Tehran in Ebri-Hebrew. VoIRIB Tehran is the only big SW station which carries Ebri-Hebrew language program to Israel. Noted Nov 2nd at 1200-1227 UT on 15390KAM, S=9+30dB powerhouse, excellent arm-chair reception and superb audio in the clear too, // 13740SIR also 500 kW Telefunken tx unit, slow fade S=9+10 ... to +25dB signal strength.

IRIB's morning service in Ebri-Hebrew at 0430-0457 UT via 9820KAM and 11925SIR tx centers, both 500 kW units in use.

The only PRW Warsaw Poland outlet in Hebrew on RMP7265 kHz 1900-1930 UT, 500 kW of power.

(wb, wwdxc BC-DX TopNews Nov 2)

IRAN [and non] IRIB's so-called "Voice of Justice" English hour at 0130 UT to North America is blocked on both new B-10 frequencies; wonderful coeordination there! Nov 1 at 0135 UT, Voice of Russia English is atop 7250 kHz Qur'an from Iran.

(Glenn Hauser-OK-USA, dxld Nov 2)

IRAN/IRAQ 3929.07v R Voice of Kurdistan, Sulaimaniya, Northern Iraq, 0320-0326\*, Oct 31 and Nov 01, Kurdish song and closing ann in Kurdish, 32443, Iranian jammer stopped at 0330\* both days.

3970.04v R Voice of Kurdistan, Sulaimaniya, Northern Iraq, 0327-0410, Oct 31 and Nov 01, probably new frequency as Iranian jammers were heard simultaneously on 3930v and 3970v at 0320! Kurdish talk and conversation with distorted audio on Oct 31, but corrected Nov 01; Kurdish songs, 0400 Farsi ann "kHz", ID: "Im Radyo Sedaye Kordestane", news by man and woman, 33433. Jumping to 3980.02 at 0330, jammer followed 0331, jumped back to 3970 at 0335 with 34433, jammer followed at 0343. Jumped to 3980 at 0344, but jammer followed first at 0410, so 34333, but here was slight QRM from Croatia 3985 kHz.

4869.96v Voice of Iranian Kurdistan, via Salah Al-Din, Northern Iraq, 0325-0355 UT, Oct 31, Kurdish talk and Kurdish music, jammed by Iran, 43333. At 0328 the Voice of Iranian Kurdistan jumped to 4880.06 kHz where it was without jamming till 0345 and heard with a song about radio and ID: "Aira dangi Kurdistan Irana" with 35333. At 0345 the jammer also arrived at 4880, but the Voice of Iranian Kurdistan tried to escape at 0348 by jumping to 4890.50, but this time the jammer followed at 0349 UT.

(Anker Petersen-DEN, dswci DXW Nov 3)

3927.92 R Voice of Kurdistan noted at 0300 UT Nov 1st, and accompanied by Iranian bubble jamming from Iran. And two other bubble jammers on 3980.04 kHz and 4869.99/4875.22 kHz jammed at 0305 to 0400 UT at same time.

(wb, wwdxc BC-DX TopNews Nov 1)

3980, Clandestine. It seems a new (or old reactivated) unID anti Iran's government station was observed first on Oct 7 at 1405 on 3970 speaking in Kurdish and Farsi and jammed. To avoid the jammer often (each 3-4 minutes) is jumping on different frequencies in the range 3970-3981 kHz. The schedule is presumed 1400-1500 and 0300-0400 UT. Heard Oct 27 at 0330. The other two V of Kurdistan stations on 3931 and on 4881 kHz also were heard at 0330 UT. All three were jammed

(Rumen Pankov-BUL, Nov ARDXC ADXN direct and via dxld)

ISRAEL KOL in Persian language in B-10. Yes, 15760 is the stronger channel, at 1500-1530 UT S=9+15dB in southern Germany, but decreasing now. 13850 very tiny S=3-4 here, suffers by adjacent WWCR 13845 religious ROAR, latter S=9+15dB. But Europe is not the target ...

(wb, wwdxc BC-DX TopNews Oct 31)

LITUANIA Die deutsche Redaktion von Radio HCJB Quito hat folgenden Wintersendeplan 2010/11 fuer Europa bekannt gegeben:

1530-1630 UT 6035 kHz Sitkunai 100 kW. Plattdeutsch. 1600 UT Hochdeutsch. 6035 1530-1630 in Richtung 19,29, RUS/CIS/KAZ, auf 79 Grad.

(Iris Rauscher-EQA, via ntt Oct 30)

LUXEMBOURG DRM transmissions on 1440 are almost gone, they have meanwhile been cut back to a token operation between 8 AM and 9 AM local time. Otherwise the Marnach transmitter is operated in AM mode, in the time slots 04:30-08:00 and 17:00-02:00 CET or thereabouts. As well-known, a large amount of this airtime is leased out to missionaries, CRI and KBS, which presumably for now saved 1440 kHz from being closed down altogether. Gossip has it that RTL meanwhile became less willing to pump money into its Luxembourg radio operations. This gathered, amongst other sources, from

<<http://forum.mysnip.de/read.php?8773,850244>>

Concerning the power used on 1440 kHz: It is understood that Marnach has now Transradio solid-state equipment for 600 kW and that these 600 kW are the power at which the paid relays are being run. The tube transmitters (S 4006, they should still have an even older 600 kW Telefunken/Transradio transmitter with classic plate modulation as well), in the past run in a pair as 1200 kW, are no longer in routine use.

[later] RTL DRM: Their use of 6095 kHz may have been cut back even further now. This morning it has been reported that the transmitter was on from 0700 to 0800 UT only, carrying 0700-0730 UT the abridged version of KBS German and 0730-0800 UT RTL Radio. Exactly the same pattern as on 1440 kHz.

(Kai Ludwig-D, dxld Oct 30/31)

MADAGASCAR/IRAN 17690 NHK interval signal over and over again 1230-1242 UT Oct 31, endless loop, registered via Madagascar relay site. But no real program heard. Transmitter switched off at 1243-1244 UT, "sorry for interruption ..." started then in French, regular program from 1244 UT. Read letterbox by Japanese lady and African native male announcer in French, letter from Congo read. Much fluttery signal from MDG S=9+10dB. Always underneath heard co-channel IRIB Sirjan in Bahasa Malay. (wb, wwdxc BC-DX TopNews Oct 31)

MALAYSIA RT Malaysia DRM. RT Malaysia seems to started DRM test broadcast.

Japanese DXer received DRM broadcast on Nov. 4 at 1030 UT on 11885 kHz.

<<http://ani.atz.jp/DX/bbs1/img/9985.gif>> by Hiro in Akita.

<<http://ani.atz.jp/DX/bbs1/img/9986.gif>> by Nakanaka in Hokkaido.

And Label ID:8299 is confirmed at 7235 kHz at 1148 UT. Probably this seems to be RT Malaysia, too. On Nov. 5 can't confirm 11885 kHz and 7235 kHz.

<<http://www.drm.org/uploads/files/ContTx4Asiarelease.pdf>>

[later] Subject: RT Malaysia on 7255 kHz. I can receive sound like Tamil service seeming to be RT Malaysia "Minnal-FM" on 7255 kHz from Nov. 2 at +0930-2030+ UT. New TX of Continental Model 418G-DRM tx?

(Sei-ichi Hasegawa-JPN, dxld Nov 5)

MAURITANIA 7245 R. Mauritanie, Nouakchott. On Oct 30 at 0704-0715 UT male in Arabic talks "African", very short Arabic music between talk break. 35333.

(Lucio Otavio Bobrowiec-SP-BRA, hcdx Oct 30)

MOLDOVA 6240 kHz. Auf der 6240 kHz laeuft im Moment (2209 UT) seit 2145 UT Radio PMR ("Pridnestrovyja") in russischer Sprache. Das ist nach meinem Wissen neu. Die Sendung ist auch laenger als die anderen. Vorher kamen die

ueblichen 15 Minuten in Deutsch (zu dieser Zeit allerdings auch neu).  
Zuvor auf der gleichen Frequenz war vorhin der bekannte Zyklus  
(En/Fr/Ge/En/Fr/Ge/En/Fr) von 1800-2000 UT.  
(Hans Weber-D, A-DX Nov 1)

6240 kHz Radio PMR. Thanks to a log on the A-DX list by Hans Weber, I also heard Radio PMR from Pridnestrovya, Moldova, with a new programme in Russian. Hans says it started at 2145 UTC (after the usual pattern En/Fr/Ge/En/Fr/Ge/En/Fr between 1800 and 2000 UT). The Russian broadcast ran until 2215 UT, with IDs removing any doubts. I kept tuning in from time to time, and observed the following:

Frequency: 6240 kHz  
Date: 1 November 2010 (UT)  
2145-2215 PMR in Russian  
2215-2230 PMR in English  
2230-2245 PMR in French  
2245-2300 PMR in German  
2300-2330 did not listen <<  
2330-2345 PMR in German  
2345-2357 PMR in English  
2357-2359 PMR in French, usual start of this language section, just before 0000 UT the audio was switched in mid-programme to an old-school loud "This is Moscow!" which introduces the next:  
0000- ... Voice of Russia in English. SINPO 55433. All via tx Grigoriopol, Moldova.

[later]

Only the German programme announced the broadcast schedule for German programmes (matching today's new observations!), the postal address. They asked for an envelope and an IRC if you desire a reply by snail mail.

(They explicitly asked for a "coupon" so those seem to be accepted in that internationally non-recognized entity.) Does this mean that German DXers are the most demanding ones? Or a host that does care a bit about listener contact?

(Eike Bierwirth-D, dxld Nov 4 - hcdx Nov 2)

Re Radio PMR. - 2300-2330 did not listen -  
23.00 UT was also PMR in English - quarter hr bcast , as 2215 UT before.  
Nothing found on PMW schedule on their website.

Now at 2218 UT again PMR in English S=9+20dB here in Germany, at 0000-0600 UT transmitter in Grigoriopol rent by VoRussia, also in En, // check mostly 7250 kHz, but hit by co-channel VOIRIB Tehran also in English latter at 0130-0230 UT.  
(wb, wwdxc BC-DX TopNews Nov 2)

On Nov 2, Eike Bierwirth in Leipzig monitored Radio PMR on 6240 with half-hour instead of quarter-hour language segments, from 1800 onwards: 1800 Russian (extrapolated), 1830 English, 1900 French, 1930 German, 2000 Russian, 2030 English, 2100 French, 2130 German, 2200 Russian, and the rest extrapolated: 2230 English, 2300 French, 2330 German to 2400 when VOR takes over 6240 kHz.

(Glenn Hauser-OK-USA, dxld Nov 4)

New schedule for Radio PMR on 6240 KCH 300 kW / 309 deg to WeEUR:  
1800-2000 in Russian/English/French/German each 30 min. and repeated 2000-

2200 and 2200-2400 UT.

(R BULGARIA DX MIX News, Ivo Ivanov, via wwdxc BC-DX TopNews Nov 4)

Radio PMR. PMR website shows a new but short schedule:

<<http://radiopmr.org/about/27/Cetka-veshhaniya>>

6240 kHz 500 kW 18.00-00.00 UT Russian English French German.

6240 Grigoriopol Moldova tx only used all night for Voice of Russia English service, observed on past Sun and Mon night. S=9+20dB signal.

So, PMR usage of Mayak Grigoriopol TX station moved to "before 0000 UT" ?

On their website they mention inauguration of GRI installation in 1971.

I remember me, when powerhouse Radio Moscow MW 1546 kHz appeared on air - in the mid 70ties, using the huge 2 km long directional Zarya antenna at Mayak Grigoriopol.

(wb, wwdxc BC-DX TopNews Nov 2)

Grigoriopol-Moldova first used 1493 kHz, where it caused bad interference to co-channel Leningrad even here in Sweden. After a few years GRI switched to 1546 kHz and Krasne went from 1546 to 935 kHz.

(Olle Alm-SWE, wwdxc BC-DX TopNews Nov 2)

MONACO Die US-amerikanische Radiomission Trans World Radio sendet seit 50 Jahren ueber Kurzwelle aus Monte Carlo (Monaco). Am 16. Oktober 1960 wurde die erste Sendung ueber einen 100 kW-Sender ausgestrahlt. Dabei nutzte TWR teilweise eine von den Nationalsozialisten errichtete Infrastruktur auf dem Mont Agel in Monte Carlo. Wo urspruenglich politische Propaganda zu hoeren sein sollte, wird seitdem die christliche Botschaft verbreitet. Urspruenglich war der Sendebeginn fuer den 1. Oktober geplant, verzoeagerte sich aber aus technischen Gruenden.

TWR, frueher Trans World Radio, wurde von dem amerikanischen Missionar Paul E. Freed (1918-1996) gegruendet. Vom 1954 bis 1959 sendete TWR ueber die "Stimme von Tanger" in Marokko. Als die internationale Zone in Tanger an Marokko zurueckgegeben wurde, musste TWR den Standort aufgeben. Bis dahin hatte TWR Sendungen in 24 Sprachen im Programm, darunter auch Deutsch. Bereits Mitte 1959 konnte Freed mit Radio Monte Carlo einen Sendevertrag abschliessen. Nach einem Dreivierteljahr Pause konnte das christliche Radio wieder europaweit auf Sendung gehen.

1952 nach der Gruendung von TWR lud Ralph Freed den deutschen Missionar Helmut Gaertner zur Mitarbeit ein. Gaertner arbeitete fuer die rund 30.000 evangelischen Christen und ihre Gemeinden in Spanien. Da der Aufenthalt fuer Auslaender in Spanien nie fuer lange Zeit gewaehrt wurde, arbeitete er von Marokko aus. Gaertner erklarte sich sofort bereit, fuer die Radiomission eine deutschsprachige Abteilung aufzubauen. So kam es, dass ab 1956 auch in deutscher Sprache zunaechst aus Tanger gesendet wurde.

Im Oktober 1959 gruendete sich auf Bestreben von Gaertner im mittelhessischen Wetzlar ein deutscher Zweig unter dem Namen "Evangeliums-Rundfunk" (ERF). Die erste Sendung aus Monte Carlo in deutscher Sprache sollte mit dem Sendebeginn in Monte Carlo am 2. Oktober 1960 ausgestrahlt werden. Doch technische Probleme fuehrten dazu, dass erst am 5. Februar 1961 Sendestart fuer die Programme aus Wetzlar sein konnte.

Heute sendet TWR aus Monte Carlo in insgesamt 16 Sprachen. Deutsch wurde Ende Oktober 2007 nach mehr als 45 Jahren ueber Kurzwelle eingestellt, da der ERF inzwischen ueber andere Verbreitungswege wie Satellit, Kabel, Mittelwelle und Internet verfuegt.  
(ERF/Lothar Ruehl 11.10.2010; ntt Oct 30)

MONGOLIA/RUSSIA [to KOREA D.P.R. see RFA under USA] 648 / 1350 I see an interesting item on BDXC-UK Communication magazine Nov 2010, page 36 under KOREA/RUSSIA.

Radio Free Asia (in Korean to DPR Korea) at 1500-1900 UT is now on 648 kHz via Razdolnoye, Russian Far East relay site, replacing {mostly} Choibalsan, in Eastern Mongolia.  
(Sei-ichi Hasegawa-JPN, Sept 30, update to BrDXC-UK Guide to External Services on Mediumwave; in BrDXC-UK "Communication" Nov 2010)

In past seasons the Russians allowed only VOA to use the Razdolnoye, Russian Far East relay site for VOA services, not relayed Radio Free Asia programs from that place.

Checked the VOA and RFA schedules in Korean language revealed the following usage of Far East mediumwave station for US Korean external services.

648, Razdolnoye-RUS relay, 1500-2300 UT. RFA 1500-1900 UT, VOA still 1900-2100 UT, RFA 2100-2200 UT ... and 2200-2300 UT Unknown VOA sce to China mainland, either RFA Cantonese, or VOA Mandarin Chinese. Someone with skill of Chinese language should listen to MP4 files from remote monitoring at Taipei, Taiwan.

1350, Choibalsan MW relay, in Eastern Mongolia is only used on a single hour in the Korean early morning, at 2100-2200 UT for Radio Free Asia in Korean language. Supposedly Soviet made tx of 1986year, 500 kW at 8 masts directional SV4+4 antenna rather towards Beijing area at 150 degrees. Only side lobe towards N Korea.  
(wb, wwdxc BC-DX TopNews Nov 3)

MOROCCO 15340.0 RTM, Oct 29 at 1341 UT with Arabic music, hum, no HCJB audible, but back on this frequency again. After we found them on 15340 instead of 15341 last week, Mike Barraclough in UK had measured Morocco off-frequency again, Oct 26 at 1452 on 15341.2. Where next?  
(Glenn Hauser-OK-USA, dxld Nov 4)

15341.15 very odd heterodyne signal this morning at 0920 UT Oct 31. S=8-9 signal. Most probably RTM via Nador-MRC relay, program content in Arabic and French interspersed. Odd signal against co-channel CRI Xian Chinese broadcast on even 15340.00 kHz.

15341.15v, still terrible heterodyne from RTM Nador site relay in Arabic/French at 1320 UT Oct 31.  
(wb, wwdxc BC-DX TopNews Oct 31)

MYANMAR 5985.8 Myanma R, Yangon, Yegu, at 2344-0009 UT on Oct 13, 28 and 30, female speaker in vernacular, local version of US pop song, fair.  
(Bell and Bernardini, dswci DXW Nov 3)

The military regime in Myanmar suddenly has changed the official name of the country from "Union of Myanmar" to "The Republic of the Union of Myanmar" a few weeks before the Parliamentary Election on Nov 07. At the same time the official Flag and the National Anthem will be changed. The military has been in power since 1962 and changed the official name from Burma to Myanmar in 1989.

Updated: Oct. 29

(R BULGARIA DX MIX News, Ivo Ivanov, via wwdxc BC-DX TopNews Oct 30)

ROMANIA/GREECE Radio Romania International's English service has announced that, on Monday October 25, its history series 'Pro Memoria' will carry a feature 'on radio as the only form of fighting against communism available to the Romanian diaspora' prior to 1989. Apparently, the programme will put the spotlight on Radio Free Europe and other American-backed stations. 'Pro Memoria' is carried in all of RRI's English transmissions.

(Roger Tidy-UK, dxld Oct 22)

Were there any other American-backed stations in Romanian? (gh)

Hi Glenn, I haven't heard the programme yet, but according to RRI there were other American-backed stations broadcasting to Romania. In their pre-publicity, RRI mentions 'Radio Thessalonika'. It's not clear to me what they mean by this. I suppose they could mean the VOA relay, or was there a 'Radio Thessalonika' broadcasting in Romanian? See their webpage <<http://www.rri.ro>> and click on "What's on This Week".

[later:] Glenn, The 'Pro Memoria' feature was mainly about a station called Radio Future Romania, which was apparently broadcast from Thessaloniki until 1960. There was an interview with a Romanian exile, Mugur Valahu, who worked for the station, which he claimed was more

militant than Radio Free Europe. He revealed that his station broadcast warnings to Romanian government officials in an attempt to intimidate them, and that it called on the Romanian people to resist the regime. He added that, that, on one occasion, Romanian diplomats in Athens tried to kidnap him and that, on another occasion, an attempt was made to kill them. He claimed that the Bucharest government regarded Radio Future Romania as its main enemy.

(Roger Tidy-UK, dxld Oct 25)

From that close, it could have been on MW only, escaping notice of the SW DX world. (gh, dxld)

Here are the English archives of Pro Memoria for the history buffs out there:

<<http://www.rri.ro/arh-cat.shtml?lang=1&sec=9>>

The program is carried by RRI Russian, as well. So I guess there should be its German, French and Spanish versions, too.

(Sergei S.-RUS, dxld Oct 25)

Didn't get a chance to listen to this and the audio archive is of the 30 minute broadcast and I couldn't find the feature.

The script is online: Exiled Militants and Anticommunism on Radio Waves 25/10/2010

<<http://www.rri.ro/art.shtml?lang=1&sec=9&art=68092>>

In their newsletter they said that:

"Monday is the day when we take a look back in the history of Romanians, in "Pro Memoria." This week you are invited to listen to a feature on radio as the only form of fighting against communism available to the Romanian diaspora. Radio Free Europe is the best known example in this respect, but there have been other stations, which, on American support, fuelled the Romanians' anti-communist sentiment. One of these was Radio Thessaloniki, whose key figure was journalist Muger Valahu."

In the article they say that in 1954 with support from the Americans he founded "Radio Future Romania - Voice of the National Resistance" in Thessalonica, Greece and that he headed the station until 1960.

But on what transmitters did it broadcast and was it on medium wave, shortwave or both?

My 1958 Handbook has medium wave and shortwave transmitters in Salonika carrying VOA, including Rumanian broadcasts, which were also carried from the MV Courier. But from the article these broadcasts were clearly separate from the VOA ones.

(Mike Barraclough-UK, dxld Oct 27)

Morning programs of R Romania Intl always have features from previous day, so "Pro Memoria" is on Monday evenings and Tuesday mornings.

I attached in this e-mail "Pro Memoria" 6-minute feature [AAC, 48 kbps (2.1 MB)], or you can DOWNLOAD the entire broadcast directly from WRN ftp site. "Pro Memoria" segment runs from fourteenth till twentieth minute into broadcast.

## RADIO FREE YUGOSLAVIA - 27/04/2009

Countries under the grip of the Soviet Union in the wake of World War Two shared an ideology that united them all against Western capitalist countries, which they considered their deadliest enemy. Yet such a unity would soon be shattered. In 1948, Tito-led Yugoslavia denounced Stalin's claims to be the only one leader of Socialism, and forged his own way of building up socialism. For a long time Titoism bragged about its rift with the Soviet Union. Yet Serbian historian Svetozar Sojanovici's "Fall of Yugoslavia" published in 1997 revealed that such an ostensible heroism was nothing but a facade. Actually it was not Tito who broke with Stalin, but it was Stalin who repudiated Tito.

A supporter of the idea of exporting the communist revolution to the Balkans, Tito had repeatedly asked Stalin to support the Greek communist guerillas [sic], which ran counter to the promise he made to Churchill, actually breaking a deal. Considered to be a personality posing a big threat to the stability of the communist bloc, Tito was an outlaw in Moscow. The anti-Titoist Yugoslavs, considered traitors, defected to Moscow and the neighboring countries, for fear of retaliatory measures. Romania, led by Gheorghe Gheorghiu-Dej, involved in the Soviet-Yugoslav conflict, took sides with the Soviet Union, offering shelter to Yugoslav dissidence [sic] against Tito.

Yugoslavia's conflict with the USSR was also waged on radio waves. The "Free Yugoslavia" clandestine radio station was relocated to Bucharest in 1949.

During World War Two, Radio Free Yugoslavia broadcast from the USSR as one of COMINTERN's radio stations, contributing to the strengthening of the Yugoslav partisan movement.

The radio station had three services: Serbo-Croatian, Slovenian and Macedonian, and political instructions came from Moscow through the Romanian Communist Party's Central Committee, from Iosif Chisinevski's cabinet, who at that time controlled the media.

Among those who settled in Romania at that time was Milan Petrovici, a former deputy editor-in-chief of Free Yugoslavia. In an interview on Radio Romania's Oral History Center, Milan Petrovici recalls:

RUSSIA 4831 Oct 22 at 2035 UT, Russian religious, mixing product, good signal.  
(Giampiero Bernardini-ITA, dxld) SW - MW, what was it? (gh)

Usual intermodulation with Krasnodar Armavir powerful MW 1089 kHz 1200 kW.  
This in A-10 season  
5920 - 1089 = 4831  
5920 + 1089 = 7009 kHz, latter which is a complaint matter also of Ham Radio Bandwatch and German frequ authority BNetzA Bundesnetzagentur direction finding monitoring stations in 2010.

In B-10 season similar  
6090 - 1089 = 5001  
6090 + 1089 = 7179 kHz (Patrick Robic-AUT, A-DX Oct 31)  
(wb)

Russians last night to Americas, Oct 31:

6065 VoR St.P Sp at 01, Ru at 02 UT, S=9+40dB, co-ch IRIB Sirjan weak underneath.  
6240 VoR En Kaleidoscope via GRI-MDA, 01-03 UT, heavy 50 Hz buzz, S=9+25dB.  
7210 VoR 01-03 Sp via Moscow Taldom tx, most powerful stn last night, S=9+60dB!!!, // 6065 St. P.  
7220 VoR Russian 01 UT, via GRI-MDA. // 7430 ERV-ARM. S=9+40dB.  
7225 VoR different Russian program from Samara towards AF 00-03 UT. S=9+10dB. That is one of the 24hrs Russian service channels to serve Russian national foreign aid and Armed Forces personell in NE, ME, SOM, Indian Ocean, PAK, AFG etc.  
7250 Terrible mixture of both En txions, VoR En via Krasnodar ARM to NoAM S=9+30dB, and IRIB Tehran En to NoAM too, - underneath !!!  
7280 VoR, Sp at 02 UT via Krasnodar ARM, terremoto and vulcanos on Kamchatka, S=9+30dB.  
7430 VoR Russian via ERV-Armenia, little 50 Hz buzz, S=9+40dB, // 6065, 7220 kHz  
7440 UKR RUI via Lviv Krasne, only S=7 here, too much northwards lobe to to NoAM, Ukr 0200-0300 UT.  
9735 VoR in Sp via GUF site, S=7, 1/10th sec ahead! of 7280ARM, but 1/10th sec behind 7210 MSK powerhouse in //.  
9865 VoR in Sp at 0240 UT, S=9+20dB. 00-04 UT via Samara site, in sync with 7210MSK, 1/2 sec ahead of 7280ARM in //  
9965 VoR in Sp via ERV-Armenia, weak signal just above threshold, ahead of 7280ARM, 1 sec ahead of 7210MSK, 9735GUF.

11610, R. Tatarstan via Samara site, carrier still open early at 0849 UT  
Oct 31, Russian 0910-1000 UT.  
(wb, wwdxc BC-DX TopNews Oct 31)

VOR to North America is now on 7250 kHz via Tbilisskaya with a tremendous S=9+60dB signal, just as last winter. 6240 kHz is also strong, but not like 7250 kHz. Monday morning I noted VOIRI co-channel on 7250 kHz, also in English and almost as strong as VOR (I did not make a note of the exact time, somewhere around 0230 UT). VOR to Latin America with a badly motorboating\* transmitter is heard on 7210 kHz.

(Olle Alm-SWE, wwdxc BC-DX TopNews Nov 2)

\* nothing noted here such - maybe a side lobe signal into Sweden of the more CeAM direction antenna. (wb)

VOICE OF RUSSIA TURNS 81.

There's a special report that you can listen to or read at:

<<http://english.ruvr.ru/2010/10/29/30014974.html>>

I'm a surprised to learn that the station still employs about a thousand people. There's a good chunk of Bystritskiy's interview.

Also, there's a picture gallery:

<<http://english.ruvr.ru/2010/10/29/30191491.html>>

I found this picture to be especially strange:

<<http://english.ruvr.ru/photoalbum/30191491/30191518>>

How does it relate to VoR? Do they want to suggest that Hilter and people in his circle were Radio Moscow's avid listeners?!

(Sergei S. in dxld Nov 4)

RWANDA/MADAGASCAR 11605 via Kigali-RRW in the period 2000-2155 UTC.

There was an interesting issue on 11605 kHz when I tuned in at 2150 UTC yesterday (31 Oct). There was a "pulsing" sound on the transmission, something I have heard before when there are two transmitters on the same frequency, but their carriers are a few Hertz apart. I believe this was caused by the Madagascar transmitter that opens at 2200 UT in Indonesian coming on the air early. At 2200 UT programme modulation in Indonesian began. Certainly there was a problem for the last few minutes to DWL German transmission from Kigali.

(William Hague-UK, NWDXC Nov 1)

ST HELENA TV-Tip ARTE.

08.11.2010 um 08:00 MEZ CET. "360 degr - Geo Reportage" Saint Helena.

(Frankreich, Deutschland, 2009, 53mn)

Kaum eine bewohnte Insel der Welt ist weiter entfernt von jeglicher Nachbarschaft als das britische Ueberseeterritorium Saint Helena im suedlichen Atlantischen Ozean. 2.000 Kilometer sind es bis zur afrikanischen und 3.000 bis zur suedamerikanischen Kueste. Dass die Briten Napoleon hierher in die Verbannung schickten, hat seinen Grund. Denn von Saint Helena gab und gibt es praktisch kein Entkommen. Bis heute hat die Insel keinen Flughafen. Rund 4.000 "Saints", wie sich die Inselbewohner nennen, leben auf dem isolierten Eiland. "360 degr - Geo Reportage" zeigt ihren Alltag.

Saint Helena, die einsame britische Insel mitten im Atlantik, sollte endlich einen Flughafen bekommen, meint die Regierung im fernen London. Fuer Michael Benjamin ein Grund, nach 33 Jahren im Ausland auf seine Heimatinsel zurueckzukehren. Mit einem Gastronomiebetrieb will er zuerst die Bauarbeiter des Flugplatzes versorgen und spaeter die Touristen. Das neue Wohnhaus ist bezogen, Frau und Sohn leben auch schon auf der Insel.

Doch nun wurde der Beschluss zum Flughafenbau rueckgaengig gemacht. Die Zentralregierung in London hat wegen der Finanzkrise kein Geld mehr fuer sein entferntes Ueberseeterritorium. Saint Helena bleibt also abgeschnitten vom Rest der Welt. Ohne Flughafen bietet die abgelegene

Atlantikinsel praktisch keine Perspektiven.

Wovon sollen Michael Benjamin und seine Familie nun leben? Der Alltag auf Saint Helena wird fuer sie zu einem Ueberlebenskampf mit ungewissem Ausgang. "360 degr - Geo Reportage" begleitet neben den Benjamins weitere Menschen bei ihrer Rueckkehr nach Saint Helena. Nach 21 Jahren zieht es auch die gebuertige Insulanerin Winnie Thomas mit ihrer Tochter Annalise aus England zurueck in die Heimat. Ehemann und Vater Brian Thomas verstarb erst kuerzlich an Krebs. Nun soll er im Heimatboden seine letzte Ruhe finden. Fuer Winnie und Annalise beginnt ein neues Leben. Koennen sich die beiden an die Einsamkeit gewoehnen? Wie wird Annalise von ihren neuen Mitschuelern aufgenommen? Und wie reagieren die Verwandten auf die Rueckkehr der beiden?

SAIPAN 9715 - the IBB transmitter still in awful shape to be kept on the air, Nov 1 at 1342 in Russian with rough modulation, and carrier very unstable; American news, referencing Huffington Post, 1345 UT ID as "Radio Svoboda, Novosti", so it's R. Liberty, 100 kW, 325 degrees at 13-14 UT only on 9715 kHz. Probably has same problem at other hours on other frequencies.

(Glenn Hauser-OK-USA, dxld Nov 2)

SLOVAK REP 9510 kHz via Rimavska Sobota-SVK transmitter center.

Hello There from Milan, Italy,

This week we are happy to introduce you with a new broadcaster on IRRS Christian segment called "European Gospel Radio" <[www.egradio.org](http://www.egradio.org)> . Starting Nov. 7, 2010, at 11:30 CET (10:30 UTC, winter) on 9510 we present "Heaven's Peace Plan", produced by the Fatima Network in the USA.

What's so special about HPP? First of all we are glad to have a Catholic radio program once again on the air, and after hearing a few sample broadcast all I can say is that it's not the usual screaming-like program we often hear on the airwaves. First broadcast in 1987, "Heaven's Peace Plan" is hosted by Father Nicholas Gruner, and is on the air in North America and, via shortwave, in almost 200 nations around the world.

Please try to tune in on IRRS/EGR and please tell us what you think, and write to the address given on the broadcast to receive any of the books or magazines that are offered on the air. Our program producers and supporters will be glad to hear your comments and reception reports, and your letters will help keeping program like this on the air.

If you haven't seen our latest B-10 schedule, you should be aware that there are two minor changes this year. First, we are now on 9510 kHz (just 5 kHz apart from the previous frequency of 9515 kHz) on Saturday and Sunday morning CET. Second, regretfully, we had to reduce our Friday, Saturday and Sunday evening broadcast by one hour, but we are back on the air every day of the week to Europe, North Africa and the Middle East, at the same time, from 20:00-21:00 CET (19:00-20:00 UTC, winter) on 7290 kHz.

There may be additions or other frequency changes in the next few weeks.

Please check our latest freq and program schedules at:

<<http://www.nexus.org/NEXUS-IBA/Schedules/>>

and please write us at reports (at) nexus (dot) org

Thank You and stay tuned!

73s, Ron  
Ron Norton NEXUS-Int'l Broadcasting Association  
(Nov 5)

SPAIN 15325 The Monday-only Emission Sefardi from REE at 1425-1455 UT is supposed to be on 15385, but not even a carrier Nov 1 at 1425, nor in next few minutes. Was it on 15325 kHz instead, the sometimes-announced frequency?

Something there under jammer/Marti 15330 splash, but unseems this. Recheck at 1444 UT it's underway with music, so must have started late; 1445 UT judeo-espanol announcement by usual YL, talk about gastronomia, manzanas. 1454 UT retune just in time to hear closing fanfare and off at 1455\* UT.

5970 In B-10, REE's English to NAm at 0000-0100 UT daily is scheduled on 5970 instead of 6055 kHz, direct. UT Nov 1 at 0000 I find nothing on 6055, and open carrier on 5970. Finally at 0004, audio is joined in progress on 5970 with Justin Coe talking about David Starlight, who had the good sense to move from Oklahoma to San Francisco at age 21. At 0012 could detect RHC on 6060, but weak and would have been no ACI problem for Spain if still on 6055; that is the only reason we can think of for making this move.

Anyhow, no RHC on 5970 so they have apparently cooperated by clearing the frequency during this hour. 0027 REE program is "A Simple Life", interviewing another performer. By next check 0108 UT, 6055 kHz was back on with REE Spanish. Next night, UT Nov 2, English is already going on 5970 at 0002 UT, so maybe got started on time.  
(Glenn Hauser-OK-USA, dxld Nov 2)

SWEDEN Bye-bye, Sweden As I type this (at 2045 UT on Oct 29), I'm listening to George Wood's retrospective on Radio Sweden on 9495 kHz - - and enjoying excellent reception, I might add with a deep pang of regret that you are leaving me by closing down your short- and mediumwave services. As I have said many times to representatives of many stations, a broadcaster loses the lion's share of its audience when it leaves shortwave. I listen to a few podcasts as a last resort but have little idea any more about what is happening in, say, Switzerland or Sweden, in a few weeks or months.

I will, however, continue to listen attentively to the international broadcasters (and domestic services) from the many nations which retain a shortwave presence Bulgaria, India and China, to name only a few. Closing a shortwave service is always a backward step away from international understanding. Adios! Sincerely,  
(Anne Fanelli-NY-USA <lyssnarsevice @ sr.se> with cc to dxld)

Yes, only few listeners [in the past] will download their podcasts or livestream files from that crippled future service. In 2-3 years time this web service will cut for ever too, see the item on International Swiss Radio Swissinfo - latter I also seldom click on ... (wb)

Very last chance to hear Radio Sweden "over the air". A recording of Radio Sweden's last SW/MW broadcast on Saturday is now available on line at:

<<http://sverigesradio.se/cgi-bin/international/nyhetssidor/sandningsarkiv.asp?date=30/10/2010&programID=2054>>

Click on "International Engleska" for Saturday 30 October.

About 10 minutes into the broadcast you can hear an interview with the station manager about the reasons for SW/MW closure, then George Wood presents a feature with highlights from Radio Sweden through the decades. (Dave Kenny-UK, BrDXC-UK, Nov 1)

**RADIO SWEDEN: BYE BYE SHORTWAVE.**

On one hand, the loss of R. Sweden's SW service is just another in a long, long and doubtless continuing string of similar announcements by other countries. But, personally, it has affected me more than many of the other earlier, similar events. Perhaps it is because I am of Scandinavian heritage, although only a small part Swedish. Perhaps because that Nordic part of Europe seems emotionally close to me.

Perhaps it is because R. Sweden was one of my initial loggings back in the late 1940s and early 1950s. Perhaps it was because of my memories of Arne Skoog and his DX broadcasts and because of having received SCDX bulletin for so many, many years. Because of Skoog and successors, there always seemed a special link between Radio Sweden and DXing. Now that will be gone. But whatever, the loss is stronger than the other losses of recent times.

Listening to the Hojeberg interview, I find no fault in her logic nor her observation that "the world has changed." She hopes that other large broadcasters will continue to serve the limited but still existing needs of some categories of listeners. But it is a wistful hope. What remains rather astonishing is that the Netherlands, surely in much the same boat as Sweden, continues on SW. How long can that last? And how far behind will be Great Britain and Germany and others? Perhaps it will be left, eventually, to the Chinese to turn off the lights.

(Don Jensen-WI-USA, DX-plorer, also via dxld 31)

QSL R Sweden 6065 kHz. Sowas gab es tatsaechlich noch. Ein Bericht vom 25.10. auf 6065 kHz wurde mir innerhalb von 8 Tagen mit einer det. QSL-Karte bestaetigt. Der Bericht ging mit 1 IRC als Rueckporto an: Teracom AB, Shortwave Transmitter Station Hoerby, 24291 Hoerby, Sweden. (Patrick Robic-AUT, A-DX Nov 5)

**SWITZERLAND 765** Die Schweizerische Radio- und Fernsehgesellschaft stellt die Mittelwellenverbreitung von Option Musique am 5. Dezember 2010, 23.59 Uhr MEZ, ein. Das franzoesischsprachige Programm aus dem Funkhaus Lausanne kommt derzeit noch auf der Mittelwelle Sottens 765 kHz, mit inzwischen auf 170 kW beschraenkter Leistung.

Das Sendeende gehoert zu einem Paket von Sparmassnahmen, das die SRG bereits im Juni 2009 angekuendigt hatte.

Beim Mittelwellensender in Sottens handelt es sich um den letzten aktiven AM-Rundfunksender der Schweiz. Die Frequenz 558 kHz, auf der ein italienischsprachiges Programm aus dem SRG-Funkhaus Lugano lief, wurde am 30. Juni 2008 abgeschaltet, der deutschschweizer Landessender Beromuenster 531 kHz am 31. Dezember 2008.

In Sottens, rund 15 km nord-/norddoestlich von Lausanne, befand sich auch die letzte Kurzwellenanlage der Schweiz, die mit der Einstellung von

Schweizer Radio International in der Nacht zum 31. Oktober 2004 stillgelegt wurde. Die drehbare Kurzwellenantenne in Sottens wurde kurz danach abgerissen; ueber den Verbleib des erst 1989 installierten Senders wurde nichts bekannt.

Mit der Abschaltung des Senders Sottens verbleiben auf 765 kHz in Europa noch zwei Kleinsender mit maximal einem Kilowatt in Grossbritannien und Serbien sowie die 150 kW starke Sendeanlage Pedaselga bei Petrozawodsk (Karelien). Bemerkbar werden duerften auch die 600 bzw. 1000 kW starken Sender, die in der Tuerkei und dem Iran betrieben werden.

(Kai Ludwig RBB Radio-News 4.10.2010; via ntt Dr. Hansjoerg Biener-D)

SWITZERLAND I have received word that the last Swiss MW station, Sottens 765 kHz / 600 kW - at present 170 kW, is to go silent on Dec 05, 2010.

This leave Switzerland with no MW or SW facility. I have also heard, but cannot confirm, that

<www.swissinfo.ch> may be closed in 2012. Of course, they do not really offer much in the way of "radio".

(Bob Zanotti-SUI Oct 25, via Szilagyi-SWE, dswci DXW Nov 3)

TURKEY Flop of the night was TRT Italian{!} broadcast via Cakirlar on 5960 kHz at 2255 til around 2302 UT, before switched to scheduled TRT English to 24.00 UT. Co-channel QRM by YFR Nauen in Arabic.

9650, UNID Chinese at 0200-0300 UT Oct 31, S=8-9. Puzzled me, but discovered that TRT scheduled

"9650 0200-0300 CAK 500 284 SPANISH AF/AMs/SoEUR".

The text then talked on the program and the Mandarin ID at 0232 UT showed clearly TRT Mandarin instead of scheduled TRT Spanish broadcast, TRT Chinese Mandarin program was broadcast here, via Cakirlar tx.

11735 TRT Cakirlar faulty transmitter noted again at 1330-1427 UT Oct 31. Totally distorted audio quality, English, S=9. Used on 11925 kHz at 07-10

UT.

11925 TRT Cakirlar, same audio distortion (in summer on 11955 kHz),  
Turkish at 0858 UT Oct 31, S=9+10dB.

ALBANIA/GERMANY Radio Tirana Hoerer Klub: Neuigkeiten.

Hallo, der Radio Tirana Hoerer Klub hat einige Neuigkeiten zu melden, siehe unten bzw. auf der Web Site:

Astrit Ibro von Radio Tirana, Albanien, kommt nach Muenchen.

Der Direktor des Auslandsdienstes und Leiter der Deutschen Redaktion von Radio Tirana, Herr Astrit Ibro, kommt vom 17. - 19. November auf Einladung des Bayerischen Rundfunks nach Muenchen.

An einem der drei Abende wollen wir ein kleines Treffen mit ihm organisieren. Wer Zeit und Interesse hat, moege sich bitte beim Hoererklub melden!

Neue QSL-Karten in Planung.

Ab Dezember sollen neue QSL-Karten in der Redaktion zum Versand bereitliegen: Zum einen eine spezielle Karte mit Bildern vom Hoerertreffen im Mai, des weiteren eine neue Viererserie, die den 20. Jahrestag des Beginns des politischen Pluralismus in Albanien zum Thema hat.

Wintersendeplan und neuer Rundbrief.

Da es im deutschen Programm (nach MEZ) keine Veraenderungen gegeben hat, wird der aktualisierte Gesamtsendeplan erst zusammen mit dem neuen Rundbrief Ende November verschickt bzw. auf dieser Seite zur Verfuegung stehen. Wir danken fuer Ihr Verstaendnis!

<<http://www.agdx.de/rthk/html/neuigkeiten.html>>

<<http://www.agdx.de/rthk/>>

Viel Spass!

ARGENTINA 15345 / 11710 / 9690 / 6060 Radiodifusion Argentina al Exterior (RAE) shortwave broadcasts located in General Pacheco, near Buenos Aires, may close 1 January.

According to Koichiro Itoh, RAE's Japanese service announced the following message on Nov 5 about the closing of shortwave transmission. Argentine government prohibits the use of any equipment containing injurious PCB (Polychlorinated Biphenyl) from Jan 1, 2011. This means all the shortwave transmitters of RAE (which were installed in old days and using PCB contained parts) will not allowed to be on air after Jan 1, unless being replaced or repaired within this year. For the time being, Argentine government prepares no budget for replacing or repairing. The director of RAE will demand the government for the budget again with many requests from listeners.

So please E-mail your request for the continuation of RAE's shortwave broadcast to <[dxrae2010 @ gmail.com](mailto:dxrae2010@gmail.com)>

(Takahito Akabayashi-JPN, dxld Nov 11)

From my knowledge PCB is only dangerous if heated beyond a quite high level then the toxic fumes inhaled or skin contact. Any transmission winding reaching this condition should have tripped safety cut outs, so in theory at least, would not become hazardous anyway. It's rather ironic that although PCB is extremely dangerous over a certain 'flash' level temperature they are , in comparison to other so called 'liquid plastics' remarkably reliable and virtually indestructible within the 'safe' limits

used. Of course if the US bans them the EU follows with knees jerking like mad! The problem is, how is PCB safely disposed of ?

AUSTRIA Reminder of special broadcasts from Austria Nov 07 and 14.

There will be a special broadcast via the 100 kW transmitter at Moosbrunn to commemorate the 50th anniversary of the Austrian Military Radio Society formed for Austrian forces to use amateur radio to communicate during Peace Support Missions. The transmissions are on Nov 07 and 14 at 1000-1030 UT to Europe on 6155 kHz and 1600-1630 UT on 17620 kHz to Eastern North America.

Amateur Radio station OE50ARMS will operate after the broadcast on 7120 for Europe, 14210 for North America. QSLs via <oe4rgc @ amrs.at>

The Austrian Military Radio Society website is <www.amrs.at>  
(Repeat, taken from A-DX Newsgroup, by Christoph Ratzer OE2CRM)

6155 AMRS special outlet here with moderate S=9+5dB signal, not as strong like usual ORF Vienna 300 kW unit outlet from direct dipol aerial of Moosbrunn site in Austria. Noted today at sign-on at 09:58:56 UTC, til cl-down at 10:30:03 UT, Nov 7th 2011.

To AMRS  
Gussriegelstr. 45  
A-1100 Wien  
Austria

<oe4rgc @ amrs.at>

RR about special shortwave transmission 50 years anniversary jubilee of

AMRS "Austrian Military Radio Society".

QRG 6155 kHz transmitter ORS Moosbrunn Austria, southwesterly of Vienna, 100 kW, non-dir quadrant antenna. Reception barefoot without outside dipol or amplifier, on telescopic antenna only with S=9+5dB signal.

TX sign-on at 09.58:56 UTC, til cl-down at 10.30:03 UT.

Sound quality in need of improvement. ORS tx on the quadrant antenna carried a heavy 50 Hertz hum {German BRUMM}.

Probably sound limitation due of very heavy packing the audio file. Noted also room echo recording, limitation by bad microphone quality etc. etc.

09.59:34 UTC half second test tone.

10.00 UTC Morse Code demonstration.  
"50 years Austrian Military Radio Society"

Salutation by operator Hubert Freisinger OE3FHA.

10.02-10.10 UTC Interview by Mrs. Elvira with vice lieutenant Robert Graf OE4RGC.

Purpose in year 1960: society formation on Nov 25, 1960, in order to reach Austrian Army contingent on UNO mission to Congo by radio during conflict clashes. 280 members.

10.10-10.15 UTC Talk about broadcast message station OE5LKL, interview with Klaus Layr OE5XAM. About radio transmissions with Cyprus contingent of UNO mission by the Austrian Army using Cypriotic call sign 5B4BC.

10.16-10.20 UTC Interview with Maximilian Wagner OE5EIN about AMRS audio broadcast station, on air every Friday.

10.21-10.28 UTC Interview with emergency head of division vice lieutenant Hans Muttenthaler OE3FQU.

Rescue net, Pactor-3 mode station at Amstetten OE3XCC on 80 meter ham radio band.

10.29 UTC Repeat of Morse Code demonstration.  
"50 years Austrian Military Radio Society"

10.30:03 UTC Transmitter off.

Please QSL via DARC bureau at Baunatal

Wenigstens 6155 kHz mit S=9+40 dB hier in Salzburg. Ist ja grauenvoll, was ist das denn fuer eine Qualitaet beim Interview? Wie klein kann man Audiodaten komprimieren? Jeder 32 k Internetstream hoert sich besser an.

Moosbrunn hat sich sowas nicht verdient.

(Christoph Ratzer-AUT OE2CRM, Nov 7

17620 Radio AMRS from Moosbrunn Austria, 1600-1630 UT.

Very strong here as well throughout. Hum got worse around 1620 UT. Could hear the Vienna end of their QSOs at 1620 UT on 14210 kHz.

So how exactly do we QSL the broadcast part of this?

(Jerry Berg-MA-USA, DXplorer Nov 7)

Also very strong here (hum on transmitter) at 1600 UT sign with German programming (a single En ID at the beginning). CW ID's every five minutes or so.

(Mick Delmage-AB-CAN, DXplorer Nov 7)

Robert OE4RGC, President of AMRS, just confirmed that all incoming reception reports for the broadcast will be QSLed by their special card.

Please include return postage (2 USD or 1 IRC).

BAHAMAS I'm sending you this letter and some photos of the Bahamas hopping.

(Lev Lytovchenko-CAN, wwdxc BC-DX TopNews Nov 1)

While visiting Nassau (New Providence Island in the Bahamas), I used the opportunity to take some photos of the TX sites of two AM Stations: 1540 kHz (ZNS-1) and 1240 kHz (ZNS-2). The latter one appeared to be a former AM station. I was told that it hasn't worked for about a year and there is now a plan to use the tower for FM transmission. So far the tower is used for TV only. (See the TV antennas on top of it in pic. 1). Regarding the station ZNS-1 (1540 kHz) it was much more interesting.

It was there I met a radio engineer and he told me what had happened about two months ago (Aug 2010) on their antenna field. One night all the ground copper wires (hundreds of pieces of about 50m long each) were stolen by some guys.

For the thieves it was quite convenient to do their job throughout the night because the transmission building is located about 150m from the antenna field, which looks like a deserted rural area. Then the copper wires were probably sold as scrap metal.

There are two antenna towers: in the pics. 2,3,4,5 on the right one was

used for transmission of 1540 kHz, on the left - for something else. Now they decided to synchronize and combine both for 1540 kHz transmission, so as to get them omnidirectional. And, of course, to install new groundings but to put the wires underground this time to prevent further thefts.

They are also doing a renovation inside of the TX building (see pics 6,7,8).

The power of the transmitter is supposed to be 50 kW, (pic 9) enough to cover the whole area of the Bahamas archipelago (700 islands). The antenna near the transmission building is used to receive signals from the studio, which is about 7.5 km away.

I also took a photo of their studio site where you can see the same type of antenna. (pic. 10) like near the TX building of ZNS-1 (pic11). The frequency to send signals to and from is very low - 460 kHz. That I was told.

The current address of the studio is: Harcourt (Rusty) Bethel Dr., (see pic 12). The address is the former 3rd Terrace, which is associated with the TX site of the 1540 kHz Station ZNS-1 (WRTH 2010). But it's not true. (Bahamas now BC studio house at 25 04 19.51 N 77 20 00.54 W )

The Tx site is about 7.5 km down south in an area called South Beach (see pic. 13).  
25 00 14.57 N 77 21 01.85 W

BULGARIA 11900drn Digital mode outlet from Sofia scheduled at 0700-1300 UT, noted at 0855 UT with S=9 strength in Germany.  
(wb, wwdxc BC-DX TopNews Oct 31)

CANADA For the first time in many moons I was able to hear what must have been CFRX on 6070 kHz at fair strength, and 'over' BLR, at 0745 UT at fair strength, but with a lot of splash from DW via WOF and SIN on 6075 kHz. CFRX appeared to have a show about comedians, and they were playing extracts from various routines and with an audience in the background.

And at 0825 UT it must have been CKZN that I heard as it was off-set at about 6159.97 kHz. This one must have faded in because it was inaudible before 0800 UT. Signal strength was low.

CUBA 15370 RHC ID at 2200 UT Nov 2. S=8 in 19mb at this night time is  
commendable. At 22.02 UT annrc gave frecuencias horario, followed by Rumba  
music. But also other stn from this region appeared here, path was open to  
EUR, like RNW Bonaire 15315 and 15540; YFR 15115, WEWN 15610 kHz.

49mb channels fade in very early, noted RHC Sp on 6110 kHz too, S=9+10dB.

Different program ? like R Nacional de VEN at 2200-2300 UT Nov 2, also S=8  
at 2220 UT. Modulation on 15370 kHz was much better than 11670.  
(wb, wwdxc BC-DX TopNews Nov 2)

6095 RHC, at 1105-1205 UT on Nov 08. Wondering what the weak unid carrier  
was I sat on this freq waiting for any clear audio. Then at 1200 UT I  
heard the familiar IS poking through the noise. Must be their first day on  
this NF for B-10 period. Quite unusual for them to be making it to Europe  
at this time of the day.  
(Martien Groot-HOL, dxld Nov 8)

15250 Radio Nacional de Venezuela at 2328 UT, female host in English, man

giving a speech, in Spanish, about Colombia. // 13680 kHz very poor under QRM. Very good, Nov 8.  
(Harold Sellers-BC-CAN, DXplorer Nov 9)

Log of Oct 31 by wb. At same time RHabanaCuba San Felipe/Quivican En 6150, Sp 6060 kHz both at 8-9! UT, S=8-9. 15120 RHC in Spanish S=9, and // 15360 little bit stronger S=9+10dB, at 1250 UT: "Hola Ustedes Amigos" ... festival mundial de juventud y estudiantes.... - on 15120 kHz tiny underneath co-ch BSKSA Bengali towards SoAS target.  
(wb, wwdxc BC-DX TopNews Oct 31)

Re: About poor information you are announcing on the HCDX list about RHC and possible remedy.

OK amigo ! Would you like to receive the complete B10 schedule, with all the languages, as well as the ALO Presidente transmission ?

73 and DX

Your friend in Havana

Arnie Coro CO2KK

Host of Dxers Unlimited radio hobby program.

Radio Habana Cuba.

(Prof Arnaldo Coro Antich-CUB CO2KK, wwdxc BC-DX TopNews Oct 31)

Dear Mr. BueschelW

I wonder from where did you obtained the wrong information about Radio Havana Cuba broadcasts that is circulating on the HCDX list? Below are the two most recent examples that I saw today on the HCDX Internet E-mail list.

> Quivican ?

Radio Havana Cuba transmissions are broadcast by RadioCuba, and the sites can be changed as required, because there is interoperability of antenna facilities.

For example, our San Felipe site [2 kilometers west of TXsite], that you are wrongly naming as Quivican is on the air using the 6150 kHz frequency with a much modified PKB'250M transmitter and with the possibility of selecting different antennas ... Typically the 6150 kHz broadcast is done using a QUADRANT antenna, that is essentially omnidirectional , but it can be switched to other antennas.

If there is need to do maintenance work at the San Felipe site, we can put on the air the 6150 kHz frequency from the Bauta site, using a similar QUADRANT antenna with a 100 kW transmitter.

15120 is normally on the air from Bauta, using the transmitter site curtain array antennas, typically HR4,4,0,8 . The local morning broadcast is directed towards South America.

If we need to do maintenance to the Bauta transmitter or antennas, we can use the San Felipe station, with a similar antenna HR4,4,1,0 that is aiming in the same azimuth, that is 160 degrees.

Many years ago, I directed the modification of one of the two HR4,4,1,0 arrays of the San Felipe site, so that the main beam is now at 172

degrees, in order to improve the coverage of the Pacific Coast of South America, from Colombia to the extreme southern tip of Chile.

15360, also normally from the Bauta site is using an antenna aiming at a different azimuth..) approx 130 degrees azimuth), so that is why you are receiving a stronger signal at your location, possibly due to a sidelobe of that curtain array.

Attached to this E-mail, I am including a dot pdf file that will provide you with our tentative B-10 broadcast schedule for the Spanish language programs, due to be put in service on the 8th of November, and that may be modified as required at anytime.

Because the dot pdf file is intended to be understood by the average listener, it shows the direction towards which the programs are aimed by means of the name of a city or well known location ...

If you wish, I can prepare for you a similar file of what we send to the ITU Geneva to register all our transmissions, that, as expected, is an engineering document with complete details, as required by the International Telecommunications Union.

Yours truly

Prof. Arnaldo Coro Antich

Prof. Arnaldo Coro Antich - Radio Habana Cuba

P.O. Box 6240

Ciudad Habana 10600, Cuba, Oct 31

(Oct 31)

RHC was heard on it's new 6050 kHz frequency in Spanish // near adjacent 6060 kHz. At 0828 UT I heard what I think was the Ecuadorian anthem co-ch with Cuba, and HCJB opened in Spanish at 0830 UT. Both were about equal strength at my location. That's very bad frequency coordination by Cuba, even though it is beaming towards Chicago. There must be a choice of better frequencies that are available in NoAM between 0700 and 1100 UT. (Noel R. Green-UK, wwdxc BC-DX TopNews Nov 8)

(wb, wwdxc BC-DX TopNews Oct 31)

GERMANY 9845 QSL Adventist World Radio - Wertachtal verified with a full data "Voice of Hope" card, a short personal letter and some 2011 pocket calendars in 20 days from v/s Eunice Calvo-Trindade, AWR Listener Services. She noted that the card has the wrong postal address (39 Brendon Street in London) and that the correct postal address is:  
AWR, 1 Milbanke Court, Milbanke way, Bracknell RG12 1 RP, England.  
(Rich D'Angelo-PA-USA, DXplorer Nov 7)

11895 Radio Sadaye Zindagi via Wertachtal, Nov 10 at 1606-1629\* UT. Caught this program in the Dari Language, with a drama program, selections of music interspersed, did manage to catch the closing announcements and gave the e-mail address as: <info @ afghanradio.org>  
Then a short melody and then sign-off. Nice signal today.  
(Edward Kusalik-Alb-CAN, DXplorer Nov 11)

DW cuts hundreds of jobs, keeps SW only for Africa target.

Man wird wohl auch die DWL mit DLR/DLF in Koelle/Bonn zusammenwerfen, betreffs deutscher Nachrichten und Wortprogramme, - ausser dem DWL TV Programm, das sich sehr an die ARD-1 / Phoenix TV anlehnen wird.  
Gruss Wolfgang. (wb)

"Far-reaching reforms" will be done at Deutsche Welle "due to the Internet and heavy financial pressure". Job positions "rather in the three-digit range" will be eliminated until 2014.

This is the basic outcome of a closed meeting of the DW directors earlier this week, where a benchmark paper has been developed. During the next months proposals are to be made how to create as much synergies as possible.

epd gathers from the paper also that shortwave will be kept only for Africa. Elsewhere DW will rely on the Internet and local rebroadcasting partners instead.

DW's presence in Latin America and Russia will be strengthened while southeastern Europe no longer belongs to the "core regions". The existing 30 language services are supposed to stay.

The current division between the different media will disappear. In future the editorial offices will prepare their content for TV, radio and online seamlessly.

DW expects a shrinking budget for the next years. Even an unchanged budget of 273 million Euro per year would until 2014 result in a deficit of 23 million Euro due to increasing costs.

The epd report is reproduced here: <<http://www.noz.de/deutschland-und-welt/kultur/fernsehen/48910745/deutsche-welle-baut-stellen-ab>>

(epd, Evangelischer Pressedienst, 4 Nov 2010)

Reformen bei DW geplant - Kurzwelle nur noch fuer Afrika. Laut Deutschlandfunks "Markt und Medien" plant die Deutsche Welle grundlegende Reformen. U.a. soll ab 2014 die Kurzwelle nur noch fuer das Zielgebiet Afrika eingesetzt werden.

Die DLF Sendung kann unter  
<<http://www.dradio.de/aod/html/?station=1&broadcast=196828&>>  
nachgehört werden.

Die Datei - allein mit der Meldung zur DW - gibt es als mp3-File  
(ca. 570 kB) hier:  
<<https://files.me.com/thkamp/ck7hub.mp3>>  
(Tom DF5JL, A-DX Nov 6)

DW-Intendant Bettermann spricht von Stellenkuerzungen im dreistelligen  
Bereich.

Die indirekte Rede DEUTSCHE WELLE.  
Vom geplanten Personalabbau beim Auslandsfunk erfuhren Mitarbeiter aus den  
Medien. Die Deutsche Welle soll grundlegend reformiert werden.

Reformbeduerftig ist auch ihre interne Kommunikation. Anfang November  
haben Intendant Erik Bettermann und DW-Direktoren ein Eckpunktepapier  
entwickelt, das Rationalisierungen vorsieht. Am 4. November sagte  
Bettermann dem epd, dass bis 2014 Arbeitsplaetze "im dreistelligen  
Bereich" abgebaut wuerden.

Die Nachricht schlug wie eine Bombe ein und traf Beschaeftigte  
unvorbereitet. Das beweist ein internes Papier des Personalrats, das der  
taz vorliegt:

"Ueber einen geplanten Personalabbau "in dreistelliger Hoehe" erfuhren die  
DW-Beschaeftigten aus der Zeitung. Der Personalrat haelt diese Form der  
internen Kommunikation fuer nicht angemessen." Laut Pressesprecher  
Johannes Hoffmann war die Gefahr betriebsbedingter Kuendigungen hausintern  
aber bekannt.

Hintergrund sind 18 Eckpunkte, in denen zum Beispiel die  
Kurzwellenuebertragung mit Ausnahme von Afrika beendet wird oder die  
redaktionelle Praesenz in Suedosteuropa gesenkt wird. Zudem sollen  
Redaktionen kuenftig trimedial Radio, Fernsehen und Online gleichermassen  
beliefern. Grund fuer die Rationalisierung seien finanzielle Probleme und  
die weltweit veraenderte Mediennutzung, vor allem durch das Internet, so  
Hoffmann. Das Budget fuer 2011 werde wahrscheinlich von den  
Sparmassnahmen der Regierung getroffen. Die Entscheidung darueber wird  
fuer Ende des Jahres erwartet.

"Die Stimmung ist unterirdisch", hiess es gestern aus Mitarbeiterkreisen.  
Nicht nur wegen der missglueckten Kommunikation, auch wegen der Reform.

"Offiziell wird zwar keine der 30 Sprachen der Deutschen Welle  
eingestellt, de facto laeuft es aber darauf hinaus", so Mitarbeiter. Auch  
in der internen Personalratsmitteilung heisst es: "Die entscheidenden  
Fragen laesst das Papier unbeantwortet. So wird nicht klar, welche  
Einsparpotentiale die Geschaeftsleitung in den einzelnen 'Eckpunkten'  
sieht."

Sprecher Hoffmann betont hingegen, "dass das Eckpunktepapier noch keine  
detaillierten Massnahmen festlegt, sondern eine Richtungsentscheidung  
formuliert". Doch entgegen dem Intendanten will er keine konkreten Zahlen  
zum Stellenabbau nennen. Fest steht aber, dass sich Erik Bettermann von

seinem jahrelangen Versprechen loest, dass es in seiner Amtszeit keine betriebsbedingten Kuendigungen geben werde.

(Diana\_Aust t\_a\_z, Nov 10)

6085 Anti-Nuclear station Nov 7.

The German special-event station "Radio Freies Wendland" can currently be heard all over Germany on 6085 kHz, tx site unknown. The program is produced to coordinate the protests (more than 10,000 people) against a "Castor" transport of nuclear waste in the North German region Wendland (county Luechow/Dannenberg) and is (legally) transmitted via numerous public FM stations such as Radio ZuSa. So far it is unknown how the signal makes it onto shortwave; this has not been publicized anywhere on the protest websites.

Station info (in German): <<http://www.castor2010.de/radio>>

The nuclear waste is transported by train from France to Luechow/Dannenberg, and most reports on this station offer live coverage from people trying to bring the train to a halt by simply sitting on the tracks. Look out for the word "Blockade". Hip music between the reports.

The signal on 6085 kHz is strong at times, but subject to fading and since 1215 UT the Chinese radio war (CNR1 vs Taiwan) has started to fade in, too. Both are at S=2-4, O=2-3 now. 7 Nov 2010, 1250 UTC.

(Eike Bierwirth-D, hcdx Nov 7)

Atom Muell Transport featured on Kall 6085 kHz Radio heute aktiv Nov 7th.

Hallo zusammen, ich hab diese Emailadresse gefunden unter

(Marco Schaa-D, A-SX Nov 7)

Re 6085 Hier in der "Mitte" (Nordbayern) kommt der Sender mit 35232 an. Wenn man die Ohren spitzt, kann man aber fast alles verstehen. Eben (13.10 MEZ) ID und aktuelle Nachrichten. Signal wird staerker. 35333 Sicher gibt es "Atomkraft - nein danke" QSL und Wimpel - hi.

(Andy Schmid-D, A-DX Nov 7)

Typisches KALL Eifel Signal ?

Heute war auf 6085 kHz "Radio Castor" und spaeter "Radio Wendland" zu hoeren - ich vermute dass das Signal aus Kall kam. Der Empfangspegel war vergleichbar mit 6005 kHz. Audio kam vermutlich vom gleichnamigen Webstream - die Signale (KW & Webstream) waren bis auf Sekundenbruchteile synchron . Ich habe das Signal von 1130 - ca. 1230 h Ortszeit gehoert. Hier in Stuttgart um 12 UT fadend zwischen S=7-8 auch mal bis S=9, etwas staerker als die uebliche 6005 kHz. Ab 13 UT ging das Signal dann in den Keller.

Das ist doch Kall Eifel registriert fuer Sondersendungen ... das Signal war staerker als die 6005 kHz. Die Euskirchner Radio700 Leute haben doch 2 Sender zur Verfuegung, der eine hat etwas hoehere Sendeleistung als der andere ? Jetzt sind drei Frequenzen registriert 5980, 6005, 6085. Und wenn die DWL das 49 mb dicht macht, auch bald 6075 kHz channel.

Frage: War eigentlich Radio Dreyecksland bei Freiburg, die Gruenen gegen Fessenheim Atombunker vor vielen Jahren auf UKW senderweise? - Sorry, das Frequenzband und Details habe ich alles vergessen.

GUATEMALA 4053.4 Radio Verdad at 0107 UT with xylophone music, woman in Spanish followed by a male speaker (Poor) and at 0239 UT with several back-to-back pieces of easy listening, instrumental music. Good, Nov 9. (Harold Sellers-BC-CAN, DXplorer Nov 9)

INDONESIA 9525.96v Heterodyne against even 9525.00 kHz TWR Manzini, Swaziland in En at 1934 UT, Oct 31. Station ID at 1936 UT.

9525.96v RRI VoINS Jakarta in Indonesian language - and superb Indonesian music, S=8 moderate signal in 1400-1500 UT time slot, Nov 2.

(wb, wwdxc BC-DX TopNews Nov 2)

IRAN 7380 Bad frequency coordination at 1730-1800 UT, both IRIB Sirjan and CRI Cerrik Albania relays, and both broadcast in German language !

(wb, wwdxc BC-DX TopNews Oct 31)

Intermodulation on 14020 kHz by mix of 13600 and 13810 kHz of IRIB.  
OM Uli DL3XZ has stumbled over a BC signal on 14020 kHz, 8 Nov 2010 and has sent me a report. So, by attentive listening, I have found out more about the signal:

Here in Tuebingen the signal is audible from 0630 till 0730 UT s/off with max. S8-signal. Beam heading is 085 degs. with my 3-Element FB-33. It is an IM of V.o.IRIB (IRN) BC. The two QRGs involved are:

- 1) 13600 kHz with French px S=9+40dB
- 2) 13810 kHz with Albanian (Squiptar) px S=9+40dB

1st mix: 13810 kHz x 2 - 13600 kHz = 14020 kHz  
2nd mix: 13600 kHz x 2 - 13810 kHz = 13990 kHz (also audible here in Tuebingen)

After 0730 UT, when 13810 and 13600 kHz are switched off, both IMs have gone. Will you pse also listen and report to your national telecoms authorities if you hear the stn.  
(Uli, DJ9KR; Vice Coordinator of IARU MonSys Region 1, Nov 12)

ISRAEL 15760 KOL Israel in Persian sce at 1525 UT Oct 31. S=9+15dB, but propagation decreasing now. // poor 13850 and Iranian wobbler jamming.

(wb, wwdxc BC-DX TopNews Nov 12)

ID hoert sich nach Radio Kuwait an.  
(Guenter Lorenz-D, A-DX Nov 12)

Den Eindruck hatte ich auch, das QRM durch "Voice of America" mit dem afrikanisch-englischen Programm ist ziemlich stark.

Nicht weit weg und schon anders ;-)

Bei mir (Kuwait) mit Fading dominierend, Amerika nur ab und an hoerbar. In USB, da in AM und LSB immer wieder die DW anklopft.  
(Herbert Meixner-AUT, A-DX Nov 12)

LITHUANIA 5980 NHK R Japan relay via Sitkunai, Ru program eastwards via 79 degr antenna. But much strength also on back lobe. Powerful transmission at S=9+20dB level.

(wb, wwdxc BC-DX TopNews Nov 1)

3955 HCJB with Sunday only relay, Russian at 1530 UT, Chechen special Caucasus program at 1600-1630 UT, S=8, backlobe of 79 degr antenna at Sitkunai. But HCJB German service on same frequency at 1630-1730 UT much stronger with 259degr antenna straight forwards to Western Europe with S=9+10dB.

7420 IRIB Tehran Russian via Sitkunai relay, (in B-09 on 3960), now at 1450 UT on S=9+20dB. In SYNC with // 9610 and 9685 kHz.

3955 HCJB via Sitkunai-LTU in Ru 1530, Chechen Sun 1600 UT S=7-8 rather poor, due of backlobe signal of 79degr antenna.

(wb, wwdxc BC-DX TopNews Oct 31)

6055 Radio Waves International (via Sitkunai-LTU), 27th anniversary special at 2130-2230 UT Nov 6. Opened with a minute of tuning signal, then a half hour in English, mostly French for the second half hour. Pop music ("The Letter," "Stuck Like Glue"), much C&W ("Country Road," "Snake Farm"), some French language songs. Many IDs, mentions of 100 kW on 6055 kHz, ref. to "Offshore Echoes," invitations to send to their postal address for special QSL. Fair signal, a little better at times but quite a bit of QRM.

(Jerry Berg-MA-USA, DXplorer Nov 7)

6130 RMRC via Sitkunai (100 kW). F/D QSL Card, showing the Club and St.Helena insert (QSL), with details on the reverse, for a Postal Report to German address. reply in 27 days. VS Heinz Schulz.

(Edward Kusalik-Alb-CAN, DXplorer Nov 11)

MADAGASCAR 11515 R. Dabanga via Madagascar relay site. Nov 04 at 1533-1544 UT. 25332 Arabic, Talk, ID at 1534 and 1542 UT.

(Kouji Hashimoto-JPN, JPNpremium Nov 5)

MALAYSIA RT Malaysia DRM mode digital broadcasts. RT Malaysia seems to start DRM test broadcast. Japanese DXer received it in Nov. 4 at 1030 UT on 11885 kHz.

<<http://ani.atz.jp/DX/bbs1/img/9985.gif>> by Hiro in Akita.

<<http://ani.atz.jp/DX/bbs1/img/9986.gif>> by Nakanaka in Hokkaido.

And Label ID:8299 is confirmed at 7235 kHz at 1148 UT. Probably this seems to be RT Malaysia, too. On Nov. 5 can't confirm 11885 kHz and 7235 kHz.

cf. <<http://www.drm.org/uploads/files/ContTx4Asiarelease.pdf>>

(Sei-ichi Hasegawa-JPN, dxld Nov 5)

MAURITANIA 7245 R. Mauritanie, Nouakchott. Nov 02, at 0825-0835 UT, male in Arabic talks, Arabic Pop music, back male, female segment. 25332.

(Lucio Otavio Bobrowiec-Brazil, JPNpremium Nov 5)

7245 Radio Mauritanie at 0050 with Arabic vocals, man and woman hosts interviewing the signer; off at 0100. Good, Nov 9.

(Harold Sellers-BC-CAN, DXplorer Nov 9)

NIGERIA 11770 V. of Nigeria on Nov 04 at 1606-1620 UT. 24332-34333 Arabic, Drums IS at 1606 UT, talk.

(Kouji Hashimoto-JPN, JPNpremium Nov 5)

MOLDOVA [PRIDNESTROVYE] 6240 Radio PMR ("Pridnestrovyja"). Today (2nd Nov 2010) I observed a new schedule for Radio PMR / Radio Pridnestrovye (both IDs are in use), different from yesterday's, with half-hour programmes in Russian-English-French-German, this cycle apparently being repeated thrice from 1800 til 2400 UT.

The English, French, and German broadcasts had exactly the same content - peacekeepers' manoeuvres and the 20th anniversary of the first casualties in the Moldovan-Pridnestrovyan conflict (2nd Nov 1990). This filled the first 15 minutes; the second 15 minutes consist of very cheesy Russian-language songs, apparently of Pridnestrovyan origin (one at least was about "my republic Pridnestrovye" and its lovely vineyards).

The Russian broadcast was different, with more reports and without the long music fill; possibly using material from the domestic service. It starts with the ID "You are listening to Radio Pridnestrovye, we are working for you!" followed by the national anthem of this self-declared republic. Then "Govorit Tiraspol" and ID now as "Radio PMR".

So it seems the schedule on 6240 kHz is Mon-Fri only, before Voice of Russia Moscow starts relay at 0000 UT:

1800-1830 Russian #  
1830-1900 English  
1900-1930 French  
1930-2000 German  
2000-2030 Russian  
2030-2100 English  
2100-2130 French  
2130-2200 German  
2200-2230 Russian  
2230-2300 English  
2300-2330 French  
2330-2400 German

Only the German programme announced the broadcast schedule for German programmes (matching today's new observations!), the postal address. They asked for an envelope and an IRC if you desire a reply by snail mail.

(They explicitly asked for a "coupon" so those seem to be accepted in that internationally non-recognized entity.) Does this mean that German DXers are the most demanding ones? Or a host that does care a bit about listener contact?

(Eike Bierwirth-D, RUSdx Nov 5)

Radio PMR. PMR website shows a new but short schedule:

<<http://radiopmr.org/about/27/Cetka-veshhaniya>>

states clearly Mon-Fri only, 6240 kHz 500 kW, 1800-0000 UT Monday-Friday

Russian

English

French

German

regards de Wolfy Nov 7

6240 what happens with Radio PMR, confirmed the first week of B-10 as 1800-2400 alternating Russian, French, German, English? Missing Saturday Nov 6, no signal at 2320 check, but carrier on by 2358 UT about to pick up Voice of Russia relay. So PMR remains Mon-Fri, and absent Sat/Sun.

(Glenn Hauser-OK-USA, dxld Nov 7)

MOLDOVA [PRIDNESTROVIE] QSL 6240 Radio PMR. Nice color F/D e-QSL with data and photo of curtain antenna and the map of Pridnestrovie. Also sent a cover letter request any comments or suggestions about the broadcasts and to write. Replied in 6 days after sending a e-mail report to:

<radiopmr @ inbox.ru> replied from there as well.

V/S Anatoly Kirsas, Director.

(Edward Kusalik-Alb-CAN, DXplorer Nov 11)

MOROCCO 15341.15v Very odd frequency signal of RTM Rabat via Nador-MRC relay site in Ar at 0915 UT Oct 31. Struggled against CRI Xian Mandarin outlet on even 15340.00 kHz. Terrible heterodyne audio at S=8-9 level. Arabic program interspersed with French language items. (wb, wwdxc BC-DX TopNews Oct 31)

NIGERIA 15120 VoNigeria, Xylophone music, En at 1500 UT, S=9+20dB strength, heavy annoying 50 Hertz BUZZ tone audio quality. (wb, wwdxc BC-DX TopNews Oct 31)

PORTUGAL 9610drm BBC En scheduled in digital DRM mode in a single hour 08-09 UT via Sines Portugal relay site. DRM noise 90kW of power at 40degr antenna to all-Europe coverage.

17745 Sudan Relay Service program via Sines-POR relay site in En at 15-17 UT, S=9+25dB signal strength at 1505 UT Oct 31. Carrier on adjacent 17750 kHz at same time, S=9+30dB, some engineering test, probably R Kuwait at 15-17 UT time. (wb, wwdxc BC-DX TopNews Oct 31)

9430 Korean broadcasting Service via Sines. Nov 6 at 2014-2057\* UT Broadcast in Arabic, with Variety musical program, ranging from Hip Hop to Pop, off in mid-sentence with no sign-off fanfare. (Edward Kusalik-Alb-CAN, DXplorer Nov 11)

ROMANIA Frequency change of Radio Romania International in English: 0100-0156 NF 7325\*GAL 300 kW 310 deg NoEaAM, ex7330 // 6145 GAL 300/310 \* co-ch VOA in English. (R BULGARIA DX MIX News, Ivo Ivanov, via wwdxc BC-DX TopNews Nov 9)

ROMANIA 6180-DRM aus ROU via Saftica. Aus Rumaenien gibt es auf 6180 kHz gerade (1805z 11.11.10) DRM aus Saftica statt wie gewohnt aus Tiganesti wenn man dem DRM Label "SNR Saftica" trauen darf . Drunter ist ordentlich Audio von AIR Bangalore zu vernehmen. Trotzdem ist zumindest das Label zu dekodieren und gelegentlich kommt mal ein Schluckauf Audio aus Saftica. Man hat also die Wahl zwischen verrauschter indischer Folklore oder sekundenlangem Programm aus Rumaenien. Kann also jeder nach Gusto seinen Schwierigkeitsgrad waehlen ohne so einfach nur "armchair" hoeren zu muessen :-; (Dr. Matthias Zwoch-D, A-DX Nov 12)

Die Registrierung 6180 kHz Italienisch ist die einzige DRM Registrierung in B-10 Saison, die nur mit 100 kW fuer Italienisch registriert ist. Also wird das wohl die Saftica Station mit der verringerten Leistung und dem Label Saftica sein.

6180 kHz 1900-1930 UT 28SW TIG 100=means Saftica site 12 kms southwards, 270deg 805ant N=DRM Italian ROU RRO.

Guten Abend, das Label "SNR Saftica" sagt noch gar nichts. Die Sender Saftica und Tiganesti liegen nur 12 km entfernt auseinander. Sie sind gewissermassen das 'gleiche Kombinat'. RRI Tiganesti sendete zwei Jahre mit dem Label "Transradio Berlin" aus Westberlin, jene ehemalige Telefunk-Bude, die den Digital-Modulator geliefert hat. Bevor mal ein Techniker dort bei Radiocomunicatii SA das Label aenderte.

Saftica ist ein alter Sender von Mitte der 50ziger, den habe ich in den

70zigern Jahren in Frankfurt und Stuttgart gehoert. Darueber liefen auch geheime-vailed confidential 'Kommunistische Parteien' Programme fuer Spanien und Portugal mit 15-20 kW auf Kurzwelle, z.B. "Radio Espana Independente" - QSL R\_E\_I liegt hier vor.

Diese Sendestation bekam jetzt vor 3 Jahren die beiden Harris 100 kW Sender. Und diese werden nicht fuer deutsche Programme, sondern fuer die verringerte Leistung 50/100 kW, fuer die AM Sendungen in Richtung Balkan, Italien und Ukraine benutzt.

Tiganesti ist die weit modernere Anlage, kam wohl erst anfangs 1970 on air und liegt 12 km noerdlicher, und bekam jetzt bei der Modernisierung die moderneren 250 kW Harris Sender, von dort laeuft jetzt auch der Deutschdienst, zumindest in AM.

Die MW Station Tancabesti 855 kHz 1500 kW liegt dort auch in der Gegend, und auch noch ein militaerisch-diplomatischer Kurzwellensender aus der kommunistischen Diktatur auf der anderen Strassenseite.

(wb, wwdxc BC-DX TopNews Nov 7)

SWEDEN Eine Aera ging zu Ende.

Am Samstag (30.10.2010) hoerte ich die letzten Sendungen von Radio Schweden, die ueber die Kurz- und Mittelwelle ausgestrahlt wurden. Mit dem Empfang von Radio Schweden habe ich ungefaehr 1969 begonnen. Ich kann mich

jedenfalls erinnern, dass ich in den Ferien im Badekurort Geoagiu-Rumaenien war und da auf einen ausgeliehenen "Mamaia" Transistorempfänger "Schweden ruft DXer" hörte.

In einer Logliste von 1969 ist auch Radio Schweden vorhanden und meine erste genaue Logaufzeichnung stammt vom 16.12.1969. Später bekam ich dann ab 1972 mehr oder weniger regelmäßig das gedruckte Bulletin von SCDX bis zu dessen Einstellung im Jahre 1990. Ja, das war ein langsames Sterben bei der Mittel- und Kurzwelle von Radio Schweden: Absetzung des DX Programmes, bzw. Metamorphose zum MediaScan, Einstellung einiger Sprachdienste (darunter auch das Deutsche), das Einstellen des Versenden von QSL Karten und jetzt das Endgültige aus.

Zwar wird Einiges noch über Internet und Satellit übertragen, aber ein mobiles Hören von irgendwo unterwegs wird damit nicht ohne weiteres mehr möglich sein.

73s Erich (Erich Bergmann-D, wwdxc BC-DX TopNews Sept 3)

(wb, wwdxc BC-DX TopNews Oct 31)

15325-see below - The Monday-only Emission Sefardi from REE at 1425-1455  
UT is supposed to be on 15385 kHz, but not even a carrier Nov 1 at 1425  
UT, nor in next few minutes. Was it on 15325 kHz instead, the sometimes-  
announced frequency?

Something there under jammer/Marti 15330 kHz splash, but unseems this. Recheck at 1444 UT it's underway with music, so must have started late; 1445 UT judeo-espanol announcement by usual YL, talk about gastronomia, manzanas. 1454 UT retune just in time to hear closing fanfare and off at 1455\* UT.

[later] Correction. - Perhaps I did not make clear that the frequency where it did appear (late) was 15385 kHz, not 15325 kHz.  
(Glenn Hauser-OK-USA, dxld Nov 10)

SWEDEN HAM RADIO transmission from Hoerby shortwave station.

This is from a Swedish ham ...  
Cheers,  
The Swedish Shortwave broadcasting service shut down last Saturday.

This weekend a small group of SM-HAMS have gained access to the shortwave station. The aim is to try out the antenna farm on the ham-radio bands.

Today Friday we have separated the 500 KW transmitters from the antenna system and prepared for three ordinary Ham-rigs.

We will use the following antennas:  
Logperiodic antenna: <<http://rune-feldt.se/allman/mast/a355-28.jpg>>  
This antenna will operate from 6 MHz and up.

We have access to four of this antenna in various directions  
<<http://zyberland.net/berzan/horby/images/gardinantenn2.jpg>>  
Its for 40 meter band. No antennas for 80 and 160 mb.

The shortwave station is located in Hoerby not far from my QTH. If everything works as we hope we will to start tomorrow Saturday at around 10.00 Z and continue to probably Sunday afternoon. Hope we can pick up some ZL on 40 mb.

Callsigns? We will probably our private calls or SK7DX.

UGANDA 4976 UBC Radio, at 2147-2225\* UT on Nov 3, series of romantic songs with short announcements by a man announcer in English. ID and several announcements at 2157 UT followed by "La Bamba". More local music later with carrier terminated while man announcer was speaking. Poor to fair.

(Rich D'Angelo-PA-USA, DXplorer Nov 7)

UKRAINE 9410 RUI Kiev program via Mykolaiev Luch site at 0800-1100 UT, in En at 08-09 UT, only fair to moderate signal, from this easterly - next to Crimea site. Feature about UKR projects.

[later] 11620 RUI Ukrainian to the CIS-east, nationals in Kazakhstan. Not on 7435, due of use in CHN, CZE, and ROU. 15-18 UT from Kharkiv-UKR, S=9+20dB at 1525 UT.

[later] 11620 (x7435 instead) RUI Kharkiv site on one day/one hour only broadcast in Ukrainian language to the Ukrainian nationals in KAZ and Siberian Russia. S=9+20dB. Left registered 7435 kHz due of CHN, CZE, and ROU registrations at the very same time there. But as Eike Bierwirth explained RUI left 11620 kHz after a single hour at 1610 UT, due of co-channels AIR Delhi 1615-1715 UT Russian see complaints?  
(wb, wwdxc BC-DX TopNews Oct 31)

UNIDENTIFIED 6165 at 0430 UT Nov 1. Possibly N'djamena Chad, S=3 weak, just above threshold. Heard also Nov 3rd at 0435 UT, starts many days with playing African drums. Poor S=6 signal only.

9745 (?) Probably VoHan Kuanyin Taiwan, male singer in Chinese, S=8-9 at 1415 UT Nov 2.  
(wb, wwdxc BC-DX TopNews Nov 1/2/3)

12257.14v Dave Jones' WR International pirate radio station puzzled me with excellent British accent program like BBCWS. website at <<http://wrinternational.co.uk>>  
Scheduled 08-11 UT Sundays, noted at 0901 UT Oct 31. TX site veiled, somewhere in NoEngland, Wales or Scotland? Propagate well into Europe.  
(wb, wwdxc BC-DX TopNews Oct 31)

UNIDENTIFIED {probably Turkish Cyprus} 6150.73 at 0412 UT Nov 11, terribly distorted pop songs flaring up for a few minutes then back into the noise but carrier traced to 0456 UT when ousted by co/channel RHC. Again noted on exact same freq 1600 UT after WYFR had left. My best bet would be R Bayrak from Northern Cyprus. Can anyone confirm?

(Martien Groot-HOL, dxld Nov 11)

U.K. 5775 Intermodulation from Rampisham-UK 5-6 UT.

Wer sendet auf 5775 kHz 0540 UT? War vorher Japan. Moin, habe heute Morgen auf 5775 kHz 0540 UT was afrikanisches auf dem Schirm. Finde aber nichts in den Lists.

Hoere aber irgendwie BBC Hausa? Wer klaert mich auf?

(Eike Moeckel-D, A-DX Nov 8)

Re: Wer sendet auf 5775 kHz um 0540 UT?

Danke Eike, das scheint als einfache Intermodulation aus Rampisham UK von zwei 500 kW starken Sendern geklaert zu sein. Die YT Aufnahme kannst Du bitte wieder loeschen, Danke dafuer.

Es gibt um diese 05-06 UT Stunde mit NHK zwei Aussendungen, die hier in Betracht kommen.

1 - Einmal NHK R Japan, aus Sackville Canada mit Sendungen verschiedener Stationen auf 5960, 6110, 6175, und 6190 kHz.

2- Zum Zweiten aus Rampisham in England mit NHK R Japan English, BBC mit 2xRussian, BBC English und ab 0530 UT in Hausa. Letztere Aufnahme hat mich stutzig gemacht und Sackville ausschliessen lassen.

7260 R. Vanuatu operating on 7260 kHz from B-10. Some Japanese DXer received at about 1000 UT on Nov. 9 and confirmed it.  
<<http://www.youtube.com/user/22360679Y>> by Nakanaka-JPN.  
RNZ technician Steve White repaired the faulty transmitter.  
(Sei-ichi Hasegawa-JPN, dxld Nov 9)

Re: Vanuatu 7260 kHz. Two carrier  
- ein etwas verwuschelter auf 7259.9515 kHz und  
- ein klarerer mit Kern auf 7260.0004 kHz.

Nix ist freilich hoerbar. Koennten also Mongolei & China sein. An Vanuatu

glaube ich (derzeit) noch nicht ganz.  
73, Nils DK8OK - Winradio Excalibur & SDR-IP/GPS & Perseus.  
(Nils Schiffhauer-D, A-DX Nov 12)

Vanuatu 7260 [?7259.9515 kHz? Nils] kHz. Yes, they are definitely back on  
7260 kHz. I have just been listening to them at 0730 UT with a very strong  
signal, S=9+20db. It is much stronger here in Pazific than the // 3945  
kHz.

[later] I heard them again this morning (local time) at 1847 UT with  
"good morning" announcements, so it would seem that they were signing on  
then. Again it was a good signal, but with some co-channel and adjacent  
channel interference. They are still there at 2050 UTC, but are weak and  
fading rapidly.

(William Hague-AUS, NWDXC Nov 2)

#####

The decline of AM broadcst continues.

With the closing down of AM broadcast from Radio Sweden on the 30th of October 2010, Sweden has become the 4th country in Europe without active AM transmitters. The other three countries are Liechtenstein (with AM broadcast on medium wave between the years 1938 and 1939), Andorra (all AM broadcasts from there were closed in 1982) and San Marino (with no active AM transmitters at any time).

Worldwide there are about 32 countries and territories without active AM transmitters. Many of them are islands; the biggest is Jamaica with an area of about 11,000 square kilometers. A relatively big country group is located in West-Africa. The country with the biggest area with no AM transmitters is Namibia with about 824,000, on the second place is Sweden with about 450,000 square kilometres. Well, at the beginning of the next year we will have with Switzerland the fifth country in Europe without AM transmitter anymore.

73s Erich

ALBANIA 1394.87 kHz Fllake txion heard in USA. It has a very strong signal here at 2124 UT. Measured on the 1 kHz scale of SpecraVue. It's a man in Russian, sounds a lot like TWR so I'd guess it's Albania. Kinda neat how you can zoom in like with the Perseus and really get close on frequencies.

Yes, it's Albania. TWR IS at 2129 UT, announcer with frequencies just before that, and transmitter shut down at 2130 UT. Last time I heard them was last December, if I remember.

(Mike Bugaj-CT-USA, SDR-IQ, 60 degree flag, dxld Nov 3

ALBANIA/BELARUS/RUSSIA R Tirana logs of Nov 18. All Radio Tirana's transmissions noted here in Germany on various frequency channels worked well tonight,

EXCEPT the 6 0 4 0 kHz channel in Serbo-Croatian, see report below.

13640 English program from Radio Tirana noted fluttering S=7-8 signal strength at 1552 til 1558 UT, Nov 18. Strong carrier observed here in Germany, but nearly tiny audio of 10% modulation only.

RADIO TIRANA NEEDS URGENTLY AN OPTIMOD UNIT to strengthen their audio on

feeder line. At 15.59 UT final announcement under threshold, 15.58:10 final interval signal of Radio Tirana. At 15.58:25 UT TX at Shijak signing OFF.

6000 kHz Radio Tirana in Italian language at 1800 UT Nov 18th. S=7-8 strength, low modulation. But I've seen two carrier peaks on even 6000.00 and on 6000.030 kHz tonight.

7465 kHz Radio Tirana in French language at 1835 UT Nov 18, S=9+10 ... +15dB. Moderate signal, not bad.

B u t noted a minor adjacent interference signal, when checked also in 1800-1830 UT, as well as 1830-2100 UT time range:

Belarus Radio Minsk of nominal fundamental 7360 kHz produces TWO BAD SPURIOUS SIGNALS 112 kHz away each, symmetrical on both sides in 7463 to 7482 ... and 7245 to 7251 kHz, with peak signals on 7248 and 7472! kHz.

6040 kHz R Tirana noted on 18.58:48 UT Nov 18, TX sign on with Radio Tirana interval signal tune at Shijak.

BUT Voice of Russia's DRM TRANSMISSION from Kaliningrad enclave site ahead of Tirana's signal, latter still also on air at 19.00 UT.

They stopped the digital mode DRM transmission of Voice of Russia on 6040.00 kHz very late at 19.06.42 UT,

THIS IS FAR 7 MINUTES TOO LATE !!!!

The Russians should stop their digital outlet DRM NOISE BUZZER Hum sharp EXACT at 19.00 UT !

Please complain on Moscow Telecommunications and frequency manager authorities.

After Russian DRM intruder from Kaliningrad enclave stopped at 19.07 UT on Nov 18, Radio Tirana noted on S=9+10 ... +20dB level signal. At 19.12 UT final announcement in Serbo-Croatian, interval signal Radio Tirana til 19.12:30 UT, TX signing off.

7465 kHz Radio Tirana in English noted at 19.45 til 19.57:55 UT Nov 18, very powerful of S=9+25dB strength. But low audio modulation of 20% only.

// 11635 kHz - signal towards North America skips over my head, only S=1 carrier noted. 19.52 UT Berisha report on State Budget 2011, construction of new roads in Albania. 19.53 UT female singer/orchestra.

6000 kHz Radio Tirana's Italian sce. Co-channel covered totally by YFR Family Radio hymn of S=9+20dB til 19.59:58 UT sharp signing off at Moscow Taldom transmitter center.

RT interval signal noted as early as 19.59:40 UT underneath YFR already.

S=8 fair signal on low modulation, started Italian program from 20.01:25 UT til 20.28:06 UT, TX OFF.

1st - Minor jammer buzz hum noise interference on exact 6003.00 kHz from

North Korea, and

2nd - noted for the very first time new China National Radio program on co-channel 6000 kHz, but on very low minor level of non-directional transmission from Beijing site.

6000 kHz CNR-1 at 1955-0100 UT daily Chinese 100 ND Beijing-CHN

7465 Much better signal, feed and antenna change(?) now at 19.58:50 UT Nov 18, TX on in French service, Radio Tirana interval signal hymn, S=9+30dB powerful. French program started a little late at 20.01:30 UT Nov 18.

7465 kHz followed immediately later at 20.31:15 UT by German service program from Tirana. ID in German language on moderate signal of S=9+10dB.

7530 kHz Radio Tirana in English at 2105 UT, Nov 18, S=9 ... S=9+10dB. Low modulation too; and // 9895 kHz in 31 mb, poor strength S=4-... 6, latter maybe appears on much better signal strength level in GB & IRL, or even far further westerly on CAN/USA target.

News items: Cooperation with Tourist Travel Agencies. Mobil phone operator PLUS signed new agreement. 2011 budget about 30.3 Mill lek projects of southern access road. Albania Today: Canadian oil and gas company ... (wb, wwdxc BC-DX TopNews Nov 18)

6040 Radio Tirana in Serbo-Croatian, Mon-Sat at 1900 - 1912 UTC. Tonight in Germany on S=9+20dB level. IS and SIGN OFF TX at 19.12:21 UT, Nov 19. (wb, wwdxc BC-DX TopNews Nov 19)

AUSTRIA OE40ADXB - special call on Dec 15 - 31, 2010.

Liebe DX Freunde! Folgende Info zu einer speziellen Funkaktivitaet des ADXB - Austrian DX Board kann ich Euch mitteilen:

Sonder Rufzeichen OE40ADXB

Zum 40 Jahre Jubilaeum des ADXB (Austrian DX Board) verwendet der Verein ueber die Klubstation OE1XBC (1080 Wien, Zeltgasse 7) das von der Behoerde bewilligte Sonderrufzeichen OE40ADXB im Zeitraum 15.-31. Dezember 2010.

Es wird verstaerkt Sendebetrieb auf Kurzwelle auf den Amateurfunkbaendern durchgefuehrt.

Bevorzugte Frequenzen werden sein:

80 Meter - SSB 3630 - 3650 kHz, CW 3530 - 3540

40 Meter - SSB 7125 - 7150 kHz, CW 7025 - 7030

30 Meter - CW 10120, DIGITAL 10140 kHz

20 Meter - SSB 14225 - 14235, CW 14030 - 14040, PSK 14070 RTTY 14085

17 Meter - SSB 18120 - 18130, CW 18080 - 18085

15 Meter - SSB 21275 - 21285, CW 21030 - 21040 (wenn Band offen)

12 Meter - SSB 24940 - 24950, CW 24900 - 24905 (wenn Band offen)

10 Meter - SSB 28400 - 28450, CW 28030 - 28040 (wenn Band offen)

Die Verbindungen werden auf Anfrage mit einer Sonder QSL Karte bestaetigt.

Die Abwicklung erfolgt entweder ueber das QSL Buero des OeVSV oder direkt (\*Rueckporto erwuenscht\* / \*please return postage\*) via

ADXB - Austrian DX Board,  
P.O.Box 1000,  
A-1081 Vienna, Austria.

(wb, wwdxc BC-DX TopNews Nov 12)

BELARUS SPURIOUS. GOLDEN LEMON AWARD of the night to Belarus Radio Minsk  
outlet.

7465 kHz Radio Tirana in French language at 1835 UT Nov 18, S=9+10 ...  
+15dB. Moderate signal, not bad.

B u t noted a minor adjacent interference signal, when checked also in  
1800-1830 UT, as well as 1830-2100 UT time range:

Belarus Radio Minsk of nominal fundamental 7360 kHz produces TWO BAD SPURIOUS SIGNALS at 112 kHz away each, symmetrical on both sides in 7463 to 7482 ... and 7245 to 7251 kHz, with peak signals on 7248 and 7472! kHz.

(wb, wwdxc BC-DX TopNews Nov 19)

[...] But what I found was a rather bad, FMing spur on about 7420, and more spikes from the same modulation around 7470 kHz . Which modulation? The one from the 7360 / 7390 Minsk twins. {is 7360 fundamental one, wb.}

The 15 x 5 kW ex-jamming transmitter block on 7360 kHz has also developed a slight distortion, whether or not it may be related to the spurs. 7390, operated with an old transmitter that was already shut down for a decade or so, is cleaner but has a bit less upper mids and somewhat lower modulation. Both outlets show their own sort of a mild hum, reminiscent to grandmas radio, in particular 7390 kHz where the hum has a pronounced 100 Hz component.

Wow, this is truly old-school steam radio, especially since no obvious dynamics compression is in use, unlike the co-sited 250 kW transmitter that is off at this time of the day. One does not find such uncompressed, soft modulation too often these days.

(Kai Ludwig-D, dxld Nov 17)

BOLIVIA 3310 R. Mosoj Chaski, Cochabamba, 0021-0036, 05 Nov'10, Quechua, talks & Indian tunes; 34332.

DENMARK 1062 kHz QSL Danmarks Radio.  
Hallo zusammen, nachdem ich vor einigen Tagen eine freundliche e-Mail von Danmarks Radio erhalten habe, dass keine QSL mehr ausgestellt werden, erhielt ich heute einen QSL Brief per post fuer die 1062 kHz auf einen Video reception report auf YouTube.  
VS/Unterzeichner: Thomas Weber, <teknikinfo @ dr.dk>  
(Ralf Ladusch-D, A-DX Nov 19)

DENMARK/GERMANY Former DECCA navigation masts.  
Antennen bei Hjerpstedt. Neulich in Daenemark kam ich oestlich von Hjerpstedt (Kystvej 419 Richtung Roemoe) an zwei Sendemasten vorbei, der eine vielleicht 40m hoch, der andere 25m. Sie waren professionell verankert und mehrfach abgespannt. UKW-Antennen, Funk-Telefon oder so was aehnliches war nicht erkennbar. Am eingezaeunten Grundstueck stand auch nichts.  
55 01 04.70 N 08 41 33.90 E

(Kai-Uwe Hoefs-D, A-DX Nov 12)

Es handelt sich um einen ehemaligen Sender des Navigationssystems DECCA.  
Daenische Kette 7B. Bezeichnung: Green. Frequenz: 128.048 kHz.  
Location: 55.017 N, 08.717 E - 55 01 04.70 N 08 41 33.90 E  
Siehe auch: <[http://www.jproc.ca/hyperbolic/decca\\_scandinavia.html](http://www.jproc.ca/hyperbolic/decca_scandinavia.html)>  
(Rudolf Heinz-D, A-DX Nov 12)

Re: Antennen bei Hjerpstedt. Interessant, noch 11 Jahre nach  
Ausserbetriebnahme stehen zwei Masten in der Gegend rum. Auf allen 4  
daenischen DECCA Stationen gibts keinen Betrieb mehr ? Die sind ja laut  
Webseite seit 1999 alle tot.

Ich sehe z.B. keine Antennen mehr auf Moen cliff,  
? 54 57 9.49 N 12 32 31.28 E

oder auch nur noch die Wunde in der Landschaft bei der Samsøe Insel  
? 55 56 37.09 N 10 34 47.72 E

bei Hroerring ist mir auch keine Decca Anlage mehr erkennbar, dafuer 6  
Radars der Amis? - und Windturbinen ueberall.  
<<http://www.panoramio.com/photo/32743984>>

Hier sieht man den Aufbau der zwei DECCA Masten in Cuxhaven Zeven.

ERITREA 7175 on 16 Nov at 1529 UT, Voice of the Broad Masses Program 2, heard in presumed Amharic with local music (almost oriental-sounding), into a station ID, and a pop instrumental music bed. Good signal strength and no QRM to speak of. CNRI must not have discovered this frequency yet.

[...] A light night of DX'ing. I was also listening on 7120 kHz and it seemed like Voice of the Broad Masses Program 1 was active there judging by the languages, but Chad also shares the frequency. I did not hear any French in over three hours of monitoring, but I kept hearing what I thought was "N'Djamena," but might also have been "Eritrea." Signal not as good as 7175 if indeed it was Eritrea.  
(Albert Muick-Kandahar-AFG, WinRadio G303e, 100m longwire, dxld Nov 16)

Eritrea noted on Nov 9th at 1550-1902 UT and daily till Nov 13th on 7120 kHz. Good signal is usually at 0355 UT when is IS and ID in 4 or 5 different languages (feat Ar) // 7185 kHz. On Nov 10th and 11th observed 1500-1600 UT on 7175 // 7185 kHz and on 7120 // 7185 kHz from 1600 UT, Nov 16.  
(Rumen Pankov-BUL, wwdxc BC-DX TopNews Nov 16)

ERITREA (ex 5100 kHz) R Bana was a radio service operated under the Education Ministry of the Eritrean Government. According to many Internet sources Eritrean security forces raided the headquarters of R Bana on Feb 22, 2009 (quote from BBC: "Eritrea has arrested up to 54 journalists in a new media crackdown ... Eritrean authorities on 22 February 2009 ordered a raid on the premises of Radio Bana, a small station in the heart of the capital that puts out educational programmes under the sponsorship of the Education Ministry. Its entire staff of around 50 journalists were arrested" ... ).

I got contact with one of the volunteer workers who have been working on R Bana and he is rather sure that the story of R Bana ended on that day. Several people who worked there are still in prison and the transmitting facilities were taken over by the Ministry of Information. They launched a new frequency (this 5060 kHz) and after that the programmes identified have had totally different kind of nature ("Voice of Oromo Liberation", "Arbegnoch Voice Radio"). They also have a standard morning program (this program name is still unidentified for me, but I myself have never heard "Radio Bana" in the early morning hours here on 5060).  
(Ilpo Parviainen-FIN, dswci DXW Nov 18)  
Thus Horn of Africa music on 5060 kHz rather comes from this clandestine!  
(ap)

EQUAT GUINEA 15190 R. Africa, at 1605 UT on Nov 10. Series of religious shows in English; "The People's Gospel Hour" with mailing addresses in

Halifax, Nova Scotia and Boston, MA; 1620 UT a different preacher; fair to poor. Brazil will have a hard time today if they broadcast here.  
(Ron Howard-CA-USA, JPNpremium Nov 12)

FRANCE 6165 Additional KBS World Radio to Africa in French. From Dec 1, KBS Word Radio will be on 6165 kHz to Africa at 2100-2200 UT in French via Issoudun. 3955 kHz to Europe via Skelton-GB remains in // .

GEORGIA [ABKHAZIA] 9535 at 0700 UT on 8 Oct, Abkhaz State R, back on SW after month of silence, SIO 353.  
(Rumen Pankov-BUL, Nov BrDXC-UK Communication direct and via dxld)

On 9535 kHz instead of Abkhaz Radio on Nov 10th began at 0800 the Russian FM "Avto Radio" with ID in "Pervoe avtamabilnoye radio - Avto radio, U nas novosti" = The 1st Car Radio - Auto Radio. By us there are news. Checking at 0830 UT I found Abkhaz Radio prgr in Ve and from 0902 UT news in Ru, cl/d at 0908 UT Nov 16.  
(Rumen Pankov-BUL, wwdxc BC-DX TopNews Nov 16)

GERMANY/CHINA 9670 Chinese echo jammer against IBB Tibetan at 14-15 UT, IBB Lampertheim groundwave makes it to my location, 100 km away. Heavily interference of VoRussia DRM signal from Moscow Taldom on adjacent 9675, signal ruins 9670-9675-9680 kHz channels.  
(wb, wwdxc BC-DX TopNews Nov 13)

GERMANY 6085 R Gloria, via Kall-Krekel. New catholic broadcasts in December \*0800-1400\* in Sun Dec 05, 12, 19 and daily Dec 24-Jan 02. The leader of R Gloria, Peter Galliker, asks for reception reports which will be verified by a special QSL-card. Please enclose an IRC. The address: Radio Gloria, Postfach 540, CH-6281 Hochdorf, Switzerland.

<www.radiogloria.eu> is their webaddress.  
(Christian Milling, Funkhaus Euskirchen e.V., <www.shortwaveservice.com> via Patrick Robic-AUT, Nov 16)

5980/6005/6085 kHz Test TX Kall. Test 6085 kHz morgen Freitag Nov 19,

morgen zwischen 11 und 12 Uhr MEZ testet die 6085 mit einem "alternativen" Testprogramm...

(Sandro Blatter-SUI, A-DX Nov 18)

Ich habe erst Nov 19 um 1050 UT eingeschaltet.

6005 kHz S=7-9, das schwachste der 3 Signale und tief fadend pumpend.

5980 kHz S=9 kontinuierlich.

6085 kHz test transmission loop annmt, S=9+10dB, etwas staerker als die zwei anderen Signale.

Zum Vergleich: 17 kW aus DLF Berlin Britz 6190 kHz S=9+25dB, letztere eine Klasse hoeher.

(wb, wwdxc BC-DX TopNews Nov 19)

GREECE 12105/11645 Wolfie: More like somebody is playing with the dials who doesn't know last week from this week or more like last year when they used 12105 kHz for B-09. Wrong script maybe? I'm still not betting on 11645 kHz! Soap, soup, whatever (John Babbis, MD, ibid.)

At 1500 UT Nov 6th all three units on air. 9420 / 15650 kHz with Greek sports coverage, and 9935 kHz with Thessaloniki regional service. Strange schedule, every hour there is a difference on service there.

73 (wb, ibid.)

Wolfy: Maybe disgruntled employees because they are getting cuts in pay, vacations, bonuses, and Greece is raising the retirement age. Perhaps things will settle down after the elections. From the B-10 HFCC site (I wonder if this is why VOG goes from 11645 in Summer to 12105 kHz in Winter, usually) Adjacent channel interference?

Regards, John Babbis (USA, dxld Nov 10)

Just for the record, no sign of the Sunday English programme "Greek In Style" on V of Greece again today, 14 November. Checked at 0900, 1100, and 1300 UT. Also no sign of Radio Filia on 11645 kHz - this frequency was in // with 9420 and 7475 / 15630 kHz with V of Greece programming.

(Alan Roe-UK, dxld Nov 14)

GUINEA 4900 Familia FM, Timbi Madina, at 1942-2004 UT on 05 Nov'10,  
Verancular, talks, French at 2000 UT for a news bulletin; 35332; better on  
Nov 61 at 1815 UT.

7125 R. Guinee still silent on this fq - or did they move to some other  
fq above 7200 kHz?  
(Carlos Goncalves-POR, wwdxc BC-DX TopNews Nov 8)

GREECE QSL ERT3 Thessaloniki, 9935 kHz, f/d email Word document in  
132 days for airmail English report and US \$5 in return postage.  
V/S Tatiana Tsioli <ttsioli @ ert3.gr>

Tatiana also attached a very nice ERT3-made tourist and history brochure (about 8 pages!).  
(Albert Muick-Kandahar-AFG, WinRadio G303e, 100m longwire, dxld Nov 17)

GUAM QSL NRV, US Coast Guard, 12585 kHz, f/d letter from OS2 Ryan S. Tolentino, Communication Unit Controller in 63 days with no return postage. Address: USCG Sector Guam Command Center, PSC 455, Box 176, FPO AP 96540-1056, USA.  
(Albert Muick-Kandahar-AFG, WinRadio G303e, 100m longwire, dxld Nov 17)

GUATEMALA 4052.46 R Verdad, Chiquimula, at 2330-2335, 0146-0152 and 0518-0602\* UT, Nov 02, 03, 05, 11 and 12, a couple of males in Spanish conversation, sermon, 0500 UT Lord's Prayer in English, "Spiritual Songs", closing ann, ID: 0557 UT ID: "Radio Verdad, Chiquimula" and anthem, very weak, 14321.  
(Bolland, Hauser and Mendez, Timofeyev via Dexplorer; dswci DXW Nov 18)

GUYANA 3289.98 Voice of Guyana, Sparendam (tentative), at 0233-0243 UT on Nov 12, ann in unidentified language, Latin American songs, poor with strong RTTY QRM.  
(Mikhail Timofeyev-RUS via Dexplorer; dswci DXW Nov 18)

INDIA AIR Haj Service beamed to Indian pilgrims in Saudi Arabia in Urdu this year is as follows: From 19 Oct 2010 to 17 Dec 2010:  
0530-0600 UTC 15770 17845 kHz. Hope that the Indian Haj pilgrims carries a radio with them.  
(Jose Jacob-IND VU2JOS, DXindia Nov 6)

7550 AIR GOS, Nov 16 at 2225 UT during sporting segment, presumably about cricket as little else matters. Weaker here than // 6280 kHz as reported yesterday; also on weaker // 9445 kHz but out of synch with the others.

HFCC has both 6280 and 9445 kHz as 500 kW, 320 degrees from Bengaluru, but no listing for 7550 kHz, a frequency certainly in use previously and now.

AIR's own website <<http://www.allindiaradio.org/external.html>> is undated and apparently not meant to be current; it does show frequencies for most of the broadcasts but they are missing for this one, GOS No. V, at 0215-0400 IST!

EiBi by time as of November 9 has all three of the EUR frequencies as Bengaluru:

<<http://www.eibispace.de/dx/bc-b10.txt>>  
"2045-2230 IND All India Radio DIGITAL E EUR 9950k  
2045-2230 IND All India Radio GOS E EUR 7550b 9445b 6280b  
Oc 9910a 11715k FE 11620b SEA 11620k"

Aoki <<http://www.geocities.jp/binewsjp/bib10.txt>> shows 6280, 7550 and 9445 kHz all as B-10 info for 2045-2230 UT, Bengaluru except 7550 kHz Khampur.

So 2.5 weeks into the new season, not all sources have the latest info, but the latter ones appear correct as far as the EUR frequencies we can hear. Obviously there is no reliable source out of AIR itself, which ideally would make all these sources match immediately.  
(Glenn Hauser-OK-USA, dxld Nov 17)

Hi Glenn, Re AIR GOS 7550 kHz.

Here's the schedule you were looking for:

<<http://www.allindiaradio.org/schedule/ukweurope1.html>>

AIR website was updated on 29th Oct with B10 schd & the link was posted in dxld. Here's the link

<<http://www.allindiaradio.org/schedule/fqsch.html>>

Jose will update AIR B10 sched on his website once he comes back to Hyderabad, currently in south India attending his ailing father. I do not maintain any list. Regards Alokesh.

(Alokesh Gupta-IND, dxld Nov 18)

13770 AIR Hindi 1615-1730 UT at S=8-9 signal level from Bangalore.  
Suffered by malfunction recording by very low speed, like a Donald Duck  
funny audio.

(wb, wwdxc BC-DX TopNews Nov 18)

GOLDEN LEMON AWARD of the night to AIR Aligarh site outlet.

9998 kHz - moderate spurious signal noted at 1715 til 1945 UT, originate

some 378 kHz away from fundamental AIR Aligarh 9620 kHz transmission in Arabic. Covers range 9994 to 10001 kHz, peak signal at 9998 kHz.

Another AIR Aligarh India transmission carries a heavy 140 Hertz heterodyne on 9470.14 kHz at 1305-0040 UT, hitting against 9470.00 kHz even from Moscow Taldom tentat.  
(wb, wwdxc BC-DX TopNews Nov 18)

INDONESIA 3325 RRI Palangkaraya, 1455-1515, Nov 11, Bahasa Indonesia, two pop songs, phone-in program with many talks with listeners, almost good with periodical CW QRM.

3995.02 RRI Kendari, 1526-1534, 1548-1557'21\*, Nov 11, Bahasa Indonesia talks, pop song, poor with strong splashes from 3990 kHz (China).

9680.03 RRI Jakarta, Cimanggis, 1007-1027, Nov 11, Bahasa Indonesia, local pop song, talk and phone-in program with many talks with listeners, fair with splashes from CNR1 jammer on 9690 kHz.  
(Mikhail Timofeyev-RUS via Dexplorer; dswci DXW Nov 18)

9525.96 VoINS Jakarta tx noted, but only carrier on air, no program audio at 1715 UT Nov 18. S=8 signal.  
(wb, wwdxc BC-DX TopNews Nov 18)

ITALY 819 MW, RAI 1 and local broadcasts, Trieste. As from Nov 15 will be silent for about a month, due to works on the antennas. A couple of months ago other works required brief interruptions.  
(Luigi Cobisi-ITA, via Dexplorer; dswci DXW Nov 18)

JAPAN 5910 JSR Shiokaze on Nov 17, to North Korea in Korean/Chinese/English on Wed Nov 17 at 1400-1430 UT NF 5910 Yamata-JPN 100 kW / 280 deg, instead of 5985 on Tue Nov 16  
(R BULGARIA DX MIX News, Ivo Ivanov, via wwdxc BC-DX TopNews Nov 17)

KALININGRAD ENCLAVE / RUSSIA 6040 kHz R Tirana noted on 18.58:48 UT Nov 18, TX sign on with Radio Tirana interval signal tune at Shijak.

BUT Voice of Russia's DRM TRANSMISSION from Kaliningrad enclave Bolshakovo site ahead of Tirana's signal, latter still also on air after 19.00 UT. Scheduled at 16.00 til 19.00 UT only.

They stopped the digital mode DRM transmission of Voice of Russia on 6040.00 kHz very late at 19.06.42 UT,

**THIS IS FAR 7 MINUTES TOO LATE !!!!**

The Russians should stop their digital outlet DRM NOISE BUZZER Hum sharp EXACT at 19.00 UT ! Please complain on Moscow Telecommunications and frequency manager authorities.

After Russian DRM intruder from Kaliningrad enclave stopped at 19.07 UT Nov 18, Radio Tirana noted on S=9+10 ... +20dB level signal. At 19.12 UT final announcement in Serbo-Croatian, interval signal Radio Tirana til 19.12:30 UT, TX signing off.

So, - Radio Tirana did benefit positively only 5 minutes service of 12 mins in total broadcast time...

(wb, wwdxc BC-DX TopNews Nov 19)

KOREA D.P.R. 2850 KCBS Pyongyang, on Nov 15 at 1340 UT - A variety of Korean music heard, but mostly lavish orchestral pieces as usual.

Blockbuster S=9+10dB signal, and // to 657 kHz primary MW outlet as well as 684 and 855 kHz.

(Guy Atkins-WA-USA, DXplorer Nov 18)

KUWAIT 9750 R Kuwait in Arabic at 1400 UT Nov 13, S=8-9, ahead of  
 RTM Kajang co-channel.  
 (wb, wwdxc BC-DX TopNews Nov 13)

6080 Kuwait NF. R Kuwait, 1840-1905 UT, Nov 13, Arabic noted on recent NF  
 replacing 6050 kHz? Dominates co-channel Belarus & R Australia.  
 (Martien Groot-HOL, dxld Nov 14)

Log: 6080, Ar, Kuwait (tent), 19.40...UC, Nov 12. Um 2045 UT hoere ich  
 auch arabischen Gesang auf 6080 kHz.

6050 1600-2200 39,40 KBD 500 non-dir Arabic KWT RKW MOI  
 Man hat in Kuwait die Frequenz 6050 kHz verlassen. Dort hoere ich nur noch

TRT Tuerkei Franzoes. und Lhasa Tibet China, keine arabische Musik mehr.  
6050 ist abends schwer belegt, auch durch Emirler und Wertachtal, da hat  
man sich was Neues gesucht.

6080 Kuwait NF. Yes Sir, heard on Friday 12 in Munich and Eastern Austria  
too.

Kabd Kuwait replaced 6050 kHz at 16-22 UT by 6080 kHz. On 6050 still TRT  
Emirler and Lhasa Tibet. Also Wertachtal registered here, a lot of QRM,  
and Kuwait left for 6080 kHz now.

(Guenter Lorenz-D, Herbert Meixner-AUT, wb Nov 12)

LITHUANIA The Polish radio in the Belarus language. At the Belarus  
service of this radio station in this season it was added translation  
through Sitkunai on 1386 kHz (500 kW, 1700-1800 UT). The most interesting  
that this frequency and the same time appears in the schedule Russian  
service "Voice of Islamic Republic Iran" (during the past season Russian  
service of the WEIGHT really used the MW-transmitter in the Lithuanian  
Sitkunai in this season - only SW).

(Aleksandr Diadishev / "deneb-radio-dx", via RUSdx Nov 12)

LITHUANIA 3955 AGDX DX Sendung via Radio HCJB program at Sitkunai-  
Lithuania: MORGEN, Samstag, 20. November, 2010

Die AGDX DX-Sendung ueber Radio HCJB am Samstag, 23. Oktober, ist aus  
technischen Gruenden nicht ueber die Kurzwelle gesendet worden. Radio HCJB  
hat uns einen Ersatztermin bereitgestellt:

AGDX DX-Sendung via Radio HCJB  
am Samstag, 20. November 2010

Der (bekannte) Sendeplan: 1530-1600 UT via WRN; 1700-1730 UT auf 3955 kHz  
(Sitkunai-LTU). Die WRN Ausstrahlung ist auch auf WorldSpace Afristar zu  
hoeren.

Und fuer Empfangsberichte an die AGDX gibt es auch das Webformular auf der  
Website

<<http://www.agdx.de/>>

Dort eintreffende korrekte Berichte werden per e-QSL bestaetigt.

Viel Spass! - Anton

(Dr. Anton Kuchelmeister-D DK5TL, A-DX Nov 19)

RADIO WAVES INTERNATIONAL, 27th Birthday on the air 1983-2010 in addition

of our own transmitters on 7480, 6325 & 11401 kHz (that we hope to operate at same time) here is the winning number: 6055 kHz. Stay tuned and reports via email or snail mail and get a special QSL and Gifts too.

info line for sms outside France:

00 33 6 75 44 70 26 In France 06 75 44 70 26

Indeed a special QSL Card will be available for each day of broadcast.

Welcome to collectors. Keep on F.F.F.R! Peter HILLS & Philippe.

Flash INFO: 1983-2010. Radio Waves International fetera ses 27 ans sur les ondes via ses emetteurs avec en plus:

des programmes relayes en Lituanie sur la frequence de 6055 kHz / bande des 49 meters, tous les samedis soir en Novembre 6, 13, 20 & 27 de 2130 a 2230 UT.

Extra programme le vendredi 12 Novembre de 2130 a 2230 UTC avec une puissance de 100,000 Watts !

Flash INFOS: 1983-2010. Radio will celebrates its 37th year of Free Radio on the airwaves using its own transmitters. We will add relay from Lithuania on the channel of 6055 kHz from the 49 meters band every Saturday night on November 6, 13, 20 & 27 de 2130 a 2230 UT. Extra program on Friday November [12] from [213]0 to 2230 UT with a power of 100 000 Watts!

Attention: for UPS or Fedex mail ask us for a special delivery address.

(via Roberto Scaglione, Nov 5 shortwave yg via dxld)

Radio Waves Intl, 7 Nov, 2135 UT on 6055 kHz with song 'show must go on' then someone spelling letters from his address ??? 2138 UT a song with YL singer, 2229 UT with a R&R song, then OM 'that s all' then sign off.

Signal S=7 324x2 with QRM from both bands.

(Zacharias Liangas-GRC, dxld Nov 15)

MOLDOVA [PRIDNESTROVYE] 9895 RNW in Dutch at 0610 UT, 06-08 UT via Grigoriopol site relay. Powerful at S=9+20dB level. See also same powerful Dutch under Bonaire, but both Dutch programs were different.

(wb, wwdxc BC-DX TopNews Nov 19)

MONGOLIA 4895 Mongoliin R, Murun, 0038-0050, 05 Nov'10, Mongolian, talks, orchestral music; 34332, CODAR QRM; // 4830 kHz Altay worse, fluttery.

(Carlos Goncalves-POR, wwdxc BC-DX TopNews Nov 8)

MOROCCO 1080 SNRT, Tahadart site?, [2nd] harmonic? (most likely),at

0951-... UT, 06 Nov'10, Arabic/reg. prgr, not "Al Idaa Al Watania", which was being aired via 207 kHz LW, Ar. music, news bulletin at 1000 UT, talks; synchronised & with the same modulation as on 540 kHz Tahadart, so 1080 kHz is probably its 2nd harmonic... and the story does not end here:

2160 SNRT, 1114-..., 07 Nov'10, Arabic/reg. prgr, talks; presumably, the 3rd harm. of 540 kHz Tahadart; 15341, a rating that's even a bit forgiving.

(Carlos Goncalves-POR, wwdxc BC-DX TopNews Nov 8)

15345.15v RTM/RTV Marocaine via Nador site, S=1, tiny weak broadcast at 1636 UT Nov 18. Usual set on ODD channel.

(wb, wwdxc BC-DX TopNews Nov 18)

MYANMAR 5985.0 Myanma Radio, at 1430 UT on Nov 18. In vernacular, with indigenous music. On Nov 15 also noted them on 5985.0 kHz at 1321 UT, but by 1329 UT they had switched transmitter sites and were again on their normal 5985.83 kHz.

Have seen a number of reports recently indicating that the Myanmar off frequency transmitter is located at Naypyidaw (also spelled Nay Pyi Taw or Nay Pyi Daw, take your pick). Believe that is wrong. Think it is generally agreed that the off frequency one is the old transmitter located at the former capital, Yangon, and that the exact frequency transmitter that I heard today is the newer one located at the new capital, Naypyidaw.

(Ron Howard-CA-USA, dxld Nov 18)

Rather belatedly, below is the schedule I monitored for Myanmar in Sept 2010. I agree that the off-channel SW frequencies are probably from Yangon site.

There are actually two off-channel units, as both are on air from 0830-1000 UT (5986v and 9731v kHz). It's possible that the third "on-channel" SW transmitter in Yangon (otherwise on 7200 kHz for two parts of the day) is used on 5985 kHz occasionally in place of the off-channel unit during early mornings and late evenings.

#### National Sce

0030-0730 576, 594, FM 98.0

0230-0730 9731v

0930-1630 576, 594, 5986v, FM 98.0

Includes English prgr daily 0230-0330, 0700-0730, 1530-1630 UT.

#### Padauk Myay Sce

2300-0130 711, 5986v, FM 100.0

0730-1000 711, 9731v, FM 100.0

1130-1530 711, FM 100.0

#### Minorities Sce

?2330-0530 5915 (sign-on time not confirmed because of QRM)

0730-1330 5915

#### Distance Education Sce

1330-1530 729, 5915

?Yangon Sce (I suppose that's what it must be - no confirmation yet)

2330-0530 729

0040v-0300 7200  
0730-1500 729  
1010v-1230 7200

Transmitter locations (SW sites assumed from audio delays):

576 Yangon 200 kW  
594 Naypyidaw 200 kW  
711 Naypyidaw 400 kW (ex-693 kHz)  
729 Yangon (power unknown, probably 100-200 kW)

5915 presumed Naypyidaw 50 kW  
5986v presumed Yangon 50 kW  
7200 presumed Yangon 50 kW  
9731v presumed Yangon 50 kW

FM 98.0 and 100.0 MHz Yangon area; there are probably further FM frequencies for Naypyidaw also.

Defence Forces Broadcasting Station, Taunggyi:  
0030-0430, 0830-0930, 1130-1530 5770 kHz.  
(Alan Davies-THA, dxld Nov 19)

NIGER 9705 Voix du Sahel from Niamey at 0455-1200 Ut and 1700-2300 UT, noted at 0600 UT Nov 19. S=6 signal. Strong QRM of TRT Cakirlar in Turkish adjacent 9700, latter S=9+30dB powerhouse.  
(wb, wwdxc BC-DX TopNews Nov 19)

Maybe special day there was in Niger on Nov the 9th. Niger was on 9705 kHz between 1200 and 1900 UT or later mainly in Vernacular but at 1800 UT was heard direct reportage of soccer play commented in French.

15490 R. Pakistan at Nov 12 on 0058-0108 UT. 34433 Urdu, News and koran, ID at 0100 and 0105 UT, // 11580 kHz.  
(Kouji Hashimoto-JPN, JPNpremium Nov 12)

PALAU/TADJIKISTAN Malaysia: Radio Free Sarawak goes on the air. Could hear 15680 kHz 1000-1100 UTC via GlobalTuners Hong Kong receiver this morning (16 Nov) though not audible here in U.K.

This broadcast is from Palau as it could also be heard on the WHRI website <[www.whri.com](http://www.whri.com)> streaming audio on their Angel 4 transmitter Real Audio link. (not sure where 7590 transmits from yet).  
(Alan Pennington-UK, BrDXC-UK Nov 16)

Die neue Station Radio Free Sarawak kommt gerade (16.11.2010, 2310 UT) mit 55433 auf 7590 kHz an, in Lokalsprache BM (durchsetzt mit englischen Begriffen), mit Schlagern der Region und IDs. Laut AOKI wird der Sender in Dushanbe benutzt. Sendeplan 2230-2330 7590TJK? und 1000-1100 15680PAL?.

15680 - nothing like "above threshold signal" heard here at 1000 UT, so I guess its true, Palau instead of Tajikistan, latter which would deliver a far better signal on 15 MHz here in our morning.  
(wb, wwdxc BC-DX TopNews Nov 18)

SARAWAK [non]. New on shortwave: Radio Free Sarawak. Radio Free Sarawak started broadcasting today, on the following schedule:

1st transmission: 2230-2330 UTC on 7590 kHz

2nd transmission: 1000-1100 UTC on 15680 kHz

Per Free Malaysia Today website

<<http://www.freemalaysiatoday.com/fmt-english>>

via Radio Netherlands Media Network <<http://blogs.rnw.nl/medianetwork>>

via Dave Kernick-UK, dxld Nov 15)

Radio Free Sarawak goes on the air.

Radio Free Sarawak, aimed as an alternative voice for Sarawakians, went on air this morning. In an e-mail to Free Malaysia Today, the Bruno Manser Foundation, said that the new alternative radio station will have two daily broadcasts on shortwave, presumably in Iban and Bahasa Malaysia. "It aims at Sarawak's rural communities who lack access to independent media," stated the e-mail.

It is an open secret that the media in Sarawak are strictly controlled by the state government under Chief Minister Abdul Taib Mahmud and logging companies who own and control all major media outlets in the state.

The transmission details of Radio Free Sarawak are as follows:

\* 1st transmission: 0630-0730 local time (2230-2330 UT) on 7590 kHz

\* 2nd transmission: 1800-1900 local time (1000-1100 UT) on 15680 kHz

The e-mail had also attached a message from the producers of Radio Free Sarawak. Below is the message:

"Please send the details to all your Sarawak friends so that they know the existence of the radio-which will become an alternative news source to the Sarawakians, especially to those who stay in the interior. The folks in the interior have been fed with a monotonous one-sided views from the ruling parties - if at all they can receive the TV and radio transmissions. So they need another avenue - and Radio Free Sarawak intends to fill in this gap."

Source: <<http://www.freemalaysiatoday.com>>

Andy Sennitt comments: If anyone knows the transmitter site(s) being used, please advise us. There is nothing in the current HFCC database that appears to match the above schedule. On this page

<<http://www.barubian.net/2010/11/radio-free-sarawak.html>>

the power of 7590 kHz is listed as "100 or 200 kW", and this page <<http://hornbillunleashed.wordpress.com/2010/11/15/11885/>> says "the broadcast is being transmitted out of London", but this probably refers to the production facility rather than the transmitting site.

(Nov 15, by Andy Sennitt, RNW MN blog via dxld)

Second link also says "15869". Radio Free Sarawak received from \*2232 UT on Nov. 15 by many Japanese DXers on 7590 kHz.

<<http://ani.atz.jp/DX/bbs1/img/10327.mp3>> by Hiro in Akita

It was confirmed in Nov. 14 at \*2230 by hiroshi.

<<http://hiroshi.mediakat-blog.jp/e59932.html>> in Japanese.

Radio Free Sarawak has a website: <<http://radiofreesarawak.org/>>  
(Sei-ichi Hasegawa-JPN, dxld Nov 16)

So far linx to audio of Episodes 1 and 2, Nov 14 and 15 and:

Transmission details

\* 1st Transmission:

0630-0730 local time on 7590 kHz

\* 2nd Transmission:

1800-1900 local time on 15680 kHz

About Radio Free Sarawak is the independent radio station that brings you the news you want to hear, not what others want you to hear. No one controls us, except you, the listeners of Sarawak . So tune in and enjoy the news, interviews, reports and comment that you will never get to hear on any of the other government-controlled radio stations in Sarawak. There will be plenty of our best music too, all presented to you in Iban by Papa Orang Utan, our own man from the jungle of Sarawak!

Please listen in and send us back your comments and views, so we can be in touch with you and bring you the radio programme that you like. If you have an issue, a problem or a story that you would like the rest of Sarawak to hear about, message us on this site or ring us on our Radio Free Sarawak local number [DUE SHORTLY] and leave us details of your story or your comment on our answer bank.

We may play out your comments or we may even ring you back so remember, leave your number if you want! And for further independent news and reports on Sarawak go to  
<<http://www.sarawakreport.org/>> (RFS via dxld)

RUSSIA 7330 Voice of Russia, at 1155-1205 UT. Prior to the hour, heard the tone signal that VOR usually transmits before their scheduled transmission. The interesting observation of this was there were two tones being transmitted. One was on 7329.170 kHz and the other was on 7330.836 kHz both on and off. In the meantime, a steady carrier remained on 7330.000 kHz. On the hour, both the side tones ceased and the regular schedule programming began with news in Russian on 7330.000 kHz. The tones when they were transmitting, were at a good level, however, the program signal was very poor when it began on the hour.  
(Chuck Bolland-FL-USA, hcdx Nov 10)

9605 on 18 Nov at 1746 UTC, CLAN, Voice of Meselna Delina heard in presumed Tigrinya (sounds a lot like Arabic to me) with east African music and long talks by a woman. Went to pop music at 1759 UT for about ten seconds and then left the air. Something left at the end of the tape, maybe. About ten seconds after the transmitter left the air, the BBC came up in French. Excellent signals from Samara, Russia with no QRM and some minor fading.  
(Albert Muick-Kandahar-AFG, WinRadio G303e, 100m longwire, dxld Nov 16)

7290/7330 Vo Russia Moscow in English service to WeEUR, played excellent classical music. Logged at 2150 UT Nov 19, 7290 S=9+40dB powerhouse hits the needle, and even much stronger too on // 7330 kHz with tremendous S=9+50dB, both from Moscow Taldom site.

7340 Voice of Russia Novosibirsk-Oyash sce in Spanish and Portuguese  
2100-2300 UT. TX is in very bad shape and audio distorted all the time in

past weeks. Its a 200 kW (combined 4x50kW?) unit, the final tube seems come their final end. Who cares?

5930 In // to Radio Rossii on powerhouse Moscow Taldom on 9840 kHz also the regional station Murmansk Monchegorsk well heard as every day in this season at 04-07 UT time slot. Latter S=8-9 on Nov 19 at 0620 UT.  
(wb, wwdxc BC-DX TopNews Nov 19)

SAUDI ARABIA The programmes in En and in Fr are relaying from their Home Services of Radio Riyadh and Radio Jeddah and not related with BSKSA which is bc in Urdu, Farsi etc. The schedule is as was observed:

Radio Riyadh 0750-0800 En and 0800-0955 in Fr on 17785 kHz.  
1400-1555 in Fr on 17660 kHz, and 1000-11100 in En on 15250 kHz. Radio Jeddah 1100-1227 UT in En on 15250, observed Nov 1-13.

SOLOMON ISLANDS 5019.87 Solomon Islands BC, Honiara, 0810-0845, Nov 01 and 02, pop music and English talks "investigated and arrested .. complex investigation. Program tonight .. Honiara ..Solomon Islands", canned male on music, at peak 33333, splash QRM of Brazilian 5035 kHz.  
(Otavio; dswci DXW Nov 18)

Also heard at 1144 and 1938 UT, Nov 11, unintelligible weak signal.  
(Mikhail Timofeyev-RUS via Dxplorer; dswci DXW Nov 18)

5019.9 SIBC Honiara, on Nov 15 at 0815 UT - Male announcer with sports report in English at tune-in; brief music and into phone interview in English and Pidgin. Noted a few mentions of Solomon Islands. Good signal but low modulation made copy difficult.  
(Guy Atkins-WA-USA, DXplorer Nov 18)

SOLOMON ISLS From RNZ staff newsletter: Steve White leaves on Monday night for the Solomon Islands where he's working on a project for a few weeks.  
(William Hague-UK, NWDXC Nov 21)

New Zealands Steve also has been refurbished the Vanuatu shortwave both transmitters gear recently. (wb)

SOUTH AFRICA 9960 R. Bar-Kulan via Meyerton on Nov 06 at 1639-1700\* UT. 35433 Somali, talk and Somali pops, ID at 1653 and 1655 UT, 1659 UT Koran, 1700 UT sign off.  
(Kouji Hashimoto-JPN, JPNpremium Nov 12)

SPAIN 11755 REE Noblejas starts powerful S=9+30dB with interval signal at 1658 UT, into REE Russian sce at 1700-1730 UT, Nov 18.  
(wb, wwdxc BC-DX TopNews Nov 18)

15325 Emision Sefarad en judeo-espanol de REE, Monday Nov 15 at 1435 UT, M speaking Castilian about the WW II years, interviewed by W speaking JE. The two are so close that they have no trouble understanding each other, tho it would be nice with only one semihour per week if this broadcast could be totally in JE. 1444 UT some nice Sephardic music, marred by lite clix, probably spurs from DentreCuban Jamming Command against Marti on 15330 kHz. 1448 UT discussing film festivals, fill with Triumphal March from Aida (is there a Jewish connexion?); 1453 UT sign- off with schedule still including 11780 kHz for South America UT Tuesdays 0115 UT.

Someone should write <sefarad @ rtve.es> and tell them that they are colliding with Brasilia, and should go back to 11795 kHz, but why should it be up to a bylistener in OK? Does anyone care in their intended audience? She should also be told that giving the Spain/UT days only for the schedule could be confusing to casual listeners in the Americas: 'o sea lunes por la tarde'.  
(Glenn Hauser-OK-USA, dxld Nov 17)

SPAIN Radio Rioja (1179 kHz), Cadena SER QSL.  
30 Tage nach f/up kam ein dreiseitiger Brief (1. Absatz detaillierte Bestaetigung, danach Geschichte des Radios und speziell Radio Riojas, das demnach bereits 1933 als EAJ-18, Logrono, den Betrieb aufnahm) nebst Aufklebern fuer den RR betreffend ein Lokalprogramm.

Angegebene Maximalsendeleistung auf MW: 30 kW

Adresse:  
Radio Rioja, S.A.  
Avenida de Portugal, 12  
26001 Logrono (La Rioja)

Spain

Auf 1179 ist die SER uebrigens auch aus Valencia aktiv..

SUDAN 7200 on 16 Nov at 1525 UT, Sudan RTVC, Heard with man in Arabic talks with many mentions of Sudan. Fair signal, but beat up by CNRI on 7205 kHz with a 20 kHz occupied bandwidth. Sure wish the Chinese would get it together on splatter and occupied bandwidth ...

(Albert Muick-Kandahar-AFG, WinRadio G303e, 100m longwire, dxld Nov 16)

SWAZILAND HCJB Global Technology Center in Elkhart, Ind., successfully repaired and upgraded a 50 kW SW transmitter for use by Trans World Radio (TWR) in Swaziland. The transmitter was shipped to the US a couple of years ago. Last spring a final test went wrong and the transmitter was damaged, but technicians succeeded in create new documentations notwithstanding it was a prototype with Serial No. 1, and the original documentation from the manufacturer had been lost. On Oct 20 the transmitter was finally shipped to Africa. It is scheduled to arrive at TWR's site before Christmas.

The delay did help the engineers correct some problems in components that were not part of the upgrade. The changes will also improve the reliability and maintainability of the transmitter in Africa, HCJB says in their weekly newsletter. HCJB Technology Center is now working on a 100 kW transmitter to be refurbished for HCJB Global-Australia's international broadcast facility in Kununurra.

(Lucio Cobisi-BRA, dswci DXW Nov 18)

9500 on 18 Nov at 1815 UT, TWR Manzini with african-accented preacher thumping the bible for all it was worth. Not sked'ed per EIBI and AOKI, but here at 1800 UT nonetheless. Good signal but beat up on by BBC on 9505 kHz.

(Albert Muick-Kandahar-AFG, WinRadio G303e, 100m longwire, dxld Nov 16)

TAJIKISTAN/CHINA 7487.00 odd frequency channel of Voice of Tibet, Nov 13 at 1330-1400 UT Dushanbe-Yangiyul TJK. Heavy Chinese FIREDRAKE MUSIC jammer on even 7485 kHz.

3215 WWCR, Nashville, 0201-0205, Nov 12, English talks with music in the  
pauses, fair.

5110 WBCQ, Monticello, Maine, 0140-0150, Nov 09, English "Overnight AM"  
show, adv for a Sony receiver when the power or internet breaks down!  
35343. (Petersen)

5755 WTWW, Lebanon, 1055-1102, Nov 11, English religious talk with  
mention of hundred thousands watts transmitter, full ID at 1100 UT with  
mention of their global audience including Russia, Bible course, fair with  
CW QRM.

7811USB AFRTS, Key West, 1045-1051, Nov 11, English dialogues, fair-  
almost good // 5446.5 kHz weak under utility station.

9369.88 WTJC, Morehead City, 0948-0953, Nov 11, English talk with mention  
of fbnradio.com, choral religious songs, very strong signal, but good only  
due to fading.

9955 WRMI, Miami, 0912-0917, Nov 11, English talk, poor and then worse  
due to downward propagation (also at 1002 and 1225 UT - but very weak  
under strong Cuban noise jamming).

15385.26 KJES, Vado, 2024-2100'00\*, Nov 11, Spanish fragments with  
musical pauses, nice slow songs including "Aleluya" at 2043 UT,  
unintelligible ID at 2029'30 UT as "Esta es...", etc. - mostly fair till  
2050 UT (35333), then poor with deep fading and local noise. First time  
heard here near St.Petersburg.  
(Mikhail Timofeyev-RUS via Dexplorer; dswci DXW Nov 18)

9264.97 WINB Red Lion, at 2200 UT Nov 19, deep signal fades. Noted old  
chap sermon prayer on S=8-9 signal level in EUR.

9350 WWCR some English sermon prayer at 2208 UT Nov 19, S=8 weaker than  
WINB next door. On 41 mb heard also WWCR in Spanish on 7465 kHz at  
2230 UT, only fair S=8 signal.

9385 WWRB - much weaker, tiny S=5-6 and deep signal fades. Male voice  
prayer at 2215 UT Nov 19.  
(wb, wwdxc BC-DX TopNews Nov 19)

VANUATU 7260 Radio Vanuatu, on Nov 15 at 0744 UT - Male and female  
announcer in presumed Bislama. Bits and pieces of conversation resembled  
English words; appeared to be a talk involving shipping of packages or

mailing, perhaps to relatives overseas. Good to very good signal. Brief music, many mentions of 'tok tok', and Radio Vanuatu ID and time check at 0750 UT. I noted 3945 kHz in // with a fair signal at 0915 UT.  
(Guy Atkins-WA-USA, DXplorer Nov 18)

7260 R. Vanuatu, Port Vila. Nov 19 at 0704-0716 UT, male in English talks outside "government..police..program"; 25322. 0750-0800 UT Pacific music, male in uncertain language "R. Vanuatu", back music with English Pop and romantic genres. // 3945 kHz, 25322.

3945 R. Vanuatu, Port Vila. Nov 19 at 0800-0809 UT, romantic music, male and female in uncertain language. 25222.  
(Lucio Otavio Bobrowiec-BRA, dxld Nov 19)

VATICAN STATE [and non] 1530 kHz Vatican Radio at Santa Maria di Galeria?

A few days ago the German service of Radio Vatican started to apologize on air for their 1920 UT broadcast no longer being available on 1530 kHz. No further details or reasons have been given, also no one of the Radio Vatican webpages appear to have been updated so far.

The schedule information on the German service pages is inconsistent enough to make me feel that one should not weigh their words too well and not conclude that the other way round 1530 kHz is still on air in the morning. So it should be checked out from better located places if still at all and, if so, at which times 1530 kHz is in use now.

As well-known faces Radio Vatican for more than a decade now heavy pressure to close the Santa Maria di Galeria site. Some people believe that the true rationale behind this are attempts to use the station grounds as valuable building site.

Radio Vatican says that since 2001 they make sure to not exceed the Italian limit of 6 V/m for the fieldstrength in inhabited areas. This requires excluding a few shortwave antennas from further use, but most of all reducing the power of 1530 kHz from 600 to ca. 100 kW. This loss of almost eight decibels sank 1530 kHz here in Central Europe into the mush of co-channel interference. As compensation used Radio Vatican from September 2001 the Roumoules transmitter on 1467 kHz, but left it again after five years because the airtime there was too expensive. Since then terrestrial reception of Radio Vatican in Germany is limited to shortwave.

The 1530 kHz antenna system in detail:  
<<http://www.waniewski.de/MW/Vatikan/index.htm>>

1611 kHz antenna and transmitters for both 1611 (a new Thomson M2W, 50 kW) and 1530 (a Brown Boveri 600 kW, last generation of tube transmitters, should be the same model than Sottens-765 and Pori-963 still use, too):  
<<http://www.mediasuk.org/archive/vaticana.html>>

Many historical photos of Radio Vatican, including the delivery of equipment for Santa Maria di Galeria (and check out also the videos and the museum collection):

<[http://www.oecumene.radiovaticana.org/museo\\_tecnico/it/gal\\_fot.asp](http://www.oecumene.radiovaticana.org/museo_tecnico/it/gal_fot.asp)>  
(Kai Ludwig-D, dxld Nov 7)

VIETNAM 9839.88 Voice of Vietnam, Hanoi, at 1207-1214 UT on Nov 11,

Japanese news and commentary, fair-almost good with weak unidentified station on 9840 kHz and DRM signal on 9835 kHz (AIR?), // 12019.38 kHz fair.

9505 International Radio Serbia. Heard unidentified station in undetermined East European language at 1345 UT, Nov 25 on 9505 kHz, good signal with some fading. At 1402 UT recheck heard news bulletin in English, soon identified as International Radio Serbia. Expanded schedule? {see above}  
(Mike Barraclough-UK, dxld Nov 25)

CHINA 4220 Qinghai People's Broadcasting Station, at 2313-2340 UT fade out Nov 22, mix of Tibetan talk by man and woman with some indigenous vocals and flutes. Poor to fair but rapidly fading at tune out.  
(Rich D'Angelo/FCDX-PA-USA DXplorer Nov 21/23)

CUBA [and non] 6050 The recalcitrant Arnie Coro, RHC frequency manager, so far has kept a transmitter on 6050 kHz blowing away HCJB's only remaining frequency from Ecuador: Nov 26 at 1042 UT check, in Spanish, 6050 kHz is strongest here, // 5040, 6120, 6150 kHz. But off by 1101 UT, audiblizing HCJB again; see ECUADOR. At 1106 UT, equally big signal on 6095 kHz instead, probably same transmitter // 6140, 6150, 6180 kHz. At 1210 UT, RHC is also on 6000 kHz, perhaps waited until WYFR was finished at nominal 1200 UT.

5025 R. Rebelde had been inbooming earlier as usual, but absent at 1212 Nov 26, at least allowing one to detect adjacent carriers from Solomons and Sarawak; back on at 1237 UT check.  
(Glenn Hauser-OK-USA, dxld Nov 26)

[VENEZUELA non] 6140, RNV via CUBA, Nov 26 at 1044 UT in Spanish, instead of 6180 kHz where the 10-11 UT hour had been for years. As I seldom monitor during this hour, don't know when it changed but perhaps Nov 8 when 6140 kHz was reactivated for other RHC broadcasts. 6180 kHz was now carrying RHC // several others; see CUBA. Or it could have been one of their numerous mixups, so further chex needed.

The 11-12 RNV relay is still on 6060 kHz, heard at 1103 UT in English and Spanish, undermodulated. The only way we can get an RNV schedule is by monitoring, as they STILL announced the years-out-of-date schedule on

every broadcast, which I heard concluding again Nov 26 at 1556 UT on 11680 kHz, with the last three entries 11875, 15230 and 17705 kHz, only the last of which is still in use.

Altho I have not bothered to log and report them, I have in the last few weeks run across RNV still on the schedule we have previously compiled so here is the sked now believed to be complete and accurate, one hour each:

10 6140  
11 6060 [partly English]  
12 11705  
15 11680 [except Sundays][partly English]  
19 15290 [may also miss Sundays if Alo, Presidente is on?]  
20 17705  
22 11670  
23 13680 15250 kHz [partly English]  
(Glenn Hauser-OK-USA, dxld Nov 26)

ECUADOR 6050 HCJB Pichincha still exists, despite barrage from super signal de RHC between 01 and 11 UT; see CUBA. Nov 26 at 1042 UT not even a trace of HCJB can be heard under it, RHC off by 1101 UT about to move to 6095 kHz, so HCJB is audiblized: axually with R. Transmundial program, A traves de la Biblia inviting toll-free calls in PR and US to 1-800-880-5339, or e-mail <atb @ transmundial.org>

Now the only problem is the lite het from Malaysia off-frequency to lo side. HCJB gradually weakens as sunrise oncomes. At 1133 UT its own programming, news from La Voz de los Andes, W&M alternating, temp 10 degrees, frequent timechex for 6:33, 6:34, etc.

4918.9 romantic music segues, Nov 26 at 0635 UT, poor signal vs noise level and CODAR; on this frequency it has to be R. Quito, which sporadically reactivates on SW, usually lasting only a few nights before vanishing again. Go get 'em. At 0644 UT it was the OSOB on 60m except for USA and Cuba (or OSAMOB - only South American on band). 0651 UT brief Spanish announcement, but could not copy. If there was an ID at hourtop, I dozed thru it, 0702 UT still music, but at 0709 UT "Radio Quito amplitud modulada". Next check at 1036 UT, still a signal but unreadable on 4918.9 kHz.  
(Glenn Hauser-OK-USA, dxld Nov 26)

ETHIOPIA 6030 Radio Oromiya, 0402-0422 Nov 22, Marti jammer just would not shutdown tonight leaving this poking through the noise with talks in listed Amharic language. Decent signal enabled it to be heard periodically but awful overall.  
(Rich D'Angelo/FCDX-PA-USA DXplorer Nov 21/23)

FRANCE 6165 From Dec 1, KBS Word Radio will be on 6165 kHz to Africa at 2100-2200 UT in French via Issoudun. 3955 kHz to Europe via Skelton remains in // . Between Nov 25 and Nov 30, KBS World Radio will conduct tests on 6165 kHz at 2100 UT.  
(Jean-Michel Aubier-F, dxld Nov 20)

FRANCE Google Earth imagery. Some high resolution place and Street View option on Google Earth, but better to handle in Google Maps.

Yesterday some more images put on Google access.

France Selestat MW 1161(out of service now) and 1278 kHz, 300 kW

GERMANY/USA Addit txions of Brother Stair TOM in English from Nov 18

1300-1400 11680 WER 250 kW 090 deg to SoAS

1300-1400 17765 NAU 250 kW 070 deg to EaAS

(R BULGARIA DX MIX News, Ivo Ivanov, via wwdxc BC-DX TopNews Nov 22)

GERMANY DW English via Saarland on MW 1179 kHz.

Dear Tony, schedule like

<<http://www.sr-online.de/antennesaar/2154/>> Mon-Fri only

<<http://www.sr-online.de/antennesaar/2155/>> Sat only - no DWL relay

<<http://www.sr-online.de/antennesaar/2156/>> Sun only - no DWL relay

shows times in CET Central European Time (GMT +1hr).

17 and 20 GMT/UTC is right - so far in standard/winter time, but on Mon-Fri only, see websites Sat/Sun .... In summer season GMT means start at 1600 and 1900 GMT.

(wb to Tony Rogers-UK BrDXC-UK, wwdxc BC-DX TopNews Nov 20)

Google Earth imagery. Some high resolution place and Street View option on Google Earth, but better to handle in Google Maps.

Yesterday some more images put on Google access.

Germany, only few villages are Street View OPEN now.

former GDR/Soviet East Berlin, Berlin Koepenick MW site, former scrapped MW 611 / 1359 / 1431 kHz 250 kW, entrance from Eastwards.

GUAM/SAIPAN KTWR SW Transmitter Replacement. We referenced this previously but there have been a number of new entries, the latest Nov 15 including this:

"In the meantime, we send out a special thank you to FEBC in Saipan who aired some of our programming on Thursday and Friday so that our listeners would continue to hear their programs."

?? Was this authorized? Details? KFBS tuned up their transmitters to KTWR frequencies and times? This could wreak havoc with accurate country logging and counting.  
(Glenn Hauser-OK-USA, dxld Nov 20)

(Sergei S.-USA, dxld Nov 19)

HONDURAS 3250 Radio Luz y Vida, 0354-0357\* Nov 23, man announcer with Spanish talk prior to closedown ID and announcements followed by orchestra

National Anthem. Fair.  
(Rich D'Angelo/FCDX-PA-USA DXplorer Nov 21/23)

INDIA AIR strike tonight Nov 23/24.  
6055 AIR Delhi Khampur heard with fair signal S=7 here in Europe, 2250 UT  
Nov 22, though lobe was in reverse direction at 132 degr. Played Indian  
film music, stn ID at 2300 UT and followed by English news.

AIR Bangalore played Indian film music on 6180 kHz at 1910 UT Nov 24, but  
has co-channel QRM bei DRM from Romania, the RRI twin from Saftica in  
Italian 1900-1927 UT.

BGL transmissions are the only AIR on SW tonight.  
6180 Ar, 6280 En/Hi, 7550 En/Hi.

7410 and 9445 BGL are OFF tonight,  
also all others OFF at Aligarh and Delhi Khampur 6120, 9470, 9620, 9910,  
11935 kHz. (wb)

On A-DX ng noted 9950 kHz at 1905 UT - AIR in DRM. (Norbert Graf)

... but heard 9950 empty here in Stuttgart, nothing in DRM at  
1925-1930 UT.

Here in EUR heard AIR at 2030 UT only: BGL only on 6280, 7550, and 9425  
kHz, latter towards Far East - reverse signal not very strong. All others  
are OFF air.  
(wb, wwdxc BC-DX TopNews Nov 24)

9425 AIR Bengaluru - National Channel, at 1407 UT on Nov 24. Evidence of  
the ongoing AIR strike was their broadcasting non-stop subcontinent music;  
no regular programming at all (1430 UT no news in English; 1435 UT no  
"Vividha" Wed. program in English). Unable to hear any AIR regionals on  
60mb.

On air observed so far at Nov 25th afternoon  
Persian 1615-1730 9620 (disturbed bad audio quality from Aligarh site)  
Arabic 1730-1945 6180 9620 ( " " " )  
DRM approx. 1730-2230 UT  
English 1745-1945 6280 7410 7550 9445 9950DRM  
2045-2230 6280 7550 9445 9950DRM  
(9575 11620 not heard in EUR)  
(Ron Howard-CA-USA, dxld Nov 24/25)

INDIA DRM on 21285 kHz ham radio band - ANY CLUES ? Ham Radio digital  
mode DRM on 21 MHz.

INDONESIA 4920 RRI Biak (tent), 1158-1201 Nov 22, thanks to a tip from  
Bob Montgomery I arrived just in time to hear Song of the Coconut Islands  
before buried under co-channel Chinese station. Very poor but definitely  
SCI. Any other possibilities?

9525.9 Voice of Indonesia, 1351-1414 Nov 22, woman with local vocals  
accompanied by flute music. A woman announcer ended English service with  
ID followed by a man with news in Indonesian language. Poor.

(Rich D'Angelo/FCDX-PA-USA DXplorer Nov 21/23)

IRAQ/IRAN [Clandestine] 3931v Radio Voice of Kurdistan (presumed), 0307-0320 Nov 22, man talking in presumed Kurdish under heavy jamming and some amateur radio operator splatter. Very poor and only intermittent.

(Rich D'Angelo/FCDX-PA-USA DXplorer Nov 21/23)

KUWAIT Frequency change of Radio Kuwait in Arabic:

1600-2200 NF 6080\*KBD 500 kW non-dir to NE/ME, ex6050.

\*co-ch Belarussian Radio HS in Belarussian + VOA in English.

(R BULGARIA DX MIX News, Ivo Ivanov, via wwdxc BC-DX TopNews Nov 22)

15540 Radio Kuwait in English. Could detect a carrier on 15540 kHz at 1805 November 22nd, very weak audio. Went to Global Tuners, using an Icom PCR-100 15kms South of Vienna heard indeterminate talk in English at 1815 UT, faded up at 1817 UT with "you have been listening to the series..." and then faded down again. At 1826 UT recheck heard music, then at 1830 UT nice fade up and heard time pips, last one elongated and "This is Radio Kuwait, the time is 9.30 p.m. local time".

(Mike Barraclough-UK, dxld Nov 22)

15540 kHz on Nov 22 at 1840 UT, in English. Sequence of pop music.

At 1907 UT YL talks between short music Arabic. At 1916 UT pop Arabic music and 1921 UT pop American music. 25332.

(Jorge Freitas-BRA, dxld Nov 22)

KYRGYZSTAN 4050 Radio Rossii, Bishkek, at 1211 UT on Nov 21, 2010.

Presumed the one, spot-on frequency but threshold audio. No trace of the Guatemalan anywhere around this channel.

(Terry L Krueger-FL-USA, DXplorer Nov 21)

MADAGASCAR 5010 Radio Madagasikara, \*0255-0316 Nov 23, opening rap music followed by a man announcer with opening ID, several announcements before starting music program. Fair to good signal.

(Rich D'Angelo/FCDX-PA-USA DXplorer Nov 21/23)

MADAGASCAR 5010 Radio Madagasikara, 5010USB mode, 1849 UT, SIO 343.

Bei Radio Madagasikara hat man, im Gegensatz zu gestern, das obere Seitenband(USB mode) wiedergefunden. 73, Ingo

Rx: Perseus, Ant: 30m LW / ALA 1530, QTH: Wilhelmshaven

(Ingo Hell-D, A-DX Nov 22)

Re 5010 MDG.

Fix und flexibel, die Siemens Entwickler in Wien damals in den 80zigern, oha - auch in LSB/USB Mode zu senden. Das Ding haben wir mal 1998 beim SWR in Rohrdorf besichtigt.

So viel wie ich erfahren habe, ist das der neuere 50 kW Siemens Sender von Radio Bremen / SFB Berlin ex6190 aus dem Jahr 1984, der 1996 dann von Bremen nach Rohrdorf umgesetzt wurde, und ab Dez. 1996 bis 18. Okt. 2004 auf 7265 im 41mb arbeitete.

Im Oktober 2007 wurde er in Madagascar in Einsatz gebracht, nachdem der SWR den Sender gespendet und mit Hilfe von Radio Nederland in das Entwicklungsland sandte. Der Sender ist nur noch 2 m lang, 2,20 hoch, 60 cm tief.

Er hat intern 2x10 kW Einheiten, ueber Drucktasten sind einzeln 10 oder zusammen 20 kW Leistung - auch PDModulation - abrufbar. In MDG wird dagegen 30 kW genannt ... im Okt 2007.

History:

MADAGASCAR/GERMANY Re: MDG 5010 / 7105 kHz, former 7265 kHz Siemens Sender SWR Rohrdorf Germany. ex former SFB Berlin / Radio Bremen 6190 kHz unit.

Radio Malagasy SW array at Ambohidrano, on Sabotsy-Nahehana village.

"C'est dans son discours lors de l'inauguration du nouvel emetteur d'ondes courtes pour la Radio nationale malgache a Ambohidrano, Sabotsy-Namehana." <<http://tafatafa.eu.org/actualites/actu2.html>>

Desenclavement: Un nouvel emetteur d'ondes courtes pour la RNM, Inauguration samedi a Ambohidrano, Sabotsy-Namehana, d'un nouvel emetteur d'ondes courtes au benefice de la Radio nationale malgache (RNM). Fruit de la cooperation, longue de 30 annees, entre notre station nationale et la Radio Neederland, cet emetteur de 30 kW va renforcer la couverture nationale et internationale de la RNM. (Oct 2007) (wb, wwdxc BC-DX TopNews Nov 22, 2010)

MALI 5995 Radio Mali, 2352-0001\* Nov 21, two men talking in French language with some laughter. Group singing followed by another man announcer mentioning "bon soir beaucoup nacional Bamako" with ID and closedown announcements followed by orchestra National Anthem. Fair. (Rich D'Angelo/FCDX-PA-USA DXplorer Nov 21/23)

NIGER 9704.99 LV du Sahel, Niamey, 2050-2201\*, Nov 21, French talk. Afro-pop music. Euro-pop music. ID at 2059. Phone talk with interviews. Qur'an at approximately 2154. Sign off with 5 seconds of their flute IS followed by choral National Anthem at 2159. Fair signal. Sign off is scheduled for 2200 on Sundays only. All other days sign off is at 2300 UT. (Brian Alexander-PA-USA, DXplorer Nov 22)

9705 La Voix du Sahael, 2047-2115 Nov 21, indigenous vocals followed by a man and woman with French talk over instrumental music. ID at 2100 UT followed by instrumental music. After a vocal selection, the woman began talking phone calls from listeners. Poor to fair reception. (Rich D'Angelo/FCDX-PA-USA DXplorer Nov 21/23)

PNG [New Guinea Territory] 3365 Radio Milne Bay, 1204-1218 Nov 22, woman announcer with news. Island music program began at 1208 UT hosted by a woman announcer. Poor signal.

[New Britain Island] 3385 Radio East New Britain, 1209-1223 Nov 22, woman announcer with news in English. News ended at 1215 UT and music program began. Poor. (Rich D'Angelo/FCDX-PA-USA DXplorer Nov 21/23)

PERU 4824.5 La Voz del la Selva, 1103-1124 Nov 23, man announcer with Spanish talk, ID and TCs hosting morning music program. Poor to fair signal with heavy CODAR QRM marring reception.

4974.8 Radio Pacifico, 0238-0253 Nov 23, romantic Latin vocals hosted by

Sinhala

Zomi-Chin

0130-0200 NF 15255 PUG 250 kW 280 deg to SoEaAS, ex15520.

(R BULGARIA DX MIX News, Ivo Ivanov, via wwdxc BC-DX TopNews Nov 22)

PORTUGAL New Antenna SINES Portugal. Imagery for Sines-POR site was updated in the latest GE imagery update (Nov 16, 2010).

I note a new antenna (2 masts) having been erected between image dates:  
Oct 30, 2006 & Aug 28, 2009.

New antenna located here: 37 56 27.35 N 08 46 09.62 W

Does anyone have any information on the new antenna? Not often SW sites are expanded these days.

(Ian Baxter-AUS, SW TXsite Nov 21)

Re: New Antenna SINES Portugal.

The oldest Antenna at Sines - of 1970 year, see b-w picture- #2\*, coloured #91, and QSL card too, is the log-periodic antenna at 55 degrees, mostly in service when the big revolving Thomcasts are OUT of service and maintenance. Also 55degr log-per antenna in use for RDP relay in 31 and 25 mb.

{\* Copyright, b-w pictures of 1970 by visitor Kock-Finland.}

The new 'easy and cheapest' antenna - Made in Turkey - had been finished already and on service on a visit in Sept 2007, see attached screenshot, and pic #103 {right side foreground, in background old log-per of 1970y} and picture #104.

Azimuth 40 degrees, 2 x 2 dipol rows. Mostly in use for DWL German sce on 3995 and 6075 kHz. 146 AHR(S)2/2/0.5, but also used for DRM 3995 kHz as easy type #101. 101 AHR 1/1/0.5

The new Turkish antenna is a pure dipol-curtain antenna, contains no aperiodic screen reflector array, so the antenna is also open in reverse direction towards Brazil at 220 degr. Used are 8 dipol wires, but only the lower stocked 4 halfwave dipols are fed positively by feederline, and connected as loop to the upper full dipol leg.

The Turkish firm was NOT capable to built up a feeder line from TX house to antenna socket. The installation and commissioning was slowing great many months, due of handicraft work to built a feeder line manually, antenna type copied from a VTC/BBC TX site installation.  
(wb, wwdxc BC-DX TopNews Nov 21)

History: from Sept 2007:

1 x very new curtain array at 40 degrees. Recently erected, Made in Turkey, not from Thomcast. Not visible on Google Earth imagery yet.  
(wb, wwdxc BC-DX TopNews Sept 28, 2007)

PORTUGAL 1035 Radio Clube / Star FM.

Since yesterday, Radio Clube Portugues is over. Now the station is called Star FM. On 1035 kHz, instead of a radio focused on news and comments, one can hear an oldies radio. Very frequent IDs saying "Star FM, o regresso dos classicos".

(Fernando de Sousa Ribeiro-POR, hcdx Nov 22)

Thanks Fernando for your help. I already suspected it was Radio Clube, but I didn't manage to hear any ID. Anyway signal is much weaker than usual. The dominant station on this channel here is RAI now and in the past Radio Clube was clearly dominant. Perhaps they are testing with a lower power... (Artur Fernandez Llorella-ESP, hcdx Nov 22)

PORTUGAL 1035 Star FM, Belmonte (Benavente) ... a new station? No, just another MCR [stn owner] fantasy on the air; this happens to be the new ID of a new (...) stn that, following a mid Juli'10 announcement by MCR, would "soon" replace the former Radio Club Portugues. I first heard them using this ID this monday, the 22nd. As far as I can hear, the format was kept pretty much the same, i.e. an oldies stn, but they reported to me a week ago, that more talks were planned for the slightly new format under this new name. Now, why bother to change, and why on earth a silly foreign name?

Stn names using the format "radio club X" are already silly enough as they may suggest there is actually a club of some sort behind it! (Carlos Goncalves-POR, wwdxc BC-DX TopNews Nov 24)

RUSSIA Schedule of "Club DX" on the Voice of Russia. Now the program on air under following schedule:

On Sundays and Tuesdays at 2247 UT 612, 630, 648, 693, 999, 1026, 1143, 1170, 1314, 1323, and 1431 kHz; on Thursdays at 1946 UT 648, 801, 1026, 1143, 1170, 1323, 1413, 1494, 1503, 5940, 6155, 7230, 7305, and 7325 kHz. (Alexander Djadichev-RUS, open\_dx, MIDXB Nov 23)

RUSSIA Voice of Russia Moscow. Since November, 15th, 2010 the following transmissions in the winter schedule deleted?:

Hindi at 1300-1400 and 1500-1600, Urdu at 1400-1500 and English at 1600-1700 - 11630 kHz to Asia.

Arabic at 1700-2000 7400 kHz to Africa and the countries in Near and Middle East.

Spanish at 2100-2200 and Portuguese at 2200-2300 5920 kHz to Europe. Portuguese at 0000-0100 and Spanish at 0100-0600 6135 kHz to South America.

English at 0800-1100, Russian at 0600-0800 and 1100-1200 17650 kHz to Australia and South East Asia.

Russian at 1200-1600 12025 kHz, 1700-2200 12035 kHz to Central Asia. ( <www.dxing.ru> via RUSdx Nov 21)

The WRN - World Radio Network in Russian. Programs of the World radio network can be heard on MW Moscow - 738 kHz. Licence capacity - 5 kW. The diagramme orientation of the aerial is circular. The transmitter is located in Kurkino.

To Central and the Eastern Europe, the European and Central part of Russia.

The schedule of the World radio network since October, 31st, 2010.

Log of RUS/CIS/MNG log. (automatic PC translation Russian-English).  
164 - the Mongolian radio, frequency not in a grid. The information is  
updated 15.11.10.

171 - the general situation: after switching-off of the Novosibirsk tx at 2000, it becomes audible the Krasnodar tx of "the Voice of Russia" with programs "Caucasus" and "the FREE Chechen Republic" and Morocco on a background. (08.11.10)

171 - Russia, Novosibirsk (6 hours), Radio of Russia from Moscow with regional inclusions from Tomsk. The strongest and pure signal in Tomsk.

Switches on and over the ID announcement goes from 0000 till at 2000 the transmitter is switched off. At once, joins on warming up about at 2323. 08.11.10.

171 - Russia, Krasnodar, "the Voice of Russia". In a break of Novosibirsk tx. The tx on air: 2000-2100 "Caucasus", 2100-2105 news "Voice of Russia", 2105-2200 "the FREE Chechen Republic" in Chechen and Russian, 2200-2400 "Caucasus". 08.11.10.

171 - Morocco. It is audible on a background of "the Voice of Russia" in a break of Novosibirsk tx. Distinctive features - the Arabian speech and frequent use of words "Morocco" and "Moroccan". 08.11.10.

209 - the Mongolian radio, frequency not in a grid. 15.11.10.

227 - the Mongolian radio, frequency not in a grid. 15.11.10.

531 - India radio. In the morning the annmt begins at 0025. At 0020 tone, at 0023 - signal joins, at 0025 is passed to "Vanda Maataram". Barrier - supposedly from the Voice of Islamic Republic Iran, in // with 540 kHz. 15.11.10.

558 - China, National radio Sintszjana on Uigur. 15.11.10.

576 - Russia, "Beacon" through Novosibirsk. A strong signal. 15.11.10.

594 - Russia, Krasnoyarsk (7 hours), "the Beacon from Krasnoyarsk". A signal on 3, but incidentally strikes root even in the afternoon. Relaying Moscow "Beacon" and Krasnoyarsk inclusions. On weekdays at 0105-0200 - the morning program "Sandwich". Within day news at 0250-0300, advertising are noted at 0350-0353, news at 0850-0900. Phone 243-63-00 and the address appears as <mayak @ kgtrk.ru> it is possible to write also on <referent @ kgtrk.ru> 02.11.10.

603 - India radio. Signal it is noted at 0024. 01.11.10.

612 - Russia, "Beacon". Strikes root in the evening and in the morning. 15.11.10.

639 - Russia, Omsk, relaying of Radio of Russia and regional inclusions "Radio of Russia Omsk". In the morning strikes root slightly, Omsk transfers are noted at 0110-0200 and 0210-0300. After that passage vanishes. 10.11.10.

693 - the general situation: better is Bangladesh, much in the evening is audible rather poorly - Radio of Russia. After switching-off of Radio Bangladesh at 1730 Radio of Russia is audible better, but with a barrier from the Chinese station. Radio of Russia is supposedly disconnected at 2000 then the Chinese station remains. At 2053 join signal from Tokyo, the announcement begins at 2100. Sometimes a signal pure enough, but, as a whole, between 21 and 24 dominating signals are not present. 09.11.10.

693 - Bangladesh, Radio Bangladesh. In the evening reception good, at 1730

- the termination announcements. Identification - "Bangladesh ...".

09.11.10.

693 - Russia, Radio of Russia. It is audible on a background of Radio Bangladesh, after in the evening which terminations of an announcement at 1730 it is audible with a barrier from the Chinese station. Supposedly at 2000 the transmitter is disconnected. 09.11.10.

693 - China? Strikes root between 1730, when Radio Bangladesh is disconnected and about 2000, when on frequency there are no dominating signals. 09.11.10.

738 - Russia, Chelyabinsk, relaying of Radio of Russia and regional inclusions

Radio "Southern Urals Mountains" at 0110-0200, 0210-0300. 09.11.10.

774 - Japan-2. Badly struck root between 1334 and 1422. At 1415 the English lessons of language were passed. 31.10.10.

810 - the general situation. In the evening on frequency the mash strikes root from Krasnoyarsk "Authoritative radio" and two "Beacons" with a difference.

On a background arises another radio. At night a signal of "Authoritative radio" weakens, and the exact times of switching-off of the transmitter is not established. At that time is audible only two "Beacons", and, force of their signals changes on to the attitude the friend at the friend between 18 and 20 o'clock. At 2000 one of them is disconnected, then start to make the way slightly the Chinese station and Radio of Macedonia. At 2200 second "Beacon" is disconnected, and Macedonia it becomes audible distinctly enough. An announcement "Authoritative Radio" renews at 2300, the transmitter joins about at 2243, signal very strong. 12.11.10.

810 - Russia, Krasnoyarsk, "Authoritative radio" (former "Autoradio"). In the evening strikes root with barriers from two "Beacons" and unknown radio stn. At night is having rummaged in an announcement, but an exact times of switching-off of the transmitter to establish was not possible.

Last time the signal has noted been at 1816, after 1900 it is precise not. The announcement renews at 2300, inclusion of the transmitter has noted been in 2243 and 2259, a signal strong, unlike evening. 12.11.10.

810 - Russia, "Beacon". The transmitter at ?, it is at night-time audible with lateness in Half-seconds in relation to a signal of "Beacon" from?.

About till 1800 this signal is weaker, between 18 and 20 it becomes stronger than another and at 2000 it is disconnected. 12.11.10.

810 - Russia, "Beacon". The transmitter at ?, it is at night-time audible with an advancing in Half-seconds in relation to a signal of "Beacon" from ?. About till 1800 this signal is stronger, between 18 and 20 it becomes weaker than another, at 2000 becomes the only thing after switching-off of other transmitter and at 2200 is disconnected. 12.11.10.

810 - Macedonia, Radio of Macedonia. It becomes clearly audible after switching-off of "Beacon" from at 2200. About at this time it is possible to hear identification as "Radio Macedonia". 12.11.10.

810 - India radio. Identification was audible at 1728 on a background of "Authoritative radio" and two "Beacons". 03.11.10.

810 - China, not identified station. The Chinese speech can be heard in mash between 20 and 21 o'clock. 12.11.10.

846 - India, Ahmadabad radio. The beginning of an announcement - at 0020.

Reception regular. 04.11.10.

909 - China, National radio Sintszjana in Uigur language. 15.11.10.

918 - India radio. In the morning the announcement begins at 0025. At 0020 tone, at 0023 - signal joins, at 0025 is passed to "Vanda Maataram". 09.11.10.

936 - China, National radio Sintszjana on Kazakh. 15.11.10.

954 - India radio. In the morning the announcement begins at 0025. 15.11.10.

972 - Tajikistan, "the Voice of America". The station is noted in the mornings on Urdu, judging on databases. 15.11.10.

999 - China, National radio Sintszjana on Chinese. 31.10.10.

1026 - Russia, "the Voice of Russia". Strikes root very well in the mornings and to evenings. 15.11.10.

1035 - China Struck root on a regular basis in an interval between 1600 and 0020, mixed up with "Family Radio" from Tartu. It was not possible to establish, whether was having rummaged in an announcement. 04.11.10.

1035 - Estonia, "Family Radio" from Tartu. Struck root on a regular basis in interval 1700-0020 with a barrier from ????. At 1700 have sounded signal ... radio, at 1900 - the announcement "In Estonia - 21 hour", and the schedule of transfers, at 0000 - "News of Voronezh".

RWANDA Frequency change of Deutsche welle in English from Nov.17:

2100-2200 NF 12070 KIG 250 kW 295 deg to WeAF, ex11865{??}.

(R BULGARIA DX MIX News, Ivo Ivanov, via wwdxc BC-DX TopNews Nov 22)

DW English heard tonight on 7280, 9545, 11865, 13780 and New 12070 - so it seems 12070 kHz is in addition to but has not replaced 11865 kHz ?

I see that all 5 freqs are listed in HFCC.

(Dave Kenny-UK BrDXC-UK Nov 24)

SLOVAK REP 6090 IRRS - Rimavska Sobota, 1924-2000\* Nov 22, Tony Alamo with a female accomplice with religious sermonizing and answering listeners questions with much political talk mixed with his religion. IRRS ID and contact information for a QSL at end of transmission: "This is I - double R - S Shortwave in Milano, signing off." Fair.

(Rich D'Angelo/FCDX-PA-USA DXplorer Nov 21/23) {ex7290}

SOUTH AFRICA 6225 RTE Radio One via Meyerton, 2016-2030\* Nov 22, two men with discussion talking about security forces. Program ended at 2020 UT followed by filler instrumental music. ID at 2028 UT "RTE Radio One part of the World Radio Network", followed by a woman with news until carrier was terminated. Poor to fair.

(Rich D'Angelo/FCDX-PA-USA DXplorer Nov 21/23)  
6225 is sensitive maritime radio area (wb)

(wb, wwdxc BC-DX TopNews Nov 20)

TAIWAN Sound of Hope Radio Network sent me a printed QSL card (complete QSL card with data in Chinese and English) after 17 days for my reception report in Chinese with US\$2.00.

Recent official shortwave schedules for Chinese mainland are:

2200-2300 7105 9635 6280 (Fri, Sat only)

2200-2230 7515

2230-2300 7585

2300-0000 7310 6280 (Fri, Sat only)

2300-2330 7540

2330-2400 7520

0900-1100 9540 11760 (Sat, Sun, only)

1100-1300 7280

1200-1230 11520

1230-1300 9355

1300-1400 9955

1400-1600 9450

1430-1500 7540

1500-1530 7465

1530-1600 7475

1500-1530 7585

1500-1700 11765

Frequencies are variable day by day

Address for QSL: No. 6-4, 84 Sec., Kuotai Town, North District, Taichung City, Taiwan 404.

TAJKISTAN/PALAU Radio Free Sarawak in Bahasa Malay-new st'n from Nov.15:

2230-2330 7590 DB 100 kW 117 deg to SoEaAS. Good reception here in BUL

1000-1100 15680 HBN 100 kW 270 deg to SoEaAS. Poor reception here in BUL

(R BULGARIA DX MIX News, Ivo Ivanov, via wwdxc BC-DX TopNews Nov 22)

Yesterday Nov 24 I put my receiver on for the first time in months and

heard Radio Free Sarawak {via HBN-Palau} at 1000 UT on 15680 kHz for the first time. Not good, but audible

(Bjoern Fransson-SWE, wwdxc BC-DX TopNews Nov 25)

[PALAU to SARAWAK-MLA] {see also under Tajikistan} 7590, first time I am looking for R. Free Sarawak, scheduled 2230-2330 UT from secret site, Nov 21 at 2255 UT, only a weak signal with flutter, but seems like dead air and/or then undermodulated. Did not get any better by 2305 UT. Presumed this, as nothing else yet scheduled in this frequency-hour. Could it be via Angel 4, PALAU, already known to be site for the other broadcast at 1000-1100 UT on 15680 kHz, since Alan Pennington soon heard that // on the Angel 4 stream? Now I check WHR online schedules, to find:

Angel 4:

1000-1100 Su,Mo,Tu,We,Th,Fr,Sa Radio Percuma 15680 kHz

Percuma? That's a new name for it. What does Percuma mean? I Google translate it first in Indonesian, and get "useless" then in Malay and get "free" so much for the two languages being almost identical! This must amuse Indonesians. Maybe the full ID in Malay is "Radio Percuma Sarawak" or "Radio Sarawak Percuma" the c is probably pronounced like tj or ch as in Aceh; altho they say they are mainly using the local language Iban.

But schedule for the same transmitter reminds us it is occupied by R.

Australia during this hour, on 13590 kHz, which I also heard today:

2200-0000 Su,Mo,Tu,We,Th,Fr,Sa ABC Radio 13590 kHz

And Angel 3 is otherwise accounted for with WHR programming on 9930 kHz.

Steve Lare points out that Aoki already shows 7590 as via TJK, but also for 15680 kHz, the latter certainly not correct. Considering the poor reception here, Tajikistan could certainly be right for 7590 kHz, but who knows for sure?

(Glenn Hauser-OK-USA, Nov 21)

I checked that thrice, but got never a signal into Germany post. A very tiny carrier heard like St. Helena level ....

Maybe the azimuth from HBN Palau[?] is much southwards to Indonesia, and doesn't make it into Europe.

Compared to all other outlets during 24hrs listening, from Tinian, Palau, Saipan, Philippines, Japan, Taiwan, Australia, New Zealand, both Koreas, much of all Chinese SWs, Russian Siberia and Far east, Tajikistan, Mongolia, Kazakhstan etc.

- all these are much, much stronger than these tiny signals on 7590 and 15680 kHz.

(wb, wwdxc BC-DX TopNews Nov 20/21/22)

Listened briefly at 2230 UT, and much the same as yesterday. Too weak to make anything out. Guess I don't have the antenna farm as Don Moman in Alberta has!

(Walt Salmaniw-BC-CAN, DXplorer Nov 22)

7590 Radio Free Sarawak, 2234-2330\* Nov 21, Man announcer in Bahasa Malaysia interviewing another man from remote location with phone connection with numerous mentions of "Malaysia". Vocal selection followed by discussion by two men in studio. Several nice IDs, mention of "Malaysia

Today". A few musical selections but program mainly consisted of talks about Malaysia. ID and "bye-bye" at sign off with light instrumental music until carrier cut. Poor to fair.

(Rich D'Angelo/FCDX-PA-USA DXplorer Nov 21/23)

[SARAWAK non] 7590 Nov 22 at 2230 I am standing by for R. Free Sarawak (Percuma), but there is only an extremely weak signal, and it gets no better past 2300 or at 2325 UT, hardly any modulation detectable, presumably Tajikistan site. The other airing, 1000-1100 UT on 15680 kHz via Palau is a bit inconvenient for those who sleep.

(Glenn Hauser-OK-USA, dxld Nov 22/23)

{TAJIKISTAN tent.} 7590 Last European night Nov 22/23 the propagation path was wide open from East Asia / PAC. Heard all Chinese/Koreans here in Europe etc.

Heard also the R. Free Sarawak 7590 kHz for the first time on a level above threshold. At 2245 UT Nov 22, S=9+10dB, talking in undoubtedly Malay or similar vernac. Most probably via Dushanbe relay, as widely reported.

(wb, wwdxc BC-DX TopNews Nov 22/23)

7590 tonight Nov 23 noted similar signal strength of R. Free Sarawak broadcast via Dushanbe, deep fade of S=6 to S=9+10dB level at peak, here in Germany. 2233 UT Nov 23.

(wb, wwdxc BC-DX TopNews Nov 23)

UNIDENTIFIED 6300 UNID, 2219-2224\* Nov 22, man announcer with heavily accent English talk just above the Algerian/Saharan clandestine station with carrier suddenly cut. Fair.

(Rich D'Angelo/FCDX-PA-USA DXplorer Nov 22)

punching error of R Bulgaria 6200 kHz.

Update correction. - UNID 11715 {and 11925 too} in 8-9 UT slot noted often an Unidentified Chinese talking station, S=6-7 fair signal here in EUR.

Thanks to Noel Green and Mauno Ritola, its the usual intermodulation of 70 kHz on two CRI Cerrik Albania outlets on 11785CRI En and 11855CRI Mandarin kHz in our European morning 7-9 UT. Noted often in past half decade. (wb)

UNKNOWN SITE 5936.22NF (Clandestine). Radio Republica relay. At 0038 UT Nov 15, 2010. Per David Crawford discovery, heard here as well, // jammed 5954.12 kHz. Does not appear to be a spur from the latter, as it's never generated one before and nothing on the opposite side detected. Not jammed, but very weak. Soon to be jammed now that word is out. Bye-bye.

(Terry L Krueger-FL-USA, DXplorer Nov 21)

UNKNOWN SITE, NO DETAILS GIVEN FROM WRN organization. As last year there will be Tamil convention specials on November 26 and 27th.

1030-1400 on 17880

1400-1500 on 6230

1500-1630 on 13860 tentat. DHA

It will be a relay of a European Tamil TV station's audio from the Hot Bird Satellite <<http://www.tamilarkuralradio.com/>>

(WRN, via dxld Nov 25)

U.K./ASCENSION ISL Expansion of VTC/BAB sites.

Despite what you might think there are improvements made even now.

At BAB Woofferton in the last five years we have two new multi-freq antennas erected covering five different bearings each and covering up to five freq bands each replacing two single band antennas on small slewable bearings. There have been four senders removed and replaced which are AM/AMC and DRM capable and thus still keeping 10 on site.

Many more satellite dishes have been installed and as such many more feeds available. The off-site sending of feeds has risen.

BAB Skelton has had one tx replaced by a AM AMC and DRM unit.

BAB Ascension has had four txs replaced by new.

So we are not static or reducing!

(Dave Porter-UK, SW TXsite Nov 22)

U.K./POLAND 7265 strange Polish Radio outlet via Rampisham 500 kW powerhouse. 7265 kHz on Nov 25th at 1906 UT heard an strange echo program of PRWarsaw in Hebrew. The spoken part was echoed by two different Hebrew text readers, the followed music singer was in the clear again though.

<RMP\_7265\_PRW\_Hebrew\_25Nov1906.MP3>

(wb, wwdxc BC-DX TopNews Nov 25)

USA [GERMANY/SAO TOME/SRI LANKA/VATICAN STATE]

"VoA Darfur"? Bitte um Hilfe! Laeuft technisch unter Radio Sawa, "SUDAN" program.

Hallo Nils,

Ist schon schwierig in den vielen kleinen Unter-Abteilungen der US IBB durchzuschauen. Das zieht sich ja auch ueber zig Seiten des WRTH hin.

Frueher gab es VOA, RFE, und RL ... das war's dann.

Dann kamen die vielen Ableger wie R Marti und RFA etc. etc. etc. dazu.

Ich nehme an, das arabische Dafur Programm gehoert nicht zu VOA, dort auf der Website gibt es kein Arabisch Programm. Das wurde aus-gesourct? nach

<<http://www.radiosawa.com/>>

<<http://www.radiosawa.com/english.aspx>>

Radio Sawa in Arabic on various FM stations in the Muslim World, and also via MW 990 kHz at Cyprus relay.

Sawa's Arabic special service called "Afia Darfur Sudanese"

0300-0330 5885SMG 7275SAO 9845IRA  
1800-1830 9380IRA 9805WER 11615SMG  
1900-1930 9780SMG 9805SAO 9815WER

Die Nutzung der Sendeanlage beim Vatikanstaat gibt dem Ganzen eines pikante Note.

<[http://africa.ibbmonitor.com/rms\\_data/Scripts/2010\\_11\\_24/CAIR/RMS\\_SCRIPT\\_CAIR\\_101124\\_233301.TXT](http://africa.ibbmonitor.com/rms_data/Scripts/2010_11_24/CAIR/RMS_SCRIPT_CAIR_101124_233301.TXT)>

(wb, wwdxc BC-DX TopNews Nov 24)

Das sind sie dann aber fast schon alle. Dazu kommt dann nur noch Middle East Broadcasting Networks mit den Produkten Alhurra, Radio Sawa und eben auch Afia Darfur. Ebenso ist z.B. auch Radio Farda kein separater Laden, sondern ein Programm von RFE/RL.

Diese fuenf Buden (Voice of America in einem auch von anderen Regierungsbehoerden genutzten Gebaeude in Washington, Radio Free Asia ein paar Strassen weiter, MBN draussen im Industriegebiet Springfield bei Boeing, Radio/TV Marti in Miami und RFE/RL in Prag) reichen natuerlich aus, um von reinem Wahnsinn zu sprechen. Aber das Politgeschacher ist eben wichtiger als effiziente Programmarbeit. Dazu kommen dann noch die ganzen Neocon-Pappnasen, die immer wieder danach rufen, doch endlich so richtig schoen Propaganda zu machen ...

Ich nehme an, das arabische Dafur Programm gehoert nicht zu VOA, dort auf der Website gibt es kein Arabisch Programm. Das wurde aus-gesourct?

Es war eher eine erzwungene Einstellung des arabischen VOA-Programms, nachdem MBN neu aufgemacht wurde.

Nicht ausgebootet werden konnte die VOA dann allerdings im Falle von Persisch. Deren VOA PNN schlaegt bei der Zuschauerakzeptanz sogar die BBC. (Wohlgemerkt: Die Rede ist jetzt von der Glotze.)

<<http://www.radiosawa.com/english.aspx>>

Und auch <<http://www.bbg.gov/broadcasters/sawa-alhurra/>>

Wie gesagt: Afia Darfur ist MBN, aber nicht Radio Sawa, das ist dann ein anderes MBN-Produkt.

Der kritische Blick von aussen:

<<http://www.propublica.org/article/critics-say-u.s.-radio-program-for-darfur-goes-soft-on-sudan-090202>>

Die Nutzung der Sendeanlage beim Vatikan gibt dem Ganzen eines pikante Note.

Zumal Radio Vatikan das gegen Cash zu senden scheint, oder gibt es irgendwo Uebertragungen von deren Programmen ueber IBB-Sender?  
(Kai Ludwig-D, A-DX Nov 25)

Das scheint die Homepage zu sein:  
<<http://www.afiadarfur.com>>

Ich habe mir mal die Whois-Daten fuer die Domain angeschaut (ist fuer administrativen und technischen Kontakt identisch):

Nguyen, Minh <mnguyen @ radiosawa.com>  
MBN  
7600 Boston Blvd  
Suite D  
Springfield, Virginia 22153  
United States  
(703) 688-5010

Das wuerde nahe legen, dass es sich um einen Ableger von Radio Sawa handelt. In der Liste der zum BBG gehoerenden Stationen wird Afia Darfur jedenfalls nicht gesondert ausgewiesen:  
<<http://www.bbg.gov/broadcasters>>

USA Radio Free Europe/Radio Liberty. RFE Broadcasts From Hungarian Revolution Digitized.  
By A. Ross Johnson & Manfred Hanspeter November 14, 2010

The RFE/RL Broadcast Collection at Stanford's Hoover Institution contains some 80000 studio tape reels of RFE and Radio Liberty (RL) broadcasts. Now, thanks to the hard work of a dedicated team of RFE affiliates, it also contains rare log tapes (low-quality recordings of short-wave transmitter output) for the crucial three weeks of the Hungarian Revolution (Oct 19 - Nov 13, 1956).

During this era, log tapes were routinely reused (no others have been preserved), but thanks to historical accident and modern technology, the complete recordings of every RFE broadcast hour from that momentous period are now available in digitized form at the Hoover Archives at Stanford University and the Hungarian National Szechenyi Library. While the transcripts of many of these programs aired during those three weeks of 1956 have long been available, the recovered 1956 log tapes provide the only complete audio record of RFE's broadcasts at that time.

#### Accidental Preservation.

During the Cold War, RFE and RL log tapes were retained for only a few months in accordance with German, Portuguese, and Spanish transmitter licensing requirements. However, after public controversy developed around RFE's 1956 Hungarian broadcasts, the West German Foreign Office borrowed the set of log recordings made at the RFE transmitter station at Biblis in order to conduct a review (which was generally positive). It quickly returned the log tapes to RFE, but, fearing more controversy in the media and labor courts, reclaimed them again in the spring of 1957. Seeking secure storage, the Foreign Office deposited the tapes in the Federal German Archives in Koblenz - where they remained, forgotten until their rediscovery in the late 90s. By this point, the ravages of time and outdated technology had made them all but unplayable.

#### Archaic Sound Recovered.

In 2000, after Hungarian Radio arranged for the copying of the Hungarian broadcasts, RFE/RL and the Federal German Archives decided to recover in digital form all RFE language broadcasts during the period of the Revolution. Manfred Hanspeter of RFE/RL Technical Services and RFE/RL

archive consultants Leszek Gawlikowski and Laszlo Rajki oversaw the project, which was epic in scope. The 1956 log tapes alone contained a total of over 6500 broadcast hours, recorded on 60 fourteen-track paper-backed tapes.

Today, much of the restorative work could be done on laptop, but ten years ago the project required more creative solutions. Using two computers, a Network Attached Storage (NAS) unit, a low noise amplifier, and a modified Telefunken tape machine (which reduced the tape speed), former RFE/RL Hungarian Service producer Robert Trunk was able to meticulously transfer the recordings on the tape to MP3 format. In 2001, Trunk spent several months adjusting the audio for each of the 727 tape tracks, transferring the output to the NAS, editing the audio to enhance sound quality, and finally depositing the content onto 60 CDs.

Preserved by historical accident and retrieved with modern technology, this unique record of a key period of RFE broadcast history is now available for research.

## WRTH 2011

WRTH team proud to present the 65th edition of the bestselling directory of global broadcasting on LW, MW, SW and FM.

The Features section this year has the history of Radio St Helena, reviews of the latest equipment, an intriguing look back at some classic 80s & 90s receivers, a visit to AFN in the Florida Keys and much more, including our regular Digital Update.

The remaining pages are, as usual, full of information on:

- . National and International broadcasts and broadcasters
- . Clandestine and other target broadcasters
- . MW and SW frequency listings
- . Terrestrial TV by country
  
- . Extensive Reference section

### What is WRTH?

World Radio TV Handbook or WRTH is now in its 65th year. It is the most accurate and complete guide to the world of radio on LW, MW, SW and FM, available in any form.

It is divided into the following sections

Features - This section is in full colour and contains reviews of receivers and ancillary equipment, articles on topical issues such as digital radio, interviews with broadcasters, reception conditions, colour maps showing the location of SW transmitters, and other topics of interest to Listeners and DXers.

National Radio - This section covers the world's domestic radio services. The listings are by country and include all stations broadcasting on LW, MW and SW, and most stations broadcasting on FM, together with contact details.

International Radio - Full details of all broadcasters transmitting internationally are given in this section and are listed by country. The schedules shown are the 'B' or 'winter' SW frequencies as supplied by the broadcasters and confirmed by monitoring, together with any LW or MW frequencies used. It also contains a sub-section showing Clandestine and Other Target Broadcasters arranged by target country. The 'A' or 'summer' schedules, along with updates to broadcaster details, are available as a pdf download from this website in May each year.

Frequency Lists - This section contains MW frequency lists grouped by frequency within regions, lists of all international and domestic SW broadcasts in frequency order, and international SW broadcasts in English, French, German, Portuguese and Spanish, and DRM transmissions shown by UTC.

Television - The TV section has details of the main terrestrial national broadcasters, large regional networks, and some local stations, arranged alphabetically by country.

Reference - This section has tables and listings of: International and Domestic Transmitter sites, Standard Time and Frequency Transmissions, DX Club information, International Organisations, and other essential information.

To see what other people think of WRTH please read the comments made about WRTH 2010, or go right ahead and order a copy of WRTH 2011.

Also click the following link for order.

#####

ALBANIA Albania in your dxld electronic bulletin. Dear Wolfy in Stuttgart and Glenn in Oklahoma, thank you for your regular world wide DXLD {and WWDXC TopNews, wb.} electronic bulletins.

I expected in your last bulletins to be included the two emails below, but unfortunately no, they weren't.

As a matter of fact, this is a special case to get reception report and such high level of interest from Venice (well-known Venezia from the past) for Radio Tirana International. Could you please, include the two emails below in your next bulletins?

All the best from lovely wet Tirana,

Drita Cico  
ARTV-Albanian Radiotelevision  
Head of Radio Tirana Monitoring since 1981  
& Radio Tirana Short Wave Frequency Manager from 2005  
RADIO TIRANA (Nov 29)

Re: Albania in your DXLD electronic bulletin

- > RT is modulating in low levels 10-40%, which our
- > Monitoring service technically consider as interruption.

Hello dear Drita and Glenn, okay, now I've got the approbation to publish these mails, I'll do so in next bc-dx TopNews, doesn't matter.

My train of thoughts was, that this matter should be discussed first with your technical department, because these negative different audio and modulation levels should be solved first on the broadcasting house control center and also should be improved to stable feeder ways from Tirana via Fllake to Shijak audio port.

And as we suggested first, and also asked via Christian Milling - German Radio 700 Euskirchen group -, your two transmitters need urgently an OPTIMOD upstream processor, whether used units from a decommissioned site like Juelich etc.

vy73 de Wolfy (Nov 29)

Dear Mr Dario Gabrielli in Venice (Venezia), Italy,  
Cc: CQ Monza - RAI, Vatican Radio Monitoring

We are glad to hear from you for the first time. Thank you for your reception report from Venice.

We do regret that you are getting difficulties to listen to Radio Tirana. Our Monitoring Center is lately informed that Central Apparatus of Radio Tirana's studios is modulating in low levels 10-40%, which our Monitoring service technically consider as interruption. This low modulation is manually applied to avoid the blocking of radio/relays between studios and transmitting sites in Shijak and Fllaka - studio site has said.

This is a bad situation, we are very sorry for that, and we hope to be improved soon. I informed my staff to ask at the studio site for any casual improvement on modulation level. Please, inform us from tonight if possible.

Your reception reports would be highly appreciated.  
Ciao and all the best from lovely raining Tirana,

Drita Cico  
RTSH-Albanian Radio television  
Head of Radio Tirana Monitoring since 1981  
& HF Manager from 2005  
RADIO TIRANA (Nov 24)

6000 kHz. Programma riservato alle lettere e problema ricezione trs in Italiano.

Ciao a tutti, Mi chiamo Dario Gabrielli e sono un vostro ascoltatore delle vostre trasmissioni in lingua italiana da parecchi anni.

Con la presente vorrei innanzitutto informarvi che da quando siete passati agli orari del periodo invernale non riesco più ad ascoltarvi con il mio ricevitore Sangean ATS 909 <[www.sangean.nl](http://www.sangean.nl)> con antenna telescopica ed una filare posta all'esterno dell'abitazione per una lunghezza di sette metri circa.

IO sto provando ad ascoltarvi ogni sera alle ore:  
1800-1830 ora UTC sui 6000 kHz  
2000-2030 ora UTC sui 6000 kHz  
pero il segnale non arriva.

Forse sto sbagliando orari o frequenza visto che, non avendo avuto vostre notizie sugli attuali orari mi sto aiutando con delle riviste specializzate dell' anno scorso.

Infatti, a mio modo di vedere, certe emittenti internazionali (tra cui voi) dovrebbero inviare a tutti i loro ascoltatori in anticipo i loro cambiamenti di frequenze e se fosse possibile un foglietto con scritto tutti i programmi giornalieri che vengono trasmessi e se necessario inviare via eMail o via posta tradizionale ogni cambiamento che fate durante il periodo annuale.

Con la presente vorrei chiedervi se potete informarmi anche quando trasmettete lo spazio dedicato alla posta degli ascoltatori e se e possibile inviare i rapporti di ascolto via eMail e naturalmente il vostro indirizzo di posta elettronica esatta

Aspettando vostre notizie, vi saluto

GABRIELLI Dario

ALBANIA Radio Tirana Hoerer Klub: Neues auf der Website.  
Der Radio Tirana Hoerer Klub hat Neuigkeiten auf seiner Website:  
<<http://www.agdx.de/rthk/index.html>>  
Der Mitgliederrundbrief Nr. 43 ist verfuegbar.  
Das aktualisierte Radio Tirana Faltblatt ist verfuegbar.  
(Dr. Anton J. Kuchelmeister-D, RTHK Munich Dec 3)

ARGENTINA The Argentine government is prohibiting the use of any equipment containing injurious Polychlorinated Biphenyl (PCB) from January 1 2011. All the shortwave transmitters of RAE, installed many years ago and which use PCB contained parts, will not allowed to be on air after January 1 unless they are replaced or repaired. The Argentine government has not prepared any budget for this. Their shortwave transmitter is probably a Harris SW-100 at General Pacheco installed in 1977.  
(Takahito Akabayashi-JPN, dxld and direct)

RAE signal quality has been poor to nonexistent for years now. Wasn't always that way back in the 70's I recall decent reception of their late night English broadcasts on 9690. The last time I heard RAE approaching a reasonably listenable signal here was 7 or 8 years ago.

Now it is just barely fluttering above the noise floor, or completely inaudible. RAE needs to get serious about a shortwave operation, or pull the plug.  
(Steve Luce-TX-USA, ibid. wdx-UK)

(via Alokesh Gupta-IND, dxld Nov 24)

CHAD [and non] 6165 Saturday Nov 20 at 2255 UT, fair signal with hilifish music, 2300 French announcements but could not make out an ID or sign-off, yet 2301 right into military band with anthem to 2302\* UT. RNT presumably still signs off a semihour earlier on days other than Saturday. And Jean-Michel Aubier reports it's about to get whammed by KBS World Radio via France on 6165 at 2100-2200 UT starting Dec 1, in French to Africa!

What are they thinking? Poor Chad is not in HFCC, so ignore it! And why should Chad bother, with only one active SW transmitter? Will it be driven back to 4905 kHz, or even 7120 kHz? And what about Croatia, also on 6165 kHz? Another failure of frequency management, by KBS and/or M&B/TDF, relying on documents rather than turning on a radio, or godforbid, consulting DX bulletins to find out what is really on a frequency before picking it.

(Glenn Hauser-OK-USA, dxld Nov 24)

Kunming Yunnan. An article in Chinese about an upgrade to the Kunming 576 / 1242 kHz site:

<<http://www.ynradio.com.cn/diantaizixun/201011252209.html>>

From top to bottom the pictures show:

old 200 kW valve tx for 576 kHz.

old 50 kW valve tx for 1242 kHz.

installation of new 800 metres of feeder.

200 stretch of feeder to be buried under new road.

new transmitters are lifted into the transmitter complex by crane.

installing new transmitter.

station management visits the site to supervise.

In summary, the text says: construction for the upgrade began in August 2010 and the project is progressing smoothly. Four new DRM/DAM transmitters are being installed for Yunnan PBS News General Sce (576) and Rural Sce (1242). So far 1x100 kW and 1x50 kW txs have been installed and are being tested with good results.

Imagery at 25 07 14 N 102 45 09 E

My guess is when the project is completed, there will be 2x100 kW units in

// on 576, 1x50 kW on 1242 and 1x50 kW reserve, perhaps all combined onto one mast. 1242 kHz was reported inactive from Apr 2010.

ECUADOR 3810-lsb Time signal station HD210A in Guayaquil noted November 18 at 0145 UT on 3810LSB kHz, SINPO 24332. Time checks every ten seconds.

(Arthur Miller, Llandrindod Wells-UK, wdx-UK Dec 1)

ERITREA 5060.00 UNID replacing Radio Bana, Asmara, \*0354-0455, Nov 21, 22 and 30, lovely string music IS with possible IDs twice in five languages, two of these possibly Oromo and Arabic, but Radio Bana was never mentioned. 0400 UT annmt in vernacular, short music and talk for

three minutes mentioning Africa and Afghanistan (news ?), then a lot of short talks (reports ?) with short musical interludes of music from Horn of Africa in between, 0430 UT talk by a different man, maybe in a different language, low modulation and occasional CWQRM, strongest on Nov 22: 35333, but fading out with 15211. Also heard weak under Xinjiang PBS at 1450-1725\* UT, Nov 19 and 20, vernaculars talks and songs, 21321. (Anker Petersen-DEN, dswci DXW Dec 1)

ETHIOPIA 7235.00 Voice of Peace & Democracy, at 0358 UT on Dec 03, presumed the one opening here in Tigrinya? with tentative ID & mention of kHz & meter bands. Talk interrupted by HOA songs to 0430:30 UT off // unstable 9560.24 kHz drifting badly. In the clear throughout as BLR had not appeared here yet. NF, obviously via Gedja, appears to replace 7165 kHz? (Martien Groot-HOL, dxld Dec 3)

FRANCE According to French financial newspaper Les Echos and the RFI Riposte Web log, Radio France International is to be kicked out of the prominent Maison de la Radio along the Seine in Paris and will be shipped off to suburban Paris (Issy-les-Moulineaux) to share space with the lame France 24 TV channel. (Mike Cooper, dxld via wdx-UK)

Postfach 540  
CH-6280 Hochdorf, Switzerland/Schweiz

Zum Vergleich zur selben Stunde 08.55 UT  
5820 Pirat S=7-8  
6005 Kall Radio 700 Euskirchen Programm S=6-7, deutlich schwaecher.  
6075 DWL aus Woofferton England S=9+10dB, wie immer tagsueber  
schwaechelnd.  
6150 ganz schwach S=1-2, nicht zu identifizieren.  
Entweder ausfadendes RHC, oder  
NVK Radio Sakha - Radio Rossii aus Yakutsk.  
6190 DLF Berlin Britz S=9+30dB, in Spitzen S=9+40dB.

Radio Gloria 6085 kHz via KLL. Stefan Kramer Show mit Mitschnitten aus den  
80zigern, ist heute 28. Nov. vom 3. auf den 4. Sonntag einmalig verschoben  
worden.

Re 6085 Gloria Test um 1140 UT. DWL 6075 Spratzler ? Da scheint  
Norddeutschland und NFL irgend eine Seitenkeule aus Woofferton  
abzubekommen.

Hier in Stuttgart, selbst mit dem weiten Eton Lextronix E1 7-(sieben) kHz  
Filter gibt es keine Empfangsprobleme. DWL splattert hoch bis etwa 6080.7  
kHz dann ist Ruhe bis 6083 kHz.

6085 Weihnachtslied mit Swiss Accent und tief fadend S=7-9 um 1240 UT.  
Das Fading ist mit AGC-Slow zu glaetten. Im Hintergrund Chineselt es  
etwas, RTI Hu Wei dort, aber vielleicht ist es auch nur die liebevolle  
Streicheleinheit vom rot-chinesischen Jammer?

6075 DWL Woofferton mittagsueblich nur S=9 up to S=9+10dB hoechstens.

6005 Radio 700 Euskirchen, via Kall sehr duenne, mit S=6 in den Spitzen,  
aehnliches Signal auf 5980 kHz mit recht flottem Programm, am 4. Sonntag.  
Stefan Kramer Show mit Mitschnitten aus den 80zigern. Vergleich - Letztere  
Signal so stark oder schwach wie Novosibirsk auf 5940 kHz in Russisch zur  
gleichen Zeit.  
(wb df5sx JN48OR, wwdxc BC-DX TopNews Nov 28)

Radio Gloria 6085 kHz via KLL Kall. Bis 0959 UT Radio Gloria International

Absage mit ID und Adressen, danach HH-Lokalradio.  
(Friedrich-Walter Adam-D, A-DX Nov 28)

Radio Gloria CH auf Mittel- und Kurzwelle.  
Die Testsendungen dienen zur Ermittlung von Feldstaerken  
(Empfangsmoeglichkeiten) im deutschsprachigen Europa und in der Schweiz.

Daher sind Hoerrueckmeldungen ueber Empfangsmoeglichkeiten sehr wichtig  
und willkommen und werden mit einer besonderen Bestaetigungskarte  
(Fachchargon: QSL-Karte) bestaetigt.  
(Douglas Kaehler-D, A-DX Nov 27)

Spiele seit laengerer Zeit mal wieder ein wenig mit Globaltuners. Bis ca.  
11:35 UT war Radio Gloria mit O=3-4 zu hoeren, bis praktisch von einer  
Sekunde auf die andere die Deutsche Welle alles zudroehnte. Witzigerweise  
kann ich jetzt (1245 UT) auf 6085 kHz wahlweise DW oder Radio Gloria  
 hoeren, indem ich den Filter von "wide" auf "medium" aendere (dann aber  
nur noch O=2-3 fuer Radio Gloria).

PX zur Zeit mit erstaunlich abwechslungsreicher weihnachtlicher Musik und  
ID auf Englisch (mit Einladung fuer Empfangsberichte) und auch  
Franzoesisch.  
(Wolfgang Thiele-D, A-DX Nov 28)

GERMANY For almost ten years, Hamburger Lokalradio (HLR) offers  
international shows for listeners living outside their Hamburg FM 96.0 MHz  
reach. The station rents airtime from Media Broadcast for programmes on  
6045 kHz (first Sunday of each month, between 10-11 UTC), and from WRN for  
weekly shows on the WRN Deutsch channel.

Since December 2009, HLR can be heard daily from 10-11 UTC on 5980 kHz,  
with 1 kW, using the Kall transmitter site. To commemorate one year of  
low-power short wave programmes, Hamburger Lokalradio will air two multi-  
hour shows. They can be heard on Su, Dec 05, and Su, Dec 26, from 06-16  
UTC, on 5980 kHz. Most of the programmes will feature highlights from the  
HLR archives. In addition, there are programmes in English, Spanish, and  
Swedish. Here are some excerpts from the line-up:

Sunday, December 05. 0600 R Tropical, a show in Spanish with Raul  
Kristeller.

0700 50 Jahre Rundfunk in Deutschland, two hour feature on the history of  
radio broadcasting in Germany.

0900 Fuer Freunde der Kurzwelle / For Short Wave Fans, featuring audio  
samples of former international radio services.

1000 Hallo Hamburg, a show in Swedish with Bo Nystroem.

1100 Schwarz auf weiss, a programme on literature with Thomas Voelkner.

1200 New Letters on the Air - A Magazine of Writing and Art, in English.

1300 R Nostalgie, featuring songs from the early decades of audio  
recording.

1500 Jazz-Brunch, one-hour music show with Hans-Olaf Henkel.

Sunday, December 26- 0700 Die Geschichte der Piratensender / History of Pirate Radio, show in English.

0800 Weihnachtszeit im Hamburger Lokalradio, christmas novella by Fyodor Dostoyewsky.

0900 Fuer Freunde der Kurzwelle / For Short Wave Fans, featuring studio recordings from Latin American stations.

1000 Hallo Hamburg, a show in Swedish with Bo Nystroem.

1200 Swingin' Down The Lane, a music show in English with David Miller.

1500 Jazz und Literatur; HLR's Gaby Helbig interviews Peter Schulz, former major of Hamburg and author of the book "Rostock, Hamburg und Shanghai".

Hamburger Lokalradio welcomes reception reports which can be sent to:

Hamburger Lokalradio, c/o Kulturzentrum Lola,  
Lohbruegger Landstr. 8, 21031 Hamburg, Germany.  
e-mail: <redaktion @ hamburger-lokalradio.de>

Return postage is appreciated. Reception reports for daily programmes on 5980 kHz, monthly shows on 6045 kHz and relays via WRN will also be confirmed.

(Thomas Voelkner-D, via dswci SWN Dec 1)

GERMANY Evangelischer Pressedienst reported November 4 that far-reaching reforms will be done at Deutsche Welle (DW) due to heavy financial pressure. Job positions in the three-digit range will be eliminated by 2014. This was the outcome of a closed meeting of DW directors. Shortwave will be kept only for Africa. Elsewhere DW will rely on the internet and local rebroadcasting partners instead. There will be no reductions in the number of languages broadcast. DW expects a shrinking budget. Even an unchanged budget of 273 million Euro per year would until 2014 result in a deficit of 23 million Euro due to increasing costs.

(Kai Ludwig-D, dxld via wdx-UK Dec 1)

Diskussionen ueber Umbau der Deutschen Welle.  
Endgueltiges Konzept im Fruehjahr - Irritationen in der Belegschaft

Bonn (epd). Die Ankuendigungen zum Umbau bei der Deutschen Welle (DW) sorgen intern fuer Diskussionen. Bei einer Personalversammlung am 25. November in Bonn forderte Personalratsvorsitzender Stefan Dege Intendant Erik Bettermann dazu auf, ein "klares Unternehmenskonzept" vorzulegen.

<[http://www.epd.de/medien/medien\\_index\\_82705.html](http://www.epd.de/medien/medien_index_82705.html)>

GERMANY [IRAN non] Frequency changes of Radio Farda in Farsi:  
0830-1130 NF 11975 BIB 100 kW 105 deg to WeAs, ex9520 kHz.  
(R BULGARIA DX MIX News, Ivo Ivanov, via wwdxc BC-DX TopNews Dec 1)

GUATEMALA 4052.5 Radio Verdad heard tentatively on 4052.5 kHz at 0255 UT Nov 22, too weak to copy. Much stronger at 0125 UT on Nov 23, SINPO 33322.

Talk, brief identification, announcement, full identification 0130 followed by music, programme was in Spanish.  
(Arthur Miller, Llandrindod Wells-UK, wdx-UK)

Some technical details on what we did here at Radio Verdad. The antenna is 89m long with a phasing stub 11m long hanging near the middle. The two current nodes are separated to give near maximum collinear gain (about 7.5db above isotropic theoretical). Since the antenna is oriented NoEa to SoWe it is ideally oriented toward covering Mexico and Western NoAmerica on one side and CeAmerica, SoAmerica on the other side. I designed it so the lower elevation angle minor lobes are about 8 to 10 dB down off the ends of the antenna to cover EaUSA and Europe. It hangs over a gully with a max depth of about 25m and is end fed through a matching network by approx. 10 m of RG8 coax.

The matching network is mounted in a sheet metal box on the tower and consists of a single 30 cm diameter coil of three-eighths soft copper tubing. Top of the coil is to antenna and bottom to ground with the 50 ohm tap about 1.8 turns up from the ground.

The big problems in the installation were getting a good solid ground in dry earth covered by concrete and buildings. Lots of work by the mason chipping holes for the ground wires in the concrete. It also turned out the power feed from the transformer at the edge of the of property had a bad neutral so that got fixed. Prior to that we were completing the neutral current through our antenna ground, and indication that the antenna ground is at least capable of a few amps at 60 Hz without too much voltage drop. Hope this and the 500 W carrier from the Omnitronix solid state transmitter helps reception.  
(Wayne Borthwick, dxld via wdx-UK Dec 1)

Radio Verdad has decided to readjust frequency to 4055 kHz, as soon as a new crystal can be obtained and installed in a few weeks, making it easier to tune on 5-kHz step receiver, and to be further away from Kyrgyzstan and Missouri on 4050 kHz.  
(Glenn Hauser-OK-USA, ibid. via wdx-UK)

INDIA AIR External sce to get new MW transmitters. In the current financial year, key projects being executed by Broadcast Engineering Consultants India Ltd (BECIL) for the Government of India include the setting up of 1000 kW mediumwave transmitters at All India Radio Rajkot & Chinsurah for external services of AIR to neighbouring countries.  
(Govt of India via Andy Sennitt / RNW MN weblog, Oct 18; via BrDXC-UK Communication Dec 2010)

Andy Sennitt adds: these are DRM-capable transmitters. The Rajkot transmitter is presumably a replacement for the one listed as 'out of service' on 1071 kHz. The Chinsurah transmitter operates on 594 or 1134 kHz.  
(via BrDXC-UK Communication Dec 2010)

Another strike at AIR is planned from 13-15 December 2010.  
(item on p.24, on BrDXC-UK Communication magazine Dec 2010)

INDONESIA 954 RRI Kendari.  
Google Earth imagery. Some high resolution place. Another GE image update.  
I happened to drive past the MW/SW transmitter site of RRI Kendari last week on the way out to the airport. The site is in the village of Lepo-Lepo.

The MW mast for 954 kHz is clear enough in GE at 04 01 06S, 122 30 19E .  
The SW antenna can be seen from the road, but I can't make it out for sure in the GE image; actually besides the MW mast and a self-supporting tower carrying the VHF antenna for the STL, there are four small masts in the site. Two of these look to be old and probably out of use, while others in better condition support the SW dipole. From the road, all four of these masts appear to be close to the transmitter building,  
(Alan Davies-INS, SW TXsite Nov 28)

Google Earth imagery. Some high resolution place and Street View option on Google Earth, but better to handle in Google Maps.

04 01 06.46 S 122 30 18.93 E  
and probably small SW antenna location at  
04 01 10.15 S 122 30 23.19 E

INS Banjarmasin SW antennas at  
03 19 00.32 S 114 42 08.23 E

(R BULGARIA DX MIX News, Ivo Ivanov, via wwdxc BC-DX TopNews Dec 1)

IRELAND 612/549/675 Additional MW transmitters planned for Spirit Radio. In the addition to the planned MW outlet in Athlone on 612 kHz, 100kW, new Irish broadcaster Spirit Radio plans additional 25 kW MW txs at Lifford on 549 kHz serving the north of Ireland, and at Macroom on 675kHz serving the south of the country. FW txs are planned for Dundalk, Drogheda, Navan, Naas, Newbridge, Bray, Carlow, Kilkenny, Wexford, Ennis, Sligo, Letterkenny, Clonmel, Killarney, and Trale. Though the dates when these will come on the air have not been disclosed yet.

(RS/Radio NL via RNW MN, Nov 3; BrDXC-UK Communication magazine)

No doubt all of the above proposed transmitter sites will be subject to sufficient money being raised to purchase and install the transmitters.

(BrDXC-Uk editor, Dec 2)

Ireland's new Christian radio station Spirit Radio has been given green light by the Broadcasting Authority of Ireland to commence terrestrial broadcasts in January 2011.

(RS/Radio NL via RNW MN, Oct 25; Nov 3; BrDXC-UK Communication magazine)

ITALY Since 31 Oct the new times for Rai 1 regional programmes are: Mon-Sat 0620-0628 UT and 1110-1128 UT. Whilst on Sunday the time is 1115v-1127 UT after the "Oggi 2000" Angelus of Pope Benedict 16th.

(Dario Monferini, BOC-21 report; via BrDXC-UK Communication Dec 2010)

JORDAN 15290 Radio Jordan - Al Karama (listed), at 1217 UT on Nov 10 in Arabic. Report by man on parliamentary elections, mentioning ridings [sic] in different towns, besides the capital, including Jerash and Aqaba. Time check at 1226 UT, ID and news by man, then weather report by same speaker. No //s noted. News headlines to sudden sign- off at 1230 UT. Fair to good. Also at 1203 UT on Nov 12 with talk in Arabic by man; high noise level. Quite better signal at 1225 UT recheck carrying song by group. Nice ID by woman, musical bridge, talk by man on parliamentary elections. As usual, off in mid-sentence at 1230 UT. After that, did not show up on 11810 kHz (as Amman used to last year). Jordan is not heard regularly.

The 11960 kHz outlet, noted during UT morning hours in May and tentatively in September, has been missing for a while now. Same applies to familiar 9830 kHz outlet.

(Victor C. Jaar-QC-CAN, NASWA Flashsheet Nov 21 via dxld)

KENYA Following up an item published in the November 2002 Communication by Chris Greenway radio engineer Enrico Li Perni writes: I would like to

inform you about the whereabouts of the KBC Koma Rock shortwave station that the author was not able to find the station itself, writing instead that it probably was dismantled together with its transmitting masts. Well, the transmitting station is still there and has still got the two Thompson 250 kW shortwave transmitters, albeit not functional from my last visit in August this year. The two antennas, four supporting masts for directional dipoles, are 80% functional from a mechanical survey, lacking few isolators at the motorized changeover switch located at the base of the four masts.

(BrDXC-UK Communication magazine via dxld)

I was lucky enough to hear the test broadcasts of the External Service of the Voice of Kenya (VoK) in 1985 on 9635 kHz via long path. They were broadcasting the Domestic service of the English service of the Voice Of Kenya, complete with English commercials. This was via their new 250 kW transmitters. The VoK External Service never made it past this testing stage as the VoK External Service programs never materialised.

(Artie Bigley-OH-USA, ibid. via wdx-UK)

KUWAIT Could detect a carrier on 15540 kHz at 1805 November 22nd, very weak audio. Went to Global Tuners, using an Icom PCR-100 15 km South of Vienna heard indeterminate talk in English at 1815 UT, faded up at 1817 with "you have been listening to the series..." and then faded down again. At 1826 UT recheck heard music, then at 1830 UT nice fade up and heard time pips, last one elongated and "This is Radio Kuwait, the time is 9.30 p.m. local time".

(Mike Barraclough-UK, dxld Nov 24)

LUXEMBOURG 1440 DRM transmissions on 1440 have been cut back to a token operation between 8 AM and 9 AM local time. Otherwise the Marnach transmitter is operated in AM 0430-0800 and 1700-0200 local time or thereabouts. A large amount of this airtime is leased out to missionaries, CRI and KBS, which presumably for now has saved 1440 kHz from being closed down altogether.

It is understood that Marnach has now Transradio solid-state equipment for 600 kW and that 600 kW is the power at which the paid relays are being run. The tube transmitters (S 4006, they should still have an even older 600 kW Telefunken/Transradio transmitter with classic plate modulation as well), in the past ran in a pair as 1200 kW, are no longer in routine use.

RTL DRM use of 6095 may have been cut back even further now. It has been reported that the transmitter was on from 0700 to 0800 only, carrying 0700-0730 the abridged version of KBS German and 0730-0800 RTL Radio. Exactly the same pattern as on 1440 kHz.

(Kai Ludwig-D, dxld via wdx-UK Dec 1)

MALAYSIA [PALAU/SARAWAK/UAE] An interesting article on Radio Free Sarawak was found in 11/15 edition of "Hornbill Unleashed"

<<http://hornbillunleashed.wordpress.com/2010/11/15/11885/#more-11885>>

Sarawakians in the interior of the state will now have an alternative source of information with the Radio Free Sarawak beginning transmission today. The broadcast is being transmitted out of London, and consists of only one hour of programming from 6.30 to 7.30 am Sarawak time on the short-wave frequency 7590 kHz. The same news, current affairs and commentary programme will be repeated the same day from 6-7 pm local time

on 15869 [sic, rather 15680] kHz [...]

Web page of Radio Free Sarawak is found at <<http://radiofreesarawak.org>>  
with podcasts, and contacts.  
(Takahito Akabayashi-JPN, dxld Nov 19)

7590 kHz at 2230-2330 UT might be via Dushanbe-TJK, however 15680 kHz  
1000-1100 UT is via T8WH Palau (it's // with the audio feed on the World  
Harvest Radio web site at 1000-1100 UT).  
(Dave Kenny-UK, ibid.; via dxld)

MALAYSIA [SABAH] Kota Kinabalu (Tuaran), Sabah on SW 4970 5980 kHz,  
looks like 3 TX installations.

An older site one - now dismantled? -  
with a former MW non-dir circle at  
06 10 54.54 N 116 11 17.66 E

the present site at  
06 10 30.24 N 116 11 04.51 E

and high power - now defunct ? 4-mast directional 1476 kHz unit  
06 09 56.82 N 116 09 58.88 E

Google Earth imagery. Some high resolution place and Street View option on  
Google Earth, but better to handle in Google Maps.  
(wb, wwdxc BC-DX TopNews Nov 28)

MAURITANIA 7245 Radio Mauritaine - Nouakchott at 2211 UT on Nov 11.  
Talk by W then M in Arabic. Fair. Also at 0040 UT on Nov 13. Male singer  
accompanied by oud; talk by man, more monotonous singing. Several  
speakers, male and female, mentions of Mauritania and Mauritanian people.  
No pause or pips at 0100 UT. A lot of talking, with a very long  
presentation by man. Just before the hour, a man heard in what appears to  
be a local Arabic dialect (noted on other occasions as well), followed by  
another speaker in plain Arabic; no pause at top of hour; continued past  
0200 UT when I tuned out. Maybe stays on longer on Fridays. Fair most of  
the time.  
(Victor C. Jaar-QC-CAN, NASWA Flashsheet Nov 21 via dxld)

MOLDOVA [PRIDNESTROVYE] 6240 Radio PMR Grigoriopol Maiac. I don't  
think that I've seen this confirmed previously. I have now confirmed the  
Radio PMR schedule on 6240 kHz of 1800-2400 UT Monday to Friday \*does\*  
mean \*local time\* (not UT time). The station comes on air on Sunday at  
2200 UT (heard with tx on at 2200 UT on 21 Nov and into Russian  
programming). The station goes off air at 2200 UT on Friday (heard with tx  
off at 2200 UT on 26 Nov following its German programming).  
(Alan Roe-UK, BrDXC-UK Nov 26)

MOLDOVA 5240 on 24 Nov at 1800 UT, 5240 kHz MDA Radio Prednestroviya in  
Russian. SINPO - 45444.  
(Dmitry Kutuzov, Ryazan-RUS "deneb-radio-dx". RUSdx)

Rather intermodulation of fundamentals SW 6240 and MW 999 kHz  
at Grigoriopol Maiac, formula:  
6240 minus 999 = 5241 kHz, should check symmetrical  
6240 plus 999 = 7239 kHz also ... (wb)

MYANMAR 9730.81 Myanma Radio, at 0936 UT on Nov 30, vernacular announcements & songs to 1001:03 off. Have been monitoring this freq during the past week and today was one of their "better" performances. As a rule, though, overall reception is too poor to be more specific about program contents. Fortunately powerhouse VOR on 9720 kHz did not appear until 0946 UT.

(Martien Groot-HOL, dlxd Nov 30)

NORWAY 630 The Vigra transmitter on 630 kHz will be turned off on 30 June 2011. Demolition of the facilities will start immediately after the closure. The Rost island transmitter on 675 kHz will be closed on 31 Dec 2012. So as of 2013 the only remaining AM transmitter in Norway will be the 153 kHz longwave outlet near the Nordkapp.

These developments also raise questions about the Kvitsoy site. I understand that all transmitters on Kvitsoy are still being kept in operational condition, the two S4006 units for 1314 kHz as well as the S4005 and, probably moved in from Sveio, also S4105 shortwave equipment. But the mediumwave transmitters are unused for years now, after a special RNW relay, and all that is left on shortwave is 60 minutes a day of DRM, in B10 Polskie Radio in English 1800-1900 UT on 5895 kHz.

(Kai Ludwig-D, dxld via wdx-UK Dec 1)

OMAN 15140 on Dec 1 turned out to be a rare good day for propagation from R. Sultanate of Oman's English hour except at 1405 UT it's in Arabic! 1415 "Radio Oman" ID, still Arabic. 1422 UT seashore sounds (waves and gulls), another ID, still Arabic. Highly produced show with music, other SFX, with Arabic narration. 1428 ID. Peaks S=9+12, sometimes marred by overload from Cuba 15120 or WYFR 15130 kHz, but no co-channel QRM. 1431 fading some but still in Arabic when English news should have appeared. 1434 UT a snippet of Qur'an. What could have happened?

1. English has been cancelled permanently?
2. Rescheduled without notice?
3. DST applied unexpectedly, making everything earlier?
4. Pre-empted today only for some reason?
5. Wrong network feed by accident into 15140 transmitter?
6. English announcers have the day off?
7. Appears randomly anyway?

(Glenn Hauser-OK-USA, dxld Dec 1)

Roland Schulze of Stuttgart Germany told me about R Oman En nx at 1430 UT Nov 29, lot of bells playing also. (wb)

PORTUGAL/LYBIA 17800 Listening on Nov 23rd DW Deutsches Programm at 1400 UT on 17800 kHz [via Sines-POR relay site] I found also here a lady voice with ID "This is the Voice of Africa from a Great Jamahiriya" and news bulletin in En [from Sabrata-LBY].

(Rumen Pankov-BUL, wwdxc BC-DX TopNews Nov 23)

RUSSIA 6005 Adygey radio from Maykop heard on Nov 22 at 1800-1900 UT on 6005 kHz in Adygeyan and in Arabic and not in Turkish as earlier (maybe Turkish is used on Fridays?). Adygey is on the air on 6005 kHz Mon and Fri 1800-1900 UT and Sun 1900-2000 UT. No bcs from Kabardino-Balkar and Cherkess radio in their traditional bc times were in October and in November, resp on 7325 and 6005 kHz.

(Rumen Pankov-BUL, wwdxc BC-DX TopNews Nov 22)

[Kaliningrad enclave] 5975 bad audio observed of VoRussia in Serbian at 16-18 UT, distorted audio at 1630 UT Dec 2. Much better audio quality on // 6000 kHz.

(wb, wwdxc BC-DX TopNews Dec 2)

SERBIA on new 9505 kHz via Stubline 10 kW site, 1100-1900 UT daily.

9505 International Radio Serbia. For the first time since NATO airstrike bombing in 1999 the usual VOICE from Belgrade, heard previously half century from Stubline 1955-1999, heard again today here in Stuttgart, Germany on a reliable level.

IRS Stubline was heard Nov 26-28 when checked between 11 and 12 UT, 1115 UT, Nov 27, S=6 on deep fades, up to S=9+10dB, to average S=8 signal level. Also now checked at 1429-1431 UT and 1540 UT, and I heard the IRS Belgrade station jingle. Signal strength on equal level with co-channel BBC NAK in Urdu.

310 / 130 degr. easy dipole at Stubline site.

<<http://www.imagebam.com/image/8a305189386890>>

that looks like a 41 or 31 mb easy dipol.

Serbian music til 1120 UT, at 1121 UT annmt by female in Serbian. 1122 UT touristic fair? report, Novi Sad mentioned.

[later] 9505 and 7200 kHz were fixed frequencies of Radio Belgrade Yugoslavia more than 45 years duration to serve to YUG nationals as guest worker living in Western Europe, from the Fifties til the airstrike bombing ride of NATO bombers to Stubline in 1999.

The destroyed tx site is about 1 km south/southwest of the village, at 44 33 47.87 N 20 08 36.65 E

I guess the dipole

- Stubline [BEO] operate(d) on 1 simple dipole antenna, with azimuth of 310 degrees (2 towers and between 3 wires).

now erected again at Stubline used only as fixed frequency, {?via a mobile TX station?}.

Aleksandr, there is no flexible variation on this hardware to hop across the 31 mb channels. Annual HFCC membership cost some hundred dollars a year, IRS can ill afford such IRS annual budget...

(wb, wwdxc BC-DX TopNews Nov 26-28)

Dragan ... I have just tuned 9505 kHz to hear Stubline sign on at 1100 UT on Nov 27. I'm using an Icom R75 and random long wire, and the signal is a good one, peaking to S9 on the meter. However, there is continuous "fading" down to about S6, and occasionally as low as S3. Maybe this has as much to do with propagation conditions today as it does with the antenna set up at Stubline. I don't hear any interference - 9510 appears to be clear, but there is something on 9500 kHz, but currently too weak to ID. Audio quality is good, and I'm enjoying the music.

(Noel R. Green-UK, dxld Nov 27)

Heard also the following stations on 9505 kHz:

1400-1600 BBC Nakon Pathom-THA and Singapore Kranji in Hindi/Urdu.

1600-1630 AWR Moosbrunn-AUT in Urdu.

1630-1800 BBC Singapore Kranji in Farsi/Dari/Pashto.

1800-1900 BBC Singapore Kranji in Dari.

(R BULGARIA DX MIX News, Ivo Ivanov, via wwdxc BC-DX TopNews Nov 28)

Part of the fading audio may be due to varying frequency (about 5 Hz), see attached screenshot. Also slight hum due to +50 Hz spurs. The weaker, stable carrier belongs to Vo Strait and the one 20 Hz below probably to R Record. 9500 kHz has CVC and CNR1.

(Mauno Ritola-FIN, dxld Nov 27)

International Radio Serbia cancelled Radio Beograd 1 airings about 5 years ago. All programs are exclusively produced for diaspora. 1100-1400 UT program block in Serbian has various shows, which are different throughout a week. Wolfy heard a "TOURISM & ECOLOGY" program, which airs on Saturdays from 1100 till 1200 UT, and on Thursdays 1200-1300 UT.

(Dragan Lekic-SRB, dxld Nov 27)

History:

SERBIA STUBLINE, HF transmitting station photos Thanks to David Kriz from the Czech Republic, who paid a visit to STUBLINE HF transmitting station near Obrenovac, SERBIA, now we can see 16 photos - how these days looks the station. Photos are from July 2010.

I'm surprised how International R Serbia have not removed the destroyed buildings from 1999 NATO bombing ...

SERBIA Intruder BC 10120 kHz.

[fundamental Stubline Serbia 9505 kHz, symmetrical 8275/8890 kHz]

Hallo Ulrich, aktuell Broadcast Intruder auf 10120 kHz. S=9+20dB an Dipol. Konnte noch keine Sprache vernehmen. 1145 UT Abspielen der Internationale. (Harald, DL5HAQ, Dec 3)

Hallo, lieber Harald, danke fuer die ufb Meldung. Ich selbst habe den Rundfunksender auch noch gehoert. Sehr nuetzlich Deine Angabe der Grundfrequenz 9505 kHz!

Da es sich um eine Intermodulation handelte, konnte ich mit der bewaehrten Formel

(9505 mal 2) - x 10120

- x 10120 - 19010

x 19010 - 10120

x 8890 auch die zweite Grundfrequenz errechnen.

Auch die zweite IM errechnete ich nach der Formel

8890 mal 2 - 9505 x

x 8275

Und siehe da, auch auf 8275 kHz waren die gleichen Verzerrungen zu hoeren wie auf 10120 kHz.

Bei der IM sind also die beiden Sendefrequenzen 8890 und 9505 kHz beteiligt. Sie mischen sich in der Senderhalle oder im Freigelaende. Haeufig gehen Rundfunksender auch mit zwei "benachbarten" Frequenzen auf die gleiche Antenne (gleichzeitig). Dort erfolgt dann die Mischung.

Um 1300 UTC kam die Ansage "Radio Serbia". Ich unterrichtete noch waehrend des Andauerns der Stoerungen die BNetzA. Sie peilten den Sender in Serbien. Mal sehen, ob der Stoerer morgen wieder da ist. Auf alle Faelle hast Du der Bandwacht (und den vielen Funkamateuren...) sehr geholfen. Vielen Dank!

(Uli, DJ9KR, Leiter der DARC Bandwacht, Dec 3)

SLOVAK REP 6040 R Slovakia International, Rimavska Sobota, at 0105-0130 UT on Nov 29, English letterbox with extensive coverage of the decision, that its SW transmitters will close down on Dec 31, 2010, due to heavy

costs of SW transmitters and very varying reception conditions on SW ! RSI will continue broadcasting on the internet and via satellite through other transmitters, 0127 ID's in English/French/Spanish/Russian and German, 0130 UT Programme in Slovak, 55555.  
(Anker Petersen-DEN, dswci DXW Dec 1)

SPAIN 15385 Emission Sefarad from REE Madrid as usual on Mondays, fair signal at 1425-1455 UT Nov 22 for ME; could not reconfirm the repeat to SoAM at 0115-0145 UT on Nov 23 UT Tuesday on 11780 kHz, as too much Brasilia, and Europe not really propagating on 25mb. Nothing audible on 11795 kHz either, its former and should be future frequency in the clear.  
(Glenn Hauser-OK-USA, dxld Nov 24)

SRI LANKA Bad situation with SLBC in En from 0125 UT s/on: on 6005 kHz there was another prgr in En and on 9770 kHz was Havana in Sp and no heard on 15745 kHz. On both 6005 and on 9770 with rumbling sounds.  
(Rumen Pankov-BUL, wwdxc BC-DX TopNews Nov 24)

SRI LANKA SLBC Testing MW 1125 kHz.  
Jose, SLBC is conducting tests on 1125 kHz 1530-1630 UT from today Nov 30. Just 20 kW and music. Appreciate any reports you can get especially from the South. You can e-mail reports to Mr. V. Kuganesan <kuganesan @ yahoo.com> You are free to use it in DXIndia.  
Thanks. Victor 4S7VK.  
(Victor Goonetilleke-CLN, DXindia Nov 30)

SWAZILAND 9500 on Nov 18, at 1815 UT, TWR with African-accented preacher thumping the bible for all it was worth. Not sked'ed per EIBI and AOKI, but here at 1800 nonetheless. Good signal but beat up on by BBC on 9505 kHz.  
(Al Muick-AFG, dxld Nov 24)

You mean, in English? Well, it's in HFCC as other languages:  
9500 1630-1900 48 MAN 100 13 1234567 311010 270311 D Oro/Kam SWZ TWR.  
(gh, dxld)  
{extended schedule by an hour 18-19 UT now registered from mid Nov. Heard also by Herbert Meixner-AUT, reported in A-DX. wb.}

SWITZERLAND 765 kHz farewell party. On 5 Dec 2010, 1900-2300 UT. Farewell special program of Option Musique Lausanne on MW 765 kHz from Sottens MW site

(Erich Bergmann-D, wwdxc BC-DX TopNews Dec 2)

Am 5. Dezember 2010 bringt Option Musique von 2000 bis 2400 MEZ-CET [1900-2300 UT] auf 765 kHz ein Sonderprogramm, das somit auch die letzten Stunden auf Mittelwelle sein werden. Fuer danach wir auf DAB, Internet und Kabel hin gewiesen. Ansagen mit den angefuhrten Hinweisen habe ich gestern zw. 1855 und 1900 MEZ-CET gehoert.  
(Erich Bergmann-D, wwdxc BC-DX TopNews Dec 2)

SYRIA Radio Damascus is still planning to install a new shortwave

transmitter to replace the old worn-out transmitters at Adra shortwave station. A new tender is now being discussed, and according to the company involved, it will take about 6 months to install the new transmitters.

(Kris Janssen-BEL, dxld via wdx-UK)

TURKEY 6520.00 UNID (Orient?). Hallo - just ist eine Px-Sendung auf der Frequenz zu hoeren mit hier sporadisch bis zu S=9+20 bei leichtem "verwaschenen" Fading.

(Theodor Averbeck-D, A-DX Dec 1)

Klingt im Text, und nach dem Musikstil nach einer Turk-Sprache, Kurdish ? Zu anderen Tageszeiten sendet man auf 7410 laut Aoki. Wenn Kurdish, muesste man mal im 60 oder 76 mb nach einer Parallelsendung suchen. Hier auch zwischen S=8 bis S=9+10dB hoch fadend.

(wb, wwdxc BC-DX TopNews Dec 1)

Eine wohl unerwuenschte Nebenausstrahlung der Voice of Turkey in Tuerkisch // 5980 kHz. Hatte ich am 11.11. hier schon mal gemeldet. +/- 540 kHz ?

(Patrick Robic-AUT, A-DX Dec 1)

U.K. BBC World Service - From Pirate Radio to Podcast. The BBC World Service recently broadcast an item on pirate (free) radio which is now available on YouTube.

The YouTube description reads:

BBC World Service programme on 28 November 2010. Radio Caroline is still broadcasting and can be found at <<http://www.radiocaroline.co.uk/>>

Listen to BBC World Service - From Pirate Radio to Podcast here

<[http://www.southgatearc.org/news/december2010/pirate\\_to\\_podcast.htm](http://www.southgatearc.org/news/december2010/pirate_to_podcast.htm)>  
(10:12 m/s duration)

In the early 1980's, FM band II transmitters for use by unregulated broadcasters were apparently made by engineers working the night shift at the BBC Brookmans Park transmitter site in Hertfordshire.

<[http://www.southgatearc.org/news/december2010/pirate\\_to\\_podcast.htm](http://www.southgatearc.org/news/december2010/pirate_to_podcast.htm)>

(Mike Terry-UK, BrDXC-UK Dec 2)

VANUATU 7260 Have been out of the DXing "loop" for a while, but I just wanted to let you know that Radio Vanuatu is indeed transmitting on the new frequency of 7260. Steve has done a fantastic job of helping solve some of the glitches that were causing problems on the higher frequencies. I sent them a care package of higher voltage Vacuum Variable Capacitors, and other odds and ends back in October. The engineering staff of Radio Vanuatu, as well as Steve from Radio New Zealand, are all truly remarkable engineers. The situation there is difficult when it comes to locating parts, and these fellows have become MASTERS at making things work, regardless the difficulties. I just can't thank them enough for their hard work, diligence, and patience, with a transmitter that really was my first prototype. I guess we'll see how well the new layout performs over the coming months.

(Jamie Labadia-USA, dxld Nov 19)

7260 Radio Vanuatu, on Nov 15 at 0744 UT - Male and female announcer in presumed Bislama. Bits and pieces of conversation resembled English words; appeared to be a talk involving shipping of packages or mailing, perhaps

to relatives overseas. Good to very good signal. Brief music, many mentions of 'tok tok', and Radio Vanuatu ID and time check at 0750 UT. I noted 3945 kHz in // with a fair signal at 0915 UT. (Guy Atkins-WA-USA, DXplorer Nov 18 via BC-DX Nov 21)

#####

European SW site images. Several European SW site images found here: <<http://www.drmradio.co.uk/>> (Ian Baxter-AUS, SW TXsite Dec 1)

#####

Some logs of Roland Schulze, Stuttgart Germany, on November 28-29:

GUINEA 6250 noted around 1730-1800 UT, QRM by Pyongyang from D.P.R. Korea 6250.52 kHz.

MYANMAR 5985.90 ... .80 kHz at 1530-1630 UT.

SWAZILAND 4760 TWR Manzini observed around 1658 UT.

YEMEN 6135 from Aden noted not every day here in Germany, 1430-1500 UT. Another rather Sana'a outlet on odd frequency 9780.12 kHz.

see also under OMAN 15140.

#####

Time signal stations.

There is an interesting discussion forum at: <<http://www.thenakedscientists.com/forum/index.php?topic=11772.msg332641;boardseen>>

Time signals that can be used as references for radio clocks include:

U.S. NIST Broadcasts:

Longwave radio station WWVB at 60 kHz (binary coded decimal only) at 50 kW

Shortwave radio station WWV (a male voice, Fort Collins, Colorado, about 100 km north of Denver at approximately [show location on an interactive map] 40 40 49 N 105 02 27 W ) at 2.5, 5, 10, 15 and 20 MHz at 2.5 kW to 10 kW. This voice signal is available by telephone at 1-303-499-7111.

Shortwave radio station WWVH (a female voice, on Kauai near Kekaha, Hawaii, at about [show location on an interactive map] 21 59 16 N 159 45 50 W ) at 2.5, 5, 10, and 15 MHz at 2.5 kW to 10 kW

German Broadcasts: A time signal from DCF77 (Mainflingen, a transmitter near Frankfurt at 50 kW at about [show location on an interactive map] 50 00 53.08 N 09 00 27.30 E can be received on 77.5 kHz to a range of about 2000 km.

Canadian Broadcasts: The official time can be obtained by tuning to radio station CHU (Ottawa, Ontario)

45 17 41.06 N 75 45 27.87 W at 3.33, 7.335 and 14.67 MHz, with FSK digital time data sent once per minute at 300 baud.

UK Broadcasts: A time signal from MSF, an atomic clock near Anthorn (which was relocated from Rugby on 2007-04-01)  
UK MSF Anthorn Time Signal 60 kHz 15 kW  
54 54 20.79 N 03 16 39.33 W can be received on 60 kHz.

The JJY radio stations in Japan on 40/60 kHz.  
JPN VLF JJY-40 Ohtakadoya-yama 40 kHz time signal.  
37 22 21.55 N 140 50 55.72 E  
JPN VLF JJY-60 Hagana-yama 60 kHz time signal.  
33 27 54.39 N 130 10 31.99 E

The BPM radio station in Xi'an, China at 2.5, 5, 10 and 15 MHz.  
CHN NTSC BPC 68.5, Time signal, Mt. Li, Lintong, Xi'An, Shaanxi, China.  
probably 34 21 27.12 N 109 12 31.60 E

Swiss Broadcasts: The legal Swiss time can be picked up from the HBG longwave transmitter in Prangins on 75 kHz.

SUI VLF HBG Prangins 75 kHz  
46 24 29.87 N 06 15 09.53 E  
The time code is compatible with that of the German DCF-77 transmitter.

French Broadcasts: Station TDF transmits timecodes on 162 kHz from a site near Allouis.  
47 10 10.71 N 02 12 16.96 E

<[http://en.wikipedia.org/wiki/Radio\\_clock#Longwave\\_and\\_shortwave\\_transmissions](http://en.wikipedia.org/wiki/Radio_clock#Longwave_and_shortwave_transmissions)>  
(Mike Terry-UK via dxld Nov 30)

Time signal stations. China has been transmitting also LF Time Signal BPL for clocks since April 25, 2002 on 68.5 kHz at 0500-1300 UT everyday. The transmitter site is located at the suburb of Shangqiu City, Henan province, with 100 kW of power.

#####

ALASKA HAARP activity indicator

I frequently check 2750 in routine bandscans, for HAARP to show up again, but no sign of it until: Nov 9 at 0647 UT, with a wide variety of carrier and tone tests past 0719 UT. Of course, until the DST/ST shift I was seldom monitoring that late, as unfortunately my daily routine has to be tied more to the local clock than to UT, even tho I denounce the very concept of shifting time.

At 0647 UT, carrier cutting on and off, gradually speeding up the pulse rate, peaks S9+25. 0643 it reaches about 10x per second and still rising. 0644 cuts briefly to constant carrier, then resumes pulsing at increasing rate. Meanwhile, I amuse myself by playing "O What a Beautiful Morning" by adjusting the BFO tuning on this carrier.

0646, adds tone modulation to the carrier pulsing, and that rises too as the pulse rate continues rising to "airplaning". 0653 still increasing rate and pitch but very slowly. 0654:36\* cuts off the air, but soon back on at 0655 now with sweep tones upward repeated every 6 seconds 10x per minute, past 0700+, and off at 0704:34\*.

\*0705 back on with carrier, then hi-pitched tone test stepping up, rather than sweeping up. 0707 slow subaudible heterodyne, then increases (as if

two separate transmitters deliberately slightly offset). 0708 constant tone, stepping up. 0709 lo-pitched tone, stepping up. 0710 slow SAH increasing to fast. (I take a few minutes to tune around for other things).

0719:34\* after OC without tones, and soon back on with the SAHs as I quit. When I wake up at 1250, nothing on 2750, around the time I last heard this a few weeks ago: "Oct 4 at 1214, strong signal and still but weaker at 1242."

Identity of all this as HAARP, Gakona, Alaska is based on previous reports and this is one of their known frequencies, tho certainly there was nothing like an ID heard, nor probably sent tho it would have been easy to do so. There is a lot of information at  
<<http://www.haarp.alaska.edu/>>

but searching on 2750 does not get any hits. WTFK? I have yet to find any specific frequency info. It does say that some of the antennas cover 2.8 to 8.3 MHz, avoiding the 40 and 80m hambands. The 2750 signals I was hearing were not especially wideband, as some had reported, just normal bandwidth.

(Glenn Hauser-OK-USA, dxld Nov 9)

Hi Glenn,

the HAARP site has a useful page at:  
<<http://maestro.haarp.alaska.edu/data/spectrum2/www/hf.html>>

that shows received signals in the HF spectrum - including those transmitted by HAARP. The frequency resolution is pretty coarse but I often observe a solid yellow line just under 3 MHz (assume nominal 2750 kHz) and at other times, elsewhere in the HF spectrum. One can conveniently go back in the archives as well.  
(Don VE6JY Moman-AB-CAN, dxld Nov 13)

Yes, that correlates with the Nov 10 and 9 reports, as well as October 4 when I was getting HAARP at 12-13 UT. On that date it even shows every harmonic as high as x10 27500 bouncing back during the previous hour.  
(Glenn Hauser-OK-USA, dxld Nov 16)

AUSTRIA A tape of the sightseeing tour by some ham radio operator group to ORS shortwave site at Moosbrunn Austria is available only for access inland via Austrian internet provider. There are some sound track copyright limitations on foreign access.

CANADA/USA 9955 / 9490 Radio Republica is suspending CBC and WRMI relays as of today, supposedly temporarily. It's the end of the year and apparently end of the funds too, at least until new grants begin in early 2011. We'll see what happens. Schedule grid on the WRMI website is dated December 4. It's up to date, but there will be changes this weekend due to the Republica suspension.

(Jeff White-FL-USA WRMI, dxld Dec 6)

Sackville relay was 9490 kHz at 0000-0300 UT Tue-Sat. So how much longer will jamming continue on 9490 kHz? RR had been scheduled on WRMI 9955 kHz, only at 0300-0500 UT Sun & Mon. I suppose they will continue on unacknowledged low power but heavily jammed transmissions presumably via ELCOR, Costa Rica on 5954.2v kHz at night plus spurs, 9965 kHz daytime.

(Glenn Hauser-OK-USA, dxld Dec 8)

CUBA 6180 Nacional Venezuela via Cuba, 1040 UT in Sp, 6180 kHz,

CZECH REPUBLIC Radio Prague is leaving short waves on January 31, 2011.

The rumour was now confirmed by Mr. Krupicka, the Chief of the station.

The Litomysl SW TX site will be closed.

(Karel Honzik-CZE, Dec 8)

Radio Prague ends SW bcasting 31 Jan 2011.

Radio Prague has confirmed it will end shortwave broadcasts at the end of January according to this announcement on its Facebook page about 1810 UT today:

"Radio Prague will be terminating shortwave broadcasting as of January 31, 2011. The station's financing for next year has been drastically reduced by the Foreign Ministry in line with government austerity measures aimed at cutting the state deficit. The details of the budget are still being discussed. At present, broadcasting will continue in all six languages via the internet, satellite and partner stations."

<<http://www.facebook.com/home.php?ref=home#!/pages/Radio-Prague/183496134175>>

(Alan Pennington-UK, BrDXC-UK Dec 8)

Radio Slovakia, Radio Prague and Radio Sweden I predict will go the way of Swiss Info. I think that in 2 maybe 3 years they will be gone. Swiss Info is on the verge of being gone for good. We have see this happen before.

Geopolitically things have changed since 1989. People back then that made predictions this would happen I remember were laugh at, but it seem they are getting the last laugh now.

(Keith Perron-USA, dxld Dec 11)

Radio Prague on shortwave will be closed on January 31, 2011, for ever.

From Febr 1st, only via livestream / and recorded on internet files download. Same decline {to sudden dead} like RCI German, RFI German, Swiss Radio International, Radio Sweden, and soon DWL Bonn, latter from 2012 year when only Sines, Kigali and Trincomalee may used by DWL then.

(wb, via wwdxc BC-DX TopNews Dec 10)

ECUADOR Guenter Jacob, Passau, Germany writes, "Since 1956, when I first listened to the 'Voice of the Andes', my collection of HCJB QSLs kept growing and growing. With 127 different HCJB Ecuador frequencies verified, I have amassed a total of 288 different motives of HCJB QSL cards.

Collectors - like myself - who want to supplement their collection, can

get missing cards for their reception reports sent to Quito. A number of cards, especially older ones, are still included in HCJB's QSL Gallery, but are not available any more. Maybe it is possible to help serious collectors to add one or two missing cards in their collection, because I have a number of duplicates, like the 1966-A card, also cards of the series of 1969, 1970, 1971, 1972, 1974. My offer is effective as long as my stocks last.

These QSLs arrived during the last four weeks: HCJB 6050 (Mt. Pichincha, 10 kW.); Hamburger Lokalradio via Wertachtal, 6045; TWR via Wertachtal, 7215; Rhein-Main-Radio-Club for special transmissions via Sitkunai, 9770/11640; Voice of Russia via Lviv (Ukraine), 11655; Sentech Meyerton, 5890/12125; IBB Transmitting Station Tinang Philippines 7540/9485 (Station Manager, IBB/PTS, PSC 500 Box 28, DPO AP 96515-1000, Philippines); IBB Thailand Transmitting Station, 9480; Deutsche Welle via Woofferton 7410, Sines 6180, Bonaire 9450, Kigali 9465, Trincomalee 9635." (Guenter Jacob-D, in NZ DX Times Dec 2010)

(Klaus Spielvogel-D, A-DX Nov 29)

DW nicht mehr in DRM!

DW sendet fuer Europa nicht mehr in DRM, die 3995 laeuft jetzt noch ein Weilchen analog. Die Meldungen der vergangenen Wochen geben viel Raum fuer Spekulationen, was in Sachen DW im kommenden Jahr passieren wird. Es gab ja schon seit laengerem Hinweise, dass im kommenden Jahr die VT (Babcock) Vertraege auslaufen werden. Damals dachte man ja noch, dass dann eventuell auch M&B wieder eine Chance erhaelt in einer neuen Ausschreibung.

Mitterweile wuerde mein Tipp in eine andere Richtung gehen: da wird gar nichts mehr neu ausgeschrieben, oder, wenn doch, dann hoechstens noch ein paar einzelne Sendestunden.

Die Informationen, die man so hoert, gehen ja in die Richtung, dass Kurzwelle nur noch fuer Afrika in groesserem Masse laufen soll, dazu vielleicht noch ein paar Stunden fuer den asiatischen Raum. Ich denke, dafuer reichen dann die DW-eigenen Sendestellen locker aus: Sines hat mit den Drehantennen die Moeglichkeit, den noerdlichen und mittleren Teil Afrikas zu "beackern", Kigali macht die Mitte und den Sueden. Dazu noch ein paar Stunden Sri Lanka fuer Asien. Voila: deckt sich mit den Ankuendigungen und man muesste keine Stunde extern einkaufen. (Stephan Schaa-D, A-DX Dec 9)

Fuer Asien sendet man in B-10 noch das Gemeinschaftsprogramm mit der BBC via Sri Lanka und Thailand.

GREENLAND Greenland closes SW and MW on Feb 11, 2011.

On February 11, 2011 at 8 AM local time all medium wave stations carrying KNR (Radio Greenland) - Upernavik (810 kHz), Ummannaq (900 kHz), Qeqertarsuaq (650 kHz), Nuuk (570 kHz) og Simiutaq (720 kHz) - will be switched off for good, and the transmitters will be dismantled. On the same day the relays of KNR newscasts twice daily via Tasiilaq 3815 kHz will also cease.

The decision has been taken by the Ministry of Housing, Infrastructure and Transport in the Government of Greenland.

After February 11, 2011 KNR will only be available via Low Power FM-radio in inhabited areas of Greenland. Thus no coverage of the waste country

outside the towns and villages - and KNR will no longer be available for the fishermen at sea nor the Inuit population in Canada.

The decision was made because the transmitters were getting old and too costly to maintain. Besides - very few people are using the MW transmissions.

Weather forecasts will be available for fishermen and others via VHF coastal radio.

At a point it was considered replacing the aging MW transmitters with one or two new SW AM-transmitters near Nuuk, but it was estimated that it would cost 4 million DKK (535.000 Euro) to establish such a new SW operation. It was also felt that few listeners would invest in a SW receiver and the quality would be 'doubtful' - suffering from 'atmospheric phenomena'. So these plans were given up.

Full report (in Danish) here:

<<http://www.radionyt.com/artikel/default.asp?id=18070>>

(Stig Hartvig Nielsen-DEN WMR, mwdx Dec 10)

Greenland closes SW and MW on Feb 11 2011.

Alas, indeed they are! Even the relatively recent low-power missionary stations that brought back for a fleeting moment rare DX that HCJB and others have supported, never really made it. witness The Cross Radio in Pohnpei (gone), Wantok Radio Light (still on but with much reduced power these days), Radio Peace (supposedly expanding, but not on the air these days), Dunamis Shortwave in Uganda (rarely, if ever heard, with transmitter problems), ELWA (gone again), Radio Veritas Liberia (gone), CRN in PNG (gone), and on and on the list goes. The only one still reliably operating is Radio Kahuzi in DR Congo. The story is the same in most cases - unreliable equipment and a lack of trained staff to support the station technical operations.

(Bruce Churchill-CA-USA, DXplorer Dec 10)

INDIA Strike threat by AIR again. Many staff members of All India Radio & Doordarshan TV have given call for boycott of duties for 72 hours from 0330 UTC of

Monday 13 Dec 2010 to 0330 UTC of  
Wednesday 16 Dec 2010.

The strike may go on indefinitely also. Their recent strike affected most AIR stations. Several stations were off air, some with music or test tones only. So watch out AIR stations this Monday 0330 UT onwards.

(73 Jose Jacob-IND VU2JOS, DXindia Dec 10)

IRAN/U.K. Wiki-leads. Retaliation planned after Iran jammed BBC broadcasts. US Embassy secret cable 4 February 2010 includes:

"HMG is exploring ways to limit the operations of the IRIB's Press TV service, which operates a large bureau (over 80 staff) in London. However, UK law sets a very high standard for denying licenses to broadcasters. Licenses can only be denied in cases where national security is threatened, or if granting a license would be contrary to Britain's obligations under international law.

Currently, neither of these standards can be met with respect to Press TV, but if further sanctions are imposed on Iran in the coming months, a case may be able to be made on the second criterion.!

and

"In the immediate term, HMG plans to lobby the French government to approach Eutelsat and press it to drop IRIB broadcasts from the Hotbird satellite. The IRIB broadcasts several channels from the satellite, both domestically (even most terrestrial TV channels in Iran are dependent on a satellite and repeaters) and internationally, so it is an important source of income for Eutelsat.

While it would be unlikely for the company to agree to drop the IRIB broadcasts spontaneously, Turner believes it would be susceptible to an approach by the French government because of the cover it would gain from complying with an official government request. HMG would appreciate USG engagement with the government of France on this issue."

(Mike Barraclough-UK, BrDXC-UK Dec 6)

IRAN/ARMENIA 1377 A jammer-like noise heard on 1377 kHz during November in the late afternoon and early evening period appears to have been originating from a faulty transmitter at Gavar in Armenia, used for relays of Voice of Russia and TWR.

(items on p.20, 32, 34, by Rumen Pankov-BUL and Tony Rodgers-UK, on BrDXC-UK Communication magazine Dec 2010)

JAMMING - Today, Monday the 8th of Novembre a very "old fashioned" radiosignal is audible on 1377 kHz. A wobbel jammer station is causing a lot of QRM for France Info from Lille. Is there anyone who knows which country is started this - radiowar -? The signal is coming from the south-west, here in the northern part of Holland. Is the jammer for, or coming from Iran location IRIB?

(W. Prins, Haren-HOL, BeNeLuxDXC Dec bulletin Nov 8)

Comment - Re jammer like noise on 1377 kHz.

Still a PUZZLE after 4 weeks happening.

-- Others say this a Gavar Armenia mediumwave transmitter fault.  
But oscillating signal failed on Dec 3rd to 6th.

-- My comment, that's supposedly real jamming by Iranian Govt Authority against CHRISTIAN program broadcast of TWR EUROPE from Vienna, Austria. (wb)

According to their TWR B-10 winter schedule rent Armenian MW powerhouse Gavar mediumwave on 1377 kHz between 1800 and 2107 UT, in Arabic, Persian, Iraqi Arabic, Assyrian, Qashqai, and Uzbek language.

<<http://www.twreurope.org/who-we-are/projects.html>>

<[http://www.twr.org/schedule/?target\\_country=iran](http://www.twr.org/schedule/?target_country=iran)>

Two MW directional antennas erected on Gavar Armenia bc center during USSR era:

1314/1377 kHz. MW Srednyaya Zarya antenna, 26 masts 2.2 km long at 180 degrees, towards Iran, Iraq, and Kuwait target. {probably power of 500 kW, wb.}  
40 24 54.62 N 45 12 40.12 E

1350 kHz. MW SV4+4 - 8mast directional, 232degr towards Israel, at 232 degrees.  
40 24 07.65 N 45 11 54.26 E  
(wb, wwdxc BC-DX TopNews Dec 2 / 9)

IRAQ/IRAN [KURDISTAN] 3970.04 Voice of Iranian Kurdistan, Salah Al-Din, Northern Iraq. At 1300 UT on Nov 19 I could hear it a short time without jammer, because they were late returning from 3980 kHz. The signal was very weak, but I think there was first a frequency ann giving at least three frequencies and then lady IDs: "In Sedaye Kurdistan Iran" in Farsi. I could not confirm, if this was // with 4880 kHz, but probably not. They also signed off much earlier than 4880 kHz, on Nov 19, maybe 1330 UT. (Mauno Ritola-FIN, dswci DXW Dec 1 via dxld)

KYRGYZSTAN 5130.00 at 1720-1757\* UT on Fri Dec 3, R Hit Shortwave, Bishkek (ex 6030 kHz) Vernacular conversation, religious hymns, 25322. (Anker Petersen-DEN, playdx yg via dxld)

LITHUANIA 6055 Radio Waves International (via Sitkunai), for 27th Anniversary broadcast on Nov 6 they sent a large, colorful, yellow-background QSL sheet, full-data (with site), numbered ("10-147"), also a letter, RWnews info sheet, playlist, promo card, and two CDs. V/S Peter Hills & Philippe. In 3 wks. by postal mail for postal rpt. Copy attached. (Jerry Berg-MA-USA, DXplorer Dec 5 / and NZ DX Times Dec 2010)

MALAYSIA {PALAU/SARAWAK non /UAE} Radio Free Sarawak QSL. Radio Free Sarawak sent me a QSL card using PFC after 16 days for my reception report in English with 1 IRC to Bruno Manser Fonds in Switzerland. PFC QSL is signed and stamped. QSL signer cannot be read out due to too good hand writing signature.

MAURITANIA 7245 at 0707 UT Radio Mauritanie vgd in clear with news in Arabic Nov 29. Heard well past at 0800 UT on Nov 27 with ident at 0756 UT. Also hrd at 0559 UT on Nov 28 with Quran but heavy splash from Deutsche Welle 7240 kHz.  
(Bryan Clark-NZL, NZ DX Times Dec 10)

7245 at 2349 UT, Radio Mauritanie, at 2349-0016 UT Nov 5, music program hosted by a man and woman with Arabic talks. Another man announcer at top of the hour with apparent ID and possible frequency announcement. Music program continued hosted by man and woman announcers. Good signal.  
(Rich D'Angelo-PA-USA, NZ DX Times Dec 10)

NIGERIA 7275.00 R Nigeria Abuja, at 0638 UT on Dec 04, English news item on environmental protection, back here from 7350 kHz. Co-channel Xinjiang PBS noted weakly in the background. This confirms James McDonnell's observation which I did not read about until later this morning.  
(Martien Groot-HOL, dxld Dec 4)

7275 Abuja. I have just done a quick bandscan and discovered (presumed) Radio Abuja Nigeria back on their old frequency of 7275 kHz. Heard today Dec 3 at 0756 UT with the Network Service of Radio Nigeria. 0757 UT the network programme finished but there was no ID and transmitter went off the air. I will monitor further."

If Nigeria starts 7275 kHz around 0540/0600 UT as it did 7350 kHz, should be uncovered by Tunisia when that quits at 0627 UT like clockwork. Also Iran in Arabic is on 7350 until 0530 UT.  
(Glenn Hauser-OK-USA, dxld Dec 3)

Channel 7275 was empty on Dec 9th at 0645-0720 UT. (wb)

9690 Voice of Nigeria, not bad at 0935 UT on Dec 1 with En talk on HIV, ID and a little mx at 0945 UT, talk continued. Audio dropped down at 0959 UT, ID, then audio back up for En nx at 1000 UT. Surprised to hear them at this hour.  
(Jerry Berg-MA-USA, DXplorer Dec 5)

PHILIPPINES 6170.4 UNID carrier. 6170.4, at 1323-1408 UT on Dec 06, weak carrier hetting VOR Chinese 6170 kHz. This happens to be more or less exactly the same freq where DZRM, R. Magasin, was reported in October last year. I may be jumping to conclusions but very possibly this is them again? Anyone else hearing this?  
(Martien Groot-HOL, dxld Dec 6)

ROMANIA Google Earth imagery. Some high resolution place and Street View option on Google Earth, but better to handle in Google Maps.

Google Street View feature on limited basis also in Romania now.

Whilst we don't get such great images of the Saftica antennas, the Tiganesti antennas are very clearly seen from the roadside images.

SOLOMON ISL 5019.84 Solomon Islands Broadcasting Corporation, 1902 UT.

Die letzten Tage konnte ich in Salzburg mit grosser Freude die SIBC empfangen. Endlich konnte ich Radio Hapi Isles auf der legendaeren 5020 kHz hoeren, Signalen auf dieser Frequenz bin ich die letzten 20 Jahre im Winter nachgejagt.

Sendebeginn auf genau 5019.84 kHz ist immer gegen 1856 UT, das Programm beginnt um 1902 UT mit Trommelmusik, Chorgesang - also typischer Musik wie wir sie aus Honiara erwarten. Die Signalstaerke ist sehr gering, der beste Empfang am Perseus mit ausgeschalteter AGC und USB. Hoerbar bis ca. 1950/2000 UT, beste Signalstaerke gegen 1920 UT.

RX Perseus, als Antenne habe ich eine 250 Meter lange Beverageantenne

Richtung 50 Grad (Pazifik) verwendet.

SWITZERLAND Option Musique 765 kHz. At 2300 UT of yesterday, Sunday 5th inst., RSR on 765 kHz began running a continuous announcement [in French, of course] informing the Sottens MF tx had been taken out of sce on 5 Dec at midnight local time, and that the prgr is aired via DAB, VHF-FM & available via the internet.

Strangely, or perhaps not so, they kept running the announcement well after 2300 ... and are still with it now as I write this, 2243 UT.  
{Maybe infor annmt will run til Dec 31? wb.}  
(Carlos Goncalves-POR, dxld Dec 6)

765 kHz farewell party. On 5 Dec 2010, 1900-2300 UT. Farewell special program of Option Musique Lausanne on MW 765 kHz from Sottens MW site. Sottens last day, RSR Lausanne closed forever Sun Dec 5 at 2300 UT ...  
Report on homepage

(Douglas Kaehler-D, A-DX Dec 5)

SWITZERLAND 765? Voice of Russia interested in Swiss MW outlet.

Voice of Russia signalled its interest in using a mediumwave frequency in Switzerland. They're the only interested broadcaster at all.

<<http://www.kleinreport.ch/news/voice-of-russia-hat-interesse-an-schweizer-mittelwellenfrequenz-62434.html>>

No further details given. Most obvious candidate would be the 765 kHz transmitter in Sottens which SRG/SSR will leave this Sunday (Dec 5) at 2259 UT. There should be no obstacles, others than in the field of broadcasting regulation, to firing it up again with another program input.

558 kHz could be possible, too, I think it was not too long ago that this transmitter showed signs of live and was on air with a test tone. Beromuenster could be difficult due to all the EMV hassle and hysteria there, although it was kind of a welcomed excuse for cancelling 531 kHz.

While looking up the matter I found this collection of pictures and recordings from Swiss broadcasting history, featuring also the Schwarzenburg, Beromuenster and Sottens shortwave facilities:

<[http://www.sarganserland-walensee.ch/radio\\_tv\\_historisch/index.htm](http://www.sarganserland-walensee.ch/radio_tv_historisch/index.htm)>

--- [later] The Mt Ceneri (rather Cima di Dentro) 558 kHz transmitter is probably still kept in operational condition, some time ago apparent tests with a tone have been observed.

(Kai Ludwig-D, dxld Nov 29)

- yes 765 kHz channel would be the best MW channel in central Europe, towards southwest France, Spain, Portugal. Beromuenster 531 kHz is silenced for ever. Cima di Dentro from Swiss Tessin 558 kHz towards Italy suffers much co-channel QRM. (wb)

TAJIKISTAN 4765 Tajik Radio 1, Dushanbe Yangiyul, 0108-0130, Dec 7, listed Tajik. W announcer w/ talk between "Persian"-like mx selections; fair at t/in; f/out under band noise; pretty much unusable by BoH. (Scott Barbour-NH-USA, DXplorer Dec 7)

USA 5109.67USB WBCQ, Monticello, Maine, at 0115-0340 UT on Nov 22, English ann, rock music, talk. Transmitter problems: Only audible off nominal 5110 kHz and in USB and with distorted audio, 35442. (Anker Petersen-DEN, dswci DXW Dec 1 via dxld)

WINB did have a third frequency, 9355 in the latter part of A-10 for the hours during which Brother Scare had replaced Tony Alamo on weekdays, since BS wanted to be on 9 MHz band instead of 13, but 9265 was supposedly not available between 16 and 21, registered for the long-silent WMLK, but WMLK if on would take Saturdays / Sabbaths off according to doctrine, the opposite of Brother Scare's, so BS did you 9265 thru midday Saturdays only. The substitute frequency started off being 9335, but after several weeks, WBCQ complained of adjacent QRM to 9330, so WINB was persuaded to move to 9355. WINB had waited a full year after his conviction until July 2010 to cancel Tony Alamo. Is that unclear?

I had not reconfirmed 9355 in B-10, but assumed it would still be in use. However, checked at 1919 UT Dec 8, 13570 is on, not with BS, but with the androgynous anapaestic preacher, i.e. Global Spirit Proclamation. Not on 9355, which had a weak signal from something else.

At 1957 I check 13570 again to catch a frequency change announcement, but it is already off. So I then start monitoring 9355 and other frequencies around there. WINB never shows up; 9355 at 1958 has YFR IS, mixing with something else, i.e. IBB Saipan. At 2000 YFR starts Romanian from Okeechobee, tho quite weak here.

At 2002 I check 13570, and now it is back on, not with BS but with more of GSP!

Undated SW schedule page from Overcomer Ministry Dec 8 shows:

<<ftp://www.overcomerministry.org/RadioSchedule/Short%20Wave%20Radio.html>>

WINB 9355 11Am-12 & 2Pm-4Pm Mon-Fri

i.e. EST, which in UT now would be 16-17 and 19-21 Mon-Fri.

However, neither TOM nor WINB may have adjusted for the one-hour time shift post-EDT, which ought to put the BS hours to 17-18 and 20-22 UT M-F.

Furthermore, we have now confirmed that TOM/BS is no longer on WINB before

or after 2000 UT, so they don't need to use a frequency other than 13570.  
How about the 17-18 UT hour? Gone too?

Of course there is a third frequency unintentionally,  $18530 = 2 \times 9265$ .  
Same wobbly transmitter probably also harmonicizes on  $27140 = 2 \times 13570$ ,  
if it would only propagate.

Consulting the long-outdated WINB program schedule at  
<<http://www.winb.com/schedule.htm>> will only cause needless confusion.  
(Glenn Hauser-OK-USA, dxld Dec 8)

USA [and non] Cold War Radios blogspot (RFE/RL in particular).  
Graeme Stevenson on the swgold group alerted me to the Cold War Radios  
blogspot.

It's the blog of Richard H. Cummings, former Director of Security at Radio  
Free Europe/Radio Liberty in Munich Germany. Author of "Cold War Radio:  
The Dangerous History of American Broadcasting in Europe, 1950-1989" and  
"Radio Free Europe's 'Crusade for Freedom': Rallying Americans Behind  
Cold War Broadcasting, 1950-1960".

He started the blog on November 26 this year and there are already 32  
entries.

<<http://coldwarradios.blogspot.com/>>  
(Mike Barraclough-UK, BrDXC-UK Dec 8)

UZBEKISTAN 9500 CVC Tashkent, at 1147-1202 UT on Dec 6, listed Hindi.  
W announcer w/ talk, sounded like listener call-in prg, between Bollywood  
style mx; ID announcement at ToH; CVC promos; fair & battling for  
dominance w/ co-channel CRI China.  
(Scott Barbour-NH-USA, DXplorer Dec 7)

#####

Five new Klingenfuss products for 2011: All advance orders have been  
shipped!

Dear friends,

all new products for 2011

- 2011 Super Frequency List on CD
- 2011 Shortwave Frequency Guide
- 2011/2012 Guide to Utility Radio Stations
- 2011 Frequency Database for the PERSEUS Software-Defined Receiver
- 1997-2010 Digital Data Decoder Screenshots on CD

have been published by 4 December. We've worked around the clock and  
hundreds of advance orders have been mailed by Monday 6 December,  
i.e. well in time for the Christmas holiday and radio monitoring  
season. Enjoy!

Please note that we did NOT increase our prices for 2011.

Since Larry Magne's Passport to World Band Radio has been  
discontinued in 2009, our 2011 Shortwave Frequency Guide remains the  
only international handbook that gives you full schedule details for

each entry in the unique broadcast frequency list, e.g.

4824.4 - La Voz de la Selva - Iquitos - PRU - 01.00-03.00 -  
Sp - dom - Mon-Sat

On our updated website  
<[www.klingenfuss.org](http://www.klingenfuss.org)>

you can download full A4 size PDF sample pages of our latest printed products as well as the new 2011 catalogue, plus detailed product descriptions, sample pages, screenshots, and a list of dealers worldwide - from Australia to the United States of America! Alternatively, you may ask for our free 24-pages 2011 printed catalogue to your postal address.

The 2011/2012 Guide to Utility Radio Stations is the 26th edition of this standard reference book for both professional HF radio monitoring services and non-professional radio listeners worldwide.

Deadline for the very latest 2011 broadcast schedules published in the brandnew Shortwave Frequency Guide was on 20 November 2010. Unlike traditional publications in this field, our clear layout and new typeface provides for excellent legibility. See the brandnew PDF sample pages on our comprehensive webpage!

Apart from the usual up-to-date broadcast and utility station and schedule databases, the 2011 Super Frequency List on CD now covers 418 fascinating new digital data decoder screenshots from professional HF stations around the globe.

Our product Digital Data Decoder Screenshots on CD now covers more than 7,800 (seven thousand eight hundred!) digital data decoder screenshots from 1997 to today, essentially produced with WAVECOM equipment. Feed your Windows PC with this CD, and the "slide show" will keep you busy for a few days - or weeks!

WAVECOM W-CODE is a software decoder with inputs identical to the famous W61PC. It allows seamless integration with SDR (Software-Defined Radio) receivers with IQ data or digital audio outputs, and provides all functions required to analyze, decode and process data communications throughout the complete radio spectrum (HF, VHF, UHF, SHF). RADIXON's Excalibur or MICROTELECOM's Perseus and the W-CODE make a real dream team!

The W-CODE and W61 series of Digital Data Analyzer and Decoder products are clearly targeted at the professional market. Typical applications are manual or automated monitoring of radio communication transmissions in the HF + UHF + VHF + SHF + satellite bands, SIGINT, and signal analysis and classification. The superb new software cracks 200+ modes with worldwide leading technology. Detailed information can be found on our website and in the printed

brochure available upon request.

As precisely predicted by ourselves - and by nobody else! - already 10 years ago in 2000, HF e-mail continues to spread rapidly and has developed into the major application of modern digital HF techniques that we have marketed - and used! - for years.

After Hurricane Katrina, the Indian Ocean Tsunami, and the Haiti Earthquake, Lesson #1 says: Forget about satphone, BPL, cellphones, e-mail and Internet. HF radio is vital!

Best wishes, Joerg Klingenfuss

ASCENSION ISL [to SUDAN] 17700 via Ascension, South Sudan Radio Service, \*1559-1610 UT on Dec 12, sign on with local music and opening Arabic ID announcements along with contact information. Arabic talk. Good. (Brian Alexander-PA-USA, DXplorer Dec 12) except Fridays, wb.

Growing new African country.

<[http://en.wikipedia.org/wiki/Southern\\_Sudanese\\_independence\\_referendum,\\_2011](http://en.wikipedia.org/wiki/Southern_Sudanese_independence_referendum,_2011)>

BRAZIL 9588.05 at 0424 UT, Radio Globo, Sao Paulo well off nominal 9585 kHz with preacher in Portuguese, 'Voz de Liberacion' [sic] promo at 0433 // 9564.97 kHz on Nov 26.  
(Bryan Clark-NZL, Dec NZ DXT direct and via dxld)

QSL received 15190, Radio Inconfidencia, Belo Horizonte. I have received a snail mail QSL card from this station with full data, after I send a reception report via e-mail to the station. The report was sent October 16 and the reply arrive December 10. V/S Marcus Starling, Technical Director of the Station.

E-mail: <diretoria @ inconfidencia.com.br>

Postal address:

Radio Inconfidencia  
Av. Raja Gabaglia, 1666 - Luxemburgo  
Belo Horizonte - Minas Gerais - Brazil - Cep: 30441-194  
(Manuel Mendez-ESP, dxld Dec 16)

BRAZIL I'd to share with you two QSLs (PPCs) I received today, both Brazilian stations from the state of Parana, Super Radio Deus e Amor (Curitiba) and Radio Difusora (Londrina):

4815 kHz - Radio Difusora de Londrina. Londrina/PR  
Recebido cartao QSL (PPC), 40 dias, V/S: ilegivel. IR enviado por correio, com PPC e SASE. QTH: Radio Difusora de Londrina, Rua Sergipe, 843 - Sala 05 - andar 1 - Centro, Londrina - PR 86010-380, Brazil.

6060 kHz - Super Radio Deus e Amor, Curitiba/PR  
Recebido cartao QSL (PPC), 40 dias, V/S: ilegivel. IR enviado por correio, com PPC e SASE. QTH: Super Radio Deus E Amor - Rua Joao Negro, 595 - 3o andar Centro, Curitiba / PR 80010-200, Brazil.

Super Radio Deus e Amor's verifier has signed my PPC, but he hasn't stamped it. He wrote instead "We were without card and stamp at the moment of signing, thank you for hearing". I'd like to ask you to have a glance at it in

<<http://pqslfabricio.blogspot.com/>>

and please comment if you think this is or not a valid QSL.

QSL Super Radio Boa Vontade 6160 kHz - Super Radio Boa Vontade, Porto Alegre/RS. Recebido cartao QSL (PPC), com breve carta escrita no verso do PPC + Lembranca dos 18 anos da Rede Boa Vontade de Radio, 10 dias. V/S: Vera Carpes Quednau, coordenadora de programacao. IR enviado por correio,

com PPC e SASE. QTH: Legiao da Boa Vontade (LBV) - Super Radio Boa Vontade  
- Av. S Paulo, 722 Navegantes/S Geraldo - Porto Alegre - RS, 90230-160,  
Brazil.

(Fabricio Andrade Silva-BRA, dxld Dec 15)

9565 kHz. Super Radio Deus e Amor, Sao Paulo; Brazil.

9564.958 // 11764.961 kHz. Super Radio Deus e Amor, Sao Paulo - Brazil um  
2206 UT mit S=2/3. Die untere Freq. kommt etwas besser herein.

Rx: Perseus. Ant: 30m LW / ALA 1530. QTH: Wilhelmshaven.

(Ingo Hell-D, A-DX Dec 17)

CHAD 6165 at 0514 UT, Ndjamena good & clear with French news, followed  
by program promos, ident as 'Radio Nationale' Nov 26. Excellent at 0530 UT  
on Nov 28 at 0530 UT when drum interval signal played and identification  
in French. Ident as 'Radio Chad' heard this day.

(Bryan Clark-NZL, Dec NZ DXT direct and via dxld)

CHILE B-10 for Voz Crista La Voz via SGO=Santiago-Calera de Tango:

Portuguese to Brasil

1800-2000 17860 SGO 015 kW 045 deg DRM

German to Brasil

2300-2400 9835 SGO 050 kW 045 deg

(R BULGARIA DX MIX News, Ivo Ivanov, via wwdxc BC-DX TopNews Dec 13)

COSTA RICA/UNIDENTIFIED 5954.24 at 0907-0944 UT, Dec 11, Spanish on-  
the-spot reports, only very little music interspersed. Freq was clear  
after R Netherlands had left 0900 (Sat only) UT, WYFR on 5950 kHz kept  
fairly quiet, no drift at all. This wouldn't be R Republica on extended  
schedule via ELCOR transmitter?

(Martien Groot-HOL, dxld Dec 11)

5954.2, approx., R. Republica at 0707 UT on Dec 14, Spanish discussion.

Bad het with 5955.0 kHz, presumed RNW via Portugal. Still no jamming in  
this extended schedule. I have concluded that I must have misinterpreted  
my previous frequency measurement of 5954.9 kHz, using my indirect het-  
comparing method, as the lower frequency is the usual spot for RR, and  
it's also reported by others, such as Martien Groot, Netherlands, Dec 11  
as late as 0907-0944 UT on 5954.24 kHz, altho unID.

(Glenn Hauser-OK-USA, dxld Dec 14)

CUBA on 6 frequencies at 0730 UT. Habana heute morgen wieder auf  
6 Frequenzen zu hoeren. Dez/Jan ist halt Saison hier bei uns fuer diese  
lateinamerikanischen Signale aus CUB und MEX 6185 auch.

6050 S=7-8

6060 S=9+20dB

6150 S=9+20dB

6039.90 100 Hz OFF frequency, mit einer Brummstoerung der Interferenz mit Belarus 6040.00 kHz.

5040 S=9+20dB, Nachrichten um 0729 UT, 100 kW.

A Muckesaেকে schwaecher, Rebelde auf 5025 kHz mit S=9+10dB, only 50 kW.  
(wb, wwdxc BC-DX TopNews Dec 15)

What's become of English overruns past 0700 UT on some unpredictable RHC 49mb channels? Dec 14 at 0703 UT they are all in Spanish: 6050 kHz best; 6060 much weaker; 6120 with usual bad audio plus CCI from RNW Dutch via VATICAN; 6150 undermodulated and squealing; plus 5040 kHz good.  
(Glenn Hauser-OK-USA, dxld Dec 14)

CUBA 3365 / 5025 / 5040 kHz.

Cuba at this moment has not one, but two transmitters operating regularly on the Tropical Bands ... 60 meters 5025 R Rebelde and 5040 R Havana Cuba...

Both are using Near Vertical Incidence Skywave antenna systems designed and built by us for optimizing the coverage of the Cuban archipelago. Power of the transmitters are 50 kW for R Rebelde and 100 kW for R Havana Cuba. Both frequencies are properly registered with the ITU, Geneva.

We may soon start a test transmission on the 90 meters band, that is pending the availability of an antenna capable of operating on that band. The frequency may very probably be 3365 kHz, as it was already registered with the ITU for use by R Rebelde. But in the tests will be done with the R Habana Cuba programs. I am now reviewing the time segment for the tests, that will probably be between 0200 and 0600 UTC.  
(Arnaldo Coro-CUB RHC, Dec 04; via dswci DXW Dec 16)

All other big broadcaster register on the private organization HFCC meetings, but Arnie Coro reports to ITU Geneve list instead ... which is less significant. (wb)

ERITREA 7175 at 0356 UT, VOBME Asmara vgd Nov 24 with tuning signal and repeated idents in local langs. 2 // freqs this day - 7120.04 and 7185.03 kHz, both at poor level. News bulletin on the hour. Eritrea has been free of Ethiopian jamming since mid-November.  
(Bryan Clark-NZL, Dec NZ DXT direct and via dxld)

ERITREA/ETHIOPIA Today, Sunday Dec. 12, I tried to find out what the weak signal audible on 7165 recently could be. I believe Ethiopia was on 7235 and approx 9559.9 kHz, the latter signing off around 1801 UT, the other one QRMed and inaudible at 1800. I found the three carriers on 7165, 7120 and 9700 kHz signing off one-by-one at 1803 UT in intervals of approx. 10 seconds. 7120 and 9700 kHz recently used by ERI // 7175 kHz as we know, but unable to make out any audio today. But probably 7165 kHz is another weak ERI transmitter. No chance to find out if 5955 kHz was also on. Besides: I have not heard any noise jamming recently on any of these channels nor frequency changes of the ERI transmitters.

Today Monday 13, the same pattern with the three carriers on 7165, 7120, 9700, kHz s/off in this order, but approx. 30 seconds later than yesterday. 9700 kHz was definitely // 7175 kHz, the others too weak to figure out some audio within all that local noise.  
(Thorsten Hallmann-D, <<http://africalist.de.ms>> dxld Dec 13)

FRENCH GUIANA Frequency change of Disco Palace and TDP Radio in DRM mode:

2000-2200 NF 17755 GUF 100 kW 311 deg to NoAM, x15755 BON 100 kW/320 deg  
(R BULGARIA DX MIX News, Ivo Ivanov, via wwdxc BC-DX TopNews Dec 13)

GERMANY 576 Sudwestrundfunk to close medium wave transmitters?

Based on my limited understanding of German and google translate it seems that Sudwestrundfunk may be closing all its medium wave transmitters by the end of next year.

Sudwestrundfunk will be closing all mediumwave transmitters by the end of next year 2011. Transmitters listed here, includes high power ones on 576, 666 and 1017 kHz:  
<<http://www.dxaktuell.de/?p=1355>>

German press item here includes video report from the Muehlacker 576 kHz site which has been in use since 1930:  
<[http://www.pz-news.de/Home/Nachrichten/Muehlacker/arid,238008\\_puid,1\\_pageid,87.html](http://www.pz-news.de/Home/Nachrichten/Muehlacker/arid,238008_puid,1_pageid,87.html)>

Annual mains electricity cost of station is 380.000 Euro.

Could German speaking list members say whether I have understood this correctly please as if so will be of interest to other lists and messageboards I use.  
(Mike Barraclough-UK, dxld Dec 16)

Mike, the translation IS CORRECT.

Muehlacker mediumwave TX location since Nov 1930 year will remain only as a single FM tx installation and fm+tv transmitter engineer central service point for SWR tx in south western Germany.

At present the station needs 380.000 EURO main power costs anually.

9 engineers still work as bcng and maintenance central point at present.

In the 60ties the Muehlacker station had its peak power with SDR and AFN Stuttgart location, served by 69 employees and engineers. This figure given on a recent sightseeing tour in April 2010, when I visited the tx stn for the fourth time in past 40 years.

Google Earth shows still the old SW 6030 kHz shortwave dipol, in north-south lobe azimuth direction.

SWR 6030 576 kHz Muehlacker  
48 56 29.26 N 08 51 08.64 E

<[http://maps.google.de/maps?f=q&source=s\\_q&hl=de&geocode=&q=48%C2%B056%2729.26%22N++08%C2%B051%2708.64%22E&sll=51.151786,10.415039&sspn=19.808511,57.084961&ie=UTF8&ll=48.941678,8.851569&sfn=0.005053,0.013937&t=h&z=17](http://maps.google.de/maps?f=q&source=s_q&hl=de&geocode=&q=48%C2%B056%2729.26%22N++08%C2%B051%2708.64%22E&sll=51.151786,10.415039&sspn=19.808511,57.084961&ie=UTF8&ll=48.941678,8.851569&sfn=0.005053,0.013937&t=h&z=17)>

(Dragan Lekic-SRB, dxld Dec 16)

So wie angedacht wird es werden: wenn zur IFA Berlin im September 2011 die DAB+ Kette mit den ersten 27 Standorten in der Bundesrepublik in Betrieb geht, wird Ende 2011 das gesamte MW Netz des SWR dicht gemacht.

Die diskutierten Fragen sind nur ein Fauxpass des Herrn Rundfunkrates bzw. der limitierten Sachkenntnis von Journalisten der Pforzheimer Zeitung geschuldet, das sind nur Kleinigkeiten.

Es ist eine klare Line erkennbar, die ja Afunker Johannes DL5KAZ im SWR beruflich begleitet hat:

- Ausarbeitung des neuen ARD DAB+ Konzepts in 2005.
- WARConference 2007 in Genf, mit Abstimmung der hoeheren Sendeleistungen und Abstands-Parameter zu den Nachbarstaaten.
- DRM Totengesang, auch fuer die Mittelwelle.
- Eine neue DAB+ Kette auf den ARD- und Telekom-Masten sind hinkuenftig zu errichten.
- das kann bis Weihnachten 2011 geschehen sein.

Und die Nachbarn in Neckar-Sulm liefern die Audi A5 dann mit neuem DAB+ Autoradio aus ! Das kurbelt die deutsche Wirtschaft an. Ha, ha, ha.

(wb, wwdxc BC-DX TopNews Dec 16)

Richtig, das sollte man nicht bei den Oeffentlichen allzu hoch haengen. 'Man' uebertraegt ja auch z.B. jede Funzel-Festspiele fuer Neue Musik, oder haelt sich bei einigen der dubiosen Personalkosten auch nicht zurueck.

Nur die Technikkosten, wie jetzt wieder die Mittelwellekosten, werden wie eine Monstranz vor sich her getragen, und koennen 'sich' nicht wehren.

Meist sind es Arbeiten, die auch sonst - irgendwann mal aus der Situation heraus - zur Bestandserhaltung getroffen wurden, sowie vormals vom Rundfunkrat genehmigt wurden.

Der olle Telefunktensender aus den 80zigern in Muehlacker litt in den vergangenen 10 Jahren zunehmend unter Ersatzteil-Liefermangel. Somit hat man vor circa 4 Jahren zum Bestandserhalt einen Transradio Sender - Made in Berlin - ohne DRM Modulator - fuer die MW Muehlacker bestellt. Zu dieser Zeit glaubte ja eine andere Technische Direktion in Bonn noch heiss an die Einfuehrung von DRM zum Bestandserhalt der Kurzwellensendungen.

Der Transradio TRAM Sender wurde im Herbst 2009 geliefert und ist seit Mai 2010 auch wechselseitig mit dem kanadischen Nautelsender - wochenweise in Betrieb.

Das Ganze kann man auch als Pushen der neuen bundesweiten DAB+ Senderkette verstehen, nachdem man das erfolgreiche Wortprogramm ContRa nicht mehr in das ausgequetschte UKW-Netz pressen konnte.

Das ist ja alles genau durchgespielt und nicht gerade neue Kost: wenn denn bundesweit auch die nationalen Programme (zur Zeit nur gnaedig zu 70% technisch zu hoeren) bis 2016 bundesweit durchgaengig auf DAB+ hoerbar sind, koennen zum Jahreswechsel 2017 alle MW- und LW-Masten umgeschubst werden.

Dann ist man einige Jahre spaeter auf dem technischen Stand, der in der Schweiz und Suedtirol schon jetzt nationenweit hergestellt wurde.  
(wb, wwdxc BC-DX TopNews Dec 17)

Oliver Schmidt aus dem Radioforum hat heute Mittag "mit einer sehr netten Dame von SWR Cont.Ra gesprochen". Ich zitiere ihn hier:

Die Meldung der Pforzheimer Zeitung ist definitiv nicht korrekt.

- korrekt - Der SWR wird seine Mittelwellensender bis Ende naechsten Jahres abschalten.

- korrekt - SWR Cont.Ra bleibt bestehen und wird weiterhin ueber DAB bzw. spaeter ueberwiegend und als Hauptstandbein via DAB+ ausgestrahlt.  
(Bernhard Weiskopf-D, A-DX Dec 17)

90 years of radio broadcast from Koenigs Wusterhausen, Germany.  
Repeat of the historical christmas concert of 22 Dec 1920 via  
Radio 700 Euskirchen, tx Kall 6005 kHz at 1300 UT Dec 22, 2010.

Programmtipp: 90 Jahre Rundfunk aus Koenigs Wusterhausen,  
Vor 90 Jahren, am 22.12.1920 begann in Deutschland der Rundfunk mit dem  
Weihnachtskonzert aus der Funkstelle Koenigs Wusterhausen.

Als Erinnerung daran veranstaltet die Stadt Koenigs Wusterhausen in  
Zusammenarbeit mit dem Foerderverein "SenderKW" e.V.

am 18. Dezember 2010 15:00 Uhr MEZ/CET eine Neuauflage dieses  
Weihnachtskonzerts.

Kuenstler:

Ingrid Raack

Hoerspielgruppe Bredow Schule

Siegfried Uhlenbrock

Theatergruppe Schiller Gymnasium

Lutz Jahoda

Kinder und Jugendchor Eichwalde

Moderation:

Ralf Schuricht, Lutz Hoff

Maschinensaal Senderhaus 1

Funkerberg Koenigs Wusterhausen

Die Veranstaltung wird mitgeschnitten und laeuft stilecht in  
Amplitudenmodulation

ueber den Sender Kall-Krekel

am Mittwoch, 22.12.2010 ab 14 Uhr,

also zur originalen Sendezeit des ersten Konzertes.

Es sind noch 2-3 Wiederholungstermine an den Weihnachtstagen vorgesehen.  
Ueber Sendezeiten und Frequenzen werden wir noch informieren.  
SONDER-QSL ist in Vorbereitung.

90 Jahre Rundfunk aus Koenigs Wusterhausen.  
Als am 22. Dezember 1920 auf dem heutigen Funckerberg in der Rundfunkstadt  
Koenigs Wusterhausen erstmalig ein Weihnachtskonzert ausgestrahlt wurde,  
durfte den Beteiligten nicht bewusst gewesen sein, welche historisch  
bedeutende Leistung sie vollbrachten. Im Sommer 1920 hatten sie begonnen,  
in der Hauptfunkstelle der Deutschen Reichspost Sprache und Musik per  
Funkwellen zu uebertragen. Im Ergebnis dieser Versuchsreihe wurde am  
22. Dezember 1920 erstmalig in Deutschland ein Weihnachtskonzert  
gesendet. Seit diesem Tag gilt Koenigs Wusterhausen als die Wiege des  
Rundfunks in Deutschland.

Aus Anlass des historischen Ereignisses findet am 18. Dezember 2010 eine  
Festveranstaltung "90 Jahre Rundfunk aus Koenigs Wusterhausen" statt.

Ganz in der Tradition der ersten Rundfunksendung von 1920 wird im  
diesjaehrigen Weihnachtsprogramm live gesprochen, gesungen und musiziert.  
Den Veranstaltern ist es gelungen, fuer das diesjaehrige Jubilaem ein  
ganz besonderes, Generationen uebergreifendes Programm zu gestalten.

Die Zuschauer koennen das erste Weihnachtskonzert nacherleben, die  
Produktion eines Hoerspiels ueber die Rundfunkwiege beobachten und  
natuerlich Musik der zwanziger Jahre geniessen. Wie dann die Bruecke in  
die heutige Zeit geschlagen wird - das wird an dieser Stelle noch nicht  
verraten.

Fuer alle Radiofreunde, die nicht vor Ort dabei sein koennen, bieten der  
Foerderverein "SenderKW" und Radio 700 ein ganz besonderes Highlight.

Am 22. Dezember 2010 um zwei Uhr Mittags wird, exakt 90 Jahre nach dem  
ersten Weihnachtskonzert, auf Kurzwelle 6005 kHz das Weihnachtskonzert  
amplitudenmoduliert und in voller Laenge Europaweit uebertragen. Weitere  
Wiederholungstermine sind an den Weihnachtstagen geplant.

GERMANY Deutsche Welle, at one time, sent me all sorts of NEAT STUFF over the years when I used to monitor their North American broadcasts for them. I got a CD player, a briefcase, DW towels, believe it or not, various folk music CDs, stickers, posters and whatnot. But the best swag from DW I loved was a two CD set of interval tunes. They were cute, amazing, mesmerizing, sometime cases insipid and not worth the bandwidth.

I did have some favourites, however. One of the best was Radio Yugoslavia's (and they don't exist any more). It was long, almost a minute, catchy and wistful at the same time.  
(Sue Hickey-NF-CAN, CIDX Forum, Dec Messenger via dxld)

11955, R Sadaye Zindagi, via Wertachtal, verified an electronic report to Media Broadcast with an electronic reply in 1 day from Walter Brodowsky, TDF Group SW Project Leader and Key-Account & Product-Manager SW. Walter indicated they were using a 250 kW transmitter in combination with a High gain curtain antenna system HR 4/4/0/5 from Wertachtal using an antenna azimuth of 90 degrees.

This is a new broadcasting service from Bible Voice Broadcasting that commenced on Nov 12, 2010. The origin target area is Afghanistan and he mentioned it was amazing that I was able to pick up the back-beam of the signal in North America in such good quality.  
(Rich D'Angelo-USA, dswci DXW Dec 16)

17485, Hamada Radio International, new Hausa service via Radio Miami International, via Wertachtal, GERMANY: Monday Dec 13 at 1427 tune-in, S=9+10, fair with fading, talk in Hausa, ID in passing, bit of music, silence until a fitful tone at 1430\* UT. The 1400-1430 broadcast is M/W/F only. I've seen few other reports of this, unlike the feeding frenzy by DXers upon R. Free Sarawak; wonder why?

Jeff White has already promised me a QSL. The identity of this and its two other transmissions is still absent from the WRMI website  
<[http://www.wrmi.net/pb/wp\\_d12a1732/wp\\_d12a1732.html](http://www.wrmi.net/pb/wp_d12a1732/wp_d12a1732.html)>  
where there is no mention of Hamada at all.

QSL card received in the P-mail Dec 13 for Hamada Radio International; had sent e-mail report to info @ wrmi.net Face of the card has nothing to do with H.R.I. but promotes 2011 NASB-DRM USA Annual Meetings, next May's Miami-Bahamas Cruise, with map, views of the ship's deck, meeting rooms, stateroom.

Jeff White, v/s filled in details on the reverse: Dec 8, 2011 [oops; unfortunately, postmark illegible proving it was 2010], 1422-1430, 17485, Wertachtal, Germany, Hamada Radio International.

GREECE Strike at Voice of Greece has led to their playing nothing but continuous music, no announcements that I have ever heard, and it's not the usual Greek music, but mostly classical. Others have reported jazz. This was first noted here around 0630 UT on 7475 kHz and 1430 UT on 9420 kHz Dec 15 with classical; thought it rather strange.

Also still the case Dec 17 at 0634 with a violin concerto, good on 7475 and 9420, 0636 segue to a Hungarian Dance on violin and piano. At 1433, 9420 had good signal strength but fluttery, now with Broadway music, 1435 UT no announcement, on to Bernstein; only poor on // 15650 at 1443. John Babbis sends a story from Xinhua:

Violence again erupts during general strike in Athens (2)  
09:01, December 16, 2010 [including:]

"Local television and radio channels, Internet news outlets, and the national news agency also did not broadcast news as journalists joined the strike along with taxi drivers and lawyers...

I think that this is the Mother of all Greek strikes and is slated to last all week. I am sure that everybody at ERA5 has walked out, leaving the Managers to hire strike-breakers with their albums of American music, etc. The radio employees are also hired by the state.

On November 30, journalists staged a nationwide strike to protest wage cuts and layoffs. Last week public transport workers struck, leading to the network grinding to a halt in Athens. This week refuse workers, air traffic controllers, bank staff, state-television employees and rail workers are scheduled to strike in separate disputes."  
(Glenn Hauser-OK-USA, dxld Dec 17)

INDIA 4775nominal 12 Dec 2010 at 1125 UT, AIR Imphal noted on 4755 instead of scheduled 4775 kHz, must be another punching error. ID at 1130 UT followed by Christmas carols.

[later] AIR Imphal on 4755 kHz. Today (13 Dec 2010) morning also AIR Imphal continued on 4755 kHz. So they switched off tx after the night transmission and switched it on in the morning without checking the frequency.  
(Jose Jacob.IND VU2JOS, DXindia Dec 12/13)

Still on 4755 kHz, at 1515 UT Hindi news by OM.  
(Alokesh Gupta-IND, DXindia Dec 13)

[KASHMIR] 4950 R. Kashmir Srinagar, \*0122-0213\*, Dec 13. Open carrier/tone noted at 0118 UT tune in; their sign on/off times vary as much as 4 to 5 minutes; even the format varies some; because of the later sign on time today they did not play the national song ("Vande Mataram") after the AIR IS; mostly played pop subcontinent songs; had two segments with series of what sounded like ads; went off the air suddenly; audio seemed rather distorted; best in USB due to Angola carrier; slowly fading down after 0200 UT. Only possible for me in the wintertime.  
(Ron Howard-CA-USA, DXplorer Dec 13)

Orissa becomes Odisha.  
The Lok Sabha Tuesday cleared legislation seeking to rename Orissa as Odisha and the language spoken in the state as Odia from Oriya.

The bill to alter the name of the eastern state was introduced in this year's budget session and was passed on the first day of the month-long winter session by electronic balloting.

MPs overwhelmingly supported the constitutional amendment bill to do away with the legacy of British name given to the state.

The central government had received a proposal from the Orissa government in 2008 after the state assembly moved a bill to change both names in deference to the manner in which the name of the state is pronounced in the local language.

The state is called Udisa in Hindi and Orissa in English, and the language Udiya in Hindi and Oriya in English as per the constitution.

This required an amendment to the constitution and had to be approved by two-thirds majority of the house.

Home Minister P. Chidambaram, who moved the bill, said the house was honouring the wishes of the people of the state by clearing the

legislation.

Many Indian cities and states have been renamed after independence, including Kanpur (formerly Cawnpore), Thiruvananthapuram (Trivandrum), Mumbai (Bombay), Chennai (Madras), Kolkata (Calcutta), Pune (Poona), Kochi (Cochin) and North-East Frontier Agency (NEFA) to Arunachal Pradesh.

JORDAN 15290 Radio Jordan. at 1155-1231\* on Dec 12. Thanks Glenn Hauser tip, not here at 1150 UT check, but already on at this re-check with Arabic vocals, 3 + 1 time sounder 1200 UT, Arabic male ID, orchestral fanfare, world news till fanfare again at 1214 UT, "Huna Amman" into brief Qur'an recital, then instrumental strings and then Arabic pop vocals. Abruptly off 1231 UT. Why such brief use of a decent channel? Voice of Turkey in Turkish blowing in with nice Turkish music on 15350 same time, and something weak at 1405 UT check on 15140 kHz, maybe Radio Sultanate of Oman in their English hour, but just too weak in terrible local noise to tell. Chimes at 1429 UT.

(Terry Krueger-FL-USA, dxld Dec 13)

Amman noted still in progress on Dec 14 at 12 to 12.30:10 UT cl-down at S=9+15dB level in Germany. (wb)

KAZAKHSTAN Additional txion of WYFR Family Radio from Dec 13:

NETHERLANDS Dutch parliament backs motion on Radio Netherlands Worldwide.

The Lower House of the Dutch parliament has backed a motion from the social-liberal party D66 calling on the government to conduct an investigation into the viability of Radio Netherlands Worldwide (RNW).

The motion notes that the role of RNW has been partially overtaken by technological developments. Parliament now wants the government to investigate what tasks should be scrapped and what tasks can be transferred to other existing organisations.

#### Foreign Affairs

In response, the minister responsible for the media, Marija van Bijsterveldt, said that the government sees the motion as "support for its policy." Earlier it was announced that RNW will in future be financed from the budget for Development Cooperation, under the Ministry of Foreign Affairs. Currently, RNW is funded by the Ministry of Education, Culture and Science. The transition should take place in 2013. "Before the summer of 2011, the Cabinet will inform the House how RNW and its tasks will be shaped," said the minister.

The coalition agreement states that RNW should focus on its core business, without defining precisely what that is. The current tasks, included in the media law, are: informing Dutch nationals abroad, the provision of independent information in countries with limited press freedom, and presenting a realistic picture of the Netherlands for people abroad.

#### Confident

The management of RNW is confident about the future. Editor-in-Chief Rik Rensen said: "The vast majority of our journalistic activity is focused on

foreign countries. We operate in ten languages and thus cover large parts of the world where people are desperate for our information. And as it happens, the Dutch economy is almost entirely dependent on foreign countries."

RNW's Director-General Jan Hoek welcomes the review, saying "It's good to investigate how public money is being spent". Mr Hoek disagrees with the claim that the internet has rendered Radio Netherlands Worldwide superfluous: "In our country nearly all of us are connected to the internet, but it's different on a global scale. Internationally just 28 percent of the world's population has access to the internet."  
(Media Network Newsletter, By Andy Sennitt, 16 Dec 2010)

NIGERIA 7275 Nachdem in den letzten Tagen Versuche negativ verliefen, ist heute ein duennes Signaelchen aus Abuja mit AM Sync zu hoeren, die Sprache scheint ein Vernac mit Franzoes. WeAF Klang zu sein. 0713 UT am 11.12.  
(wb, wwdxc BC-DX TopNews Dec 11)

Re 7275 Abuja. 7275 Abuja regional stn was on air today Dec 11, noted around 0700-0720 UT, tiny S=2-3 signal, rx in AM-sync mode.  
Re Channel 7275 was empty on Dec 9th at 0645-0720 UT.

Similar strength also VoNIG on 9690 kHz in Hausa at 0815-0830 UT, Dec 11.  
(wb, wwdxc BC-DX TopNews Dec 11)

NIGERIA 7255 Voice of Nigeria, at 1955-2020 UT on Dec 12, tune-in to English news programming. Closing English ID announcements and contact information at 1959 UT. Into French at 2000 UT with talk and local music. Fair to good.  
(Brian Alexander-PA-USA, DXplorer Dec 12)

OMAN 15355 at 0310 UT, Nov 16. Radio Sultanate of Oman at good level with English ident and news headlines. Pop music program relayed from local English language FM channel followed. Strongest I've ever heard this, usually poor signal.  
(Bryan Clark-NZL, Dec NZ DXT direct and via dxld)

15140 Radio Sultanate of Oman, 1430-1445, Dec 12, time pips at 1430 and opening them music. English news at 1431-1440 UT. Weak. Very poor. Not able to make out many program details.  
(Brian Alexander-PA-USA, DXplorer Dec 12)

15140 lousy prop cond today, R Oman En female reader around 1440-1450 UT Dec 13, only S=1-2 just above threshold. Listen to mp3 recording.

Aoki shows 315 degr azimuth, which is straight Stuttgart, London, into off Maine coast, to Florida mainlobe !  
(wb, wwdxc BC-DX TopNews Dec 13)

Radio Oman 15140 kHz good signal today December 13 from tuning in 1420 UT with pop music, 1429 Big Ben chimes and 1430 news in English. 1435 UT "Words in action" - a literary program, followed by pop music. Arabic service started at 1500 UT with news.

SWEDEN Reminder SAQ transmission July 24th 2010.

We will remind you of the Grimeton Radio/SAQ transmission on 17.2 kHz, CW, with the Alexanderson alternator on Christmas Eve, December 24th, 2010 at 08:00 UTC.

We will start tuning up some 30 minutes before message.

There will be no activity on amateur radio frequencies with the call SK6SAQ.

QSL-reports are kindly received:

- E-mail to: [info@alexander.n.se](mailto:info@alexander.n.se)  
- or fax to: +46-340-674195  
- or via: SM bureau

(Lars Kalland-SWE SM6NM, Dec 16)

SWITZERLAND Currently the Sottens transmitter on 765 kHz (local with me) carries a message that says among other things: "L'emetteur de Sottens a cesse d'emettre le 5 decembre a minuit. Option Musique ne s'ecoute donc plus en ondes moyennes", which tansmlates as "the Sottens transmitter has ceased to broadcast on 5 dec. at midnight. Option Musique can no longer be heard on mediumwave.. ."

If the latter part is correct, the first half sounds rather silly. I has NOT ceased to broadcast, since it carries precisely that message. Very funny. No idea how many hours, days, weeks they will carry that loop. It is not clear either whether the station will be dismantled.  
(Remy Friess-FRA, Dec 6, MWC yg via dxld)

Hi to everyone, Sottens will finally shut down transmission by Dec 31, 2010, midnight Central European Time. The loop will last till then.

I have recorded the Dec 5 farewell party with my camcorder on my venerable Panasonic DR28 and am planning to upload it on Youtube someday between Xmas and New Year.

The station should not be dismantled, at least as far I understood from the last 4 hours of broadcast on MW. It is likely to be classified as Swiss national patrimony, similarly to the late Beromuenster MW transmitter (formerly on 531 kHz, shut down in Dec 2008).  
(Philippe, Dec 11, ibid.)

Definitely switch off Option Musique 765 kHz Hi all, I called the Hotline of Option Musique 765 KHz and they told me that the transmitter will definitely switch off on 31th December 2010 at 2300 UTC.

73's Andrea <<http://www.hb9gce.ch>>

(Stumpf Carl Andreas, Confederatio Helveticae, Dec 13, bclnews.it yg via dxld)

Je ne peux plus ecouter Option Musique en ondes moyennes. L'emetteur de Sottens est-il toujours en service?

Le 5 decembre 2010, l'emetteur sera mis hors service. Si vous ecoutez Option Musique en AM (modulation d'amplitude) / OM (ondes moyennes), sur la frequence 765 KHz, veuillez choisir l'une des alternatives suivantes: Option Musique est diffusee en FM en Valais et a Geneve; sur le cable, internet et en DAB+ dans toute la Suisse romande. Ce programme est egalement diffuse par satellite.

Pour beneficier des programmes d'Option Musique en numerique, optez pour une radio numerique DAB+ en vente dans tous les magasins. Branchez votre appareil et il procede automatiquement au réglage des programmes radio. En quelques secondes, vous ecoutez deja Option Musique en qualite numerique, ainsi que nos autres chaines. Plus d'explications sur le site internet radionumerique. ch ou dab.rsr.ch.

Extraido de la web de SRS:

<<http://www.rsr.ch/#/corporate/aide/ecoute/1930348-je-ne-peux-plus-ecouter-option-musique-en-ondes-moyennes-l-emetteur-de-sottens-est-il-toujours-en-service.html>>

(Javier Robledillo-ESP,  
<<http://cuadernodebitacoradx.blogspot.com/>> ibid.)

Salut Javier, Le 5 decembre ont cesse seulement les programmes de Option Musique. Maintenant l'emetteur diffuse un message qui informe que les programmes ont cesse et que Option Musique ne transmet plus en ondes moyennes. Ce message sera stoppe le 31 decembre 2010 a 2300 UTC. Probablement la puissance a ete reduite, car le message est surtout destine aux auditeurs en Suisse qui peuvent recevoir Option Musique sur DAB+.

(Andrea, Dec 15, ibid. dxld Dec 16)

TAIWAN GE Imagery TWN Paochung. MS Virtual Earth, Google Earth imagery. Some high resolution place. VE Update - Google Earth V.5 historical image.

Two new (old) images from 2001 & 2002 era have just been released in GE that provides more details of RTI's Paochung SW TX site (Taiwan).

Unfortunately resolution isn't that great, but at least one can now see the site's SW antenna masts. The 2002 imagery is best. 41 masts visible.  
(Ian Baxter-AUS, SW TXsite Dec 16)

TAJIKISTAN 14295 IARUMS Region 1 Newsletter November 2010 shows again the huge amount of intruders in 7, 14 MHz bands. Also regularly Dushanbe Yangi Yul-TJK 3 x 4765 kHz = 14295 kHz harmonic.

Attached the IARUMS Region 1 Newsletter November 2010. Grateful words to DJ9KR, DF5SX, DJ7KG, and DL8AAM and of course all IARUMS R1-Coordiators for the excellent assistance in 2010!

Many thanks to the German PTT (BNetzA Konstanz) for the great support.

Merry Christmas and a Happy New Year from DK2OM (Wolf) and DJ9KR (Uli)!  
Best regards, DK2OM, Coordinator IARUMS Region 1  
(IARUMS Wolf Hadel DK2OM; via wb, wwdxc BC-DX TopNews Dec 10)

TAJIKISTAN 900 NHK transmissions via TJK "NHK World will start its broadcasts via transmitter in Tajikistan on Dec 15, 2010.  
Frequency is 900 kHz (300 kW, non-directional antenna):

1515-1600 UT - Urdu;  
1600-1630 UT - Russian. Broadcasts in Farsi are also planned".  
<<http://www.dxing.ru/content/view/1335/>>  
(via Aleksandr Diadischev-RUS, dxld Dec 13)

Most likely, brokered by WRN (Sergei S., ibid. dxld)  
900 kHz channel is registered with ITU Geneve for TJK. (wb)

TANZANIA [ZANZIBAR] 6015 RTZ, at \*0258 UT on Dec 6. 0250 UT, start of open carrier; 0254 UT start of test tone; 0258-0259, repetitive xylophone like IS; announcer; 0301 UT, clearly reciting from the Qur'an which seemed to end at 0305 UT; long monologue; tuned out 0338 UT; poor. Unidentified station already on the air before RTZ signed on and tiny bit lower in frequency (possibly in Arabic with Middle Eastern/Islamic music). More of a challenge now that that there is QRM here, but definitely identical format as last heard in Sept-Oct.  
(Ron Howard-CA-USA, DXplorer Dec 6)

THAILAND Winter B-10 schedule of Radio Thailand (HSK9):

UGANDA 4750 Dunamis Shortwave, Mukono, 1833-1902\*, Dec 01, long talk in vernacular, short music religious style at 1842, then talks again mentioning Uganda, 1848 long songs in Afro style, 1859 ID and another song, fair/good. (Giampiero Bernardini-ITA)

4975.97, UBC R, Kampala, 0300-0310, Dec 10, vernacular talk, 23222 CWQRM. (Petersen). Also heard at 1642, Nov 29, African songs, fair to good, in AMS upper mode to avoid Russia on 4975. (Giampiero Bernardini-ITA; all via dswci DXW Dec 16)

UAE 9650 Polish Radio (via BAB/VTC Al Dhabbaya relay). 1804-1859\* Dec 12. Thanks Harold Frodge, Gilles Letourneau and Glenn Hauser logs, clear and good to very good with English magazine-format programming, "You're listening to Polish Radio, broadcasting from Warsaw" at 1837 UT. Closing ID and reggae vocal. (Terry Krueger-FL-USA, dxld Dec 13)

UAE/U.K. UnID Somali station. A lot of Holy Quran sermon singing transmission.

[SOMALIA non] Re new Somali station - RADIO DAMAL.

A Somali-speaking colleague says this new station (see below) is Radio Damal, which describes itself as "the voice of the Somali people" ("odka bulshada Somaliyeed" - this ID is clearly heard). It is based in Nairobi and is said to aim to promote peace, unity and development. One of the presenters used to work for the KBC's Somali service. I will try to find out more, including an address.

I was in Cairo last week and the 11740 kHz transmission was well heard there, opening at 1829:30 UT with Koran recitation. At 1930 UT they have to leave 11740 kHz to make way for VOA Albanian - a pity as I couldn't

hear the scheduled 11970 kHz after 1930 UT. I also heard the 15700 kHz transmission at 0430 UT.

(Chris Greenway-UK, dxld Dec 4)

de Hiroshi & Hiro

(Sei-ichi Hasegawa-JPN, dxld Nov 14)

UAE/U.K. New Somali station - RADIO DAMAL.

Through my colleagues in Kenya I have gleaned the following:

"Damal" is the Somali name for a tree which offers a big shade. Perhaps this is meant to suggest that many listeners can gather in the shade of Radio Damal to tune in. Radio Damal is broadcasting from the studios of KBC at Broadcasting House in Nairobi. As KBC is state-owned, this suggests Kenyan government blessing for the venture. Radio Damal has hired six hours a day on Babcock transmitters. Any unused time may be filled with relays of the BBC.

(Has anyone heard any BBC relays on Radio Damal?)

According to the Somali-language website Dayniile, China is funding Radio Damal. The website links this to recent WikiLeaks revelations that China has been providing arms to Kenya to intervene militarily in Somalia. It may also be noted that KBC has long had a relationship with China, including daily relays of CRI and CCTV on KBC radio and TV. So, Radio Damal is an extension of this relationship.

I was impressed to see that the 2011 WRTH has an entry for Radio Damal, stating that it began broadcasting on 4 November 2010.

I was in Cairo last week and the 11740 kHz transmission was well heard there, opening at 1829:30 with Koran recitation. At 1930 they have to leave 11740 to make way for VOA Albanian - a pity as I couldn't hear the scheduled 11970 kHz after 1930 UT.

I also heard the 15700 transmission at 0430 UT.

(Chris Greenway-UK, dxld Dec 15)

The audio file that show of the member of NDXC received on 15700 kHz at \*0359 UT on Nov 15. Can you copy ID?

<[http://bcl2isid2over60.sakura.ne.jp/dl/sound/101115\\_125925\\_15700N2A6d.mp3](http://bcl2isid2over60.sakura.ne.jp/dl/sound/101115_125925_15700N2A6d.mp3)

1800-2000 Sat 9265am  
1900-2000 smtwhf 13570am  
2000-2100 Sat 9265am  
2000-2100 smtwhf 13570am  
2100-2200 9265am  
2100-2200 smtwhf 13570am  
2200-0000 9265am  
(FCC via Hans Johnson, Frequency Manager via Dec NZ DXTimes direct and via dxld)

Anyway, confirms no longer on 9355. There would be a slightly more user-friendly way to present this schedule, as presumably corrected:

Daily 10-15 9265  
Sun-Fri 15-22 13570  
Sat 15-22 9265  
Daily 22-04 9265

And are they really on as early as 10 and as late as 04?  
(Glenn Hauser-OK-USA, dxld Dec 13)

Usually WINB opens on 9265 kHz around 1130 utc - This start time was noted when I was checking schedules for BDXC's Broadcasts in English last month and also confirmed again today. (Did not catch the actual start today, it was not on when I checked at 1115 UT but was in progress when checked again at 1140 UT.) Fair signal in UK at this time.  
(Dave Kenny-UK, BrDXC-UK via dxld Dec 13)

7415 WBCQ, Thursday Dec 16 after 2000 with WORLD OF RADIO, just barely audible here and it's last week's 1542 instead of latest 1543, which was available some 16 hours earlier, so WBCQ listeners won't hear it until next Tuesday at 2000, we hope.

Meanwhile, WBCQ has an "Available Time Slot" Thursdays at 2200-2415 UT. I checked to hear what they were filling it with, and found they had turned off the transmitter, and the webcast was running silently until 0014 UT on Dec 17 IS & ID, 0015 Amos 'n' Andy.

WOR 1543, confirmed via WWRB 3185, UT Friday Dec 17 from 0432 after a minute or more of silence; also on WRMI 9955 kHz, Friday 1530+ without jamming, making overload from WWCR 9980 kHz more of a problem here.

WWCR airings are: Fri 2130 7465, Sat 1700 12160, UT Sun 0330 4840, 0730 3215.

(Glenn Hauser-OK-USA, dxld Dec 17)

BBG - 2010 Annual Language Service Review Briefing Book.

"This is the briefing book for 2010 in support of the BBG's congressionally mandated, annual review of all broadcast language services - the process known as Language Service Review. The book provides BBG governors and senior managers - and this year, all employees as well - with quick access to core performance and other data for all language services as well as relevant data and information regarding the media and political environments in which the services operate. While such information is already available across the agency through routine research reports, there is added value in a ready reference document".

<[http://media.voanews.com/documents/2010\\_AnnLanguageServiceReviewBriefingBook.pdf](http://media.voanews.com/documents/2010_AnnLanguageServiceReviewBriefingBook.pdf)> (19 MB)

(Aleksandr Diadishev-RUS, dxld Dec 15)

BBG - 2010 Annual Language Service Review Briefing Book.

130 pages, lots of data, but besides the statistics, there are very useful and succinct reports on each target area evaluating the Political Situation, and the Media Environment, including ratings by the Freedom House Political Freedom Index, Economist Intelligence Unit Instability; the Freedom House Press Freedom Index and the Reporters Without Borders Index. Recommended reading!

As comprehensive as this may be, there are some huge gaps, such as Latin America beyond Cuba and the Andean region (5 countries) which USIB has abandoned.

(Glenn Hauser-OK-USA, dxld Dec 17)

WINTER SWL FEST 2011, MARCH

Online Fest registration form AND online hotel reservations now available! We have the updates complete and the URLs in place. You can now register for the 2011 Fest via PayPal and also reserve your hotel room at the special Winter SWL Fest rate online as well.

For details, check out the Winter SWL Fest 2011 update page at

<<http://www.swlfest.com/2011-fest-news/>>

See you in 85 days (give or take...)

If you are contacting the Doubletree Guest Suites by phone to reserve your hotel rooms, it will be really helpful to the hotel staff if you use the proper group name to get the special \$89 rate:

## Winter SWL Fest

Please don't use a name like "shortwave group" or "radio group", as we are not indexed that way in their lookup system. Repeating: please use the group name "Winter SWL Fest".

As a reminder, you can also make hotel reservations online at the following special URL:

<[http://doubletree.hilton.com/en/dt/groups/personalized/P/PHLGHDT-WSF-20110303/index.jhtml?WT.mc\\_id=POG](http://doubletree.hilton.com/en/dt/groups/personalized/P/PHLGHDT-WSF-20110303/index.jhtml?WT.mc_id=POG)>

The QSL-calendar 2011

is the 6th edition to be published by the Rhein-Main-Radio-Club and ADDX Archiv as a non- profit activity to support shortwave listening. This full colour art print calendar offers real treasures from the ADDX archiv, which contains QSL cards from the 1930's to the present. The QSL-calender is in English and costs 15 Euro (+ 6 Euro porto outside Europe). If you would like to own a copy of the special CD or one of the 2011 QSL-calendars,

simply send an email to <DrGabler {at} t-online.de> or you can order directly from our Internet homepage <[www.rmrc.de](http://www.rmrc.de)>

You can pay by bank account transfer or PayPal.  
(Dr. Harald Gabler)

#####

ALBANIA 1457.577 CRI in Czech via Fllaka at 2239 UT Dec 19, usual odd frequency. Also same odd frequency at 2245 UT Dec 20. (wb, wwdxc BC-DX TopNews Dec 19/20)

7389.985 R Tirana from Shijak in Albanian language, morning program to Balkan and Italy. S=8 / -76 dBm level at 0834 UT here in Germany. Talk on theatre festival.

I'm not sure whether this is a fault of the Perseus unit: but I noted another peak with very same RT program on exact even 7391.999 / 7392.000 kHz, S=6 / -90dB at 0922 UT. (wb, wwdxc BC-DX TopNews Dec 23)

ALGERIA 6297.204 RASD Tindouf west Saharan morning HQ prayer program at 0709 UT Dec 20, S=3-4 only. On Dec 19 at 2308 UT S=8 signal on 6297.161 kHz. On Dec 20 at 2232 UT only S=2 on 6297.160 kHz.

6297.200 even ! - started at 0650 UT on 6297.241, frequency wandered down. RASD Tindouf west Saharan morning program, monotonous sound male singer, with children choir in background at 0725 UT Dec 21, S=5-7 fade.  
(wb, wwdxc BC-DX TopNews Dec 19/20/21)

700 Polisario Front, Tabouni, 1218-., 20 Dec'10, Arabic, talks, music; 15331; // 6297.15 kHz very good, closed at 01PM sharp.  
(Carlos Goncalves-POR, wwdxc BC-DX TopNews Dec 21)

6297.1 SASASAM [? As we explained before, Arabic ID is "Huna el-estudiohaay al-markaziya al-wataniya, Sowt al-sha'ab a-Sahraui al-mukafa", as reconfirmed in WRTH 2011], Dec 21 at 0832, S=9+18 Arabish talk with utebeeps aside, still in plenty late on Solstice, no help from the lunar eclipse which had me up at this time.  
(Glenn Hauser-OK-USA, dxld Dec 22)

ANGOLA 4949.8 RNA - Canal "A", Mulenvos, 1907-1916, 17 Dec'10, Portuguese, news bulletin; 35342.  
(Carlos Goncalves-POR, wwdxc BC-DX TopNews Dec 21)

BELARUS 6155.00 Minsk Kalodzicy in Russian. An extreme 10 kHz wide signal at 2327 UT Dec 19, powerhouse S=9+40dB here in southern Germany.  
(wb, wwdxc BC-DX TopNews Dec 19/20)

BOLIVIA 4865 R. Logos, St.a Cruz de la Sierra, 2202-2213, 19 Dec'10, Castilian, rlg. Propaganda; 24331, QRM de B on 4864.6 kHz + CODAR.  
(Carlos Goncalves-POR, wwdxc BC-DX TopNews Dec 21)

BRAZIL 4885 Radio Clube do Para, Belem, at 0411 on Dec 17 with what sounded like a polka, M host in PP. Excellent level, as was Cultura on 5045 kHz except for RHC splash.

4935 Radio Capixaba, Vitoria, poor at 0414 UT with M talk and music, CODAR.

4965 Radio Alvorada, Parintins, presumed the one at 0434 UT on Dec 17 with a long stretch of piano music. Not // to 9430 kHz-Zambia.  
(Gerry Dexter-WI-USA, NRD 545, TenTec 340, DXplorer Dec 19)

3365 R. Cultura, Araraquara SP, 2223-2234, 18 Dec'10, talks, seemingly some rlg. propag. prgr; 25331.

4754.9 R. Imaculada Conceicao, Cp.o Grande MS, 2317-2324, 17 Dec'10, announcements, phone number announcement, talks; 15331.

4805 R. Difusora, Manaus AM, 2204-2223, 18 Dec'10, songs, ID+fqs announcement at 2205, chatter; 34433, CODAR QRM.

4864.6 R. Verdes Florestas (pres), Cruz.o do Sul AC, 2203-2216, 19 Dec'10, talks; 13341, CODAR QRM.

4885 R. Cultura do Para, Belem PA, 1932-2007, 18 Dec'10, talks,

advertisements, road traffic rpt. Boletim do Transito, ID+fqs announcement at 2001 that included the affiliated stns list, then into f/ball; 15331, but improving fast.

4915 R. Daqui, Goiania GO, 2003-2027, 18 Dec'10, station slogans, songs; 24321, QRM de R. Difusora do Macapa.

4915 R. Dif.a, Macapa AP, 2158-2212, 18 Dec'10, songs; 23431, QRM de R. Daqui, with broken audio at 2205 till it went off.

4915 R. Dif.a again, 2155-2215, 19 Dec'10, prgr A Voz do Desporto, then ID+fqs announcement, stn. slogans, e.g. "Radio Macapa - a radio da Amazonia!", and into a rlg. propag. Prgr; 45343.

4935 R. Capixaba, Vitoria ES, 2209-2219, 18 Dec'10, IPDA propaganda; 35433.

4985 R. Brasil Central, Goiania GO, 2211-2229, 19 Dec'10, oldies music prgr Bons Tempos; 35433; // 11815 kHz superb.

5035 R. Aparecida, Aparecida SP, 2213-2227, 17 Dec'10, songs in prgr Com a Mae Aparecida; 35332; // 6135, 9629.9, 11855 kHz.

5045 R. Cultura do Para, Belem PA, 2254-2314, 17 Dec'10, A Voz do Brasil natl. News magazine, station ID + freqs announcement, songs; 45433, increasingly noisier & fluttery.

5940 R. Voz Missionaria, Camboriu SC, 2308-2319, 18 Dec'10, rlg. propaganda; 45433.

5969.97 R. Itatiaia, Belo Horizonte MG, 2311-2324, 18 Dec'10, chatter on f/ball; 34432, splatter de adjacent chs.

6010 R. Inconfidencia, Belo Horizonte MG, 2246-2305, 17 Dec'10, prgr Desporto pelo Ar, prgr announcements, news bulletin at 2300; 34432; // 15190 fair-good.

6070 R. Capital, Rio de Jan.o RJ, 2238-2256, 17 Dec'10, IPDA prgr, but not // to SRDA fqs, these were airing a different [IPDA] prgr; 44433.

(wb, wwdxc BC-DX TopNews Dec 19/20)

6165 RD. Natle. Tchadienne, Gredia, 1815-1927 UT on 19 Dec'10, Arabic, news (pres), long names list (obituary?), talks, traditional songs, French used later; 44444, adjt. QRM.

(Carlos Goncalves-POR, wwdxc BC-DX TopNews Dec 21)

CHINA 9450 Firedrake jammer at 0439 UT on Dec 18 (pres) vs. Sound of Hope from Taiwan.

9470 CNR-1 jammer under BBC Singapore at 2221 UT on Dec 14.

9545 CNR-1 jammer weak in Mandarin at 2227 UT on Dec 14.

(Gerry Dexter-WI-USA, NRD 545, TenTec 340, DXplorer Dec 19)

CHINA New CNR 13 full time Uyghur language network service now. MW 1422 Kashi-Kashar, 9420, 9655, 9890, 13700, 15390 kHz. See aoki list.

(wb, wwdxc BC-DX TopNews Dec 19)

AOKI listet neu unter China CNR 13, EiBi nicht. Z.Zt. ganz gut auf 13700 und 15390 kHz zu hoeren. Weiss jemand naeheres?

(Andreas Tschauder-D, A-DX Dec 19)

Waren bisher CNR1. siehe

<<http://www2.starcat.ne.jp/~ndxc/>>

klicke linke Spalte unter CNR B10 Schedule,

13700 und 15390 gehoer[t]en ueber den Tag zum Minderheitenprogramm CNR8

(Voice of Minorities), klinken sich aber 1000-1100 UT aus dem

Koreansegment aus, und uebertragen dann - bisher - CNR1.

Jetzt neuer Uighur-Dienst CNR13 !

Die Minoritaet mit 7 Mill. {14 Mill. weltweit} aggressiven Uighuren in

China hat wohl fuer die Partei groessere Bedeutung erlangt?

CNR 13 uebertraegt auch Uighur auf der starken 600 kW Mittelwelle ueber die 1422 kHz aus Kashgar Shufu, mit einer 4-mast und/oder 8-mast Anlage.

<[http://en.wikipedia.org/wiki/Uyghur\\_people](http://en.wikipedia.org/wiki/Uyghur_people)>

(wb, wwdxc BC-DX TopNews Dec 19)

CONGO REPUBLIC 6115 R Congo, Brazzaville, at 1753 UT on Dec 04, animated chat in vernacular, music clip then coverage of a live event in French with drums and cheering, fair.

(Graham Bell, Cape Town-AFS, dswci DXW direct and via dxld Dec 22)

6115 R. Congo, Brazzaville, at 1813-1821 UT on 19 Dec'10, French for news bulletin Radio Journal; 32441, adjt. QRM; it seemed to be off shortly after the end of the bulletin.

(Carlos Goncalves-POR, wwdxc BC-DX TopNews Dec 21)

CROATIA 6164.981 Croatian Radio Deanovec in Croatian language, slightly odd frequency at 0725 UT Dec 20. On Dec 19 at 2220 UT on 3985.122 kHz, S=6-8 varying level, in Spanish at 2343 UT S=5. On Dec 20 at 2220 UT on 3985.132 kHz, S=4 only - compare to KBS Skelton powerhouse 3955 S=9+35 dB.

6165.000 even ! Croatian Radio Deanovec in Croatian language, S=8 signal at 0730 UT Dec 21. The engineer in Zagreb calibrated the tx frequency this morning.

(wb, wwdxc BC-DX TopNews Dec 19/20/21)

3985.092 Croatian Radio Deanovec in Croatian, carried a melancholic Croation folk music song. 0550 UT on Dec 23, bad propagation today only S=9+5dB.

(wb, wwdxc BC-DX TopNews Dec 23)

CUBA RHC unusual weak this morning here in EUR, Dec 20. English phone-in mailbag show, by Mrs. Anne Sullivan on micro at 0633 UT. 6050 S=9+15dB, 6060 S=9, 60mb better 5040 S=9+15dB latter Spanish at 0700 UT. 6150 joined later the remaining, at 0750 UT on weak S=6-7. Rebelde 5025 kHz in Spanish language, and played lovely music, S=9+10dB at 0640 UT.

RHC unusual weak this morning here in EUR, Dec 21. Like yesterday Dec 20 too. Strange, because Sackville and Bonaire are booming in as usual at same time span.

(wb, wwdxc BC-DX TopNews Dec 19/20/21)

Cuba at this moment has not one, but two transmitters operating regularly on the Tropical Bands 60 meters, 5025 kHz R Rebelde and 5040 kHz R Havana Cuba. Both are using Near Vertical Incidence Skywave antenna systems designed and built by us for optimizing the coverage of the Cuban archipelago. Power of the transmitters are 50 kW for R Rebelde and 100 kW for R Havana Cuba. Both frequencies are properly registered with the ITU, Geneva.

We may soon start a test transmission on the 90 meters band, that is pending the availability of an antenna capable of operating on that band. The frequency may very probably be 3365 kHz, as it was already registered with the ITU for use by R Rebelde. But in the tests will be done with the R Habana Cuba programs. I am now reviewing the time segment for the tests, that will probably be between 0200 and 0600 UT.

(Prof. Arnaldo Coro CO2KK, Host of Dxers Unlimited R Havana Cuba, Havana, Cuba, Dec 4, dswci DXW Dec 15 direct and via dxld Dec 22)

Cuba on 3365, 5025 or 5040 kHz are not on the frequency list published by the HFCC, dated Nov 02, 2010, so all must be for domestic purposes!

(Anker Petersen-DEN, dswci DXW Dec 15 ed., via dxld)

That is not the criterion for HFCC entries, which do include numerous domestic services, tho hit-and-miss. It's because as an outlaw station, RHC refuses to participate in HFCC.

The big signals on 5025 and 5040 kHz here belie the NVIS claim - maybe so, but it's far from the efficiency claimed, bleeding out plenty kW to the rest of the world. Furthermore, since 5040 kHz carries English and French broadcasts it's obviously intended to reach beyond Cuba, at least to Haiti and other French- and English-speaking areas, duh. Obviously it should bring English best to S Florida where higher frequencies overskip.  
(Glenn Hauser-OK-USA, dxld Dec 22)

[Re Arnie Coro's comments in dswci DXW]: All other big broadcasters register on the private organization HFCC meetings, but Arnie Coro reports to ITU Geneve list instead, which is less significant.  
(wb, wwdxc BC-DX Topnews Dec 18)

CZECH REP Radio Prague will issue QSL cards for the internet!

According to Radio Prague's Mailbox programme of 19 December: "Some of our listeners might be wondering what will happen with reception reports and QSL cards after Radio Prague goes off the air [on shortwave]. After February 1st, Radio Prague will still verify your reception over the internet. There is a new set of cards featuring Bohemian and Moravian castles which will soon appear on our website."  
(Radio Prague, Dec 20th, by Andy Sennitt-HOL, RNW MN blog via dxld Dec 22)

FRANCE Radio Reveil Paroles de Vie in French, last txion Dec 30:  
1830-1845 9760 ISS 100 kW 142 deg to CeAF Tue/Thu, cancelled from Jan 4.  
(R BULGARIA DX MIX News, Ivo Ivanov, via wwdxc BC-DX TopNews Dec 22)

6015drm kHz - 22 db SNR dagegen aus Issoudun "Disco Palace" program A06021  
- aber dieser Musikkraach ist nicht meine Kragenweite, und eine irritierende Angabe "United States" auch noch, TDP muss es wohl noetig haben?

INTERMODULATION ? - or rx mixture ?  
BC station on 10119 kHz. Strong BC station observed on 10.119 MHz (in SAM  
on flexradio), first in Hungarian m. voice.

On 1900z announced by m. person what sounded like "Holy Radio" just once.

Following transmission was in Croatian language, relig. content. Audio

recording available.

Conditions RX: F5KA, (SAM, best reception),

ANT: end-feed random wire 20 m long, 7m up, E-W. LOC JN76FB

73 de Jurij S56FC

GERMANY In a rare report on international broadcasting, the German  
regional newspaper Nuernberger Nachrichten on 17 December 2010 carried a  
report on the downsizing of Deutsche Welle. Beside general information on  
possible cuts in services and job losses, one foreign language service is  
specifically mentioned: Bengali.

'Auslandsfunk ringt um seine Zukunft', in: "Nuernberger Nachrichten"

newspaper, 17. December 2010, page 6. Unfortunately, the article is not available on the internet web pages of the paper.

(Dr. Hansjoerg Biener-D, DXindia Dec 19)

Re: Deutsche Welle in Bengali probable to be closed.

Sad but DW Bengali was loosing the plot. Last I heard it (several months ago), it was a pale shadow of its former self. Funnyly DW Hindi, Urdu and Bengali would cover the same news event in an entirely different perspective. So if in Hindi an event was good than in Urdu it may be entirely opposite. More to do with language specific editor, than consistency in policy I think.

(Ashok, DXindia Dec 19)

GREECE Modified program for ERA5, Voice of Greece, CHRISTMAS WEEKEND. From 01.00 Friday, December 24, until 09.00 Monday, December 27, Greece Time, (2300 UT Thursday, December 23 until 0700 UT Monday, December 27), ERA5, the Voice of Greece, will be connected with the Christmas program of the Greek Radio.

GUYANA We are going to be changing GUYANA's night time frequency of 3290 kHz, and adding a day-time frequency somewhere around 6 MHz. I will be returning to Guyana some time in late January. They are currently operating at 5 kW, but are getting horrible interference on 3290 kHz. I don't know what frequencies they will be assigned, but as soon as I find out, I will let you and all of our brothers on the World of Radio site, [know] what the changes are.

(Jamie Labadia-USA, dxld Dec 18)

Jordan Radio Amman noted signing-on played Arabic singer on Dec 23 at 11.57:20 UT, weak at S=5 -110dBm level in Germany. ID and nx read by female announcer, fanfare. Comparison TRT on 15350 kHz on S=9+12dB, 15480 kHz on S=7-8 deep fades, even powerhouse REE Noblejas only S=6-7 today, lousy propagation condition today.

(wb, wwdxc BC-DX TopNews Dec 23)

KOREA D.P.R. [non] Radio Free Asia says there are around 30 Web sites around the world promoting the North Korean regime or selling North Korean products.

The U.S.-funded broadcaster says the sites operate on servers belonging to seven countries other than North Korea, including Japan, the U.S., Australia and Germany. The report says that eight of the 30 or so sites use a Japanese server and are operated by pro-North Korean groups in Japan.

RFA says that six sites using U.S. servers were providing legal services on North Korean intellectual property rights or selling North Korean medicine or artwork.

Only two sites were based in North Korea including the site for the North's official Korean Central News Agency.

Other sites using Australian and German servers were sites introducing North Korean books and computer programs.

7325drm Radio Rossii Russian service, exhilarated male voice announcer, labeled neutral "Label Service 0", ID FF0010, 13.9 to 17.6 dB SNR, novosti, European weather report, sports news on football. S=9+5dB strength.

(wb, wwdxc BC-DX TopNews Dec 23)

Wie jedes Jahr seit Weihnachten 2003 habe ich mal wieder die Kabel fuer DRM zusammen gesteckt.

Die Logs von 22 Dec:

7325 Koenigsberg VoRUS Bolshakovo Deutsch in DRM um 1200 UT ganz gut mit kleinen Aussetzern. Auch noch dann Radio Rossii in Russisch um 1300 UT, aber nach 1330 UT ging das Signal hier in Stuttgart in den Keller und der Sound war nicht mehr zu dekodieren.

Ab 1400 UT Moskau Taldom dann auch nur auf 5905 kHz zu hoeren, die parallele 9675 kHz jedenfalls im Window als 12 kHz 'Kantenklotz' schoen anzusehen, litt sehr unter dem Chinesischen Jammer Stoersender auf 9670 kHz - der auf Lampertheim in Tibetanisch angesetzt war. Der Stoerer machte jede Dekodierung von VoRUS Moskau Taldom 9675 zunichte.

0100-0300 6110 WOF 125 kW 294 deg to NoWeAM Mon-Wed

0300-0400 5925 RMP 250 kW 300 deg to NoWeAM Mon-Wed

0400-0500 5920 RMP 250 kW 300 deg to NoWeAM Mon-Wed

(R BULGARIA DX MIX News, Ivo Ivanov, via wwdxc BC-DX TopNews Dec 22)

Perhaps to remind M&B they have competition, (dxld, g.h.)

That test outlet from U.K. shows the very seldom used antenna azimuths towards North America, since decline of BBCWS towards CAN/USA a decade ago. (wb)

U.K. 7240 at 1800 UT on 12 Nov, WYFR relay via UK, listed in Greek but English heard.

(Zacharias Liangas-GRC, Dec WDXC-UK Contact magazine direct and via dxld)

Wolfgang Bueschel's comprehensive YFR schedule from leaflet led to this entry a few weeks ago:

NEW - Greek to Greece, UTC kHz

1800-1900 7240SKN - English in leaflet ... So which is it really now?

(Glenn Hauser-OK-USA, dxld Dec 20)

WYFR start services often in English language, but change few weeks later to like Erevan relay in Bulgarian or Scandivian-Swedish etc. etc.

Yes Swedish, S=6 at 1935 UT Dec 23. (wb)

U.K. WYFR, Family Radio in Swedish [via Skelton ? wb.]

Maybe I missed a logging, but being advised from a friend in Edmonton (!)

I am now hearing WYFR, Family Radio) in Swedish at 19-20 UT on 7240 kHz.

Lost it at the change to B10. Thought that the program had been dropped.

(Erik Koie-DEN, dxld Dec 22)

U.K./PORTUGAL 5875drm BBC WS with Current Affairs program in English at 8-9 UT via Woofferton 100 kW unit at 114 degrees. ID E1C238, 16.92 kbps, S=9+40dB powerhouse.

Display of DRM text header shows still DWL involved in this service ... like:

"This is the BBC & Deutsche Welle channel on DRM Digital Radio.

BBC & DW on DRM Digital Radio, details at [drm.org](http://drm.org).

Details of our programme are at [bbc.worldservice](http://bbc.worldservice) and [dw-world.de](http://dw-world.de) "

// 9610drm same program via DWL Sines relay site, also ID E1C238, today weak propagation, only S=7, to be caused many breaks during drm decoding, faded between 3 and 14 dBm SNR.  
(wb, wwdxc BC-DX TopNews Dec 23)

VIETNAM 6020 VOV -4, Buon Me Thuot, at 1347 UT Dec 20, presumed the one here in ethnic languages mixing with co-channel R Australia which closed 1359 UT. Then wiped out completely by TDP Issoudun DRM on 6015 kHz which appeared that same minute. Unfortunately already gone at 1500 UT re-check when DRM off again.  
(Martien Groot-HOL, dxld Dec 20)

Corner quadrant antenna at the easterly side of the MW area  
12 38 38.83 N 108 01 14.23 E  
<[http://maps.google.de/maps?f=q&source=s\\_q&hl=de&geocode=&q=12+38+38+N++108+01+14+E&sll=51.151786,10.415039&sspn=19.253434,55.50293&ie=UTF8&ll=12.643898,108.019595&spn=0.003648,0.006775&t=h&z=18](http://maps.google.de/maps?f=q&source=s_q&hl=de&geocode=&q=12+38+38+N++108+01+14+E&sll=51.151786,10.415039&sspn=19.253434,55.50293&ie=UTF8&ll=12.643898,108.019595&spn=0.003648,0.006775&t=h&z=18)>

ZAMBIA 5915 ZNBC / R. Zambia 1, \*0240-0250, Dec 21. 0235 UT noted test tone mixing with CRI; 0240 UT, tone ended and went to African Fish Eagle IS; 0250 UT sounded like "Lumbanyeni Zambia", their choral National Anthem. Much stronger reception than yesterday!

6162 ZNBC / R. Zambia 2 (presumed), at 0346 UT on Dec 21. Talk show in English, with African accents; almost able to understand what was said. If I had thought to check here earlier, I probably would have found the African Fish Eagle IS was //, but of course after 0250 UT the actual programming would not have been the same.

Today (Dec 19) I heard an unidentified station on 6161.93 kHz at 1556 UT. Very poor and adjacent QRM (best in USB); slowly improving; 1559, brief music; 1600, woman with the news in English; 1605 seemed to be the end of the news; 1607 gave website: "w-w-w . ", but unable to make it out. Not possible for me to ID, but per your report certainly interesting if it's ZNBC/Radio Zambia 2.

BTW - Vancouver (Canada) was fairly well noted on their normal, slightly lower than 6160 frequency at that same time.  
(Ron Howard-CA-USA, dxld Dec 19/21)

#####

WRTH is soon to take over the 'blue pages' function of defunct PWBR. Per an ad on page 47, a "Bargraph Frequency Guide" will be available on CD from January. This one will have the languages color coded, but that can only go so far; in the sample page, 12 of them + other. Perhaps in future this could be expanded by combining the PWBR monochrome method with colors. No further details yet on cost or how to order, but check  
<<http://www.wrth.com>>  
(Glenn Hauser-OK-USA, dxld Dec 20)

#####

PRESS RELEASE

2010 Clandestine Activity Survey.

During the year 2010 the activity of political clandestine stations broadcasting on shortwave has remained almost unchanged from last year and is now at 1092 WBHs (Weekly Broadcasting Hours). This is an increase of just 4 WBHs or 0.3% from 12 months ago.

The activity of clandestine station broadcasting to target areas on the Asian continent has decreased by 1.9% to 730 WBHs. On the American continent the activity has increased by 8.6% to 214 WBHs and on the African continent activity has remained almost unchanged at 148 WBHs.

The most active target areas worldwide are North Korea with 274 WBHs (+22 when compared with last year), Cuba with 214 WBHs (+17) and China P.R. with 189 WBHs (-37).

The number of active target areas worldwide has increased from 17 to 20. The new target areas are Malaysia, Uganda and Djibouti.

AUSTRIA 5875drm BBCWS Christmas edition via Moosbrunn-AUT 7-8 UT, around 0730 UT. Prisons policy in UK, SNR varying 14.2 to 17.5 dB.

(wb, wwdxc BC-DX TopNews Dec 24)

5875drm BBCWS in English via Moosbrunn-AUT relay, Current Affairs program at 0720 UT, report from Haiti earthquake disaster. Hurt many children too, and brought them via airplane to US hospital recovery help ...

S=9+35dB strength, SNR powerhouse roughly around 26.0 dB.

(wb, wwdxc BC-DX TopNews Dec 28)

BRAZIL 15190.0 Radio Inconfidencia, 2325-2345 UT on Dec 23, Brazilian music. Portuguese talk. Threshold signal but improved to weak but readable levels on peaks. No // heard.

(Brian Alexander-PA-USA, DXplorer Dec 23)

4885 25 Dec, 0115 UTC, Radio Clube do Para in Portuguese with romantic songs and some R&B. Beautiful, echo and full ID at 0128 UT. Strong signals, no QRM, but fluttery. Incredible! This is quite the Xmas present.

7686 miles away! Supposedly only 2 kW?

(Albert Muick-Kandahar-AFG, RX: WinRadio G303e ANT: 100m longwire hcdx Dec 25)

5045 on 27 Dec, 0156 UT, Radio Cultura do Para, heard in Portuguese with some Brazilian pops into a full ID by a male announcer at 0159 UT, several commercial announcements and then news read by a woman (or a very light-voiced man). Fair signal level with some UTE QRM and a slow fade

(Albert Muick-Kandahar-AFG, RX: WinRadio G303e ANT: 100m longwire hcdx Dec 27)

B.I.O.T.- DIEGO GARCIA 4319 AFRTS-AFN, Diogo Garcia, 2319-2332, 23 Dec'10, music, then NPR's All Things Considered; 33442, adjt. uty. QRM.

(Carlos Goncalves-POR, wwdxc BC-DX TopNews Dec 27)

CANADA 6045 RKI / KBS via Sackville relay site, 6-7 UT, noted at 0603 UT Dec 30. S=9+10dB, Spanish nx, about intercambio on Korean peninsula, Korea del Norte negociación.

(wb, wwdxc BC-DX TopNews Dec 30)

CHAD At present at 2214 UT Dec 28, both French language newsreader of R. National N'Djamena, female and male are noted on exact 6165 kHz (not split frequency).

[later] 6165.0 NX in French til 22.25 UT, S=9+25dB, at 22.29:49 UT Chad's National Anthem played til 22.30:58 UT. TX in N'Djamena switched off at 22.31:14 UT.

(wb, wwdxc BC-DX TopNews Dec 28)

CHINA 10300 25 Dec, 0845 UTC, Firedrake with the jug band in full swing and going to town. Poor signals without QRM (dunno what they're trying to jam) and slight fading.

12613 25 Dec, 1017 UTC, XSQ Guangzhou Radio, CW Marker and SITOR bursts. Good signals, slight fade, no QRM.

(Albert Muick-Kandahar-AFG, RX: WinRadio G303e ANT: 100m longwire hcdx Dec 25)

3950 Xinjiang PBS, Urumqi, 2315-2335, 23 Dec'10, tone signal followed by a period of silence, then IS at 2330 UT, Mandarin & English ID, announcements, talks; 45433.

(Carlos Goncalves-POR, wwdxc BC-DX TopNews Dec 27)

CHINA [and non] 7105 Chinese with good signal amid 40m hamband, Dec 25 at 2238 UT. Soon found // 7440 kHz echoing and mixing with other signals, but on 7105 at 2246 UT only a fast SAH, no other modulation audible. It is of course, CNR1 jamming Sound of Hope which uses 7105 kHz only at 22-23 UT.

On 7440, the jamming is vs VOA Chinese via Thailand, but also blasts CRI Japanese via Beijing, per Aoki list.

(Glenn Hauser-OK-USA, dxld Dec 29)

COSTA RICA 5954.274 Radio Republica, om comments on Cuba, 2235 usb and narrow filter to defeat jamming, 19 December.

(Robert Wilkner-FL-USA, dxld Dec 29)

Heard a whistle interference tone on 5954.229 kHz at 0145 UT Dec 31 too.

(wb, wwdxc BC-DX TopNews Dec 30)

CROATIA Es ueberraschen immer wieder die verschiedenen Sender vom kroatischen Radio Zagreb aus Deanovec mit ihrer Frequenz-Ungenauigkeit. Am 21.12. 3985.114 kHz um 2335 UT. Heute morgen 6164.969 kHz um 0705 UT S=9+10dB - gestern genau auf 6165.000 kHz vom Techniker neu geicht, jetzt genau 7370.000 kHz um 0820 UT.

(wb, wwdxc BC-DX TopNews Dec 24)

3985.107 Voice of Croatia, Deanovec, Croatian pop mx, at 0445 UT Dec 30. S=9+15dB. Similar strength on 3985.114 kHz at 0205 UT Dec 31.

(wb, wwdxc BC-DX TopNews Dec 30/31)

CUBA 6180 25 Dec, 0312 UTC, RHC in Spanish with interview and man on telephone rambling about everything from the US, to Venezuela to Palestine and Israel. No shortage of political opinions on this day. Fair level with slight interference from a station with Arabic chanting (unid.) and slight fading. Another amazing catch at 8117 miles! TXer blew the air at 0328 UT.

(Albert Muick-Kandahar-AFG, RX: WinRadio G303e ANT: 100m longwire hcdx Dec

25)

5025 on 27 Dec, at 0131 UT, Radio Rebelde with latin music and echo announcements. verified by streaming audio. Very weak at the time I caught it. I will try to get up earlier tomorrow and see if the signal is stronger. Two positive Rebelde IDs.

Radio Habana also coming in on 5040 kHz which is supposedly beamed towards North America. Much better signal on this frequency.  
(Albert Muick-Kandahar-AFG, RX: WinRadio G303e ANT: 100m longwire hcdx Dec 27)

CUBA 11670 on Dec 30 at 2219 UT, I am surprised to hear RHC IS, and then an Indian language, certainly not the usual Radio Nacional de Venezuela transmission in Spanish, the only thing scheduled on this frequency from Cuba, at 22-23! Guarani was deleted a year or two ago, so unless that has been revived, it must be Quechua. But per current schedule, QC is supposed to be at 0000-0030 UT on 15370 kHz. That frequency appeared to be on now, but weak signal and dead air. Guarani used to be on the same frequency as Quechua (then 17705) at other times. At 2225 UT had to resort to Spanish words, talking about "Costa de Marfil, ex-colonia francesa".

2230 UT switched to Creole, audio breaking up and undermodulated. That's supposed to be at 2300 on 15370 kHz per online sked presented in Spanish, while in WRTH, French is supposed to be on 15370 at 2230, except Sundays Esperanto, which we have never been able to confirm. This was definitely Kriyol-la, not French. However, at recheck 2256, 11670 had meanwhile switched to correct feed of RNV with IS and sign-off announcement. In other words, at RHC, it's SNAFU.

6050 checking RHC English, Dec 31 at 0211 UT, very strong, but it has co-channel QRM under from some music, and producing a subaudible heterodyne. Thus the negligible HCJB is capable of interfering with RHC in NoAM! Maybe that will get Arnie's attention, as his monumental failure of frequency management continues.  
(Glenn Hauser-OK-USA, dxld Dec 31)

CYPRUS 17 Meter Wideband QRM. Wideband Hash, maybe Radar, from 18.065 through 18.085 kHz at S=7-9 at 1357 UT Dec 23, it went QRT at 1401 UT exactly.  
(Dennis N3DG, IARU Intruder Alert mailing list, Dec 23)

It was Akrotiri's PLUTO-II radar. (mike chace-ortiz.org)  
It is RAF Akrotiri in Cyprus and is a NATO installation. (Colin G3PSM, Dec 23)

GERMANY 801 kHz Bayerischer Rundfunk Munich Ismaning.  
"Bayern Plus" folk music program from January 10, 2011 on MW.  
Rundfunktechnik Empfang ueber Mittelwelle.

Der Bayerische Rundfunk betreibt vier Mittelwellensender auf zwei  
verschiedenen Frequenzen. Zum Jahr 2011 aendert der BR die  
Programmbelegung:

Ab 10. Januar 2011 wird die Schlager- und Volksmusikwelle Bayern plus  
anstelle von on3-radio auf den Mittelwellenfrequenzen uebertragen. Vor der  
BR-Jugendwelle war lange Jahre Bayern 1 auf der Mittelwelle zu finden.

Sondersendungen (beispielsweise Live-Debatten aus dem Bundes- oder  
Landtag), die frueher ebenfalls auf der Mittelwelle uebertragen wurden,  
haben bereits seit 2007 auf B5 plus eine neue Heimat gefunden. B5 plus ist  
ueber das DAB-Sendernetz und digital via Satellit und Kabel empfangbar.

Mittelwellen-Sender Frequenz Leistung (EMRP)

Muenchen-Ismaning 801 kHz 100 kW

Dillberg 801 kHz 17 kW

Wuerzburg 729 kHz 1 kW

Hof 729 kHz 0,2 kW

(EMRP effective monopole radiated power)

Eben wurde auf Bayern Plus mitgeteilt, dass sie ab dem 10. Januar 2011

Bayern Plus anstelle von on3 auf der MW senden. Der ganze Beitrag ist auch hier zu finden:

<<http://www.br-online.de/unternehmen/technik/rundfunktechnik-DID1200666073148/rundfunktechnik-radio-mittelwelle-ID671202493925293376.xml>>

So nebenbei: Zur Zeit ist die 801 kHz zu hoeren, aber so mit O=3-4. Von einem guten Empfang wie frueher keine Spur.  
(Sandro Blatter-SUI, A-DX Dec 30)

Allerdings schaltet OldieStar Radio zum 2.01.2010 seine Mittelwelle 603 kHz aus Zehlendorf ab, wie im Forum von ukwtv.de gemeldet wird.  
(Douglas Kaehler-D, A-DX Dec 30)

INDIA 4844 25 Dec, 0106 UTC, AIR Mumbai (tent.) in Hindi with subcontinental music and long talks by male announcer. Off of nominal 4840 kHz? Is this a planned move or has there been some detuning or a crystal that has gone for a walk? Strong signals but moderate QRM from a carrier on 4845 kHz.  
[was on 4847 kHz recently. wb]

4880 25 Dec, 0112 UTC, AIR Lucknow in Hindi with subcontinental music. Local level signals, but horrible, tinny modulation without any real depth to it.  
(Albert Muick-Kandahar-AFG, RX: WinRadio G303e ANT: 100m longwire hcdx Dec 25)

KYRGYZ REP 4010 Kyrgyz R, Krasnaya Rechka, Biskek, at 1716-1727 on 26 Dec'10, classical music; 35433, but weakish modulation; // 4795 kHz worse.  
(Carlos Goncalves-POR, wwdxc BC-DX TopNews Dec 27)

LITHUANIA/IRAN 9770 IRIB Tehran in morning Italian language service via Sitkunai-LTU relay. 0652 UT, Dec 28. S=9+30dB. politics report about Palestine Guerra, occupation by Israel.

// direct from Kamalabad Iran, 15085 kHz only S=8 - poor propagation condition today, 13620 kHz at S=9+20dB much better signal strength. But also the very strong Chinese signals from Kashi and Urumchi suffer this morning.

13600 IRIB Tehran via Kamalabad-IRN in French at same time span, Holy Quran prayer program sung at S=9+15dB at 0705 UT, and // from Sirjan-IRN site 15560 kHz S=8 only.  
(wb, wwdxc BC-DX TopNews Dec 28)

MADEIRA More Madeira MW info from Carlos Goncalves:

"The 1530 kHz outlet, from the Encruzilhadas site (32 40 19.63 N 16 56 53.96 W, check <[http://www.mwlist.org/mwlist\\_quick\\_and\\_easy.php?area=1&kHz=1530](http://www.mwlist.org/mwlist_quick_and_easy.php?area=1&kHz=1530)> - the data I provided has already been inserted in this page), St.o Antonio, a parish that belongs to the Funchal municipality, is using not just 1 kW but 2 kW as I had been informed.

The old antenna consists of a simple monopole which has seen better days, and no more refurbishing will be carried out until the new site is

inaugurated. .. unless perhaps conditions urgently demand it and PEF wants to keep MW running.

As soon as the final preparations at the new 1530 kHz site of Poise are ready, the rather old 10 kW GATES tx will then most certainly be kept at just half its power level due to costs. In terms of use, the Poiso site is brand new, it never worked except for some brief antenna tests using the defunct Santana 1017 kHz 1 kW tx silenced back in early July last, but works actually started some 6-7 years ago (!) after the Funchal municipality granted the station the use of the land for a stipulated period of time.

The antenna was erected, say, some 4 years ago or more, and consists of a 50 Ohm fed, folded monopole like the one used by Antena 1 Madeira at Pico das Eiras (defunct) 531 kHz 10 kW, Porto Santo island.

In terms of MW, Poiso is bad, and so is neighbouring Pico do Areeiro 603 kHz 10 kW (Antena 1 Madeira) for they're both too high for covering a region which is at a lower level. That may be good for VHF-FM while certainly not for MW. On top of that, it seems certain places, particularly on high ground, have been stormed by extremely strong winds, occasional floods, and snow also plagues those areas. In the case of Poiso, access is carried out by 4x4, not normal vehicles.

Funchal in particular, where most of the population live, but also the southern coast of Madeira is best served by MW antennae that are located at a lower latitude, like the old PEF site and the Antena 1 Madeira 1332 kHz 1 kW (Sr.a do Monte), and also where the defunct Estacao Radio da Madeira 1485 kHz 1 kW was installed.

To conclude this, a final word on PEF Santana 1017. It seems after all, that this unlisted fq, I mean absent in official lists like the one at <http://www.anacom.pt> was experimental during its entire life, with ANACOM's blessing of course. The antenna used there till early this past Summer consisted of a T or inv. L type so I was also told, so pretty much like ordinary NDB rigs. It was nevertheless putting a fair signal in the continent during daytime despite QRM from Spanish stations on adjacent channels; during the evening, one ought better forget about trying to get their signal."

MALAYSIA 9750.034 Voice of Malaysia, at 1220-1245 UT on Dec 24. Have been listening to this for almost a half hour without realizing it was Malaysia, since the announcer was using a language I wasn't expecting. I still don't know what it was? Indonesian is scheduled, but it sounded more like Spanish to my untrained ear. Gotta get my ear trained. Anyway at 1239 UT ID was given and I was able to copy "Malaysia" in there. This was followed with music. At 1243 UT another ID given by a male in possibly Indonesian language. Signal was good.  
(Chuck Bolland-FL-USA, dxld Dec 29)

MALAYSIA [SARAWAK] 5030 Sarawak FM via RTM, randomly from 1327 to 1600\* UT, Dec 27. In vernacular; pop songs; news.

S. Aoki received Sarawak FM on 9835 kHz on Dec. 23 at around 1000 UT for the first time. // 5030 kHz. I can receive it by the later reception from around +0000-1430+ UT. 9835 kHz are delay in time lag of the satellite

relay than 5030 kHz. Therefore I estimated it to be new transmitter of Kajang TX site.

(Sei-ichi Hasegawa-JPN, dxld Japan, Dec 26)

9835 Sarawak FM via RTM, randomly from 1327 to 1624 UT, Dec 27. In vernacular; before 1600 UT noted some adjacent QRM on 9830 kHz and VOV 9839.88 (fair-good). Was // 5030 kHz till that frequency suddenly went off the air after the pip. After 1600 UT mostly fair to good with choral National Anthem (Negaraku - Lagu Kebangsaan Malaysia) followed by program of pop songs and many IDs. Very nice to have this additional frequency and extended schedule.

(Ron Howard-CA-USA, dxld Dec 27)

MALI 9635 RTM Bamako aus dem Tschad war auch schon mal staerker in Europa zu hoeren, S=3-4, eher noch darunter um 0812 UT.

LW 209 kHz channel. There was recently some discussion on Russian DX list  
about R. Mayak, Tynda from Amur area being actually on 209 kHz. This was  
mostly based on Japanese reports. I asked Hidetoshi Takashima from Sapporo  
about the matter and he confirms that he has heard the station on 209 kHz  
during several years. But even in Sapporo the co-channel Mongolians make  
the reception difficult.

I checked the frequency again today and could detect the Mongolian  
transmitters sign off at 1500 UT on the following frequencies: 208.889,  
208.959, 208.996, s/off at 1505 UT. Another, equally strong carrier  
continued on 209.000 kHz until 1600 UT, which is the scheduled s/off for  
Mayak, Tynda. It may have low modulation, because I haven't been able to  
get any audio from it, although at times it is rather strong.  
(Mauno Ritola-FIN, mwoffsets Dec 27)

Distance Tynda-RUS to Sapporo-JPN is 1800 kilometers

RUSSIA Gunaz Radio on 7510 kHz. GunAz Radio starts today Dec 29 at 1430 UT.

UNID site [Armavir/Samara-Russia? wb.] 7510 Starting Dec 29, 2010, a new radio station will start broadcasting on shortwave. It concerns Gunaz Radio, a new service from Gunaz TV. Gunaz Radio will broadcast daily from 1430-1930 UTC on 7510 kHz in the 41 meter band. For more information, visit <[www.gunaz.tv](http://www.gunaz.tv)>  
(Ludo Maes-BEL, via TDP list; dxld Dec 24)

Something to do with Azerbaijan, but Southern or 'Northern'?. Site? FEBC via VTC via Armenia is already scheduled on 7510 at 1730-1800 UT.  
(Glenn Hauser-OK-USA, dxld Dec 24)

<[http://en.wikipedia.org/wiki/Azerbaijan\\_\(Iran\)](http://en.wikipedia.org/wiki/Azerbaijan_(Iran))>  
Southern - often disputed area. To weaken the Iranian muslim government too ? (wb)

Probably from a Russian site?  
(Dan Ferguson-USA, shortwavelistening yg via dxld)

Those who lament how bad shortwave DXers are should look at the behaviour of satellite DXers. Try googling this station, and you get swamped by plain mentions of modulation being applied, with nobody caring a second for what this modulation actually is.

First: "Southern".  
<<http://www.eurasianet.org/departments/insight/articles/eav122806.shtml>>

They refused rumours of being USG sponsored, but here an Iranian Azeri wonders how this station may be financed (like all the Persian-language TV stations "run by Iranian exiles" yeah, sure):

<<http://azarmehr.blogspot.com/2006/01/gunaz-tv-twaddle.html>>

Initially Gunaz TV broadcast also via Turksat but has been removed there soon:

<<http://www.bakutoday.net/iran-seeks-ban-on-pro-azeri-tv.html>>

<<http://www.accessmylibrary.com/article-1G1-143852907/turkey-suspends-us-based.html>>

<<http://www.ekurd.net/mismas/articles/misc2006/4/irankurdistan154.htm>>

At present they are in these typical "unjammable Iran muxes" (also used by BBC Persian or VOA PNN) on Telstar 12 and Eutelsat W3A plus a SCPC signal on the Israelian Amos 3, as if no satellite operator wants to put Gunaz TV in a mux with other customers for fear of Iranian jamming. Thus I would not be surprised if the announced shortwave transmission will be jammed.

So far no separate radio channel from Gunaz TV is shown in the usual frequency lists, so it's possible that simply the TV audio will be transmit on shortwave, unless the radio feed simply does not show up in the lists yet or will be put on during the remaining days until launch.

Site: Usual suspects for TDP are of course Grigoriopol, Lutch and Samara. Another facility in the CIS would be possible as well. Is the Babcock booking real or just a wooden registration? It's possible that it has been arranged directly with the transmitter operator in Armenia, with "Moscow" not being involved, so such a clash would not be unthinkable.  
(Kai Ludwig-D, WoR 1545, ibid.)

A mi juicio, su primer idioma sera el azeri, pero unas ciertas emisiones en farsi son tambien posibles.

"GünAz" corresponde a Güney Azerbaycan, el territorio ubicado en el parte noroeste de Iran. El azeri es la lengua materna de la gente que vive alli.

73 & felices fiestas!

(Dmitry Mezin, Kazan-RUS, noticiasdx yg via dxld)

The carrier was on 7510 kHz at least 10 mins before 1430 UT. Program started around 1430 UT, strong signal. Seems to be their TV audio, but about 15 seconds ahead of the net stream, which also shows "Gunaz Radio 7510 kHz SW Band 41 Metr" on the bottom of the screen.

(Jari Savolainen-FIN, dxld Dec 29)

A new target SW station Gunaz Radio started today and is currently audible here with fair reception on 7510 kHz. According to Ludo Maes of Transmitter Documentation Project, which is brokering this SW transmission, it is on the air daily at 1430-1930 UT.

Gunaz Radio is an offshoot of Gunaz TV, based in Chicago, USA. This TV channel seems to be political, presumably opposition, targeting the Azeri-speaking population of the Iranian province of Southern Azerbaijan (Güney Azerbaycan in Azeri) as well as Azerbaijan itself.

The gunaz.tv domain is registered to:  
Güney Azerbaycan Television Inc,  
2835 N. Broadway,  
Chicago, Illinois 60657, USA.

Weak signal on 7510 at 1430 tune-in but improved to fair by 1600 UT. Programming is in a Turkic-sounding language, presumably Azeri. It sounds like a relay of the Gunaz TV audio channel.

Transmitter site is probably Armenia.  
(Dave Kenny-UK, BrDXC-UK ng Dec 29)

Dave, I checked 7510 a little bit late around FROM 1435 UT ONWARDS; this afternoon Dec 29. Usually Ludo Maes keeps the TX location hidden.

And heard some monitoring return information around Europe, weak signal in GB, only S=2-3 in Germany, only S=4 in Italy, stronger in Greece S=9+15dB, weak on RMS Armenia post. But always not as strong as Kurdish program 7540 kHz from Mykolaiev-Ukraine, for comparison.

Neighbours are  
7505 FEBC Manila S=7  
7525 VOA Tinang-PHL + CHN jammer, S=8.

Aoki list shows Dushanbe site, but guess that's 'to read tea leaves'.

Probably, bcst coming from Armavir Krasnodar - or Samara Russia site, probably directional antenna at 180 degrees southwards to the Southern Azerbaijan target. That's why the signal is rather bad here in Europe.  
(wb, wwdxc BC-DX TopNews Dec 30)

Mostly ISR and US intelligence operations feed by \$-budget, mostly given contact P.O.Bs not in WA-DC, but veiled action in Chicago area or even via Dutch phone number or Vienna Austria P.O.B. - most likely Israel's embassy connection - area, like against Iraq in the 70- and 80ties.  
(wb, wwdxc BC-DX TopNews Dec 29)

History of 'hidden' radio stations to Southern Azerbaijan in 1996-2003:

UNIDENTIFIED RADIO STATIONS R. Free Azerbaijan??  
From about late June a station in Azeri/Farsi has been heard 1530-1630 UTC mixing with R. Netherlands to South Asia. The QRM was bad making ID difficult. However, on 25 July an ID sounding " ...Azadese Azerbaijane..." was heard before it s-off at 1630 UTC. The word "Azad" or similar sounding ones all mean 'free' in the central asiatic languages as any DXer would know. So at once we presumed this was a clandestine and sought the help of BBC\_M and we were thrilled to get the following info from Chris Greenway and we quote

"Victor,  
Thanks for this. This is definitely a scoop for you as we only heard about the existence of this station on 25th July, so it was interesting to know that you've been hearing it for a while. It appears to be aimed at so-called "southern Azerbaijan", i.e. Azerbaijan province in northwestern Iran, rather than the Republic of Azerbaijan itself. It's an ANTI-Iranian operation. It's early days yet but I hope we'll be able to let you know more soon."  
(Chris Greenway, BBC\_M, July 1996)

So we thank the ever helpful BBC Monitoring for shedding light on the station. Tnx Chris.

(GVG 4S7VK, UADX Sri Lanka, July 27, 1996)

ISR(?)/IRAN/AZERBAIJAN Subject: fwd: New SW clandestine station broadcasting to Iran. Some interesting news for clandestine radio enthusiasts:

Voice of Southern Azerbaijan is a new clandestine station bc to Iran. The schedule is 1530-1630 UTC on 12090 kHz. The signal here in the UK is rather weak but clear as this is a clear channel. No jamming as yet. The ID in Azeri is "Bura Janubi Azerbaijan Sasi" ("This is the Voice of Southern Azerbaijan").

The station is aimed at the Azeri population in NoWe Iran, hence the use of the term "Southern Azerbaijan". I think the credit for first hearing the station must go to Victor Goonetilleke who tells me that he's been hearing it since June. This is also the unidentified station reported by Vladimir Titarev in DW Window 23. Although the station is announcing a telephone number in the Netherlands we think the tx site is somewhere in the Middle East.

(Chris Greenway/BBC\_M, via Dave Kenny, July 31, 1996)

New opposition radio Voice of Southern Azerbaijan, a new anti-Iranian radio station has started operations.

A cassette tape and a letter relating to the station, both in Azeri, have also been sent by the National and Independent Front of Southern Azerbaijan to BBC\_Monitoring. ... This cassette has been sent to you from the National Independent Front of Southern Azerbaijan, the station that operates a radio station from a secret location, the station that broadcasts to our nation in Southern Azerbaijan and to all residents of Iran. This station broadcasts between eight and nine o'clock, Iran time, [1530-1630 UTC] on 12090 kHz or 24 mb ... You can also phone us and tell us your news. Our telephone number outside the country is 00 31 703 192189 [The Netherlands]. ... our struggles are to achieve the following objectives:

1. Complete national and cultural autonomy.
2. The Azeri language to be acknowledged in Iran as the second official language. In Azeri regions, the Azeri language should be acknowledged as the first language and should be taught in schools.
3. Azeris to have complete control over their region, their land, their natural resources.
4. Economic equality, the people of Southern Azerbaijan not be discriminated against.
5. Good education and training to be provided and the great traditions of the Azeri people to be valued.
6. Azeri representatives be promoted to high positions within government departments if they deserve to be promoted and not be discriminated against.
7. The budget for the Azeri minority to be allocated according to the population, or taxes [for Azeri people] to be reduced by as much as half the present level...

One people, one language, one blood, The National and Independent Front of Southern Azerbaijan. ...

(BBC\_M - BBC\_Monitoring, via AGDX, Jul 26-30, 1996)

## CLANDESTINE RADIO STATIONS

IRAN 9927 kHz. On Victor's tip last week, heard V.O.Southern Azerbaijan with fair signals at 1615 kHz, no jamming (Krone, Sep 10) and again 1540-1600+ with (pres) Azerbaijani talk, mx 1555-1600 UTC into talk agn; many mentions of Azerbaijan. Fair, and no jamming.  
(Finn Krone-DEN dswci, Sep 15, 1996)

Voice of Southern Azerbaijan (Azeri: Bura Janubi Azerbaijan Sasi), which was first heard in July 1996, is operated by the National and Independent Front of Southern Azerbaijan. Southern Azerbaijan is the Iranian province of Azarbayjan which borders the Republic of Azerbaijan. Programming is hostile to the Iranian government.

The radio says that it broadcasts programmes about "the daily life of the people of Southern Azerbaijan under Iranian oppression, the struggles of our brothers who live in Northern Azerbaijan (Republic of Azerbaijan), their long standing war with the Armenian enemy who receives help from Iran, programmes about our Azeri inheritance, our great history and civilization..."

(BBC\_M via AGDX, Sep 20, 1996)

[yes 9927 kHz easily heard on Sept 15th, but not on air Sat 14th, 1996.  
WB]

IRAN Voice of Southern Azerbaijan radio schedule. The opposition radio stn Voice of Southern Azerbaijan is currently observed with bcs in Azeri 0615-0715 UTC on 11935 kHz, 1630-1730 on 6055 kHz. This radio st, which was first observed in July 1996, bcs in support of the National and Independent Front of Southern Azerbaijan, hostile to the Iranian government. Southern Azerbaijan is the Iranian province of Azarbayjan which borders the Republic of Azerbaijan.  
(BBC\_Monitoring research Dec 1996-Jan 1997, via AGDX)

## CLANDESTINE RADIO STATIONS

[from CIS?] V of Southern Azerbaijan in Azeri on 11935 kHz signing on at 0615 UTC with the signature tune followed by opening anmts by yl and then into formal prgming. Good signals here in Sri Lanka. Signing off at 0715 UTC.

(Sarath Weerakoon-CLN 4S5SL, UADX, Jan 14, 1997)

UNIDENTIFIED v7095 kHz - Unid R. with highly Turkish songs at 1700 UTC, with a reference by to man Alma Ata at 1710 UTC then man speaking continuously till my tune out. Azeri matters then gone into Azeri music. I wonder if it is R F Azerbaijan.

(Zacharias Liangas-GRC, via TFW, Mar 15-18, 1997)

Today noted VOF Azerbijan new v7093 kHz at 1530-1630 UTC (x1630). Iran on Summer time since Sunday 23rd March?

(Victor Goonetilleke-CLN 4S7VK, UADX, Mar 25, 1997)

## CLANDESTINE RADIO STATIONS

Voice of Southern Azerbaijan in Azeri one hour later, from Sept 14th: 0615-0715 11935 [under RNW Holland in Dutch], 1630-1730 12070 kHz.

(PanIview-BUL, Oct 10; Noel Green-UK, Oct 20, 1997)

[which ME country changed to winter time on Sept 14th? ISR is likely]

Voice of Southern Azerbaijan (Azeri: Bura Janubi Azerbaijan Sasi), which was first heard in July 1996, is operated by the National and Independent

Front of Southern Azerbaijan. Southern Azerbaijan is the Iranian province of Azarbayjan, which borders the Republic of Azerbaijan. Programming is hostile to the Iranian government. The radio says that it broadcasts programmes about "the daily life of the people of Southern Azerbaijan under Iranian oppression, the struggles of our brothers who live in Northern Azerbaijan (Republic of Azerbaijan), their long standing war with the Armenian enemy who receives help from Iran, programmes about our Azeri inheritance, our great history and civilization ..."  
All broadcasts will be one hour earlier in summer.

Addr: Vosa Ltd., Postfach 108, A-1193 Vienna, Austria.  
A contact telephone number is announced in the Netherlands: +31-307-192189 (BBC\_M via AGDX, Jun 1997)

Voice of Southern Azerbaijan at about 1650-1730 on v7094.94 in Azeri[?].  
(WB, wwdxc Jan 1, 1998)

Southern Azerbaijan Clandest stn still on v11934.90 kHz at 0615-0715 UT.  
(WB, wwdxc Feb 21-22, 1998)

7094.95, Voice of Southern Azerbaijan, 1645-1731\* Feb 21, presumed Azeri, endless talks (a little similar to Farsi), giving tel. numbers at the end of the prgm; not one note of mx in the 45 mins.; good.  
(both Korinek-RSA, via NumeroUno, Feb 23, 1998)

11934.91v, Voice of Southern Azerbaijan, still hrd here at 0615-0715. Both 7094.93 and 11934.91 are not so strong like professional stns beaming Europe, estimated power of 20 to 50 kW and beam direction aside of EUR.  
(WB, wwdxc Feb 24, 1998)

DARC German Ham Radio Club Bandwatch informed about distortion on ham band channel 7095 kHz, caused by Voice of Southern Azerbaijan.

7095 1629 06 02 M.Ea VoSA A3E carrier  
7095 1630 06 02 M.Ea VoSA A3E s/on px  
7095 1630 10 02 M.Ea VoSA A3E s/on px - QSA5 (S=9+60dB)  
7095 1642 11 02 M.Ea VoSA NON carrier  
7095 1632 14 02 M.Ea VoSA A3E addr always told at 1633  
7095 1625 15 02 M.Ea VoSA A3E s/off at 1730  
7095 1728 17 02 M.Ea VoSA A3E QSA5 (S=9+55dB)

They announce an address in Vienna, Austria:  
VOSA Ltd. (I guess VOSA means "Voice of Southern Azerbaijan"- dj9kr)  
Postfach 108, A-1193 Vienna, Austria

They announce a phone number in Holland: Its an answering machine which really works, I tried it this morning: 0031 - 3 07 19 21 89 The voice is Azeri language.

The German Telecoms. have pinpointed the tx-er in triangle ISR/JOR/ARS !!!

The QRG is 7095, and the signal here up to S=9+60dB with a dipole.  
(DARC Ulrich Bihlmayer DJ9KR, INTERNET: <dj9kr-monitor @ t-online.de> )

[Acc to Mr. Vafa Culuzadeh, adviser of former Azerbaijan President Ebulfez Elicibey, noted the Italian press agency IPS in Okt 1992 from Baku, that the Israelian secret service specialist David Kimche and US citizen

Richard Secord, who was involved in the Iran-Contra-Affair, visited Azerbaijan, presenting a delegation of more Israeli secret service personnel. Mr. Culuzadeh took part on a return visit to Israel, lead a delegation of Azerbaijan/Uzbek/Kazakh secret services.]

<[http://en.wikipedia.org/wiki/David\\_Kimche](http://en.wikipedia.org/wiki/David_Kimche)>

<[http://www.nytimes.com/2010/03/10/world/middleeast/10kimche.html?\\_r=1](http://www.nytimes.com/2010/03/10/world/middleeast/10kimche.html?_r=1)>

<<http://www.independent.co.uk/news/obituaries/david-kimche-spymaster-who-established-mossad-as-a-force-in-international-espionage-1957199.html>>

All VoSA txions are much weaker than KOL ISR txions and not so audio present, but the presentation is in very professional manner. VoSA signal level is equal to clandestine Iraqi B/Cing Corp. (IBC) on 9568v. Txions are not exact on x.00 kHz, drifting a little bit downwards to 11934.94 / 7094.91 kHz. BUT formerly suggested Tadjik Orzu tx site being exact on x.00 like 5750 and 5800 kHz. Azimuth fr ISR to IRN/AZE is 70 degrees. To compare 7095 by 7465 300 kW 70 degr: KOL Israel bcasts in Persian at 1500-1600 (-1625 Fri/Sat) on 7465, 9435, 11605 kHz, and is much stronger than VoSA.

Can anyone help with deeper information and direction finding of VoSA. Help is appreciated by the Ham Radio society. ed.

Comment: notice that given phone numbers differ.

All the activities against the present govt. of Iran seemingly are supervised by some foreign secret services, like CIA and Mossad. [ed]

This station was first reported via Media Network progr by V. Goonetilleke back to 1997 (?) on 12080 (or 12075) kHz. One day, when I tuned in my rx to this channel I found an open carrier with "Reshet Bet" (ISR home sce programme) on the background and then VoSA signing on, so, it seems ISR is a right location of the Voice of Southern Azerbaijan. (Nikolay Pashkevich-RUS, Feb 27, 1998)

So perhaps Israel of the three [ISR/JOR/ARS]. Paniview reported previously that this station switches to DST the same time that Israel does. So let's see if they do it again this year. (Hans Johnson-FL-USA, Feb 26, 1998)

Considering Nick's observation, the Tajikistan assumption is of course obsolete. So the transmitter is likely situated in Israel, but in my opinion not operated by KOL (absence of their usual soundprocessing). With these current stage of knowledge I now want to support the assumption, that Mossad brings the Vo Southern Azerbaijan on the air. (Kai Ludwig-D, Feb 27, 1998)

Voice of Southern Azerbaijan is the mouthpiece for the National & Independent Front of Southern Azerbaijan against Iran. ID in Azeri is: Bura Janubi Azerbaijan Sasi. Address has been announced as Vosa Ltd., Postfach 108, A-1193 Vienna, Austria. Recent reports have its schedule as \*0615-0715\* 11934.9v kHz and \*1630-1730\* 7094.90 kHz.

The group advocates integration of a northern strip of Iranian soil with Azerbaijan since it is rich in oil and is where Iran wants to build a pipeline from the ocean to Central Asia. If its location is found to be in Israel, this will be the clearest evidence that Israel's intel agency, Mossad, is involved in clandestine broadcasting.

(Grace Clandestine Radio Intel Web, Feb 27, 1998)

CLANDESTINE Voice of Southern Azerbaijan, Unidentified site, 7095, 1630 sign on with female speaker in Azeri, giving Postfach addr in Vienna and phone numbers. Then short folk tune and presumed nx. SINPO 33443. Tx site speculated to be in Israel.

(Michiel Schaay-HOL, Feb 28, 1998)

With the help of DF - direction finding - bearings from several other European monitoring stns we are now able to confirm that, ibid. - incidentally, we have also recently taken bearings for Voice of Southern Azerbaijan which appear to confirm an Israeli tx site.

(Dave Kenny, BBC\_Monitoring, UK, Mar 11, 1998)

ISRAEL/IRAN Natl Ind Front of Southern Azerbaijan. Voice of Southern Azerbaijan (Azeri: Bura Janubi Azerbaijan Sasi), which was first heard in July 1996, is operated by the National and Independent Front of Southern Azerbaijan. Southern Azerbaijan is the Iranian province of Azarbayjan which borders the Republic of Azerbaijan. Programming is hostile to the Iranian government. The radio is believed to transmit from Israel.

The radio says that it broadcasts progrs about "the daily life of the people of Southern Azerbaijan under Iranian oppression, the struggles of our brothers who live in Northern Azerbaijan (Republic of Azerbaijan), their long standing war with the Armenian enemy who receives help from Iran, progrs about our Azeri inheritance, our great history and civilization."

All bcs will be one hour EARLIER in SUMMER.

(BBC\_M via AGDX, Mar 13, 1998)

CLANDESTINE from ISRAEL to IRAN, Voice of Southern Azerbaijan BBC Monitoring has recently taken bearings of this station which appear to confirm an Israeli tx site.

(Dave Kenny-UK, Mar 11, 1998)

ISRAEL (clandestine to Iran) 13645, [1530-1630] Voice of Southern Azerbaijan: Tnx to WB's tip, I listened to this one on Apr 12. The carrier came on arnd 1525, and then the signature tune at 1530, followed by the opening anmts by a YL greeting the listeners with what sounded in Azeri like "shalom." I believe the Israeli connection is to neutralize the Iranian advances in Southern Azerbaijan.

(Sarath Weerakoon-CLN 4S5SL UADX, Apr 12, 1998)

Fr Apr 1st, VOSA in Azeri heard in BUL 0515-0615 11934.94 under BSKSA, and RNW from 0600. 1530-1630 on new 13644.94 Sinpo 55544.

(PanIview-BUL, Apr 23, 1998)

ISRAEL 13645 VOSA - Voice of the Southern Azerbaijan, May 9, 0515-0615, Azeri lang. Clandestine radio stn Voice of Southern Azerbaijan (Azeri: Bura Janubi Azerbaijan Sasi), from Israel, programming is hostile to the Iranian govt. Operated by the National and Independent Front of Southern Azerbaijan.

Now also daily MORNING progr on 13645, ex11935, S=2-3. Typical VOSA style, P.O.Box addr given at 0615, and phone no. in Den Haag in the Netherlands. Program ends at 06.16:30, tx s-off at 06.16:40. 0515-0615 and 1530-1630, both on 13645 kHz.

Addr: Vosa Ltd., Postfach 108, A-1193 Vienna, Austria. Contact telephone number in the Netherlands: +31-307-192189 (WB, wwdxc May 9, 1998)

ISRAEL Winter time in ISR starting from Sep 6, not from 13 th. Now all px of Kol Israel is 1 hour later but on same freqs. On Sep 29&30 there was a silence on all SW outlets, exc that operating on 9435, but with carrier only!!!

Clandestine radio stn V O S A in Azeri heard from Fri Sep 25 one hour later. 0615-0715v & 1630-1730v on 13645.1 kHz.  
(PanIview-BUL, via wwdxc Oct 8, 1998)

ISRAEL 13645 Voice of Southern Azerbaijan in Azeri to Northern Iran via KOL tx site in Jerusalem-ISR noted with extreme strong signal s-on at 0613.  
Before the VOSA progr started, KOL ISR nx could be observed, // 15615 kHz.  
(WB, wwdxc Nov 22, 1998)

[ALBANIA/IRAN/UK] FEBA Radio in Azeri. Those tests [via TWR Albania relay] are in fact complete now. The Rep of Azerbaijan does not have a significant audience for SW bcs, and our primary audience is in the Iranian provinces of East and West Azerbaijan. We did arrange to set up some in-country monitoring.  
(Peter Philips-UK, FEBA, via hcjb, Aug 18, 1999)

CANADA/IRAN Azeri nationalists launch new radio stn in CAN. Head of the SAP's press sce, said that after lengthy debate, the radio stn of the SAP had finally started operating. "The radio has aired sample progrs. Its first progrs have been a success. The radio is called SAP.

It intends to publicize in NoAM the problems of Karabakh and of national liberation in Southern Azerbaijan [northern Iran]. I think that the radio will benefit both Northern [Azerbaijan proper] and SoAzerbaijan from the first day of its operation." Javad Ismayilly said that the radio was owned by Hashim Garapapag, former activist of the National Liberation Movement of SoAzerbaijan. "The radio is bc on the territory of CAN for the time being. The idea is to bc to the greater part of the USA in future. ... The SAP radio will be bc on the Internet in the near future.  
(entitled "Southern Azerbaijani parliament radio launched" in Azerbaijani newspaper 'Bizim Asr', Baku, via BBC\_M via dxld, Mar 4, 2000)

AZERBAIJAN 9375 V.O.Southern Azerbaijan Radio. Nov 3 at 1634-1644 UT, 34433 Azerbaijan, Talk. ID at 1637 UT.  
(Kouji Hashimoto-JPN, JPNpremium Nov 3, 2003)

SAUDI ARABIA [ABU DHABI progr] On Dec 8th (only?) instead of BSKSA Riyadh's progr in Fr 0800-0955 UT, was aired a special progr from Abu Dhabi with ID "Idaatu halifia ... min Abu Dhabi" in Ar with reportages from ? Mecca. Till 0855 UT heard on 17765 and 17785 and from 0855 UT only on 17785 kHz.

Heard in Urdu 1352-1400 UT on 13775 and 17660 kHz and from 1400-1555 UT on

17660 kHz in Fr. Progr called "The Time Of My Life" in En with phone calls of teenagers in studio of Radio Jeddah is on the air on Wednesdays (and in other days?) 1115-1145 UT on 15250 kHz. The Buzz tx of BSKSA is on the air 0955- approx 1450 UT on 11785 kHz with HQ in Ar and also noted on 9675 kHz at 1800 UT in Turkish.

(Rumen Pankov-BUL, wwdxc BC-DX TopNews Dec 27)

SOLOMON ISLS 5019.860, on Dec 12 at 1050 UT, SIBC gar nu relativt ofta. 2-3. OB

5019.860 Dec 12 at 1050 UT, SIBC can now be heard quite often. 2-3. (Olle Bjurstroem-SWE, SW Bulletin Dec 26 translated by editor Thomas Nilsson-SWE via dxld Dec 29)

9545 On Monday 13 December I heard SIBC on 9545 kHz around 0700 UT. I haven't heard them since. I asked a friend who is in the Solomon Islands serving with RAMSI (The Regional Assistance Mission To The Solomon Islands) if he can find out what it was about and he said after visiting SIBC, he was told it was a test transmission conducted by a Radio NZ technician who was there installing new equipment and repairing some problems.

Unfortunately the 9545 kHz transmitter can't be used at present because a transmitter cooling unit has failed, but it is hoped it will soon be fixed and 9545 kHz will be used during local daylight hours.

(William Hague-AUS NWDXC, wwdxc BC-DX TopNews Dec 30)

SPAIN Dagegen knallbumm immer REE Noblejas in Spanisch um 0735 UT auf 9780drm, eine sichere Bank mit S=9+30dB, SNR 24.2 dB.

DRM ist fast eine 'technische Quaelerei', zu manchen Tageszeiten muss man eine Aussendung, wie die Preziosen suchen ...

Dagegen laesst sich am fruehen Morgen NZL 11675 kHz und Moskau Taldom 11635 kHz durch Einbrueche nicht dekodieren, Moskau wird dann im Laufe der Sendezeit besser und das Fernost/Pazifik Programm in English ist in Studioqualitaet mitzuhoeren.

(wb, wwdxc BC-DX TopNews Dec 24)

SWEDEN 17.2 kHz Noch eine Sendung von SAQ.

Eben kam ein Mail aus Schweden, Auswertung der Weihnachtssendung von SAQ. Sehr gute Resultate, auch in den USA wurde SAQ empfangen.

Um noch mehr Hoerern in den USA die Moeglichkeit des Empfangs zu geben, gibt es demnaechst noch eine Sendung mitten in der Nacht vom 3. auf den 4. Januar um 0000 Uhr UTC.

The Christmas Eve transmission was successful. 195 reports, so far. Seven positive reports from North America! Many stations claimed QRM.

The German stations were in mass this time, like before, 63 reports, almost a third of all. Can any country beat that?

Thank you for a first report from Iceland.

There will be an extra transmission on the night between January 3rd and January 4th next year in order no give stations in North America a better

chance to hear SAQ. Of course we are glad to also receive reports from other areas.

#### EXTRA - GRIMETON RADIO/SAQ TRANSMISSION.

There will be an extra transmission with the Alexanderson alternator on 17.2 kHz for, for primarily, listeners in North America, at:

\* 16:00 PST (Pacific Standard Time) in USA. Monday, January 3rd, 2011

\* 19:00 EST (Eastern Standard Time) in USA. Monday, January 3rd, 2011

\* 00:00 UTC (Coordinated Universal Time) WeEurope. Tue, Jan 4th, 2011

\* 01:00 CET (Central European Time) LT in Sweden. Tue, Jan 4th, 2011

QSL-reports are kindly received:

- E-mail to: <info @ alexander.n.se>

- or fax to: +46-340-674195

- or via: SM bureau

- or direct by mail to:

Alexander - Grimeton Veteranradios Vaenner,

Radiostationen, Grimeton 72

UK/RUSSIA 7240 YFR - both - via SKN and ARM.

7240 Today Dec 25 undoubtedly YFR (most likely via Skelton) - scheduled

YFR Turkish - but heard program in English instead, with western christmas

songs, YFR fanfare 1859 til 1900 UT. Only S=3-4.

[RUSSIA] 7240 ANOTHER TX ONE - MUCH STRONGER. But as awaited, at

18.54:04 UT Armavir Russia tx switched on, and heard with 800 Hz test tone

onwards til 18.58, started at exact 1900 UT with YFR fanfare. At 1905 UT

sermon in Swedish. Fading S=7 up to S=9+3dB in peaks, not much strong

tonight. Heavily hit by CRI Baoji-Xinjie in Russian on 7245 kHz S=9+20dB.

18-19 UT YFR via Skelton-UK.

19-21 UT YFR via Armavir-RUS.

(wb, wwdxc BC-DX TopNews Dec 25)

USA 18530hx on Dec 25 at 1458 UT, the Brother Scare organ was playing, weak but unmistakable. On Saturdays only we may enjoy the WINB second harmonic all day from 9265 as 13570 takes a break.

(Glenn Hauser-OK-USA, dxld Dec 29)

9245.8 on Dec 26 at 2220 UT, spur from WWRB // 9385 kHz with Overcomer, but non-Brother Scare speaking at the moment. Very weak and fading. Could not find a match on the hi side, 9524.2 kHz.

9479 on Sat Dec 25 at 2012 UT, WTWW has finally broken away from Pastor Pete Peters. There had been rumors that he was considering allowing some other programming despite his 24/7 purchase of WTWW-1 airtime. What else but QSO with Ted Randall, who has also been involved with this station from the start, did the test broadcasts and produced the IDs. [...]

Frequency is really 9479 -, but Ted thinx 9480 is close enough. QSO had been running Sat 19-20 UT on WBCQ 7415, as well as UT Sundays 01-05++, so I check 7415 kHz at 2015 UT: no, not //, something else, an OL talking about Xmas unless it was a different QSO interviewing her. {Oops, that was an hour too late anyway.}

Since I heard it after 2000 UT, but at 2100 Scriptures for America was back on 9479, QSO must be two hours at 19-21 Sats.

(Glenn Hauser-OK-USA, dxld Dec 29)

USA/SLOVAK REP Radio Eslovaquia Internacional Seguirá Transmitiendo en Onda Corta en 2011.

Radio Slovakia International to Continue on Shortwave in 2011

A last-minute agreement between Radio Slovakia International and Radio Miami International will permit the international radio station of Slovakia to continue its shortwave transmissions in English and Spanish to the Caribbean and Latin America.

Radio Slovakia International had announced that its shortwave broadcasts would end on December 31, 2010. However, Radio Miami's station WRMI will be broadcasting RSI's program in English at 0130-0200 UT Tuesday-Saturday and RSI's Spanish program at 0330-0400 UT seven days per week. Both of these transmissions will be on 9955 kHz with 50 kilowatts of power from Miami using a beam of 160 degrees directed to the Caribbean and Latin America.

"We are glad to be able to help Radio Slovakia International continue its shortwave transmissions to this part of the world," said WRMI General Manager Jeff White. He added that listener reports will be appreciated and will be verified with a special WRMI QSL card commemorating the Radio Slovakia International relay. Reports may be sent to Radio Miami International, P.O.Box 526852, Miami, Florida 33152 USA, or by e-mail to <info @ wrmi.net> (WRMI Dec 29, direct from Jeff White and via dxld)

But will the DentreCuban Jamming Command cooperate? 0130 UT will mostly knock out some DX programs, including WOR on UT Wednesday. At 0330 WRMI is already running WRN several days a week.

(gh, dxld)

VANUATU 7259.959v on Dec 25 at 0820 UT, (tentative), male talk in French. Boring to listen to and no ID. This morning relatively strong. The transmitter is somewhat unstable.  
(Anders Hultqvist-SWE, SW Bulletin Dec 26 translated by editor Thomas Nilsson-SWE for dxld)

YEMEN 9780.168 Weak signal from Republic of Yemen, Sana'a program in Arabic, bad propagation around 0618 UT Dec 30.  
(wb, wwdxc BC-DX TopNews Dec 30)

ZAMBIA 6162 ZNBC, 2150-2206\*, Dec 23, Afro-pop music. Talk. Instrumental National Anthem at 2205 UT followed by test tone and off. Poor. Very weak. Too weak to catch many program details but did hear definite National Anthem.  
(Brian Alexander-PA-USA, DXplorer Dec 23)

#####

Sonderausstellung im Rundfunkmuseum Fuerth:  
50 x Internationale Funkausstellung Berlin.

Noch bis zum 16. Januar 2011 laeuft eine Ausstellung, die das Rundfunkmuseum Fuerth aus Anlass der 50. Internationalen Funkausstellung in Berlin mit den Veranstaltern der IFA, der gfu Gesellschaft fuer Unterhaltungs- und Kommunikationselektronik mbH, konzipiert hat.

Schon ein Jahr nach dem Beginn des Rundfunks in Deutschland zeigte 1924 die "Grosse Deutsche Funkausstellung" in Berlin nicht nur, was in der naechsten Saison Neues zu erwarten war. Immer wurden hier Innovationen vorgestellt, deren Umsetzung fuer ein breites Publikum oft erst viele Jahre spaeter erfolgte: 1928 erblickte dort das Fernsehen das Licht der Welt, 1935 folgte die magnetische Schallaufzeichnung, um nur zwei fruehe Beispiele zu nennen. Nach der Leitmesse in Berlin wurden die neuen Modelle im ganzen Land gezeigt, im Oktober 1930 etwa in Fuerth, wo sich Max Grundig erstmals einem breiten lokalen Publikum als Radiohaendler praesenterte.

In vielen Rauminstallationen werden auf 1000 qm Ausstellungsflaeche Highlights aus der Geschichte der Unterhaltungs- und Kommunikationsmedien gezeigt: Vom Detektor- bis zum Internetradio, von der Nipkow-Scheibe bis zum Flachbildschirm, vom Grammophon zum MP3-Player. Digitale Bilderrahmen verdichten die Geraeteausstellung, verweisen auf die einzelnen Funkausstellungen mit ihren Besonderheiten, zeigen zeitgenoessische Werbung und Radiohoerer in alten Bildern, geben in Detailaufnahmen einen Einblick in Formgebung und Design von Gebrauchsgeraeten, die unser Leben begleiten. Mit historischem und zeitgenoessischem Filmmaterial wird ein Bogen von der "1. Grossen Deutschen Funkausstellung" 1924 zur "Edition 50. IFA" 2010 gespannt.

In Zusammenarbeit mit mehreren Firmen der Unterhaltungselektronik werden auch einige der aktuellen Trends des Jahres 2010 wie 3D-Fernsehen vorgestellt.

Das Rundfunkmuseum in der Fuerther Kurgartenstrasse, das leicht auch mit der U-Bahn zu erreichen ist, hat dienstags bis freitags 12.00-17.00 Uhr

MEZ-CET geoeffnet, samstags, sonntags und feiertags 10.00-17.00 Uhr MEZ-CET.
